Resolution No. PC-2023-

EXHIBIT A

FINDINGS

- A. The proposed project complies with Costa Mesa Municipal Code Section 13-29(g)(2) because:

Finding: The proposed development or use is substantially compatible with developments in the same general area and would not be materially detrimental to other properties within the area.

Facts in Support of Findings: The subject site is located within the CL zone (Commercial Limited District) and the general vicinity includes a variety of commercial uses including office, retail, fitness, and restaurant uses. Pursuant to the CMMC, cannabis retail storefronts are conditionally permitted uses in the City's commercial zones and are subject to extensive regulation. These regulations are adopted to prevent land use inconsistencies with adjacent properties. Additionally, the proposed cannabis retail storefront use is not located within 1,000 feet of a K-12 school, playground, licensed child daycare, or homeless shelter, or within 600 feet of a youth center. All retail sales would take place underroof, no outdoor storage or sales are proposed nor would be allowed.

The CMMC does not establish a minimum separation between retail cannabis uses and residential uses. Instead, the City's thorough, multi-step permitting process and project-specific conditions of approval decrease the potential for the proposed use to impact neighboring properties, including residential uses.

As conditioned, the use would operate under restricted hours in consideration of adjacent uses. Other conditions of approval are designed to further improve compatibility with other uses in the area, including but not limited to:

- At least one security guard shall be present at all times;
- Odor control devices and techniques shall be incorporated to ensure that odors from cannabis are not detected outside the property, anywhere on adjacent property or public right-of-way;
- A lighting plan shall be provided during plan check and exterior lighting shall be shielded down and away from adjacent properties;
- Signs regarding consideration and noise shall be posted in the parking lot;
- A parking management and security plan would be required for any grand opening or other high volume event; and

- The operator would be required to make changes to the business should noise or parking problems arise.

The proposed use would be substantially compatible with developments in the general area and would not be materially detrimental to other properties within the area.

Finding: Granting the conditional use permit will not be materially detrimental to the health, safety and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Facts in Support of Finding: The proposed cannabis retail storefront use would follow safety measures detailed in a professionally prepared security plan. The security plan was evaluated for compliance by the City's cannabis consultant, HdL. Measures designed to maintain safety at the site include, but are not limited to, at least one security guard would be onsite at all times and security devices shall be installed before operation. Examples of security devices include window and door alarms, motion-detectors, limited access areas, and a monitored video surveillance system covering all exterior entrances, exits, and interior limited access spaces. In addition, the business employees must pass a live scan background check and obtain an identification badge from the City. As conditioned, the proposed use would feature air filtration devised so odors from cannabis are not detected outside the property. When operating in accordance with the professionally prepared security plan and in conformance with local and State laws, the proposed use would not be materially detrimental to public health and safety, or otherwise injurious to property or improvements within the immediate neighborhood.

Finding: Granting the conditional use permit will not allow a use, density or intensity which is not in accordance with the general plan designation and any applicable specific plan for the property.

Facts in Support of Finding: The proposed retail use would be located in an existing commercial building on a property that has a General Plan land use classification of "Neighborhood Commercial." Given the limited customer area (approximately 400 square feet) of the proposed retail establishment, and being located several hundred feet from a major commercial corridor, the proposed use is considered a neighborhood-serving business as intended by the General Plan. No additional square footage is proposed and the current use is retail in nature, therefore approving the CUP would not increase site intensity. The proposed use, as conditioned, is consistent with General Plan policies related to providing a mixture of commercial goods, services, and employment opportunities; expanding the City's tax base; promoting the incubation of unique and specialized businesses; protecting neighborhoods;

reducing nonresidential traffic in residential neighborhoods; and reducing noise impacts on sensitive receptors.

- B. The project is categorically exempt from the provisions of CEQA pursuant to CEQA Guidelines Section 15301 for the permitting and/or minor alteration of Existing Facilities, involving negligible or no expansion of the existing or prior use. This project site contains an existing commercial building that has previously been used for commercial activities and the application does not propose an increase in floor area and reflects a negligible expansion of the prior commercial use. The project is consistent with the applicable General Plan land use designation and policies as well as with the applicable zoning designation and regulations.
- C. The project is subject to a traffic impact fee, pursuant to Chapter XII, Article 3 Transportation System Management, of Title 13 of the Costa Mesa Municipal Code.

EXHIBIT B
