City of Costa Mesa

REGULAR CITY COUNCIL AND SUCCESSOR AGENCY TO THE REDEVELOPMENT AGENCY AND HOUSING AUTHORITY

Agenda

Tuesday, November 15, 2022	**6:00 PM**	**City Council Chambers** **77 Fair Drive**

***Note: All agency memberships are reflected in the title "Council Member"**
4:00 P.M. Closed Session

The City Council meetings are presented in a hybrid format, both in-person at City Hall and virtually via Zoom Webinar. Pursuant to the State of California Assembly Bill 361(Gov. Code §54953(b)(3)) the City Council Members and staff may choose to participate in person or by video conference.
You may participate via the following options:

1. Attending in person: Attendees are encouraged to wear masks at their discretion. If you are feeling ill, or if you've been exposed to someone with COVID-19, you may still participate in the meeting via Zoom.

2. Members of the public can view the City Council meetings live on COSTA MESA TV (SPECTRUM CHANNEL 3 AND AT&T U-VERSE CHANNEL 99) or http://costamesa.granicus.com/player/camera/2?publish_id=10&redirect=true and online at youtube.com/costamesatv.

3. Zoom Webinar: (For both 4:00 p.m. and 6:00 p.m. meetings)
Please click the link below to join the webinar:
https://us06web.zoom.us/j/98376390419?pwd=dnpFelc5TnU4a3BKWVIyRVZMallZZz09
Or sign into Zoom.com and “Join a Meeting”
Enter Webinar ID: 983 7639 0419/ Password: 905283
• If Zoom is not already installed on your computer, click “Download & Run Zoom” on the launch page and press “Run” when prompted by your browser. If Zoom has previously been installed on your computer, please allow a few moments for the application to launch automatically.
• Select “Join Audio via Computer.”
• The virtual conference room will open. If you receive a message reading, “Please wait for the host to start this meeting,” simply remain in the room until the meeting begins.
• During the Public Comment Period, use the “raise hand” feature located in the participants’ window and wait for city staff to announce your name and unmute your line when it is your turn to speak. Comments are limited to 3 minutes, or as otherwise directed.

Participate via telephone: (For both 4:00 p.m. and 6:00 p.m. meetings)
Call: 1 669 900 6833 Enter Webinar ID: 983 7639 0419/ Password: 905283
During the Public Comment Period, press *9 to add yourself to the queue and wait for city staff to announce your name/phone number and press *6 to unmute your line when it is your turn to speak. Comments are limited to 3 minutes, or as otherwise directed.

4. Additionally, members of the public who wish to make a written comment on a specific agenda item, may submit a written comment via email to the City Clerk at cityclerk@costamesaca.gov. Comments received by 12:00 p.m. on the date of the meeting will be provided to the City Council, made available to the public, and will be part of the meeting record.

5. Please know that it is important for the City to allow public participation at this meeting. If you are unable to participate in the meeting via the processes set forth above, please contact the City Clerk at (714) 754-5225 or cityclerk@costamesaca.gov and staff will attempt to accommodate you. While the City does not expect there to be any changes to the above process for participating in this meeting, if there is a change, the City will post the information as soon as possible to the City’s website.

Note that records submitted by the public will not be redacted in any way and will be posted online as submitted, including any personal contact information. All pictures, PowerPoints, and videos submitted for display at a public meeting must be previously reviewed by staff to verify appropriateness for general audiences. No links to YouTube videos or other streaming services will be accepted, a direct video file will need to be emailed to staff prior to each meeting in order to minimize complications and to play the video without delay. The video must be one of the following formats, .mp4, .mov or .wmv. Only one file may be included per speaker for public comments, for both videos and pictures. Please e-mail to the City Clerk at cityclerk@costamesaca.gov NO LATER THAN 12:00 Noon on the date of the meeting. If you do not receive confirmation from the city prior to the meeting, please call the City Clerks office at 714-754-5225.

Note regarding agenda-related documents provided to a majority of the City Council after distribution of the City Council agenda packet (GC §54957.5): Any related documents provided to a majority of the City Council after distribution of the City Council Agenda Packets will be made available for public inspection. Such documents will be posted on the city's website and will be available at the City Clerk's office, 77 Fair Drive, Costa Mesa, CA 92626.

All cell phones and other electronic devices are to be turned off or set to vibrate. Members of the audience are requested to step outside the Council Chambers to conduct a phone conversation.

Free Wi-Fi is available in the Council Chambers during the meetings. The network username available is: CM_Council. The password is: cmcouncil1953.

As a LEED Gold Certified City, Costa Mesa is fully committed to environmental sustainability. A minimum number of hard copies of the agenda will be available in the Council Chambers. For your convenience, a binder of the entire agenda packet will be at the table in the foyer of the Council Chambers for viewing.

In compliance with the Americans with Disabilities Act, Assistive Listening headphones are available and can be checked out from the City Clerk. If you need special assistance to participate in this meeting, please contact the City Clerk at (714) 754-5225. Notification at least 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. [28 CFR 35.102.35.104 ADA Title II]. Language translation services are available for this meeting by calling (714) 754-5225 at least 48 hours in advance.
En conformidad con la Ley de Estadounidenses con Discapacidades (ADA), aparatos de asistencia están disponibles y podrán ser prestados notificando a la Secretaria Municipal. Si necesita asistencia especial para participar en esta junta, comuníquese con la oficina de la Secretaria Municipal al (714) 754-5225. Se pide dar notificación a la Ciudad por lo mínimo 48 horas de anticipación para garantizar accesibilidad razonable a la junta. [28 CFR 35.102.35.104 ADA Title II]. Servicios de traducción de idioma están disponibles para esta junta llamando al (714) 754-5225 por lo mínimo 48 horas de anticipación.

CLOSED SESSION - 4:00 P.M.

CONSENT CALENDAR (Items 1-13)

All matters listed under the Consent Calendar are considered to be routine and will be acted upon in one motion. There will be no separate discussion of these items unless members of the City Council, staff, or the public request specific items to be discussed and/or removed from the Consent Calendar for discussion.

1. PROCEDURAL WAIVER: WAIVE THE FULL READING OF ALL ORDINANCES AND RESOLUTIONS **22-936**

RECOMMENDATION:

City Council, Agency Board, and Housing Authority approve the reading by title only and waive full reading of Ordinances and Resolutions.

2. READING FOLDER **22-941**

RECOMMENDATION:

City Council receive and file Claims received by the City Clerk: Alexander Gonzalez.

3. ADOPTION OF WARRANT RESOLUTION **22-945**

RECOMMENDATION:

City Council approve Warrant Resolution No. 2690.

Attachments: 1. Summary Check Register 11-1-22
2. Summary Check Register 11-3-22

4. MINUTES **22-943**

RECOMMENDATION:

City Council approve the Minutes of the Regular meeting of November 1, 2022.

Attachments: 1. 11-01-2022 Draft Minutes

5. REQUEST TO CANCEL THE REGULAR CITY COUNCIL MEETING OF JANUARY 3, 2023 **22-934**

RECOMMENDATION:

Staff recommends the City Council cancel the regular meeting of Tuesday, January 3, 2023.

6. APPROVAL OF MAYOR'S APPOINTMENT TO THE ORANGE COUNTY VECTOR CONTROL DISTRICT **22-937**

RECOMMENDATION:

Staff recommends the City Council approve Mr. Bill Turpit as the Mayor's appointment to the Orange County Vector Control District (OCVCD).

7. **RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA SUPPORTING THE IRANIAN-AMERICAN COMMUNITY AND CONDEMNING VIOLENCE AGAINST WOMEN** **22-942**

RECOMMENDATION:

City Council consideration to adopt Resolution 2022-XX in support of the Iranian-American community and condemning violence against women.

Attachments: 1. Resolution for Iran

8. **ADAMS AVENUE AND PINECREEK DRIVE INTERSECTION PROJECT - AMENDMENT NO. 1 TO THE PROFESSIONAL SERVICES AGREEMENT FOR ENGINEERING DESIGN SERVICES** **22-924**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve proposed Amendment No. 1 to the Professional Services Agreement (PSA) with KOA Corporation increasing the maximum compensation by $30,230, for a total not-to-exceed amount of $141,017.

2. Authorize the City Manager and the City Clerk to execute the amendment and any future amendments to the agreement.

Attachments: 1. Amendment No. 1 to PSA with KOA
2. PSA with KOA

9. **POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE PROJECT, CITY PROJECT NO. 22-02** 22-925

RECOMMENDATION:

Staff recommends the City Council:

1. Adopt plans, specifications, and working details for the Police Department Underground Storage Tank Closure Project, City Project No. 22-02.

2. Award a Public Works Agreement (PWA) to American Integrated Services, Inc., 1502 E. Opp Street, Wilmington, CA 90744 in the amount of $156,680.

3. Authorize an additional ten percent (10%) contingency in the amount of $15,668 as needed for any unforeseen costs related to this project.

4. Approve a budget adjustment authorizing the use of unappropriated fund balance in the Capital Improvement Fund (401) in the amount of $48,616 and appropriate said funds to the Police Department Underground Storage Tank Closure Project (Project 200066).

5. Authorize the City Manager and City Clerk to execute the PWA and future amendments to the agreement within Council authorized limits.

Attachments: 1. Bid Abstract
2. PWA

10. MAINTENANCE SERVICES AGREEMENT FOR HVAC MAINTENANCE AND REPAIR 22-926

RECOMMENDATION:

Staff recommends the City Council:

1. Approve the proposed Maintenance Services Agreement (MSA) with Siemens Industry, Inc., for a term of eight months , effective November 15, 2022 - June 30, 2023, in the amount of $154,472.71 for the eight month term to provide HVAC maintenance and repair services for the City Hall and the Police Department facility based on pricing from Sourcewell Contract #070121-SIE.

2. Approve the three year MSA with Siemens Industry from July 1, 2023 to June 30, 2026, with annual compensation amount for year one, $224,734.43, year two, $249,167.58 and third year, $248,228.67.

3. Approve a 10% contingency annually for additional repairs and other unforeseen costs.

4. Authorize the City Manager and City Clerk to execute the MSA and to extend the agreement each year with an effective term of July 1st through June 30th, for up to a maximum of three (3) additional one-year terms.

Attachments: 1. MSA Siemens
2. Siemens Proposal (Sourcewell) 10-24-22

11. SUB-RECIPIENT AGREEMENT FOR THE 2021 URBAN AREA SECURITY INITIATIVE GRANT 22-917

RECOMMENDATION:

Staff recommends the City Council authorize the City Manager and City Clerk to execute the Sub-Recipient Agreement (Attachment 1) with the City of Santa Ana for the FY 2021 Urban Areas Security Initiative (UASI) Grant Program.

Attachments: 1. UASI Agreement

12. COSTA MESA FIRE & RESCUE STRATEGIC PLAN 2022-2027 **22-932**

RECOMMENDATION:

Staff recommends the City Council approve the Costa Mesa Fire & Rescue Strategic Plan 2022 - 2027.

Attachments: 1. CMFR Strategic Plan 2022 - 2027
2. Strategic plan - 2015-2020
3. City of Costa Mesa Goals & Objectives

13. APPROVAL OF RESPONSE TO GRAND JURY REGARDING ORANGE COUNTY EMS AND THE FIRE SERVICE **22-933**

RECOMMENDATION:

Staff recommends the City Council authorize the City Manager and Fire Chief to respond to the Presiding Judge of the Superior Court concerning the findings and recommendations made by the Orange County Grand Jury Report. 2021-2022.

Attachments: 1. OC Grand Jury Report May 2022
2. Responses to the Grand Jury Report 2021-2022

AT THIS TIME COUNCIL WILL ADDRESS ANY ITEMS PULLED FROM THE CONSENT CALENDAR

----------END OF CONSENT CALENDAR----------

PUBLIC HEARINGS:

(Pursuant to Resolution No. 05-55, Public Hearings begin at 7:00 p.m.)

1. PUBLIC HEARING REGARDING THE DEVELOPMENT IMPACT FEES ANNUAL REPORT FOR THE FISCAL YEAR ENDED JUNE 30, 2022 AND THE TRAFFIC IMPACT FEE ANALYSIS 22-952

RECOMMENDATION:

Staff recommends the City Council:

1. Receive and file the Development Impact Fees Annual Report (Attachment 1) for the Fiscal Year ended June 30, 2022.

2. Adopt the attached resolution (Attachment 2) continuing the citywide traffic impact fee for new development that incorporates recommendations from the Traffic Impact Fee Ad Hoc Committee and staff, which include:

   - Continue a traffic impact fee of $235 per Average Daily Trip (ADT) for Capital Improvement Projects and Active Transportation projects

   - Approve allocation of up to ten (10) percent of traffic impact fees towards traffic signal synchronization projects

Attachments: 1. 2021-22 DIF Report Consolidated
2. Traffic Impact Fee Resolution
3. Citywide Traffic Impact Fee Annual Review Report
4. Appendix A - Chronology of City Council Actions
5. Appendix B - Revised TIF Calculation 2022
6. Appendix C and Exhibit A Traffic Impact Fee Annual Accounting FY21-22

2. **APPEAL OF PLANNING APPLICATION 21-07 FOR A CONDITIONAL USE PERMIT TO ALLOW OFF-SITE VALET PARKING ON THE PROPERTY LOCATED AT 1645 SUPERIOR AVENUE AND FOR OUTDOOR SEATING FOR AN EXISTING RESTAURANT (TRENTA PIZZA & CUCINA) LOCATED AT 1661 SUPERIOR AVENUE, SUITE C & D AND ZONING APPLICATION 19-50 (ZA-17-16 A1) FOR A MINOR CONDITIONAL USE PERMIT TO AMEND THE PREVIOUS APPROVAL FOR THE RESTAURANT** **22-918**

RECOMMENDATION:

Staff recommends the City Council uphold the Planning Commission's decision and:

1. Find that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per CEQA Guidelines Section 15301 (Class 1), Existing Facilities.

2. Approve Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1), subject to conditions of approval.

Attachments: 1. Resolution
2. Filed Appeal Application
3. Planning Commission Resolution
4. Site Photos
5. Project Plans
6. Public Comments

3. APPROVAL OF GENERAL PLAN AMENDMENT 21-01 FOR THE CITY OF COSTA MESA 2021-2029 (SIXTH CYCLE) HOUSING ELEMENT UPDATE (AS REVISED), AND ADOPTION OF A RESOLUTION TO OVERRULE THE INCONSISTENCY DETERMINATION MADE BY THE AIRPORT LAND USE COMMISSION FOR ORANGE COUNTY FOR THE CITY OF COSTA MESA'S 2021-2029 SIXTH CYCLE HOUSING ELEMENT UPDATE **22-946**

RECOMMENDATION:

Staff recommends the City Council:

1. Find that potentially significant effects on the environment have been adequately analyzed in the Initial Study/Mitigated Negative Declaration previously adopted on February 1, 2022 for the 2021-2029 (Sixth Cycle) Housing Element pursuant to State law, and find that none of the conditions described in CEQA Guidelines Section 15162 exist; therefore, no further action is required to comply with CEQA.

2. Approve Resolution No. 2022-XX to Overrule the Orange County Airport Land Use Commission's March 17, 2022 Determination that Costa Mesa's 2021-2029 (Sixth Cycle) Housing Element is inconsistent with the John Wayne Airport Environs Land Use Plan.

3. Approve Resolution No. 2022-XX to approve the City of Costa Mesa 2021-2029 (Sixth Cycle) Housing Element (General Plan Amendment 21-01), as revised.

4. Direct the City Manager or designee to submit the adopted Housing Element to the State for certification, and authorize the City Manager or designee to make minor revisions to the adopted Housing Element as necessary to obtain State certification.

Attachments: 1. Housing Element revised (strikethrough underline version)
2. Housing Element Resolution
3. ALUC Overrule Resolution
4. HCD Comment Letter
5. ALUC and Caltrans comments

OLD BUSINESS: NONE.

NEW BUSINESS:

1. APPROVAL OF AMENDMENT TO CITYWIDE RENTAL ASSISTANCE PROGRAM WITH MERCY HOUSE FUNDED BY THE AMERICAN RESCUE PLAN ACT (ARPA) **22-930**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve proposed Amendment No. 3 (Attachment 1) to the Subrecipient Agreement (SRA) with Mercy House Living Centers increasing the compensation by $500,000 and authorize the appropriation of American Rescue Plan Act (ARPA) funds for program administration for the City's ARPA Rental Assistance Program for lower-income households.

2. Authorize the City Manager and City Clerk to execute all agreements and any amendments to the agreements.

Attachments: 1. Mercy House Amendment 3

2. COMMITMENT OF $975,000 IN AMERICAN RESCUE PLAN ACT FUNDS TO FAMILIES FORWARD FOR DEVELOPMENT OF THE BUNGALOWS AFFORDABLE HOUSING PROJECT LOCATED AT 2039 POMONA AVENUE **22-940**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve the appropriation and allocation of $975,000 in American Rescue Plan Act (ARPA) funds, or any other viable source of funds, to Families Forward for the development of The Bungalows Project, an affordable housing project to serve an estimated 36 individuals, contingent upon the successful completion of a financial feasibility analysis by the City's third-party underwriting consultant, Keyser Marston Associates.

2. Authorize the City Manager or their designee to execute the Funding Agreement and all associated documents, as needed, to bring the project to fruition.

3. APPROVE A COMMITMENT OF $850,000 OF LOW/MODERATE INCOME HOUSING ASSET FUNDS TO CM MERCY HOUSE CHDO, LLC, FOR THE CONVERSION OF THE MOTEL 6 INTO A HOMEKEY PROJECT LOCATED AT 2274 NEWPORT BOULEVARD IN COSTA MESA **22-939**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve an appropriation and allocation of $850,000 in Low/Moderate Income Housing Asset Funds to CM Mercy House CHDO LLC for development of the Motel 6 Project Homekey Housing Project.

2. Authorize the City Manager or their designee to execute the Funding Agreement and all associated documents, as needed, to bring the project to fruition and create an estimated 88 units of permanent affordable housing.

4. ADOPTION OF THE 2022 - 2025 MEMORANDUM OF UNDERSTANDING (MOU) BETWEEN THE CITY OF COSTA MESA (CITY) AND THE COSTA MESA CITY EMPLOYEES ASSOCIATION (CMCEA) AND THE ADOPTION OF ACCOMPANYING SALARY RESOLUTIONS FOR CMCEA AND THE CONFIDENTIAL UNIT **22-953**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve and Adopt the 2022 - 2025 Memorandum of Understanding (MOU) between the City of Costa Mesa and the Costa Mesa City Employees Association (CMCEA);

2. Approve and Adopt Resolution Numbers 2022-XX, 2022-XX, 2022-XX, 2022 -XX, 2022-XX, and 2022-XX revising the pay ranges for CMCEA and the Confidential Unit (Attachments I - VII);

3. Approve the Fiscal Impact Analyses (Attachment VIII); and

4. Authorize the City Manager and members of the City's Negotiation Team to execute the MOU documents and appropriate into the respective departmental budgets.

Attachments: 1. CMCEA MOU
2. CMCEA Salary Resolution January 2023
3. CMCEA Salary Resolution July 2023
4. CMCEA Salary Resolution July 2024
5. Confidential Salary Resolution January 2023
6. Confidential Salary Resolution July 2023
7. Confidential Salary Resolution July 2024
8. CMCEA Fiscal Analyses

5. **ADOPTION OF THE SIDE LETTER OF AGREEMENT BETWEEN THE CITY OF COSTA MESA (CITY) AND THE COSTA MESA POLICE ASSOCIATION (CMPA) AND THE ADOPTION OF ACCOMPANYING SALARY RESOLUTION FOR CMPA** **22-954**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve and Adopt the Side Letter of Agreement between the City of Costa Mesa and CMPA (Attachment I);

2. Approve and Adopt Resolution Number 2022-XX revising the pay ranges for CMPA (Attachment II);

3. Approve the Fiscal Impact Analyses (Attachment III);

4. Authorize the City Manager and members of the City's Negotiation Team to execute the Side Letter of Agreement documents, and amend the Fiscal Year 2022-23 Adopted Budget for the Police Department accordingly.

Attachments: 1. CMPA Side Letter
2. CMPA Salary Resolution January 2023
3. CMPA Fiscal Analyses

City of Costa Mesa

Agenda Report

File #: 22-948 **Meeting Date:** 11/15/2022

TITLE:

Proclamation: 2022 Movember

DEPARTMENT: City Manager’s Office

CITY OF COSTA MESA, CALIFORNIA

Proclamation

WHEREAS, Movember started in Australia in 2003 and has since become a global movement with over 6 million MoBros and MoSisters part of the initiative today; and

WHEREAS, is uniquely observed to address the global health crisis among men and raise awareness for the three biggest health issues facing men: mental health and suicide prevention, prostate cancer and testicular cancer; and

WHEREAS, men's health is in crisis, and they are dying on average five years earlier than women, largely for preventable reasons; and

WHEREAS, 1 in 7 men will be diagnosed with prostate cancer in his lifetime, and treatment options for prostate cancer vary depending on a man's age, stage, and grade of his cancer, as well as other existing medical conditions, and testicular cancer, is the most common cancer in males between the ages of 15 and 34; and

WHEREAS, 1 in 4 adults in the U.S. will experience a mental health problem in any given year, and 87 men in the U.S. die by suicide every day; and

WHEREAS, the City of Costa Mesa is committed to raising awareness about men's health issues and their effect on fathers, sons, brothers, uncles, and husbands across Costa Mesa and the world; and

WHEREAS, the City of Costa Mesa encourages its residents to talk about their mental health and commit to a stigma-free culture; and

WHEREAS, the City of Costa Mesa joins communities across our nation to challenge men to grow and make a commitment to get active and MOVE.

NOW, THEREFORE, I, John B. Stephens, Mayor of the City of Costa Mesa, do hereby proclaim November 2022 as **Movember**, and urge all Costa Mesa residents to join in the movement to change the face of men's health.

PRESENTED *this 15th day of November 2022.*

File #: 22-950 **Meeting Date:** 11/15/2022

TITLE:

2022 Hunger and Homelessness Awareness Week

DEPARTMENT: City Manager's Office

CITY OF COSTA MESA, CALIFORNIA

Proclamation

WHEREAS, for over 30 years, the National Coalition for the Homeless and National Student Campaign against Hunger and Homelessness have sponsored National Hunger and Homelessness Awareness Week; and

WHEREAS, the campaign's goal is to educate the public about the many reasons people are hungry and homeless, including the shortage of affordable housing in Orange County for very low-income residents; and to encourage support for homeless assistance service providers as well as community service opportunities for students and school service organizations; and

WHEREAS, hunger, food, nutritional insecurity, and poverty are issues of vital concern in California, where over 4 million people face hunger and one in every 8 children does not know where their next meal will come from; and

WHEREAS, nutrition is the key to our community's well-being, and steady, consistent access to nutritious food increases food security and helps build more resiliency for adults and children; and

WHEREAS, the County's three top causes of homelessness are related to employment, housing costs and family issues; and

WHEREAS, there are many non-profit and faith-based organizations committed to sheltering and providing supportive services as well as meals and foods supplies to people experiencing homelessness, including Bracken's Kitchen, Families Forward, Trellis, Mercy House, Lighthouse Church, City Net, SPIN, Someone Cares Soup Kitchen, Share Our Selves, Project Hope Alliance, and United to End Homelessness; and

WHEREAS, the City of Costa Mesa recognizes that hunger and homelessness continue to be a serious problem for many individuals and families in the community; and

WHEREAS, the City of Costa Mesa has demonstrated an unwavering commitment to its most vulnerable residents by addressing quality-of-life issues and collaborating with community partners to ensure that all who seek help are met with compassionate and comprehensive support services.

NOW, THEREFORE, I, John B. Stephens, Mayor of the City of Costa Mesa, do hereby proclaim November 12-20, 2022, as **Hunger & Homelessness Awareness Week.** I encourage all Costa Mesa residents to join us in ending hunger and homelessness by participating and supporting all the local organization's efforts to prevent hunger among individuals and families, thereby strengthening the community in which we live.

TITLE:

Proclamation: Law Enforcement Records and Support Personnel Day

DEPARTMENT: City Manager's Office

CITY OF COSTA MESA, CALIFORNIA

Proclamation

WHEREAS, the protection of California's communities is dependent not only on the individuals who devote their time and energy to the duties of law enforcement service but also on members of the support staff, such as law enforcement records and support personnel, who devote countless hours to performing the duties that keep law enforcement agencies running smoothly; and

WHEREAS, law enforcement records and support personnel in Costa Mesa play a crucial role in helping law enforcement agencies identify, pursue, capture, and process suspected lawbreakers, and they continually share their invaluable expertise and experience to assist in tracking felons, maintain criminal statistics, and improve apprehension strategies; and

WHEREAS, the Costa Mesa Police Records Bureau staff processes and maintains thousands of police reports and public records requests annually; and

WHEREAS, the Costa Mesa Property and Evidence Unit properly preserves and maintains all incoming property and processes 10,000 evidence items per year and releases/destroys an average of 8,000 annually; and

WHEREAS, it is important to recognize the City of Costa Mesa's law enforcement records and support personnel for their valuable contributions to our law enforcement system.

NOW, THEREFORE, I, John B. Stephens, Mayor of the City of Costa Mesa, do hereby proclaim November 8, 2022, as **Law Enforcement Records and Support Personnel Day**. I encourage all Costa Mesa residents to pay tribute to our records and support personnel and recognize their contributions to protecting our safety and quality of life.

TITLE:

Proclamation: 2022 World Kindness Day

DEPARTMENT: City Manager's Office

CITY OF COSTA MESA, CALIFORNIA

Proclamation

WHEREAS, kindness is a fundamental part of the human condition, which bridges the division of race, religion, politics, and gender; and

WHEREAS, World Kindness Day is observed around the world on November 13 to inspire individuals and the nation to create a kinder world by establishing independent kindness programs and projects in cities, schools, and communities across the globe; and

WHEREAS, World Kindness Day reminds all of us that compassion, empathy, humility, and respect are essential ingredients in the creation and maintenance of a kind and civilized society; and

WHEREAS, simple acts of kindness promote healthy behaviors and positive dynamics within our community; and

WHEREAS, the Let's Be Kind campaign makes our schools and community stronger by facilitating meaningful change through simple acts of kindness to create a healthy environment for all students on school campuses; and

WHEREAS, by fostering acts of kindness within the Costa Mesa community, we help our residents develop a thoughtful foundation and perspective within themselves and those around them; and

WHEREAS, the City of Costa Mesa seeks to cultivate compassion and kindness throughout our City and local communities.

NOW, THEREFORE, BE IT RESOLVED, I, John B. Stephens, Mayor of the City of Costa Mesa, hereby proclaim November 13, 2022, as **World Kindness Day**. I urge all Costa Mesa residents to recognize and celebrate this day with kind gestures toward others. Kindness is contagious, and we can all participate in our ways.

PRESENTED *this 15th day of November 2022.*

_____

John B. Stephens*, Mayor of Costa Mesa*

77 Fair Drive
Costa Mesa, CA 92626

File #: 22-936 **Meeting Date:** 11/15/2022

MOMENT OF SOLEMN EXPRESSION - Led by Pastor Phil Eyskens from Lighthouse Church.

ROLL CALL
Present: Council Member Gameros, Council Member Harlan, Council Member Reynolds, Mayor Pro Tem Marr, and Mayor Stephens.
Absent: Council Member Chavez and Council Member Harper.

CITY ATTORNEY CLOSED SESSION REPORT – No reportable action.

PRESENTATIONS:

Mayor Stephens presented the 2022 National Native American Heritage Month proclamation to Barbara Steck, President of the Costa Mesa Historical Society.

Mayor Stephens presented the 2022 Veterans Day proclamation to Jodie Merkle, Team Red, White, and Blue Orange County Chapter Captain.

PUBLIC COMMENTS – MATTERS NOT LISTED ON THE AGENDA

Wendy Simao spoke on noise concerns at The 12 Gym.

Speaker, spoke on the Coronavirus.

Speaker, requested an update on the status of the Housing Element, spoke on an alternative plan if Measure K fails, and spoke on transparency in the process.

Jay Humphrey spoke against Measure K, spoke on citizens not able to hold town hall meetings at City facilities, and spoke on the lack of an inclusionary housing ordinance.

Linda Kraemer spoke in support of Measure K, spoke on sustainable living and community outreach.

Chris Corum spoke on a fire at his home.

Ben Chapman spoke on social media posts and against Measure K.

Speaker, spoke in support of Measure K.

Hank Castignetti representing Orange County Model Engineers, thanked Mayor Stephens, Council Member Gameros, and Supervisor Foley for proclamations, and spoke on the Toys for Tots toy drive on November 19th and 20th.

Speaker, spoke on National Native Heritage Month and having local Native Americans accept the Proclamation, spoke on the Animal Services Committee, and spoke against Measure K.

Speaker, spoke against Measure K.

COUNCIL MEMBER COMMITTEE REPORTS, COMMENTS, AND SUGGESTIONS

Council Member Gameros spoke on Halloween, thanked staff and the Police and Fire Departments.

Council Member Harlan requested a report on The 12 Gym, an update on the crosswalk on Tustin Ave., spoke on a recent house fire and the family being displaced, and on housing affordability.

Council Member Reynolds provided an update on the Fairview Park Steering Committee and the Master Planning process that will be in collaboration with Banning Ranch and Talbert Park, provided an update on the Active Transportation Committee, spoke on the new Arts Commission, and spoke on murals being defaced.

Mayor Pro Tem Marr spoke on murals being defaced, thanked Police and Fire Departments, spoke on Senator Min's town hall meeting, spoke on being a Veteran and Team Red, White and Blue, and spoke on the history of The Iron Riders.

Mayor Stephens spoke on the Trestle Bridge rededication ceremony, attending the Vanguard University groundbreaking ceremony for the Freed Center for Leadership and Service, attending the Human Options Shine the Light event, and adjourning the meeting in honor of Judge Francis Munoz.

CITY MANAGER REPORT – Ms. Farrell Harrison spoke on the four Vote Centers in Costa Mesa, spoke on the Merrimac Way Project winning the Planning Project Award, Dump Day on November 19th, congratulated the CMTV3 team that won eight first place and two third place awards for video productions and programming, thanked all Veterans for their service, spoke on the Housing Element Update, and Ms. Le, Director of Economic and Development Services provided an update on The 12 Gym.

CITY ATTORNEY REPORT – Ms. Hall Barlow provided an update on the Camp Lila litigation and that the case was dismissed by Federal Court, responded to Mr. Corum's complaints, and spoke on honoring Veterans Day.

CONSENT CALENDAR (Items 1-7)

MOVED/SECOND: Council Member Harlan/Council Member Reynolds
MOTION: Approve recommended actions for Consent Calendar Item Nos. 1 through 7 except for 6.
The motion carried by the following roll call vote:
Ayes: Council Member Gameros, Council Member Harlan, Council Member Reynolds, Mayor Pro Tem Marr, and Mayor Stephens.
Nays: None
Absent: Council Member Chavez and Council Member Harper.
Abstain: Mayor Stephens recused himself on item 3 the Warrant Resolution due to campaign contributions received.
Motion carried: 5-0

1. PROCEDURAL WAIVER: WAIVE THE FULL READING OF ALL ORDINANCES AND RESOLUTIONS

ACTION:
City Council, Agency Board, and Housing Authority approved the reading by title only and waived full reading of Ordinances and Resolutions.

2. READING FOLDER

ACTION:
City Council received and filed Claims received by the City Clerk: Mercury Insurance Company, Abel Cirio Diaz, Fernanda Gomes Da Silva, Keith Riggert.

3. ADOPTION OF WARRANT RESOLUTION

Mayor Stephens recused himself on item 3 the Warrant Resolution due to campaign contributions received.

ACTION:
City Council approved Warrant Resolution No. 2689.

4. MINUTES

ACTION:
City Council approved the Minutes of the Regular meeting of October 18, 2022.

5. EXTENSION OF RESOLUTION NO. 2022-62 TO ALLOW MEMBERS OF THE CITY COUNCIL, COMMISSIONS AND COMMITTEES TO PARTICIPATE IN THE MEETINGS REMOTELY, AS NEEDED, DUE TO HEALTH AND SAFETY CONCERNS FOR THE MEMBERS AND THE PUBLIC PURSUANT TO ASSEMBLY BILL 361

ACTION:
City Council extended Resolution 2022-62 to allow the members of the City Council, Commission, and Committees to participate in the meetings remotely, as needed, via Zoom due to:

1. The current State of Emergency and global pandemic, which continues to directly impact the ability of the members of the City's legislative bodies to meet safely in person; and

2. Federal, State and/or local officials continue to impose or recommend measures to promote social distancing.

7. SECOND READING AND ADOPTION OF AN ORDINANCE AMENDING TITLE 5, BUILDINGS AND CONSTRUCTION AND TITLE 7, FIRE PROTECTION AND PREVENTION, OF THE COSTA MESA MUNICIPAL CODE TO ADOPT THE 2022 EDITION OF THE CALIFORNIA BUILDING STANDARDS CODE, AS LOCALLY AMENDED, AND THE ORANGE COUNTY GRADING AND EXCAVATION CODE

ACTION:
City Council gave second reading to and adopted Ordinance 2022-07, which amends Title 5, Buildings and Construction, and Title 7, Fire Protection and Prevention, of the Costa Mesa Municipal Code to adopt the 2022 Edition of the California Building Standards Code, as locally amended, and the current edition of the Orange County Grading and Excavation Code.

ITEMS PULLED FROM THE CONSENT CALENDAR

6. ACCEPTANCE OF THE NEW TRAFFIC SIGNAL AT BAKER STREET AND RANDOLPH AVENUE PROJECT, CITY PROJECT NO. 21-01

Public Comments:

Marc Vukcevich spoke in support of the project.

MOVED/SECOND: Mayor Pro Tem Marr/Council Member Harlan
MOTION: Approve recommended actions.
The motion carried by the following roll call vote:
Ayes: Council Member Gameros, Council Member Harlan, Council Member Reynolds, Mayor Pro Tem Marr, and Mayor Stephens.
Nays: None
Absent: Council Member Chavez and Council Member Harper.
Abstain: Mayor Stephens recused himself on item 3 the Warrant Resolution due to campaign contributions received.
Motion carried: 5-0

ACTION:
1. City Council accepted the work performed by PTM General Engineering Services, Inc. (PTM) for the New Traffic Signal at Baker Street and Randolph Avenue Project, City Project No. 21-01, and authorize the City Clerk to file the Notice of Completion.

2. Authorized the City Manager to release the retention monies thirty-five (35) days after the Notice of Completion filing date; release the Labor and Material Bond seven (7) months after the filing date; and release the Faithful Performance Bond one (1) year after the filing date.

----------END OF CONSENT CALENDAR----------

PUBLIC HEARINGS:
(Pursuant to Resolution No. 05-55, Public Hearings begin at 7:00 p.m.)

1. EXTENSION OF URGENCY ORDINANCE 2020-15 SUSPENDING CERTAIN PERMIT REQUIREMENTS AND DEVELOPMENT STANDARDS FOR OUTDOOR ACTIVITIES DUE TO THE COVID-19 PANDEMIC

Presentation by Ms. Le, Economic and Development Services Director.

Public Comments:

Tim Taber spoke in support of the outdoor dining spaces and streamlining the process, and requested a longer extension.

Marc Vukcevich spoke in favor of the item and on AB 2097 regarding parking minimums.

MOVED/SECOND: Mayor Pro Tem Marr/Mayor Stephens
MOTION: Approve the extension through December 31, 2023.
The motion carried by the following roll call vote:
Ayes: Council Member Gameros, Council Member Harlan, Council Member Reynolds, and Mayor Pro Tem Marr.
Nays: Mayor Stephens
Absent: Council Member Chavez and Council Member Harper.
Abstain: None
Motion carried: 5-0

ACTION:
1. City Council extended Urgency Ordinance 2020-15 to December 31, 2023.

2. Provided direction to prepare a Code amendment to modify development standards and streamline the approval process for outdoor dining in Costa Mesa.

OLD BUSINESS: NONE.

NEW BUSINESS: NONE.

ADDITIONAL COUNCIL/BOARD MEMBER COMMITTEE REPORTS, COMMENTS, AND SUGGESTIONS – NONE.

ADJOURNMENT – The Mayor adjourned the meeting at 7:44 p.m. in memory of Judge Francis Munoz.

DRAFT

Minutes adopted on this 15th day of November, 2022.

_____
John Stephens, Mayor

ATTEST:

_____
Brenda Green, City Clerk

DRAFT

File #: 22-934 **Meeting Date:** 11/15/2022

TITLE:

REQUEST TO CANCEL THE REGULAR CITY COUNCIL MEETING OF JANUARY 3, 2023

DEPARTMENT: **CITY MANAGER'S OFFICE /CITY CLERK DIVISION**

PRESENTED BY: **BRENDA GREEN, CITY CLERK**

CONTACT INFORMATION: **BRENDA GREEN, CITY CLERK, 714-754-5221**

RECOMMENDATION:

Staff recommends the City Council cancel the regular meeting of Tuesday, January 3, 2023.

BACKGROUND:

Typically, the City conducts regularly scheduled City Council meetings on the first and third Tuesdays of the month. However, the January 3, 2023 regular meeting follows the holidays and the closure of City Hall from Friday, December 23, 2022 through Monday, January 2, 2023. Hence, it is recommended that the January 3, 2023 regular Council meeting be cancelled due to this timing. The regular Council meeting of January 17, 2023 will still be held.

ANALYSIS:

To ensure the City can conduct its business and accommodate schedules and deadlines due to the holidays, staff is proposing to cancel the regular meeting on Tuesday, January 3, 2023.

ALTERNATIVES:

City Council could choose to provide alternate direction.

FISCAL REVIEW:

There is no fiscal impact to approving this item.

LEGAL REVIEW:

The City Attorney's Office has reviewed the report and approved as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item is administrative in nature.

CONCLUSION:

Staff recommends the City Council cancel the regular meeting of Tuesday, January 3, 2023.

77 Fair Drive
Costa Mesa, CA 92626

City of Costa Mesa

Agenda Report

File #: 22-937 **Meeting Date:** 11/15/2022

TITLE:

APPROVAL OF MAYOR'S APPOINTMENT TO THE ORANGE COUNTY VECTOR CONTROL DISTRICT

DEPARTMENT: **CITY MANAGER'S OFFICE/CITY CLERK DIVISION**

PRESENTED BY: **BRENDA GREEN, CITY CLERK**

CONTACT INFORMATION: **BRENDA GREEN, CITY CLERK, 714-754-5221**

RECOMMENDATION:

Staff recommends the City Council approve Mr. Bill Turpit as the Mayor's appointment to the Orange County Vector Control District (OCVCD).

BACKGROUND:

The City Council is represented on a number of committees, boards and agencies throughout the County. In most cases, the Mayor has the authority to appoint the Council representative. However, the by-laws of the Vector Control District require formal Council approval of the Mayor's appointment. The Vector Control appointment can be a resident of Costa Mesa that is registered to vote.

ANALYSIS:

The Mayor has put forth the following Council appointment:

AGENCY	APPOINTEE	ALTERNATE
OCVCD	Mr. Bill Turpit	No Alternate Required

ALTERNATIVES:

City Council may choose to not make an appointment, and therefore have no Costa Mesa representation at the Orange County Vector Control District (OCVCD) meeting.

FISCAL REVIEW:

There is no fiscal impact.

LEGAL REVIEW:

The City Attorney's Office has reviewed this report and has approved it as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item is administrative in nature.

CONCLUSION:

Staff recommends the City Council approve Mr. Bill Turpit as the Mayor's appointment to the Orange County Vector Control District (OCVCD).

File #: 22-942 **Meeting Date:** 11/15/2022

TITLE:

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA SUPPORTING THE IRANIAN-AMERICAN COMMUNITY AND CONDEMNING VIOLENCE AGAINST WOMEN

DEPARTMENT: **CITY MANAGER'S OFFICE**

PRESENTED BY: **ALMA REYES, ASSISTANT TO THE CITY MANAGER**

CONTACT INFORMATION: **ALMA REYES, ASSISTANT TO THE CITY MANAGER, (714) 754-5090**

RECOMMENDATION:

City Council consideration to adopt Resolution 2022-XX in support of the Iranian-American community and condemning violence against women.

BACKGROUND:

On September 13, 2022, Mahsa Amini, a 22-year-old Kurdish woman from the northwestern city of Saqez, was arrested in Tehran by Iran's morality police for not wearing a "proper" hijab or head scarf in compliance with religiously-grounded laws. Police reportedly beat her and took her to Vozara Police Station, where she was reportedly beaten again and later transferred to a hospital after suffering a heart attack or stroke.

Mahsa Amini reportedly later fell into a coma, and on September 16, 2022, she passed away in the hospital. Authorities claim Amini died from underlying health reasons.

Since the announcement of Mahsa Amini's death, there has been an eruption of nationwide protests in the Islamic Republic of Iran, demanding accountability for her death and calling for an end to violence and discrimination against women and girls in Iran.

The government of Iran has committed additional acts of violence and numerous human rights violations against its own people, particularly against women and girls, including but not limited to the killing of over 200 civilians; gassing of an all-girls elementary school; shooting and killing of students at the Sharif University of Technology; threats of sexual violence as a means to silence opposition; and the burning of Evin Prison that holds political prisoners, intellectuals, reporters, and journalists.

Following the tragic death of 22-year-old Mahsa Amini in the custody of the morality police, the Iranian government has since cracked down on the right to freedom of expression and the right to peaceful assembly, including shutting down access to the internet.

At the October 18, 2022 City Council meeting, multiple Council Members expressed strong opposition to these reported violations of human rights and requested that staff prepare a Resolution condemning the actions of Iran's morality police against women and girls in Iran and to support the people of Iran in their efforts to defend their human rights and fundamental freedoms. At the request of the City Council, the attached Resolution has been drafted for your consideration.

ANALYSIS:

Since the death of Mahsa Amini, demonstrations have taken place in at least 40 cities throughout Iran, including the capital of Tehran, with protestors demanding an end to violence and discrimination against women and the end of the mandatory wearing of the hijab. Hijabs are obligatory to wear in public, regardless of religion or nationality. Further, Iranian women have lost the right to travel, the right to work, and the right to child custody after the child turns seven years old.

The protests have expanded from being solely focused on women's equality to Iranians expressing frustration over a wide range of issues, including living conditions, corruption, and economic mismanagement under the existing regime. While these challenges are being faced by women and girls in a country far from the United States, there is a large Iranian-American community in Southern California and the country that is calling for assistance from the United States and the global community to stand united in the cause to protect basic human rights for all women and girls in Iran and around the world.

As the United States Constitution stands for equality and democracy for all, foreign actions against women and girls represent human rights violations that threaten the stability of freedom and democracy worldwide. As such, City Council consideration is requested of the attached Resolution condemning violence against women in Iran.

ALTERNATIVES:

The City Council can provide additional direction to staff regarding the Resolution.

FISCAL REVIEW:

The adoption of the proposed Resolution will not have any fiscal impact on the City's budget.

LEGAL REVIEW:

The City Attorney's Office has reviewed the staff report and prepared the Resolution, and approves them as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goal:

- Strengthen the Public's Safety and Improve the Quality of Life

CONCLUSION:

City Council consider the adoption of Resolution 2022-XX in support of the Iranian-American community and condemning violence against women. By adopting this Resolution, the City Council is affirming its strong support for the right of all people of Iran, particularly women, to live a life without repression, brutal violence, and restrictions to basic human rights.

RESOLUTION NO. 2022-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA, SUPPORTING ITS IRANIAN-AMERICAN COMMUNITY AND CONDEMNING THE VIOLENCE PERPETRATED BY THE GOVERNMENT OF IRAN AGAINST ITS PEOPLE

THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA HEREBY FINDS, DETERMINES, AND DECLARES AS FOLLOWS:

WHEREAS, the rights of life, liberty, and the pursuit of happiness are endowed to all men and women by their Creator; and

WHEREAS, suspicious circumstances surround the September 16, 2022 death of Mahsa Amini who was detained by law enforcement for allegedly failing to adhere to hijab (headscarf) rules and died three days later while in custody; and

WHEREAS, the eruption of nationwide protests in the Islamic Republic of Iran began on September 17, 2022 in response to the death of Ms. Amini, who was 22 years old, and a member of the Kurdish minority; and

WHEREAS, demonstrations have taken place in at least 40 cities throughout Iran, including the capital Tehran, with protesters demanding an end to violence and discrimination against women and an end to the mandatory wearing of the hijab; and

WHEREAS, hijabs are obligatory for women in Iran to wear in public, regardless of religion or nationality. Since the Islamic Revolution of 1979, civil liberties groups continue to spotlight the suppression of women in the Islamic Republic of Iran. Iranian women have since lost many of their rights; and

WHEREAS, the death of Mahsa Amini has inspired numerous and ongoing protests throughout Iran, which the government of Iran has now blamed on the United States; and

WHEREAS, the main slogan of protesters now is “Woman, Life, Freedom,” a call for women’s equality and a stance against religious fundamentalism; and

WHEREAS, as of September 24, 2022, 1,200 protesters have been arrested and dozens of protestors have been reportedly killed; and

WHEREAS, the government of Iran has committed additional acts of violence and numerous human rights violations against its own people, particularly against women, including but not limited to the killing of more than 200 civilians, the gassing of an all-girls elementary school, the shooting and killing of students at Sharif University of Technology, the threatening of sexual violence as a means of silencing opposition, and the burning of Evin Prison that holds political prisoners, intellectuals, reporters, and journalists; and

WHEREAS, the government of Iran has restricted the people's access to internet, phone, and other forms of communication;

NOW THEREFORE, BE IT RESOLVED, by the City Council of the City of Costa Mesa, as follows:

A. That the City of Costa Mesa stands with its Iranian-American community members, particularly Iranian-American women, as their relatives and associates are suffering through the current injustices in Iran.
B. That the City of Costa Mesa condemns the violent acts that are being perpetrated against the Iranian people.
C. That the City of Costa Mesa calls upon the government of Iran to end its systemic human rights violations.
D. That the City of Costa Mesa calls upon other governments to join in the support of Iranians, in Iran and abroad, and the condemnation of the government of Iran's violent acts against its own people.

PASSED AND ADOPTED this 15th day of November, 2022.

File #: 22-924 **Meeting Date:** 11/15/2022

TITLE:

ADAMS AVENUE AND PINECREEK DRIVE INTERSECTION PROJECT - AMENDMENT NO. 1 TO THE PROFESSIONAL SERVICES AGREEMENT FOR ENGINEERING DESIGN SERVICES

DEPARTMENT: **PUBLIC WORKS DEPARTMENT/ TRANSPORTATION SERVICES DIVISION**

PRESENTED BY: **RAJA SETHURAMAN, PUBLIC WORKS DIRECTOR**

CONTACT INFORMATION: **JENNIFER ROSALES, TRANSPORTATION SERVICES MANAGER, (714) 754-5343**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve proposed Amendment No. 1 to the Professional Services Agreement (PSA) with KOA Corporation increasing the maximum compensation by $30,230, for a total not-to-exceed amount of $141,017.

2. Authorize the City Manager and the City Clerk to execute the amendment and any future amendments to the agreement.

BACKGROUND:

The City received a federal Bicycle Corridor Improvement Program (BCIP) grant as well as a contribution from the Coast Community College District to design and construct pedestrian and bicycle improvements at the intersection of Adams Avenue and Pinecreek Drive. This project is in the final design phase and is anticipated to be ready for construction authorization by spring 2023. The project will improve pedestrian and bicycle mobility and access in the area.
A PSA with KOA Corporation was approved by the City Council on March 16, 2021 for engineering design services of the Adams Avenue and Pinecreek Drive Intersection Project. The scope of work for the engineering design services of the project includes the following:

- New/additional crosswalk on the west leg of the intersection crossing Adams Avenue
- Conversion of the northbound right turn slip lane to a conventional right turn lane
- Modifications to the eastbound right turn lane
- Class II bicycle lanes in the City's right-of-way
- Sidewalk and Americans with Disabilities Act (ADA) ramp improvements
- Relocation of the bus stop on eastbound Adams
- Traffic signal modifications to accommodate these improvements

This project is being designed concurrently with the Adams Avenue Bicycle Facility Project from Harbor Boulevard to Fairview Road to provide a cohesive pedestrian and bicycle infrastructure design along the corridor. The Adams Avenue Bicycle Facility project includes Class II bicycle lanes and Class IV cycle tracks. Extensive public outreach has been conducted for both projects including two public outreach meetings, three stakeholder meetings with Orange Coast College, and a presentation to the Active Transportation Committee.

ANALYSIS:

Through the project's design concept development process with the Active Transportation Committee as well as public outreach, a project design concept with Class I off-street multi-use paths on Adams Avenue emerged as the most desired project design alternative. The Class I multi-use paths connect to the Adams Avenue at Pinecreek Drive intersection on the northeast and southwest corners and provide a separation between active transportation users (pedestrians and bicyclists) and vehicles. The Class I multi-use paths will improve accessibility for pedestrians and bicyclists and improve multi -modal circulation. The reconfiguration of the intersection will slow right turning vehicles entering and exiting Orange Coast College and reduce conflict points.

The scope of work for the Adams Avenue at Pinecreek Drive Intersection project included Class II bicycle lanes. However, the design effort required for the option with Class I off-street multi-use paths is greater than the design effort for Class II bicycle lanes within the City's right-of-way. This work includes additional civil engineering design sheets (grading, utility, plan and profile), design details and sections, right-of-way and utility coordination, and additional project team meetings.

Staff recommends the City Council approve the amendment to the PSA with KOA Corporation for the Adams Avenue and Pinecreek Drive Intersection Project in the amount of $30,230 for additional design services. Staff also requests City Council authorization for the City Manager and the City Clerk to execute the amendment and future authorized changes and amendments to the agreement.

ALTERNATIVES:

One alternative would be to not approve Amendment No. 1 to the PSA. However, this would result in staff's inability to complete the additional design effort and result in delays in the completion of the design. This could jeopardize the project's federal grant funding for both the design and construction.

FISCAL REVIEW:

Funding of the proposed amendment to the PSA with KOA Corporation is available in the existing Capital Improvement Project funds for the Adams Avenue and Pinecreek Drive Improvements Project approved in Fiscal Year 2020-21 budget.

LEGAL REVIEW:

The City Attorney's Office has reviewed this report, prepared the proposed amendment, and approves them as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goals:

- Strengthen the Public's Safety and Improve the Quality of Life
- Advance Environmental Sustainability and Climate Resiliency

CONCLUSION:

Staff recommends the City Council:

1. Approve proposed Amendment No. 1 to the PSA with KOA Corporation increasing the maximum compensation by $30,230, for a total not-to-exceed amount of $141,017.

2. Authorize the City Manager and the City Clerk to execute the amendment and any future amendments to the agreement.

AMENDMENT NUMBER ONE
TO PROFESSIONAL SERVICES AGREEMENT
WITH
KOA CORPORATION

This Amendment Number One ("Amendment") is made and entered into this 15th day of November 2022 ("Effective Date"), by and between the CITY OF COSTA MESA, a municipal corporation ("City"), and KOA CORPORATION, a California corporation ("Consultant").

WHEREAS, City and Consultant entered into an agreement on March 16, 2021 for Consultant to provide engineering design services in connection with the Adams Avenue and Pinecreek Drive Intersection Project (the "Agreement"); and

WHEREAS, City and Consultant desire to amend the Scope of Services to include the additional services set forth in Exhibit "A," attached hereto and incorporated herein by this reference; and

WHEREAS, City desires to increase Consultant's maximum compensation by Thirty Thousand Two Hundred and Thirty Dollars ($30,230.00).

NOW, THEREFORE, for valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. The Scope of Services shall be amended to include the additional services set forth in Exhibit A.

2. Section 3.5 of the Agreement shall be amended to reflect that Consultant's total compensation shall not exceed One Hundred and Forty-One Thousand Seventeen Dollars and Three Cents ($141,017.03). Consultant shall be paid according to the fee schedule set forth in the Agreement and Exhibit A of this Amendment.

3. All terms not defined herein shall have the same meaning and use as set forth in the Agreement.

4. All other terms, conditions, and provisions of the Agreement not in conflict with this Amendment shall remain in full force and effect.

5. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original. All counterparts shall be construed together and shall constitute one agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Amendment to be executed by and through their respective authorized officers, as of the date first written above.

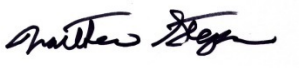
Subject: Change Order Request for Adams/Pinecreek Project

Ramin:

As discussed several times, the scope of work for the subject project has expanded significantly since the agreement was approved in 2021.

The original concept per the RFP proposed Class II bike lanes and a continuation of the EB slip ramp. As the project developed, including extensive feedback during the public outreach, the design changed significantly to improve safety for the bicyclists and pedestrians.

The Class II bike lane was revised to transition to a Class I trail eastbound and westbound approaching Pinecreek. This refinement alleviates the safety concerns expressed by bicyclists about having a long segment of Class II bike lane sandwiched between the outside through lane and the right turn lane. It also provides for a smoother transition from eastbound Adams to the college for bicyclists and the elimination of the existing eastbound slip ramp significantly improves pedestrian safety.



In conjunction with these revisions, KOA attended additional meeting with OCC staff to get concurrence on the changes as well as to coordinate the design revisions.

Additionally, we are requesting for construction support on an as-needed basis.

The additional effort to incorporate the changes noted above is **$20,230** for the revised design plus **$10,000** for construction support. Please provide written authorization for **$30,230**.

If you have any questions, please do not hesitate to call.

Sincerely,
KOA Corporation

Matt Stepien, P.E.
Project Manager

CITY OF COSTA MESA
PROFESSIONAL SERVICES AGREEMENT
WITH
KOA CORPORATION

THIS PROFESSIONAL SERVICES AGREEMENT ("Agreement") is made and entered into this 16th day of March, 2021 ("Effective Date"), by and between the CITY OF COSTA MESA, a municipal corporation ("City"), and KOA CORPORATION, a California corporation ("Consultant").

W I T N E S S E T H :

A. WHEREAS, City proposes to utilize the services of Consultant as an independent contractor to provide engineering design services in connection with the Adams Avenue and Pinecreek Drive Intersection Project, as more fully described herein; and

B. WHEREAS, Consultant represents that it has that degree of specialized expertise contemplated within California Government Code section 37103, and holds all necessary licenses to practice and perform the services herein contemplated; and

C. WHEREAS, City issued a Request for Proposals for Engineering Design Services for Adams Avenue and Pinecreek Drive Intersection Project ("Project A") and Adams Avenue Bicycle Facility Project ("Project B"), dated November 9, 2020, incorporated by this reference as if fully set forth herein ("RFP"); and

D. WHEREAS, Consultant submitted a response to the City's RFP ("Consultant's Proposal"), attached hereto as Exhibit "A" and incorporated herein by this reference; and

E. WHEREAS, City and Consultant desire to contract for the specific services described in the RFP and Exhibits "A" and "B" (the "Project") and desire to set forth their rights, duties and liabilities in connection with the services to be performed; and

F. WHEREAS, no official or employee of City has a financial interest, within the provisions of sections 1090-1092 of the California Government Code, in the subject matter of this Agreement.

NOW, THEREFORE, for and in consideration of the mutual covenants and conditions contained herein, the parties hereby agree as follows:

1.0. SERVICES PROVIDED BY CONSULTANT

1.1. Scope of Services. Consultant shall provide the professional services for Project A in accordance with the RFP, Consultant's Proposal, and Consultant's approved Cost Proposal, attached hereto as Exhibit "B" and incorporated herein by this reference.

1.2. Professional Practices. All professional services to be provided by Consultant pursuant to this Agreement shall be provided by personnel experienced in their respective fields and in a manner consistent with the standards of care, diligence and skill ordinarily exercised by professional consultants in similar fields and circumstances in accordance with sound

professional practices. Consultant also warrants that it is familiar with all laws that may affect its performance of this Agreement and shall advise City of any changes in any laws that may affect Consultant's performance of this Agreement.

1.3. Performance to Satisfaction of City. Consultant agrees to perform all the work to the complete satisfaction of the City. Evaluations of the work will be done by the City Manager or his or her designee. If the quality of work is not satisfactory, City in its discretion has the right to:

(a) Meet with Consultant to review the quality of the work and resolve the matters of concern;

(b) Require Consultant to repeat the work at no additional fee until it is satisfactory; and/or

(c) Terminate the Agreement as hereinafter set forth.

1.4. Warranty. Consultant warrants that it shall perform the services required by this Agreement in compliance with all applicable Federal and California employment laws, including, but not limited to, those laws related to minimum hours and wages; occupational health and safety; fair employment and employment practices; workers' compensation insurance and safety in employment; and all other Federal, State and local laws and ordinances applicable to the services required under this Agreement. Consultant shall indemnify and hold harmless City from and against all claims, demands, payments, suits, actions, proceedings, and judgments of every nature and description including attorneys' fees and costs, presented, brought, or recovered against City for, or on account of any liability under any of the above-mentioned laws, which may be incurred by reason of Consultant's performance under this Agreement.

1.5. Non-Discrimination. In performing this Agreement, Consultant shall not engage in, nor permit its agents to engage in, discrimination in employment of persons because of their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military or veteran status, except as permitted pursuant to section 12940 of the Government Code.

1.6. Non-Exclusive Agreement. Consultant acknowledges that City may enter into agreements with other consultants for services similar to the services that are subject to this Agreement or may have its own employees perform services similar to those services contemplated by this Agreement.

1.7. Delegation and Assignment. This is a personal service contract, and the duties set forth herein shall not be delegated or assigned to any person or entity without the prior written consent of City. Consultant may engage a subcontractor(s) as permitted by law and may employ other personnel to perform services contemplated by this Agreement at Consultant's sole cost and expense.

1.8. Confidentiality. Employees of Consultant in the course of their duties may have access to financial, accounting, statistical, and personnel data of private individuals and employees of City. Consultant covenants that all data, documents, discussion, or other information developed or received by Consultant or provided for performance of this Agreement are deemed confidential and shall not be disclosed by Consultant without written authorization by

City. City shall grant such authorization if disclosure is required by law. All City data shall be returned to City upon the termination of this Agreement. Consultant's covenant under this Section shall survive the termination of this Agreement.

2.0. PERFORMANCE PERIOD

2.1. This Agreement shall go into effect on March 16, 2021, contingent upon approval by City, and Consultant shall commence work after notification to proceed by the City's Contract Administrator or Project Manager. This Agreement shall end on March 15, 2023, unless extended by an amendment to this Agreement. This Agreement may be extended by two (2) additional one (1) year periods.

2.2. Consultant is advised and agrees that any recommendation for contract award is not binding on City until the Agreement is fully executed and approved by City.

2.3. Consultant shall perform the services set forth herein in strict compliance with the Project Schedule approved by City as set forth in Exhibit A. The Project Schedule may be amended by mutual agreement of the parties.

3.0. ALLOWABLE COSTS AND PAYMENTS

3.1. The method of payment for this Agreement will be based on lump sum. The total lump sum price paid to Consultant will include compensation for all work and deliverables, including travel and equipment described in the Scope of Services. No additional compensation will be paid to Consultant, unless there is a change in the Scope of Services or the scope of the Project. In the instance of a change in the Scope of Services or scope of the Project, adjustment to the total lump sum compensation will be negotiated between Consultant and City. Adjustment in the total lump sum compensation will not be effective until authorized by Agreement amendment and approved by City.

3.2. Progress payments may be made monthly in arrears based on the percentage of work completed by Consultant. If Consultant fails to submit the required deliverable items according to the schedule set forth in Scope of Services, City shall have the right to delay payment or terminate this Agreement in accordance with the provisions of Section 6 (Termination).

3.3. Consultant shall not commence performance of work or services until this Agreement has been approved by City and notification to proceed has been issued by City's Contract Administrator. No payment will be made prior to approval of any work, or for any work performed prior to approval of this Agreement.

3.4. Consultant will be reimbursed within thirty (30) days upon receipt by City's Contract Administrator of itemized invoices in duplicate. Invoices shall be submitted no later than thirty (30) calendar days after the performance of work for which Consultant is billing. Invoices shall detail the work performed on each milestone, on each project as applicable. Invoices shall follow the format stipulated for the approved Cost Proposal and shall reference this Agreement number and project title. Final invoice must contain the final cost and all credits due City that include any equipment purchased under the provisions of Section 5 (Equipment Purchase and Other Capital Expenditures). The final invoice must be submitted within sixty (60) calendar days after completion of Consultant's work unless a later date is approved by the City. Invoices shall be mailed to City's Contract Administrator at the following address:

City of Costa Mesa
77 Fair Drive
Costa Mesa, CA 92626
Attn: Ramin Nikoui

3.5. The total amount payable by City shall not exceed One Hundred Ten Thousand Seven Hundred Eighty-Seven Dollars and Three Cents ($110,787.03).

3.6. City shall make any progress payment within thirty (30) days after receipt of an undisputed and properly submitted payment request from Consultant on a professional service contract. If City fails to pay promptly, City shall pay interest to the Consultant, which accrues at the rate of 10 percent per annum on the principal amount of a money judgment remaining unsatisfied. Upon receipt of a payment request, City shall act in accordance with both of the following:

(a) Each payment request shall be reviewed by City as soon as practicable after receipt for the purpose of determining that the payment request is a proper payment request.

(b) Any payment request determined not to be a proper payment request suitable for payment shall be returned to Consultant as soon as practicable, but not later than seven (7) days, after receipt. A request returned pursuant to this paragraph shall be accompanied by a document setting forth in writing the reasons why the payment request is not proper.

4.0. COST PRINCIPLES AND ADMINISTRATIVE REQUIREMENTS

4.1. Consultant agrees that the provisions of 48 C.F.R. Part 31, Contract Cost Principles and Procedures, shall be used to determine the allowability of individual items of cost.

4.2. Consultant also agrees to comply with federal procedures in accordance with 2 C.F.R. Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

4.3. Any costs for which payment has been made to Consultant that are determined by subsequent audit to be unallowable under 48 C.F.R. Part 31 or 2 C.F.R. Part 200 are subject to repayment by Consultant to City.

4.4. If Consultant or a subconsultant is a non-profit organization or an institution of higher education, the Cost Principles for Title 2 C.F.R. Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards shall apply.

5.0. EQUIPMENT PURCHASE AND OTHER CAPITAL EXPENDITURES

5.1. Prior authorization in writing by City's Contract Administrator shall be required before Consultant enters into any unbudgeted purchase order, or subcontract exceeding Five Thousand Dollars ($5,000.00) for supplies, equipment, or consultant services. Consultant shall provide an evaluation of the necessity or desirability of incurring such costs.

5.2. For purchase of any item, service or consulting work not covered in Consultant's approved Cost Proposal and exceeding Five Thousand Dollars ($5,000.00), with prior authorization by City's Contract Administrator, three (3) competitive quotations must be submitted with the request, or the absence of proposal must be adequately justified.

5.3. Any equipment purchased with funds provided under the terms of this Agreement is subject to the following:

(a) Consultant shall maintain an inventory of all nonexpendable property. Nonexpendable property is defined as having a useful life of at least two (2) years and an acquisition cost of Five Thousand Dollars ($5,000.00) or more. If the purchased equipment needs replacement and is sold or traded in, City shall receive a proper refund or credit at the conclusion of the Agreement, or if the Agreement is terminated, Consultant may either keep the equipment and credit City in an amount equal to its fair market value, or sell such equipment at the best price obtainable at a public or private sale, in accordance with established City procedures; and credit City in an amount equal to the sale price. If Consultant elects to keep the equipment, fair market value shall be determined at Consultant's expense, on the basis of a competent independent appraisal of such equipment. Appraisals shall be obtained from an appraiser mutually agreeable to City and Consultant, if it is determined to sell the equipment, the terms and conditions of such sale must be approved in advance by City.

(b) Regulation 2 C.F.R. Part 200 requires a credit to Federal funds when participating equipment with a fair market value greater than Five Thousand Dollars ($5,000.00) is credited to the project.

6.0. TERMINATION

6.1. This Agreement may be terminated by City, provided that City gives not less than thirty (30) calendar days' written notice (delivered by certified mail, return receipt requested) of intent to terminate.

6.2. City may temporarily suspend this Agreement, at no additional cost to City, provided that Consultant is given written notice (delivered by certified mail, return receipt requested) of temporary suspension. If City gives such notice of temporary suspension, Consultant shall immediately suspend its activities under this Agreement. A temporary suspension may be issued concurrent with the notice of termination.

6.3. Notwithstanding any provisions of this Agreement, Consultant shall not be relieved of liability to City for damages sustained by City by virtue of any breach of this Agreement by Consultant, and City may withhold any payments due to Consultant until such time as the exact amount of damages, if any, due City from Consultant is determined.

6.4. In the event of termination, Consultant shall be compensated as provided for in this Agreement. Upon termination, City shall be entitled to all work, including but not limited to, reports, investigations, appraisals, inventories, studies, analyses, drawings and data estimates performed to that date, whether completed or not.

7.0. RETENTION OF RECORDS/AUDIT; AUDIT REVIEW PROCEDURES

7.1. For the purpose of determining compliance with Government Code section 8546.7, Consultant, subconsultants, and City shall maintain all books, documents, papers, accounting records, Independent CPA Audited Indirect Cost Rate workpapers, and other evidence pertaining to the performance of the Agreement including, but not limited to, the costs of administering the Agreement. All parties, including Consultant's Independent CPA, shall make such workpapers and materials available at their respective offices at all reasonable times during the Agreement period and for three (3) years from the date of final payment under the Agreement. City, Caltrans Auditor, Federal Highway Administration, or any duly authorized representative of the Federal government having jurisdiction under Federal laws or regulations (including the basis of Federal funding in whole or in part) shall have access to any books, records, and documents of Consultant, subconsultants, and Consultant's Independent CPA, that are pertinent to the Agreement for audits, examinations, workpaper review, excerpts, and transactions, and copies thereof shall be furnished if requested without limitation.

7.2. Any dispute concerning a question of fact arising under an interim or post audit of this Agreement that is not disposed of by agreement shall be reviewed by City's Chief Financial Officer.

7.3. Not later than thirty (30) days after issuance of the final audit report, Consultant may request a review by City's Chief Financial Officer of unresolved audit issues. The request for review must be submitted in writing.

7.4. Neither the pendency of a dispute nor its consideration by City will excuse Consultant from full and timely performance, in accordance with the terms of this Agreement.

7.5. Consultant and subconsultant agreements, including cost proposals and Indirect Cost Rates (ICR), may be subject to audits or reviews such as, but not limited to, an Agreement audit, an incurred cost audit, an ICR Audit, or a CPA ICR audit work paper review. If selected for audit or review, the Agreement, Cost Proposal and ICR and related work papers, if applicable, will be reviewed to verify compliance with 48 C.F.R. Part 31 and other related laws and regulations. In the instances of a CPA ICR audit work paper review it is Consultant's responsibility to ensure federal, City, or local government officials are allowed full access to the CPA's work papers including making copies as necessary. The Agreement, cost proposal, and ICR shall be adjusted by Consultant and approved by City's Contract Administrator to conform to the audit or review recommendations. Consultant agrees that individual terms of costs identified in the audit report shall be incorporated into the Agreement by this reference if directed by City at its sole discretion. Refusal by Consultant to incorporate audit or review recommendations, or to ensure that the federal, City or local governments have access to CPA work papers, will be considered a breach of Agreement terms and cause for termination of the Agreement and disallowance of prior reimbursed costs.

7.6. Consultant's Cost Proposal may be subject to a CPA ICR Audit Work Paper Review and/or audit by the Independent Office of Audits and Investigations (IOAI). IOAI, at its sole discretion, may review and/or audit and approve the CPA ICR documentation. The Cost Proposal shall be adjusted by Consultant and approved by the City's Contract Administrator to conform to the Work Paper Review recommendations included in the management letter or audit recommendations included in the audit report. Refusal by Consultant to incorporate the Work Paper Review recommendations included in the management letter or audit recommendations

included in the audit report will be considered a breach of the Agreement terms and cause for termination of the Agreement and disallowance of prior reimbursed costs.

(a) During IOAI's review of the ICR audit work papers created by the Consultant's independent CPA, IOAI will work with the CPA and/or Consultant toward a resolution of issues that arise during the review. Each party agrees to use its best efforts to resolve any audit disputes in a timely manner. If IOAI identifies significant issues during the review and is unable to issue a cognizant approval letter, City will reimburse the Consultant at an accepted ICR until a FAR (Federal Acquisition Regulation) compliant ICR {e.g. 48 C.F.R. Part 31; GAGAS (Generally Accepted Auditing Standards); CAS (Cost Accounting Standards), if applicable; in accordance with procedures and guidelines of the American Association of State Highways and Transportation Officials (AASHTO) Audit Guide; and other applicable procedures and guidelines} is received and approved by IOAI.

Accepted rates will be as follows:

(1) If the proposed rate is less than one hundred fifty percent (150%) - the accepted rate reimbursed will be ninety percent (90%) of the proposed rate.

(2) If the proposed rate is between one hundred fifty percent (150%) and two hundred percent (200%) - the accepted rate will be eighty-five percent (85%) of the proposed rate.

(3) If the proposed rate is greater than two hundred percent (200%) - the accepted rate will be seventy-five percent (75%) of the proposed rate.

(b) If IOAI is unable to issue a cognizant letter per Section 7.6(a) above, IOAI may require Consultant to submit a revised independent CPA-audited ICR and audit report within three (3) months of the effective date of the management letter. IOAI will then have up to six (6) months to review the Consultant's and/or the independent CPA's revisions.

(c) If Consultant fails to comply with the provisions of this Section 7.6, or if IOAI is still unable to issue a cognizant approval letter after the revised independent CPA audited ICR is submitted, overhead cost reimbursement will be limited to the accepted ICR that was established upon initial rejection of the ICR and set forth in Section 7.6(a) above for all rendered services. In this event, this accepted ICR will become the actual and final ICR for reimbursement purposes under this Agreement.

(d) Consultant may submit to City its final invoice only when all of the following items have occurred: (1) IOAI accepts or adjusts the original or revised independent CPA audited ICR; (2) all work under this Agreement has been completed to the satisfaction of City; and (3) IOAI has issued its final ICR review letter. Consultant must submit its final invoice to City no later than sixty (60) calendar days after occurrence of the last of these items. The accepted ICR will apply to this Agreement and all other agreements executed between City and the Consultant, either as a prime or subconsultant, with the same fiscal period ICR.

8.0. FUNDING REQUIREMENTS

8.1. It is mutually understood between the parties that this Agreement may have been written before ascertaining the availability of funds or appropriation of funds, for the mutual benefit of both parties, in order to avoid program and fiscal delays that would occur if the Agreement were executed after that determination was made.

8.2. This Agreement is valid and enforceable only if sufficient funds are made available to City for the purpose of this Agreement. In addition, this Agreement is subject to any additional restrictions, limitations, conditions, or any statute enacted by Congress, the State Legislature, or City's City Council that may affect the provisions, terms, or funding of this Agreement in any manner.

8.3. It is mutually agreed that if sufficient funds are not appropriated, this Agreement may be amended to reflect any reduction in funds.

8.4. City has the option to terminate the Agreement pursuant to Section 6 (Termination), or by mutual agreement to amend the Agreement to reflect any reduction of funds.

9.0. INSURANCE

9.1. Minimum Scope and Limits of Insurance. Consultant shall obtain, maintain, and keep in full force and effect during the life of this Agreement all of the following minimum scope of insurance coverages with an insurance company admitted to do business in California, rated "A," Class X, or better in the most recent Best's Key Insurance Rating Guide, and approved by City:

(a) Commercial general liability, including premises-operations, products/completed operations, broad form property damage, blanket contractual liability, independent contractors, personal injury or bodily injury with a policy limit of not less than One Million Dollars ($1,000,000.00), combined single limits, per occurrence. If such insurance contains a general aggregate limit, it shall apply separately to this Agreement or shall be twice the required occurrence limit.

(b) Business automobile liability for owned vehicles, hired, and non-owned vehicles, with a policy limit of not less than One Million Dollars ($1,000,000.00), combined single limits, per occurrence for bodily injury and property damage.

(c) Workers' compensation insurance as required by the State of California. Consultant agrees to waive, and to obtain endorsements from its workers' compensation insurer waiving subrogation rights under its workers' compensation insurance policy against the City, its officers, agents, employees, and volunteers arising from work performed by Consultant for the City and to require each of its subcontractors, if any, to do likewise under their workers' compensation insurance policies.

(d) Professional errors and omissions ("E&O") liability insurance with policy limits of not less than One Million Dollars ($1,000,000.00), combined single

limits, per occurrence and aggregate. Architects' and engineers' coverage shall be endorsed to include contractual liability. If the policy is written as a "claims made" policy, the retro date shall be prior to the start of the contract work. Consultant shall obtain and maintain, said E&O liability insurance during the life of this Agreement and for three years after completion of the work hereunder.

9.2. Endorsements. The commercial general liability insurance policy and business automobile liability policy shall contain or be endorsed to contain the following provisions:

(a) Additional insureds: "The City of Costa Mesa and its elected and appointed boards, officers, officials, agents, employees, and volunteers are additional insureds with respect to: liability arising out of activities performed by or on behalf of the Consultant pursuant to its contract with the City; products and completed operations of the Consultant; premises owned, occupied or used by the Consultant; automobiles owned, leased, hired, or borrowed by the Consultant."

(b) Notice: "Said policy shall not terminate, be suspended, or voided, nor shall it be cancelled, nor the coverage or limits reduced, until thirty (30) days after written notice is given to City."

(c) Other insurance: "The Consultant's insurance coverage shall be primary insurance as respects the City of Costa Mesa, its officers, officials, agents, employees, and volunteers. Any other insurance maintained by the City of Costa Mesa shall be excess and not contributing with the insurance provided by this policy."

(d) Any failure to comply with the reporting provisions of the policies shall not affect coverage provided to the City of Costa Mesa, its officers, officials, agents, employees, and volunteers.

(e) The Consultant's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.

9.3. Deductible or Self Insured Retention. If any of such policies provide for a deductible or self-insured retention to provide such coverage, the amount of such deductible or self-insured retention shall be approved in advance by City. No policy of insurance issued as to which the City is an additional insured shall contain a provision which requires that no insured except the named insured can satisfy any such deductible or self-insured retention.

9.4. Certificates of Insurance. Consultant shall provide to City certificates of insurance showing the insurance coverages and required endorsements described above, in a form and content approved by City, prior to performing any services under this Agreement.

9.5. Non-Limiting. Nothing in this Section shall be construed as limiting in any way, the indemnification provision contained in this Agreement, or the extent to which Consultant may be held responsible for payments of damages to persons or property.

10.0. SUBCONTRACTING

10.1. Nothing contained in this Agreement or otherwise, shall create any contractual relation between City and any subconsultant(s), and no subagreement or subcontract shall relieve Consultant of its responsibilities and obligations hereunder. Consultant agrees to be as fully responsible to City for the acts and omissions of its subconsultant(s) and of persons either directly or indirectly employed by any of them as it is for the acts and omissions of persons directly employed by Consultant. Consultant's obligation to pay its subconsultant(s) is an independent obligation from City's obligation to make payments to the Consultant.

10.2. Consultant shall perform the work contemplated with resources available within its own organization and no portion of the work pertinent to this Agreement shall be subcontracted without written authorization by City's Contract Administrator, except that which is expressly identified in Consultant's approved Cost Proposal.

10.3. Any subcontracts and subagreements entered into as a result of this Agreement shall contain all the provisions stipulated in this Agreement to be applicable to subconsultants unless otherwise noted.

10.4. Consultant shall pay its subconsultants within fifteen (15) calendar days from receipt of each payment made to Consultant by City.

10.5. Any substitution of subconsultant(s) must be approved in writing by City's Contract Administrator in advance of assigning work to a substitute subconsultant.

10.6. Prompt Progress Payment. Consultant or subconsultant shall pay to any subconsultant, not later than fifteen (15) days after receipt of each progress payment, unless otherwise agreed to in writing, the respective amounts allowed Consultant on account of the work performed by the subconsultants, to the extent of each subconsultant's interest therein. In the event that there is a good faith dispute over all or any portion of the amount due on a progress payment from Consultant or subconsultant to a subconsultant, Consultant or subconsultant may withhold no more than 150 percent (150%) of the disputed amount. Any violation of this requirement shall constitute a cause for disciplinary action and shall subject the Consultant or subconsultant to a penalty, payable to the subconsultant, of two percent (2%) of the amount due per month for every month that payment is not made.

In any action for the collection of funds wrongfully withheld, the prevailing party shall be entitled to his or her attorneys' fees and costs. The sanctions authorized under this requirement shall be separate from, and in addition to, all other remedies, either civil, administrative, or criminal. This clause applies to both DBE and non-DBE subconsultants.

10.7. No Retainage of Funds. No retainage will be held by the City from progress payments due to Consultant. Consultants and subconsultants are prohibited from holding retainage from subconsultants. Any delay or postponement of payment may take place only for good cause and with the City's prior written approval. Any violation of these provisions shall subject the violating consultant or subconsultant to the penalties, sanctions, and other remedies specified in Section 3321 of the California Civil Code. This requirement shall not be construed to limit or impair any contractual, administrative or judicial remedies, otherwise available to Consultant or subconsultant in the event of a dispute involving late payment or nonpayment by Consultant, deficient subconsultant performance and/or noncompliance by a subconsultant. This

clause applies to both DBE and non-DBE subconsultants.

11.0. DISADVANTAGED BUSINESS ENTERPRISES (DBE) PARTICIPATION

11.1. Consultant, subrecipient (City), or subconsultant shall take necessary and reasonable steps to ensure that DBEs have opportunities to participate in the contract (49 C.F.R. 26). To ensure equal participation of DBEs provided in 49 C.F.R. 26.5, City shows a contract goal for DBEs. Consultant shall make work available to DBEs and select work parts consistent with available DBE subconsultants and suppliers.

Consultant shall meet the DBE goal shown elsewhere in these special provisions or demonstrate that it made adequate good faith efforts to meet this goal. It is Consultant's responsibility to verify that the DBE firm is certified as DBE at date of proposal opening and document the record by printing out the California Unified Certification Program (CUCP) data for each DBE firm. A list of DBEs certified by the CUCP can be found at https://dot.ca.gov/programs/civil-rights/dbe-search.

All DBE participation will count toward the California Department of Transportation's federally mandated statewide overall DBE goal. Credit for materials or supplies Consultant purchases from DBEs counts towards the goal in the following manner:

(a) 100 percent counts if the materials or supplies are obtained from a DBE manufacturer.

(b) 60 percent counts if the materials or supplies are purchased from a DBE regular dealer.

(c) Only fees, commissions, and charges for assistance in the procurement and delivery of materials or supplies count if obtained from a DBE that is neither a manufacturer nor regular dealer. 49 C.F.R. 26.55 defines "manufacturer" and "regular dealer."

This Agreement is subject to 49 C.F.R. Part 26 entitled "Participation by Disadvantaged Business Enterprises in Department of Transportation Financial Assistance Programs". Consultants who obtain DBE participation on this Agreement will assist Caltrans in meeting its federally mandated statewide overall DBE goal.

11.2. The goal for DBE participation for this Agreement is five percent (5.0%). Participation by DBE consultant or subconsultants shall be in accordance with information contained in Exhibit 10-O2: Consultant Contract DBE Commitment, as set forth in Exhibit A. If a DBE subconsultant is unable to perform, Consultant must make a good faith effort to replace him/her with another DBE subconsultant, if the goal is not otherwise met

11.3. Consultant can meet the DBE participation goal by either documenting commitments to DBEs to meet the Agreement goal, or by documenting adequate good faith efforts to meet the Agreement goal. An adequate good faith effort means that the Consultant must show that it took all necessary and reasonable steps to achieve a DBE goal that, by their scope, intensity, and appropriateness to the objective, could reasonably be expected to meet the DBE goal. If Consultant has not met the DBE goal, complete and submit Exhibit 15-H: DBE Information – Good Faith Efforts to document efforts to meet the goal. Refer to 49 C.F.R. Part 26 for guidance

regarding evaluation of good faith efforts to meet the DBE goal.

11.4. Contract Assurance. Under 49 C.F.R. 26.13(b): Consultant, subrecipient or subconsultant shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Agreement. Consultant shall carry out applicable requirements of 49 C.F.R. 26 in the award and administration of federal-aid contracts.

Failure by the Consultant to carry out these requirements is a material breach of this Agreement, which may result in the termination of this Agreement or such other remedy as the recipient deems appropriate, which may include, but is not limited to:

(a) Withholding monthly progress payments;

(b) Assessing sanctions;

(c) Liquidated damages; and/or

(d) Disqualifying Consultant from future proposing as non-responsible

11.5. Termination and Substitution of DBE Subconsultants. Consultant shall utilize the specific DBEs listed to perform the work and supply the materials for which each is listed unless Consultant or DBE subconsultant obtains the City's written consent. Consultant shall not terminate or substitute a listed DBE for convenience and perform the work with their own forces or obtain materials from other sources without authorization from the City. Unless the City's consent is provided, Consultant shall not be entitled to any payment for work or material unless it is performed or supplied by the listed DBE on the Exhibit 10-02 Consultant Contract DBE Commitment form, included in Consultant's Proposal.

City authorizes a request to use other forces or sources of materials if Consultant shows any of the following justifications:

(a) Listed DBE fails or refuses to execute a written contract based on plans and specifications for the Project.

(b) City stipulated that a bond is a condition of executing the subcontract and the listed DBE fails to meet the City's bond requirements.

(c) Work requires a consultant's license and listed DBE does not have a valid license under Contractors License Law.

(d) Listed DBE fails or refuses to perform the work or furnish the listed materials (failing or refusing to perform is not an allowable reason to remove a DBE if the failure or refusal is a result of bad faith or discrimination).

(e) Listed DBE's work is unsatisfactory and not in compliance with the Agreement.

(f) Listed DBE is ineligible to work on the Project because of suspension or debarment.

(g) Listed DBE becomes bankrupt or insolvent.

(h) Listed DBE voluntarily withdraws with written notice from the Agreement.

(i) Listed DBE is ineligible to receive credit for the type of work required.

(j) Listed DBE owner dies or becomes disabled resulting in the inability to perform the work on the Agreement.

(k) City determines other documented good cause.

Consultant shall notify the original DBE of the intent to use other forces or material sources and provide the reasons and provide the DBE with five (5) days to respond to the notice and advise Consultant and City of the reasons why the use of other forces or sources of materials should not occur.

Consultant's request to use other forces or material sources must include:

(a) One or more of the reasons listed in the preceding paragraph.

(b) Notices from Consultant to the DBE regarding the request.

(c) Notices from the DBEs to Consultant regarding the request.

If a listed DBE is terminated or substituted, Consultant must make good faith efforts to find another DBE to substitute for the original DBE. The substitute DBE must perform at least the same amount of work as the original DBE under the contract to the extent needed to meet or exceed the DBE goal.

11.6. Commitment and Utilization. City's DBE program must include a monitoring and enforcement mechanism to ensure that DBE commitments reconcile to DBE utilization.

Consultant shall:

(a) Notify the City's Contract Administrator or designated representative of any changes to its anticipated DBE participation.

(b) Provide this notification before starting the affected work.

(c) Maintain records including:

(i) Name and business address of each 1st-tier subconsultant;

(ii) Name and business address of each DBE subconsultant, DBE vendor, and DBE trucking company, regardless of tier; and

(iii) Date of payment and total amount paid to each business (see Exhibit 9-F Monthly Disadvantaged Business Enterprise Payment).

If Consultant is a DBE consultant, it shall include the date of work performed by its own

forces and the corresponding value of the work.

If a DBE is decertified before completing its work, the DBE must notify Consultant in writing of the decertification date. If a business becomes a certified DBE before completing its work, the business must notify Consultant in writing of the certification date. Consultant shall submit the notifications to the City. On work completion, Consultant shall complete a Disadvantaged Business Enterprises (DBE) Certification Status Change, Exhibit 17-O, form and submit the form to the City within 30 days of contract acceptance.

Upon work completion, Consultant shall complete Exhibit 17-F Final Report – Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subcontractors and submit it to the City within 90 days of contract acceptance. The City will withhold $10,000 until the form is submitted. The City will release the withheld amount upon submission of the completed form.

In the City's reports of DBE participation to Caltrans, the City must display both commitments and attainments.

11.7. A DBE is only eligible to be counted toward the Agreement goal if it performs a commercially useful function (CUF) on the Agreement. CUF must be evaluated on an agreement by agreement basis. A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the Agreement and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible, with respect to materials and supplies used on the Agreement, for negotiating price, determining quality and quantity, ordering the material and installing (where applicable), and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the Agreement is commensurate with the work it is actually performing, and other relevant factors.

11.8. A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, agreement, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.

11.9. If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its agreement with its own work force, or the DBE subcontracts a greater portion of the work of the agreement than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.

11.10. Consultant shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE consultants shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.

11.11. If a DBE subconsultant is decertified during the life of the Agreement, the decertified subconsultant shall notify Consultant in writing with the date of decertification. If a subconsultant becomes a certified DBE during the life of the Agreement, the subconsultant shall notify Consultant in writing with the date of certification. Any changes should be reported to City's

Contract Administrator within thirty (30) calendar days.

11.12. After submitting an invoice for reimbursement that includes a payment to a DBE, but no later than the 10th of the following month, the prime contractor/consultant shall complete and email the Exhibit 9-F: Disadvantaged Business Enterprise Running Tally of Payments to business.support.unit@dot.ca.gov with a copy to the City.

11.13. Any subcontract entered into as a result of this Agreement shall contain all of the provisions of this Section.

12.0. CONFLICT OF INTEREST

12.1. During the term of this Agreement, Consultant shall disclose any financial, business, or other relationship with City that may have an impact upon the outcome of this Agreement or any ensuing City construction project. Consultant shall also list current clients who may have a financial interest in the outcome of this Agreement or any ensuing City construction project which will follow.

12.2. Consultant certifies that it has disclosed to City any actual, apparent, or potential conflicts of interest that may exist relative to the services to be provided pursuant to this Agreement. Consultant agrees to advise City of any actual, apparent or potential conflicts of interest that may develop subsequent to the date of execution of this Agreement. Consultant further agrees to complete any statements of economic interest if required by either City ordinance or State law.

12.3. Consultant hereby certifies that it does not now have, nor shall it acquire any financial or business interest that would conflict with the performance of services under this Agreement.

12.4. Consultant hereby certifies that the Consultant or subconsultant and any firm affiliated with the Consultant or subconsultant that bids on any construction contract or on any agreement to provide construction inspection for any construction project resulting from this Agreement, has established necessary controls to ensure a conflict of interest does not exist. An affiliated firm is one, which is subject to the control of the same persons, through joint ownership or otherwise.

13.0. REBATES, KICKBACKS OR OTHER UNLAWFUL CONSIDERATION

Consultant warrants that this Agreement was not obtained or secured through rebates, kickbacks or other unlawful consideration, either promised or paid to any City employee. For breach or violation of this warranty, City shall have the right, in its discretion, to terminate this Agreement without liability, to pay only for the value of the work actually performed, or to deduct from this Agreement price, or otherwise recover the full amount of such rebate, kickback or other unlawful consideration.

14.0. NON-DISCRIMINATION CLAUSE AND STATEMENT OF COMPLIANCE

14.1. Consultant's signature affixed herein and dated shall constitute a certification under penalty of perjury under the laws of the State of California that Consultant has, unless exempt, complied with the nondiscrimination program requirements of Government Code section

12990 and Section 8103 of Title 2 of the California Code of Regulations.

14.2. During the performance of this Agreement, Consultant and its subconsultants shall not deny the Agreement's benefits to any person on the basis of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status, nor shall they unlawfully discriminate, harass, or allow harassment against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status. Consultant and subconsultants shall ensure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment.

14.3. Consultant and subconsultants shall comply with the provisions of the Fair Employment and Housing Act (Government Code section 12990 et seq.), the applicable regulations promulgated there under (2 C.C.R. section 11000 et seq.), the provisions of Government Code sections 11135-11139.5, and the regulations or standards adopted by City to implement such article. The applicable regulations of the Fair Employment and Housing Commission implementing Government Code section 12990 (a-f), set forth 2 C.C.R. sections 8100-8504, are incorporated into this Agreement by reference and made a part hereof as if set forth in full.

14.4. Consultant shall permit access by representatives of the Department of Fair Employment and Housing and the City upon reasonable notice at any time during the normal business hours, but in no case less than twenty-four (24) hours' notice, to such of its books, records, accounts, and all other sources of information and its facilities as said Department or City shall require to ascertain compliance with this Section.

14.5. Consultant and its subconsultants shall give written notice of their obligations under this Section to labor organizations with which they have a collective bargaining or other Agreement.

14.6. Consultant shall include the nondiscrimination and compliance provisions of this Section in all subcontracts to perform work under this Agreement.

14.7. Consultant, with regard to the work performed by it during the Agreement, shall act in accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. section 2000d et seq.). Title VI provides that the recipients of federal assistance will implement and maintain a policy of nondiscrimination in which no person in the United States shall, on the basis of race, color, national origin, religion, sex, age, disability, be excluded from participation in, denied the benefits of or subject to discrimination under any program or activity by the recipients of federal assistance or their assignees and successors in interest.

14.8. Consultant shall comply with regulations relative to non-discrimination in federally-assisted programs of the U.S. Department of Transportation (49 C.F.R. Part 21 - Effectuation of Title VI of the Civil Rights Act of 1964). Specifically, Consultant shall not participate either directly or indirectly in the discrimination prohibited by 49 C.F.R. section 21.5, including employment practices and the selection and retention of Subconsultants.

14.9. Consultant, subrecipient or subconsultant will never exclude any person from participation in, deny any person the benefits of, or otherwise discriminate against anyone in connection with the award and performance of any contract covered by 49 C.F.R. 26 on the basis of race, color, sex, or national origin. In administering the City components of the DBE Program Plan, Consultant, subrecipient or subconsultant will not, directly, or through contractual or other arrangements, use criteria or methods of administration that have the effect of defeating or substantially impairing accomplishment of the objectives of the DBE Program Plan with respect to individuals of a particular race, color, sex, or national origin.

14.10. Consultant shall comply with the requirements set forth in Appendix E of the Title VI Assurances, attached hereto as Exhibit "C" and incorporated herein by this reference.

15.0. DEBARMENT AND SUSPENSION CERTIFICATION

15.1. Consultant's signature affixed herein shall constitute a certification under penalty of perjury under the laws of the State of California, that Consultant or any person associated therewith in the capacity of owner, partner, director, officer or manager:

(a) Is not currently under suspension, debarment, voluntary exclusion, or determination of ineligibility by any federal agency;

(b) Has not been suspended, debarred, voluntarily excluded, or determined ineligible by any federal agency within the past three (3) years;

(c) Does not have a proposed debarment pending; and

(d) Has not been indicted, convicted, or had a civil judgment rendered against it by a court of competent jurisdiction in any matter involving fraud or official misconduct within the past three (3) years.

15.2. Any exceptions to this certification must be disclosed to City. Exceptions will not necessarily result in denial of recommendation for award, but will be considered in determining responsibility. Disclosures must indicate the party to whom the exceptions apply, the initiating agency, and the dates of agency action.

15.3. Exceptions to the Federal Government Excluded Parties List System maintained by the General Services Administration are to be determined by the Federal Highway Administration.

16.0. GENERAL PROVISIONS

16.1. Entire Agreement. This Agreement constitutes the entire agreement between the parties with respect to any matter referenced herein and supersedes any and all other prior writings and oral negotiations. This Agreement may be modified only in writing, and signed by the parties in interest at the time of such modification. The terms of this Agreement shall prevail over any inconsistent provision in any other contract document appurtenant hereto, including exhibits to this Agreement.

16.2. Representatives. The City Manager or his or her designee shall be the representative of City for purposes of this Agreement and may issue all consents, approvals,

directives and agreements on behalf of the City, called for by this Agreement, except as otherwise expressly provided in this Agreement.

Consultant shall designate a representative for purposes of this Agreement who shall be authorized to issue all consents, approvals, directives and agreements on behalf of Consultant called for by this Agreement, except as otherwise expressly provided in this Agreement.

16.3. Project Managers. City shall designate a Project Manager to work directly with Consultant in the performance of this Agreement.

Consultant shall designate a Project Manager who shall represent it and be its agent in all consultations with City during the term of this Agreement. Consultant or its Project Manager shall attend and assist in all coordination meetings called by City.

16.4. Notices. Any notices, documents, correspondence or other communications concerning this Agreement or the work hereunder may be provided by personal delivery or mail and shall be addressed as set forth below. Such communication shall be deemed served or delivered: (a) at the time of delivery if such communication is sent by personal delivery, and (b) 48 hours after deposit in the U.S. Mail as reflected by the official U.S. postmark if such communication is sent through regular United States mail.

16.5. Drug-Free Workplace Policy. Consultant shall provide a drug-free workplace by complying with all provisions set forth in City's Council Policy 100-5, attached hereto as Exhibit "D" and incorporated herein by reference. Consultant's failure to conform to the requirements set forth in Council Policy 100-5 shall constitute a material breach of this Agreement and shall be cause for immediate termination of this Agreement by City.

16.6. Attorneys' Fees. In the event that litigation is brought by any party in connection with this Agreement, the prevailing party shall be entitled to recover from the opposing party all costs and expenses, including reasonable attorneys' fees, incurred by the prevailing party in the exercise of any of its rights or remedies hereunder or the enforcement of any of the terms, conditions, or provisions hereof.

16.7. Governing Law. This Agreement shall be governed by and construed under the laws of the State of California without giving effect to that body of laws pertaining to conflict of laws. In the event of any legal action to enforce or interpret this Agreement, the parties hereto agree that the sole and exclusive venue shall be a court of competent jurisdiction located in Orange County, California.

16.8. Assignment. Consultant shall not voluntarily or by operation of law assign, transfer, sublet or encumber all or any part of Consultant's interest in this Agreement without City's prior written consent. Any attempted assignment, transfer, subletting or encumbrance shall be void and shall constitute a breach of this Agreement and cause for termination of this Agreement. Regardless of City's consent, no subletting or assignment shall release Consultant of Consultant's obligation to perform all other obligations to be performed by Consultant hereunder for the term of this Agreement.

16.9. Indemnification and Hold Harmless. Consultant agrees to defend, indemnify, hold free and harmless the City, its elected officials, officers, agents and employees, at Consultant's sole expense, from and against any and all claims, actions, suits or other legal proceedings brought against the City, its elected officials, officers, agents and employees arising out of the negligence, recklessness, or willful misconduct of the Consultant, its employees, and/or authorized subcontractors, in the performance of the work undertaken pursuant to this Agreement. The defense obligation provided for hereunder shall apply without any advance showing of negligence or wrongdoing by the Consultant, its employees, and/or authorized subcontractors, but shall be required whenever any claim, action, complaint, or suit asserts as its basis the negligence, errors, omissions or misconduct of the Consultant, its employees, and/or authorized subcontractors, and/or whenever any claim, action, complaint or suit asserts liability against the City, its elected officials, officers, agents and employees based upon negligence, recklessness, or willful misconduct in the work performed by the Consultant, its employees, and/or authorized subcontractors under this Agreement, whether or not the Consultant, its employees, and/or authorized subcontractors are specifically named or otherwise asserted to be liable. Notwithstanding the foregoing, the Consultant shall not be liable for the defense or indemnification of the City for claims, actions, complaints or suits arising out of the sole active negligence or willful misconduct of the City. In no event shall the cost to defend charged to Consultant exceed Consultant's proportionate percentage of fault. However, notwithstanding the previous sentence, in the event one or more defendants is unable to pay its share of defense costs due to bankruptcy or dissolution of the business, Consultant shall meet and confer with other parties regarding unpaid defense costs. This provision shall supersede and replace all other indemnity provisions contained either in the City's specifications or Consultant's Proposal, which shall be of no force and effect.

16.10. Independent Contractor. Consultant is and shall be acting at all times as an independent contractor and not as an employee of City. Consultant shall have no power to incur any debt, obligation, or liability on behalf of City or otherwise act on behalf of City as an agent. Neither City nor any of its agents shall have control over the conduct of Consultant or any of Consultant's employees, except as set forth in this Agreement. Consultant shall not, at any time, or in any manner, represent that it or any of its agents or employees are in any manner agents or employees of City. Consultant shall secure, at its sole expense, and be responsible for any and all payment of Income Tax, Social Security, State Disability Insurance Compensation, Unemployment Compensation, and other payroll deductions for Consultant and its officers, agents, and employees, and all business licenses, if any are required, in connection with the services to be performed hereunder. Consultant shall indemnify and hold City harmless from any

and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Consultant further agrees to indemnify and hold City harmless from any failure of Consultant to comply with the applicable worker's compensation laws. City shall have the right to offset against the amount of any fees due to Consultant under this Agreement any amount due to City from Consultant as a result of Consultant's failure to promptly pay to City any reimbursement or indemnification arising under this paragraph.

16.11. PERS Eligibility Indemnification. In the event that Consultant or any employee, agent, or subcontractor of Consultant providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the City, Consultant shall indemnify, defend, and hold harmless City for the payment of any employee and/or employer contributions for PERS benefits on behalf of Consultant or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City.

Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, Consultant and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contribution and/or employee contributions for PERS benefits.

16.12. Cooperation. In the event any claim or action is brought against City relating to Consultant's performance or services rendered under this Agreement, Consultant shall render any reasonable assistance and cooperation which City might require.

16.13. Ownership of Documents. All findings, reports, documents, information and data including, but not limited to, computer tapes or discs, files and tapes furnished or prepared by Consultant or any of its subcontractors in the course of performance of this Agreement, shall be and remain the sole property of City. Consultant agrees that any such documents or information shall not be made available to any individual or organization without the prior consent of City. Any use of such documents for other projects not contemplated by this Agreement, and any use of incomplete documents, shall be at the sole risk of City and without liability or legal exposure to Consultant. City shall indemnify and hold harmless Consultant from all claims, damages, losses, and expenses, including attorneys' fees, arising out of or resulting from City's use of such documents for other projects not contemplated by this Agreement or use of incomplete documents furnished by Consultant. Consultant shall deliver to City any findings, reports, documents, information, data, in any form, including but not limited to, computer tapes, discs, files audio tapes or any other Project related items as requested by City or its authorized representative, at no additional cost to the City.

16.14. Public Records Act Disclosure. Consultant has been advised and is aware that this Agreement and all reports, documents, information and data, including, but not limited to, computer tapes, discs or files furnished or prepared by Consultant, or any of its subcontractors, pursuant to this Agreement and provided to City may be subject to public disclosure as required by the California Public Records Act (California Government Code section 6250 *et seq.*). Exceptions to public disclosure may be those documents or information that qualify as trade

secrets, as that term is defined in the California Government Code section 6254.7, and of which Consultant informs City of such trade secret. The City will endeavor to maintain as confidential all information obtained by it that is designated as a trade secret. The City shall not, in any way, be liable or responsible for the disclosure of any trade secret including, without limitation, those records so marked if disclosure is deemed to be required by law or by order of the Court.

16.15. Conflict of Interest. Consultant and its officers, employees, associates and subconsultants, if any, will comply with all conflict of interest statutes of the State of California applicable to Consultant's services under this agreement, including, but not limited to, the Political Reform Act (Government Code sections 81000, et seq.) and Government Code section 1090. During the term of this Agreement, Consultant and its officers, employees, associates and subconsultants shall not, without the prior written approval of the City Representative, perform work for another person or entity for whom Consultant is not currently performing work that would require Consultant or one of its officers, employees, associates or subconsultants to abstain from a decision under this Agreement pursuant to a conflict of interest statute.

16.16. Responsibility for Errors. Consultant shall be responsible for its work and results under this Agreement. Consultant, when requested, shall furnish clarification and/or explanation as may be required by the City's representative, regarding any services rendered under this Agreement at no additional cost to City. In the event that an error or omission attributable to Consultant occurs, then Consultant shall, at no cost to City, provide all necessary design drawings, estimates and other Consultant professional services necessary to rectify and correct the matter to the sole satisfaction of City and to participate in any meeting required with regard to the correction.

16.17. Prohibited Employment. Consultant will not employ any regular employee of City while this Agreement is in effect.

16.18. Order of Precedence. In the event of an inconsistency in this Agreement and any of the attached Exhibits, the terms set forth in this Agreement shall prevail. If, and to the extent this Agreement incorporates by reference any provision of any document, such provision shall be deemed a part of this Agreement. Nevertheless, if there is any conflict among the terms and conditions of this Agreement and those of any such provision or provisions so incorporated by reference, this Agreement shall govern over the document referenced.

16.19. Costs. Each party shall bear its own costs and fees incurred in the preparation and negotiation of this Agreement and in the performance of its obligations hereunder except as expressly provided herein.

16.20. Binding Effect. This Agreement binds and benefits the parties and their respective permitted successors and assigns.

16.21. No Third Party Beneficiary Rights. This Agreement is entered into for the sole benefit of City and Consultant and no other parties are intended to be direct or incidental beneficiaries of this Agreement and no third party shall have any right in, under or to this Agreement.

16.22. Headings. Paragraphs and subparagraph headings contained in this Agreement are included solely for convenience and are not intended to modify, explain or to be a full or accurate description of the content thereof and shall not in any way affect the meaning or

interpretation of this Agreement.

16.23. Construction. The parties have participated jointly in the negotiation and drafting of this Agreement and have had an adequate opportunity to review each and every provision of the Agreement and submit the same to counsel or other consultants for review and comment. In the event an ambiguity or question of intent or interpretation arises with respect to this Agreement, this Agreement shall be construed as if drafted jointly by the parties and in accordance with its fair meaning. There shall be no presumption or burden of proof favoring or disfavoring any party by virtue of the authorship of any of the provisions of this Agreement.

16.24. Amendments. Only a writing executed by the parties hereto or their respective successors and assigns may amend this Agreement.

16.25. Waiver. The delay or failure of either party at any time to require performance or compliance by the other of any of its obligations or agreements shall in no way be deemed a waiver of those rights to require such performance or compliance. No waiver of any provision of this Agreement shall be effective unless in writing and signed by a duly authorized representative of the party against whom enforcement of a waiver is sought. The waiver of any right or remedy in respect to any occurrence or event shall not be deemed a waiver of any right or remedy in respect to any other occurrence or event, nor shall any waiver constitute a continuing waiver.

16.26. Severability. If any provision of this Agreement is determined by a court of competent jurisdiction to be unenforceable in any circumstance, such determination shall not affect the validity or enforceability of the remaining terms and provisions hereof or of the offending provision in any other circumstance. Notwithstanding the foregoing, if the value of this Agreement, based upon the substantial benefit of the bargain for any party, is materially impaired, which determination made by the presiding court or arbitrator of competent jurisdiction shall be binding, then both parties agree to substitute such provision(s) through good faith negotiations.

16.27. Counterparts and Electronic Signatures. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original. All counterparts shall be construed together and shall constitute one agreement. Counterpart written signatures may be transmitted by facsimile, email or other electronic means and have the same legal effect as if they were original signatures.

16.28. Corporate Authority. The persons executing this Agreement on behalf of the parties hereto warrant that they are duly authorized to execute this Agreement on behalf of said parties and that by doing so the parties hereto are formally bound to the provisions of this Agreement.

[Signatures appear on following page.]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by and through their respective authorized officers, as of the date first above written.

RFP
Engineering Design Services for Adams Avenue and Pinecreek Drive Intersection Project ("Project A") and Adams Avenue Bicycle Facility Project ("Project B")

DATE
December 9, 2020

Dear Mr. Nikoui:

KOA Corporation (KOA) has established itself as one of the leaders in ATP Projects – pedestrian and bicycle mobility - in Southern California. More specifically and more importantly to the current RFP, KOA is currently completing the ATP project on Adams Avenue between the Santa Ana River and Royal Palm Drive in Costa Mesa, which will help during the design and review phases of the project, since we know the City staff, issues and procedures. This Costa Mesa and Adams-specific knowledge, combined with KOA's superior experience on ATP and intersection widening projects, makes us a perfect fit for the design of the Adams/Pinecreek Intersection and Adams Avenue Bicycle Facility Projects.

One of KOA's discriminating factors is our desire to understand the project issues at the proposal level, so that we can provide the most-appropriate personnel and level of effort and so that surprises are eliminated or significantly reduced during the design process. For this specific proposal, our effort has included the following work.

- A thorough review of the RFP
- Gathering of existing right-of-way information from the Orange County Surveyor's office
- Detailed field reviews, focusing on pedestrian and bicycle safety, existing constraints, and existing right-of-way
- Review of the pavement rehabilitation plans for this segment of Adams from 2009
- Detailed evaluation of all existing curb ramps at Adams/Harbor and Adams/Fairview for ADA-compliance
- Brief structural review of the effort to reconstruct the existing OCC sign in the SW quadrant of S Street (OCC side of Pinecreek Drive), including the cost to reconstruct
- Numerous discussions amongst the team to identify specific safety, ADA-compliance, bicycle, and traffic issues
- Analysis of existing conditions, the proposed City concept for Project A, and development of a potential concept-level alternative plan

As a result of the effort described above, we have identified a conceptual plan for Project A and Project B which will result in improved safety and reduced construction costs. The potential advantages of our concepts, which will obviously need additional analysis, include the following:

- A lower design and construction cost, increasing the likelihood of the project fitting within the grant budget
- Ensuring slower/safer right-turn speeds entering OCC from eastbound Adams
- Eliminating the need for pedestrians to enter the roadway a second time at the southwest corner, reducing the potential for conflict with high-speed vehicles approaching the turn from eastbound Adams Avenue

2141 W. Orangewood Avenue, Orange, CA 92868
T: (714) 573-0317 | F: (714) 573-9534 | www.koacorp.com
MONTEREY PARK ORANGE ONTARIO SAN DIEGO LA QUINTA CULVER CITY

- Eliminating the short merging movement between eastbound right-turns and westbound left-turns on S Street
- Eliminating the need to reconstruct the vertical OCC marquee sign at the southwest corner (which is preliminarily estimated to be at least $70k), while also avoiding shifting the sign further west on Adams and thereby making it less visible to students
- Eliminating the potential for the relocated marquee's digital sign board to interfere with the visibility of pedestrians crossing the slip right-turn lane, especially at night
- Eliminating the visual distraction of motorists reading the sign while making the right turn on the slip ramp
- Aligning the south crosswalk to be more closely perpendicular with the Adams Avenue alignment through the intersection, offering better sight lines to pedestrians

Ultimately, the success of this project will be based on paying attention to the design details. The experience of the KOA project team, combined with our constructability reviews and proven QA/QC procedures, help to assure the City that cost-effective solutions are developed and that the details of the project design are being closely scrutinized and double-checked.

In addition to our efforts to understand the project at the proposal stage, KOA offers expertise and experience that provide us with unparalleled discriminators in Southern California, as summarized below.

Safety. KOA will make safety the most important aspect of these two projects. As discussed throughout our proposal, free right turns are rarely being designed in Southern California any longer, due to the potential vehicle/pedestrian conflicts at crosswalks. Similarly for Project B, bicycle safety will be a primary issue in the design of the Class II bike lanes.

ATP Project Specialists. KOA is the leader in Southern California in designing ATP projects. As reflected in the related experience section of this proposal, we specialize in these types of projects and are familiar with all of the nuances involved during the design process.

Federal Project Expertise. As reflected in the related experience section of this proposal, KOA has extensive expertise in preparing design documents for federally funded projects.

ADA Compliance. As a handicapped engineer, our Project Manager takes ADA compliance seriously. The KOA team has designed over 200 curb ramps for the City of Long Beach over the last 3 years and hundreds more for other local municipalities in Los Angeles and Orange Counties.

KOA has completed multiple ATP and intersection widening projects for the same agencies, which is a good indication of past performance and confidence with KOA staff. The assembled team members have an average of over 20 years of experience in their respective areas of expertise. In addition to their specific industry experience, the team has extensive experience working together on many similar projects throughout Southern California. This experience will enable Costa Mesa to have a quality end product that proceeds on-schedule, is designed within budget at a reasonable cost, and is constructed without problems.

Sincerely,
KOA Corporation

Min Zhou

Min Zhou, PE
CEO

SECTION 1 | PROJECT UNDERSTANDING

OVERVIEW

The City of Costa Mesa proposes to construct two bikeway projects (Projects A and B) on Adams Avenue between Harbor Boulevard and Fairview Road. Project A will reconstruct the south side of the intersection of Pinecreek and Adams to provide enhanced bicycle, pedestrian, and transit facilities, while Project B will bring dedicated bikeway access for the entire segment between Harbor Boulevard and Fairview Road. Together, the two projects will serve to complement the proposed bike lanes that KOA is currently designing on Adams Avenue to the west and the recently completed ATP improvements on Fairview Road, northerly to Baker Avenue.

PROPOSAL EFFORT

One of KOA's discriminating factors is our objective to have a comprehensive understanding of the project issues at the proposal level, so that we can provide the most appropriate personnel and level of effort, and that surprises are eliminated or minimized during the design process. For this specific proposal, our effort has included the following:

- A thorough review of the RFP
- Gathering of existing right-of-way information from the Orange County Surveyor's office
- Detailed field reviews, focusing on pedestrian and bicycle safety, existing constraints, and existing right-of-way
- Reviewed the pavement rehabilitation plans for this segment of Adams from 2009
- Detailed evaluation of all existing curb ramps at Adams/Harbor and Adams/Fairview for ADA-compliance
- Brief structural review of effort to reconstruct the existing OCC sign in the SW quadrant of S Street, including the construction cost to reconstruct
- Numerous discussions amongst the team to identify specific safety, ADA-compliance, and bicycle and traffic issues
- Development of potential concept-level alternative plan

KOA DISCRIMINATORS

SAFETY

KOA will make safety the most important aspect of these two projects. As discussed below, free right turns are rarely being designed in Southern California any longer. due to the potential vehicle/pedestrian conflicts at crosswalks. Similarly for Project B, bicycle safety will be a primary issue in the design of the Class II bike lanes.

ATP PROJECT SPECIALISTS

KOA is the leader in Southern California in designing ATP projects. As reflected in the related experience section of this proposal, we specialize in these types of projects and are familiar with all of the nuances involved during the design process.

FEDERAL PROJECT EXPERTISE

As reflected in the related experience section of this proposal, KOA has extensive expertise in preparing design documents for federally funded projects.

STRETCHING THE CITY'S CONSTRUCTION DOLLARS

One of KOA's primary objectives on roadway projects is to stretch the City's construction dollars. Specifically for Project A, we have preliminarily identified a less-costly right-turn alternative for eastbound traffic to southbound S Street, which in addition to eliminating the need to reconstruct the costly OCC sign in the SW quadrant, would also eliminate the need to construct a bus turnout in the SE quadrant. For Project B, the bike lanes can be added without having to widen the outside curbs.

[illegible]

One of the elements of the design of a project that KOA pays special attention to is the preparation of realistic construction estimates. For Project A we have included a structural engineer to potentially prepare plans for the reconstruction of the OCC sign and to provide a construction cost estimate. Our estimates are based on contractor bids for similar recent construction projects supplemented by direct discussion with KOA's construction personnel and contractors. Additionally, we prepare a preliminary cost estimate at the early design stage to determine whether the project is within the construction budget or if adjustments need to be made.

ADA COMPLIANCE

As a handicapped engineer, our Project Manager takes ADA-compliance seriously. The KOA team has designed over 200 curb ramps for the City of Long Beach over the last 3 years and hundreds more for other local municipalities in Los Angeles and Orange Counties.

DESIGN DISCUSSION

ADA COMPLIANCE (BOTH PROJECTS)

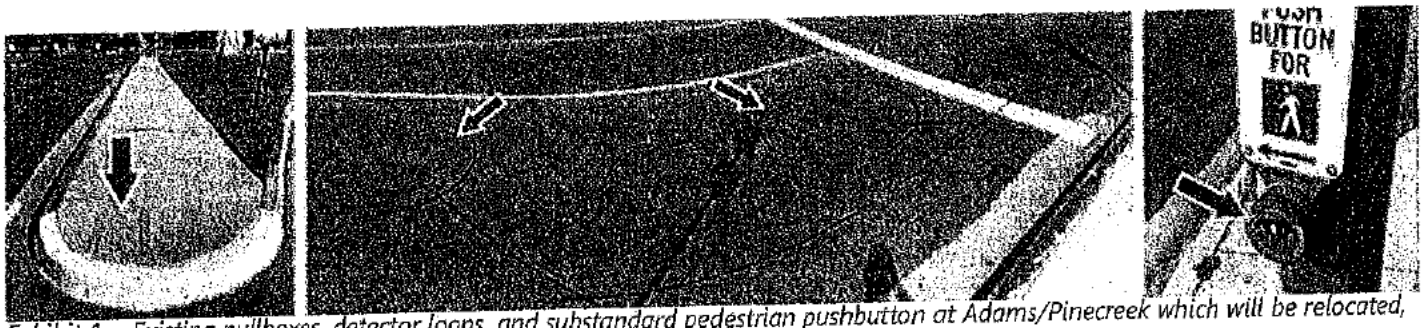
All curb ramps at the Pinecreek intersection, as well as at the Harbor and Fairview intersections, will need to be ADA-compliant. As discussed above, our field review included detailed measurements of the various criteria for all of the existing ramps. Only the southeast curb return at Fairview is non-compliant. At Pinecreek, we recognize that the relocation/replacement of some traffic signal poles, pull boxes, and loop detectors will be required. The pedestrian access route at Pinecreek is currently discontinuous between the southerly sidewalk west of Pinecreek and the raised island at the southwest corner of the intersection.

UTILITY IMPACTS (PROJECT A)

There are several utility obstructions at the southwest and southeast corners of Adams/Pinecreek that will need to be relocated, adjusted, and/or otherwise investigated for coordination with the proper utility company or agency. The placement of utility lines and vaults/manholes/access covers, and conflicts with landscaping (trees), signal poles, light poles, other utilities and infrastructure will be reviewed. Curb drains and several catch basins will need to be relocated to the new curb face(s) at the southwest corner at Pinecreek.

TRAFFIC SIGNALS (BOTH PROJECTS)

Reconstructing the southwest/southeast corners at Pinecreek will require traffic signal modifications to redesign and relocate traffic signal poles, realign signal heads to the new lane configurations, update push buttons and pedestrian signal heads to ADA compliance, and reinstall loop detection. As shown in Exhibit 1, KOA staff conducted a preliminary field walk of the corridor and noted that the pushbuttons at the northwest and northeast corners of the intersection are also substandard and not in conformance with current Caltrans requirements. These pushbuttons must be replaced with California Manual for Uniform Traffic Control Devices (CA MUTCD)-compliant pushbutton housings (APS will be considered). complete with minimum 2" diameter buttons and informative pedestrian crossing placards.



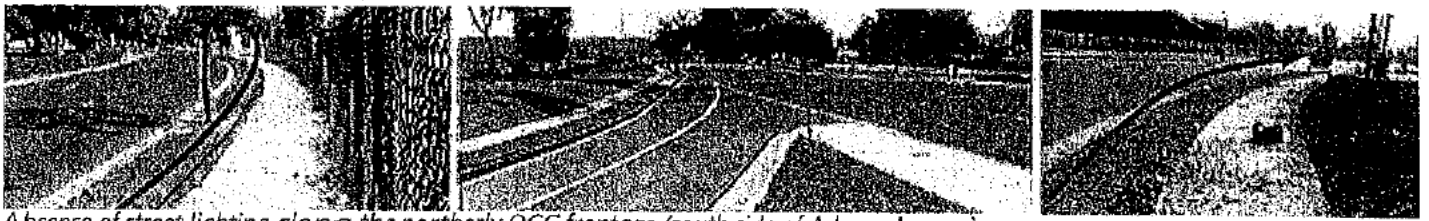


Exhibit 1 – Existing pullboxes, detector loops, and substandard pedestrian pushbutton at Adams/Pinecreek which will be relocated, modified. or replaced as part of the reconstructed southwest corner

BUS STOP RELOCATION (PROJECT A)

OCTA bus route 178 travels through Adams Avenue with an eastbound bus stop at Pinecreek/OCC (near-side). KOA will work with the City in providing a design that relocates the eastbound near-side bus stop/bench at Pinecreek to the east (far) side of the intersection, matching the lane realignments and bike lane, complete with a new bus turnout, OCTA-compliant shelter, and bus schedule amenities to accommodate OCTA patrons. The existing bus shelter extends from the back of walk to 32" toward the curb. Therefore, in order to provide a minimum of 4 feet of pedestrian clearance around the new bus shelter at Adams/Pinecreek, the new sidewalk will need be designed to provide adequate clearance.

STREET LIGHTING (PROJECT A)

With the exception of safety lighting at the Adams/Pinecreek traffic signal, there are currently no street lights on the south side of Adams Avenue through the entire 2,800' stretch of frontage along the OCC northerly campus property. Therefore, as confirmed by the City, mid-block street lighting will need to be provided in the sidewalk on both Adams and along the length of the eastbound right-turn slip lane. KOA will use AGI32 street lighting design software to calculate photometrics, review illumination, and prepare street lighting and electrical plans to provide sufficient visibility for drivers, pedestrians, and bicyclists.

Absence of street lighting along the northerly OCC frontage (south side of Adams Avenue)

ALTERNATIVES DISCUSSION (PROJECT A)

As stated earlier in this proposal, KOA makes a significant effort during the proposal stage to have a comprehensive understanding of the project issues and to attempt to eliminate surprises during the design process. To that end, we have prepared Exhibit 2 (see end of proposal), to provide the City with a potential concept-level plan of both projects integrated as one over the existing baseline conditions:

As seen in Exhibit 2, an important design challenge to consider in order to accommodate new bike lanes on Adams Avenue is the exclusive right-turn lane in the eastbound direction, shown in the City's concept design. By standard practice, the exclusive right-turn lane will require that the bike lane be aligned to the left-hand side of the right-turn lane. The remaining travel lanes and left-turn lane would then be offset from their original alignment on approach to the intersection, which will require some traffic signal modification design to ensure that proper vehicle detection is maintained. Bicyclists queuing up in the new bike lanes at the traffic signal should also be given adequate signal detection, which can be done by adding bicycle video detection zones, bike loops, or bicycle pushbuttons on the signal poles or on new stub poles within reaching distance of the bike lane, if located curbside.

The inset detail shown on Exhibit 2 illustrates one proposed alternative approach for Project A's eastbound right-turn lane. For this alternative, the right-turn slip lane would be eliminated altogether, replaced with an exclusive right-turn lane and a traditional crosswalk/sidewalk path at the southwest corner. There are several advantages to implementing this plan.

- Lowers the design and construction cost, increasing the likelihood of the project fitting within the grant budget
- Ensures slower/safer right-turn speeds entering OCC from eastbound Adams Avenue
- Eliminates the need for pedestrians to enter the roadway a second time at the southwest corner, reducing the potential for conflict with high-speed vehicles approaching the turn from eastbound Adams Avenue
- Eliminates the short merging movement between eastbound right-turns and westbound left-turns
- Eliminates the need to reconstruct the vertical OCC marquee sign at the southwest corner (which is preliminarily estimated to be at least $70k), while also avoiding shifting the sign further west on Adams Avenue and thereby making it less visible to students (see Exhibit 3)
- Eliminates the potential for the relocated marquee's digital sign board to interfere with the visibility of pedestrians crossing the slip right-turn lane, especially at night
- Eliminates the visual distraction of motorists reading the sign while making the right turn on the slip ramp
- Avoids having to relocate electrical and communication pull boxes and conduit
- Aligns the south crosswalk to be more closely perpendicular with the Adams Avenue alignment through the intersection, offering better sight lines to pedestrians

Potential drawbacks of this alternative include:

- Reduction to traffic flow/level of service at the intersection for high right-turn volumes in contrast to providing a free and channelized right-turn lane
- The possibility that pedestrians might, over time, create a "desired path" that cuts across the re-landscaped area if it is perceived that the sidewalk path around the reduced radius is an impediment to the fastest walking route. KOA will discuss design options with the City and consider if perhaps a separate side path connecting the south/west sidewalk routes on Adams and S Street would be warranted in conjunction with a traditional right-turn configuration at the corner.

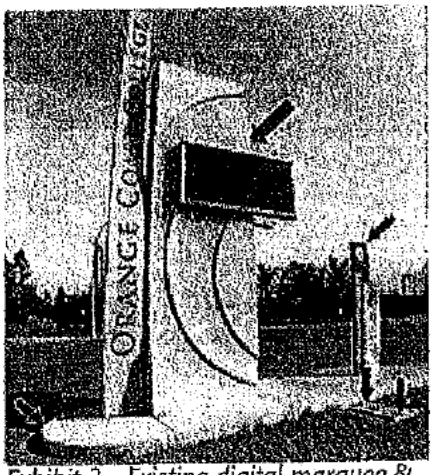

Exhibit 3 – Existing digital marquee & electrical/communications equipment impacted by the design

In addition to time and cost savings during design, the City can take a number of actions for additional savings during construction.

- Traffic signal materials currently have a procurement lead time of 6 to 8 months. Any traffic signal standard equipment such as poles, mast arms, vehicle/ped heads, etc. can be purchased by the City ahead of time and provide the equipment for the Contractor. Alternatively, the City could issue the Contractor a preliminary NTP so that materials can be ordered as soon as possible prior to the actual construction start date.
- Work with KOA to select a design and construction method to reduce work/time, such as keeping existing curb and gutter in place as much as possible, particularly along Adams Avenue outside of the Pinecreek intersection
- Reuse existing trees and boxes within the existing median area (adjust at station) to the extent possible
- Adjust the design to accommodate existing traffic signal poles, signal heads, pullboxes, conduit, mast arm, and pushbutton equipment as much as possible
- Reduce median landscaping area/material costs as much as possible by maintaining the minimum allowable travel widths acceptable by the City of Costa Mesa (e.g., would require foregoing the possibility of adding buffered striping to the bike lanes)
- Utilizing energy-saving LED lamps and luminaire heads for the street lights

ALTERNATIVES DISCUSSION (PROJECT B)

Project B will add a Class II bikeway (on-street marked bicycle lanes) on Adams Avenue, closing the gap on the Adams Bike Lane between Harbor and Fairview and enhancing bike mobility on Adams. Project B would also improve bike connections further west to where it connects to the Santa Ana River Trail and to the City of Huntington Beach's Class II bikeway along Adams. Other important connection points to future facilities include the Class I OCC West Bicycle Trail connecting Adams Avenue to Merrimac Way to the south, and the Class III bike boulevard on Peterson Place which will facilitate bike travel between Adams and Mesa Verde East.

The main design constraint to implementing Project B is the limited curb-to-curb width of the roadway and the width of the traveled way between the existing raised landscaped median and the outside curbs. Adding bike lanes to this segment of Adams Avenue will require changing the existing three-lane per direction traveled-way width from 35 feet, typically, to a minimum of 39 feet wide. Instead of widening the street (a costly alternative), the median width can be reduced along various stretches of the 3,600' segment on Adams.

The proposed design will involve the following:

- Reconstructing the raised median curb
- Removing interfering existing landscape and hardscape, including some mature trees
- Adjusting irrigation and utility cover access

- Adding bike lane guide signage at regular intervals in each direction
- Re-striping the westbound and eastbound lanes to maintain three lanes of travel in addition to the new bike lanes

On the north side of Adams Avenue, just east of Pinecreek Drive, there is also an existing on-street parking lane which KOA will maintain. Our conceptual-level plan would permit the on-street parking lane to remain by marking the bike lane between the parking and outside (#3) travel lane. Where there exists a raised "porkchop" island for pedestrian refuge at the intersection, the bike lane will be located between the island curb and the outer travel lane (see Exhibit 4).

Exhibit 4 – Intersection of Adams Avenue & Fairview: Center median to be reduced, and location of new bike lane (beginning and end) at the crosswalk adjacent to the existing porkchop islands

The two signalized intersections at the ends of the corridor (Adams at Harbor Boulevard and Adams at Fairview Drive) present important design challenges that must also be considered in order to accommodate the new bike lanes. The exclusive right-turn lanes at each intersection will require that the bike lanes be channelized and aligned to the left-hand side of the right-turn lane. The remaining travel lanes and left-turn lane will then be offset from their original alignment on approach to each intersection, which will require some traffic signal modification design to ensure that proper vehicle detection is maintained. Bicyclists queuing up in the new bike lanes at the traffic signals will also need to be given adequate signal detection, which can be done by adding bicycle video detection zones, bike loops, or bicycle pushbuttons on the signal poles or on new stub poles within reaching distance of the bike lane, if located curbside.

We are therefore assuming that no outside curb and gutter will be moved for the project length. However, the entire remaining roadway area in between the north and south outside curbs on Adams Avenue between Harbor Boulevard and Fairview Avenue will be modified in some way. This will primarily involve median trimming along the corridor, which will impact some of the existing tree wells in the median; narrowing and realigning the travel lanes; and providing traffic signal modifications at the three signalized intersections. Project B will tie into Project A at the intersection of Adams/ Pinecreek,

SECTION 2 | WORK PLAN

This section constitutes a refinement to the Scope of Work presented in the RFP. KOA commits to carrying out the tasks and producing the deliverables outlined by the City, through the means and methods discussed below.

PHASE 0: PROJECT APPROACH, PROJECT MANAGEMENT & ADMINISTRATION

KOA will supervise, coordinate, and monitor the work on a continuous basis in conformance with the City of Costa Mesa's requirements. KOA will coordinate between City staff, subconsultants, Orange Coast College (OCC), Southern California Edison (SCE), and other affected agencies and utility companies. KOA will prepare meeting agendas and minutes for every meeting and provide progress reports, invoices, and the schedule updates as needed. Once the contract has been signed, Mr. Matt Stepien, PE, the KOA Project Manager, will organize an initial meeting with the City of Costa Mesa to kick-start the project, along with key staff from our team. The meeting will serve to ensure the design team and City staff have a mutual understanding of tasks to be completed, the schedule of work, and any other logistics that need to be discussed.

We are proposing numerous virtual progress meetings with the City throughout the course of the project. The meetings will serve to update the City of the project progress and discuss issues. Matt will work closely with the City, design staff, and subconsultants to uphold the project schedule and budget. He will also conduct internal project meetings and maintain open lines of communication with all staff involved to advance the project. Matt will serve as the point of contact and liaison between the City's Project Manager and stakeholders.

In addition to obtaining environmental clearance, the City must obtain right-of-way certification and Authorization to Proceed with Construction. These efforts can be cumbersome, requiring coordination between the Caltrans Local Assistance Engineer (DLAE) and our environmental subconsultant, ECORP, who will be preparing the required studies, as needed. Grant management to comply with OCTA's BCI program and Caltrans may be provided as an optional task in this scope of work. KOA will maintain a log of deliverables and discussions to obtain environmental clearance.

Deliverables

- Agenda & Minutes
- Project Progress Reports
- Invoices
- Updated Project Schedules
- Grant Log (Optional)

PHASE 1: TOPO SURVEY, UTILITY RESEARCH, PROJECT DATA COLLECTION

RESEARCH AND UTILITY COORDINATION

KOA will begin the project by requesting from the City record drawings and documents relevant to the project site(s). In addition to the street improvement and traffic signal plans already provided by the City during the proposal phase, other record drawings and documents could include, but are not limited to studies, reports, topographic maps, centerline ties, corner records, or other as-built plans. KOA will send utility notification requests and compile any/all underground and above ground utilities in a separate digital file. This file will be referenced into all relevant design plans and clearly labeled to identify utility type, size, owner, etc. This will allow us to identify any potential impacts and modify the design as necessary. Utility notification responses will be logged in a Microsoft Excel file.

SURVEY

Huitt-Zollars will research at the City of Costa Mesa and County of Orange Department of Public Works for survey record information and will calculate a "record" centerline alignment to be used for the initial centerline monument recovery survey. Huitt-Zollars will then calculate the centerline alignment based on the location of those found monuments and ties. The basis of bearings for the project will be based on recorded subdivision mapping in the area. The vertical datum will be based on the County of Orange Department of Public Works. Work will include level run and horizontal control.

Project A – Huitt-Zollars will provide the field work described below.

- Topo and cross-sections to 10' beyond existing back of walk in SW quadrant of S Street/Adams intersection, from CL S Street to 450' west
- Topo and cross-sections to 20' beyond existing back of walk in SE quadrant of S Street/Adams intersection, from CL S to 260' east
- Topo and cross-sections on S Street from southerly curb on Adams to 350' south – 10' behind existing westerly curb to easterly back of walk
- Curb ramp survey of the 2 northerly ramps on Pinecreek

Project B – Huitt-Zollars will provide the field work described below.

- Topo and 50' sections on Adams Street (3,800 feet) from CL Harbor to CL Fairview – curb to curb except as noted below
- Curb ramp survey of the SE ramp at Fairview
- Porkchop islands on west side of Fairview

Deliverables

- Utility Notification Log and Responses
- Survey Base Map
- Right of Way Boundaries

PHASE 2A: PRELIMINARY DESIGN AND COMMUNITY OUTREACH

SITE INVESTIGATION/EVALUATION

KOA will conduct comprehensive site investigations with detailed photo logs for design and pre-construction reference. Design staff will walk the entire project area to investigate site conditions, drainage, needed modifications to median and sidewalk areas, PCC improvements, non-ADA compliant improvements, verify utility locations and project constraints, and note other typical and non-typical features. At signalized intersections, KOA will obtain the City's signal as-builts and verify traffic signal equipment. KOA will update the base plan and/or revise the project concepts and designs as needed throughout the project to reflect the verified conditions. Our proposal includes a field walk with City staff.

ALTERNATIVES ASSESSMENT

An important step in the preliminary/conceptual design phase will be to provide the project team, community, and stakeholders an opportunity to give feedback to refine our design. For Project A and Project B, we propose to develop a total of two designs, showing the proposed improvements and typical cross sections. We have provided a conceptual plan sample of one possible alternative for the combined projects in our Project Understanding section. We will also develop plant palettes at this stage for the reconstructed center median islands, as well as options for street lighting on the south side of Adams Avenue for Project A only. Our goal for this task is to (1) clearly highlight the project's design features; (2) identify the associated opportunities and constraints throughout the corridor; and (3) prepare a preliminary improvement plan that is cost-effective within the grant budget, while minimizing right-of-way impacts and impacts to OCC improvements. While meeting funding constraints and project goals, we will meet with the City to discuss the alternatives and the plan of action for producing one final concept design for public outreach.

PUBLIC OUTREACH

Public outreach will be vital in garnering support and receiving input on the proposed project design, considering the diverse communities and stakeholders that use the corridor for their everyday needs. KOA staff will conduct in-person/virtual meetings as follows: one (1) Bikeway and Walkability Committee (BWC) meeting to present the preliminary plans for committee member input; two (2) public workshops to identify public consensus and finalize the preferred project design; and one (1) City Council meeting. KOA will leverage our experience with the westerly Adams Avenue bikeway project and use our local knowledge and understanding of the subject project site's opportunities and constraints. We will utilize our local knowledge to highlight project intent and benefits to the community. KOA will provide clear,

attractive, and informative display boards along with a PowerPoint presentation for each meeting to display each concept. The displays will include one color rendering, cross-sections, and a conceptual plan of the project corridor. Throughout this process, the KOA project team will collect feedback from all meetings provided by stakeholders. KOA staff will then compile the input received and a Community Feedback Memorandum will be prepared and submitted to the City for discussion on design directives. Feedback from the first outreach meeting will be discussed with the City to refine the concept and move forward with the final design stage.

Deliverables

- Alternative Concept Plans
- Outreach Materials, Presentation, and Feedback Memorandum
- Preferred Alternative (30% Design)

KOA Community Workshop #1 – Adams Avenue Bicycle Trail Project from West City Limits to Royal Palm

PHASE 2B: ENVIRONMENTAL ANALYSIS & APPROVAL

ENVIRONMENTAL CLEARANCE

ECORP will prepare the PES form for the proposed project in accordance with the Local Assistance Procedures Manual (LAPM). The PES form will be used to consult with Caltrans/FHWA to determine the appropriate NEPA document for the project (in this case a CE has been assumed). In accordance with the procedures of Caltrans LAPM Chapter 6 and Chapter 7, KOA will complete this form for Caltrans' review in determining if more in-depth environmental studies are required. It should be noted that obtaining environmental clearance is one step of the grant process to obtain Authorization to Proceed with Construction (also known as E76). Based on initial review, it is assumed that any potentially significant impacts will be able to be mitigated below the level of significance. While it is not known yet what environmental impacts the project will cause, we anticipate that the project will result in minimal impacts and would therefore fall into CE/ CE categorization per NEPA/CEQA provisions. The KOA team shall ensure that the PS&E checklist, design deliverables, and environmental clearance forms for Project A comply with all requirements for the successful implementation of a federally-funded project. Grant management services are not included in our scope of work.

Deliverables

- Preliminary Environmental Study (PES) Form
- Approved Categorical Exemption/Categorical Exclusion Determination Form

PHASE 3: FINAL PLANS, SPECIFICATIONS AND ESTIMATES (PS&E)

The KOA team will prepare a quality PS&E package at the 65%, 90%, and Final submittal stages of the project. Based on our understanding of the RFP and the improvements, below is a list of anticipated plans.

- Title sheet
- General notes
- Typical sections, details, and notes
- Demolition
- Street improvements
- Drainage
- Landscape and Irrigation
- Street lighting (Project B only)
- Traffic Signal Modification (Project A only)
- Signing and Striping

HYDROLOGY/HYDRAULIC ANALYSIS

Since only minor amounts of additional impervious area will be added for the projects, we have not included any hydrologic or hydraulic analyses. Any impacted catch basins or storm drain laterals will be replaced in-kind.

WATER QUALITY MANAGEMENT PLAN

The KOA team will work with the City in meeting low impact development (LID) requirements and prepare a Water Quality Management Plan (WQMP). KOA will identify the required best management practices (BMPs) per site conditions.

STREET IMPROVEMENTS

Once the City has approved KOA's concept plans, we will develop improvement plans and details to encompass all aspects of the design. Our focus will be to provide Class 2 bikeways on Adams Avenue, safe multi-modal connectivity along the corridor at Pinecreek Drive, along with conformance with ADA requirements, and median modifications. The street improvement plans will be 1"=40' scale and contain the necessary vertical profile, horizontal control, construction notes, and applicable details. Details for non-compliant curb ramps will be prepared at 5-scale.

DRAINAGE

As a result of the curb and gutter reconstruction at Pinecreek, we anticipate there will be impacts to two of the existing catch basins adjacent to that intersection. KOA will prepare drainage plans at 1"=20' scale in accordance for both impacted catch basins. The laterals will also need to be partially reconstructed and/or modified as necessary to provide connectivity to the storm drain main line.

STREET LIGHTING (PROJECT A ONLY)

The RFP has identified the need to install new street lighting along the south side of Adams Avenue. Once the Project A concept has been approved, we will prepare street light illumination and uniformity calculations using AGI32 lighting design software. We will review the placement/location of each street light to confirm there is no visible conflict with existing improvements and/or utilities, as well as proposed improvements (such as future relocated OCC digital marquee sign board). Pedestals and lights will be designed for installation per the Greenbook (SPPWC) and City of Costa Mesa standard drawings and specifications. KOA will also coordinate with Southern California Edison (SCE) and propose for SCE designers to utilize our plan to identify service points of connection. The street lighting/electrical plans will be produced at a 1"=40' scale. Upon request, KOA will provide the light illumination and uniformity calculations.

TRAFFIC SIGNAL (PROJECT A ONLY)

As part of Project A, KOA will prepare a traffic signal modification plan for the intersection of Adams Avenue at Pinecreek Drive. The signals will be designed to comply with current Caltrans and CA MUTCD standards and will ensure the proper design of all signal poles, mast arms, vehicle heads (primary signal faces), pedestrian indications, and pushbuttons. **(Optional)** Since no traffic signal modification plan was identified in the scope of work for Project B, we are including this work as an optional task. However, as discussed above, Project B may require traffic signal modification at the intersections of Adams/Harbor and Adams/Fairview, in order to accommodate bicycle and pedestrian improvements.

LANDSCAPE/IRRIGATION

CSI will build upon the approved concepts and develop comprehensive construction plans for landscape and irrigation, both within modified/reconstructed median island areas (Project B) and landscaped areas at the intersection of Adams

Avenue & Pinecreek Drive (Project A). The assumption relative to Project B is that the median will be trimmed and that we are including the design to beautify the medians by totally replacing the sparse and inconsistent landscaping within the medians.

BUS STOP FURNITURE/SITE AMENITIES

We have assumed that the only decorative street furniture for this project will be at bus stops and that proposed amenities will match existing bus amenities along the project reach.

SIGNING & STRIPING

We will utilize the California Highway Design Manual (HDM), California MUTCD, and local Costa Mesa standards to provide an acceptable alignment throughout the project corridor. Signing and striping plans will be prepared for the new roadway alignment, bicycle facilities, and pedestrian facilities as needed. The plans will show the location of all proposed traffic signs, stripes and markings, and the proper location of all affected existing signs and markings.

STRUCTURAL (OPTIONAL)

DSC Engineering will research available as-built documentation for the existing OCC monument sign and perform a site visit to verify its layout and measurements. DSC Engineering will prepare drawings for the reconstruction of the sign, including the foundations and the vertical above-ground elements to mimic the existing sign construction. Attachments for the digital and graphic signage will be included. Re-routing of existing conduit and relocation of the existing pull-boxes will also be shown on the plans. A structural analysis will be completed for all structural concrete members and attachments based on the 2019 California Building Code including provisions for both seismic and wind loading on the monument sign. The structural analysis and plans will be stamped and signed by a California Registered Structural Engineer. DSC Engineering will include coordination with the Division of State Architect as required for review and approval of work on the public OCC campus.

SPECIFICATIONS & ESTIMATES

KOA will provide the City with technical specifications and a probable cost of construction concurrent with each submittal phase (65%, 90%, & Final PS&E). KOA will obtain the City's boilerplate specifications and append the technical specifications in Microsoft Word format. The engineer's estimate will be completed using Microsoft Excel. The cost will display anticipated bid items, quantity of material, and unit cost for each item. Prices will reflect anticipated construction year cost unless directed otherwise. We understand the special provisions will serve as a supplement to the Standard Specifications for Public Works Construction (SSPWC) and Caltrans Standard Specifications, latest edition.

POST CONSTRUCTION MONUMENT PERPETUATION:

Pursuant to Section 8771(b) of the Land Surveyor's Act relating to the preservation of monuments, Huitt-Zollars will re-set those centerline monuments which were disturbed or destroyed by the construction project based on the construction ties as shown on the Pre Construction Corner Records prepared for this project and will also set additional centerline ties if required. Huitt-Zollars will then prepare, process and file "Post-Construction" Corner Records. This proposal assumes 3 monuments to be replaced and 1 Post-Construction Corner Records to be prepared. If multiple monuments can be shown on a single Corner Record, we will do so. This line item specifically excludes checking and/or processing fees that may be associated with the Corner Records.

Deliverables

- Meeting agendas & minutes
- 65%, 90%, & Final Plan, Specification, Estimate submittals in both paper and electronic format
- Reponse to comments matrix/Bluebeam plan sheet markups
- Water Quality Management Plan

(OPTIONAL) TRAFFIC ANALYSIS AT PINECREEK

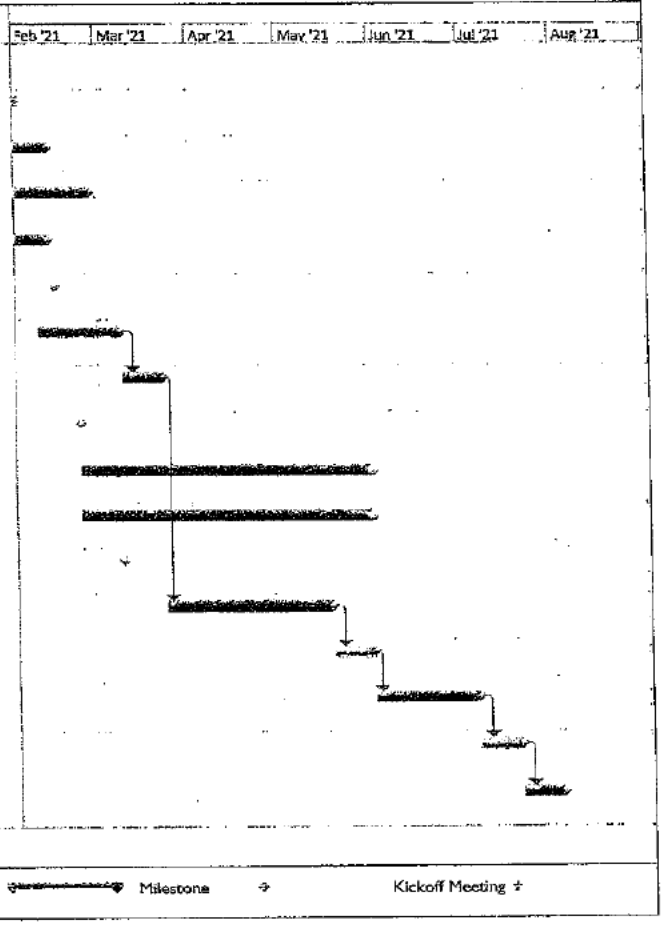
KOA recommends that a data-driven intersection analysis be performed to help in developing the optimal intersection reconfiguration. As a part of this task, KOA will build a traffic model of the Adams/Pinecreek intersection using SYNCHRO-10.0 and conduct an alternatives analysis by evaluating the different lane configurations, timing plans, and phasing patterns for up to three (3) select peak-hour time periods. The evaluation will include a SimTraffic microsimulation to identify and resolve any queuing issues and report on the levels of service and intersection delay for each design option considered by the City.

(OPTIONAL) LEGAL & PLAT AT PINECREEK

Huitt-Zollars will prepare one (1) legal and plat with legal descriptions for the west side and east side of S Street (i.e., OCC side of Pinecreek). For this task, it is assumed that the City will provide the title report. Huitt-Zollars will not perform utility research or utility conflict resolution. Huitt-Zollars will not coordinate or contact utility providers and will not be involved with utility notification efforts. Huitt-Zollars will not coordinate with, or be in contact with, owners of the impacted properties.

QUALITY CONTROL AND QUALITY ASSURANCE

To ensure that we produce a well-engineered PS&E package with a minimal number of construction contract change orders, KOA implements a robust QA/QC process that is followed from the beginning to the end of the project. The QA/QC plan includes a number of steps, including: (1) Holding design meetings with the City's PM, senior civil engineers and public services/transportation management staff at key phases in the project design/approval; (2) Obtaining comments and input from the City; and (3) Conducting internal plancheck and QA/QC with KOA's engineering and construction management staff. This includes tracked color-coded review comments coordinated in Revu Bluebeam® sessions, completion of review checklists, and independent peer review from senior staff to ensure the feasibility and constructability of the project design.

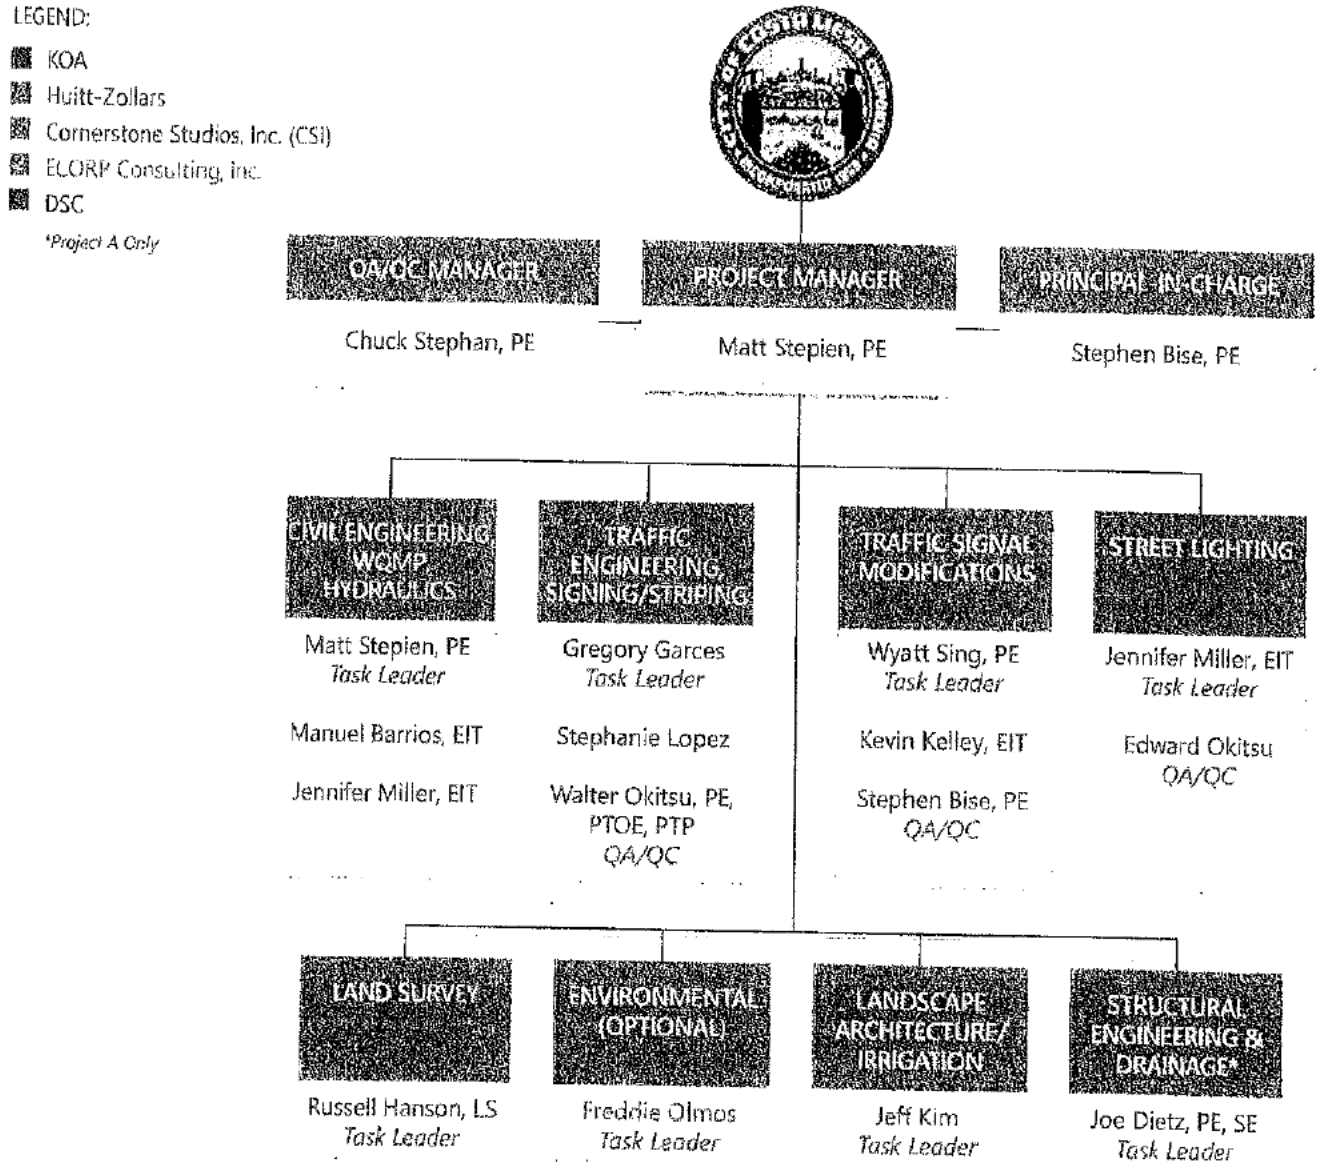


KOA's constructability reviews also allow us to: (1) amplify the odds of being able to identify and anticipate any potential construction problems or conflicts; (2) develop better design alternatives early on in the design phase, and continually throughout the PS&E delivery stages; and (3) provide the City with adequate estimates, quantity takeoffs, and pavement cross sections if needed beyond the typical pavement structural sections provided to us by the City.

SECTION 3 | SCHEDULE

Below is KOA's proposed schedule for the projects, to be performed in tandem.

Costa Mesa Adams Avenue and Pinecreek Drive Intersection (Project A) & Adams Avenue Bicycle Facility Project (Project B)



ID	Task Name	Duration
1	**PHASE 1 - Topo Survey, Utility Research, Project Data Collection**	0 wks
2	Kickoff Meeting	1 day
3	Design Survey	2 wks
4	Records Research and Utility Coordination	4 wks
5	Development and Analysis	2 wks
6	**PHASE 2A - Preliminary Design and Community Outreach**	0 wks
7	Concept Design	4 wks
8	City Review - Concept Design	2 wks
9	**PHASE 2B (Optional) - Environmental Analysis & Approval**	0 wks
10	Environmental Clearance - Project A	14 wks
11	Environmental Clearance - Project B	14 wks
12	**PHASE 3 - Final Plans, Specifications and Estimates**	0 wks
13	65% PS&E	8 wks
14	65% City Review	2 wks
15	90% PS&E	5 wks
16	90% City Review	2 wks
17	Final Submittal - 100% PS&E Package	2 wks

SECTION 4 | PROJECT ORGANIZATION AND STAFFING

ORGANIZATIONAL CHART/STAFFING PLAN

The organizational chart below is a graphic representation of our staffing plan for this project. Matt Stepien, PE will manage the KOA team and serve as the day-to-day contact with the City of Costa Mesa. Be assured that Matt is available and committed to the successful completion of this project. Resumes identifying each personnel's experience on recent similar projects are provided in the Appendices of this proposal.

PROJECT OFFICE LOCATION
2141 W Orangewood Ave
Orange, CA 92868
Tel: (714) 573-0317

PROJECT MANAGER
Matt Stepien, PE
(714) 923-6270

SUBCONSULTANTS

	Responsibility & Contact	Subconsultant Qualifications
Huitt-Zollars (HZ)	Land Survey Services Russell Hanson (714) 231-6377 rhanson@huitt-zollars.com DIR #1000036028	HZ is a full-service civil engineering firm with strong surveying capabilities in Southern Calfironia. They have local offices in Irvine, Ontario, and Thousand Oaks. HZ offers a complete range of land surveying services to support all types of clients and projects, ranging from on-call surveying contracts with city, county, and state governmental agencies to design survey for civil engineers. With HZ's experienced group of professional land surveyors, multiple field crews, office survey technicians, and state-of-the-art surveying and mapping equipment, they are able to provide clients with well-coordinated, cost-effective surveys and related documentation in a timely and efficient manner.
Cornerstone Studios, Inc. (CSI)	Landscape Architecture/ Irrigation Services WooJung (Jeff) Kim (714) 973-2200 x104 jeff@csstudios.com DBE/UDBE #12970 MBE | SBE | CBE	CSI, a California corporation established in 1998, specializes in landscape architecture, park planning, urban design, and resource analysis. It is a professional services firm whose projects encompass a wide range of the built environment, with emphasis on park and recreation areas, transportation facilities, and streetscapes. CSI has provided landscape architectural services for and closely coordinated with various agencies for the following transportation projects: Bristol Street Median; Daisy 9-mile Bike Boulevard; Adams Avenue Improvement; Orange County Streetcar; Randolph Avenue; and Century Boulevard Improvement.
ECORP Consulting, Inc. (ECORP)	Environmental Services Jesus "Freddie" Olmos (909) 307-0046 folmos@ecorpconsulting.com DIR #1000012875 Small Business-Public Works (SB-PW) Federal Small Business	Established in 1987, ECORP is a California "S" Corporation that specializes in assisting with a wide range of environmental services including technical expertise in land use planning; biological, cultural, and water resources; and regulatory compliance with the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA). ECORP is experienced in the preparation of Preliminary Environmental Study (PES) forms for projects per Caltrans' Local Assistance Procedures Manual (LAPM). ECORP staff have prepared Categorical Exclusions/Exemptions (CE/CEs), Environmental Assessments (EA), joint Initial Study/Environmental Assessments (IS/EAs) and Mitigated Negative Declaration/Finding of No Significant Impacts (MND/ FONSIs) for a series of projects with Caltrans involvement.
Dietz Structural & Civil Engineering, Inc. (DSC Engineering)	Joe Dietz, PE, SE (949) 305-9070 joe.dietz@dscengineering.net DIR #1000055507 CA SBE	Dietz Structural & Civil Engineering, Inc. (DSC Engineering) is a California Small Business Corporation formed in February 2017 in Laguna Hills. DSC Engineering takes pride in the low rate of change orders associated with its projects, both in design and in construction. This is accomplished through well thought-out design, knowledge of construction methods and materials, and oversight throughout the design process. DSC Engineering has provided structural engineering services for a wide variety of infrastructure projects including retaining walls, concrete structures, and sign relocations as part of street widening projects.

SECTION 5 | WORK HISTORY

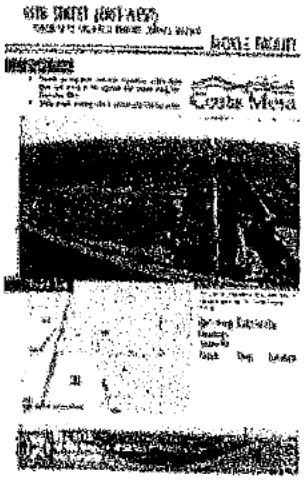
CITY OF COSTA MESA ADAMS AVENUE IMPROVEMENT PROJECT

COSTA MESA, CA

KOA | 06/2019-Ongoing | Project Cost: $320,000

KOA is providing plans, specifications, and cost estimates (PS&E) to construct a landscaped median and a multi-use separated bike and pedestrian facility between the Santa Ana River and Harbor Boulevard. Team firms are providing surveys, goetechnical engineering, and landscape architecture. Project elements include pavement and parkway rehabilitation, PCC improvements, landscape/irrigation, street lighting, storm drain facilities, utility coordination, ADA compliance, fire hydrant relocation, traffic signal modifications, water quality control, and active transportation.

REFERENCE - City of Costa Mesa, Kelly Dalton, (714) 754-5275, kelly.dalton@costamesaca.gov



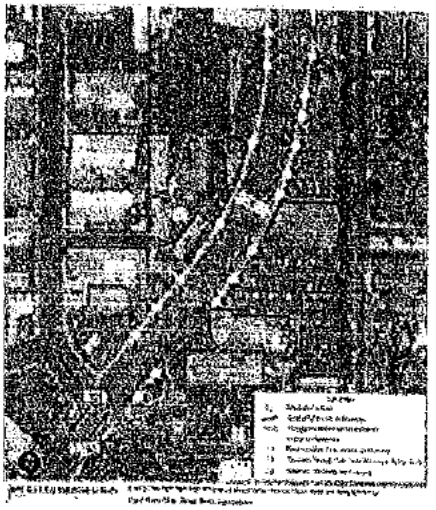
CITY OF COSTA MESA 19TH STREET ON AND OFF-STREET BIKEWAY BETWEEN PLACENTIA AVENUE AND THE GREENVILLE-BANNING CHANNEL

COSTA MESA, CA

KOA | 07/2015-10/2019 | Project Cost: $213,250

The City is using federal ATP grant funding to improve its bicycle connectivity with new facilities along a segment of 19th Street, to the Santa Ana River Banning Channel Bikeway. Multi-jurisdiction coordination is required to implement multiple classes of trail and bike lanes. KOA is providing "turn-key" project design services, which includes preliminary engineering and alternatives analysis; construction-ready bid documents with complete PS&E; and the completion of required federal forms.

REFERENCE - City of Costa Mesa, Jennifer Rosales, (714) 754-5180, jennifer.rosales@costamesaca.gov



CITY OF COSTA MESA BRISTOL STREET IMPROVEMENT PROJECT

COSTA MESA, CA

KOA | 2014 | Project Cost: $33,690

This project sought to alleviate traffic congestion and increase safety by widening the intersection to accommodate additional turn lanes and other improvements. As a subconsultant, KOA provided traffic analysis and traffic engineering services. We designed new traffic signals along Bristol Street, between Randolph Street and Baker Street, for improved access to private driveways. KOA prepared signing and striping plans, street lighting plans, and traffic control plans. Prior to joining KOA, Matt Stepien was the project manager on behalf of the prime consultant.

ENGINEERING DESIGN SERVICES FOR ADAMS AVENUE AND PINECREEK DRIVE INTERSECTION PROJECT ("PROJECT A") AND ADAMS AVENUE BICYCLE FACILITY PROJECT ("PROJECT B")

CITY OF COSTA MESA

SECTION 5 | WORK HISTORY

CITY OF COSTA MESA RANDOLPH AVENUE IMPROVEMENTS PS&E

COSTA MESA, CA

KOA | 2020-Ongoing | Project Cost: $43,540

KOA is developing complete plans, specifications, and estimates (PS&E) for traffic calming improvements on Randolph Avenue and St. Clair Street, between Bristol Street and Baker Street. Our design work includes parallel and angled/diagonal on-street parking, a single-lane roundabout with a central island and raised splitter islands, crosswalks, ADA/pedestrian curb ramps, a street lighting plan, rectangular rapid-flashing beacons (RRFB), speed humps/ cushions, and minor traffic signal modifications.

REFERENCE - City of Costa Mesa, Jennifer Rosales, (714) 754-5180, jennifer.rosales@costamesaca.gov

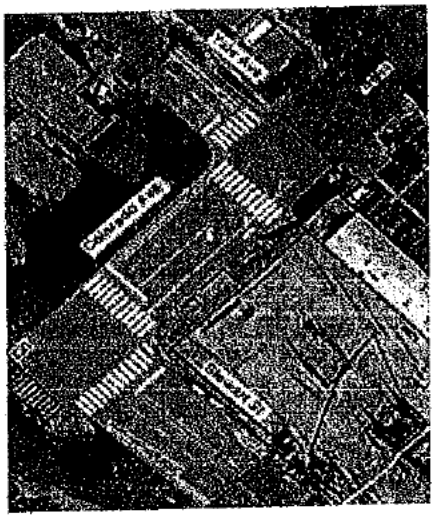
CITY OF CARSON BIKE LANES PS&E

CARSON, CA

KOA | 2020 | Project Cost: $149,285

KOA provided the City of Carson with professional traffic engineering services to design bike lanes along nine corridors within the City. These services consisted of two separate projects performed in tandem. KOA's work included the preparation of plans, specifications, and estimates (PS&E) for Class II bike lanes and Class IV bikeway improvements. In total, KOA designed approximately 32 miles of new bike facilities. KOA also performed traffic analyses for some corridor segments to determine the impacts of proposed road diets at select signalized intersections. Each project was federally funded through the Highway Safety Improvement Program (HSIP) for both design and construction.

REFERENCE - City of Carson, Reata Kulcsar, Civil Engineering Assistant, (310) 952-1700, ext. 1312, RKulcsar@carson.ca.us



CITY OF SANTA MONICA STEWART & PENNSYLVANIA IMPROVEMENT PROJECT

SANTA MONICA, CA

KOA | 2017-Ongoing | Project Cost: $296,748

KOA is providing engineering design services to improve multi-modal connectivity to the new 26th Street/Bergamot Expo light rail station by resolving deficiencies, enhancing mobility, providing first-last mile access, and improving traffic patterns. The improvements consist of protected bikeways, intersection realignment, ADA accessibility, pedestrian and bicycle amenities, and pedestrian lighting. KOA has assisted with public outreach workshops to gather feedback. KOA has produced complete PS&E and is on-call during construction. KOA has provided funding management to obtain Caltrans Authorization for Construction.

SECTION 5 | WORK HISTORY

CITY OF CLAREMONT FOOTHILL BOULEVARD MASTER PLAN IMPLEMENTATION

CLAREMONT, CA

KOA | 2016-2020 | Project Cost: $1,800,000

KOA prepared PS&E to implement a 2-mile project. The team conducted a traffic impact study, geotechnical investigation, and hydrology study to develop concept plans. The preferred design included roadway improvements, bio-retention planters, drywells, new storm drains, bicycle lanes, bulb-outs, landscaping/irrigation, traffic signal modification, sidewalk improvements, street/pedestrian lighting, and entry monuments. KOA provided construction management and inspection services. This project won the American Public Works Association (APWA) 2020 BEST Award for Storm Water Quailty.

CITY OF PLACENTIA CITYWIDE CYCLE 9 HSIP IMPROVEMENTS

PLACENTIA, CA

KOA | 2019-Ongoing | Project Cost: $137,445

KOA provided professional civil/traffic engineering services for the Citywide Cycle 9 HSIP Project (H9-12-010). It includes the preparation of PS&E for intersection improvements at five signalized intersections; funding administration; and construction support. The improvements incorporate left turn phasing and some traffic signal hardware upgrades. Some improvements include eliminating the free right-turn and installing a right-turn overlap phase to decrease added delay and improve safety for pedestrians/cyclists. KOA helped obtain the E76 for Preliminary Engineering and Construction.

CITY OF COSTA MESA

SECTION 6 | PROFESSIONAL SERVICES AGREEMENT (PSA) & REQUIRED STATEMENTS

PROFESSIONAL SERVICES AGREEMENT

If allowed by the City, KOA requests that the following changes be made to the City of Costa Mesa's Professional Services Agreement sample. We do not request any changes to the federal sample contract. Please note that requested omissions are in red strikeout. Additions are shown in blue underline.

6.9. Indemnification and Hold Harmless. Consultant agrees to ~~defend~~, indemnify, hold free and harmless the City, its elected officials, officers, agents and employees, at Consultant's sole expense, from and against any and all claims, actions, suits or other legal proceedings brought against the City, its elected officials, officers, agents and employees arising out of the negligence, recklessness, or willful misconduct of the Consultant, its employees, and/or authorized subcontractors, in the performance of the work undertaken pursuant to this Agreement. The defense obligation provided for hereunder shall apply ~~without any advance showing of negligence or wrongdoing by the Consultant, its employees, and/or authorized subcontractors, but shall be required whenever any claim, action, complaint, or suit asserts as its basis the negligence, errors, omissions or misconduct of the Consultant, its employees, and/or authorized subcontractors, and/or whenever any claim, action, complaint or suit asserts liability against the City, its elected officials, officers, agents and employees~~ based upon negligence, recklessness, or willful misconduct in the work performed by the Consultant, its employees, and/or authorized subcontractors under this Agreement, whether or not the Consultant, its employees, and/or authorized subcontractors are specifically named or otherwise asserted to be liable. Notwithstanding the foregoing, the Consultant shall not be liable for the defense or indemnification of the City for claims, actions, complaints or suits arising out of the sole active negligence or willful misconduct of the City. In no event shall the cost ~~to defend~~ of indemnification charged to Consultant exceed Consultant's proportionate percentage of fault. However, notwithstanding the previous sentence, in the event one or more defendants is unable to pay its share of defense costs due to bankruptcy or dissolution of the business, Consultant shall meet and confer with other parties regarding unpaid defense costs. This provision shall supersede and replace all other indemnity provisions contained either in the City's specifications or Consultant's Proposal, which shall be of no force and effect.

CONFLICT OF INTEREST STATEMENT

KOA is currently providing services to the City of Costa Mesa for several projects that primarily consist of traffic and civil engineering and construction management. To the best of our knowledge, neither KOA or its subconsultant firms have any current clients who may have a financial interest in the outcome of this contract or the resulting construction project(s). We also do not maintain financial interest or relationships with any construction companies that might submit a bid on the construction project(s).

LITIGATION

KOA has no past or pending litigation, or claims filed against our firm, principals of the firm, or each of our key consultants, related to services performed for public agencies, or in actions that may affect our performance under a contract with the City.

CONTRACT AGREEMENT (ADDITIONAL REQUIREMENTS)

KOA affirms that the terms of this proposal shall remain in effect for 90 days after its date of submittal.

FINANCIAL RESPONSIBILITY

KOA affirms that it and its subconsultant firms have adequate financial management and accounting systems, in accordance with 48 CFR Part 16.301-3, 2 CFR Part 200, and 48 CFR Part 31 and Chpter 10 of the LAPM. KOA utilizes Deltek Vision accounting software. This provides real-time project budgets, expenses, reimbursable items, hours spent, and remaining funds for each project task. We closely monitor the financial status of the project to make sure we are on budget. These tools allow us to maintain momentum on project and minimize unwarranted delays and contract amendments.

COMPANY PROFILE & REFERENCES (Continued)

Submit the company names, addresses, telephone numbers, email, contact names, and brief contract descriptions of at least three clients, preferably other municipalities for whom comparable projects have been completed or submit letters from your references which include the requested information.

Company Name: City of Claremont

Contact Name: Vincent Ramos

Contract Amount: $1,600,000

Email: vramos@ci.claremont.ca.us | (909) 399-5395

Address: 207 Harvard Avenue, Claremont, CA 91711

Brief Contract Description: KOA and its team conducted applicable feasibility analyses, created alternatives, developed PS&E, and provided construction management and inspection services to implement improvements on Foothill Blvd.

Company Name: City of Carson

Telephone Number: (310) 952-1700, ext. 1312

Contact Name: Reata Kulcsar

Contract Amount: $149,285

Email: RKulcsar@carson.ca.us

Address: 701 E Carson Street, Carson, CA 90745

Brief Contract Description: KOA designed Class II and Class IV bikeway improvements on nine corridors, under two contracts conducted in tandem. We provided feasibility analyses and prepared PS&E. The projects were funded through HSIP.

Company Name: City of Placentia

Telephone Number: (714) 993-8148

Contact Name: Masoud Sepahi

Contract Amount: $137,445

Email: msepahi@placentia.org

Address: 401 E. Chapman Ave., Placentia, CA 92870

Brief Contract Description: KOA is preparing PS&E for intersection improvements at multiple locations. We are managing the funding and are providing construction support. Pedestrian and bicyclist safety improvements are part of the design consideration.

BIDDER/APPLICANT/CONTRACTOR CAMPAIGN CONTRIBUTION DISCLOSURE FORM

N/A

Proposer/Consultant/Applicant is required to identify any campaign contribution or cumulative contributions greater than $249 to any city council member in the twelve months prior to submitting an application, proposal, statement of qualifications or bid requiring approval by the City Council.

Date	Name of Donor	Company/Business Affiliation	Name of Recipient	Amount

Except as described above, I/we have not made any campaign contribution in the amount of $250 or more to any Costa Mesa City Council Member in the twelve months preceding this Application/Proposal.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

DISCLOSURE OF GOVERNMENT POSITIONS

Each Proposer shall disclose below whether any owner or employee of Contractor currently hold positions as elected or appointed officials, directors, officers, or employees of a governmental entity or held such positions in the past twelve months. List below or state "None."

NONE

DISQUALIFICATION QUESTIONNAIRE

The Contractor shall complete the following questionnaire:

Has the Contractor, any officer of the Contractor, or any employee of the Contractor who has proprietary interest in the Contractor, ever been disqualified, removed, or otherwise prevented from bidding on, or completing a federal, state, or local government project because of a violation of law or safety regulation?

Yes _____ No ☑

If the answer is yes, explain the circumstances in the following space.

MATT STEPIEN, PE

PROJECT MANAGER | SENIOR ENGINEER
KOA

Matt Stepien, PE, has 30 years of civil engineering experience with an emphasis on the design and management of municipal roadway, utility, and active transportation improvement projects. His services involve preliminary to final design, master planning studies, PS&E, and quality control. His recent project experience includes the planning and design of active transportation and Safe Routes to School projects for the cities of Long Beach, Costa Mesa, Santa Ana, Laguna Beach, Anaheim, Santa Fe Springs, Downey, Seal Beach, and Santa Monica. He has also recently been Project Manager for design projects for the Orange County Transportation Authority (OCTA) and LACMTA. Matt has served as the project manager for numerous significant engineering projects during the last 20 years, all having one thing in common - they were successfully built without problems.

RELEVANT EXPERIENCE

City of Costa Mesa Adams Avenue Improvement Project
Project Manager. KOA is adding protected bike lanes and missing sidewalk for a 1.5 mile length of Adams Street in Costa Mesa. Several public outreach meetings were held to develop a preferred layout for the sidewalk and bike lanes. The project includes the narrowing of the roadway portion of the street, pavement rehabilitation, traffic signal modifications, the addition of medians, landscaping and traffic control.

City of Santa Ana Bush Street Bicycle Boulevard
QA/QC Manager. KOA designed bicycle improvements, pedestrian upgrades and roundabouts for seven consecutive intersections along Bush Boulevard. In addition to allowing for bicycles, the project entailed the design of the curb ramps at all quadrants of the intersection, including numerous bulbouts.

City of Long Beach Market Street Pedestrian and Bicycle Enhancements Project*
Project Manager. Performed engineering and design services for a pedestrian and streetscape enhancement project on Market Street between the LA River and Cherry Avenue, an approximately 1.9-mile stretch of the corridor. The project consists of complete street improvements including Class II/IV bike lanes and other new bike/pedestrian facilities, bulb-outs, wayfinding signage, sidewalk widening, crosswalk and transit stop enhancements, construction/ reconstruction of curb ramps for ADA compliance, repairing sidewalks, curbs, and gutters, reconstructing/resurfacing roadway pavement, pedestrian lighting, traffic signal installation/upgrades, flashing beacons, and miscellaneous sustainable design features for improved mobility and safety.

**Previous work experience*

CHUCK STEPHAN, PE

QA/QC MANAGER | PRINCIPAL

KOA

Chuck Stephan has 38 years of experience in civil engineering design and project management on projects for many municipalities and private firms. He has diverse project experience in planning, design, management, and construction of transportation, educational, institutional, industrial, aerospace, municipal, residential and commercial projects in both the civil and construction management disciplines. Chuck specializes in project management, civil engineering design, and construction management for municipal Capital Improvement Projects, including pavement design and rehabilitation; ADA improvements; water pipelines; storm drain and sanitary sewers; medians and landscaping; parking lots; site improvements; plan checking; NPDES requirements. He has provided staff assistance to municipal engineering departments on temporary or part-time basis as needed; provide staff training in project management, design, and construction management skills. He has experience in managing various funding sources including local, state, and federal-aid projects; SR2S; SRTS; STPL; various grant applications and reimbursement requests.

STEPHEN BISE, PE

PRINCIPAL-IN-CHARGE | SENIOR ENGINEER

KOA

Stephen Bise has managed numerous civil and traffic engineering projects for several municipalities throughout Southern California. His project experience consists of preparing final plan, specification, and estimate (PS&E) packages for various improvements to roadways/highways, intersections, drainage, low impact development (LID) implementation, traffic signals, ITS, lighting, signing/striping, and planning for future development. He also has extensive experience in complete streets design and implementation, which include safe multi-modal integration with aesthetic elements such as landscape and street furniture. Stephen's keys to success include clear, concise communication and diligent quality control.

GREGORY GARCES

TRAFFIC ENGINEERING SIGNING/STRIPING TASK LEADER | SENIOR DESIGNER

KOA

Greg Garces is a senior designer with more than 13 years of working experience in the trafc engineering and transportation planning field. He specializes in traffic engineering, traffic operations and safety analyses, signing and striping design, transportation studies, signal design, work zone/traffic control plans, and applying the principles of the CAMUTCD, APWA and Caltrans HDM to deliver PS&E projects. His project experience includes a variety of Active Transportation Plan (ATP), Safe Routes to School (SRTS), Highway Safety Improvement Program (HSIP) and local capital improvement projects all across Southern California. He has extensive experience working with CADD environments and traffic engineering software such as AutoCAD, Microstation, HCS and Synchro/SimTraffic. Before joining KOA, Greg was a lead project engineer with Minagar & Associates, Inc.

RELEVANT EXPERIENCE

- City of Costa Mesa Randolph Avenue Improvements PS&E
- Metropolitan Water District, City of Costa Mesa, Caltrans District 12 Bristol Street Temporary Signing/Striping and Traffic Control Plans (Sunflower to South City Limits)
- City of Long Beach Anaheim Street Improvements PS&E, Long Beach, CA
- City of Laguna Beach PCH Traffic Improvements PS&E Project

27-Hour Training, Project Management Professional (PMP)

Traffic Control for Safer Work Zones, Institute of Transportation Studies Tech Transfer Program, University of California, Berkeley, CA

WYATT SING, PE

TRAFFIC SIGNAL MODIFICATIONS TASK LEADER | SENIOR ASSOCIATE

KOA

Wyatt Sing is a versatile engineer based in KOA's Orange office. He has experience with traffic engineering and neighborhood traffic calming design, signing and striping, traffic signal operations studies and signal timing synchronization. He has worked on a variety of active transportation projects, from preparing construction-ready Plans, Specifications and Estimates (PS&E), to organizing utility documents, coordinating with Caltrans and traffic engineering staff during construction, collecting and analyzing field and record plan data, preparing engineering design calculations, and designing engineering recommendations a variety of public improvement projects. Additionally, Wyatt has experience with roadway design and has developed plans for numerous projects. While working on any project and being a part of a team, Wyatt strives to learn and gain valuable experience on a daily basis.

REGISTRATIONS
Professional Engineer (PE), Civil, CA #90821

JENNIFER MILLER, EIT

STREET LIGHTING TASK LEADER | ASSOCIATE ENGINEER

KOA

Jennifer Miller has worked on a number of civil and traffic engineering projects including roadway improvements, pedestrian improvements, signing and striping, and drainage modifications. Her experience includes the use of design programs such as AutoCAD, Civil 3-D, Microstation, ArcGIS, and working knowledge in Primavera P6. From her time working with the City of San Diego, she has been involved in projects such as El Cajon Boulevard and 59th Street Curb Ramps, La Jolla Mesa Drive Sidewalk, and Jamacha Road Storm Drain. Jennifer has been the transportation lead on her senior design project, Glorietta Boulevar and Pomona Avenue Roundabout. She was in charge of the geometric road design and CAD work. Jennifer has assisted with crash data diagrams, the conceptual design of Big Bear Moonridge Road Design, vehicle turn path diagrams, and project material checks.

MANUEL BARRIOS, EIT

CIVIL ENGINEERING, WQMP, HYDRAULICS ENGINEER | SENIOR ASSOCIATE ENGINEER

KOA

Manuel Barrios has worked on engineering/public works projects involving roadway design, plan preparation, capital improvements, and land development projects for cities throughout Orange and Los Angeles counties. He has delivered projects for both horizontal and vertical design to Metro and the Los Angeles Bureau of Engineering/Department of Transportation (LABOE/ DOT). He has been the project engineer for several public projects to construct, widen, and improve roadways; determine utility relocations; and design and prepare grading, drainage, sewer, water utility, and site improvement plans. Manuel has extensive experience and knowledge of Orange County Standard Plans as well as Greenbook Standard Specifications for Public Works Construction so he can deliver projects from the preliminary stage through final construction.

COST-PLUS-FIXED FEE OR LUMP SUM OR FIRM FIXED PRICE CONTRACTS
(CALCULATIONS FOR ANTICIPATED SALARY INCREASES)

Consultant KOA Corporation Contract No. 0 Date 2/8/2021

1. Calculate Average Hourly Rate for 1st year of the contract (Direct Labor Subtotal divided by total hours)

Direct Labor Subtotal per Cost Proposal		Total Hours per Cost Proposal		Avg Hourly Rate	**5 Year Contract Duration**
$ 250,000.00	/	5000	=	$50.00	Year 1 Avg Hourly Rate

2. Calculate hourly rate for all years (Increase the Average hourly rate for a year by proposed escalation %)

	Avg Hourly Rate		Proposed Escalation			
Year 1	$50.00	+	2%	=	$51.00	Year 2 Avg Hourly Rate
Year 2	$51.00	+	2%	=	$52.02	Year 3 Avg Hourly Rate
Year 3	$52.02	+	2%	=	$53.06	Year 4 Avg Hourly Rate
Year 4	$53.06	+	2%	=	$54.12	Year 5 Avg Hourly Rate

3. Calculate estimated hours per year (Multiply estimate % each year by total hours)

	Estimated % Completed Each Year		Total Hours per Cost Proposal		Total Hours per Year	
Year 1	20.00%	*	5000	=	1000	Estimated Hours Year 1
Year 2	40.00%	*	5000	=	2000	Estimated Hours Year 2
Year 3	15.00%	*	5000	=	750	Estimated Hours Year 3
Year 4	15.00%	*	5000	=	750	Estimated Hours Year 3
Year 5	10.00%	*	5000	=	500	Estimated Hours Year 4
Total	100%		Total	=	5000	

4. Calculate Total Costs including Escalation (multiply average hourly rate by the number of ho

	Avg Hourly Rate (calculated above)		Estimated Hours (calculated above)		Cost Per Year	
Year 1	$50.00	*	1000	=	$50,000.00	Estimated Hours Year 1
Year 2	$51.00	*	2000	=	$102,000.00	Estimated Hours Year 2
Year 3	$52.02	*	750	=	$39,015.00	Estimated Hours Year 2
Year 4	$53.06	*	750	=	$39,795.00	Estimated Hours Year 3
Year 5	$54.12	*	500	=	$27,060.00	Estimated Hours Year 4
			Total Direct Labor Cost with Escalation	=	$257,871.10	
			Direct Labor Subtotal before escalation	=	$250,000.00	
			Estimated total of Direct Labor Salary Increase	=		Transfer to Page 1
			Increase		**$7,871.10**	

NOTES:

- This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year.
- An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. $250,000 x 2% x 5 yrs = $25,000 is not an acceptable methodology.)
- This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted
- Calculations for anticipated salary escalation must be provided.

EXHIBIT 10-H1 COST PROPOSAL Page 3 of 3

Certification of Direct Costs:

I, the undersigned, certify to the best of my knowledge and belief that all direct costs identified on the cost proposal(s) in this contract are actual, reasonable, allowable, and allocable to the contract in accordance with the contract terms and the following requirements:

1. Generally Accepted Accounting Principles (GAAP)
2. Terms and conditions of the contract
3. Title 23 United States Code Section 112 - Letting of Contracts
4. 48 Code of Federal Regulations Part 31 - Contract Cost Principles and Procedures
5. 23 Code of Federal Regulations Part 172 - Procurement, Management, and Administration of Engineering and Design Related Service
6. 48 Code of Federal Regulations Part 9904 - Cost Accounting Standards Board (when applicable)

All costs must be applied consistently and fairly to all contracts. All documentation of compliance must be retained in the project files and be in compliance with applicable federal and state requirements. Costs that are noncompliant with the federal and state requirements are not eligible for reimbursement.
Local governments are responsible for applying only cognizant agency approved or Caltrans accepted Indirect Cost Rate(s).

NOTES:

1. Key personnel must be marked with an asterisk (*) and employees that are subject to prevailing wage requirement must be marked with two asterisks (**). All costs must comply with Federal cost priciples. Subconsultants will provide their own cost proposals.
2. The cost proposal format shall not be amended. Indirect cost rates shall be updated on an annual basis in accordance with the consultant's annual accounting period and established by a cognizant agency or accepted by Caltrans.
3. Anticipated salary increases calculation (page 2) must accompany.

EXHIBIT 10-H1 COST PROPOSAL Page 2 of 3

COST-PLUS-FIXED FEE OR LUMP SUM OR FIRM FIXED PRICE CONTRACTS

(NO ANTICIPATED SALARY INCREASES)

1. Calculate Average Hourly Rate for 1st year of the contract (Direct Labor Subtotal divided by total hours)

Direct Labor Subtotal per Cost Proposal		Total Hours per Cost Proposal		Avg Hourly Rate	5 Year Contract Duration
$250,000.00		5000	=	$50.00	Year 1 Avg Hourly Rate

2. Calculate hourly rate for all years (Increase the Average Hourly Rate for a year by proposed escalation %)

	Avg Hourly Rate		Proposed Escalation			
Year 1	$50.00	+	2%	=	$51.00	Year 2 Avg Hourly Rate
Year 2	$51.00	+	2%	=	$52.02	Year 3 Avg Hourly Rate
Year 3	$52.02	+	2%	=	$53.06	Year 4 Avg Hourly Rate
Year 4	$53.06	+	2%	=	$54.12	Year 5 Avg Hourly Rate

3. Calculate estimated hours per year (Multiply estimate % each year by total hours)

	Estimated % Completed Each Year		Total Hours per Cost Proposal		Total Hours per Year	
Year 1	20.0%	*	5000	=	1000	Estimated Hours Year 1
Year 2	40.0%	*	5000	=	2000	Estimated Hours Year 2
Year 3	15.0%	*	5000	=	750	Estimated Hours Year 3
Year 4	15.0%	*	5000	=	750	Estimated Hours Year 4
Year 5	10.0%	*	5000	=	500	Estimated Hours Year 5
Total	100%		Total	=	5000	

4. Calculate Total Costs including Escalation (Multiply Average Hourly Rate by the number of hours)

	Avg Hourly Rate (calculated above)		Estimated hours (calculated above)		Cost per Year	
Year 1	$50.00	*	1000	=	$50,000.00	Estimated Hours Year 1
Year 2	$51.00	*	2000	=	$102,000.00	Estimated Hours Year 2
Year 3	$52.02	*	750	=	$39,015.00	Estimated Hours Year 3
Year 4	$53.06	*	750	=	$39,795.30	Estimated Hours Year 4
Year 5	$54.12	*	500	=	$27,060.80	Estimated Hours Year 5
	Total Direct Labor Cost with Escalation			=	$257,871.10	
	Direct Labor Subtotal before Escalation			=	$250,000.00	
	Estimated total of Direct Labor Salary Increase			=	**$7,871.10**	Transfer to Page 1

NOTES:

1. This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year.
2. An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. $250,000 x 2% x 5 yrs = $25,000 is not an acceptable methodology)
3. This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted.
4. Calculations for anticipated salary escalation must be provided.

EXHIBIT 10-H1 COST PROPOSAL Page 3 of 3

Certification of Direct Costs:

I, the undersigned, certify to the best of my knowledge and belief that all direct costs identified on the cost proposal(s) in this contract are actual, reasonable, allowable, and allocable to the contract in accordance with the contract terms and the following requirements:

1. Generally Accepted Accounting Principles (GAAP)
2. Terms and conditions of the contract
3. Title 23 United States Code Section 112 - Letting of Contracts
4. 48 Code of Federal Regulations Part 31 - Contract Cost Principles and Procedures
5. 23 Code of Federal Regulations Part 172 - Procurement, Management, and Administration of Engineering and Design Related Service
6. 48 Code of Federal Regulations Part 9904 - Cost Accounting Standards Board (when applicable)

All costs must be applied consistently and fairly to all contracts. All documentation of compliance must be retained in the project files and be in compliance with applicable federal and state requirements. Costs that are noncompliant with the federal and state requirements are not eligible for reimbursement.
Local governments are responsible for applying only cognizant agency approved or Caltrans accepted Indirect Cost Rate(s).

Year 3	$52.02	*	750	=	$39,015.00	Estimated Hours Year 3
Year 4	$53.06	*	750	=	$39,795.30	Estimated Hours Year 4
Year 5	$54.12	*	500	=	$27,060.80	Estimated Hours Year 5
	Total Direct Labor Cost with Escalation			=	$257,871.10	
	Direct Labor Subtotal before Escalation			=	$250,000.00	
	Estimated total of Direct Labor Salary Increase			=	**$7,871.10**	Transfer to Page 1

NOTES:

1. This is not the only way to estimate salary increases. Other methods will be accepted if they clearly indicate the % increase, the # of years of the contract, and a breakdown of the labor to be performed each year.
2. An estimation that is based on direct labor multiplied by salary increase % multiplied by the # of years is not acceptable. (i.e. $250,000 x 2% x 5 yrs = $25,000 is not an acceptable methodology)
3. This assumes that one year will be worked at the rate on the cost proposal before salary increases are granted.
4. Calculations for anticipated salary escalation must be provided.

EXHIBIT 10-H1 COST PROPOSAL Page 3 of 3

Certification of Direct Costs:

I, the undersigned, certify to the best of my knowledge and belief that all direct costs identified on the cost proposal(s) in this contract are actual, reasonable, allowable, and allocable to the contract in accordance with the contract terms and the following requirements:

1. Generally Accepted Accounting Principles (GAAP)
2. Terms and conditions of the contract
3. Title 23 United States Code Section 112 - Letting of Contracts
4. 48 Code of Federal Regulations Part 31 - Contract Cost Principles and Procedures
5. 23 Code of Federal Regulations Part 172 - Procurement, Management, and Administration of Engineering and Design Related Service
6. 48 Code of Federal Regulations Part 9904 - Cost Accounting Standards Board (when applicable)

All costs must be applied consistently and fairly to all contracts. All documentation of compliance must be retained in the project files and be in compliance with applicable federal and state requirements. Costs that are noncompliant with the federal and state requirements are not eligible for reimbursement.
Local governments are responsible for applying only cognizant agency approved or Caltrans accepted Indirect Cost Rate(s).

EXHIBIT C

APPENDIX E OF THE TITLE VI ASSURANCES

Appendix E of the Title VI Assurances

(US DOT Order 1050.2A)

During the performance of this contract, the contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "contractor") agrees to comply with the following nondiscrimination statutes and authorities; including but not limited to:

Pertinent Nondiscrimination Authorities:

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin); and 49 CFR Part 21.
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 U.S.C. § 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Federal-Aid Highway Act of 1973, (23 U.S.C. § 324 et seq.), (prohibits discrimination on the basis of sex);
- Section 504 of the Rehabilitation Act of 1973, (29 U.S.C. § 794 et seq.), as amended, (prohibits discrimination on the basis of disability); and 49 CFR Part 27;
- The Age Discrimination Act of 1975, as amended, (42 U.S.C. § 6101 et seq.), (prohibits discrimination on the basis of age);
- Airport and Airway Improvement Act of 1982, (49 U.S.C. § 4 71, Section 4 7123), as amended, (prohibits discrimination based on race, creed, color, national origin, or sex);
- The Civil Rights Restoration Act of 1987, (PL 100-209), (Broadened the scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal-aid recipients, subrecipients and contractors, whether such programs or activities are Federally funded or not);
- Titles II and III of the Americans with Disabilities Act, which prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities (42 U.S.C. §§ 12131-12189) as implemented by Department of Transportation regulations at 49 C.F.R. parts 37 and 38;

- The Federal Aviation Administration's Nondiscrimination statute (49 U.S.C. § 47123) (prohibits discrimination on the basis of race, color, national origin, and sex);
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, which ensures discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations;
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting agency guidance, national origin discrimination includes discrimination because of limited English proficiency (LEP). To ensure compliance with Title VI, you must take reasonable steps to ensure that LEP persons have meaningful access to your programs (70 Fed. Reg. at 74087 to 74100);
- Title IX of the Education Amendments of 1972, as amended, which prohibits you from discriminating because of sex in education programs or activities (20 U.S.C. 1681 et seq).

EXHIBIT D

CITY COUNCIL POLICY 100-5

CITY OF COSTA MESA, CALIFORNIA

COUNCIL POLICY

SUBJECT	POLICY NUMBER	EFFECTIVE DATE	PAGE
DRUG-FREE WORKPLACE	100-5	8-8-89	1 of 3

BACKGROUND

Under the Federal Drug-Free Workplace Act of 1988, passed as part of omnibus drug legislation enacted November 18, 1988, contractors and grantees of Federal funds must certify that they will provide drug-free workplaces. At the present time, the City of Costa Mesa, as a sub-grantee of Federal funds under a variety of programs, is required to abide by this Act. The City Council has expressed its support of the national effort to eradicate drug abuse through the creation of a Substance Abuse Committee, institution of a City-wide D.A.R.E. program in all local schools and other activities in support of a drug-free community. This policy is intended to extend that effort to contractors and grantees of the City of Costa Mesa in the elimination of dangerous drugs in the workplace.

PURPOSE

It is the purpose of this Policy to:

1. Clearly state the City of Costa Mesa's commitment to a drug-free society.

2. Set forth guidelines to ensure that public, private, and nonprofit organizations receiving funds from the City of Costa Mesa share the commitment to a drug-free workplace.

POLICY

The City Manager, under direction by the City Council, shall take the necessary steps to see that the following provisions are included in all contracts and agreements entered into by the City of Costa Mesa involving the disbursement of funds.

1. Contractor or Sub-grantee hereby certifies that it will provide a drug-free workplace by:

   A. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in Contractor's and/or sub-grantee's workplace, specifically the job site or location included in this contract, and specifying the actions that will be taken against the employees for violation of such prohibition;

   B. Establishing a Drug-Free Awareness Program to inform employees about:

1. The dangers of drug abuse in the workplace;

2. Contractor's and/or sub-grantee's policy of maintaining a drug-free workplace;

3. Any available drug counseling, rehabilitation and employee assistance programs; and

4. The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

C. Making it a requirement that each employee to be engaged in the performance of the contract be given a copy of the statement required by subparagraph A;

D. Notifying the employee in the statement required by subparagraph 1 A that, as a condition of employment under the contract, the employee will:

1. Abide by the terms of the statement; and

2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five (5) days after such conviction;

E. Notifying the City of Costa Mesa within ten (10) days after receiving notice under subparagraph 1 D 2 from an employee or otherwise receiving the actual notice of such conviction;

F. Taking one of the following actions within thirty (30) days of receiving notice under subparagraph 1 D 2 with respect to an employee who is so convicted:

1. Taking appropriate personnel action against such an employee, up to and including termination; or

2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health agency, law enforcement, or other appropriate agency;

G. Making a good faith effort to maintain a drug-free workplace through implementation of subparagraphs 1 A through 1 F, inclusive.

2. Contractor and/or sub-grantee shall be deemed to be in violation of this Policy if the City of Costa Mesa determines that:

   a. Contractor and/or sub-grantee has made a false certification under paragraph 1 above;

   b. Contractor and/or sub-grantee has violated the certification by failing to carry out the requirements of subparagraphs 1 A through 1 G above;

   c. Such number of employees of Contractor and/or sub-grantee have been convicted of violations of criminal drug statutes for violations occurring in the workplace as to indicate that the contractor and/or sub-grantee has failed to make a good faith effort to provide a drug-free workplace.

3. Should any contractor and/or sub-grantee be deemed to be in violation of this Policy pursuant to the provisions of 2 A, B, and C, a suspension, termination or debarment proceeding subject to applicable Federal, State, and local laws shall be conducted. Upon issuance of any final decision under this section requiring debarment of a contractor and/or sub-grantee, the contractor and/or sub-grantee shall be ineligible for award of any contract, agreement or grant from the City of Costa Mesa for a period specified in the decision, not to exceed five (5) years. Upon issuance of any final decision recommending against debarment of the contractor and/or sub-grantee, the contractor and/or sub-grantee shall be eligible for compensation as provided by law.

File #: 22-925 **Meeting Date:** 11/15/2022

TITLE:

POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE PROJECT, CITY PROJECT NO. 22-02

DEPARTMENT:	**PUBLIC WORKS DEPARTMENT/ENGINEERING DIVISION**
PRESENTED BY:	**RAJA SETHURAMAN, PUBLIC WORKS DIRECTOR**
CONTACT INFORMATION:	**SEUNG YANG, P.E., CITY ENGINEER, (714) 754-5633**

RECOMMENDATION:

Staff recommends the City Council:

1. Adopt plans, specifications, and working details for the Police Department Underground Storage Tank Closure Project, City Project No. 22-02.

2. Award a Public Works Agreement (PWA) to American Integrated Services, Inc., 1502 E. Opp Street, Wilmington, CA 90744 in the amount of $156,680.

3. Authorize an additional ten percent (10%) contingency in the amount of $15,668 as needed for any unforeseen costs related to this project.

4. Approve a budget adjustment authorizing the use of unappropriated fund balance in the Capital Improvement Fund (401) in the amount of $48,616 and appropriate said funds to the Police Department Underground Storage Tank Closure Project (Project 200066).

5. Authorize the City Manager and City Clerk to execute the PWA and future amendments to the agreement within Council authorized limits.

BACKGROUND:

The Police Department Underground Storage Tank (UST) has been out-of-service for a few years. However, in accordance with County protocols, the UST is still being monitored and inspected on an annual basis as an active tank. By properly closing the UST, the City will no longer be obligated to monitor and inspect the tank on an annual basis.

The UST was previously used to store diesel fuel for the Police Department's old generator. The storage fuel tank, located on Vanguard Way in between the parkway and the west side of the Costa Mesa Police Department, has a capacity of 6,000-gallons.

Police Department Underground Storage Tank

(Current Location)

ANALYSIS:

The scope of work generally consists of providing environmental testing, utility investigation, structural assessment, geotechnical assessment, reporting, additional plans, permitting, and all construction work that will be required to safely close the existing Police Department UST. This UST closure will be permitted through the City's Building Department, Fire Department, and the Orange County Health Care Agency (OCHCA), Environmental Health Division.

The project begins with an investigatory assessment of the site where the selected contractor will coordinate with the engineers and conduct the environmental, structural, and geotechnical inspections and testing required per the requirements of the OCHCA. Assuming no unforeseen circumstances or complications, the UST closure will be approached as an abandon-in-place project, whereby the existing tank will be emptied, certified clean, and filled with a County approved concrete slurry mix before a formal closure report is filed with the OCHCA. If the UST cannot be abandoned-in -place, there is an option to remove the UST entirely, backfill and restore the area.

The City Clerk received and opened four (4) bids for this project on August 30, 2022. American Integrated Services, Inc. (A.I.S.) is the apparent low bidder with a bid proposal in the amount of $156,680. The bid results are summarized in the bid abstract (Attachment 1).

Staff has determined that A.I.S. complied with the procedures and requirements as outlined in the project's bid documents and specifications.

The license and references of A.I.S. have been checked and staff has found them to be in good standing.

Upon City Council award of the PWA (Attachment 2), A.I.S. will furnish the necessary bonds and

insurance, which will be approved as to form by Risk Management. After the award and subsequent execution of the agreement, a "Notice to Proceed" will be issued.

Staff requests that City Council award the project to A.I.S. as the lowest responsible bidder.

A copy of specifications and working details are available for review in the Office of the City Clerk or in the Public Works Department, and are posted on the City's website at: *<https://www.costamesaca.gov/city-hall/city-departments/public-works/capital-improvement-projects>*

ALTERNATIVES:

The alternative is to reject all bids, re-advertise, and re-bid the project. Staff has determined that re-advertising and re-bidding this project will result in significant delays and will not necessarily result in lower bids.

FISCAL REVIEW:

Funding for this project was originally budgeted in the FY 2021-22 Capital Improvement Project (CIP) budget in the amount of $125,000. The current available budget in FY 2022-23 is $123,733. Staff requests a budget adjustment, authorizing the use of unappropriated fund balance in the Capital Improvement Fund (401) in the amount of $48,616 and appropriate said funds to meet the funding and contingency needs of the project. Any funds remaining at the end of the project will be returned to the CIP fund balance.

LEGAL REVIEW:

The City Attorney's Office has reviewed this report, prepared the PWA, and approves them both as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goals:

- Strengthen the Public's Safety and Improve the Quality of Life
- Maintain and Enhance the City's Infrastructure, Facilities, Equipment and Technology

CONCLUSION:

Staff recommends the City Council:

1. Adopt plans, specifications, and working details for the Police Department Underground Storage Tank Closure Project, City Project No. 22-02.

2. Award a Public Works Agreement (PWA) to American Integrated Services, Inc., 1502 E. Opp Street, Wilmington, CA 90744 in the amount of $156,680.

3. Authorize an additional ten percent (10%) contingency in the amount of $15,668 as needed for any unforeseen costs related to this project.

4. Approve a budget adjustment authorizing the use of unappropriated fund balance in the Capital Improvement Fund (401) in the amount of $48,616 and appropriate said funds to the Police

Department Underground Storage Tank Closure Project (Project 200066).

5. Authorize the City Manager and City Clerk to execute the PWA and future amendments to the agreement within Council authorized limits.

CITY OF COSTA MESA
PUBLIC WORKS AGREEMENT FOR
CITY PROJECT NO. 22-02

THIS PUBLIC WORKS AGREEMENT ("Agreement"), dated November 15, 2022 ("Effective Date"), is made by the CITY OF COSTA MESA, a political subdivision of the State of California ("CITY"), and AMERICAN INTEGRATED SERVICES, California corporation a ("CONTRACTOR").

WHEREAS, CITY desires to construct the public improvements described below under Paragraph 1, Scope of Work (the "Project"); and

WHEREAS, CITY has determined that CONTRACTOR is the lowest responsible bidder; and

WHEREAS, CITY now desires to contract with CONTRACTOR to furnish construction and related services for the Project; and

WHEREAS, CITY and CONTRACTOR desire to set forth their rights, duties and liabilities in connection with the services to be performed.

NOW, THEREFORE, for and in consideration of the covenants and conditions contained herein, the parties hereby agree as follows:

1. SCOPE OF WORK.

The scope of work generally consists of providing environmental testing, utility investigation, structural assessment, reporting, plans, permitting, and construction required to safely close the existing 6,000 gallon City of Costa Mesa Police Department, Under Ground Storage Tank (UST).

The Police Department Underground Storage Tank Closure will be approached as an "abandon in place" project. Structural assessment and environmental testing may reveal unforeseen circumstances that could require additional remediation and/or the safe removal of the UST.

The initial project approach will be to abandon the underground storage tank, in place and the unit prices and bid schedule include the project scope as detailed in the 101-2.1 in the Special Provisions of the bid specifications (the "Work").

The Work is divided into two parts: the Investigatory Site Work and the Construction Site Work. Both parts of the Work are further described in the "Contract Documents" referred to below.

The Project is known as City Project No. 22-02 (the "Project").

2. CONTRACT DOCUMENTS.

The complete Agreement consists of the following documents relating to the Project:

(a) This Agreement;

(b) CONTRACTOR's bid is attached hereto as Exhibit A and incorporated herein;

(c) The Bid Package along with Addendum One and Addendum Two to the Bid Package is attached hereto as Exhibit B and incorporated herein;

(d) Faithful Performance Bond and Labor and Material Bond, including agent's Power of Attorney for each bond, attached hereto as Exhibit C;

(e) Drug-Free Workplace Policy, attached hereto as Exhibit D and incorporated herein; and

(f) Provisions of the most current edition of The Greenbook: Standard Specifications for Public Works Construction ("The Greenbook"). Provisions of The Greenbook are incorporated by this reference as if fully set forth herein.

The documents comprising the complete Agreement will be referred to as the "Contract Documents."

All of the Contract Documents are intended to complement one another, so that any Work called for in one and not mentioned in another is to be performed as if mentioned in all documents.

In the event of an inconsistency in the Contract Documents, the terms of this Agreement shall prevail over all other Contract Documents. The order of precedence between the remaining Contract Documents shall be as set forth in The Greenbook.

The Contract Documents constitute the entire agreement between the parties and supersede any and all other writings and oral negotiations.

3. CITY'S REPRESENTATIVE.

The CITY's Representative is Kian Nejad, referred to herein as the Project Manager ("Project Manager").

4. CONTRACTOR'S PROJECT MANAGER; PERSONNEL.

(a) Project Manager. CONTRACTOR's Project Manager must be approved by City. Such approval shall be at CITY's sole discretion.

(b) Personnel. CITY has the right to review and approve any personnel who are assigned to perform work under this Agreement. CONTRACTOR shall remove personnel from performing work under this Agreement if requested to do so by CITY.

This Paragraph 4 is a material provision of the Agreement.

5. SCHEDULE.

All Work shall be performed in accordance with the schedule approved on behalf of CITY by the Project Manager, and in accordance with the time of performance set forth in Paragraph 11 (Time of Performance).

6. EQUIPMENT - PERFORMANCE OF WORK.

CONTRACTOR shall furnish all tools, equipment, apparatus, facilities, labor and materials necessary to perform and complete the Work in a good and workmanlike manner in strict conformity with the Contract Documents.

The equipment, apparatus, facilities, labor and material shall be furnished and such Work performed and completed as required in the plans and specifications to the satisfaction of the Project Manager or his or her designee, and subject to his or her approval.

7. COMPENSATION.

CITY shall pay CONTRACTOR in accordance with the fee schedule set forth in CONTRACTOR's bid. CONTRACTOR's total compensation shall not exceed One-Hundred and Fifty-Six Thousand and Six-Hundred and Eighty Dollars ($156,680.00).

8. ADDITIONAL SERVICES.

CONTRACTOR shall not receive compensation for any services provided outside the scope of the Contract Documents unless such additional services, including change orders, are approved in writing by CITY prior to CONTRACTOR performing the additional services.

It is specifically understood that oral requests or approvals of such additional services, change orders or additional compensation and any approvals from CITY shall be barred and are unenforceable.

9. PAYMENTS TO CONTRACTOR.

On or before the last Monday of each and every month during the performance of

the Work, CONTRACTOR shall meet with the Project Manager or his or her designee to determine the quantity of pay items incorporated into the improvement during that month. A "Progress Payment Order" will then be jointly prepared, approved, and signed by the Project Manager and the CONTRACTOR setting forth the amount to be paid and providing for a five percent (5%) retention. Upon approval of the progress payment order by the Project Manager, or his or her designee, it shall be submitted to CITY's Finance Department and processed for payment by obtaining approval from the City Council to issue a warrant.

Within three (3) days following City Council's approval to issue a warrant, CITY shall mail to CONTRACTOR a warrant for the amount specified in the progress payment order as the amount to be paid. The retained five percent (5%) shall be paid to CONTRACTOR thirty-five (35) days after the recording of the Notice of Completion of the Work by the CITY with the Orange County Clerk-Recorder and after CONTRACTOR has furnished releases of all claims against CITY by persons who furnished labor or materials for the Work, if required by CITY.

Upon the request of CONTRACTOR and at its expense, securities equivalent to the amount withheld pursuant to the foregoing provisions may be presented to CITY for substitution for the retained funds. If CITY approves the form and amount of the offered securities it will release the retained funds and will hold the securities in lieu thereof. CONTRACTOR shall be entitled to any interest earned on the securities.

In the event that claims for property damage or bodily injury are presented to CITY arising out of CONTRACTOR's or any subcontractor's work under this Agreement, CITY shall give notice thereof to CONTRACTOR, and CONTRACTOR shall have thirty-five (35) days from the mailing of any such notice to evaluate the claim and to settle it by whole or partial payment, or to reject it, and to give notice of settlement or rejection to CITY. If CITY does not receive notice within the above-mentioned 35-day period that the claim has been settled, and if the Project Manager, after consultation with the City Attorney, determines that the claim is meritorious, CITY may pay the claim or a portion of it in exchange for an appropriate release from the claimant, and may deduct the amount of the payment from the retained funds that would otherwise be paid to CONTRACTOR upon completion of the Work; provided, however, that the maximum amount paid for any one claim pursuant to this provision shall be One Thousand Dollars ($1,000.00), and the maximum amount for all such claims in the aggregate paid pursuant to this provision shall be Five Thousand Dollars ($5,000.00).

10. PROMPT PAYMENT OF SUBCONTRACTORS.

CONTRACTOR agrees to pay each subcontractor under this Agreement for satisfactory performance of its contract no later than seven (7) days from the receipt of each payment the CONTRACTOR receives from CITY.

CONTRACTOR agrees further to release retainage payments to each subcontractor within thirty (30) days after the subcontractor's work is satisfactorily

completed.

Any delay or postponement of payment from the above referenced time frame may occur only for good cause following written approval of the CITY.

11. TIME OF PERFORMANCE.

CONTRACTOR shall commence Investigatory Site Work by the date specified in CITY's Limited Notice to Proceed, unless a later date is agreed upon in writing by the parties. The Work under the Limited Notice to Proceed shall be completed within Ninety (90) calendar days from the first day of commencement of the Investigatory Site Work.

CONTRACTOR shall commence Construction Site Work by the date specified in the CITY's Notice to Procced with Construction, unless a later date is agreed upon in writing by the parties. The Work under the Notice to Proceed with Construction shall be completed within Twenty-Five (25) working days from the first day of commencement of the Construction Site Work.

12. TERMINATION.

(a) Termination for Convenience. CITY may terminate this Agreement at any time, with or without cause, by providing thirty (30) days' written notice to CONTRACTOR.

(b) Termination for Breach of Contract.

(i) If CONTRACTOR refuses or fails to prosecute the Work or any severable part of it with such diligence as will ensure its timely completion, or if CONTRACTOR fails to complete the Work on time, or if CONTRACTOR, or any subcontractor, violates any of the provisions of the Contract Documents, the Project Manager may give written notice to CONTRACTOR and CONTRACTOR's sureties of the CITY's intention to terminate this Agreement; and, unless within five (5) days after the serving of that notice, such conduct shall cease and arrangements for the correction thereof be made to the satisfaction of the CITY, this Agreement may be terminated at the option of CITY effective upon CONTRACTOR's receipt of a second notice sent by the CITY indicating that the CITY has exercised its option to terminate.

(ii) If CONTRACTOR is adjudged bankrupt or files for any relief under the Federal Bankruptcy Code or State insolvency laws, this Agreement shall automatically terminate without any further action or notice by CITY.

(iii) If CONTRACTOR is in breach of any material provision of this Agreement, CITY may immediately terminate this Agreement by providing written notice to CONTRACTOR of same.

13. LIQUIDATED DAMAGES.

In the event the range upgrades scope of work or restroom improvements scope of work is not completed, for any reason, within the time required including any approved extensions of time, and to the satisfaction of the Project Manager, CITY may, in addition to any other remedies, equitable and legal, including remedies authorized by Paragraph 12 (Termination) of this Agreement, charge to CONTRACTOR or its sureties, or deduct from payments or credits due CONTRACTOR, a sum equal to Five Hundred and Twenty-Five Dollars ($525.00) as liquidated damages for each calendar day beyond the date provided for the completion of such work.

The parties hereto agree that the amount set forth above, as liquidated damages constitutes a fair and reasonable estimate of the costs the CITY would suffer for each day that the CONTRACTOR fails to meet the performance schedule. The parties hereby agree and acknowledge that the delays in the performance schedule will cause CITY to incur costs and expenses not contemplated by this Agreement.

14. PERFORMANCE BY SURETIES.

In the event CONTRACTOR fails or refuses to perform the Work, CITY may provide CONTRACTOR with a notice of intent to terminate as provided in Paragraph 12 (Termination), of this Agreement. CITY shall immediately give written notice of such intent to terminate to CONTRACTOR and CONTRACTOR's surety or sureties, and the sureties shall have the right to take over and perform this Agreement; provided, however, that the sureties must, within five (5) days after CITY's giving notice of termination, (a) give the CITY written notice of their intention to take over the performance of this Agreement; (b) provide adequate assurances, to the satisfaction of the CITY, that the Work shall be performed diligently and in a timely manner; and (c) must commence performance thereof within five (5) days after providing notice to the CITY of their intention to take over the Work. Upon the failure of the sureties to comply with the provisions set forth above, CITY may take over the Work and complete it, at the expense of CONTRACTOR, and the CONTRACTOR and the sureties shall be liable to CITY for any excess costs or damages including those referred to in Paragraph 13 (Liquidated Damages), incurred by CITY. In such event, CITY may, without liability for so doing, take possession of such materials, equipment, tools, appliances, Contract Documents and other property belonging to CONTRACTOR as may be on the site of the Work and reasonably necessary therefor and may use them to complete the Work.

15. DISPUTES PERTAINING TO PAYMENT FOR WORK.

Should any dispute arise respecting whether any delay is excusable, or its duration, or the value of the Work done, or of any Work omitted, or of any extra Work which CONTRACTOR may be required to do, or respecting any payment to CONTRACTOR during the performance of this Agreement, such dispute shall be decided by the Project Manager, and his or her decisions shall be final and binding upon

CONTRACTOR and its sureties.

16. SUPERINTENDENCE BY CONTRACTOR.

At all times during performance of the Work, CONTRACTOR shall give personal superintendence or have a competent foreman or superintendent on the worksite, with authority to act for CONTRACTOR.

17. INSPECTION BY CITY.

CONTRACTOR shall at all times maintain proper facilities and provide safe access for inspection by CITY to all parts of the Work and to all shops on or off-site where the Work or portions of the Work, are in preparation. CITY shall have the right of access to the premises for inspection at all times. However, CITY shall, at all times, comply with CONTRACTOR's safety requirements on the job site.

18. CARE OF THE WORK AND OFF-SITE AUTHORIZATION.

CONTRACTOR warrants that it has examined the site of the Work and is familiar with its topography and condition, location of property lines, easements, building lines and other physical factors and limitations affecting the performance of this Agreement. CONTRACTOR, at CONTRACTOR's sole cost and expense, shall obtain any permission, and all approvals, licenses, or easements necessary for any operations conducted off the premises owned or controlled by CITY. CONTRACTOR shall be responsible for the proper care and protection of all materials delivered to the site or stored off-site and for the Work performed until completion and final inspection and acceptance by CITY. The risk, damage or destruction of materials delivered to the site or to Work performed shall be borne by CONTRACTOR.

19. CONTRACT SECURITY AND GUARANTEE.

CONTRACTOR shall furnish, concurrently with the execution of this Agreement, the following: (1) a surety bond in an amount equal to one hundred percent (100%) of the contract price as security for the faithful performance of this Agreement, and (2) a separate surety bond in an amount equal to at least one hundred percent (100%) of the contract price as security for the payment of all persons furnishing labor or materials in connection with the Work under this Agreement. Sureties for each of the bonds and the forms thereof shall be satisfactory to CITY. In addition, such sureties must be authorized to issue bonds in California; sureties must be listed on the latest revision to the U.S. Department of the Treasury Circular 570; and must be shown to have sufficient bonding capacity to provide the bonds required by the Contract Documents.

CONTRACTOR shall provide a certified copy of the certificate of authority of the surety issued by the Insurance Commissioner; a certificate from the clerk of the county in which the court or officer is located that the certificate of authority of the surety has not been surrendered, revoked, canceled, annulled, or suspended or, in the event that it has,

that renewed authority has been granted; and copies of the surety's most recent annual statement and quarterly statement filed with the Department of Insurance pursuant to Article 10 (commencing with Section 900) of Chapter 1 of Part 2 of Division 1 of the Insurance Code.

CONTRACTOR guarantees that all materials used in the Work and all labor performed shall be in conformity with the Contract Documents including, but not limited to, the standards and specifications set forth in the most current edition of The Greenbook. CONTRACTOR shall, at its own expense, make any and all repairs and replacements that shall become necessary as the result of any failure of the Work to conform to the aforementioned Contract Documents, and/or standard specifications; provided, however, that CONTRACTOR shall be obligated under this provision only to the extent of those failures or defects of which CONTRACTOR is given notice within a period of twelve (12) months from the date that the Notice of Completion is recorded.

The rights and remedies available to CITY pursuant to this provision shall be cumulative with all rights and remedies available to CITY pursuant to statutory and common law, which rights and remedies are hereby expressly reserved, and neither the foregoing guarantee by CONTRACTOR nor its furnishing of the bonds, nor acceptance thereof by CITY, shall constitute a waiver of any rights or remedies available to CITY against CONTRACTOR.

20. INDEMNIFICATION.

CONTRACTOR agrees to protect, defend, indemnify and hold harmless CITY and its elected and appointed boards, officers, agents, and employees from any and all claims, liabilities, expenses, or damages of any nature, including attorneys' fees, for injury to or death of any person, and for injury or damage to any property, including consequential damages of any nature resulting therefrom, arising out of or in any way connected with the performance of this Agreement. The defense obligation provided for hereunder shall apply without any advance showing of negligence or wrongdoing by the CONTRACTOR, its employees, and/or authorized subcontractors, but shall be required whenever any claim, action, complaint, or suit asserts as its basis the negligence, errors, omissions or misconduct of the CONTRACTOR, its employees, and/or authorized subcontractors, and/or whenever any claim, action, complaint or suit asserts liability against the CITY, its elected officials, officers, agents and employees based upon the work performed by the CONTRACTOR, its employees, and/or authorized subcontractors under this Agreement, whether or not the CONTRACTOR, its employees, and/or authorized subcontractors are specifically named or otherwise asserted to be liable. Notwithstanding the foregoing, the CONTRACTOR shall not be liable for the defense or indemnification of the CITY for claims, actions, complaints or suits arising out of the sole active negligence or willful misconduct of the CITY. This provision shall supersede and replace all other indemnity provisions contained either in the CITY's specifications or CONTRACTOR's proposal, which shall be of no force and effect.

CONTRACTOR shall comply with all of the provisions of the Workers'

Compensation insurance laws and Safety in Employment laws of the State of California, including the applicable provisions of Divisions 4 and 5 of the California Labor Code and all amendments thereto and regulations promulgated pursuant thereto, and all similar State, Federal or local laws applicable; and CONTRACTOR shall indemnify and hold harmless CITY from and against all claims, liabilities, expenses, damages, suits, actions, proceedings and judgments, of every nature and description, including attorney fees, that may be presented, brought or recovered against CITY for or on account of any liability under or failure to comply with any of said laws which may be incurred by reason of any Work performed under this Agreement by CONTRACTOR or any subcontractor or others performing on behalf of CONTRACTOR.

CITY does not, and shall not, waive any rights against CONTRACTOR which it may have by reason of the above hold harmless agreements, because of the acceptance by CITY or the deposit with CITY by CONTRACTOR of any or all of the insurance policies described in Paragraph 21 (Insurance) of this Agreement.

The hold harmless agreements by CONTRACTOR shall apply to all liabilities, expenses, claims, and damages of every kind (including but not limited to attorneys' fees) incurred or alleged to have been incurred, by reason of the operations of CONTRACTOR or any subcontractor or others performing on behalf of CONTRACTOR, whether or not such insurance policies are applicable. CONTRACTOR shall require any and all tiers of subcontractors to afford the same degree of indemnification to the CITY OF COSTA MESA and its elected and appointed boards, officers, agents, and employees that is required of CONTRACTOR and shall incorporate identical indemnity provisions in all contracts between CONTRACTOR and all tiers of its subcontractors.

In the event that CONTRACTOR and CITY are sued by a third party for damages caused or allegedly caused by negligent or other wrongful conduct of CONTRACTOR, or by a dangerous condition of CITY's property created by CONTRACTOR or existing while the property was under the control of CONTRACTOR, CONTRACTOR shall not be relieved of its indemnity obligation to CITY by any settlement with any such third party unless that settlement includes a full release and dismissal of all claims by the third party against the CITY.

21. INSURANCE.

(a) Minimum Scope and Limits of Insurance. CONTRACTOR shall not commence work under this Agreement until it has obtained all insurance required under this Paragraph 21 and CITY has approved the insurance as to form, amount, and carrier, nor shall CONTRACTOR allow any subcontractor to commence any Work until all similar insurance required of the subcontractor has been obtained and approved.

CONTRACTOR shall obtain, maintain, and keep in full force and effect during the life of this Agreement all of the following minimum scope of insurance coverages with an insurance company admitted to do business in California, rated "A," Class X, or better in the most recent Best's Key Insurance Rating Guide, and approved by CITY:

(i) Commercial general liability, including premises-operations, products/completed operations, broad form property damage, blanket contractual liability, independent contractors, personal injury or bodily injury with a policy limit of not less than One Million Dollars ($1,000,000.00) per occurrence. If such insurance contains a general aggregate limit, it shall apply separately to this Agreement or shall be twice the required occurrence limit.

(ii) Business automobile liability for owned vehicles, hired, and non-owned vehicles, with a policy limit of not less than One Million Dollars ($1,000,000.00) combined single limit per accident for bodily injury and property damage.

(iii) Workers' compensation insurance as required by the State of California, with Statutory Limits, and Employer's Liability insurance with a limit of no less than One Million Dollars ($1,000,000.00) per accident for bodily injury or disease. CONTRACTOR agrees to waive, and to obtain endorsements from its workers' compensation insurer waiving subrogation rights under its workers' compensation insurance policy against the CITY, its officers, agents, employees, and volunteers arising from work performed by CONTRACTOR for the CITY and to require each of its subcontractors, if any, to do likewise under their workers' compensation insurance policies.

(iv) Umbrella or excess liability insurance that will provide bodily injury, personal injury and property damage liability coverage at least as broad as the primary coverages set forth above, including commercial general liability, automobile liability, and employer's liability. Such policy or policies shall include the following terms and conditions:

(1) A drop down feature requiring the policy to respond in the event that any primary insurance that would otherwise have applied proves to be uncollectable in whole or in part for any reason;
(2) Pay on behalf of wording as opposed to reimbursement;
(3) Concurrency of effective dates with primary policies;
(4) Policies shall "follow form" to underlying primary policies; and
(5) Insureds under primary policies shall also be insureds under the umbrella or excess policies.

(b) Endorsements. The commercial general liability insurance policy and business automobile liability policy shall contain or be endorsed to contain the following provisions:

(i) Additional insureds: The City of Costa Mesa and its elected and appointed boards, officers, officials, agents, employees, and volunteers are additional insureds with respect to: liability arising out of activities performed by or on

behalf of the CONTRACTOR pursuant to its contract with the City; products and completed operations of the CONTRACTOR; premises owned, occupied or used by the CONTRACTOR; automobiles owned, leased, hired, or borrowed by the CONTRACTOR."

(ii) Notice: "Said policy shall not terminate, nor shall it be canceled nor the coverage reduced, until thirty (30) days after written notice is given to CITY."

(iii) Other Insurance: "CONTRACTOR's insurance coverage shall be primary insurance as respects the City of Costa Mesa, its officers, officials, agents, employees, and volunteers. Any other insurance maintained by the City of Costa Mesa shall be excess and not contributing with the insurance provided by this policy."

(c) Reporting Provisions. Any failure of CONTRACTOR to comply with the reporting provisions of the policies shall not affect coverage provided to the City of Costa Mesa, its officers, officials, agents, employees, and volunteers.

(d) Insurance Applies Separately. CONTRACTOR's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.

(e) Deductible or Self-Insured Retention. If any of such policies provide for a deductible or self-insured retention to provide such coverage, the amount of such deductible or self-insured retention shall be approved in advance by CITY. No policy of insurance issued as to which the CITY is an additional insured shall contain a provision which requires that no insured except the named insured can satisfy any such deductible or self-insured retention.

(f) Proof of Insurance. Prior to commencement of the Work, CONTRACTOR shall furnish CITY, through the Project Manager, proof of compliance with the above insurance requirements in a form satisfactory to City's Risk Management.

(g) Non-Limiting. Nothing in this Paragraph 21 shall be construed as limiting in any way, the indemnification provision contained in this Agreement, or the extent to which Consultant may be held responsible for payments of damages to persons or property.

22. PREVAILING WAGE REQUIREMENTS.

(a) Prevailing Wage Laws. CONTRACTOR is aware of the requirements of Chapter 1 (beginning at Section 1720 et seq.) of Part 7 of Division 2 of the California Labor Code, as well as Title 8, Section 16000 et seq. of the California Code of Regulations ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. This Project is a "public works" project and requires compliance with the Prevailing Wage Laws. CONTRACTOR shall defend, indemnify and hold the CITY, its elected officials,

officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

(b) Payment of Prevailing Wages. CONTRACTOR shall pay the prevailing wage rates for all work performed under this Agreement. When any craft or classification is omitted from the general prevailing wage determinations, CONTRACTOR shall pay the wage rate of the craft or classification most closely related to the omitted classification. A copy of the general prevailing wage rate determination is on file in the Office of the City Clerk and is incorporated into this Agreement as if fully set forth herein. CONTRACTOR shall post a copy of such wage rates at all times at the project site(s).

(c) Legal Working Day. In accordance with the provisions of Labor Code Section 1810 et seq., eight (8) hours is the legal working day. CONTRACTOR and any subcontractor(s) of CONTRACTOR shall comply with the provisions of the Labor Code regarding eight (8)-hour work day and 40-hour work week requirements, and overtime, Saturday, Sunday, and holiday work. Work performed by CONTRACTOR's or any subcontractor's employees in excess of eight (8) hours per day, and 40 hours during any one week, must include compensation for all hours worked in excess of eight (8) hours per day, or 40 hours during any one week, at not less than one and one-half times the basic rate of pay. CONTRACTOR shall forfeit as a penalty to CITY Twenty-Five Dollars ($25.00), or any greater penalty set forth in the Labor Code, for each worker employed in the execution of the Work by CONTRACTOR or by any subcontractor(s) of CONTRACTOR, for each calendar day during which such worker is required or permitted to the work more than eight (8) hours in one calendar day or more than 40 hours in any one calendar week in violation of the Labor Code.

(d) Apprentices. CONTRACTOR shall comply with the provisions of Labor Code Section 1777.5 concerning the employment of apprentices on public works projects. CONTRACTOR shall be responsible for ensuring compliance by its subcontractors with Labor Code Section 1777.5.

(e) Payroll Records. Pursuant to Labor Code Section 1776, CONTRACTOR and any subcontractor(s) shall keep accurate payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by CONTRACTOR or any subcontractor in connection with this Agreement. Each payroll record shall contain or be verified by a written declaration that it is made under penalty of perjury, stating both of the following: (1) The information contained in the payroll record is true and correct; and (2) The employer has complied with the requirements of Sections 1771, 1881, and 1815 of the Labor Code for any work performed by his or her employees on this Project. The payroll records shall be certified and shall be available for inspection at all reasonable hours in accordance with the requirements of Labor Code Section 1776. CONTRACTOR shall also furnish each week to CITY's Project Administration Division a statement with respect to the wages of each of its employees during the preceding weekly payroll period.

(f) Registration with DIR. CONTRACTOR and any subcontractor(s) of CONTRACTOR shall comply with the provisions of Labor Code Section 1771 and Labor Code Section 1725.5 requiring registration with the DIR.

23. COMPLIANCE WITH ALL LAWS.

CONTRACTOR shall, at its own cost and expense, comply with all applicable local, state, and federal laws, regulations, and requirements in the performance of this Agreement, including but not limited to laws regarding health and safety, labor and employment, and wage and hours.

24. DRUG-FREE WORKPLACE POLICY.

CONTRACTOR, upon notification of the award of this Agreement, shall establish a Drug-Free Awareness Program to inform employees of the dangers of drug abuse in the workplace, the penalties that may be imposed upon employees for drug abuse violations occurring in the workplace, and the employee assistance programs available to employees. Each employee engaged in the performance of a CITY contract must be notified of this Drug-Free Awareness Program, and must abide by its terms. CONTRACTOR shall conform to all the requirements of CITY's Policy No. 100-5, attached hereto. Failure to establish a program, notify employees, or inform the CITY of a drug-related workplace conviction will constitute a material breach of contract and cause for immediate termination of the contract by the CITY.

25. NON–DISCRIMINATION.

In performing this Agreement, CONTRACTOR will not engage in, nor permit its agents to engage in, discrimination in employment of persons because of their race, religion, color, national origin, ancestry, physical handicap, medical condition, marital status or sex, or sexual orientation, except as permitted pursuant to Section 12940 of the Government Code. Violation of this provision may result in the imposition of penalties referred to in Section 1735 of the California Labor Code.

26. PROVISIONS CUMULATIVE.

The provisions of this Agreement are cumulative and in addition to, and not in limitation of, any other rights or remedies available to CITY.

27. NOTICES.

It shall be the duty and responsibility of CONTRACTOR to notify all tiers of subcontractors and material men of the following special notice provision; namely, all preliminary 20-day notices or stop notices shall be directed only to the City Clerk and to no other department, and shall be either personally delivered or sent by certified mail, postage prepaid.

All other notices shall be in writing and delivered in person or sent by certified mail, postage prepaid. Notices required to be given to CITY pursuant to this Agreement shall be addressed as follows:

City of Costa Mesa
77 Fair Drive
Costa Mesa, CA 92626
Attn: Seung Yang

Notices required to be given to CONTRACTOR shall be addressed as follows:

American Integrated Services, Inc.
1502 E. Opp Street
Wilmington, CA 90744
Attn: John Georgagi

Notices required to be given to CONTRACTOR's sureties shall be addressed as follows:

U.S. Specialty Insurance Company
26001 McKenna Ct
Lake Forest, CA 92630
Attn: Les M. Mantle

28. INDEPENDENT CONTRACTOR.

The parties hereto acknowledge and agree that the relationship between CITY and CONTRACTOR is one of principal and independent contractor and no other. All personnel to be utilized by CONTRACTOR in the performance of this Agreement shall be employees of CONTRACTOR and not employees of the CITY. CONTRACTOR shall pay all salaries and wages, employer's social security taxes, unemployment insurance and similar taxes relating to employees and shall be responsible for all applicable withholding taxes. Nothing contained in this Agreement shall create or be construed as creating a partnership, joint venture, employment relations, or any other relationship except as set forth between the parties. The parties specifically acknowledge and agree that CONTRACTOR is not a partner with CITY, whether general or limited, and no activities of CITY or CONTRACTOR or statements made by CITY or CONTRACTOR shall be interpreted by any of the parties hereto as establishing any type of business relationship other than an independent contractor relationship.

29. PERS ELIGIBILITY INDEMNIFICATION.

In the event that CONTRACTOR or any employee, agent, or subcontractor of CONTRACTOR providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees' Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the CITY,

CONTRACTOR shall indemnify, defend, and hold harmless CITY for the payment of any employee and/or employer contributions for PERS benefits on behalf of CONTRACTOR or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of CITY.

Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, CONTRACTOR and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by CITY, including but not limited to eligibility to enroll in PERS as an employee of CITY and entitlement to any contribution to be paid by CITY for employer contribution and/or employee contributions for PERS benefits.

30. VALIDITY.

The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any of the other provisions of this Agreement.

31. GOVERNING LAW.

This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any legal action relating to or arising out of this Agreement shall be subject to the jurisdiction of the County of Orange, California.

32. NO THIRD PARTY BENEFICIARY RIGHTS.

This Agreement is entered into for the sole benefit of the CITY and CONTRACTOR and no other parties are intended to be direct or incidental beneficiaries of this Agreement and no third party shall have any right in, under or to this Agreement.

33. ASSIGNABILITY.

This Agreement may not be transferred or assigned by either party, or by operation of law, to any other person or persons or business entity, without the other party's written permission. Any such transfer or assignment, or attempted transfer or assignment, without written permission, may be deemed by the other party to constitute a voluntary termination of this Agreement and this Agreement shall thereafter be deemed terminated and void.

34. WAIVER.

No waiver of any provision of this Agreement shall be effective unless in writing and signed by a duly authorized representative of the party against whom enforcement of a waiver is sought referring expressly to this Paragraph. The waiver of any right or remedy in respect to any occurrence or event shall not be deemed a waiver of any right or remedy in respect to any other occurrence or event, nor shall any waiver constitute a

continuing waiver.

35. HEADINGS.

Section and subsection headings are not to be considered part of this Agreement, are included solely for convenience, and are not intended to modify or explain or to be a full or accurate description of the content thereof.

36. CONSTRUCTION.

The parties have participated jointly in the negotiation and drafting of this Agreement and have had an adequate opportunity to review each and every provision of the Agreement and submit the same to counsel or other consultants for review and comment. In the event an ambiguity or question of intent or interpretation arises with respect to this Agreement, this Agreement shall be construed as if drafted jointly by the parties and in accordance with its fair meaning. There shall be no presumption or burden of proof favoring or disfavoring any party by virtue of the authorship of any of the provisions of this Agreement.

37. COUNTERPARTS.

This Agreement may be executed in one or more counterparts by the parties hereto. All counterparts shall be construed together and shall constitute one Agreement.

38. CORPORATE AUTHORITY.

The persons executing this Agreement on behalf of the parties hereto warrant that they are duly authorized to execute this Agreement on behalf of said parties and that by doing so, the parties hereto are formally bound to the provisions of this Agreement.

[Signature page follows.]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by and through their respective authorized officers, as of the date first above written.

CONTRACTOR'S BID

SECTION C

PROPOSAL FOR THE
POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE
City Project No. 22-02

The Honorable City Council
City of Costa Mesa
77 Fair Drive
Costa Mesa, CA 92626

Dear Council Members:

In compliance with the NOTICE INVITING BIDS FOR THE **POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE, CITY PROJECT NO. 22-02,** a copy which is hereto attached, the undersigned has carefully examined the location of the proposed Work, the Plans, Specifications and other Contract Documents and is therefore satisfied as to the conditions to be encountered, as to the character, quality and quantity of work to be performed and materials to be furnished and as to the requirements of the specifications and the Contract. It is mutually agreed that the submission of a proposal shall be considered prima facie evidence that the BIDDER has made such examination.

If awarded the Contract, the undersigned agrees to commence the Work under the Contract **WITHIN TEN (10) WORKING DAYS AFTER DATE OF CONTRACT, COMPLETE SAID INVESTIGATORY SITE WORK WITHIN NINETY (90) CALENDAR DAYS, AND COMPLETE SAID CONSTRUCTION SITE WORK WITHIN TWENTY-FIVE (25) WORKING DAYS** from the first day of commencement of such work unless legal extension is granted in accordance with the terms set forth in the specifications, and to perform and complete the Work in accordance with these Specifications and other Contract Documents, and to furnish all labor, materials, tools and equipment necessary to complete the Work in-place therefor, in the manner and time herein prescribed at the following prices, to wit:

BASE BID SCHEDULE PROPOSAL FOR UST ABANDONMENT

ITEM #	BID ITEM DECRIPTION	EST. QTY.	UNIT	UNIT PRICE (in figures)	ITEMS TOTAL PRICE (in figures)
1	MOBILIZATION AND DEMOBILIZATION	1	LS	$	$18,256.00

8	RESTORE SITE	1	LS	$	$ 5,568.00
9	ALLOWANCES	1	FA	$70,000.00	$70,000.00
	* INVESTIGATORY SITE WORK TO BE COMPLETED IN 90 CALENDAR DAYS.				
	** CONSTRUCTION SITE WORK TO BE COMPLETED IN 25 WORKING DAYS.				
	* * * BID ITEM MAY BE DELETED AND REPLACED FOR TANK REMOVAL, PER BID ITEM 9, AFTER INVESTIGATORY SITE WORK AS REQUIRED PER ENGINEER'S DIRECTION.				
	Total Base Bid	-	-	-	**$**156,680.00
	TOTAL BASE BID PROPOSAL FIGURES:				$156,680.00
	TOTAL BASE BID PROPOSAL (Words): One Hundred Fifty-Six Thousand, Six Hundred Eighty Dollars				

The award of the Contract shall be based on the lowest responsive **Total Base Bid** amount, and the City reserves the right to delete one or to add more bid items and/or to increase and/or to decrease bid items' quantities.

The CITY also reserves the right to reject all Bids.

Bidder's Initials

PROPOSAL BID SCHEDULE
(CONTINUED)

NOTES:

1. The accuracy of estimate quantities as shown is not guaranteed; the Bidder shall make his/her own estimate from the drawings and field review for verification. If the unit price and the total amount are different, the unit price will control the bid. Payment shall be based on actual work done and/or actual quantities used.

2. The City reserves the right to delete one or more bid items and/or to increase or decrease bid items' quantities, at no additional cost to the City.

3. FA designates force account. Payment shall be made on a time and materials basis, only if directed by the ENGINEER.

4. (F) Designates Final Pay Item. When an item of work is designated as "FINAL PAY ITEM" in the Specifications, the estimated quantity for that item of work shall be the final pay quantity, unless the dimensions of any portion of that item are revised by the Engineer, or the item or any portion of the item is eliminated. If the dimensions of any portion of the item are revised, and the revisions result in an increase or decrease in the estimated quantity of that item of work, the final pay quantity for the item will be revised in the amount represented by the changes in the dimensions. If a final pay item is eliminated, the estimated quantity for the item will be eliminated. If a portion of a final pay item is eliminated, the final pay quantity will be revised in the amount represented by the eliminated portion of the item of work.

   The estimated quantity for each item of work designated as "FINAL PAY ITEM" in the Specifications, shall be considered as approximate only, and no guarantee is made that the quantity which can be determined by computations, based on the details and dimensions shown on the plans, will equal the estimated quantity. No allowance will be made in the event that the quantity based on computations does not equal the estimated quantity.

   In case of discrepancy between the quantity shown in the Engineer's Estimate for a final pay item and the quantity or summation of quantities for the same item shown on the plans, payment will be based on the quantity shown in the Engineer's Estimate.

5. Bidder agrees to initial or notarize (if applicable) all pages on P-1, P-1a, P-1b, and P-2 thru P-11 and upload them onto *PlanetBids*.

PROPOSAL SCHEDULE

(CONTINUED)

The Contractor agrees that the City will not be held responsible if any of the approximate quantities shown in the foregoing proposal shall be found incorrect, and he shall not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission or misstatements shall be discovered in the estimated quantities, it shall not invalidate this contract or release the Contractor from the execution and completion of the whole or part of the work herein specified, in accordance with the specifications and the plans herein mentioned and the prices herein agreed upon and fixed therefore, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than as provided for in this contract.

The Contractor agrees that the City shall have the right to increase or decrease the quantity of any bid item or portion of the work or to omit portions of the work as may be deemed necessary or expedient, and that the payment for incidental items or work, not separately provided in the proposal shall be considered included in the price bid for other various items or work.

Accompanying this proposal is "Cash," "Certified Check," or "Bidder's Bond" (circle one) in the amount of _____ten percent_____ ($_____) equal to at least ten (10%) percent of the total bid price, payable to the City of Costa Mesa, to guarantee that within fourteen (14) days after written notice is deposited in the mail, or the bidder has received notice by telephone, the bidder will furnish proper Certificates of Insurance, and required bonds satisfactory to the City and execute a contract in accordance with the proposal and in the manner and form required by the contract documents.

The undersigned deposits the above-named security as a proposal guarantee and agrees that it shall be forfeited to the City of Costa Mesa as Liquidated Damages if the above requirements are not complied with.

DESIGNATION OF SUBCONTRACTORS

In compliance with the "Subletting and Subcontracting Fair Practices Act" being Sections 4100-4113 of the Public Contract Code of the State of California, and any amendments thereto, each bidder shall set forth below the name and location of the place of business of each subcontractor who will perform work or labor or render service to the prime contractor in or about the construction of the work or improvement in an amount in excess of one-half (½) of one percent (1%) of the prime contractor's total bid or in the case of bids for the construction of streets or highways, including bridges, in excess of one-half (½) of one percent (1%) of the prime contractor's total bid or ten thousand ($10,000) dollars, whichever is greater. Bidder shall further set forth the portion of the work, which will be done by each such subcontractor with its Department of Industrial Relations (DIR) registration number. Only one subcontractor for each such portion shall be listed.

If the contractor fails to specify a subcontractor for any portion of the work to be performed under the contract, he/she/it shall be deemed to have agreed to perform the balance of all work, which is not covered, and he/she/it shall not be permitted to subcontract that portion of the work except under the conditions hereinafter set forth.

Subletting or subcontracting of any portion of the work to which no subcontractor was designated in the original bid, shall only be permitted in cases of public emergency or necessity, and then only after a finding reduced to writing as a public record of the Legislative Body of the Owner.

All information must be filled out and typed. Please use additional pages in this format if needed.

By submission of this proposal, the Bidder certifies:

1. That (I)(we)(it) is able to and will perform the balance of all work which is not covered in the above subcontractors listing.

Bidder's Initials

CITY OF COSTA MESA BIDDERS LIST

All bidders/proposers are required to provide the following information for all DBE and non-DBE subcontractors and suppliers, who provided a proposal, bid, quote, or were contacted by the proposed prime. This information is also required from the proposed prime contractor, and must be submitted with their bid/proposal. City of Costa Mesa will use this information to maintain and update a "Bidders List" to assist in evaluating the level of DBE participation on all Public Works projects. To the extent permitted by law, all information submitted will be held in confidence.

If Bidders List information is not submitted with the bid, it shall be submitted to the City of Costa Mesa, Construction Management Division, 77 Fair Drive, Costa Mesa, CA 92626, no later than 4:00 p.m. on the fourth day, not including Saturdays, Sundays and legal holidays, following the bid opening. Bidders List information sent by U.S. Postal Service certified mail with return receipt and certificate of mailing and mailed on or before the third day, not including Saturdays, Sundays and legal holidays, following bid opening will be accepted even if it is received after the fourth day following bid opening. Failure to submit the required Bidders List information by the time specified will be grounds for finding the bid or proposal non-responsive.

BIDDER'S BOND TO ACCOMPANY PROPOSAL

(Required if the bidder desires to submit bond instead of a certified or cashier's check.)

KNOW ALL PEOPLE BY THESE PRESENTS:

That we, American Integrated Services, Inc. as principals, and U.S. Specialty Insurance Company as surety, are held and firmly bound unto the City of Costa Mesa, a municipal corporation, organized under the laws of the State of California and situated in Orange County in the sum of TEN PERCENT OF THE AMOUNT OF THE BID ($ 10%**********) to be paid to the City, its successors and assigns, for which payment well and truly to be made, we bind ourselves, our heirs, executors, and administrators, successors or assigns, jointly and severally firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH,

That is the certain proposal of the above bounden, American Integrated Services, Inc., if accepted by the City of Costa Mesa, and if the above bounden, American Integrated Services, Inc., his heirs, executors, administrators, successors and assigns, shall duly enter into and execute a contract for such construction, and shall execute and deliver the CERTIFICATE OF INSURANCE and the LABOR AND MATERIAL and the FAITHFUL PERFORMANCE BONDS described within fourteen (14) days from the date of the mailing of a notice of the above bounden, American Integrated Services, Inc., by and from the City, that said contract is ready for execution, then this obligation shall become null and void; otherwise it shall be and remain in full force and virtue.

IN WITNESS WHEREOF:

We hereunto set our hands and seals this 18th day of August, 2022

POWER OF ATTORNEY

AMERICAN CONTRACTORS INDEMNITY COMPANY TEXAS BONDING COMPANY
UNITED STATES SURETY COMPANY U.S. SPECIALTY INSURANCE COMPANY

KNOW ALL MEN BY THESE PRESENTS: That American Contractors Indemnity Company, a California corporation, Texas Bonding Company, an assumed name of American Contractors Indemnity Company, United States Surety Company, a Maryland corporation and U.S. Specialty Insurance Company, a Texas corporation (collectively, the "Companies"), do by these presents make, constitute and appoint:

Les M. Mantle of Fullerton, California

its true and lawful Attorney(s)-in-fact, each in their separate capacity if more than one is named above, with full power and authority hereby conferred in its name, place and stead, to execute, acknowledge and deliver **any and all bonds, recognizances, undertakings or other instruments or contracts of suretyship to include riders, amendments, and consents of surety, providing the bond penalty does not exceed** *****Fifty Million***** Dollars (***$50,000,000.00***). This Power of Attorney shall expire without further action on January 31st, 2024. This Power of Attorney is granted under and by authority of the following resolutions adopted by the Boards of Directors of the Companies:

Be it Resolved, that the President, any Vice-President, any Assistant Vice-President, any Secretary or any Assistant Secretary shall be and is hereby vested with full power and authority to appoint any one or more suitable persons as Attorney(s)-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on behalf of the Company, to execute, acknowledge and deliver, any and all bonds, recognizances, contracts, agreements or indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any and all notices and documents canceling or terminating the Company's liability thereunder, and any such instruments so executed by any such Attorney-in-Fact shall be binding upon the Company as if signed by the President and sealed and effected by the Corporate Secretary.

Be it Resolved, that the signature of any authorized officer and seal of the Company heretofore or hereafter affixed to any power of attorney or any certificate relating thereto by facsimile, and any power of attorney or certificate bearing facsimile signature or facsimile seal shall be valid and binding upon the Company with respect to any bond or undertaking to which it is attached.

IN WITNESS WHEREOF, The Companies have caused this instrument to be signed and their corporate seals to be hereto affixed, this 23rd day of September, 2021.

CONTRACT ASSURANCE

The CONTRACTOR or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The CONTRACTOR shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted contracts. Failure by the CONTRACTOR to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as recipient deems appropriate.

The CONTRACTOR will require that the above provision is included in all subcontracts.

Bidder's Initials

NONCOLLUSION AFFIDAVIT

The bidders, by its officers and agents or representatives present at the time of filing this bid, being duly sworn on their oaths say, that neither they nor any of them have in any way directly or indirectly entered into any arrangement or agreement with any other bidder, or with any public officer of such CITY OF COSTA MESA whereby such affiant or affiants or either of them has paid or I s to pay to such bidder or public officer any sum of money, or has given or is to give to such other bidder or public officer anything of value whatever, or such affiant or affiants or either of them has not directly or indirectly, entered into any arrangement or agreement with any other bidder or bidders, which tends to or does lessen or destroy free competition in the letting of the contract sought for on the attached bids; that no bid has been accepted from any subcontractor or supplier through any bid depository, the By-Laws, Rules, or Regulations of which prohibit or prevent the Contractor from considering any bid from any subcontractor or supplier which is not processed through said bid depository, or which prevent any subcontractor or supplier from bidding to any Contractor who does not use the facilities or accept bids from or through such bid depository; that bidder has not bid as subcontractor to other bidders; that no inducement of any form or character other than that which appears upon the face of the bid will be suggested, offered, paid or delivered to any person of the contract, nor has this bidder any agreement or understanding of any kind whatsoever, with any person whomsoever to pay, deliver to, or share with any other person in any way or manner, any of the proceeds of the contracts sought by this bid.

Bidder's Initials

DRUG-FREE WORKPLACE POLICY

CONTRACTOR, upon notification of contract award, shall establish a Drug-Free Awareness Program to inform employees of the dangers of drug abuse in the workplace, the penalties that may be imposed upon employees for drug abuse violations occurring in the workplace, and the employee assistance programs available to employees. Each employee engaged in the performance of a CITY contract must be notified of this Drug-Free Awareness Program, and must abide by its terms. Failure to establish a program, notify employees, or inform CITY of a drug-related workplace conviction will constitute a material breach of contract and cause for immediate termination of the contract by CITY.

CONTRACTOR shall conform to all the requirements of CITY'S Policy No. 100-5. A copy of this policy is attached to the sample contract agreement as an attachment in the Project Specifications.

CITY OF COSTA MESA
ORANGE COUNTY, CALIFORNIA
NOTICE INVITING BIDS

NOTICE IS HEREBY GIVEN that the City of Costa Mesa ("City") invites sealed bids, to be submitted electronically only, for the following project:

POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE
CITY PROJECT NO. 22-02

1. **BID SUBMISSION AND OPENING:** Bids must be submitted electronically via the City of Costa Mesa's PlanetBids portal before the deadline of **August 30, 2022 at 1:00 p.m.** at which time or shortly thereafter the City Clerk will open bids electronically. The bid results will be posted online via PlanetBids. No paper bids or any other form of submittal will be accepted. Any bid received after the scheduled closing time for the receipt of bids will be rejected. The City is not responsible for and accepts no liability in the event a response is late due to any network, internet, or any other technical difficulty or interruption. It shall be the sole responsibility of the bidder to ensure that his/her/its bid is received by the deadline.

   To access the bid documents and bid on this project, potential vendors and bidders must first register through the City's PlanetBids portal at: https://www.planetbids.com/portal/portal.cfm?CompanyID=45476.

2. **SCOPE OF WORK AND BID DOCUMENTS:** The scope of work generally consists of providing environmental testing, utility investigation, structural assessment, reporting, plans, permitting, and construction required to safely close the existing 6,000 gallon, City of Costa Mesa Police Department, Under Ground Storage Tank (UST).

   The Police Department Underground Storage Tank Closure will be approached as an "abandon in place" project. Structural assessment and environmental testing may reveal unforeseen circumstances that could require additional remediation and/or the safe removal of the UST.

   The plans, specifications, and bid documents for this project can be obtained via the City's PlanetBids portal at: https://www.planetbids.com/portal/portal.cfm?CompanyID=45476.

   Questions regarding the bid documents will be received by the Engineer up to five (5) working days prior to the bid opening, deadline is **August 22, 2022 at 5:00 p.m.** Questions asked of the Engineer less than (5) working days prior to Bid Opening Date, may not be addressed.

   It is the bidder's responsibility to ensure that the most current version of the solicitation, including any addenda, has been downloaded. Bids received without the applicable addenda will be rejected as incomplete.

3. **PRE-BID MEETING OR JOB WALK: A mandatory pre-bid job walk has been scheduled for August 10, 2022 at 11:00 a.m. at the project site. Located at 99 Fair Drive along the Westside of the Costa Mesa Police Department building on Vanguard Way at Fair Drive.**

4. **BID CONTENTS:** All bids must be submitted on the proposal form included in the bid documents. No bid will be considered unless it is made on the proposal form furnished by the City and made in accordance with the provisions of the bid requirements.

5. **BID SECURITY:** Each bidder must submit a certified check, cashier's check, or a bid bond, made payable to or in favor of the City of Costa Mesa, in an amount equal to at least ten percent (10%) of the total amount of the bid, to the Costa Mesa City Clerk prior to the bid submission deadline. No bid will be considered unless such certified check, cashier's check, or bid bond is received by the City Clerk prior to the bid submission deadline.

6. **CONTRACTOR'S LICENSE:** A valid **California Contractor's Class "A" General Engineering Contractors License and HAZ - Hazardous Substance Removal Certification License** issued by the California Contractors State License Board is required at the time the contract is awarded pursuant to California Public Contract Code section 3300. Each bidder must also be qualified as required by law at the time of the bid opening.

7. **REGISTRATION WITH THE DEPARTMENT OF INDUSTRIAL RELATIONS:** Pursuant to Labor Code sections 1725.5 and 1771.1, no contractor or subcontractor shall be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work unless registered and qualified pursuant to Labor Code section 1725.5.

8. **PREVAILING WAGES:** This project is a "public work" subject to prevailing wage requirements. Pursuant to provisions of Sections 1770 et seq. of the California Labor Code, all works employed on the project shall be paid not less than the general prevailing rate of per diem wages, as determined by the Director of the Department of Industrial Relations (DIR) for work of a similar character in the locality in which the work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work. Copies of the prevailing rate of per diem wages are on file with Costa Mesa Public Services Department and are available to any interested party upon request. The applicable State prevailing wages are also set forth on the Department of Industrial Relations' website: http://www.dir.ca.gov; these rates are subject to predetermined increases. The prime contractor shall post a copy of the DIR's determination of the prevailing rate of per diem wages at each job site. This project is subject to compliance monitoring and enforcement by the DIR.

9. **PAYMENT BOND AND PERFORMANCE BOND:** A Payment Bond and a Performance Bond, each in the amount of 100% of the contract amount, will be required of the successful bidder prior to award of the contract.

10. **RETENTION:** The City withholds five percent (5%) of each progress payment as retention. Pursuant to Public Contract Code section 22300, the successful bidder may substitute certain securities for money withheld by the City to ensure performance of the contract. At the request and expense of the contractor, securities equivalent to the amount withheld shall be deposited with the public agency, or with a state or federally chartered bank in this state as the escrow agent, who shall then pay those moneys to the contractor. Securities will be returned to the contractor upon satisfactory completion of the contract.

11. **NON-DISCRIMINATION:** The bidding process and contract are subject to State and Federal non-discrimination requirements, including but not limited to the requirement that no person or business shall discriminate on the basis of race, color, national origin, ancestry, religious creed, physical disability, mental disability, medical condition, marital status, sex, gender, gender expression, gender identity, sexual orientation, age, or military or veteran status in its solicitation, selection, hiring, or treatment of individuals or businesses in connection with the bidding process or work performed for the City in connection with the project.

12. **CITY'S RIGHT TO REJECT BIDS:** The City of Costa Mesa reserves the right, in its sole discretion, to reject any or all bids, or to waive any minor irregularities or informalities in any bid.

13. **ADDITIONAL REQUIREMENTS:** This project is subject to local, State, and Federal regulations and requirements, as detailed in the bid documents.

For all inquiries, please contact Associate Engineer: Kian Nejad, Public Works Department, via e-mail at KIAN.NEJAD@COSTAMESACA.GOV.

Brenda Green, City Clerk
City of Costa Mesa
Dated: July 27, 2022

SECTION B

INFORMATION FOR BIDDERS

1. PREPARATION OF BID FORM: The City of Costa Mesa (City) requires that bids be submitted on the proposal available on *PlanetBids* at such time and place as is stated in the Notice Inviting Bids. All information requested in the bid forms must be provided. All bids shall be submitted electronically via the City's public bidding platform, *PlanetBids* **only**. No other form of submittal shall be accepted. It is the sole responsibility of the Bidder to see that his bid is received in proper time. Any bid received after the scheduled closing time for receipt of bids will be **rejected**. Each Bidder is responsible for acknowledging all addenda and ensuring completed proposal forms are uploaded to the PlanetBids.com website. Bid information in the uploaded, electronically submitted proposal shall match the information that is manually populated into the PlanetBids.com website. Only bid information provided as part of the uploaded proposal will be considered part of the bid.

2. QUALIFICATION OF BIDDERS: Each Bidder shall submit a list of Construction Project References indicating Public Works and/or similar construction projects that include Underground Storage Tank abandonment and/or Underground Storage Tank removal activities which have been completed or in progress within the last 24 months. Forms for this purpose are furnished with the bid package.

3. BID SECURITY / BID BOND: Each bid shall be accompanied by one of the following: cash, cashier's check made payable to the City, a certified check made payable to the City, or a Bidder's Bond executed by an admitted surety insurer, made payable to the City, in an amount not less than 10% of the maximum amount of the bid. This original bid security / bid bond must be submitted to the City Clerk's Office *at least one hour* ***prior*** to the bid submission deadline. Any and all **late** submittals of the bid security / bid bond **shall** be rejected, and it is the bidder's responsibility, *not* the delivery service, to ensure said bid security / bid bond is delivered timely to the City Clerk's office. The Bidder's Bond shall be signed by both, the Bidder and the Surety; and both signatures shall be notarized. The bid security shall be given as a guarantee that the Bidder, if awarded the work, shall execute the contract in conformity with the Contract Documents and shall provide the surety bond or bonds as specified therein within fourteen (14) calendar days after a written Notice of Intent to Award Contract is deposited in the mail. In the case of refusal or failure to enter into said contract, the check or bond, as the case may be, shall be forfeited to the City.

4. NONCOLLUSION AFFIDAVIT: Each bid shall be accompanied by a notarized Noncollusion Affidavit on a form which is included in the Contract Documents.

5. SIGNATURE: Via the *PlanetBids* platform, the bid must be *electronically* or *digitally* signed in the name of the Bidder and must be person or persons duly authorized to sign the bid on behalf of the Bidder.

6. CORRECTIONS: Any corrections made to the submitted bid must be made electronically via *PlanetBids*.

7. DELIVERY OF PROPOSAL: Proposals shall be submitted electronically via PlanetBids: *https://www.planetbids.com/portal/portal.cfm?CompanyID=45476*. No other form of submittal shall be accepted by the City.

8. BID DEPOSIT RETURN: Deposits of three of more low bidders, the number being at the discretion of the City, will be held for sixty (60) calendar days or until posting by the successful bidder of the Bonds and Certificates of Insurance required and return of executed copies of the Agreement, whichever first occurs, at which time the deposits will be returned.

9. TAXES: No mention shall be made in the proposal of Sales Tax, Use Tax or any other tax, as all amounts bid will be deemed and held to include any such taxes which may be applicable.

10. WITHDRAWAL OF BIDS: Any bidder may withdraw his bid either personally, by written request, or by telegraphic request confirmed in the manner specified above at any time prior to the scheduled closing time for receipt of bids.

11. AGREEMENT AND BONDS: The Agreement form, which the successful bidder, as Contractor, will be required to execute, and the forms and amounts of surety bonds and Certificate of Insurance which he will be required to furnish prior to the execution of the Agreement, are included in the Contract Documents and should be carefully examined by the Bidder. The successful Bidder will be required to submit **THREE (3)** executed copies of the Agreement, the Performance Bond, the Payment Bond and the Certificate of Insurance. Payment and performance bonds shall be issued by a surety who is listed in the latest revision of U.S. Department of Treasury Circular 570 and Code of Civil Procedure Section 995.120. The Performance Bond and the Payment Bond shall be signed by both, the Bidder and the Surety; and both signatures shall be notarized.

12. FORFEITURE FOR FAILURE TO POST SECURITY AND EXECUTE AGREEMENT: In the event the Bidder to whom the Notice of Intent to Award Contract is given fails or refuses to post the required bonds and Certificate of Insurance and return executed copies of the Agreement within fourteen (14) calendar days after notification, the City may declare the Bidder's bid deposit or bond forfeited as damages caused by the failure of the bidder to post such security and execute such copies of the Agreement, and may give Notice of Intent to Award Contract to the next lowest responsive and responsible bidder, or may call for new bids.

13. BIDDERS INTERESTED IN MORE THAN ONE BID: No person, firm or corporation shall be allowed to make, or file or be interested in more than one bid for the same work unless alternate bids are specifically called for.

14. EXAMINATION OF SITE AND CONTRACT DOCUMENTS: Each bidder shall visit the site of the proposed work and fully acquaint himself with the conditions relating to the construction and labor so that he may fully understand the facilities, difficulties, and restrictions attending the execution of the work under the contract. Bidders shall thoroughly examine and be familiar with the drawings and specifications. The failure or omission of any bidder to receive or examine any contract document, form, instrument, addendum, or other document or to visit the site and acquaint himself with conditions there existing shall in no way relieve any bidder from any obligation with respect to his bid or to the contract. The submission of a bid shall be taken as prima facie evidence of compliance with this section.

15. INTERPRETATION OF PLANS AND DOCUMENTS: If any Bidder contemplating submitting a bid for the proposed contract is in doubt as to the true meaning of any part of the drawings, specifications, or other Contract Documents, or finds discrepancies in, or

omissions from the drawings and specifications, it may submit to the Engineer a written request for an interpretation or correction thereof. The Bidder submitting the Request for Interpretation (RFI) shall be responsible for its prompt delivery and on the form included within this IFB (Page B-5). Any interpretation or correction of the Contract Documents will be made only by addendum duly issued and a copy of such addendum will be mailed or delivered to each person receiving a set of the Contract Documents. No person is authorized to make any oral interpretation of any provision in the Contract Documents to any Bidder, and no Bidder is authorized to rely on any such unauthorized oral interpretation.

16. ADDENDA: The effect of all addenda to the Contract Documents shall be considered in the bid package and said addenda shall be made part of the Contract Documents and shall be returned with the bid package. Failure to submit any such addenda with the bid package may render the bid irregular and result in its rejection by the City.

17. QUESTIONS TO THE ENGINEER: ***Pre-bid questions and requests for interpretation (RFIs) of the bid documents (i.e. Plans, Specifications, Contract Documents, Bid Forms, etc.) shall be submitted no later than 5:00 PM Monday, August 22, 2022. Any questions or RFI requests submitted after the advertised date may not receive a response. Substitution proposals will only be considered during the bidding phase.***

18. EQUIVALENT MATERIALS: ***Requests for the use of equivalents to those specified, must be submitted to the City during the bidding phase. All substitution proposal requests shall be submitted to the City for review no later than 5:00 pm Monday, August 22, 2022. No substitution proposals will be accepted after the advertised date, and substitutions will not be considered after award. It is the sole responsibility of the successful bidder to prove to the City that a proposed substitute is truly an equivalent to what has been specified.***

19. EVIDENCE OF RESPONSIBILITY: Upon the request of the City, a bidder whose bid is under consideration for the award of the contract shall submit promptly to the City satisfactory evidence showing the Bidder's financial resources, its construction experience, and its organization and plant facilities available for the performance of the contract.
20. LEGAL RESPONSIBILITIES: All proposals must be submitted, filed, made and executed in accordance with State and Federal laws relating to bids for contracts of this nature whether the same or expressly referred to herein or not. Any Bidder submitting a proposal shall by such action thereby agree to each and all of the terms, conditions, provisions and requirements set forth, contemplated and referred to in the Plans, Specifications and other Contract Documents, and to full compliance therewith. Additionally, any Bidder submitting a proposal shall, by such action thereby, agree to pay at least the minimum prevailing per diem wages as provided in Section 1773, et. seq. of the Labor Code for each craft, classification or type of workman required as set forth by the Director of Industrial Relations of the State of California.

21. ANTI-DISCRIMINATION: It is the policy of the City that in connection with all work performed under contracts, there be no discrimination against any prospective or active employee engaged in the work because of race, color, ancestry, national origin, religious creed, sex, age, or marital status. The Contractor agrees to comply with applicable Federal and California laws including, but not limited to, the California Fair Employment Practice Act, beginning with Government Code Section 12900, and Labor Code Section 1735. In addition, the Contractor agrees to require like compliance by any subcontractors employed on the work by him/her.

22. DRUG-FREE WORKPLACE POLICY: Contractor, upon notification of contract award, shall establish a Drug-Free Awareness Program to inform employees of the dangers of drug abuse in the workplace, the penalties that may be imposed upon employees for drug abuse violations occurring in the workplace, and the employee assistance programs available to employees. Each employee engaged in the performance of a City contract must be notified of this Drug-Free Awareness Program, and must abide by its terms. Contractor shall conform to all the requirements of City's Policy No. 100-5. Failure to establish a program, notify employees, or inform the City of a drug-related workplace conviction will constitute a material breach of contract and cause for immediate termination of the contract by the City.

23. BID PROTEST PROCEDURES: Any bid protest must be submitted in writing before 5:00 PM of the 5th business day following bid openings. The initial protest document shall contain a complete statement of the basis for the protest. The protest shall refer to the specific portion of the document which forms the basis for the protest. The protest shall include the name, address and telephone number of the person representing the protesting party. The party filing the protest shall concurrently transmit a copy of the initial protest document and any attached documentation to all other parties with a direct financial interest which may be adversely affected by the outcome of the protest. Such parties shall include all other Bidders or proposers who appear to have a reasonable prospect of receiving an award depending upon the outcome of the protest. Upon receipt of a bid protest, the matter shall be reviewed by the Public Services Director, whose decision shall be final. This procedure supersedes the procedure of appeal outlined in City of Costa Mesa Municipal Code Section 2-303.

24. ASSEMBLY BILL 626: Assembly Bill 626 (AB 626), adds section 9204 to the Public Contract Code creating a claims resolution process applicable to any claim (as defined) by a contractor against a public entity filed in connection with a public works project. Section 9204 applies to public works contracts entered into on and after January 1, 2017. The legislation was supposed to sunset (end) on January 1, 2020, unless extended by subsequent legislation. The summary of Section 9204 is specified as follows:

    In the event of any dispute or controversy with the City over any matter whatsoever, the Contractor shall not cause any delay or cessation in or of Work, but shall proceed with the performance of the Work in dispute. The Contractor shall retain any and all rights provided that pertain to the resolution of disputes and protests between the parties. The Disputed Work will be categorized as an “unresolved dispute” and payment, if any, shall be as later determined by agreement or a court of law. The Contractor shall keep accurate, detailed records of all Disputed Work, claims and other disputed matters.

    All claims arising out of or related to the Contract Documents or this Project, and the consideration and payment of such claims, are subject to the Government Claims Act (Government Code Section 810 et seq.) with regard to filing claims. All such claims are also subject to the dispute procedures set forth in Public Contract Code Section 9204 and Public Contract Code Section 20104, et seq. (Article 1.5), to the extent each is applicable. This Contract hereby incorporates those provisions as through fully set forth herein. Thus, the Contractor or any Subcontractor must file a claim in accordance with the Government Claims Act as a prerequisite to filing a construction claim in compliance with Section 9204 and Section 20104 et seq. (if applicable), and must then adhere to Section 20104, et seq. and Section 9204, as applicable, pursuant to the definition of “claim” as individually defined therein.

SECTION D

PART 1
GENERAL PROVISIONS

SECTION 1 – GENERAL

1-1 GENERAL

[Add the following:].

Except as hereinafter provided, the provisions of the latest edition of the Standard Specifications for Public Works Construction (“Green Book”), and all amendments thereto, adopted by the Joint Cooperative Committee of Southern California Chapter, American Public Works Association, Southern California District and Associated Contractors of California; hereinafter referred to as Standard Specifications, are adopted as the "Standard Specifications of the City of Costa Mesa" and shall be considered as a part of these specifications. Copies of the Standard Specifications are available from the publisher:

BNi Building News

1612 S. Clementine Street

Anaheim, California 92802

(714) 517-0971

Where specified in these specifications, the latest edition of the California Building Code, based on the latest edition of the International Building Code, the latest edition of the "Standard Specifications and Standard Plans of the State of California, Department of Transportation, Division of Highways," "Standard Plans of the Orange County Environmental Management Agency," and "Los Angeles County Flood Control District, Design Manual, Standard Drawings" shall apply or unless otherwise noted in these specifications or at the direction of the ENGINEER.

Where referenced in these Specifications, the latest edition of the “City of Costa Mesa Standard Drawings” and the “Work Area Traffic Control Handbook (WATCH)” published by Building News, Inc., shall also apply.

The section numbers of these General Provisions coincide with those of the said Standard Specifications. Only those sections requiring amendment, elaboration, or specifying options, are called out.

The following modifications are made to the "Standard Specifications." If there is a conflict between the "Standard Specifications" and these modifications, these modifications shall have first precedence.

1-2 TERMS AND DEFINITIONS

[Add or redefine the following:].

(a) AGENCY	The City of Costa Mesa, California, hereinafter referred to as "CITY."
(b) BOARD	The City Council of the City of Costa Mesa, California, hereinafter referred to as "BOARD."
(c) CONTRACT DOCUMENTS	Documents including but not limited to the following: The proposal form P-1 through P-11, Notice Inviting Bids, Standard Specifications, General Provisions, Special Provisions, Technical Specifications, Plans, Bonds, Insurance Certificates, Agreement, and all Addenda setting forth any modifications of the documents as further specified in contract agreement.
(d) ENGINEER	The administrating officer of the City of Costa Mesa or his authorized representative hereinafter referred to as ENGINEER.
(e) BIDDER	Any individual, firm, partnership, corporation, or combination thereof, submitting a bid proposal for the work contemplated in the contract documents, acting directly or through a duly authorized representative, hereinafter referred to as BIDDER.
(f) LEGAL ADDRESS OF CONTRACTOR	The legal address of the Contractor shall be the address given on the Contractor's bid and is hereby designated as the place to which all notices, letters or other communications to the Contractor shall be mailed or delivered.
(g) LABORATORY	An established laboratory approved and authorized by the ENGINEER for testing materials and work involved in the contract.

1-3 ABBREVIATIONS

CALTRANS	State of California, Department of Transportation, Division of Highways
O.C.E.M.A.	Orange County Environmental Management Agency
L.A.C.F.C.D.	Los Angeles County Flood Control District

1-6 BIDDING AND SUBMISSION OF THE BID

1-6.1 General

[Add the following:].

Proposal shall be made and submitted on proposal forms **P-1** through **P-11** in accordance with the Notice Inviting Bids. In addition to the required signatures in the spaces provided in the proposal forms, each BIDDER shall initial each sheet of the proposal forms at the bottom right hand corner.

No person, firm, partnership, corporation, or combination thereof shall be allowed to make or file or be interested in more than one bid for the same work, unless alternate bids are called for. A person, firm, partnership, corporation, or combination thereof who has submitted a sub-proposal to a BIDDER or who has quoted prices on materials to a BIDDER is not thereby disqualified from submitting a sub-proposal to or quoting prices to the other bidders. If, on the opening of bids, more than one bid appears in which the same person, firm, partnership, corporation or combination thereof is interested as a principal, all such bids shall be rejected.

Proposals with interlineations, alterations, or erasures shall be initialed by the BIDDER'S authorized agent. Alternative proposals, special conditions, or other limitations or provisions affecting the bid, except as such called for in the contract documents, will render the bid informal and may cause its rejection.

All proposals must give the prices bid for the various items of work and must be signed by the BIDDER, who shall give his address. Each bid shall have thereon the affidavit of the BIDDER that such bid is genuine and not sham nor collusive, nor made in the interest nor behalf of any other person not therein named and that the BIDDER has not directly nor indirectly induced or solicited any other BIDDER to put in a sham bid, nor induced nor solicited any person, firm, partnership, corporation, or combination thereof to refrain from bidding, and that the BIDDER has not in any manner sought by collusion to secure himself an advantage over any other BIDDER.

A contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in this chapter, unless currently registered and qualified to perform public work pursuant to Section 1725.5 of the Labor Code. It is not a violation of this section for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5 at the time the contract is awarded.

1-6.1.1 Request for Interpretation

If any person contemplating submitting a bid is in doubt as to the meaning of any part of the Plans, Specification, or other proposed Contract Documents, or finds discrepancies in, or omissions from the drawings or specifications, (It, he, she) may make a request to the ENGINEER, in writing, for an interpretation or correction thereof pursuant to the provisions in the Information for Bidders section of these specifications. The person

submitting such a request shall be responsible for its prompt delivery. All such interpretations of the Contract Documents will be made only by addenda duly issued, and a copy of each such addendum will be mailed or delivered to each person receiving a set of Contract Documents at (its, his, her) last address of record. The CITY will not be responsible for any other explanations or interpretations of the Contract Documents.

1-6.1.2 Soil Conditions

The BIDDER shall inspect the soil conditions before submitting a bid. By submitting a bid, the BIDDER acknowledges that he is satisfied with the quality of the work area including but not restricted to the conditions affecting, handling and storage of materials, disposal of excess materials, and the soil conditions.

1-6.1.3 Return of Bid Security

Any BIDDER may withdraw its bid, either personally, or by telegraphic or written request, at any time prior to the scheduled closing time for the receipt of bids. It is the sole responsibility of the BIDDER to see that any such telegraphic or written request is delivered to the City Clerk prior to said closing time. Bid security of such BIDDERS will be returned promptly to the BIDDER.

The bid security of the BIDDER whose bid is accepted will be held by the CITY until the contract has been executed and the accompanying insurance certificates, performance bond and labor and materials bond are approved and filed, whereupon the bid security will then be returned to the BIDDER.

The bid security of the second and third lowest BIDDERS will be retained until the contract is awarded to and executed by the BIDDER whose bid is accepted, or until 45 days after the opening of bids, whichever period is shorter. The bid security of all BIDDERS other than the three lowest will be returned promptly after the opening of bids.

If a BIDDER fails or refuses promptly to execute the agreement to do the work or fails or refuses to comply with insurance and bonding requirements, the bid security shall be forfeited to the CITY and shall be collected and paid into the General Fund of the CITY.

1-6.2 Subcontractor Listing

[Add the following:].

The ENGINEER, as duly authorized officer, may consent to subcontractor substitution requested by the Contractor subject to the limitations and notices prescribed in Section 4107 of the Public Contract Code.

1-7 AWARD AND EXECUTION OF THE CONTRACT

1-7.1 General

[Add the following:].

The award of contract, if awarded, will be to the lowest responsive and responsible bidder whose proposal complies with all requirements of the Notice Inviting Bids and Section 1-6 of these specifications. The BIDDER, upon notification as the "apparent low bidder," shall comply with the CITY'S insurance and bonding requirements by submitting the required insurance certificates and bonds within **fourteen (14) days after the mailing of a Notice of Award to the BIDDER that the contract is ready for execution**. The contract will be awarded within thirty (30) days of receipt of properly approved insurance certificates and bonds pursuant to CITY requirements spelled out in these specifications. BIDDER must take particular note of "insurance requirements" contained in these specifications and sample agreement included within the contract documents, and should provide that information to his insurance broker in order that a properly executed certificate is submitted. The CITY, however, reserves the right to reject any or all bids and to waive any informality in the bids received.

1-7.1.1 Execution of Agreement

The Agreement shall be signed by the successful BIDDER and returned to the CITY no later than **fourteen (14) days from Notice of Award** of the Contract by the CITY. Failure to comply with insurance and bonding requirements as specified in the Agreement and in Section 1-7.1 of these General Provisions shall be considered grounds for the revocation and rejection of the bid and forfeiture of bid security. No proposal shall be considered binding upon the CITY until the execution of the agreement by the CITY. In case of conflict, the agreement shall have precedence over all other written specifications.

1-7.2 Contract Bonds

[Add the following:].

The "Faithful Performance Bond" and the "Labor and Material Bond" as specified in this section shall be for one hundred percent (100%) of the Contract price. The Labor and Material Bond shall be maintained by the Contractor in full force and effect for at least seven (7) months following the filing of the Notice of Completion. The Faithful Performance Bond shall also be kept by the Contractor in full force and effect for at least one (1) year following the filing of the Notice of Completion.

CONTRACTOR shall provide the following:

- A certified copy of the certificate of authority of the surety issued by the Insurance Commissioner.
- A certificate from the clerk of the county in which the court or officer is located that the certificate of authority of the surety has not been surrendered, revoked, canceled, annulled, or suspended or, in the event that it has, that renewed authority has been granted.
- Copies of the surety's most recent annual statement and quarterly statement filed with the Department of Insurance pursuant to Article 10 (commencing with Section 900) of Chapter 1 of Part 2 of Division 1 of the Insurance Code.

SECTION 2 – SCOPE OF THE WORK

2-1 WORK TO BE DONE

[Replace in its entirety with the following:].

The CONTRACTOR shall perform all work necessary to complete the Contract Agreement in accordance with the Contract Documents.

The CONTRACTOR shall provide and furnish all labor, operations, materials, tools, equipment, supplies, manufactured articles, and incidentals necessary to perform and complete the Work as shown on the Plans and these Contract Documents, to the satisfaction of the ENGINEER.

Reference the Special Provisions for specific project details.

2-2 PERMITS

[Add the following:].

All permits and licenses shall be obtained in sufficient time to prevent delays to the work. Permit fees for all City-issued permits shall be waived. Fees for any other permits must be paid by the Contractor and be included in the price bid for this work.

In the event that the CITY has obtained permits, licenses or other authorizations applicable to the work, the Contractor shall comply with the provisions of said permits, licenses and other authorizations.

2-5 THE CONTRACTOR'S EQUIPMENT AND FACILITIES

2-5.1 General

[Add the following:].

The Contractor shall only use the proper construction equipment to protect the City streets from breaking up and deterioration. Haul trucks shall be limited to a gross vehicle weight of 10 tons or less.

2-5.2 Temporary Utility Services

[Add the following:].

The Contractor shall provide for his employees an adequate supply of clean, potable drinking water, which shall be dispensed through approved sanitary facilities.

If water is needed during construction, Contractor shall contact Mesa Consolidated Water District to obtain necessary permits, instructions, and meters prior to commencing work. The Contractor is required to make any and all necessary installations and connections. All water shall be metered. The Contractor shall pay for all deposits and fees involved.

2-5.4 Haul Routes

[Add the following:].

In order to protect the City streets from deterioration due to hauling of materials, the Contractor shall submit to the ENGINEER (at the pre-construction meeting) for approval, a proposed route for the hauling of materials for disposal. Upon approval, the Contractor shall strictly adhere to that route only, unless written permission from the ENGINEER is obtained to change the route.

Where haul routes have not been established at a pre-construction meeting the Contractor shall submit to the ENGINEER for approval, a proposed haul route at least 5 working days prior to performing any work that requires hauling.

Waste Hauler Requirements

The California Green Building Standards Code, 2016 Edition, California Code of Regulations, Title 24, Part 11, impacting waste diversion as documented in the City of Costa Mesa's Municipal Code Chapter 4 of Title 8, requires that all construction and demolition related projects divert 65% of project waste generated from the landfill. Consequently, permitted building projects relating to construction and demolition, newly constructed buildings, additions, alterations, interior and exterior demolitions, etc., are required to divert a minimum of 65% of nonhazardous construction and demolition waste from the landfill by recycling, reuse, or salvage. Generally, these materials include brick, drywall, other masonry, cardboard, green waste, paper, carpet, lumber, plastic, concrete, and/or metals. Asphalt, concrete, excavated soil and land-clearing debris should be 100% diverted from disposal. The County provides a suggested list of locations that are meeting and/or exceeding the 65% diversion requirement and may be used for recycling construction and demolition material.

The City of Costa Mesa requires that all hauling activity in Costa Mesa comply with one of the waste hauling options for your construction and demolition related project:

- Use Franchise Waste Hauler
- Self-Haul Permit - https://www.costamesaca.gov/city-hall/city-departments/public-services/waste-collection-and-recycling

A Construction and Demolition Reporting Form as provided in the Miscellaneous Document Section of these Specifications must be completed and submitted by the Contractor to the CITY prior to the release of retention monies.

2-7 CHANGES INITIATED BY THE AGENCY

2-7.1 General

[Add the following:].

ENGINEER shall be the duly authorized officer of the CITY who may grant the changes prescribed in this section.

2-8 EXTRA WORK

[Add the following:].

The extra work as defined in this section of the Standard Specifications and any work done by the Contractor beyond the lines and grades shown on the plans shall only be performed when ordered in writing by the ENGINEER. In absence of such written order, any such work by the Contractor shall be considered unauthorized and will not be paid. Work so done may be ordered to be removed at the Contractor's expense.

2-9 CHANGED CONDITIONS

[Add the following:].

The Contractor shall promptly act to supply all information to the ENGINEER for proper evaluation. Failure to do so shall constitute a waiver of any payment for delays suffered by the Contractor.

SECTION 3 – CONTROL OF THE WORK

3-1 ASSIGNMENT

[Replace the 1st sentence with the following:].

No contract or portion thereof may be assigned without written consent of the BOARD.

3-4 AUTHORITY OF THE BOARD AND THE ENGINEER

[Add the following:].

When any of the various units or operations of the work have been suspended, the Contractor shall give at least 24 hours advance notice of the time when he or his subcontractor will start or resume any of such units or operations. That notice is to be given during working hours, exclusive of Saturdays, Sundays or holidays, for the purpose of permitting the ENGINEER to make necessary assignments to his representative on the work.

Any work performed in conflict with said notice, without the presence or approval of the ENGINEER, or work covered up without notice, approval or consent may be rejected or ordered to be uncovered for examination at Contractor's expense and shall be removed at Contractor's expense, if so ordered by the ENGINEER or his representative on the work. Any unauthorized or defective work, defective material or workmanship or any unfaithful or imperfect work that may be discovered before the final payment and final acceptance of work shall be corrected immediately by the Contractor without extra charge even though it may have been overlooked in previous inspections and estimates or may have been caused due to failure to inspect the work.

All authorized alterations affecting the requirements and information given on the approved plans shall be in writing. No changes shall be made on any plan or drawing by the Contractor after the same has been approved by the ENGINEER, except by direction of the ENGINEER in writing. Deviations from the approved plans, as may be required by critical conditions of construction, must be authorized in writing by the ENGINEER.
All instructions, rulings and decisions of the ENGINEER shall be in writing and are binding on all parties unless a formal protest is made as provided in the following paragraph:

If the Contractor considers any work demanded of him to be outside the requirements of the contract, or if he considers any instruction, ruling or decision of the ENGINEER or ENGINEER'S representative to be unfair, the Contractor shall, within ten (10) days after any such demand is made, or instruction, ruling or decision is given, file a written protest with the ENGINEER, stating clearly and in detail his objections and reasons therefor. Except for such protests and objections as are made of record, in the manner and within the time above stated, the Contractor shall be deemed to have waived and does hereby waive all claims for extra work, damages and extensions of time on account of demands, instructions, rulings and decisions of the ENGINEER.

Upon receipt of any such protest from the Contractor, the ENGINEER shall review the demand, instruction, ruling or decision objected to and shall promptly advise the

Contractor, in writing, of his final decision, which shall be binding on all parties, unless within the ten (10) days thereafter the Contractor shall file with the BOARD a formal protest against said decision of the ENGINEER. The BOARD shall consider and render a final decision on any such protest within thirty (30) days of receipt of same. If the BOARD fails to consider and render a final decision on any such protest within thirty (30) days of receipt of the same, the protest shall be deemed denied.

3-5 INSPECTION

[Add the following:].

If the Contractor requests and receives approval from the ENGINEER to receive inspection services from the CITY outside of a normal eight (8) hour day/forty (40) hour work week or on Saturday, Sunday, or CITY holidays, the Contractor shall arrange with the CITY and ENGINEER for the special inspection services and Contractor shall pay for such special inspection services at a fee established by the ENGINEER to defray the cost for such service.

All work, which has been inspected and deemed defective in its construction or does not meet all of the requirements of the plans and/or specifications by the ENGINEER shall be remedied, or removed and replaced by the Contractor in an acceptable manner, and no compensation will be allowed for such correction.

Any work done beyond the limits of the lines and grades shown on the plans or established by the ENGINEER or extra work done without written authority will be considered as unauthorized and not be paid.

Upon failure on the part of the Contractor to comply with any order of the ENGINEER made under the provisions of this article, the ENGINEER shall have authority to cause defective work to be remedied, or removed and replaced, and unauthorized work to be removed, and to deduct the costs and thereof from any monies due or to come due the Contractor.

Payment will not be made for materials wasted or disposed of in a manner not called for under the Contract. This includes rejected material not unloaded from vehicles, material rejected after is has been placed and material placed outside the limits of the project. No compensation will be allowed for disposing of rejected or excess material.

3-6 THE CONTRACTOR'S REPRESENTATIVE

[Add the following:].

Contractor shall file with the ENGINEER the addresses and telephone numbers where its designated representative may be reached during hours when the work is not in progress.

Instructions and information given by the ENGINEER to the Contractor's authorized representative or at the address or telephone numbers filed in accordance with this section shall be considered as having been given to the Contractor.

The Contractor shall have on the work site at all times a competent English-speaking superintendent, as his agent, capable of reading and thoroughly understanding the

plans and specifications and other related documents.

3-7 CONTRACT DOCUMENTS

3-7.1 General

[Add the following:].

Contractor will obtain from the ENGINEER, free of charge, copies of plans, general provisions, special provisions and additions to the Standard Specifications that are reasonably necessary for the execution of work.

Contractor shall, at its own expense, obtain copies of the Standard Specifications and Standard Plans and Specifications of CALTRANS, for his general use.

If after the Contract is awarded it appears that the work to be done, or any matter relative thereto, is not sufficiently detailed or explained in the specifications and plans, the Contractor shall apply to the ENGINEER for such further explanations as may be necessary and shall conform to such explanation or interpretation as part of the Contract.

All scaled dimensions are approximate. Before proceeding with the work, the Contractor shall carefully check and verify all dimensions and quantities and shall immediately inform the ENGINEER or his representative of any discrepancies.

3-10 SURVEYING

[Replace with the following:].

3-10.1 General

The Contractor will perform and be responsible for the accuracy of setting all required survey stakes adequate for the construction of the project.

3-10.3 Line and Grade

Unless otherwise provided in the Special Provisions, lines and grades for construction shall be the responsibility of the Contractor, with the following provisions:

All work under this Contract shall be built in accordance with the lines and grades shown on the plans. Field survey for establishing the lines and grades and for the control of construction shall be the responsibility of the Contractor. All such surveys, including construction staking, shall be under the supervision of a California-licensed land surveyor or by a California-licensed civil engineer allowed by law. Staking shall be performed on all items ordinarily requiring grade and alignment, at intervals normally accepted by the agencies and the trade involved.

The Contractor shall provide a copy of the office calculations and grade sheets to the City Inspector. The Contractor shall be responsible for any error in the finished work and shall notify the ENGINEER within one (1) working day of any discrepancies or design errors discovered during staking.

Unless a separate bid item is provided, the payment for surveying, construction staking, professional services, office calculations, furnishing all labor, materials, equipment, tools and incidentals, and for doing all work involved shall be considered as included in the various items of work, and no additional compensation will be allowed.

3-12 WORK SITE MAINTENANCE

3-12.1 General

[Replace 2nd paragraph with the following:].

Unless the construction dictates otherwise, and unless otherwise approved by the ENGINEER, Contractor shall furnish and operate a self-loading motor sweeper with a functional water spray nozzle system at least once each working day to keep paved areas in the Work zone and along all haul routes acceptably clean whenever construction, including restoration, is incomplete.

3-12.2 Air Pollution Control

[Add the following:].

Failure of the Contractor to comply with the ENGINEER'S dust control orders may result in an order to suspend work until the condition is corrected and, after giving notice to the Contractor, the ENGINEER may order the condition corrected by others. All costs thus incurred shall be deducted from the amount to be paid to Contractor. No additional compensation will be allowed as a result of such suspension.

No separate payment will be made for any work performed nor material used to control dust resulting from Contractor's performance of the work or from public traffic, either inside or outside the right-of-way. Full compensation for such dust control will be considered to be included in the prices paid for the various items of Work involved.

3-12.4.1 General

[Add the following:].

All surplus materials shall be removed from the site of the Work within five (5) days after completion of the Work causing the surplus materials.

3-12.6 Water Pollution Control

3-12.6.1 General

[Add the following:].

Discharge of storm water from construction sites that disturb land equal to or greater than one (1) acre must be in compliance with the state General Construction Activity Permit (Construction Permit). The latest permit provisions of the Construction Permit shall apply. The Contractor is required to contact the Santa Ana Regional Water Quality

Control Board (Regional Board) for all information contained in the Construction Permit. In the event project construction occurs during the transition of revised Construction Permits, the Contractor shall incorporate the necessary modifications specified by the revised Construction Permit within the time period specified in the new Construction Permit.

Project Soil Disturbance is:
Less than 1 acre .: No General Construction Permit required

Construction activity subject to the Construction Permit includes clearing, grading, disturbance to the ground such as stockpiling, work area, or excavation that results in soil disturbances of at least one acre of total land area. Construction activity that results in soil disturbances of less than one acre is subject to the Construction Permit if the construction activity is a part of a larger common plan of development that encompasses one or more acres of soil disturbance or if it is determined that discharges from the project pose a significant threat to water quality.

The CONTRACTOR shall have an account with the State for SMARTS (Storm Water Multiple Application and Report Tracking System). The CONTRACTOR shall contact the CITY with their user ID so that the CITY will grant the CONTRACTOR access as a Data Submitter.

The CONTRACTOR shall complete the NOI within SMARTS https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.jsp The CONTRACTOR will notify the CITY when the NOI is ready for the CITY to submit to the State. The CONTRACTOR shall pay all fees associated with the NOI process. The CONTRACTOR shall also complete all required reports within SMARTS as required by the General Permit and the Project's Storm Water Pollution Prevention Plan (SWPPP).

The CONTRACTOR shall complete the Annual Report and NOT within SMARTS. Once the CITY has been notified, the CITY will review and submit to the State for processing.

A copy of the latest permit is available at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/constpermits.shtml

The CONTRACTOR is hereby directed to read the Construction Permit thoroughly and comply with the requirements as specified therein.

3-12.6.2 Best Management Practices (BMPs)

[Add the following:].

The Contractor shall install and maintain the appropriate Best Management Practices (BMPs) to protect water quality within the project limits through the duration of the Project.

The Contractor shall be responsible for any damage to any portion of the Work occasioned by failure to provide proper drainage control prior to the completion and acceptance of the Work.

Payment for furnishing, installing and maintaining BMPs inclusive of sweeping the Project site as required or directed by the ENGINEER shall be included in the other various bid items associated with the work and no additional payment will be allowed thereof.

3-12.6.3 Storm Water Pollution Prevention Plan (SWPPP)

[Add the following:].

If a General Construction Permit is required pursuant to Section 3-12.6.1 of these General Provisions, the following Storm Water Pollution Prevention Plan (SWPPP) requirements shall be adhered to:

The Contractor is responsible for the preparation and implementation of a SWPPP as required by the Construction Permit. The Contractor is responsible for completing all parts of the SWPPP including, REAPs, monitoring, sampling, rain gauge records, weather reports, submitting pictures of every third storm, non-authorized discharge reports, Ad-Hoc reports, Annual Reports, post construction BMPs and other requirements of the SWPPP.

The completed SWPPP must be signed by a QSD (Qualified SWPPP Developer). The completed SWPPP must be submitted to the resident engineer for City review and acceptance, prior to uploading to SMARTS. The Contractor will be responsible for uploading an electronic format of the SWPPP into SMARTS. The SWPPP must be signed by the City before construction begins. A copy of the SWPPP must be available at the site at all times and must be implemented and revised in accordance with the Construction Permit throughout the duration of the project.

Contractor must have QSP (Qualified SWPPP Practitioner). Contractor shall perform site inspections before and after the storm event, and once each 24-hour period during extended storm event, to identify BMP effectiveness and implement repairs or BMP modifications as soon as possible. Sampling of potential pollutant discharges shall be conducted by trained personnel and required laboratory test conducted by laboratory accredited by the California Department of Health Services Environmental Laboratory Accreditation Program.

Contractor shall be responsible for any penalties assessed against the City if the penalty assessed is due to Contractor’s violation of the Construction Permit requirement, or Contractor’s failure to fully implement and monitor SWPPP as required.

Erosion and Sediment Control Plans

Erosion and Sediment Control Plans shall be prepared by the Contractor as part of the SWPPP that identify adequate controls to prevent erosion and discharge of sediment off-site. Payment for the Erosion and Sediment Control Plans shall be included as part of the SWPPP.

3-12.6.4 Dewatering

[Add the following:].

Unless otherwise directed in these Special Provisions, the Contractor shall provide and maintain ample means and devices with which to promptly remove and properly dispose of water entering the excavations or other parts of the work at all times during construction. Dewatering shall be accomplished by methods which will ensure a dry excavation and preservation of the final lines and grades of the bottoms of excavations. The methods may include sump pumps, deep wells, well points, suitable rock or gravel placed below the required bedding for draining and pumping purposes, temporary pipelines, and other means.

Standby pumping equipment shall be on the job site. A minimum of one standby unit shall be available for immediate installation should any well unit fail. The design and installation of well points or deep wells shall be suitable for the accomplishment of the work. Drawings or details indicating the proposed dewatering system shall be submitted to the CITY for review.

The Contractor shall dispose of the water from the work in a suitable manner without damage to adjacent property.

Conveyance of the water shall be such as to not interfere with traffic flow or treatment facilities operations. No water shall be drained into work built or under construction without prior consent of the ENGINEER.

Water shall be disposed of in such a manner as not to be a menace to the public health and such disposal shall be performed in accordance with Environmental Protection Agency and State Water Quality Control Board standards (NPDES permit). Any testing and reports required under NPDES permit shall be performed by the Contractor and submitted to the appropriate agency for approval at no additional cost to the CITY.

3-13 COMPLETION, ACCEPTANCE, AND WARRANTY

3-13.3 Warranty

[Replace 2nd sentence of 1st paragraph with the following:].

The warranty period shall start on the date the Work is accepted by the Board.

SECTION 4 – CONTROL OF MATERIALS

4-4 TESTING

[Add the following:].

All tests of materials furnished by the Contractor shall be made in accordance with commonly recognized standards of national organizations and such special methods and tests as are prescribed in these specifications. No materials shall be used until they have been approved by the ENGINEER.

The Contractor shall at his expense furnish the CITY, in triplicate, certified copies of all required factory and mill test reports. Any materials shipped by the Contractor from a factory or mill prior to having satisfactorily passed such testing and inspection by a representative of the CITY shall not be incorporated in the work, unless the ENGINEER shall have notified the Contractor, in writing, that such testing and inspection will not be required.

At the option of the ENGINEER, the source of supply of each of the materials shall be approved by the ENGINEER before delivery is started and before such material is used in the work.

Unless otherwise provided in the Special Provisions, the CITY will complete and pay for the initial soils, compaction, and material tests. Any subsequent soil, compaction, and material tests deemed necessary due to the failure of initial tests will be at the Contractor's expense and deducted from the payment due.

SECTION 5 – LEGAL RELATIONS AND RESPOSIBILITIES

5-1 LAWS AND REGULATIONS

[Add the following:].

The Contractor shall protect and indemnify the CITY, the BOARD, the ENGINEER, and all of its or their officers, agents and servants against any claim or liability arising from or based on the violation of any existing or future State, Federal and local laws, ordinances, regulations, orders or decrees, whether by himself or his employees. If any discrepancy or inconsistency is discovered in the plans, drawings, specifications or contract for the work in relation to any such law, ordinance, regulation, order or decree, the Contractor shall forthwith report the same to the ENGINEER in writing.

5-2 SPECIAL NOTICES

[Add the following:]

In addition to the special notices requirement to be served by Personnel Delivery or Certified Mail, special notices may also be served by the utilization of FedEx or UPS express service with a confirmed delivery receipt. Service shell be effective on the date of the receipt of the delivery confirm issued by FedEx or UPS.

5-3 LABOR

5-3.3 Payroll Records

[Add the following:].

In order to verify compliance with the Labor Code, Contractor shall furnish to the ENGINEER, weekly, for the duration of the contract period, copies of his payroll statements showing wages paid to each employee during the preceding week and the employee work classification. Use of Form DH-C-347, Payroll Statement of Compliance, is an acceptable method of fulfilling the above requirement.

5-3.5 Apprentices

[Replace with the following:].

Attention is directed to the provisions of Sections 1777.5 and 1777.6 of the Labor Code concerning the employment of apprentices by the Contractor or any subcontractor under it. The Contractor and any subcontractor under it shall comply with the requirements of those Sections in the employment of apprentices.

Information relative to apprenticeship standards, wage schedules and other requirements may be obtained from the Director of Industrial Relations, Ex-officio the Administrator of Apprenticeship, San Francisco, California, or from the Division of Apprenticeship Standards and its branch offices.

5-4 INSURANCE

[Replace with the following:].

The minimum amounts and types of insurance coverages are as stated in the Agreement (sample copy attached). Prior to bid submittal the BIDDER shall keep fully

informed of the latest insurance requirements of the City of Costa Mesa and shall comply with all other provisions of Section 5-4 of the Standard Specifications.

Below are approved endorsements which satisfy the basic insurance requirements contained in contracts entered into by City of Costa Mesa. These have been approved by the City Attorney's office. The terms of any specific contract with the City are controlling. Prior to the commencement of any work, the CITY requires that the ENGINEER receive Certificates of Insurance in **DUPLICATE** for liability coverage of at least $1,000,000 combined single limit, per occurrence and in the aggregate.

Each insurance policy required by the CITY of the Contractor shall contain the following endorsements:

1. Additional Insureds

"The City of Costa Mesa and its elected and appointed boards, officers, agents, and employees are additional insureds with respect to the subject project and agreement."

2. Notice

"Said policy shall not terminate, nor shall it be canceled nor the coverage reduced, until thirty (30) days after written notice is given to City."

3. Other Insurance

"Any other insurance maintained by the City of Costa Mesa shall be excess and not contributing with the insurance provided by this policy."

If any of such policies provide for a deductible or self-insured retention to provide such coverage, the amount of such deductible or self-insured retention shall be approved in advance by City. No policy of insurance issued as to which the City is an additional insured shall contain a provision which requires that no insured except the named insured can satisfy any such deductible or self-insured retention.

5-7 SAFETY

5-7.1 Work Site Safety

5-7.1.1 General

[Add the following:].

Material or other obstructions shall not be placed within fifteen feet (15') of fire hydrants. Fire hydrants shall be made readily accessible to the Fire Department at all times.

5-7.8 Steel Plate Covers

5-7.8.1 General

[Add the following:].

All steel plate covers utilized for the project must be slide resistant. A non-slip coating will be required on the side of the steel plate that that will be utilized for the driving or walking surface.

SECTION 6 – PROSECUTION AND PROGRESS OF THE WORK

6-1 CONSTRUCTION SCHEDULE AND COMMENCEMENT OF THE WORK

6-1.1 Construction Schedule

[Replace the 1st Paragraph with the following:].

The Contractor's proposed Construction Work Schedule shall be submitted to the ENGINEER for approval within ten (10) working days after the date of the BOARD's execution of the Contract Agreement. The Construction Work Schedule shall be supported by written statements from each supplier of materials or equipment indicating that all orders have been placed and acknowledged, and setting forth the dates that each item will be delivered. The Construction Work Schedule shall provide sufficient detail to delineate the main milestones start and end dates for each activity with chronological relationships of all the activities of Work showing the number of working days required to complete the entire project within the Contract Days. The schedule shall also incorporate the requirements of Section 402-5 of the Standard Specifications to complete the Work within the Contract Days. Prior to issuing the Limited Notice-to-Proceed, the ENGINEER will schedule a preconstruction meeting with the Contractor to review the proposed Construction Work Schedule, delivery dates, activity milestone dates, arrange utility coordination, discuss construction methods and staging, and clarify inspection procedures.

The Contractor shall submit progress reports to the ENGINEER by the tenth day of each month. The report shall include an updated Construction Work Schedule. All revisions shall be completed within three days after review by the ENGINEER. The Contractor shall submit requests for changes in the schedule to the CITY for approval at least three (3) working days prior to performing any work. Any deviations from the original approved Construction Work Schedule shall be explained and identified in the updated Construction Work Schedule. Progress payments will be withheld pending receipt of any outstanding reports.

The Contractor shall furnish the ENGINEER with a 3-week look ahead-schedule in a tabular format at every weekly construction meeting. The 3-week look ahead schedule shall utilize the main milestones within the approved Baseline Construction Schedule with updates and include sub-activities.

[Add the following:].

6-1.3 Daily Report Submittal

Contractor shall submit daily reports to the CITY at the end of each working day. All forms shall be provided by the CITY. Any cost for this item shall be included in the various items of work and no other compensation will be allowed.

6-3 TIME OF COMPLETION

6-3.1 General

[Replace the 1st Sentence with the following:].

The Contractor shall begin the Work within **TEN (10) WORKING DAYS** after the date the Contract is executed by CITY unless a later start date is agreed upon by the CITY

and Contractor within written Limited Notice-to-Proceed and Notice-to-Proceed. The **INVESTIGATORY SITE WORK** shall be completed within **NINTY (90) CALENDAR DAYS** from the date set in the Limited Notice-to-Proceed and The **CONSTRUCTION SITE WORK** shall be completed within **TWENTY-FIVE (25) WORKING DAYS** from the date set in the Notice-to-Proceed or the first day of commencement of Work, whichever occurs first.

6-5 USE OF IMPROVEMENT DURING CONSTRUCTION

[Add the following:].

Should it become necessary, due to developed conditions, to occupy any portion of the Work before Contract is fully completed, such occupancy shall not constitute acceptance by the CITY of work by Contractor.

6-7 TERMINATION OF THE CONTRACT FOR DEFAULT

6-7.3 Notice of Termination for Default

[Replace the 1st Paragraph with the following:].

The ENGINEER will make the determination if the Contractor had failed to commence satisfactory corrective action within 5 working days after the receipt of the notice to cure, or to diligently continue satisfactory and timely correction of the default thereafter, and will take action as allowed by the Contract Documents.

6-7.4 Responsibilities of Surety

[Add the following:].

Within 3 working days of receipt of the written notice of termination for default, the Surety shall provide the services needed to maintain the project in accordance with the Contract Documents. The services shall maintain the existing traffic control in place and the maintenance of the project site until the Engineer's review and acceptance of the Surety's plan for course of action.

6-9 LIQUIDATED DAMAGES

[Replace the 1ST Paragraph with the following:].

The CONTRACTOR shall pay to the CITY the sum of **$525** per calendar day, for each and every calendar day's delay in finishing the Work in excess of the number of Working Days prescribed within these General Provisions and the Agreement, or per the direction of the Engineer. Liquidated damages are calculated per Chapter 12 of the latest edition of the Caltrans Local Assistance Procedures Manual (LAPM).

SECTION 7 – MEASUREMENT AND PAYMENT

7-3 PAYMENT

7-3.1 General

[Replace the 1ST Paragraph with the following:].

Payment for the various items listed on the Bid Proposal, as further specified herein, shall constitute full compensation to the Contractor for furnishing all material, tools, equipment, supplies, and manufactured articles, and for all labor, operations, and incidentals appurtenant to the items of Work and as specified and shown on the drawings, including all costs for compliance with the regulations of public agencies having jurisdiction, including Safety and Health Requirements of the California Division of Industrial Safety and the Occupational Safety and Health Administration (OSHA) of the U.S. Department of Labor. No separate payment will be made for any item that is not specifically set forth in the Bid Proposal. Costs arising from violations of regulations will be paid by the offending party to the extent that there will be no additional cost to the CITY.

When no bid item is provided for work/improvement shown or indicated on the plans and specifications, payment for such work/improvement will be considered to be included in various applicable items of work.

7-3.2 Partial and Final Payment

[Replace the 1st Paragraph in its entirety with the following:].

The closure date for the purpose of making partial progress payments will be the last day of each month. The Contractor may request, in writing, that such monthly closure date be changed. The ENGINEER may approve such request when it is compatible with the CITY's payment procedure.

[Replace the 2nd Paragraph in its entirety with the following:].

Each month, the Contractor shall meet with the Engineer, a minimum of three (3) working days prior to the submittal of the progress payment to the AGENCY, to finalize and receive approval regarding the measurement of the Work performed through the closure date and the estimated value of the progress payment based on the Contract Unit Prices or as provided for in the Standard Specifications. Any progress payment submitted without such approval will be considered incomplete and returned to the Contractor and no payment shall be considered until such approval is obtained.

[Replace the 3rd Paragraph in its entirety with the following:].

The amount retained and deducted by the BOARD shall be 5% of the progress estimates for all progress payments. No reduction in the amount of retention will be allowed. However, after 50% of the work has been completed, if the BOARD finds that satisfactory progress is being made, it may make any of the remaining progress payments in full for actual work completed. The final payment of the retention amount to the Contractor shall be made thirty-five (35) days after the date of the recording of the

Notice of the Completion of the work after it is accepted by the CITY. The 5% withheld from each progress payment shall not include monies withheld for stop notices or other withholding by the CITY. The monies withheld for stop notice and other withholdings shall be in addition to the 5% withheld for retention.

[Add to end of Section the following:].

Contractor shall comply with the requirements of Division 2, Part 1, Chapter 7, Section 7107 of the California Public Contract Code.

The lead time for processing invoices for the monthly progress payments approved by the ENGINEER for inclusion on the warrant list of the CITY is governed by the rules and regulations established by the Finance Department of the CITY. Monthly payments will be processed and paid in accordance with the rules and regulations established or revised by the said Finance Department.

The Contractor shall submit all weight tickets or volumes of all materials used in the construction to the ENGINEER for checking and verification prior to any payment. Failure to do so will postpone the payment to the Contractor, until the matter is resolved satisfactorily.

The weight or volume from submitted tickets must correspond to the work done in the field; if not, the City shall reject the work without compensation to the Contractor, and/or the Contractor shall be directed to replace that work at no additional costs to the City.

After completion of the Contract, the BOARD shall, upon recommendation of the ENGINEER, accept the Work as completed and authorize the Final Payment.

The Final Payment shall be the entire sum found to be due the Contractor after deducting therefrom all previous payments and all amounts to be kept and all amounts to be retained under the provisions of the Contract. All prior partial estimates and payments shall be subject to correction in the final estimate and payment.

No certificate given or payment made under the Contract, except the final certificate or Final Payment, shall be conclusive evidence of full or substantial performance of this Contract; and no payment shall be construed to be an acceptance of any defective work or improper material.

The acceptance of Final Payment by the Contractor shall release the CITY, the BOARD, and the ENGINEER from any and all claims or liabilities on account of work performed by the Contractor under the Contract or any alterations thereof.

The Contractor shall record, on the set of contract documents maintained at the job site, deviations which have been made from the Contract Documents or approved shop drawings – including buried or concealed construction and utility features which are revealed during the course of construction. Special attention shall be given to recording the horizontal and vertical location of all buried utilities that differ from the locations indicated, or which were not indicated on the Contract Documents. Said record documents shall be supplemented by detailed sketches as necessary or directed, to indicate fully the work as actually constructed.

Requests for partial payments shall not be approved until the record documents are brought up to date. Also, request for final compensation shall not be approved until all the variations between the work as constructed and as originally shown in the Contract Documents have been properly recorded and delivered to the City, after approved by the Engineer.

[Add the following:].

7-3.2.1 Prompt Progress Payment to Subcontractors

Contractor shall comply with the requirements of Division 2, Part 1, Chapter 7, Section 7200 of the California Public Code.

The CONTRACTOR agrees to pay each subcontractor under this Agreement for satisfactory performance of its contract no later than 7 days from the receipt of each payment the CONTRACTOR receives from CITY.

The CONTRACTOR agrees further to release retainage payments to each subcontractor within 7 days after the retention payment is received by the CONTRACTOR.

Any delay or postponement of payment from the above referenced time frame may occur only for good cause following written approval of the CITY. Any violation of this provision shall subject the violating prime contractor or subcontractor to the penalties, sanctions and other remedies specified in Section 7108.5 of the Business and Professions Code. This clause applies to both DBE and non-DBE prime contractors and subcontractors.

City will be strictly monitoring the Contractor for prompt payment to all subcontractors.

[Add the following:].

7-3.2.2 Prompt Pay Monitoring and Enforcement of Progress Payments

The City of Costa Mesa will use the following monitoring and enforcement mechanisms to ensure that all subcontractors, including DBE's, are promptly paid.

A. The City will strictly monitor the prime contractor or subcontractor(s) for prompt release of progress payments for all subcontracted work as follows:

1. The effective date of release is the date the City releases the check to the prime contractor by mailing or hand delivery at the City of Costa Mesa (has to be requested in writing ahead of time).

2. Prime contractor or subcontractor(s) to provide verification in writing that the subcontracts have been paid within 7 days or the time period agreed, from the effective date of release.

3. City may contact subcontractor(s) to confirm receipt of progress payment amount and if it was received within 7 days or the time period agreed from the

effective date of release.

B. If the prime contractor or subcontractor(s) is found to be in default of Federal or State Codes concerning prompt payment to subcontractors, City will enforce the following besides the disciplinary action, sanctions and penalties imposed per the codes:

1. City will withhold 150% of the monies due to the subcontractor(s) from the prime contractor's next progress payment.

2. City may also elect to make the payment(s) directly to the subcontractor(s) without the prime contractor's approval for the remainder of the contract.

7-3.3 Delivered Materials

[Replace in its entirety with the following:].

The cost of materials and equipment delivered, but not incorporated in said work, will not be included in the progress payment estimate unless otherwise provided in these Specifications.

Materials delivered, but not in place, will not be classed as work done, except as otherwise provided in these Specifications.

All materials shall be nontoxic and shall not contain asbestos and hazardous substances as established by applicable laws.

7-3.4 Mobilization

[Replace in its entirety with the following:].

Mobilization shall consist of all preparatory work and operations. It shall include, but not be limited to, the movement of personnel, equipment, materials and incidentals to the project site necessary for work on the project. The mobilization shall include all other work and operations, which must be performed.

Mobilization shall also include the time, materials, and labor to move the necessary construction equipment to and from the job site and the project administration costs during the entire contract period.

This work shall include, but not be limited to protect-in-place and/or relocation of the facility to accommodate the construction of an improvement; including resetting curb drains through new curbing.

The Contractor shall provide supervisory personnel to keep the construction site in a safe condition and all other related work as required at all times. These requirements shall also apply to all non-working days during construction period. The Contractor is responsible for securing an adequate storage site for equipment and materials.

The Contractor shall have on the work site at all times, as his agent, a competent English speaking superintendent capable of reading and thoroughly understanding the plans, specifications, and other related documents.

7-3.4.1 Travel Route for Trucking and Equipment

Plans indicating the travel route for the Contractor's equipment movement in and out of the work site must be submitted concurrently with the Haul Route Plan (Section 2-5.4) to the ENGINEER at the pre-construction meeting for approval prior to commencement of any work. The travel route plans, which meet the City's requirements, will be approved and returned to the Contractor; otherwise, further revisions are required until they are acceptable to the City. The approved travel plans shall be strictly adhered to by the Contractor during all phases of the construction.

Any deviation from these requirements is not permitted. All the Contractor's operations will be ceased at once if the Contractor violates any of these requirements. No further payments will be made to the Contractor until problems are resolved according the City's requirements.

7-3.4.2 Construction Sequence/Order of Work

In order to minimize the inconvenience to adjacent buildings, businesses, and facilities that will remain in operation, the contractor shall construct the project and sequence the work in such a manner as to minimize impacts to the ongoing operation of adjacent buildings, businesses, and facilities. The proposed and subsequently approved Construction Schedule will be reflective of this requirement.

7-4 PAYMENT FOR EXTRA WORK

7-4.2 Basis for Establishing Costs.

7-4.2.1 Labor

[Add the following:].

The compensation for employer's payments of payroll taxes; workers compensation insurance; liability insurance; health and welfare; pension; vacation; apprenticeship funds; other direct costs resulting from Federal, State, or local laws; and for assessments or benefits required by lawful collective bargaining agreements to be applied to the actual cost for wages shall be **23 percent** for regular time and overtime.

7-4.3 Markups

7-4.3.1 Work by the Contractor

[Replace in its entirety with the following:].

The allowance for overhead and profit to be added to the Contractor's costs shall be as follows:

Labor:	20%
Materials:	15%
Contractor Owned Equipment	15%
Equipment Rental	10%*
Other Items and Expenditures	10%

To the sum of the costs and markups provided for in this section, 1 percent shall be added as compensation for bonding.

* Equipment Rental rates shall be based on the latest applicable Caltrans Equipment Rental Rates.

7-4.3.2 Work by a Subcontractor

[Replace in its entirety with the following:].

When all or any part of the extra work is performed by a Subcontractor, the markup established in 3-3.2.3(a) shall be applied to the Subcontractor's actual cost of such work. A markup of (5) percent on subcontracted portions of added work may be added by the Contractor.

No markups will be allowed for second tier or higher subcontractors.

[Add the following:].

7-6 SUMMARY OF PUBLIC CONTRACT CODE § 9204

The following procedure will apply to any claims by the Contractor on the City:
A "claim" is a separate demand on the City by a contractor on a public works project and sent by registered mail or certified mail with return receipt requested, for one or more of the following:

- A time extension, including relief from penalties for delay
- Payment by the City of money damages under the terms of the contract
- Payment of an amount that is disputed by the City

<u>Initial Review</u>

The claim must be supported by appropriate documentation. The City has 45 days within which to review the claim and provide the contractor with a written statement identifying the disputed and undisputed portions of the claim. If the City does not issue a written statement, the claim is deemed rejected in its entirety. The City will pay any undisputed portion of the claim within 60 days of issuing the statement.

Meet & Confer

If the contractor disputes the City's written response, or if the City does not issue one, the contractor may request in writing an informal conference to meet and confer for possible settlement of the claim. The City will schedule the meet and confer conference within 30 days of this request and provide a written statement identifying the remaining disputed and undisputed portions of the claim within 10 business days of the meet and confer. The City will pay the undisputed portion within 60 days of issuing this statement.

Mediation

With respect to any disputed portion remaining after the meet and confer, the City and contractor will submit the matter to nonbinding mediation, agree to a mediator within 10 business days after issuing the written statement, and share mediation costs equally. If mediation is unsuccessful, then the terms of the public works agreement and applicable law will govern resolution of the dispute.

Miscellaneous Provisions

Amounts not paid by the City in a timely manner bear interest at 7% per annum. Subcontractors may submit claims via this procedure through the general contractor. The City and contractor may waive the requirement to mediate, but cannot otherwise waive these claim procedures.

SECTION E

[Add the following Section:].

PART 1.1
SPECIAL PROVISIONS

101-1 GENERAL

Additions/Modifications to Standard Specifications

The following additions are made to the latest edition of the "Standard Specifications for Public Works Construction" (The "Greenbook"), and the General Provisions stated within the "Standard Specifications" of this Project. Should there be a conflict between any of these provisions; the Special Provisions shall have precedence.

All work shall be performed in conformance with the latest edition of the Uniform Building Code as adopted by the City of Costa Mesa. The electrical, plumbing, and fire codes, and other regulations as adopted by the City of Costa Mesa Building Official shall apply to this project.

Where referenced in these specifications, the latest edition of the "City of Costa Mesa Standard Drawings" and the "Work Area Traffic Control Handbook (WATCH)" published by Building News, Inc., shall also apply.

Payment for compliance with the following provisions shall be included in the various bid items of work unless otherwise modified in the special provisions section. No additional compensation will be allowed.

If the item of work is identified within the Proposal section of these Specifications, then the following bid item descriptions will provide the corresponding bid item numbering within each corresponding section of the Standard Specifications under the Subsection entitled "Measurement and Payment" or "Payment". All other sections and subsections shall conform to the Standard Specifications unless modified herein.

The unit prices and lump sum amounts to be paid for under the bid items listed in the Proposal shall include full compensation for furnishing all labor, materials, tools, equipment and incidentals necessary for the completion of the work and for performing all work contemplated and embraced under the Contract, in accordance with the Plans and Contract Documents. This shall include the Contractor's costs involved with bonding, insurance, worker's compensation, overhead, financing, obtaining required permits and permit fees, mobilization, traffic control, public convenience and safety, protective barricading/fencing, sanitary facilities, storage of equipment and materials, security against theft and vandalism, project site maintenance, dust and runoff control, clean-up including all costs for compliance with the regulations of public agencies having jurisdiction, including Safety and Health Requirements of the California Division of Industrial Relations and the Occupational Safety and Health Administration (OSHA) of the U. S. Department of Labor, and all other items related to the work.

Payment for compliance with the following provisions shall be included in the various bid items of work unless otherwise modified in the special provisions section. No additional compensation will be allowed.

No separate payments will be made for any items that are not specifically set forth in the Bid Proposal. Payments for any such items are included in various bid items of work.

Costs arising from violations of regulations will be paid by the offending party to the extent that there will be no additional cost to the City.

Upon notice of award, the successful bidder may submit a schedule of values that breaks down lump sum bid items of work into separate operations to establish additional payment categories and line items of work to be completed by the Contractor. The schedule of values shall be based on the awarded bid items and may be requested by the City, or the Contractor. The schedule of values shall be provided by the Contractor for review by the City prior to commencement of the work.

Payment for unit price work shall be made for the actual quantities of Contract Items removed, constructed, or disposed of in accordance with the Plans and these Specifications. Measurement of Unit Price work shall be specified in the Standard Specifications, Section 7-1, "Measurement of Quantities for Unit Price Work." Payment for Lump Sum work shall be paid for at the price indicated in the Bid, in accordance with the Standard Specifications, Section 7-2, "Lump Sum Work."

Payment for all work shall be included in the various bid items. No additional compensation shall be made therefore. Work associated with each bid item shall include, but not be limited, to the bid descriptions set forth herein.

101-2 POLICE DEPARTMENT UNDERGROUND STORAGE TANK CLOSURE

101-2.1 General - Work to be Performed

The scope of work generally consists of providing environmental testing, utility investigation, structural assessment, geotechnical assessment, reporting, plans, permitting, and construction required to safely close the existing Police Department Underground Storage Tank.

The closure of the UST will be approached as an “abandon in place” project. **However, structural assessment and environmental testing may reveal unforeseen circumstances that could require additional remediation and the removal of the tank.**

The initial project approach will be to abandon the underground storage tank, in place and the unit prices and bid schedule include the following project scope of work:

- Provide engineered plans/documents, permits, and fees as required by Orange County Health Care Agency Environmental Health Division (OCHA) to permit and perform the work.
- Coordinate and obtain permits from the Orange County Fire Authority or local fire department and local Building Department. As well as the South Coast Air Quality Management District (SCAQMD).
- Complete environmental testing while tank is in place per approved sample plan as specified by the Orange County Health Care Agency (OCHCA), Environmental Health Division’s “DRAFT -

Standard Operating Procedure for Closure in Place of an Underground Storage Tank", Appendix "A1"; and as specified in the OCHCA, Environmental Health Division "Guidelines for the Removal of Underground Storage Tanks", Appendix "A2".

- Reference operating permit in Appendix "A3" and existing plans in Appendix "A4" as part of structural and geotechnical analysis/reports to develop OCHCA approved Tank closure plan.
- Provide assesments from structural engineer, environmental engineer, and geotechnical engineer that provide recommendation for Tank closure.
- Mobilize for project and have job staffed to allow for weekly progress meetings.
- Set temporary fencing and approved temporary traffic control as required.
- Sawcut, break, dismantle, excavate, remove, and dispose/stockpile materials above tank including but not limited to existing concrete walkway, existing risers, piping runs, top of tank, tank top equipment, and dirt.
- Excavate and shore around the underground tank as required. Perform SCAQMD Rule 1166 monitoring during excavation. Protect trenching and excavations throughout project.
- Safely stockpile and protect excavated material on site for re-use.
- **Abandon Tank** - Triple rinse with a OCHCA approved detergent and cleaning method to inert tank and certify clean.
- Backfill 6,000-gallon double wall fiberglass underground storage tank, with OCHCA approved slurry mix.
- Provide necessary environmental compliance, inspections, testing, borings, and an authorized tank closure report.
- Remove unused vent stack from the side of the building.
- Backfill the excavation with the existing backfill material and provide compact subgrade and finish grade.
- Remove testing equipment/facilities upon completion of environmental compliance.
- Form, dowel in #4 rebar to the existing concrete, and patch back any walkway concrete that was removed at the side of the building.
- Landscaping to match the existing parkway, shall replace where concrete was removed from the parkway above the tank.
- Provide close out package, and certified payroll records.
- Upon notice of award, the successful bidder shall provide a schedule of values, submittals, and comprehensive project schedule for review and approval by the City's Public Services Department.

101-2.2 Measurement and Payment of Bid Items

BID ITEM NO. 1: *MOBILIZATION AND DEMOBILIZATION*

Contractor shall provide all labor, equipment, and materials for the construction of the specific improvements and repairs established with these specifications, that include but may not be limited to items listed in section 2-1 of the General Provisions and upon referencing the project documents hereon and in the project appendices. Mobilization shall be considered full compensation for obtaining all business licenses and permits, as required for the entire project, from all related agencies, including, but not limited to, utility companies, private and public agencies and the CITY; and complying with the requirements specified in those licenses and permits; coordination, field office facility, all required submittals specified within these Specifications, and incidentals necessary to perform all related items of work unless otherwise stated in these special provisions. Progress payments for the Mobilization and Demobilization bid item shall be paid for in accordance with the completion percentage of the Project to the Contractor and shall include the cost of such mobilization/demobilization and administration during the entire Contract period. No additional compensation will be allowed.

Mobilization shall include compliance with water and air quality laws; maintaining dust control at all times; furnishing all water required for the construction work; protection of utilities, survey monuments, trees, fences, walls, landscaping and other facilities.

Mobilization shall include all related "de-mobilization" costs, including the removal of any remaining Underground Service Alert (USA) utility markings or other construction paint markings, by means of wet sand blasting or other pre-approved method on the sidewalk, curb/gutter and pavement.

Mobilization shall include all work and related work shown on the plans or described in the contract documents, which is not compensated for in a specific bid item of work. This work shall include, but not be limited to protect-in-place and/or relocations of the facility to accommodate the construction of an improvement, and removal of existing planters, trees, shrubs, and bushes.

Contractor shall confine his operations and work area to the street right-of-way and is responsible for securing an adequate storage site for equipment and materials. No encroachment into private property will be permitted without prior written consent of the property owner and ENGINEER. Obtaining this consent will be the responsibility and at the cost of the Contractor. The Contractor shall provide supervisory personnel to keep the construction site in a safe condition at all times.

Contractor shall protect the existing pavment and shall not store equipment on the street. The location of any flat bed trucks used to store equipment is subject to review an approval by the City.

The Contractor shall submit a Construction Schedule at least ten (10) working days prior to commencing work. All revisions shall be completed within three (3) days after review by the City. The Contractor shall submit requests for changes in the schedule to the City for approval at least three (3) working days prior to performing any work.

Measurement and Payment for **Mobilization and Demobilization** shall be per Lump Sum (L.S.) price bid item for all work performed and shall include all project administration, labor, equipment, and materials as required to complete the contract work as described hereon.

No additional compensation will be allowed.

BID ITEM No. 2: *PERMITTING*

Contractor shall provide necessary plans, documents, labor, equipment, and materials to complete all permitting and coordinate all inspections as required by the Orange County Health Care Agency's (OCHCA) Environmental Health Division to perform the work in the contract. The Contractor shall also obtain permits, provide documentation, applications, and coordinate any inspections from the City's Fire Department, the City's Building & Saftey Division, and the South Coast Air Quality Management District (SCAQMD).

Measurement and Payment for **Permitting** shall be per Lump Sum (L.S.) price bid item for all permitting, inspections, coordination, labor, equipment, and materials required to complete the contract work described hereon.
No additional compensation will be allowed.

BID ITEM No. 3: *ENVIRONMENTAL COMPLIANCE*

Contractor shall conduct all testing and environmental engineering related to Bid Item No. 3 while the tank is still in place. The engineered environmental testing report and soil sample analysis that is conducted as part of the environmental compliance shall be based on testing and soil samples collected by the contractor. Contractor shall collect up to (8)-soil samples to be used for soil contamination analysis.

Contractor shall provide/obtain necessary environmental compliance, including but not limited to plans, sampling, testing, reporting, inspections, certifications, tank closure reports, labor, equipment, and materials to satisfy all environmental requirements as set forth by the Orange County Health Care Agency (OCHCA), Environmental Health Division's "Standard Operating Procedure for Closure in Place of an Underground Storage Tank" (Exhibit "A1"), and as specified in the OCHCA, Environmental Health Division "Guidelines for the Removal of Underground Storage Tanks" (Exhibit "A2"). Contractor shall provide updates regarding the Environmental Compliance by scheduling bi-weekly progress meetings with the ENGINEER.

Measurement and Payment for **Environmental Compliance** shall be per Lump Sum (L.S.) price bid item for all environmental sampling, testing, reporting, coordination, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 4: *SITE INVESTIGATIONS AND UTILITY LOCATION*

Contractor shall conduct all testing and investigations related to Bid Item No. 4 while the tank is still in place and provide both the geotechnical engineer's report and a structural engineer's report to evaluate existing conditions. Testing conducted by the contractor for the engineering analysis may include exploratory borings, providing utility locations via potholing/GPR (Ground Penetrating Radar), as well as collecting soil samples to be used for soil mechanics anlysis. Contractor shall provide updates regarding the Site Investigations and Utility Location by scheduling bi-weekly progress meetings with the ENGINEER.

Reference operating permit in Appendix "A3" and existing plans in Appendix "A4" as part of structural and geotechnical analysis/reports and to develop OCHCA approved tank closure plan.

Upon review of the geotechnical and structural engineering reports City shall confirm and finalize the process by which the tank closure will take place and Contractor shall coordinate tank closure per the OCHCA regulations.

Measurement and Payment for **Site Investigatation and Utility Location** shall be per Lump Sum (L.S.) price bid item for all geotechnical and structural engineering, engineering reports, utility investigations, utility reporting, OCHCA coordination, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 5: *SITE PREP AND EXCAVATIONS*

Site prep includes saw cutting, breaking, removing, and disposing of the existing concrete on site adjacent to the building, concrete curb, gutter, sidewalks in the public right –of-way, and materials above and around the tank; as well as dismantling and disposing of all removed risers, piping runs, and tank top equipment. The existing vent stack that is no longer in operation shall be removed from the building and disposed of by the Contractor as part of this work.

All excavations shall be performed in conformance with SCAQMD Rule 1166 monitoring and contractor shall protect all trenching and safely stockpile and protect excavated material on site for testing and possible re-use until it can be confirmed the material is safe for export and disposal by Contractor.

Measurement and Payment for **Site Prep** and Excavations shall be per Lump Sum (L.S.) price bid item for all site prep, excavation, stockpile, removals, demolition, disposal of materials, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 6: *ABANDON TANK IN PLACE*

Contractor shall triple rinse with an OCHCA approved detergent and method, make inert, certify clean, and backfill 6,000 gallon double wall underground storage tank as required by the OCHCA, Environmental Health Division per "Draft Guidelines for Closure in Place of an Underground Storage Tank" per appendix "A1".

As part of the abandonment Contractor shall disconnect, remove, transport, and safely dispose of all the the associated tank piping per OCHCA "Guidelines for the Removal of Underground Storage Tanks", Appendix "A2".

All necessary environmental compliance, inspections, testing, borings, and authorized tank closure reports shall be obtained and coordinated by the Contractor as part of Bid Item No.3.

Measurement and Payment for **Abandon Tank In Place** shall be per Lump Sum (L.S.) price bid item for all cleaning, slurry backfill, hazardous material disposal, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 7: *BACKFILL*

Contractor shall backfill and compact the site with existing backfill material and provide compaction reports and Crushed Miscellaneous Base (CMB) as required to prepare the site for finish grade concrete and landscaping.

Measurement and Payment for **Backfill** shall be per Lump Sum (L.S.) price bid item for all backfill, compaction, engineered compaction reports, CMB, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 8: *RESTORE SITE*

Contractor shall form walkway concrete, dowel in #4 rebar to existing concrete, pour, and finish all walkway concrete that was removed from alongside the Police Department Building. Where concrete was removed from directly above the tank, in the parkway, grades shall be prepared, and grass parkway landscaping to match existing parkway landscaping shall be installed. Contractor shall modify existing irrigation system to include added parkway landscaping. Any sidewalk, curb & gutter, or damaged facilities in the public right-of-way shall be replaced, in kind, per City/Agency Standards. As required, where building vent stack was removed, the existing building shall be finished to match adjacent building finish.

Measurement and Payment for **Restore Site** shall be per Lump Sum (L.S.) price bid item for all grading, formwork construction, CMB, rebar, concrete placement, concrete finishing, landscaping, irrigation, general site repairs, labor, equipment, and materials required to complete the contract work described hereon.

No additional compensation will be allowed.

BID ITEM No. 9: *ALLOWANCES*

The Contractor acknowledges that this bid item will only be used at the discretion of the ENGINEER. The allowance for this line item is as shown within the Proposal Section of these Specifications.

At the direction of the ENGINEER, Contractor shall provide pricing, documentation, and justification for all labor, equipment, and materials for any additional work requested beyond the base Scope of Work established within these specifications.

Upon review of pricing, and at the direction of the ENGINEER, the Contractor shall provide labor, equipment, and materials for the additionally priced scope beyond the base Scope of Work established within the Project Plans and Specifications.

The Police Department Underground Storage Tank Closure will be approached as an “abandon in place” project. OCHCA protocols, structural assessment, utility investigations, and environmental testing may reveal unforeseen circumstances that require additional soil remediation that may ultimately require the removal of the underground storage tank (UST) and warrant additional environmental testing.

The Contractor acknowledges this bid item will be used at the discretion of the ENGINEER for the following unforeseen circumstances.

- Tank Removal and Disposal
- Placement and removal of engineered shoring for tank removal.

- Mitigating unforeseen structural deficiency.
- Mitigating unforeseen hazardous materials
- Mitigating unsuitable materials/soils
- Mitigating unmarked utilities
- Mitigating any other unknown issues and circumstances

Measurement and Payment for “Additional Work Items” shall be paid per Forced Account (F.A.) for all work performed pursuant to Section 7-4.2 of these specifications and shall include all labor, equipment and materials as required to complete the work as directed by the Engineer.

101-3 ALLOWANCES – ADDITIONAL WORK ITEMS

101-3.1 General

This work item entails work beyond the Scope of Work established within the Specifications, and Standard Specifications as directed by the ENGINEER with a specified Contract allowance

Allowance to be included in the total bid amount as identified as follows. Use of the allowance will be at the sole discretion of the City and must be authorized in writing at the discretion of the City. Any money used from the project allowance will be authorized via an Allowance Disbursement Form at the City’s sole discretion. Any amount of money remaining in the Allowance line item upon completion of the Project will be deducted from the Contract by Deductive Change Order for the full amount(s) remaining therein. The Contractor has no beneficial interest in, and/or claim to, the Allowances and hereby disclaims any and all such interests.

Additional work items include work that will only be used at the discretion of the ENGINEER. At the discretion of the ENGINEER, the Contractor shall provide all labor, tools, equipment, materials and incidentals for the extra work beyond the scope of work established within the Contract documents. Work may include, but not be limited to, delivery of additional newsletters; disposal of materials, potholing, furnishing and installation of informational signs, and related work, and will only be performed, if required, and approved by the ENGINEER. The Contractor acknowledges that this allowance will only be used at the discretion of the City. Contractor shall be paid at force account or at agreed prices for all work performed within this allowance.

[Add the following:].

400-1.1 DRAINAGE CONTROL : RESPONSIBILITES

The CONTRACTOR shall be responsible for any damage to any portion of the work occasioned by failure to provide proper drainage control prior to the completion and acceptance of the work.

400-1.2 DRAINAGE CONTROL : EXCAVATION DEWATERING REQUIREMENTS

Unless otherwise directed in these specifications, the CONTRACTOR shall provide and maintain ample means and devices with which to promptly remove and properly dispose of water entering the excavations or other parts of the work at all times during construction. Dewatering shall be accomplished by methods which will ensure a dry excavation and preservation of the final lines and grades of the bottoms of excavations. The methods may include sump pumps, deep wells, well points, suitable rock or gravel placed below the required bedding for draining and pumping purposes, temporary pipelines, and other means.

Standby pumping equipment shall be on the job site. A minimum of one standby unit shall be available for immediate installation should any well unit fail. The design and installation of well points or deep wells shall be suitable for the accomplishment of the work. Drawings or details indicating the proposed dewatering system shall be submitted to the CITY for review.

The CONTRACTOR shall dispose of the water from the work in a suitable manner without damage to adjacent property.

Conveyance of the water shall be such as to not interfere with traffic flow or treatment facilities operations. No water shall be drained into work built or under construction without prior consent of the ENGINEER.

Water drained from any facilities shall comply with local agency and health department requirements including declorinating any water prior to discharge.

Water shall be disposed of in such a manner as not to be a menace to the public health and such disposal shall be performed in accordance with Environmental Protection Agency and State Water Quality Control Board standards (NPDES permit). Any testing and reports required under NPDES permit shall be performed by the CONTRACTOR and submitted to the appropriate agency for approval at no additional cost to the CITY.

400-1.3 CLEAN-UP AND DUST CONTROL

All surplus materials and waste debris shall be removed from the site of the work within five (5) days after completion of the work causing the surplus materials.

Contractor shall utililized misting or water spray as means of dust control during construction.

Failure of the CONTRACTOR to comply with the ENGINEER'S clean-up dust control orders may result in an order to suspend work until the condition is corrected and, after giving notice to the CONTRACTOR, the ENGINEER may order the condition corrected by others. All costs thus incurred shall be deducted from the amount to be paid to CONTRACTOR. No additional compensation will be allowed as a result of such suspension.

No separate payment will be made for any work performed nor material used to control dust resulting from CONTRACTOR's performance of the work or from public traffic, either inside or outside the right-of-way. Full compensation for such dust control will be considered to be included in the prices paid for the various items of work involved.

SECTION 402 – UTILITIES

402-1 LOCATION

402-1.1 General

[Add the following:].

Locations of utilities shown on plans are approximate only and are based on a search of available records.

Attention is directed to the possibility of utility mains or laterals within the project limits. The CONTRACTOR shall have the locations of the various utility facilities within reconstruction areas marked on the surface prior to construction and protect them during the removal and reconstruction procedures. The CONTRACTOR shall contact the City Transportation Services Department to locate traffic signal conduit within the reconstruction areas.

Prior to commencing any other work, CONTRACTOR shall carefully excavate and determine precise locations and depths of all utilities, including service connections, shown on the plans and marked in the field, which may affect or be affected by CONTRACTOR's operations. This work shall be done in accordance with Section 402-1.1 of the Standard Specifications. CONTRACTOR shall not be compensated for any delays or extra work brought about by his failure to perform the above-mentioned work. CONTRACTOR shall be responsible for any damage to existing utilities shown on the plans pursuant to its location operations as required under this subsection of the Standard Specifications.

Upon completion of the Project, the CONTRACTOR shall be required to remove, to the satisfaction of the ENGINEER, all utility locator markings and utility tie-out paint markings that either the CONTRACTOR, the CITY or utility companies make during the course of the work from the surfaces of sidewalks, driveway approaches, curb and gutters, using the removal method acceptable to the ENGINEER. Any damage to the existing improvements due to CONTRACTOR'S removal operation, shall be included in the various applicable items of work, and no additional compensation will be allowed therefor.

The CONTRACTOR shall notify owners of the utility companies at least two (2) working days in advance of any work (See Subsection 402-4 of these Special Provisions for utility contact information).

402-1.2 Payment

[Replace with the following:].

Payment for utility location by the CONTRACTOR shall be included in the bid prices for the various items of work requiring utility location and no further compensation will be allowed.

402-2 PROTECTION

[Add the following:].

The CONTRACTOR shall be responsible for protecting and supporting all existing utilities and maintaining the location of and access to all gate valves during construction. When damage to existing utilities is caused by the CONTRACTOR's operations, the CONTRACTOR shall, at his expense, repair or replace damaged facilities promptly, in accordance with all applicable sections of the Standard Specifications and the standards of each affected utility. Should the CONTRACTOR fail to perform the required repairs or replacements, the cost of performing such repairs or replacement by others shall be deducted from any monies due or to become due the CONTRACTOR.

402-2.1 Payment

Payment for utility protection by the CONTRACTOR shall be included in the bid prices for the various items of work requiring utility protection and no further compensation will be allowed.

402-4 RELOCATION

[Add the following:].

Any miscellaneous utilities to be relocated by the CONTRACTOR, as indicated on the Plans, shall be relocated in a workmanlike manner, and all such work shall be done only at such times which are acceptable to the utility owner. The CONTRACTOR shall schedule its relocation work in cooperation with the utility owner and shall be responsible for any costs resulting from the CONTRACTOR's failure to do the work at times which are acceptable to the owner. The CONTRACTOR shall notify owners of the following companies at least two (2) working days in advance of any work:

AT&T (right-of-way) Valentina Gipson 3939 E Coronado St, Rm 2030 Anaheim, CA 92807 (o) 714-618-9132 Email: vk3921@att.com	**Cost Mesa Sanitary District** Javier Ochiqui, Management Analyst 290 Paularino Avenue Costa Mesa, CA 92626 (o) 949-645-8400 Email: jochiqui@cmsdca.gov

Where existing utility main lines and conduits (excluding sewer main lines) and all utility service lines (excluding sewer laterals) are to be relocated or declared abandoned by the affected utility companies, the CONTRACTOR shall be responsible for contacting the respective utility representatives for coordinating the relocations and for determining the abandonments. The CONTRACTOR shall proceed with excavation in such a manner that will allow utility companies adequate and reasonable time to relocate service lines. The CONTRACTOR shall not be compensated for any delays caused by failure to coordinate the above work with utility companies.

PART 5
PIPELINE SYSTEM REHABILITATION
(No Addtions or Modifications)

PART 6
TEMPORARY TRAFFIC CONTROL

SECTION 600 – ACCESS

600-1 GENERAL

[Add the following:].

600-1.1 NOTIFICATION AND ACCESS

Prior to restricting normal access from public street to adjacent properties, the CONTRACTOR shall notify each property owner or owner's agent, informing them of the nature of the access restriction and the approximate duration of the restriction. The CONTRACTOR shall make every effort possible to minimize such restrictions.

Deliveries shall be conducted with appropriate flagmen and traffic controls.

Trenches left open overnight shall be bridged in a safe and acceptable manner at all driveways and walkways to provide safe access.

A minimum of one four (4) foot wide pedestrian walkway shall be maintainned and safely delineated along each public street and through areas accessibale to the general public at all times during construction.

PART 7
STREET LIGHTING AND TRAFFIC SIGNAL SYSTEMS
(No Addtions or Modifications)

PART 8
LANDSCAPING AND IRRIGATION
(No Addtions or Modifications)

SECTION G

APPENDIX “A1”

Orange County Health Care Agency (OCHCA), Environmental Health Division

DRAFT - Standard Operating Procedure for Closure in Place of an Underground Storage Tank

County of Orange, Health Care Agency, Environmental Health
1241 E. Dyer Rd., Ste. 120., Santa Ana, CA 92705
(714) 433-6000

Standard Operating Procedure

Closure in Place of an Underground Storage Tank

These guidelines apply to the owner of an underground storage tank (UST) subject to the permanent closure requirements of the California Code of Regulations (CCR) Title 23, Division 3, Chapter 16, Underground Storage Tank Regulations, Article 7. Closure Requirements and their agents, who are closing a UST in place.

1. Obtain written approval for closure in place from the Orange County Fire Authority or local fire department and City Building Department prior to initiating a closure in place application with Environmental Health.

2. Submit a completed Facility Modification Application to Environmental Health. Applications may be obtained in person at the address provided below, or by calling Environmental Health at (714) 433-6000. The application should be submitted at least 30 calendar days prior to the expected date of the UST closure activity. The following must be submitted with the application:

    a. A copy of a letter of approval from the Orange County Fire Authority or local fire department and City Building Department, and

    b. Four (4) sets of closure plans. Closure plans must include:

        i. A site location map,

        ii. A plot plan that:

            - Shows existing structures, utilities and all existing USTs and associated piping,
            - Identifies those USTs to be closed in place,
            - Clearly identifies the entire length of any piping proposed for closure in place, and
            - Includes the size of the USTs to be closed and the types of hazardous substances that have been stored in them.

        iii. A sampling plan that meets the requirements of the California Code of Regulations (CCR), Title 23, Division 3, Chapter 16, Article 7. Closure Requirements, Section 2672 (d), including the following:

            - Proposed locations of borings,
            - Boring method (e.g., hollow stem auger, direct push, etc.),
            - Sampling collection protocol,
            - Number of samples, and
            - Sampling intervals and depth.

DRAFT

Note: Where directed by Environmental Health, the borings drilled for UST closure are also to confirm the depth to groundwater. If the depth to groundwater is less than 30 feet from the bottom of the UST, then a groundwater investigation will be required.

3. The applicant must apply for and obtain appropriate permits from the Orange County Fire Authority or local fire department, County Planning and Development Services Department or city building department, and the South Coast Air Quality Management District (SCAQMD).

4. Once the closure plans are approved and appropriate permits issued, the applicant is responsible for scheduling an onsite inspection with Environmental Health and a concurrent inspection with the Orange County Fire Authority or local fire department for inspection of the UST closure and oversight of soil sampling (see Section 6 below regarding soil sampling). To schedule an appointment with Environmental Health's Hazardous Materials Mitigation Section call a minimum of 48 hours prior to the desired appointment.

5. When closing a UST in place, the owner of the UST must comply with applicable provisions of the CCR Section 2672 (b) & (c) which include the following:

   a. All residual liquid, solids, or sludges in the UST shall be removed and disposed of as hazardous waste or recyclable material;

   b. The UST shall be completely filled with an inert solid approved by the Orange County Fire Authority or local fire department;

   c. If the UST(s) contained a hazardous substance that could produce flammable vapors at standard temperature and pressure, then the UST shall be inerted to levels that shall preclude explosion or to such lower vapor levels as may be required by the Orange County Fire Authority or local fire department. (Note: A representative from the Orange County Fire Authority or local fire department must be present prior to initiating this procedure.), and;

   d. All piping associated with the UST closure shall be removed and disposed unless its removal may damage significant structures, or there is other piping presently being used and contained in the same trench, in which case, the piping to be closed shall be emptied of all contents and capped.

6. Per CCR Section 2651 (d), the owner of the UST must demonstrate upon closure that no unauthorized release has occurred. This demonstration is based on sensory observations, monitoring equipment readings, soil sample analysis and/or water sample analysis. Sample collection points are to be determined as follows:

   a. Environmental Health staff must be onsite to observe pipeline conditions and direct sampling in trenches where pipelines are to be removed. The area beneath the UST(s) to be closed in place and any associated piping to be closed in place must be assessed for an unauthorized release through the placement of borings and soil sampling approved in the sampling plan. Environmental Health staff must be onsite to oversee the placement of the borings and sample collection;

   b. Samples are to be collected, handled and analyzed per CCR Section 2649 and as indicated below:

DRAFT

i. Sample collection activities are to be performed by staff provided by the project consultant or the laboratory doing the sample analysis. The laboratory doing the sample analysis or the project consultant must provide the sample collection supplies required to facilitate the approved sampling protocol. A cooler or ice chest with ice is required to be present onsite so that the samples may be chilled immediately after sampling. When a sample is collected, an identifying label should be attached and the sample placed in a plastic bag where needed to avoid water damage to the label;

ii. The samples should be transported, per arrangements made by the tank owner, to a State Certified Laboratory immediately after sampling accompanied by the Chain of Custody form provided by Environmental Health. The receiving laboratory is to indicate on the Chain of Custody form in the designated laboratory section whether the samples were received in a chilled state and whether County seals were intact upon arrival; and,

iii. Samples collected at diesel or gasoline storage sites must be analyzed by an appropriate method for total petroleum hydrocarbons [TPH (GC/FID)] or total purgeable petroleum hydrocarbons [TPPH (GC/MS)] as diesel and/or gasoline, and by EPA Method 8260B to identify benzene, toluene, ethylbenzene, total xylenes (BTEX), Methyl Tertiary Butyl Ether (MTBE) and all other fuel oxygenates. Samples collected at waste oil storage sites must be analyzed for total recoverable petroleum hydrocarbons (TRPH) using EPA Method 1664, for full scan VOCs including BTEX, MTBE and all other fuel oxygenates, and chlorinated solvents by EPA Method 8260B, and for polycyclic aromatic hydrocarbons using EPA Method 8310 or 8270C (SIM Mode).

7. The detection of a reportable unauthorized release, based on field observations and/or the results of the soil and groundwater sample analysis, shall require compliance with the reporting requirements of CCR Section 2652 and the initial abatement and corrective action requirements of Articles 5 and 11 of Title 23, Division 3, Chapter 16, CCR.

8. Documentation required to be forwarded to this Agency includes:

a. Copies, signed by the receiving State permitted facility, of all Uniform Hazardous Waste Manifests used to transport the residual or rinseate liquid, solids, or sludge waste removed from the tanks; and

b. Original (wet) copies of the laboratory analytical report and the white copy of the OCHCA Chain of Custody form sent with the samples to the laboratory – with all required information completed by the laboratory.

Where the above requirements are successfully completed and an unauthorized release requiring further action is not discovered, a completion of a UST closure letter will be issued to the UST owner by Environmental Health. Should an unauthorized release be discovered, Environmental Health's Site Mitigation Section will open a UST cleanup case and, upon satisfactory completion of the required corrective action, a letter of remedial action completion will be issued.

If you have any questions or need additional information, please contact Environmental Health at (714) 433-6000.

DRAFT

SECTION G

APPENDIX “A2”

Orange County Health Care Agency (OCHCA), Environmental Health Division

Guidelines for the Removal of Underground Storage Tanks

Guidelines For The Removal Of Underground Storage Tanks

These guidelines apply to the owner of an underground storage tank (UST) subject to the permanent closure requirements of the California Code of Regulations, Title 23, Division 3, Chapter 16, Underground Storage Tank Regulations, Article 7, Closure Requirements, and their agents, who are removing a UST and/or its associated piping.

1. Obtain a Facility Modification Application from Orange County Health Care Agency (OCHCA) Environmental Health. Applications may be obtained in person at the address provided below, or by calling Environmental Health at (714) 433-6000, or downloaded from the following website: http://occupainfo.com/forms.

2. At least 30 calendar days prior to the expected UST removal date, submit a completed Facility Modification Application, four sets of plans (drawing size not to exceed 11x17 inches) and a closure fee to Environmental Health at the office address given below. Plans must include:

   a. A site location map, tank information/details, and
   b. A plot plan that:
      i. Identifies site location, inclusive of cross streets and a North arrow,
      ii. Shows existing structures, utilities, and all existing USTs and associated piping,
      iii. Identifies the USTs and/or piping to be removed,
      iv. Clearly identifies the entire length of piping proposed for closure in place, if appropriate, See Section 7 (c) below for a description of piping that may be closed in place, and
      v. Includes the size of the USTs to be removed and the types of hazardous substances that have been stored in the USTs.

3. Obtain closure and/or excavation permits from the appropriate agencies such as the County Planning and Development Services Department or city building department, the Orange County Fire Authority or local fire department and the South Coast Air Quality Management District (AQMD).

4. Submit a copy of the Hazardous Substance Removal Certification issued to the contractor performing the removal work. Section 7058.7 (e) of the Business and Professions Code states “A contractor may not install or remove a UST unless the contractor has passed the hazardous substance certification examination developed pursuant to this section.” A contractor who is not certified may bid on or contract for the removal of a UST, if the work is performed by a contractor who is certified.

5. Schedule a UST removal inspection with Environmental Health’s Hazardous Materials Mitigation Section. Environmental Health staff must be onsite to observe the condition of the UST(s) during removal and direct sampling to determine whether a reportable unauthorized release has occurred. Provide at least 48-hour notice to Environmental Health when scheduling an onsite inspection. A concurrent inspection must be scheduled with the Orange County Fire Authority or local fire department, which must also be represented at the UST removal. Alternate accommodations must be made in advance of field activities if Fire personnel decline the opportunity to be onsite during tank removal activities.

6. When removing a UST system and/or its piping, the owner of the UST(s) must comply with applicable provisions of the California Code of Regulations (CCR) Division 3, Chapter 16, Article 7, Closure Requirements. These include provisions of Section 2672 (b) & (c) which including the following:

    a. All residual liquid, solids, or sludge from the UST and/or its piping shall be removed and handled as hazardous waste or recyclable material;

    b. If the UST to be removed contained a hazardous substance that could produce flammable vapors at standard temperature and pressure, then the USTs shall be inerted to levels that shall preclude explosion or to such lower vapor levels as may be required by the Orange County Fire Authority or local fire department. (Note: A representative from the Orange County Fire Authority or local fire department must be present prior to initiating this procedure.); and,

    c. The UST and/or its associated piping shall be removed and disposed. Where removal of piping might damage structures or other in use piping is contained in a common trench, that piping may be closed in place after being emptied of all contents and capped.

7. Per CCR Section 2651 (d), the owner of a UST must demonstrate upon closure that no unauthorized release has occurred. This demonstration shall be based on sensory observations, monitoring equipment readings, soil sample analysis and/or water sample analysis. Sample collection activities are to be performed by staff provided by the project consultant or the laboratory doing the sample analysis.

    a. Samples must be obtained from the excavations of any UST and/or piping removed. Regulations require two samples, one at each end of each UST removed and samples for each 20 linear feet of pipe trenching. Where closure in place of piping is necessary and where soil samples cannot otherwise be obtained, soil borings placed near the piping trench may be required. Further, in an effort to obtain data required for evaluation under State Water Board Resolution No. 2012-0062, sidewall samples from depths between 0-10 feet below ground surface may be required.

    b. Samples are to be collected, handled and analyzed at the owner's expense per CCR Section 2649 and as indicated below:

        i. The laboratory doing the sample analysis or the project consultant must provide adequate supplies of thin-walled stainless steel or brass cylinder sample holders with fitted polyethylene caps, labels, plastic bags and Teflon sheets. A cooler or ice chest with ice is also required to be onsite;

        ii. When a sample is collected, each end of the collection cylinder should first be covered with a Teflon sheet. Caps should then be placed on the ends of the cylinder and an identifying label attached. Next, the cylinder should be placed in a cooler or ice chest to be chilled. The sample should be placed in a sealed plastic bag before chilling where needed to prevent water damage to the label;

        iii. The samples should be transported, per arrangements made by the tank owner, to a State Certified Laboratory soon after the completion of sampling. A Chain of Custody form, completed by Environmental Health staff directing the sampling, must accompany the samples to the laboratory. The receiving laboratory should indicate in the designated laboratory section of the Chain of Custody form whether the

samples were received in a chilled state and whether County seals were intact upon arrival, and;

iv. Samples collected at diesel or gasoline storage sites must be analyzed by an appropriate method for total petroleum hydrocarbons (TPH). TPH (GC/FID) with carbon chain identification is recommended for diesel sites. Total purgeable petroleum hydrocarbons [TPPH (GC/MS)] as gasoline is recommended for gasoline sites. In additional analysis by EPA Method 8260B full scan is required to analyze for volatile organic compounds (VOCs) that include benzene, toluene, ethylbenzene, total xylenes (BTEX), naphthalene, ethanol, Methyl Tertiary Butyl Ether (MTBE) and all other fuel oxygenates. Samples collected at waste oil tank storage sites must be analyzed for TPH with carbon chain identification using EPA Method 8015 or for total recoverable petroleum hydrocarbons using EPA Method 1664, for full scan VOCs including BTEX, MTBE and all other fuel oxygenates, and chlorinated solvents by EPA Method 8260B, and for polycyclic aromatic hydrocarbons using EPA Method 8310 or 8270C (SIM Mode)[1]. Detection limits for all reported constituents must meet appropriate data quality objectives.

8. The detection of a reportable unauthorized release, based on field observations and/or the results of the soil and groundwater sample analysis, shall require compliance with the reporting requirements of CCR Section 2652 and the initial abatement and corrective action requirements of Articles 5 and 11 of Title 23, Division 3, Chapter 16, CCR.

9. The owner of the UST should provide site security to prevent unauthorized public access into excavated areas. This security may include temporary fencing or a twenty-four (24) hour security guard.

10. The owner of the UST shall have equipment onsite available to control any vapor emissions. The equipment may include bulldozers to backfill excavations and/or tarps to cover contaminated soil.

11. Documentation required to be forwarded to this Agency after UST removal includes:

    a. A copy of the certificate of UST destruction,
    b. Copies, signed by the receiving State permitted facility, of all Uniform Hazardous Waste Manifests used to transport the residual or rinseate liquid, solids, or sludge waste removed from the tanks, and
    c. Original (wet) copies of the laboratory analytical report, and the white copy of the OCHCA Chain of Custody form, sent with samples to the laboratory, with all required information completed by the laboratory.

Where the above requirements are successfully completed and an unauthorized release requiring further action is not discovered, a completion of a UST closure letter will be issued to the UST owner by Environmental Health. Should an unauthorized release be discovered, Environmental Health's Site Mitigation Section will open a UST cleanup case and, upon satisfactory completion of the required corrective action, a letter of remedial action completion will be issued.

If you have any questions or need additional information, please contact the Environmental Health Hazardous Materials Mitigation Section at (714) 433-6000.

[1] Analytical methods listed above are subject to revision or update by EPA. Suggested test methods may require updating as analytical procedures are promulgated.

BOE ID#: 44016520

Underground Storage Tank Permit Conditions

The underground storage tanks [UST(s)] located at this facility are permitted to operate provided the following conditions are complied with:

1) Facility copy of this permit has an approved monitoring plan, leak response plan, and plot plan attached.
2) All unauthorized releases must be reported to this Agency within the time limits and according to the manner specified in Title 23, Sections 2650-55 of the California Code of Regulations (CCR)
3) Written records, as required by Section 2712(b), Title 23, CCR, of all monitoring and maintenance performed shall be maintained on-site for a period of at least three (3) years from the date the monitoring was performed. Written records of all monitoring and maintenance performed in the last three (3) years shall be shown to representatives of this Agency upon request during any site inspection.
4) The UST(s) must be monitored in accordance with the approved method. This monitoring method is identified above and can be found in Sections 2632 & 2640-48 of Title 23, and Sections 25291 & 25292 of the Health and Safety Code (H&SC).
5) The UST(s) owner and operator are subject to all applicable requirements of Chapter 6.7 and Chapter 6.75 of the Health and Safety Code and their regulations.
6) Any changes to the information provided in the UST permit application must be reported, within 30 days, to this Agency.

Fiberglas® Tanks for Fuel Storage

Calibration Chart*

How to properly gauge your tank:...

Underground storage tanks require periodic measurement to determine current inventory level. Using the proper methods when gauging your tank's contents will insure the most accurate reading and insure that you do not damage your tank. The following procedure should be followed whenever you use a gauge stick to determine the amount of product that is in your tank:

1. Use a wood dipstick with a rubber or nylon tip. Metallic dipsticks are not recommended. This will insure that frequent tank gaugings or an accidental dropping of the gauge stick into the tank will not damage the tank bottom.
2. Always gauge your tank at the fill port. A tank bottom protector plate has been installed under this port to help protect the tank.
3. *Slowly lower your gauge stick into the fill port until it touches the tank bottom. Never free drop the gauge stick. This can result in inaccurate measurements due to product splashing. Free dropping can also result in gauge stick damage and tank damage.*
4. Remove your dipstick slowly and read the product level directly from the gauge stick.

For Model DWT-2P double-wall tanks only, the annular space capacity for this tank is 340 gallons.

*Includes fitting in Fiberglas reservoir
**The 6,000 gallon DWT-2P(6) is standard at Mt. Union, PA plant only. At all other plants, DWT-2P(6) 6000 model is made-to-order.

Standard Tank Notes

1. *Standard pipe fittings* to the primary tank are 4" NPT half couplings. All tanks 2,500 gallon capacity and larger include one manway with three fittings to the primary tank located in the manway cover. All other primary tank fittings are mounted on the tank. Additional manways and tank fittings are available on made-to-order tanks.

2. *Tank bottom deflector plates* are standard under every manway and fitting.

3. *Bumper pads* are standard on all tanks 6' diameter and larger. The pads provide added protection to the tank prior to installation.

4. All Model "P" tanks include a *Fiberglas reservoir,* used for leak monitoring, integrally constructed to the tank top. The reservoir includes one 4" NPT half coupling fitting mounted on the top of the reservoir allowing access to the cavity between the inner and outer tank walls.

5. In addition to the monitoring fitting located in the Fiberglas reservoir, tanks 1,000 gallon capacity and larger include *additional monitoring fittings* (4" NPT) located at the tank top. See the tank specifications for the number of monitoring fittings for each tank size.

6. *Anchoring strap locations* are indicated by arrows on the side of the tank.

7. *Monitoring capabilities*—the following restrictions apply for the various types of double-wall tank monitors:

   a) Hydrostatic Tank Monitor—tank burial depth must not exceed 7' from tank top to finish grade.

   The monitoring cavity must be vented to the atmosphere. The optional reservoir sensor, supplied by O/C Tanks, is designed to automatically vent the monitoring cavity.

   b) Liquid sensors—when normally "dry" cavity monitors (which detect the presence of a liquid) are used, the cavity between the inner and outer tank may be either vented to the atmosphere or sealed.

   c) Vacuum monitoring—when vacuum monitoring is used, the maximum vacuum is 3" mercury (1.5 psi maximum).

   d) Positive air pressure monitoring—when positive air pressure monitoring is used, the maximum air pressure is 3 psi.

   e) Gasoline vapor sensors—when gasoline vapor sensors are used, the cavity between the inner and outer tank may be either vented to the atmosphere or sealed.

O/C Tanks Warranty And Installation Information

Warranty

Standard Underground Petroleum Storage Tank

We warrant that our underground tanks and piping sumps,* if installed underground with proper backfill and otherwise installed in accordance with our instructions:

I. Will meet our published specifications and will be free from material defects in materials and workmanship for a period of one (1) year following date of original delivery by us;

II. Will not fail for a period of thirty (30) years from date of original purchase due to external corrosion; and

III. Will not fail for a period of thirty (30) years from date of original purchase due to internal corrosion provided the tank is used solely with or without tank water bottoms for the following products:

A. Petroleum products including gasoline, jet fuel, av-gas, motor oil (new or used), kerosene, diesel fuel or used for fuel oil at temperatures not to exceed 150°F.

B. Alcohol-gasoline blend motor fuels.

1. Ethanol blends
   - Gasohol (90% gasoline and 10% ethyl alcohol)
2. Methanol blends
   - Oxinol-50* waiver (90.5% gasoline and 9.5% Oxinol-50* composed of a mixture of 4.75% methanol and 4.75% GTBA).
   - DuPont EPA waiver (gasoline with 5% methanol and a minimum of 2.5% cosolvent. The blend may contain a maximum concentration of up to 3.7 weight percent oxygen in the final fuel).

C. Oxygenated motor fuels
   - Gasoline with up to 20% (by volume) of methyl tertiary butyl ether (MTBE)

D. Potable water at ambient temperatures.

IV. Will not leak for a period of thirty (30) years from date of original purchase due to structural failure, which shall be defined as breaking or collapse, provided the installation is in the United States and is performed and validated by a contractor trained by O/C Tanks, and is used as stated above. If the tank is exhumed and moved, it must be inspected, repaired (as necessary), and recertified by O/C Tanks in order to continue the structural warranty for the balance of 30 years.

Our liability under this warranty shall be limited to, at our option, (i) repair of the defective tank, (ii) delivery of a replacement tank to the point of original delivery, or (iii) refund of the original purchase price, and we shall not be liable for any labor, other installation costs, indirect or consequential damages or other damages in connection with such tanks. THE FOREGOING CONSTITUTES OUR EXCLUSIVE OBLIGATION AND WE MAKE NO EXPRESS OR IMPLIED WARRANTIES, OR ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WHATSOEVER, EXCEPT AS STATED ABOVE.

*Fiberglas components only

O/C TANKS

O/C TANKS CORPORATION
A Subsidiary of Owens-Corning Fiberglas
One Levis Square, P.O. Box 10025
Toledo, Ohio 43699-0025

Accessories Warranty

All double-wall tank accessories and monitoring equipment are warranted to be free from material defects in workmanship and materials for a period of one (1) year following date of original delivery by O/C Tanks.

Our liability under this warranty shall be limited to, at our option, (i) repair of the defective unit, (ii) delivery of a replacement unit to the point of original delivery, or (iii) refund of the original purchase price, and we shall not be liable for any labor, other installation costs, indirect or consequential damages or other damages in connection with such tanks. THE FOREGOING CONSTITUTES OUR EXCLUSIVE OBLIGATION AND WE MAKE NO EXPRESS OR IMPLIED WARRANTIES, OR ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WHATSOEVER, EXCEPT AS STATED ABOVE.

Failure to install the tank accessories or monitoring equipment in accordance with the O/C Tanks installation instructions will void the warranty.

Fiberglas® Tanks Intended Use

Fiberglas® petroleum storage tanks are designed for the storage of gasoline, gasohol (10% ethanol and 90% gasoline mixture), 9.5% Oxinol-50* (4.75% methanol and 4.75% GTBA) and 90.5% gasoline mixture, jet fuel, kerosene, diesel fuel, oxygenated fuels, (up to 20% MTBE) or potable water at ambient underground temperatures. Fuel oil may be stored at temperatures not to exceed 150° F.

CAUTION: Fiberglas tanks are not recommended for #6 fuel oil storage; typical delivery temperatures of #6 fuel oil exceeds 150°F.

The storage of other materials may affect the life of the tank. Before storing materials other than those listed above contact the Product Manager, O/C Tanks Corporation, Toledo, Ohio.

INNOVATIONS FOR LIVING®

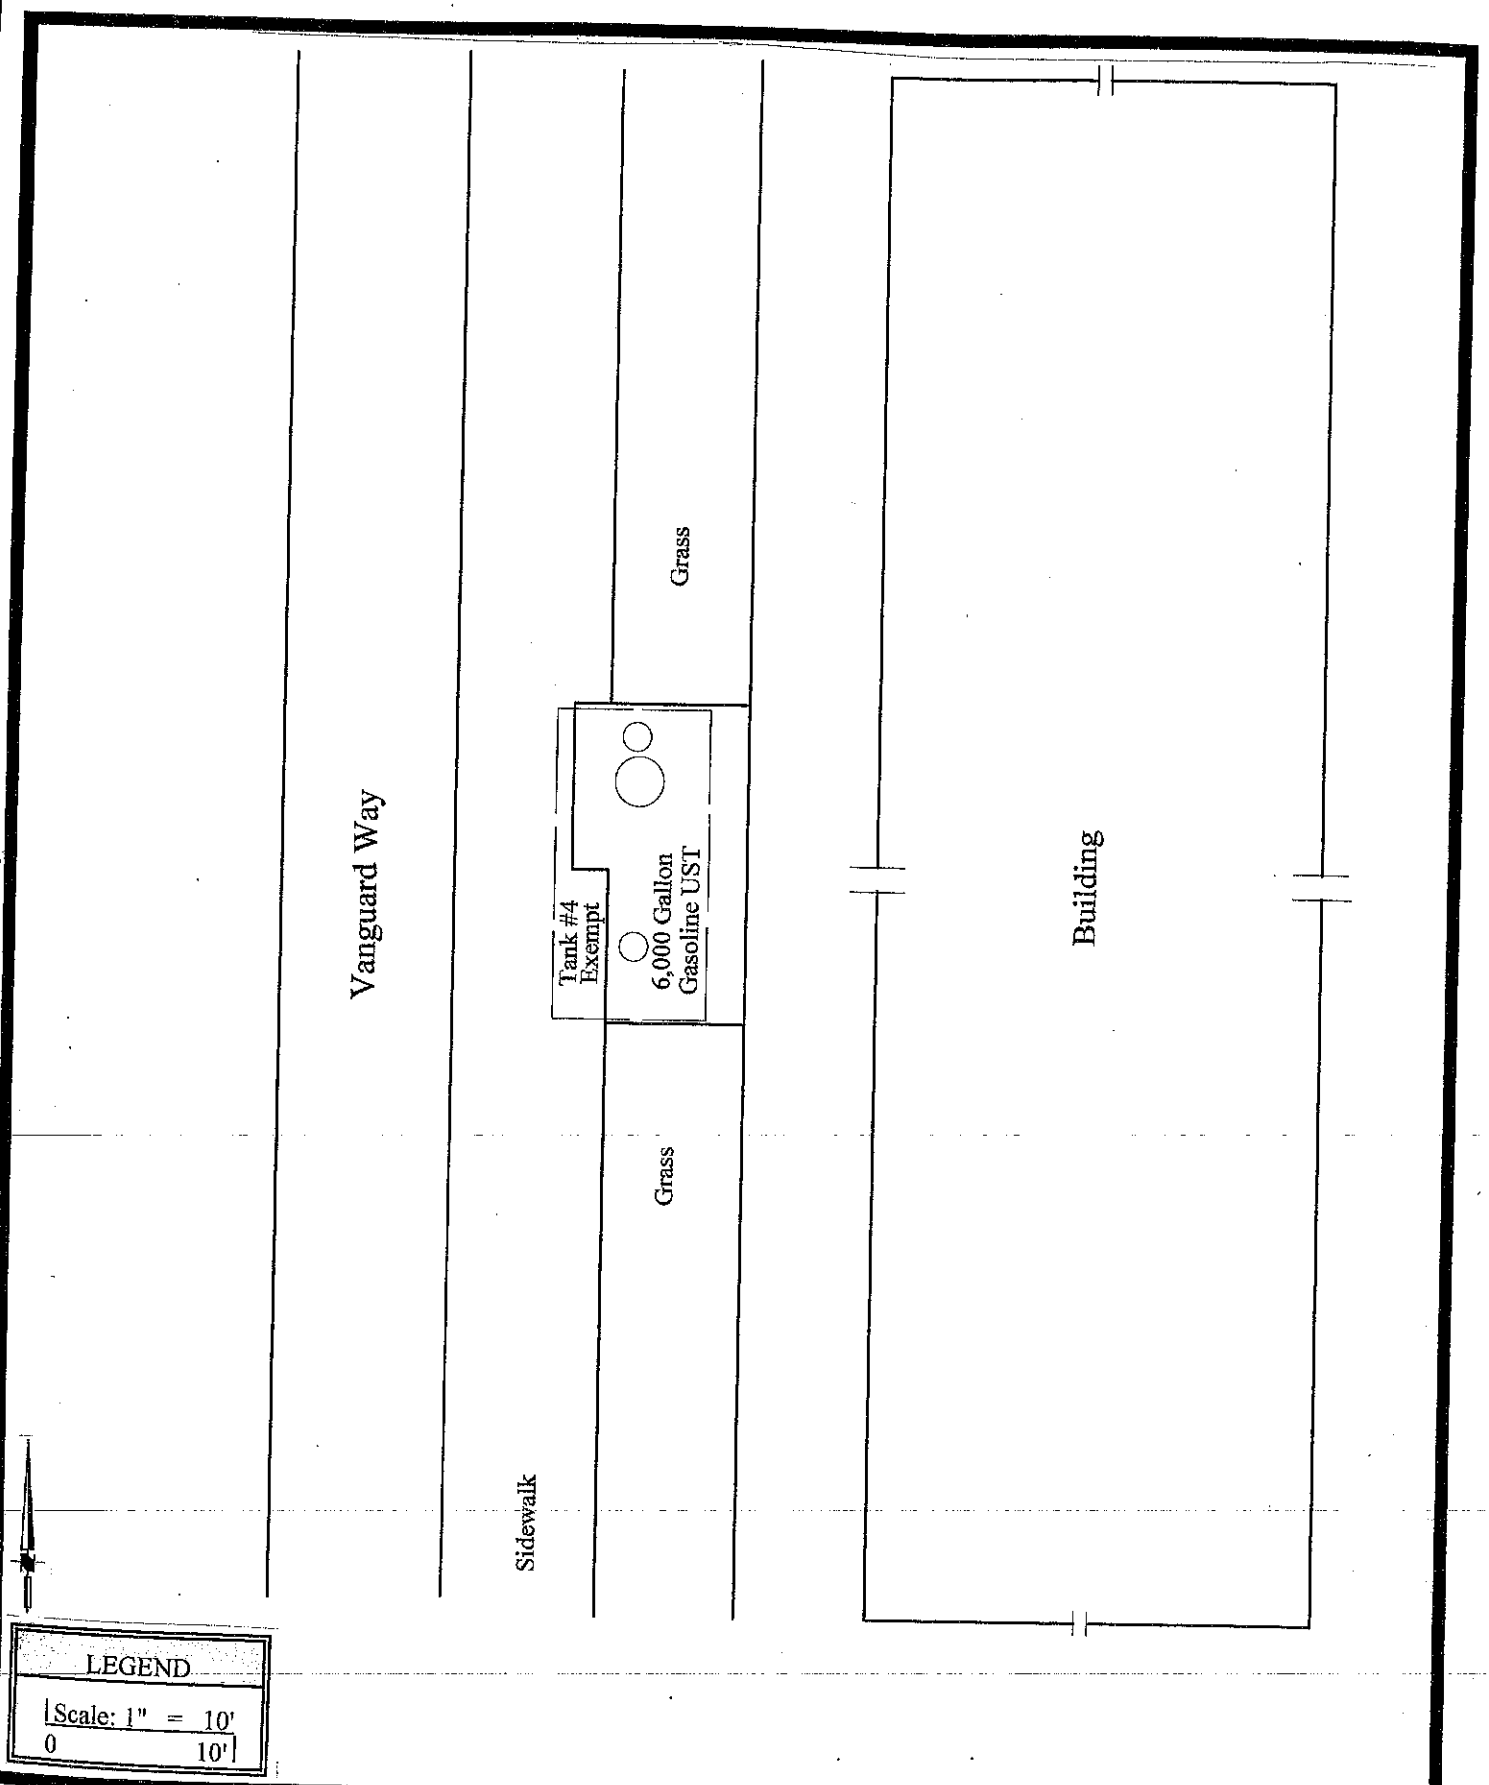
To Whom It May Concern

RE: Fuel Storage Capability

Owens Corning manufactured and sold underground storage tanks between 1965 and 1994. The Company's fiberglass tank division was sold December 31, 1994. Owens Corning has not manufactured or sold tanks since that time.

With limited exceptions, Owens Corning fiberglass tanks were not warranted, tested for, or intended to store fuel with more than a 10% ethanol blend.

Single-Wall Tanks (SWT): No Owens Corning SWT was ever warranted or intended to store fuel with more than a 10% ethanol blend.



Double-Wall Tanks (DWT): *Prior to July 1, 1990.* With the exception of a small number of specially manufactured tanks, DWTs sold before July 1, 1990 were not warranted or intended to store fuel with more than a 10% ethanol blend.

After July 1, 1990. Owens corning DWTs that were manufactured and sold between July 1, 1990 and December 31, 1994 were warranted for the storage of fuel with no limitation on ethanol content.

For additional details, please refer to the attached letter from Owens Corning to customers from April 1995. Please also note that in addition to these compatibility limitations, in 2006 Owens Corning completed reorganization under Chapter 11 of the Bankruptcy Code. Under the confirmed plan of reorganization, all past and future claims against Owens Corning for alleged breach of warranty were discharged in bankruptcy.

Sincerely,

Brian McPeak
Vice President, External Affairs

4. PLACE 4" VCP SEWER AT 1% SLOPE MINIMUM.
5. INSTALL CLEAN OUT TO GRADE PER DETAIL 2/C4.0
6. POC 5' MAX FROM BLDG., SEE PLUMBING PLANS FOR CONTINUATION
7. NOT USED
8. REMOVE AND REPLACE EX. SEWER. PLACE NEW 6" VCP AND CONNECT 5' FROM EX BUILDING
9. INSTALL FLO GARD INSERT PER MANUFACTURERS RECOMMENDATIONS.
10. ENCASE STORM DRAIN IN 6" POC 3000 PSI ON ALL SIDES
11. CONSTRUCT NEW VCP SEWER PIPE, SIZE PER PLAN
12. TRENCH REMOVAL AND RECONSTRUCTION PER CITY OF COSTA MESA STANDARD DRAWING NO. 813. NO SLURRY BACKFILL ALLOWED.
13. CURB AND GUTTER REMOVAL AND RECONSTRUCTION SHALL BE PER CITY OF COSTA MESA STANDARD DRAWING NO. 312 OVER 6" CMB. MINIMUM LENGTH OF REPLACEMENT SHALL BE 8'. EXTEND REMOVAL TO NEXT JOINT OR CRACK IF LESS THAN 8' AWAY. PROTECT EXISTING STREET BY SAW CUTTING THE JOINT BETWEEN EDGE OF GUTTER AND AC STREET PAVEMENT. IF THE AC IS CUT OR DAMAGED, CONTRACTOR SHALL RECONSTRUCT A MINIMUM OF 3' OF AC ADJACENT TO NEW GUTTER. THE SLOT PAVE STRUCTURAL SECTION SHALL BE 6" AC OVER 6" CMB. NEW CURB AND GUTTER SHALL MEET MINIMUM GRADE STANDARDS. NO TUNNELING ALLOWED.
14. SIDEWALK REMOVAL PER CITY OF COSTA MESA STANDARD DRAWING NO. 811. SIDEWALK RECONSTRUCTION PER CITY OF COSTA MESA STANDARD DRAWING NO. 411 412 413 OVER 4" CMB. ANY SIDEWALK REMOVED WITHIN CURB RETURN AREA SHALL BE REPLACE IN ITS ENTIRETY FROM BCR TO ECR PER CITY OF COSTA MESA STANDARD DRAWING NO. 414 & 416 AND MODIFIED TO MEET A.D.A. REGULATIONS.
15. CONSTRUCT TEMPORARY UTILITY STUBS FOR TRAILER FACILITIES DURING PHASE 1. CONTRACTOR TO EXTEND LINES TO TRAILER LOCATIONS. WATER: 1" PVC LINE, SEWER: 3" PVC LINE AT 1% SLOPE. CAP 12" BELOW FINISH GRADE AND PLACE A UTILITY MARKER AFTER TRAILER USE IS OVER. CONTRACTOR TO COORDINATE TRAILER UTILITY LOCATIONS PER TRAILER SUPPLIER.
16. INSTALL 750 GAL PRE CAST CLARIFIER BY JENSEN PRE CAST "MODEL NO CL-750" OR APPROVED EQUAL
17. INSTALL TWO (2) 3" BACKFLOW PREVENTER FEBCO MODEL 870 OR APPROVED EQUAL, FROM UPSTREAM OF METERS AND RECONNECT TO WATER MAIN
18. NOT USED
19. CONSTRUCT CURB DRAIN PER APWA STD DWG. NO 150-2, CASE II INLET WITH 2"ø PVC PIPE 1/C4.0
20. INSTALL SCHEDULE 40 PVC WATER PIPE, SIZE PER PLAN
21. CONSTRUCT PARKWAY DRAIN No 2 PER CITY OF COSTA MESA STD PLAN 418, CASE 1 INLET; d=15"; w=12"
22. CONSTRUCT 2" WATER METER FOR DEDICATED IRRIGATION SERVICE
23. CONSTRUCT HANSON 12"SQ x 8"DEEP WITH ALHAMBRA FOUNDRY 2012 TRAFFIC RATED GRATE

UTILITY NOTES

1. ALL ONSITE TRENCHING AND BEDDING SHALL CONFORM TO THE GEOTECHNICAL REPORT AND DETAIL 1/C4.0
2. ALL OFFSITE TRENCHING PER OCM STD 813.
3. ALL CATCH BASINS DRAINING PAVED AREAS SHALL HAVE FLO-GARD INSERTS INSTALLED PER MANUFACTURERS RECOMMENDATIONS.
4. SEPARATE APPROVAL FOR SEWER LINE

NOTE:

ON SITE PLUMBING SHALL COMPLY WITH 2001 CPC REQUIREMENTS

DRUG-FREE WORKPLACE POLICY

CITY OF COSTA MESA, CALIFORNIA

COUNCIL POLICY

SUBJECT	POLICY NUMBER	EFFECTIVE DATE	PAGE
DRUG-FREE WORKPLACE	100-5	8-8-89	1 of 3

BACKGROUND

Under the Federal Drug-Free Workplace Act of 1988, passed as part of omnibus drug legislation enacted November 18, 1988, contractors and grantees of Federal funds must certify that they will provide drug-free workplaces. At the present time, the City of Costa Mesa, as a sub-grantee of Federal funds under a variety of programs, is required to abide by this Act. The City Council has expressed its support of the national effort to eradicate drug abuse through the creation of a Substance Abuse Committee, institution of a City-wide D.A.R.E. program in all local schools and other activities in support of a drug-free community. This policy is intended to extend that effort to contractors and grantees of the City of Costa Mesa in the elimination of dangerous drugs in the workplace.

PURPOSE

It is the purpose of this Policy to:

1. Clearly state the City of Costa Mesa's commitment to a drug-free society.

2. Set forth guidelines to ensure that public, private, and nonprofit organizations receiving funds from the City of Costa Mesa share the commitment to a drug-free workplace.

POLICY

The City Manager, under direction by the City Council, shall take the necessary steps to see that the following provisions are included in all contracts and agreements entered into by the City of Costa Mesa involving the disbursement of funds.

1. Contractor or Sub-grantee hereby certifies that it will provide a drug-free workplace by:

   A. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in Contractor's and/or sub-grantee's workplace, specifically the job site or location included in this contract, and specifying the actions that will be taken against the employees for violation of such prohibition;

   B. Establishing a Drug-Free Awareness Program to inform employees about:

1. The dangers of drug abuse in the workplace;

2. Contractor's and/or sub-grantee's policy of maintaining a drug-free workplace;

3. Any available drug counseling, rehabilitation and employee assistance programs; and

4. The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

C. Making it a requirement that each employee to be engaged in the performance of the contract be given a copy of the statement required by subparagraph A;

D. Notifying the employee in the statement required by subparagraph 1 A that, as a condition of employment under the contract, the employee will:

1. Abide by the terms of the statement; and

2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five (5) days after such conviction;

E. Notifying the City of Costa Mesa within ten (10) days after receiving notice under subparagraph 1 D 2 from an employee or otherwise receiving the actual notice of such conviction;

F. Taking one of the following actions within thirty (30) days of receiving notice under subparagraph 1 D 2 with respect to an employee who is so convicted:

1. Taking appropriate personnel action against such an employee, up to and including termination; or

2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health agency, law enforcement, or other appropriate agency;

G. Making a good faith effort to maintain a drug-free workplace through implementation of subparagraphs 1 A through 1 F, inclusive.

2. Contractor and/or sub-grantee shall be deemed to be in violation of this Policy if the City of Costa Mesa determines that:

   a. Contractor and/or sub-grantee has made a false certification under paragraph 1 above;

   b. Contractor and/or sub-grantee has violated the certification by failing to carry out the requirements of subparagraphs 1 A through 1 G above;

   c. Such number of employees of Contractor and/or sub-grantee have been convicted of violations of criminal drug statutes for violations occurring in the workplace as to indicate that the contractor and/or sub-grantee has failed to make a good faith effort to provide a drug-free workplace.

3. Should any contractor and/or sub-grantee be deemed to be in violation of this Policy pursuant to the provisions of 2 A, B, and C, a suspension, termination or debarment proceeding subject to applicable Federal, State, and local laws shall be conducted. Upon issuance of any final decision under this section requiring debarment of a contractor and/or sub-grantee, the contractor and/or sub-grantee shall be ineligible for award of any contract, agreement or grant from the City of Costa Mesa for a period specified in the decision, not to exceed five (5) years. Upon issuance of any final decision recommending against debarment of the contractor and/or sub-grantee, the contractor and/or sub-grantee shall be eligible for compensation as provided by law.

77 Fair Drive
Costa Mesa, CA 92626

City of Costa Mesa

Agenda Report

File #: 22-926 **Meeting Date:** 11/15/2022

TITLE:

MAINTENANCE SERVICES AGREEMENT FOR HVAC MAINTENANCE AND REPAIR

DEPARTMENT: **PUBLIC WORKS/MAINTENANCE SERVICES DIVISION**

PRESENTED BY: **RAJA SETHURAMAN, PUBLIC WORKS DIRECTOR**

CONTACT INFORMATION: **ROBERT RYAN, MAINTENANCE SERVICES MANAGER (714) 327-7499**

RECOMMENDATION:

Staff recommends the City Council:

1. Approve the proposed Maintenance Services Agreement (MSA) with Siemens Industry, Inc., for a term of eight months , effective November 15, 2022 - June 30, 2023, in the amount of $154,472.71 for the eight month term to provide HVAC maintenance and repair services for the City Hall and the Police Department facility based on pricing from Sourcewell Contract #070121-SIE.

2. Approve the three year MSA with Siemens Industry from July 1, 2023 to June 30, 2026, with annual compensation amount for year one, $224,734.43, year two, $249,167.58 and third year, $248,228.67.

3. Approve a 10% contingency annually for additional repairs and other unforeseen costs.

4. Authorize the City Manager and City Clerk to execute the MSA and to extend the agreement each year with an effective term of July 1st through June 30th, for up to a maximum of three (3) additional one-year terms.

BACKGROUND:

The City's current contract for HVAC maintenance and repair services expired on July 31, 2022. Siemens Industry, Inc. has been the contractor of record for the last ten (10) years and the Maintenance Services Division has been satisfied with their quality of service throughout the term of the contract. Maintenance Services determined that it would be beneficial to continue to utilize Siemens Industry, Inc., for this agreement due to the fact that the City Hall and the Police Department (PD) both have Siemens HVAC controls, with the PD facility having a newer Siemens Building Automation System and City Hall having an older Siemens Building Automation System. The mixture of advanced and outdated Building Automation Systems requires a higher level of expertise and

technical ability than the standard HVAC systems. The packaged chiller systems in both facilities also require a higher level of expertise and technical ability that Siemens provides.

The City's adopted Fiscal Year 2022-2023 Operating Budget includes funds to provide HVAC mechanical system repairs and maintenance services for City Hall and the Police Department facility.

ANALYSIS:

The Public Works Department/Maintenance Services Division sent Siemens Industry, Inc., a Request for Proposal (RFP) for HVAC Mechanical Repair and Maintenance Services for City Hall and the Police Department facility, based on Sourcewell Contracts #070121-SIE pricing (Attachment 2). The Sourcewell-based pricing is provided in the below table.

Billing Frequency	Period Range	Period	Sell Price
Annually	11/15/2022 to 6/30/2023	Year 1 of 4	$154,472.71
Annually	7/01/2023 to 6/30/2024	Year 2 of 4	$224,734.43
Annually	7/01/2024 to 6/30/2025	Year 3 of 4	$249,167.58**
Annually	7/01/2025 to 6/30/2026	Year 4 of 4	$248,228.67
TOTAL			**$876,603.39**

**Please note: Year 3 of 4 includes 'Eddy Current Testing' for chillers.

This proposed MSA will provide much needed repair services to the City Hall building in addition to routine maintenance. The controls and equipment at City Hall are very dated and require continuous maintenance and repairs. The proposed scope of work under this MSA provides for servicing repairs, both parts and labor, to the City's HVAC equipment system.

Siemens is offering the pricing through its Sourcewell contract, which meets all requirements set forth in the City of Costa Mesa's Purchasing Policy and all requirements set forth by the State of California in regards to regional cooperative purchasing agreements. Sourcewell established an approved vendor list following a nationwide competitive bid process. This assures that the City receives the lowest available pricing and meets the competitive bid process requirements. The City has utilized cooperative agreements successfully in the past.

Public Works/Maintenance Services and Purchasing Department's recommendation is to award a Maintenance Service Agreement (MSA) to Siemens Industry, Inc. for HVAC System Repairs & Maintenance Services for City Hall and the Police Department facility (Attachment 1).

ALTERNATIVES:

1. The Council could not approve the contract and direct staff to release a RFP. However, staff does not expect reduced prices as a result of releasing a RFP.

2. The Council could direct staff to evaluate the cost effectiveness of managing this work with in-

house staff. However, this is not recommended as the nature of work is beyond staff capabilities.

FISCAL REVIEW:

Funding for the purchase of the requested HVAC Mechanical Repair and Maintenance Services agreement is included in the adopted FY 2022-23 Public Works Department budget. Funding for future fiscal years will be included as part of the respective year budget.

LEGAL REVIEW:

The City Attorney's office has reviewed this agenda report, has prepared the Maintenance Services Agreement (Attachment 1) and approves them both as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goal:

- Maintain and Enhance the City's Infrastructure, Facilities, Equipment, and Technology

CONCLUSION:

Staff recommends the City Council:

1. Approve the proposed Maintenance Services Agreement (MSA), Attachment 1, with Siemens Industry, Inc., for an initial term of eight months, effective November 15, 2022 - June 30, 2023, in the amount of $154,472.71 for the eight month term to provide HVAC maintenance and repair services for the City Hall and the Police Department facility based on pricing from Sourcewell Contract #070121-SIE.

2. Approve the MSA terms for up to three additional one year terms, with annual compensation amount for year one, $224,734.43, year two, $249,167.58 and third year (through June 2926), $248,228.67.

3. Approve a 10% contingency annually for additional repairs and other unforeseen costs.

4. Authorize the City Manager and City Clerk to execute the agreement and to extend the agreement each year with an effective term of July 1st through June 30th, for up to a maximum of three (3) additional one-year terms.

CITY OF COSTA MESA
MAINTENANCE SERVICES AGREEMENT
WITH
SIEMENS INDUSTRY, INC.

THIS MAINTENANCE SERVICES AGREEMENT ("Agreement") is made and entered into this 15th day of November, 2022 ("Effective Date"), by and between the CITY OF COSTA MESA, a municipal corporation ("City"), and SIEMENS INDUSTRY, INC., a Delaware corporation authorized to do business in California ("Contractor").

W I T N E S S E T H :

A. City proposes to utilize the services of Contractor as an independent contractor to provide maintenance of City property, as more fully described herein; and

B. Contractor represents that it has the experience and expertise to properly perform such services and holds all necessary licenses to practice and perform the services; and

C. City and Contractor desire to contract for the services and desire to set forth their rights, duties and liabilities in connection with the performance of such services; and

D. No official or employee of City has a financial interest, within the provisions of Sections 1090-1092 of the California Government Code, in the subject matter of this Agreement.

NOW, THEREFORE, for and in consideration of the mutual covenants and conditions contained herein, the parties hereby agree as follows:

1.0. SERVICES PROVIDED BY CONTRACTOR

1.1. Scope of Services. Contractor shall provide the services described in Contractor's Proposal (the "Proposal") attached hereto as Exhibit "A" and incorporated herein (the "Services").

1.2. Prevailing Wage Requirements.

(a) Prevailing Wage Laws. Contractor is aware of the requirements of Chapter 1 (beginning at Section 1720 et seq.) of Part 7 of Division 2 of the California Labor Code, as well as Title 8, Section 16000 et seq. of the California Code of Regulations ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. This project is a "maintenance" project and requires compliance with the Prevailing Wage Laws. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

(b) Payment of Prevailing Wages. Contractor shall pay the prevailing wage rates for all work performed under this Agreement. When any craft or classification is omitted from the general prevailing wage determinations,

Contractor shall pay the wage rate of the craft or classification most closely related to the omitted classification. A copy of the general prevailing wage rate determination is on file in the Office of the City Clerk and is incorporated into this Agreement as if fully set forth herein. Contractor shall post a copy of such wage rates at all times at the project site(s).

(c) Legal Working Day. In accordance with the provisions of Labor Code Section 1810 et seq., eight (8) hours is the legal working day. Contractor and any subcontractor(s) of Contractor shall comply with the provisions of the Labor Code regarding eight (8)-hour work day and 40-hour work week requirements, and overtime, Saturday, Sunday, and holiday work. Work performed by Contractor's or any subcontractor's employees in excess of eight (8) hours per day, and 40 hours during any one week, must include compensation for all hours worked in excess of eight (8) hours per day, or 40 hours during any one week, at not less than one and one-half times the basic rate of pay. Contractor shall forfeit as a penalty to City Twenty-Five Dollars ($25.00), or any greater penalty set forth in the Labor Code, for each worker employed in the execution of the work by Contractor or by any subcontractor(s) of Contractor, for each calendar day during which such worker is required or permitted to the work more than eight (8) hours in one calendar day or more than 40 hours in any one calendar week in violation of the Labor Code.

(d) Apprentices. Contractor shall comply with the provisions of Labor Code Section 1777.5 concerning the employment of apprentices on public works projects. Contractor shall be responsible for ensuring compliance by its subcontractors with Labor Code Section 1777.5.

(e) Payroll Records. Pursuant to Labor Code Section 1776, Contractor and any subcontractor(s) shall keep accurate payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by Contractor or any subcontractor in connection with this Agreement. Each payroll record shall contain or be verified by a written declaration that it is made under penalty of perjury, stating both of the following: (1) The information contained in the payroll record is true and correct; and (2) The employer has complied with the requirements of Sections 1771, 1881, and 1815 of the Labor Code for any work performed by his or her employees on this project. The payroll records shall be certified and shall be available for inspection at all reasonable hours in accordance with the requirements of Labor Code Section 1776.

(f) Registration with DIR. Contractor and any subcontractor(s) of Contractor shall comply with the provisions of Labor Code Section 1771 and Labor Code Section 1725.5 requiring registration with the DIR.

1.3. Performance to Satisfaction of City. Contractor agrees to perform all the work to the complete satisfaction of City. Evaluations of the work will be done by City's Maintenance Services Manager or his or her designee. If the quality of work is not satisfactory, City in its

discretion has the right to:

(a) Meet with Contractor to review the quality of the work and resolve the matters of concern;

(b) Require Contractor to repeat the work at no additional fee until it is satisfactory; and/or

(c) Terminate the Agreement as hereinafter set forth.

1.4. Compliance with Applicable Law. Contractor warrants that it shall perform the services required by this Agreement in compliance with all applicable federal and state employment laws, including, but not limited to, those laws related to minimum hours and wages; occupational health and safety; fair employment and employment practices; workers' compensation insurance and safety in employment; and all other applicable federal, state and local laws and ordinances applicable to the services required under this Agreement. Contractor shall indemnify and hold harmless City from and against all claims, demands, payments, suits, actions, proceedings, and judgments of every nature and description including attorneys' fees and costs, presented, brought, or recovered against City for, or on account of any liability under any of the above-mentioned laws, which may be incurred by reason of Contractor's performance under this Agreement.

1.5. Non-Discrimination. In performing this Agreement, Contractor shall not engage in, nor permit its agents to engage in, discrimination in employment of persons because of their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military or veteran status, except as permitted pursuant to section 12940 of the Government Code.

1.6. Non-Exclusive Agreement. Contractor acknowledges that City may enter into agreements with other contractors for services similar to the Services in this Agreement or may have its own employees perform services similar to those Services contemplated by this Agreement.

1.7. Delegation and Assignment. Contractor may not delegate or assign this Agreement, in whole or in part, to any person or entity without the prior written consent of City. Contractor may engage a subcontractor(s) as permitted by law and may employ other personnel to perform services contemplated by this Agreement at Contractor's sole cost and expense.

2.0. COMPENSATION AND BILLING

2.1. Compensation. Contractor shall be paid in accordance with the fee schedule set forth in Exhibit A, not to exceed the yearly compensation as described therein. Contractor's total compensation shall not exceed Eight Hundred and Seventy-Six Thousand Six Hundred and Three Dollars and Thirty-Nine Cents ($876,603.39).

2.2 Contingency. Upon the determination of the City, Contractor may be paid for additional unforeseen repairs and costs associated with this Agreement in an amount not to exceed 10% of the annual cost as set forth in Exhibit A.

2.3. Additional Services. Contractor shall not receive compensation for any services provided outside the Scope of Services set forth in this Agreement without amending this Agreement as provided herein. It is specifically understood that oral requests and/or approvals of such additional services or additional compensation shall be barred and are unenforceable.

2.4. Method of Billing. Contractor may submit invoices to the City for approval on a progress basis, but no more often than two times a month. Said invoice shall be based on the total of all Contractor's services which have been completed to City's sole satisfaction. City shall pay Contractor's invoice within forty-five (45) days from the date City receives said invoice. Each invoice shall describe in detail, the Services performed, the date of performance, and the associated time for completion.

2.5. Records and Audits. Records of Contractor's Services shall be maintained in accordance with generally recognized accounting principles and shall be made available to City for inspection and/or audit at mutually convenient times throughout the term of this Agreement through three (3) years after its termination.

3.0. TIME OF PERFORMANCE

3.1. Commencement and Completion of Work. The Services shall be performed in strict compliance with Exhibit A. Failure to commence work in a timely manner and/or diligently pursue work to completion may be grounds for termination of this Agreement.

3.2. Excusable Delays. Neither party shall be responsible for delays or lack of performance resulting from acts beyond the reasonable control of the party or parties. Such acts shall include, but not be limited to, acts of God, fire, strikes, material shortages, compliance with laws or regulations, riots, acts of war, or any other conditions beyond the reasonable control of a party.

4.0. TERM AND TERMINATION

4.1. Term. This Agreement shall commence on the Effective Date and continue for a period of three (3) years and eight (8) months, ending on June 30, 2026, unless previously terminated as provided herein or as otherwise agreed to in writing by the parties.

4.2. Notice of Termination. City reserves and has the right and privilege of canceling, suspending or abandoning the execution of all or any part of the work contemplated by this Agreement, with or without cause, at any time, by providing written notice to Contractor. The termination of this Agreement shall be deemed effective upon receipt of the notice of termination. In the event of such termination, Contractor shall immediately stop rendering services under this Agreement unless directed otherwise by the City.

4.3. Compensation. In the event of termination, City shall pay Contractor for reasonable costs incurred and Services satisfactorily performed up to and including the date of City's written notice of termination. Compensation for work in progress shall be prorated based on the percentage of work completed as of the effective date of termination in accordance with the fees set forth herein.

5.0. INSURANCE

5.1. Minimum Scope and Limits of Insurance. Contractor shall obtain, maintain, and keep in full force and effect during the life of this Agreement all of the following minimum scope of insurance coverages with an insurance company admitted to do business in California, rated "A," Class X, or better in the most recent Best's Key Insurance Rating Guide, and approved by City:

(a) Commercial general liability, including premises-operations, products/completed operations, broad form property damage, blanket contractual liability, independent contractors, personal injury or bodily injury with a policy limit of not less than One Million Dollars ($1,000,000.00) per occurrence. If such insurance contains a general aggregate limit, it shall apply separately to this Agreement or shall be twice the required occurrence limit.

(b) Business automobile liability for owned vehicles, hired, and non-owned vehicles, with a policy limit of not less than One Million Dollars ($1,000,000.00) combined single limit per accident for bodily injury and property damage.

(c) Workers' compensation insurance as required by the State of California. Contractor agrees to waive, and to obtain endorsements from its workers' compensation insurer waiving subrogation rights under its workers' compensation insurance policy against the City, its officers, agents, employees, and volunteers arising from work performed by Contractor for the City and to require each of its subcontractors, if any, to do likewise under their workers' compensation insurance policies.

5.2. Endorsements. The commercial general liability insurance policy and business automobile liability policy shall contain or be endorsed to contain the following provisions:

(a) Additional insureds: "The City of Costa Mesa and its elected and appointed boards, officers, officials, agents, employees, and volunteers are additional insureds with respect to: liability arising out of activities performed by or on behalf of Contractor pursuant to its contract with City; products and completed operations of Contractor; premises owned, occupied or used by Contractor; automobiles owned, leased, hired, or borrowed by Contractor."

(b) Notice: "Said policy shall not terminate, be suspended, or voided, nor shall it be cancelled, nor the coverage or limits reduced, until thirty (30) days after written notice is given to City."

(c) Other insurance: "Contractor's insurance coverage shall be primary insurance as respects the City of Costa Mesa, its officers, officials, agents, employees, and volunteers. Any other insurance maintained by the City of Costa Mesa shall be excess and not contributing with the insurance provided by this policy."

(d) Any failure to comply with the reporting provisions of the policies shall not affect coverage provided to the City of Costa Mesa, its officers, officials, agents, employees, and volunteers.

(e) Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability.

5.3. Deductible or Self Insured Retention. If any of such policies provide for a deductible or self-insured retention to provide such coverage, the amount of such deductible or self-insured retention shall be approved in advance by City. No policy of insurance issued as to which the City is an additional insured shall contain a provision which requires that no insured except the named insured can satisfy any such deductible or self-insured retention.

5.4. Certificates of Insurance. Contractor shall provide to City certificates of insurance showing the insurance coverages and required endorsements described above, in a form and content approved by City, prior to performing any services under this Agreement.

5.5. Non-limiting. The insurance provisions contained in this Agreement shall not be construed as limiting in any way, the indemnification provisions contained in this Agreement, or the extent to which Contractor may be held responsible for payments of damages to persons or property.

6.0. GENERAL PROVISIONS

6.1. Entire Agreement. This Agreement constitutes the entire agreement between the parties with respect to any matter referenced herein and supersedes any and all other prior writings and oral negotiations. This Agreement may be modified only in writing, and signed by the parties in interest at the time of such modification. The terms of this Agreement shall prevail over any inconsistent provision in any other contract document appurtenant hereto, including exhibits to this Agreement.

6.2. Representatives. The City Manager or his or her designee shall be the representative of City for purposes of this Agreement and may issue all consents, approvals, directives and agreements on behalf of the City, called for by this Agreement, except as otherwise expressly provided in this Agreement.

Contractor shall designate a representative for purposes of this Agreement who shall be authorized to issue all consents, approvals, directives and agreements on behalf of Contractor called for by this Agreement, except as otherwise expressly provided in this Agreement.

6.3. Project Managers. City shall designate a Project Manager to work directly with Contractor in the performance of this Agreement.

Contractor shall designate a Project Manager who shall represent it and be its agent in all consultations with City during the term of this Agreement. Contractor or its Project Manager shall attend and assist in all coordination meetings called by City.

6.4. Notices. Any notices, documents, correspondence or other communications concerning this Agreement or the work hereunder may be provided by personal delivery, facsimile or mail and shall be addressed as set forth below. Such communication shall be deemed served or delivered: a) at the time of delivery if such communication is sent by personal delivery; b) at

the time of transmission if such communication is sent by facsimile; and c) 48 hours after deposit in the U.S. Mail as reflected by the official U.S. postmark if such communication is sent through regular United States mail.

6.5. Drug-free Workplace Policy. Contractor shall provide a drug-free workplace by complying with all provisions set forth in City's Council Policy 100-5, attached hereto as Exhibit "B" and incorporated herein by reference. Contractor's failure to conform to the requirements set forth in Council Policy 100-5 shall constitute a material breach of this Agreement and shall be cause for immediate termination of this Agreement by City.

6.6. Attorneys' Fees. In the event that litigation is brought by any party in connection with this Agreement, the prevailing party shall be entitled to recover from the opposing party all costs and expenses, including reasonable attorneys' fees, incurred by the prevailing party in the exercise of any of its rights or remedies hereunder or the enforcement of any of the terms, conditions, or provisions hereof.

6.7. Governing Law. This Agreement shall be governed by and construed under the laws of the State of California without giving effect to that body of laws pertaining to conflict of laws. In the event of any legal action to enforce or interpret this Agreement, the parties hereto agree that the sole and exclusive venue shall be a court of competent jurisdiction located in Orange County, California.

6.8. Assignment. Contractor shall not voluntarily or by operation of law assign, transfer, sublet or encumber all or any part of Contractor's interest in this Agreement without City's prior written consent. Any attempted assignment, transfer, subletting or encumbrance shall be void and shall constitute a breach of this Agreement and cause for termination of this Agreement. Regardless of City's consent, no subletting or assignment shall release Contractor of Contractor's obligation to perform all other obligations to be performed by Contractor hereunder for the term of this Agreement.

6.9. Indemnification and Hold Harmless. Contractor agrees to defend, indemnify, hold free and harmless the City, its elected officials, officers, agents and employees, at Contractor's sole expense, from and against any and all claims, actions, suits or other legal proceedings brought against the City, its elected officials, officers, agents and employees arising out of the performance of the Contractor, its employees, and/or authorized subcontractors, of the

work undertaken pursuant to this Agreement. The defense obligation provided for hereunder shall apply without any advance showing of negligence or wrongdoing by the Contractor, its employees, and/or authorized subcontractors, but shall be required whenever any claim, action, complaint, or suit asserts as its basis the negligence, errors, omissions or misconduct of the Contractor, its employees, and/or authorized subcontractors, and/or whenever any claim, action, complaint or suit asserts liability against the City, its elected officials, officers, agents and employees based upon the work performed by the Contractor, its employees, and/or authorized subcontractors under this Agreement, whether or not the Contractor, its employees, and/or authorized subcontractors are specifically named or otherwise asserted to be liable. Notwithstanding the foregoing, the Contractor shall not be liable for the defense or indemnification of the City for claims, actions, complaints or suits arising out of the sole active negligence or willful misconduct of the City. This provision shall supersede and replace all other indemnity provisions contained either in the City's specifications or Contractor's Proposal, which shall be of no force and effect.

6.10. Independent Contractor. Contractor is and shall be acting at all times as an independent contractor and not as an employee of City. Contractor shall have no power to incur any debt, obligation, or liability on behalf of City or otherwise act on behalf of City as an agent. Neither City nor any of its agents shall have control over the conduct of Contractor or any of Contractor's employees, except as set forth in this Agreement. Contractor shall not, at any time, or in any manner, represent that it or any of its or employees are in any manner agents or employees of City. Contractor shall secure, at its sole expense, and be responsible for any and all payment of Income Tax, Social Security, State Disability Insurance Compensation, Unemployment Compensation, and other payroll deductions for Contractor and its officers, agents, and employees, and all business licenses, if any are required, in connection with the services to be performed hereunder. Contractor shall indemnify and hold City harmless from any and all taxes, assessments, penalties, and interest asserted against City by reason of the independent contractor relationship created by this Agreement. Contractor further agrees to indemnify and hold City harmless from any failure of Contractor to comply with the applicable worker's compensation laws. City shall have the right to offset against the amount of any fees due to Contractor under this Agreement any amount due to City from Contractor as a result of Contractor's failure to promptly pay to City any reimbursement or indemnification arising under this paragraph.

6.11. PERS Eligibility Indemnification. In the event that Contractor or any employee, agent, or subcontractor of Contractor providing services under this Agreement claims or is determined by a court of competent jurisdiction or the California Public Employees Retirement System (PERS) to be eligible for enrollment in PERS as an employee of the City, Contractor shall indemnify, defend, and hold harmless City for the payment of any employee and/or employer contributions for PERS benefits on behalf of Contractor or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City.

Notwithstanding any other agency, state or federal policy, rule, regulation, law or ordinance to the contrary, Contractor and any of its employees, agents, and subcontractors providing service under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contribution and/or employee contributions for PERS benefits.

6.12. Cooperation. In the event any claim or action is brought against City relating to Contractor's performance or services rendered under this Agreement, Contractor shall render any reasonable assistance and cooperation which City might require.

6.13. Conflict of Interest. Contractor and its officers, employees, associates and subcontractors, if any, will comply with all conflict of interest statutes of the State of California applicable to Contractor's services under this Agreement, including, but not limited to, the Political Reform Act (Government Code Sections 81000, *et seq*.) and Government Code Section 1090. During the term of this Agreement, Contractor and its officers, employees, associates and subcontractors shall not, without the prior written approval of the City Representative, perform work for another person or entity for whom Contractor is not currently performing work that would require Contractor or one of its officers, employees, associates or subcontractors to abstain from a decision under this Agreement pursuant to a conflict of interest statute.

6.14. Prohibited Employment. Contractor will not employ any regular employee of City while this Agreement is in effect.

6.15. Order of Precedence. In the event of an inconsistency in this Agreement and any of the attached Exhibits, the terms set forth in this Agreement shall prevail. If, and to the extent this Agreement incorporates by reference any provision of any document, such provision shall be deemed a part of this Agreement. Nevertheless, if there is any conflict among the terms and conditions of this Agreement and those of any such provision or provisions so incorporated by reference, this Agreement shall govern over the document referenced.

6.16. Costs. Each party shall bear its own costs and fees incurred in the preparation and negotiation of this Agreement and in the performance of its obligations hereunder except as expressly provided herein.

6.17. Binding Effect. This Agreement binds and benefits the parties and their respective permitted successors and assigns.

6.18. No Third Party Beneficiary Rights. This Agreement is entered into for the sole benefit of City and Contractor and no other parties are intended to be direct or incidental beneficiaries of this Agreement and no third party shall have any right in, under or to this Agreement.

6.19. Headings. Headings contained in this Agreement are included solely for convenience and are not intended to modify, explain or to be a full or accurate description of the content thereof and shall not in any way affect the meaning or interpretation of this Agreement.

6.20. Construction. The parties have participated jointly in the negotiation and drafting of this Agreement and have had an adequate opportunity to review each and every provision of the Agreement and submit the same to counsel or other consultants for review and comment. In the event an ambiguity or question of intent or interpretation arises with respect to this Agreement, this Agreement shall be construed as if drafted jointly by the parties and in accordance with its fair meaning. There shall be no presumption or burden of proof favoring or disfavoring any party by virtue of the authorship of any of the provisions of this Agreement.

6.21. Amendments. Only a writing executed by the parties hereto or their respective

successors and assigns may amend this Agreement.

6.22. Waiver. The delay or failure of either party at any time to require performance or compliance by the other of any of its obligations or agreements shall in no way be deemed a waiver of those rights to require such performance or compliance. No waiver of any provision of this Agreement shall be effective unless in writing and signed by a duly authorized representative of the party against whom enforcement of a waiver is sought. The waiver of any right or remedy in respect to any occurrence or event shall not be deemed a waiver of any right or remedy in respect to any other occurrence or event, nor shall any waiver constitute a continuing waiver.

6.23. Severability. If any provision of this Agreement is determined by a court of competent jurisdiction to be unenforceable in any circumstance, such determination shall not affect the validity or enforceability of the remaining terms and provisions hereof or of the offending provision in any other circumstance. Notwithstanding the foregoing, if the value of this Agreement, based upon the substantial benefit of the bargain for any party, is materially impaired, which determination made by the presiding court or arbitrator of competent jurisdiction shall be binding, then both parties agree to substitute such provision(s) through good faith negotiations.

6.24. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original. All counterparts shall be construed together and shall constitute one agreement.

6.25. Corporate Authority. The persons executing this Agreement on behalf of the parties hereto warrant that they are duly authorized to execute this Agreement on behalf of said parties and that by doing so the parties hereto are formally bound to the provisions of this Agreement.

[Signature page follows.]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by and through their respective authorized officers, as of the date first above written.

Telephone:	657-238-6317
Email Address:	doug.ray@siemens.com

Customer Contact:	Daniel Jojala
Customer:	City of Costa Mesa
Address:	77 Fair Dr.
	Costa Mesa CA 92626-6520
Services shall be provided at:	1. City Hall: 77 Fair Drive, Costa Mesa, CA 92626
	2. Police Department: 99 Fair Drive, Costa Mesa, CA 92626

Executive Summary

Customer Needs

The Services proposed in this agreement are specifically designed for City of Costa Mesa, and the services provided herein will help you in achieving your facility goals.

Our Services

Siemens will provide the following services.

Service Description

1. Building Services - Mechanical

- Annual Inspection
- Operational Inspection
- Condenser Tube Cleaning
- Vibration Analysis
- Air Filter Service
- Belt Service
- Coil Cleaning - Condenser
- Cooling Tower Cleaning
- Combustion Analysis
- Customer Directed Support

2. Building Services - Automation Control

- Network Maintenance
- Control Loop Tuning
- Preventative Maintenance
- Software Maintenance
- Customer Directed Support

SIEMENS

Siemens Capabilities & Customer Commitment

Siemens Industry, Inc. is a leading single-source provider of cost-effective facility performance solutions for the comfort, life safety, security, energy efficiency and operation of some of the most technically advanced buildings in the world. For more than 150 years, Siemens has built a culture of long-term commitment to customers through innovation and technology. Siemens is a financially strong global organization with a Branch network that delivers personalized service and support to customers in multiple industries and locations.

References are available upon request.

Building Services – Automation

Services that deliver the outcomes you want to achieve

Services delivered by Siemens have been developed to help you achieve the outcomes you expect.

Network Health

Optimize the health of the network infrastructure by analyzing network traffic and resolving performance issues.

Network Maintenance

Network Maintenance: Using a combination of proprietary diagnostic technologies, digital meters, and network analysis software, Siemens will analyze, optimize and report on the performance of the customer's systems networks a specified number of times per year. Proper network performance helps to ensure the proper speed of communication and accuracy of control, alarming, and reporting across the facility. Using network diagnostic tools, our proactive evaluation of the data network includes an analysis of bandwidth, disturbances, network traffic, communication over the network, and overall operation. The number of networks to be analyzed and the frequency of the service are documented in the List of Maintained Equipment.

Control Loop Tuning

Control loops drift out of calibration with changes in mechanical efficiency, building use, and climatic conditions. Through this service Siemens will ensure control loops for devices such as valves, dampers, actuators, etc., experience minimized overshooting and oscillatory behavior. The control loops to be included as part of this service are itemized in the List of Maintained Equipment in this service agreement.

Preventive Maintenance – Automation

We will provide preventive maintenance in accordance with a program of routines as determined by our experience, equipment application and location. The list of field panels and/or devices included under this service are identified in the List of Maintained Equipment in this service agreement.
Automation controls can drift out of calibration with changes in HVAC component performance characteristics, building use, and climatic conditions. This service will extend equipment life, reduce energy consumption, and reduce the risk of costly and disruptive breakdowns.

Software Maintenance

Using appropriate tools from Siemens' suite of diagnostic tools, we periodically perform system diagnostics and then take corrective actions to ensure that the Building Automation System is performing at peak efficiency or to customer requirements. We make sure that software changes are clear and consistent, address any failed points, points in alarm, points in operator priority and take corrective action. We identify and correct software corruption and inconsistencies; eliminate duplicate points, redundant loops and causes of unnecessary traffic; and address unresolved points and alarm reporting problems. This will ensure that the system operates quickly, accurately and efficiently as originally designed and installed or as determined by current standards or requirements.

Customer Directed Support - 20 hours annually, not to exceed 5 hours per quarter.

With Customer Directed Support, Siemens will provide a trained and experienced specialist or technician who will work under your direction. The intent of this service is to offer you labor assistance in completing a special project, or to meet a facility objective. Specific job responsibilities, goals, work hours and other associated deliverables of this service agreement.

Emergency Response Times

Emergency Online/Phone Response

Premium

Monday through Sunday, 24 Hours per Day System and software troubleshooting and diagnostics will be provided remotely to enable faster response to emergency service requests and to reduce the costs and disruptions of downtime. Siemens will respond within 2 hours, Monday through Sunday, 24 hours per day, including Holidays, upon receiving notification of an emergency, as determined by your staff and Siemens. Where applicable, Siemens will furnish and install the necessary online service technology to enable us to remotely access into your system, through a communications protocol (internet connection or dedicated telephone line) that will be provided by the facility. Where remote access is not available to the system, Siemens will provide phone support to your staff to assist in their onsite troubleshooting and diagnosis. If remote diagnostics determine a site visit is required to resolve the problem, a technician can be dispatched. Depending on your contract coverage, the on-site dispatch will be covered or will be a billable service call.

Emergency On-site Response

Premium

Monday through Sunday, 24 hours a day, Emergency Onsite Response will be provided to reduce the costs and disruptions of downtime when an unexpected problem does occur. Siemens will provide this service between scheduled service calls and respond onsite at your facility within 4 hours for emergency conditions, as determined by your staff and Siemens, Monday through Sunday, 24 hours per day, including Holidays, upon receiving notification of an emergency. Non-emergency conditions, as determined by your staff and Siemens, may be incorporated into the next scheduled service call.

Building Services – Mechanical

Services that deliver the outcomes you want to achieve.

Services delivered by Siemens have been developed to help you achieve the outcomes you expect.

Air Filter Service

Through this service Siemens will maintain indoor air quality by changing filters and minimizing dust and particles from collecting in the ductwork. This service also helps ensure proper flow through cooling and heating coils thus helping to prevent restrictions in airflow and provide better heat transfer, leading to better system performance and energy efficiency. The air handling equipment in which this air filter service is included is identified in the Mechanical Equipment List. Any filters that require replacement on a frequency other than the scheduled operational or annual service visits will be specifically identified immediately following this paragraph. In the event the air filter service or cleaning requires different frequencies than indicated (due to experience or changes in operating conditions), recommendations will be made for your approval to adjust the frequencies and any associated price.

Annual Inspection

Siemens will perform scheduled annual preventive maintenance in accordance with a program of standard routines as determined by our experience, equipment application, and equipment operating hours that are recommended by each equipment manufacturer and location. This service is designed to optimize the reliability and efficiency of the equipment, and provide you with possible indications of excessive wear and damage to your systems before a catastrophic failure occurs. Depending on our findings we will also provide recommendations for additional service(s) that will help to better enhance equipment performance and / or report any other deficiencies that are not corrected within the scope of this agreement. The equipment included under this service is itemized in the Mechanical Equipment List in this service agreement.

Belt Service

Siemens will provide necessary labor and material to change the belt(s) on the listed equipment. The belts will be changed during annual or seasonal inspections once per year

Coil Cleaning - Condenser (Refrigeration)

Through this service Siemens will improve airflow across condenser coils and improve heat transfer. This service will help to extend the life of the compressors and improve efficiency. Coil cleaning consists of cleaning the outside surface of the condensing unit coils to remove any airborne particles, or dirt buildup by using a brush, high pressure air, chemical with low pressure wash or chemical with high pressure wash at our discretion based on the condition of the outside environment and coil accessibility. The equipment included under this service is itemized in the Mechanical Equipment List in this service agreement. Any Coils that require cleaning on a frequency other than the scheduled operational or annual service visits will be specifically identified immediately following this paragraph.

Condenser Tube Cleaning

Siemens will provide necessary labor and material to remove the condenser head and manually clean the condenser tubes with the appropriate cleaning equipment and replace the condenser head when cleaning is completed. This is done to maximize heat transfer which should result in efficiently operating equipment. The condenser tubes will be cleaned during normal hours at a time that is mutually agreeable between your staff and Siemens. Acid washing to remove excessive scale build up due to poor water treatment is not included with this service.

Cooling Tower Cleaning

Siemens will drain, clean and remove normal debris from the cooling tower basins and distribution pans. This provides for even water flow and reduces the likelihood that debris will enter the condenser water system that could block chiller condenser tubes and restrict condenser flow, thus helping to prevent nuisance chiller shutdowns and poor system energy efficiency. The cooling towers included under this service are itemized in the Mechanical Equipment List in this service agreement.

Operating Inspection

Through this service Siemens will help to ensure mechanical equipment continues to operate efficiently, safely and with minimal operating disruptions during the operating season. We will provide routine operating inspection(s) to check system performance in accordance with a program of standard routines as determined by our experience, the equipment manufacturer's published recommendations, equipment application, and location. This service will focus on equipment operation, fluid levels, operating and safety controls, and safe equipment operation. The equipment included under this service is itemized in the Mechanical Equipment List in this service agreement.

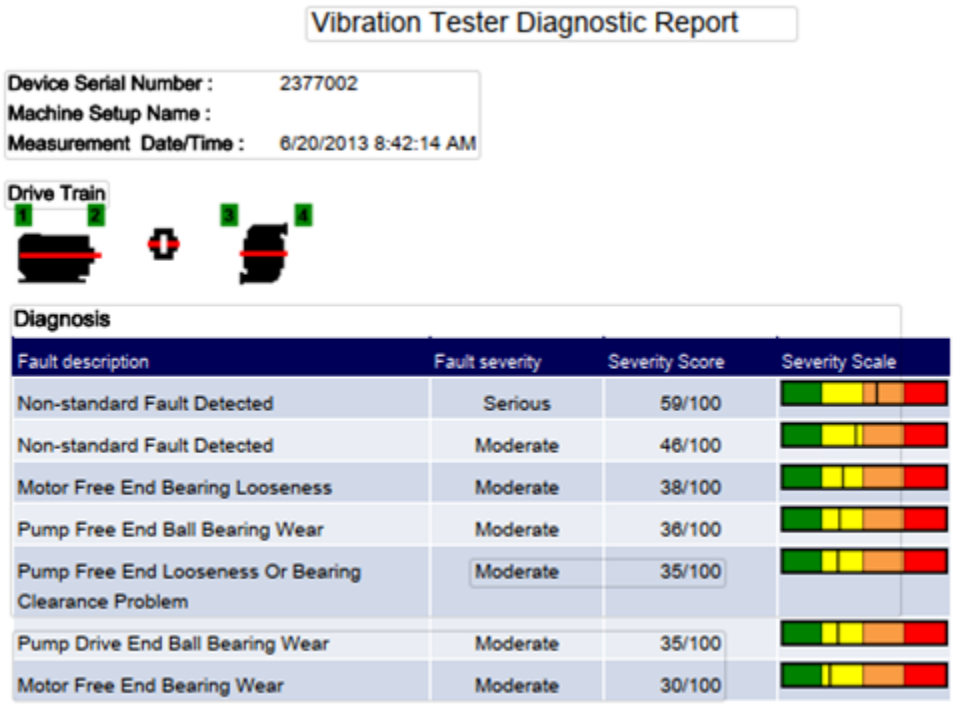
Combustion Analysis

Siemens will utilize electronic flue gas analysis to perform combustion analysis, whereby we adjust the burner controls and linkages as required for efficiency and pollution control. If existing equipment cannot meet current pollution requirements, we will make recommendations for system improvements. The boilers included under this service are itemized in the Mechanical Equipment List in this service agreement.

Eddy Current Testing (To be done in Period 3, 2025)

Eddy Current Testing helps to ensure heat exchanger tubes are within manufacturer's specifications and tubes are free of defects, thus helping to prevent costly waterside failures. After completion of each test, Siemens shall interpret the results and provide you with a written report including recommendations for corrective action(s). The following systems are covered in the Agreement for chillers itemized in the Mechanical Equipment List:

- Chiller Condenser tubes (once every 3 years)



Vibration Analysis

Many motor and driven component failures are directly related to mechanical failure. Vibration analysis can help you uncover mechanical issues well in advance of a failure and before motors are permanently damaged. As mechanical components begin to wear improperly, equipment begins to vibrate. By analyzing the signature of this vibration, the severity of the issues can be determined as well as the likely cause of the problem. The system combines a powerful diagnostic engine with a straightforward data collection process to analyze and report on specific machine faults and their severity. It provides quantifiable proof of equipment condition that drives budget and investment decisions to repair or replace machinery.

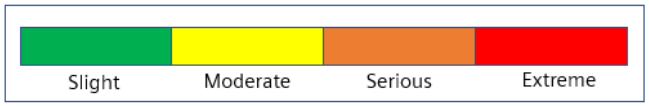
The early detection of mechanical issues can help increase uptime and reduce the overall cost of repairs by identifying issues before they cause major damage. When an issue is identified, plans can be implemented to repair and minimize business interruptions.

Services Performed on:

- Pumps
- Air Handler Motors

Vibration Tester Diagnostic Report

Device Serial Number : 2377002
Machine Setup Name :
Measurement Date/Time : 6/20/2013 8:42:14 AM



Drive Train

Diagnosis

Fault description	Fault severity	Severity Score	Severity Scale
Non-standard Fault Detected	Serious	59/100	
Non-standard Fault Detected	Moderate	46/100	
Motor Free End Bearing Looseness	Moderate	38/100	
Pump Free End Ball Bearing Wear	Moderate	36/100	
Pump Free End Looseness Or Bearing Clearance Problem	Moderate	35/100	
Pump Drive End Ball Bearing Wear	Moderate	35/100	
Motor Free End Bearing Wear	Moderate	30/100	

Severity Scale

The Scale is an indication of the severity for any particular fault machine condition.

Follow these recommended actions for each severity level to avoid failure. In general, the scale may be interpreted as:

- **Slight**
  No repair action is recommended. Monitor the machine and retest after regular machine planned maintenance to verify maintenance was performed correctly.

- **Moderate**
  (Months, even up to a year) – Repair action may be needed in the future. A machine failure is possible, so plan accordingly. Increase the frequency of vibration testing on this equipment and review spare parts availability.

- **Serious**
  (Weeks) – Repair action may be needed before the next planned downtime. There may be other physical evidence of the fault in terms of noise or higher bearing temperatures. Retest the machine within a short period to confirm finds. Limit the run time of the machine, if possible, and determine a fault progression trend to prevent additional component failure.

Note:

Time to failure will vary depending on the equipment type, age, machine load, environmental conditions, and other variables.

- **Extreme**
  (Days) – Consider shutting down the equipment and tacking repair action **now** to avoid catastrophic failure. There is likely other physical evidence of the fault in terms of noise, higher bearing temperatures or visible movement. Retest the machine within a short period to confirm finds.

Customer Directed Support - 80 hours annually, not to exceed 20 hours per quarter.

With Customer Directed Support, Siemens will provide a trained and experienced specialist or technician who will work under your direction. The intent of this service is to offer you labor assistance in completing a special project, or to meet a facility objective. Specific job responsibilities, goals, work hours and other associated deliverables of this service agreement are listed in the Appendix section of this service agreement.

Equipment Inventory

CDS - Customer Direct Service - 100 total hours. Not to exceed 20 hours per quarter for mechanical, 5 hours per quarter for automation.

Mechanical Exclusions and Clarifications

Unless expressly stated otherwise, Services do not include and Siemens is not responsible for: (a) re-installation or relocation of Equipment; (b) painting or refinishing of Equipment or surrounding surfaces; (c) parts, accessories, attachments or other devices added to Equipment but not furnished by Siemens; (d) failure to continually provide suitable operating environment including, but not limited to, adequate space, ventilation, electrical power and protection from the elements; (e) the removal or re-installation of replacement valves, dampers, water flow and tamper switches, airflow stations, venting or draining systems, and any other permanently mounted integral pipe or air duct component; (f) installation / removal, and / or rental fees for any temporary HVAC equipment if necessary; (g) Cranes, hoisting or rigging that may be required; (h) Leaks at gaskets O-rings or seals; or (i) latent defects in the Equipment that cannot be discovered through the standard provision of the Services. Siemens is not responsible for services performed on any Equipment other than by Siemens or its agents.

Siemens will not be responsible for the maintenance, repair or replacement of, or Services necessitated by reason of: (a) non-maintainable, non-replaceable or obsolete parts of the Equipment, including but not limited to ductwork, shell and tubes, heat exchangers, coils, unit cabinets, casings, refractory material, electrical wiring, water and pneumatic piping, structural supports, cooling tower fill, slats and basins, etc. unless otherwise expressly stated elsewhere in this Proposal; or (b) negligence, abuse, misuse, improper or inadequate repairs or modifications by others, improper operation, lack of operator maintenance or skill, failure to comply with manufacturer's operating and environmental requirements.

Siemens is not responsible for repairs, replacements, or services to Equipment due to corrosion, erosion, improper or inadequate water treatment by others, electrolytic or chemical action, or reasons beyond its reasonable control.

Siemens is not responsible for water treatment related damages to the condenser, evaporator, hot water, or steam systems.

Siemens is not responsible for service calls due to power outages.

Siemens is not responsible for repair labor/materials/parts for ice machines, refrigerators, freezers, kitchen specialty equipment, boilers, laundry equipment, replacement refrigerant, replacement glycol, or replacement control valves unless included elsewhere. On occasion a flush and refill of the Water-Glycol mixtures may be required. Flush and refill is not included in the standard service offering.

Siemens is not responsible for helium replacement in chiller systems that service Medical Imaging Systems.

Siemens is not responsible for repair labor/materials/parts for covered equipment that has experienced electrical damage due to power surges, single phasing, and related electrical issues.

Connectivity and Communications

Siemens Service Portal

The Service Portal complements the personalized services you will receive from your local Siemens office by providing greater visibility into equipment and services delivered by Siemens. This web-based portal allows you the ability to submit service requests, confirm and modify schedules, track repairs, manage agreements, generate reports, and access critical information; then share it across your entire enterprise quickly and efficiently. The Service Portal is a user-friendly way to increase your productivity and the value of your service program.

Data security as a basic requirement

We value confidentiality and long-term partnerships. That is why we give the security of your data the highest priority. Before we implement an enhanced service package with remote support, we conduct an in-depth analysis of the situation, taking into account national and international regulations, technical infrastructures and industry specifics. Our service employees carefully evaluate your needs on an individual basis with a view toward information security.

SIEMENS

Service Team

An important benefit of your Service Agreement derives from having the trained building service personnel of Siemens Industry, Inc. familiar with your building systems. Our implementation team of local experts provides thorough, reliable service and scheduling for the support of your system.

Added to the team is a team of building experts at our Digital Service Center. The benefits you receive are less disruption to your employees at the site, less intrusive on the system at peak hours, fewer emissions for trucks rolled, and real time analytics with digital workspace hours.

The following list outlines the service team that will be assigned to the service agreement for your facility

Your Assigned Team of Service Professionals will include:

Doug Ray manages the overall strategic service plan based upon your current and future service requirements.

Client Services Manager is responsible for ensuring that our contractual obligations are delivered, your expectations are being met and you are satisfied with the delivery of our services.

Primary Service Specialist is responsible for performing the ongoing service of your system.

Secondary Service Specialist who will be familiarized with your building systems to provide in-depth backup coverage.

Remote Services Specialist is responsible for the execution of remote services including proactive planned tasks, in-depth fault analysis and identification of corrective actions.

Service Operations Manager is responsible for managing the delivery of your entire support program and service requirements.

Service Coordinator is responsible for scheduling your planned maintenance visits, and handling your emergency situations by taking the appropriate action.

Service Administrator is responsible for all service invoicing including both service agreement and service projects.

Terms and Conditions

Terms and Conditions (Click to download)
Terms & Conditions (www.siemens.com/standard-terms-service)

Price Escalation. If, during the term of this Contract, the price of various materials or labor or logistics are increased as reflected by CRU, CMAI, COMEX market indexes or IHS Markit, then Siemens may increase the applicable yearly Investment or apply a surcharge accordingly.

As a result of the global Covid-19 Virus outbreak, temporary delays in delivery, labor or services from Siemens and its sub-suppliers or subcontractors may occur. Among other factors, Siemens' delivery is subject to the correct and punctual supply from sub-suppliers or subcontractors, and Siemens reserves the right to make partial deliveries or modify its labor or services. While Siemens shall make every commercially reasonable effort to meet the delivery or service or completion date mentioned above, such date is subject to change.

Agreement Terms for Investments

Services shall be provided at:

1. Costa Mesa City Hall: 77 Fair Dr., Costa Mesa, CA 92626
2. Costa Mesa Police Department Headquarters: 99 Fair Dr., Costa Mesa, CA 92626

Siemens Industry, Inc. shall provide the services as identified in this Proposal and pursuant to the associated terms and conditions contained within.

This proposal is presented utilizing Sourcewell Contract #070121-SIE to Sourcewell Member #2173, City of Costa Mesa.

Duration (Initial Term and Renewal): This Agreement shall remain in effect for an Initial Term of 4 Periods beginning 2022-11-15. After the expiration of the Initial Term, this Agreement shall automatically renew for successive one year periods. The Investments for each year after the Initial Term of the Agreement and each year of each renewal of this Agreement shall be determined as the immediate prior year's Investment plus an escalator of 5.5% or as allowed per this proposal. In addition, each renewal term pricing shall be adjusted for any additions or deletions to services selected for the renewal term.

Initial Term Investments:

Period	Period Range	Billing Frequency	Annual Price
1**	Nov 15, 2022 - June 30, 2023	Annually	$154,472.71*
2	July 1, 2023 - June 30, 2024	Annually	$224,734.43*
3***	July 1, 2024 - June 30, 2025	Annually	$249,167.58*
4	July 1, 2025 - June 30, 2026	Annually	$248,228.67*

Multi-Period Investment Total	$876,603.39

***Amount Due In Advance Based On Billing Frequency**

Applicable sales taxes, if included in the investment amount, are estimated only and will be calculated based on local requirements at the time of invoicing. The pricing quoted in this Proposal are firm for 30 days.

**** Please Note: Per customer request, Period 1 has a shortened term period of 8 months.**

*****Please Note: Period 3 has Eddy Current Testing for Chillers.**

Advisory and Performance Services

SIEMENS
Ingenuity for life

Manage System Operation & Compliance

Services that keep systems performing at their best, as designed and intended to operate, help you achieve:

- Optimized comfort, safety, and security
- Fulfilled regulatory requirements
- Greater transparency into critical systems
- Reduced operating risk

Facility Assessment & Planning
In-depth building system assessment and recommendations, definition of relevant KPIs, and development of your service program

Test & Inspection
Regular check-ups to measure system performance compared to your defined facility and regulation requirements and risks

Preventive Services
Services performed on a regular schedule or based on data analytics to verify and improve system state

Documentation Management
Management of critical building system and compliance information, with organization and access determined by your needs

Corrective Services
Immediate response to system failures or faults to restore functionality and integrity to desired state

Optimize Performance & Productivity

Enhance building performance with improvement measures that increase productivity and efficiency; common outcomes include:

- Enhanced system performance
- Streamlined operational processes
- Improved decision-making through data analytics

Optimization Planning
Planning and prioritization of improvement measures to increase building and/or process performance and efficiencies

Predictive Services
Systems are audited and monitored to detect abnormalities or faults, with recommendations provided and/or corrective actions taken

System Improvements & Integration
Enhancements or additions to your current system to increase staff productivity, system performance, and operational/energy efficiencies

Training & Operational Support
Training, coaching, and on-site support to increase staff productivity and knowledge

Managed Services
On-site and/or remote resources monitor system events and alarms, and take appropriate action

Protect Lifecycle Investment

Leverage past investments and address future requirements with advanced and proven technology, to achieve outcomes such as:

- Extended system life
- Maximized return on investment
- Realized benefits of new technology

Technology Planning
Consulting services identify technology improvement opportunities that help achieve performance goals while leveraging past investments

System Updates / Upgrades
Software upgrades and firmware updates are provideded, delivering the most current technology and functionality

System Migration / Modernization
Enhancements to your systems by elevating them to the most current hardware and software platforms, resulting in increased functionality and performance levels

Retrofits & Extensions
Modifications are made to existing systems to accommodate changes to your facility usage and footprint

New Installation Services
Startup, commissioning, and other installation services are completed to ensure new equipment operates at maximum performance

Enhance Energy Management & Sustainability

Increase the value and competitiveness of buildings and infrastructure by delivering solutions that:

- Conserve energy
- Maximize efficiency
- Minimize operating costs
- Reduce environmental impact

Energy & Sustainability Master Planning
Strategy and planning services provide a detailed master plan to provide budget transparency, enable improved performance and sustainability, reduce energy consumption, and minimize operational costs

Energy Conservation
Implementing energy conservation strategies reduces total carbon emissions through efficiency measures and minimizes energy spend by optimizing consumption

Energy Production & Storage
Using innovative design and simulation tools. energy production and storage solutions improve energy efficiency, energy availability, security of supply, and carbon reduction

Energy Procurement
With advanced procurement technologies and beneficial contract terms, these tailored procurement and supply services reduce costs, reduce risks, and create certainty

Agenda Report

File #: 22-917 **Meeting Date:** 11/15/2022

TITLE:

SUB-RECIPIENT AGREEMENT FOR THE 2021 URBAN AREA SECURITY INITIATIVE GRANT

DEPARTMENT: **POLICE DEPARTMENT AND FIRE AND RESCUE DEPARTMENT**

PRESENTED BY: **BRENDA EMRICK, ACTING EMERGENCY SERVICES MANAGER**

CONTACT INFORMATION: **BRENDA EMRICK, ACTING EMERGENCY SERVICES MANAGER, (714) 327-7406**

RECOMMENDATION:

Staff recommends the City Council authorize the City Manager and City Clerk to execute the Sub-Recipient Agreement (Attachment 1) with the City of Santa Ana for the FY 2021 Urban Areas Security Initiative (UASI) Grant Program.

BACKGROUND:

In 2005, the cities of Anaheim and Santa Ana were selected as administrators of the Urban Area Security Initiative (UASI) Grant for the Anaheim/Santa Ana Urban Area jurisdiction. Each year, Anaheim and Santa Ana trade off being the lead agency responsible for the program cycle. Santa Ana, through the Santa Ana Police Department, is the lead agency for the FY 2021 UASI Grant. The City of Costa Mesa is within the Anaheim/Santa Ana Urban Area jurisdiction. As part of this Urban Area, the City of Costa Mesa is eligible to receive equipment or services purchased with grant funds or to receive reimbursement for purchases of authorized equipment, services, joint training exercises, and expenses related to overtime for training evolutions, upon prior written approval from Santa Ana.

The UASI Grant is a reimbursement grant, meaning cities must expend their own funds for eligible expenditures, and then apply for reimbursement of these expenditures. In an effort to ensure each city does not expend funds for equipment, services, or training costs that are not allowable under the UASI Grant, each city is required to obtain prior written approval from the Emergency Management Bureau of the Santa Ana Police Department for expenditures it plans to submit for reimbursement.

Historically, the City received UASI grants to fund equipment purchases and training costs associated with the instruction and delivery of approved UASI courses. For FY 2019, the City did not receive a UASI allocation. However, Santa Ana recommended that the City enter into the Sub-Recipient Agreement with Santa Ana so that the City would be eligible to receive reimbursement in the event the City incurs eligible expenses during the grant period.

ANALYSIS:

The City did not receive a FY 2019 UASI grant. However, pursuant to Santa Ana's recommendation, staff recommends that the City Council authorize the City Manager to enter into the Sub-Recipient Agreement, so the City can be eligible to receive reimbursement in the event the City incurs eligible expenses during the grant period.

If the City Council authorizes the City Manager to enter into the Sub-Recipient Agreement, Police Department Training Bureau staff, with assistance from the Finance Department, will continue to track City expenditures associated within the grant parameters. If approved, the Police Department would process reimbursement requests with UASI grant staff on behalf of the City.

ALTERNATIVES:

The City Council could reject City participation in the UASI Grant Program. This approach would cause those expenses to be paid from the City's budget with no potential for reimbursement from the UASI Grant funds.

FISCAL REVIEW:

No fiscal impact.

LEGAL REVIEW:

The City Attorney's Office has reviewed this report and the agreement between the City of Santa Ana and the City of Costa Mesa and has approved them as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goals:

- Strengthen the Public's Safety and Improve the Quality of Life
- Advance Environmental Sustainability and Climate Resiliency

CONCLUSION:

Staff recommends the City Council authorize the City Manager and City Clerk to execute the Sub-Recipient Agreement (Attachment 1) with the City of Santa Ana for the FY 2021 Urban Areas Security Initiative (UASI) Grant Program.

AGREEMENT FOR TRANSFER OR PURCHASE OF EQUIPMENT/SERVICES OR

FOR REIMBURSEMENT OF TRAINING COSTS

FOR FY2021 URBAN AREAS SECURITY INITIATIVE (UASI)

BETWEEN
THE CITY OF SANTA ANA
AND CITY OF COSTA MESA

THIS AGREEMENT is made and entered into this 29 day of April 2022, by and between the CITY OF CITY OF SANTA ANA, a municipal corporation (the "CITY"), and CITY OF COSTA MESA (the "SUB-RECIPIENT" or "Contractor").

W I T N E S S E T H

WHEREAS, CITY, acting through the Santa Ana Police Department in its capacity as a Core City for the Anaheim/Santa Ana Urban Area under the FY2021 Urban Areas Security Initiative, has applied for, received and accepted a grant entitled "FY 2021 Urban Areas Security Initiative" from the federal Department Of Homeland Security(DHS) Federal Emergency Management Agency (FEMA), through the State of California Governor's Office of Emergency Services (CalOES), to enhance countywide emergency preparedness (the "grant"), as set forth in the grant guidelines and assurances that are incorporated to this Agreement by reference and located at:

U.S. Department of Homeland Security "Fiscal Year 2021 Homeland Security Grant Program (HSGP) Notice of Funding Opportunity (NOFO)"
https://www.fema.gov/sites/default/files/documents/FEMA_FY2021-HSGP-NOFO_02-19-21.pdf

California Office of Emergency Services "FY2021 Homeland Security Grant Program: California Supplement to Federal Program Guidance and Application Kit"
https://www.caloes.ca.gov/wp-content/uploads/Grants/Documents/FY-2021-HSGP-State-Supplement.pdf

Copies of the grant guidelines shall be retained in the Anaheim/Santa Ana Grant Office.

WHEREAS, this financial assistance is administered by the CITY OF SANTA ANA ("CITY") and is overseen by the California Governor's Office of Emergency Services ("CalOES"); and

WHEREAS, this financial assistance is being provided to address the unique equipment, training, planning, and exercise needs of large urban areas, and to assist them in building an enhanced and sustainable capacity to prevent, respond to, and recover from threats or acts of terrorism; and

WHEREAS, the Anaheim/Santa Ana Urban Area ("ASAUA") consists of 34 cities in

Orange County, including the City of Anaheim and the City of Santa Ana, the County of Orange, Santa Ana Unified School District Police, California State University, Fullerton, University of California, Irvine, Municipal Water District of Orange County, and the Orange County Fire Authority; and

WHEREAS, the Office of Grants Management ("OGM") awarded a FY2021 UASI Grant of $5,113,750 ("Grant Funds") to the CITY OF SANTA ANA, as a Core City, for use in the ASAUA; and

WHEREAS, the CITY has designated the Chief of Police, or his designee and the Santa Ana Police Department, Emergency Management Director ("UASI Grant Office") to provide for terrorism prevention and emergency preparedness; and

WHEREAS, the UASI Grant Office now wishes to distribute FY2021 UASI Grant Funds throughout the ASAUA, as further detailed in this Agreement ("Agreement") to CITY OF COSTA MESA ("SUB-RECIPIENT") and others;

WHEREAS, the CITY and SUB-RECIPIENT are desirous of executing this Agreement as authorized by the City Council and the Chief of Police which authorizes the CITY to prepare and execute the Agreement.

NOW, THEREFORE, IT IS MUTUALLY AGREED AS FOLLOWS:

I. INTRODUCTION

§101. Parties to the Agreement

The parties to this Agreement are:

A. The CITY, a municipal corporation, having its principal office at 20 Civic Center Plaza, Santa Ana, CA 92702; and

B. CITY OF COSTA MESA, a municipal corporation, 99 Fair Drive, Costa Mesa, CA 92626

§102. Representatives of the Parties and Service of Notices

A. The representatives of the respective parties who are authorized to administer this Agreement and to whom formal notices, demands and communications shall be given are as follows:

1. The representative of the City of Santa Ana shall be, unless otherwise stated in the Agreement:

Richard Weber, Commander
Santa Ana Police Department
Homeland Security Division
60 Civic Center Plaza
Santa Ana, CA 92702
Phone: (714) 245-8730
rweber@santa-ana.org

2. The representative of CITY OF COSTA MESA

shall be: Name:_____

Title: _____

Sub Recipient Name: _____

Sub Recipient Address: _____

City_____ State: _____ Zip:_____

Phone: _____

E-mail: _____

B. Formal notices, demands and communications to be given hereunder by either party shall be made in writing and may be effected by personal delivery or by registered or certified mail, postage prepaid, return receipt

requested and shall be deemed communicated as of the date of mailing.

C. If the name of the person designated to receive the notices, demands or communications or the address of such person is changed, written notice shall be given, in accord with this section, within five (5) business days of said change.

§103. Independent Party

SUB-RECIPIENT is acting hereunder as an independent party, and not as an agent or employee of the CITY OF SANTA ANA. No employee of SUB-RECIPIENT is, or shall be an employee of the CITY OF SANTA ANA by virtue of this Agreement, and SUB-RECIPIENT shall so inform each employee organization and each employee who is hired or retained under this Agreement. SUB-RECIPIENT shall not represent or otherwise hold out itself or any of its directors, officers, partners, employees, or agents to be an agent or employee of the CITY OF SANTA ANA.

§104. Conditions Precedent to Execution of This Agreement

SUB-RECIPIENT shall provide copies of the following documents to the CITY OF SANTA ANA, unless otherwise exempted.

A. Standard Assurances (Grant Assurances) in accordance with section 412A of this Agreement attached hereto as Exhibit A and made part hereof.

B. Certifications Regarding Ineligibility, Suspension and Debarment as required by Executive Order 12549 in accordance with Section 412 of this Agreement and attached hereto as Exhibit B and made a part hereof.

C. Certifications and Disclosures Regarding Lobbying in accordance with Section 412C of this Agreement and attached hereto as Exhibit C and made a part hereof. SUB-RECIPIENT shall also file a Disclosure Form at the end of each calendar quarter in which there occurs any event requiring disclosure or which materially affects the accuracy of the information contained in any Disclosure Form previously filed by SUB-RECIPIENT.

II. TERM AND SERVICES TO BE PROVIDED

§201. Time of Performance

The term of this Agreement shall commence on 9/1/2021 and end on 3/31/2024 or upon the final disbursement of all of the Grant Amount (as defined in Section 301) and any additional period of time as is required to complete any necessary close out activities. Said term is subject to the provisions herein.

§202. Use of Grant Funds

A. CITY may, a) transfer to SUB-RECIPIENT, equipment or services purchased with grant funds and in accordance with grant guidelines set forth above; or, b) reimburse SUB-RECIPIENT for purchase of authorized equipment, exercises, services or training upon receiving prior written approval from CITY or its designee and in accordance with grant guidelines and in full compliance with all of the SUB-RECIPIENT'S purchasing and bidding procedures. SUB-RECIPIENT shall specify the equipment, services, exercises and training to be purchased using the Application for Project Funding. A paper copy of this document will be provided to SUB- RECIPIENT by CITY. In addition, a compact disc with a copy of the document will be provided to SUB-RECIPIENT by CITY. If additional copies of the document are needed, SUB-RECIPIENT may contact the Santa Ana Grant Coordinator and it will be provided.

B. SUB-RECIPIENT shall provide any reports requested by the CITY regarding the performance of the Agreement. Reports shall be in the form requested by the CITY, and shall be provided in a timely manner.

C. SUB-RECIPIENT shall provide the CITY a copy of its most current procurement guidelines and follow its own procurement requirements as long as they meet the minimum federal requirements. Federal procurement requirements for the FY2021 UASI Grant can be found at 2 Code of Federal Regulations (CFR) Part 200 "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards."

D. The Authorized Equipment List (AEL) is a list of the allowable equipment which may be purchased pursuant to this Agreement and is located at https://www.fema.gov/authorized-equipment-list, and incorporated to this Agreement by reference. A copy of the AEL shall be retained in the Anaheim/Santa Ana Grant Office. Unless otherwise stated in program guidance any equipment acquired pursuant to this Agreement shall meet all mandatory regulations and/or DHS-adopted standards to be eligible for purchase using grant funds.

   Any equipment acquired or obtained with Grant Funds:

   1. Shall be made available under the California Disaster and Civil Defense Master Mutual Aid Agreement in consultation with representatives of the various fire, emergency medical, hazardous materials response services,

and law enforcement agencies within the jurisdiction of the applicant;

2. Shall be consistent with needs as identified in the National Priorities and Core Capabilities, the State Homeland Security Strategy and the Anaheim/Santa Ana Urban Area and Orange County Operational Area Homeland Security Grants Strategy, the Threat Hazard Identification and Risk Assessment (THIRA), the State Preparedness Report; and deployed in conformance with those plans;

3. Shall be made available pursuant to applicable terms of the California Disaster and Civil Defense Master Mutual Aid Agreement and deployed with personnel trained in the use of such equipment in a manner consistent with the California Law Enforcement Mutual Aid Plan or the California Fire Services and Rescue Mutual Aid Plan;

4. Shall be subject to the requirements of Title 2 CFR Part 200.313 and 200.314. For the purposes of this subsection, "Equipment" is defined as nonexpendable property that is not consumed or does not lose its identity by being incorporated into another item of equipment, which costs $5,000 or more per unit, or is expected to have a useful life of one (1) year or more.

5. Shall be used by SUB-RECIPIENT in the program or project for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds. When no longer useful for the original program or project, the Equipment may be used in other activities currently or previously supported by a Federal agency.

6. Shall be made available for use on other projects or programs currently or previously supported by the Federal Government, providing such use will not interfere with the work on the projects or program for which it was originally acquired. First preference for other use shall be given to other programs or projects supported by the awarding agency.

7. Shall be recorded on a ledger. The record shall include: (a) description of the item of Equipment, (b) serial number or other identification number, (c) the source of funding for the property (including FAIN); (d) who holds the title, (e) date of acquisition; (f) the per unit acquisition cost of the Equipment, (g) percentage of federal participation in the project costs for the Federal award under which the property was acquired, (h) location, and (i) use and condition of Equipment, and (j) ultimate disposition data including the date of disposal and sale price of the property. Records must be retained pursuant to 2 CFR Part 200.313.

8. All equipment obtained under this Agreement shall have an ASAUA identification decal affixed to it, and, when practical, shall be affixed where it is readily visible.

9. A physical inventory of the Equipment shall be taken and the results reconciled with the Equipment records at least once every two years.

Inventory shall also be taken prior to any UASI, State or Federal monitor visits.

10. SUB-RECIPIENT shall exercise due care to preserve and safeguard equipment acquired with grant funds from damage or destruction and shall provide regular maintenance and such repairs for said equipment as necessary, in order to keep said equipment continually in good working order. Such maintenance and servicing shall be the sole responsibility of SUB-RECIPIENT, who shall assume full responsibility for maintenance and repair of the equipment throughout the life of said equipment.

11. SUB-RECIPIENT shall identify a Point-of-Contact (POC) to be responsible for all Equipment prior to the receipt of the item(s). POC will serve as the custodian of the Equipment. SUB-RECIPIENT shall notify the CITY of any change in the POC and assume the responsibility of advising the new custodian of all UASI grant program guidelines and requirements.

12. SUB-RECIPIENT shall contact the ASAUA Grant Office prior to initiating the disposition process. Disposal of equipment shall be conducted pursuant to 2 CFR Part 200.313. The ASAUA will contact the awarding agency for disposition instructions, if necessary, prior to any action being taken.

E. Any training paid pursuant to this Agreement shall conform to the guidelines as listed in FY2021 Homeland Security Grant Program, as set forth above. All training expenses must be pre-authorized by CalOES. A catalogue of Grantor approved and sponsored training courses is available at https://cdp.dhs.gov/.

F. Any exercise paid pursuant to this Agreement shall conform to the guidelines as listed in FY2021 Homeland Security Grant Program, as set forth above. Detailed Homeland Security Exercise and Evaluation Program Guidance is available at https://www.fema.gov/emergency-managers/national-preparedness/exercises/hseep.

G. Any planning paid pursuant to this Agreement shall conform to the guidelines as listed in FY2021 Homeland Security Grant Program, as set forth above.

H. Any organizational activities paid pursuant to this Agreement shall conform to the guidelines as listed in FY2021 Homeland Security Grant Program, as set forth above.

III. PAYMENT

§301. Payment of Grant Funds and Method of Payment

A. CITY may, a) transfer to SUB-RECIPIENT, equipment or services purchased with grant funds; or, b) reimburse SUB-RECIPIENT for the purchase of authorized equipment, exercises, services or training upon receiving prior written approval from CITY or its designee and in accordance with grant guidelines and in full compliance with all of the SUB-RECIPIENT'S purchasing and bidding procedures. SUB-RECIPIENT shall specify the equipment, exercises, services or training to be purchased using the Application for Project Funding. A copy of this document will be provided to SUB-RECIPIENT by CITY. If additional copies of the document are needed, SUB-RECIPIENT may contact the Santa Ana Grant Coordinator and it will be provided. Funds may be used for planning, exercises, organizational and training activities, and the purchase of equipment as described in Section 202 above.

B. SUB-RECIPIENT shall provide invoices to the CITY requesting payment and all supporting documentation. Each reimbursement request shall be accompanied by the Reimbursement Request for Grant Expenditures detailing the expenditures made by SUB-RECIPIENT as authorized by Section 202 above. Each reimbursement request shall be submitted to the Santa Ana UASI Grant Office. For equipment for which SUB-RECIPIENT is requesting reimbursement, all appropriate back-up documentation must be attached to the reimbursement form, including invoices, proof of payment, packing slips, and Equipment Reimbursement Worksheet. For training reimbursements, SUB-RECIPIENT must include a copy of any certificates issued or a copy of the class roster verifying training attendees, proof that a CalOES tracking number has been assigned to the course, timesheets and payroll registers for all training attendees, receipts for travel expenses related to the training, and Training Reimbursement Worksheet. For regional project reimbursements, SUB-RECIPIENT must include approval from the lead agency for all submitted invoices.

C. Payment of final invoice shall be withheld by the CITY until the SUB-RECIPIENT has turned in all supporting documentation and completed the requirements of this Agreement.

D. It is understood that the CITY makes no commitment to fund this Agreement beyond the terms set forth herein.

E. Funding for all periods of this Agreement is subject to the continuing availability to the CITY of federal funds for this program. The Agreement may be terminated immediately upon written notice to SUB-RECIPIENT of a loss or reduction of federal grant funds.

IV. STANDARD PROVISIONS

§401. Construction of Provisions and Titles Herein

All titles or subtitles appearing herein have been inserted for convenience and shall not be deemed to affect the meaning or construction of any of the terms or provisions hereof. The language of this Agreement shall be construed according to its fair meaning and not strictly for or against either party. The word "Sub-recipient" herein and in any amendments hereto includes the party or parties identified in this Agreement. The singular shall include the plural. If there is more than one Sub-recipient as identified herein, unless expressly stated otherwise, their obligations and liabilities hereunder shall be joint and several. Use of the feminine, masculine, or neuter genders shall be deemed to include the genders not used.

§402. Applicable Law, Interpretation and Enforcement

Each party's performance hereunder shall comply with all applicable laws of the United States of America, the State of California, and the CITY. This Agreement shall be enforced and interpreted under the laws of the State of California and the CITY.

If any part, term or provision of this Agreement shall be held void, illegal, unenforceable, or in conflict with any law of a federal, state or local government having jurisdiction over this Agreement, the validity of the remaining portions of provisions shall not be affected thereby.

§403. Integrated Agreement

This Agreement sets forth all of the rights and duties of the parties with respect to the subject matter hereof, and replaces any and all previous agreements or understandings, whether written or oral, relating thereto. This Agreement may be amended only by a written instrument executed by both parties hereto.

§404. Excusable Delays

In the event that performance on the part of any party hereto shall be delayed or suspended as a result of circumstances beyond the reasonable control and without the fault and negligence of said party, none of the parties shall incur any liability to the other parties as a result of such delay or suspension.

Circumstances deemed to be beyond the control of the parties hereunder shall include, but not be limited to, acts of God or of the public enemy; insurrection; acts of the Federal Government or any unit of State or Local Government in either sovereign or contractual capacity; fires; floods; epidemics; quarantine restrictions; strikes, freight embargoes or delays in transportation; to the extent that they are not caused by the party's willful or negligent acts or omissions and to the extent that they are beyond the party's reasonable control.

§405. Breach

Except for excusable delays, if any party fails to perform, in whole or in part, any promise, covenant, or agreement set forth herein, or should any representation made by it be untrue, any aggrieved party may avail itself of all rights and remedies, at law or equity, in the courts of law. Said rights and remedies are cumulative of those provided for herein except that in no event shall any party recover more than once, suffer a penalty or forfeiture, or be unjustly compensated.

§406. Prohibition Against Assignment or Delegation

SUB-RECIPIENT may not, unless it has first obtained the written permission of the CITY:

A. Assign or otherwise alienate any of its rights hereunder, including the right to payment; or

B. Delegate, subcontract, or otherwise transfer any of its duties hereunder.

§407. Permits

SUB-RECIPIENT and its officers, agents and employees shall obtain and maintain all permits and licenses necessary for SUB-RECIPIENT performance hereunder and shall pay any fees required therefore. SUB-RECIPIENT further certifies to immediately notify the CITY of any suspension, termination, lapses, non-renewals or restrictions of licenses, certificates, or other documents.

§408. Bonds

SUB-RECIPIENT must purchase a performance bond for any equipment item over $250,000 or any vehicle (including aircraft or watercraft) financed with homeland security funds. SUB-RECIPIENT must provide a copy of performance bond to CITY no later than the time of reimbursement.

§409. Indemnification

To the fullest extent of the law, SUB-RECIPIENT agrees to indemnify, defend, and hold harmless the City of Santa Ana, its officers, agents, employees, representatives and designated volunteers from and against any and all claims, demands, defense costs, or liability of any kind or nature arising out of or resulting from, or any way connected with SUB-RECIPIENT'S acts, errors or omissions in the performance of SUB-RECIPIENT'S services or use of grant funds under the terms of this Agreement.

§410. Conflict of Interest

A. SUB-RECIPIENT covenants that none of its directors, officers, employees, or agents shall participate in selecting, or administrating any subcontract supported (in whole or in part) by Federal funds where such person is a

director, officer, employee or agent of the subcontractor; or where the selection of subcontractors is or has the appearance of being motivated by a desire for personal gain for themselves or others such as family business, etc.; or where such person knows or should have known that:

1. A member of such person's immediate family, or domestic partner or organization has a financial interest in the subcontract;

2. The subcontractor is someone with whom such person has or is negotiating any prospective employment; or

3. The participation of such person would be prohibited by the California Political Reform Act, California Government Code §87100 et seq. if such person were a public officer, because such person would have a "financial or other interest" in the subcontract.

B. Definitions:

1. The term "immediate family" includes but is not limited to domestic partner and/or those persons related by blood or marriage, such as husband, wife, father, mother, brother, sister, son, daughter, father in law, mother in law, brother in law, sister in law, son in law, daughter in law.

2. The term "financial or other interest" includes but is not limited to:

   a. Any direct or indirect financial interest in the specific contract, including a commission or fee, a share of the proceeds, prospect of a promotion or of future employment, a profit, or any other form of financial reward.

   b. Any of the following interests in the subcontractor ownership: partnership interest or other beneficial interest of five percent or more; ownership of five percent or more of the stock; employment in a managerial capacity; or membership on the board of directors or governing body.

C. The SUB-RECIPIENT further covenants that no officer, director, employee, or agent shall solicit or accept gratuities, favors, anything of monetary value from any actual or potential subcontractor, supplier, a party to a sub agreement, (or persons who are otherwise in a position to benefit from the actions of any officer, employee, or agent).

D. The SUB-RECIPIENT shall not subcontract with a former director, officer, or employee within a one year period following the termination of the relationship between said person and the Contractor.

E. Prior to obtaining the CITY'S approval of any subcontract, the SUB-RECIPIENT shall disclose to the CITY any relationship, financial or otherwise, direct or indirect, of the SUB-RECIPIENT or any of its officers, directors or employees or their immediate family with the proposed subcontractor and its officers, directors or employees.

F. For further clarification of the meaning of any of the terms used herein, the parties agree that references shall be made to the guidelines, rules, and laws of the SUB-RECIPIENT, State of California, and Federal regulations regarding conflict of interest.

G. The SUB-RECIPIENT warrants that it has not paid or given and will not pay or give to any third person any money or other consideration for obtaining this Agreement.

H. The SUB-RECIPIENT covenants that no member, officer or employee of SUB-RECIPIENT shall have interest, direct or indirect, in any contract or subcontract or the proceeds thereof for work to be performed in connection with this project during his/her tenure as such employee, member or officer or for one year thereafter.

I. The SUB-RECIPIENT shall incorporate the foregoing subsections of this Section into every agreement that it enters into in connection with this project and shall substitute the term "subcontractor" for the term "SUB-RECIPIENT" and "sub subcontractor" for "Subcontractor".

§411. Restriction on Disclosures

Any reports, analysis, studies, drawings, information, or data generated as a result of this Agreement are to be governed by the California Public Records Act (California Government Code Sec. 6250, et seq.).

§412. Statutes and Regulations Applicable To All Grant Contracts

A. Compliance with Grant Assurances

To obtain the Grant Funds, the Grantor required an authorized representative of the CITY to sign certain promises regarding the way the Grant Funds would be spent ("Grant Assurances"), attached hereto as Exhibit A. By signing these Grant Assurances, the CITY became liable to the Grantor for any funds that are used in violation of the grant requirements. SUB-RECIPIENT shall be liable to the Grantor for any funds the Grantor determines SUB-RECIPIENT used in violation of these Grant Assurances. SUB-RECIPIENT shall indemnify and hold harmless the CITY for any sums the Grantor determines SUB- RECIPIENT used in violation of the Grant Assurances.

B. SUB-RECIPIENT shall comply with all applicable requirements of state, federal, county and SUB-RECIPIENT laws, executive orders, regulations, program and administrative requirements, policies and any other requirements governing this Agreement. SUB-RECIPIENT shall comply with state and federal laws and regulations pertaining to labor, wages, hours, and other conditions of employment. SUB-RECIPIENT shall comply with new, amended, or revised laws, regulations, and/or procedures that apply to the performance of this Agreement. These requirements include, but are not limited to:

1. Office of Management and Budget (OMB) Circulars

SUB-RECIPIENT shall comply with 2 Code of Federal Regulations (CFR) Part 200 (Uniform Administrative, Cost Principles, and Audit Requirements for Federal Awards).

2. Single Audit Act

If Federal funds are used in the performance of this Agreement, SUB-RECIPIENT shall adhere to the rules and regulations of the Single Audit Act, 31 USC Sec. 7501 et seq.; Title 2 Code of Federal Regulations, Part 200, Subpart F Audit Requirements; and any administrative regulation or field memos implementing the Act. When reporting under on the FY2021 UASI Grant Program under the Single Audit Act, SUB-RECIPIENT shall use Catalog of Federal Domestic Assistance (CFDA) Program Number 97.067 "Homeland Security Grant Program"; Grant Identification Number 2020-0095; and identify the City of Santa Ana as the Pass-Through.

3. False Claims Act

The contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the contractor's actions pertaining to this contract.

4. Records Maintenance

Records, in their original form, shall be maintained in accordance with requirements prescribed by the CITY with respect to all matters covered on file for all documents specified in this Agreement.

Original forms are to be maintained on file for all documents specified in this Agreement. Such records shall be retained for a period of three (3) years after the CITY receives notification of grant closeout from CalOES, and after final disposition of all pending matters. "Pending matters" include, but are not limited to, an audit, litigation or other actions involving records. The CITY may, at its discretion, take possession of, retain and audit said records. Records, in their original form pertaining to matters covered by this Agreement, shall at all times be retained within the County of Orange unless authorization to remove them is granted in writing by the CITY.

The Contractor agrees to provide CITY OF COSTA MESA,
the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.

The Contractor agrees to permit any of the foregoing parties to reproduce by any means whatsoever or to copy excerpts and transcriptions as reasonably needed.

The Contractor agrees to provide the FEMA Administrator or his authorized representatives access to construction or other work sites pertaining to the work being completed under the contract.

In compliance with section 1225 of the Disaster Recovery Reform Act of 2018, the CITY OF COSTA MESA and the Contractor acknowledge and agree that no language in this contract is intended to prohibit audits or internal reviews by the FEMA Administrator or the Comptroller General of the United States.

5. Subcontracts and Procurement

SUB-RECIPIENT shall comply with the federal and SUB- RECIPIENT standards in the award of any subcontracts. For purposes of this Agreement, subcontracts shall include but not be limited to purchase agreements, rental or lease agreements, third party agreements, consultant service contracts and construction subcontracts.

SUB-RECIPIENT shall ensure that the terms of this Agreement with the CITY are incorporated into all Subcontractor Agreements. The SUB-RECIPIENT shall submit all Subcontractor Agreements to the CITY for review prior to the release of any funds to the subcontractor. The SUB-RECIPIENT shall withhold funds to any subcontractor agency that fails to comply with the terms and conditions of this Agreement and their respective Subcontractor Agreement.

a. Recovered Materials

SUB-RECIPIENT shall make maximum use of products containing recovered materials that are EPA-designated items unless the product cannot be acquired competitively within a timeframe providing for compliance with the contract performance schedule; Meeting contract performance requirements; or at a reasonable price.

Information about this requirement, along with the list of EPA-designated items, is available at EPA's Comprehensive Procurement Guidelines webpage: https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program.

The Contractor also agrees to comply with all other applicable requirements of Section 6002 of the Solid Waste Disposal Act.

b. Domestic Preference for Procurements

SUB-RECIPIENT should, to the greatest extent practicable, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States. This includes, but is not limited to iron, aluminum, steel, cement, and other manufactured products.

For purposes of this clause:

Produced in the United States means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

Manufactured products mean items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber.

6. Civil Rights

SUB-RECIPIENT shall comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C.§§1681- 1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) The Age Discrimination act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation act of 1970 (P.L. 91-616) as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee 3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601, et seq.), as amended, relating to non-discrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; (j) the requirements of any other nondiscrimination statute(s) which may apply to the application; and (k) P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

7. Equal Employment Opportunity

The regulation at 41 C.F.R. § 60-1.4(b) requires, except as otherwise provided or exempted in 41 C.F.R. Part 60, the insertion of the following contract clause: "During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated

during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's noncompliance with the nondiscrimination

clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other

8. Davis-Bacon Act

If applicable per the standard described above, the NFE must include the provisions at 29 C.F.R. § 5.5(a)(1)-(10) in full into all applicable contracts, and all applicable contractors must include these provisions in full in any subcontracts.

9. Copeland "Anti-Kickback" Act.

Contractor. The contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. Part 3 as may be applicable, which are incorporated by reference into this contract.

Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses.

Breach. A breach of the contract clauses above may be grounds for termination of the contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12.

10. Contract Work Hours and Safety Standards Act

(1) *Overtime requirements.* No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

(2) *Violation; liability for unpaid wages; liquidated damages.* In the event of any violation of the clause set forth in paragraph (b)(1) of this section the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated

damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (b)(1) of this section, in the sum of $27 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (b)(1) of this section.

(3) *Withholding for unpaid wages and liquidated damages.* The CITY OF COSTA MESA shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (b)(2) of this section.

(4) *Subcontracts.* The contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (b)(1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (b)(1) through (4) of this section.

11. Environmental Standards

a. Clean Air Act

The contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 U.S.C. § 7401 *et seq.*

The contractor agrees to report each violation to the CITY OF COSTA MESA and understands and agrees that the CITY OF COSTA MESA will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency (FEMA), and the appropriate Environmental Protection Agency Regional Office.

The contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with federal assistance provided by FEMA.

b. Federal Water Pollution Control Act (33 USC 1251)

The contractor agrees to comply with all applicable standards, orders, or regulations issued pursuant to the federal Water Pollution Control Act, as amended, 33 U.S.C. § 1251 *et seq.*

The contractor agrees to report each violation to the CITY OF COSTA MESA and understands and agrees that the CITY OF COSTA MESA will, in turn, report each violation as required to assure notification to the CITY OF COSTA MESA, Federal Emergency Management Agency (FEMA), and the appropriate Environmental Protection Agency Regional Office.

The contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with federal assistance provided by FEMA.

12. Telecommunications

(a) *Definitions.* As used in this clause, the terms backhaul; covered foreign country; covered telecommunications equipment or services; interconnection arrangements; roaming; substantial or essential component; and telecommunications equipment or services have the meaning as defined in FEMA Policy 405-143-1, Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services (Interim), as used in this clause—

(b) *Prohibitions.*

(1) Section 889(b) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019, Pub. L. No. 115-232, and 2 C.F.R. § 200.216 prohibit the head of an executive agency on or after Aug.13, 2020, from obligating or expending grant, cooperative agreement, loan, or loan guarantee funds on certain telecommunications products or from certain entities for national security reasons.

(2) Unless an exception in paragraph (c) of this clause applies, the contractor and its subcontractors may not use grant, cooperative agreement, loan, or loan guarantee funds from the Federal Emergency Management Agency to:

(i) Procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system;

(ii) Enter into, extend, or renew a contract to procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system;

(iii) Enter into, extend, or renew contracts with entities that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system; or

(iv) Provide, as part of its performance of this contract, subcontract, or other contractual instrument, any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

(c) *Exceptions.*

(1) This clause does not prohibit contractors from providing—

(i) A service that connects to the facilities of a third-party, such as backhaul, roaming, or interconnection arrangements; or

(ii) Telecommunications equipment that cannot route or redirect user data traffic or permit visibility into any user data or packets that such equipment transmits or otherwise handles.

(2) By necessary implication and regulation, the prohibitions also do not apply to:

(i) Covered telecommunications equipment or services that:

i. Are *not used* as a substantial or essential component of any system; *and*
ii. Are *not used* as critical technology of any system.

(ii) Other telecommunications equipment or services that are not considered covered telecommunications equipment or services.

(d) *Reporting requirement.*

(1) In the event the contractor identifies covered telecommunications equipment or services used as a substantial or essential component of any system, or as critical technology as part of any system, during contract performance, or the contractor is notified of such by a subcontractor at any tier or by any other source, the contractor shall report the information in paragraph (d)(2) of this clause to the recipient or subrecipient, unless elsewhere in this contract are established procedures for reporting the information.

(2) The Contractor shall report the following information pursuant to paragraph (d)(1) of this clause:

(i) Within one business day from the date of such identification or notification: The contract number; the order number(s), if

applicable; supplier name; supplier unique entity identifier (if known); supplier Commercial and Government Entity (CAGE) code (if known); brand; model number (original equipment manufacturer number, manufacturer part number, or wholesaler number); item description; and any readily available information about mitigation actions undertaken or recommended.

(ii) Within 10 business days of submitting the information in paragraph (d)(2)(i) of this clause: Any further available information about mitigation actions undertaken or recommended. In addition, the contractor shall describe the efforts it undertook to prevent use or submission of covered telecommunications equipment or services, and any additional efforts that will be incorporated to prevent future use or submission of covered telecommunications equipment or services.

(e) *Subcontracts.* The Contractor shall insert the substance of this clause, including this paragraph (e), in all subcontracts and other contractual instruments.

C. Statutes and Regulations Applicable To This Particular Grant

SUB-RECIPIENT shall comply with all applicable requirements of state and federal laws, executive orders, regulations, program and administrative requirements, policies and any other requirements governing this particular grant program. SUB-RECIPIENT shall comply with new, amended, or revised laws, regulations, and/or procedures that apply to the performance of this Agreement. These requirements include, but are not limited to:

1. Title 2 Code of Federal Regulations (CFR) Part 200; EO 12372; Department of Justice (DOJ) Office of Judicial Programs (OJP) Office of the Comptroller, U.S. Department of Homeland Security, Preparedness Directorate Financial Management Guide; U.S. Department of Homeland Security, Office of Grants and Training, FY 2020 Homeland Security Grant Program –Notice of Funding Opportunity; ODP WMD Training Course Catalogue; and DOJ Office for Civil Rights.

   Standardized Emergency Management System (SEMS) requirements as stated in the California Emergency Services Act, Government Code Chapter 7 of Division 1 of Title 2, § 8607.1(e) and CCR Title 19, §§ 2445-2448.

   Provisions of 44 CFR applicable to grants and cooperative agreements, including Part 18, Administrative Review Procedures; Part 20, Criminal Justice Information Systems; Part 22, Confidentiality of Identifiable Research and Statistical Information; Part 23, Criminal Intelligence Systems Operating Policies; Part 30, Intergovernmental Review of Department of Justice Programs and Activities; Part 35, Nondiscrimination on the Basis of Disability in State and Local Government Services; Part 38, Equal Treatment of Faith-based Organizations; Part 42, Nondiscrimination/Equal employment Opportunities Policies and Procedures; Part 61, Procedures

for Implementing the National Environmental Policy Act; Part 63, Floodplain Management and Wetland Protection Procedures; Part 64, Floodplain Management and Wetland Protection Procedures; Federal laws or regulations applicable to federal Assistance Programs; Part 69, New Restrictions on Lobbying; Part 70, Uniform Administrative Requirements for Grants and Cooperative Agreements (including sub-awards) with Institutions of Higher Learning, Hospitals and other Non-Profit Organizations; and Part 83, Government- Wide Requirements for a Drug Free Workplace (grants).

2. Travel Expenses

SUB-RECIPIENT as provided herein may be compensated for SUB-RECIPIENT'S reasonable travel expenses incurred in the performance of this Agreement, to include travel and per diem, unless otherwise expressed. Travel including in-State and out-of- State travel shall not be reimbursed without prior written authorization from the UASI Grant Office.

SUB-RECIPIENT'S travel and per diem reimbursement costs shall be reimbursed based on the SUB-RECIPIENT'S travel policies and procedures. If SUB-RECIPIENT does not have established travel policies and procedures, SUB-RECIPIENT'S reimbursement rates shall not exceed the amounts established under 5 U.S.C 5701-11, ("Travel and Subsistence Expenses; Mileage Allowances"), or by the Administrator of General Services, or by the President (or his or her designee) pursuant to any provisions of such subchapter must apply to travel under federal awards (48 CFR 31.205-46(a)).

3. Debarment and Suspension

This contract is a covered transaction for purposes of 2 C.F.R. Part 180 and 2 C.F.R. Part 3000. As such, the contractor is required to verify that none of the contractor's principals (defined at 2 C.F.R. § 180.995) or its affiliates (defined at 2 C.F.R. § 180.905) are excluded (defined at 2 C.F.R. § 180.940) or disqualified (defined at 2 C.F.R. § 180.935).

The contractor must comply with 2 C.F.R. Part 180, subpart C and 2 C.F.R. Part 3000, subpart C, and must include a requirement to comply with these regulations in any lower tier covered transaction it enters into.

This certification is a material representation of fact relied upon by CITY OF COSTA MESA. If it is later determined that the contractor did not comply with 2 C.F.R. Part 180, subpart C and 2 C.F.R. Part 3000, subpart C, in addition to remedies available to CITY OF COSTA MESA, the federal government may pursue available remedies, including but not limited to suspension and/or debarment.

The bidder or proposer agrees to comply with the requirements of 2 C.F.R. Part 180, subpart C and 2 C.F.R. Part 3000, subpart C while this offer is valid and throughout the period of any contract that may arise from this offer. The bidder

or proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions.

4. Byrd Anti-Lobbying Amendment

Contractors who apply or bid for an award of more than $100,000 shall file the required certification. Each tier certifies to the tier above that it will not and has not used federally appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, officer or employee of Congress, or an employee of a Member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the recipient who in turn will forward the certification(s) to the federal awarding agency.

5. Noncompliance

SUB-RECIPIENT understands that failure to comply with any of the above assurances may result in suspension, termination or reduction of grant funds, and repayment by SUB-RECIPIENT to CITY of any unlawful expenditures.

§413. Federal, State and Local Taxes

Federal, State and local taxes shall be the responsibility of SUB-RECIPIENT as an independent party and not as a CITY employee.

§414. Inventions, Patents and Copyrights

A. Reporting Procedure for Inventions

If any project produces any invention or discovery (Invention) patentable or otherwise under title 35 of the U.S. Code, including, without limitation, processes and business methods made in the course of work under this Agreement, the SUB-RECIPIENT shall report the fact and disclose the Invention promptly and fully to the CITY. The CITY shall report the fact and disclose the Invention to the Grantor. Unless there is a prior agreement between the CITY and the Grantor, the Grantor shall determine whether to seek protection on the Invention. The Grantor shall determine how the rights in the Invention, including rights under any patent issued thereon, will be allocated and administered in order to protect the public interest consistent with the policy ("Policy") embodied in the Federal Acquisition Regulations System, which is based on Ch. 18 of title 35 U.S.C. Sections 200, et seq. (Pub. L. 95-517, Pub. L. 98-620, 37 CFR part 401); Presidential Memorandum on Government Patent Policy to the Heads of the Executive Departments and Agencies, dated 2/18/1983); and Executive Order 12591, 4/10/87, 52 FR 13414, 3 CFR, 1987 Comp., p. 220 (as amended by Executive Order 12618, 12/22/87, 52 FR 48661, 3 CFR, 1987 Comp., p. 262). SUB-RECIPIENT hereby agrees to be bound by the Policy, and will contractually require its personnel to

be bound by the Policy.

B. Rights to Use Inventions

CITY shall have an unencumbered right, and a non-exclusive, irrevocable, royalty- free license, to use, manufacture, improve upon, and allow others to do so for all government purposes, any Invention developed under this Agreement.

C. Copyright Policy

1. Unless otherwise provided by the terms of the Grantor or of this Agreement, when copyrightable material ("Material") is developed under this Agreement, the author or the CITY, at the CITY'S discretion, may copyright the Material. If the CITY declines to copyright the Material, the CITY shall have an unencumbered right, and a non-exclusive, irrevocable, royalty- free license, to use, manufacture, improve upon, and allow others to do so for all government purposes, any Material developed under this Agreement.

2. The Grantor shall have an unencumbered right, and a non-exclusive, irrevocable, royalty-free license, to use, manufacture, improve upon, and allow others to do so for all government purposes, any Material developed under this Agreement or any Copyright purchased under this Agreement.

3. SUB-RECIPIENT shall comply with all applicable requirements in the Code of Federal Regulations related to copyrights and copyright policy.

4. License and Delivery of Works Subject to Copyright and Data Rights. The Contractor grants to the CITY OF COSTA MESA, a paid-up, royalty-free, nonexclusive, irrevocable, worldwide license in data first produced in the performance of this contract to reproduce, publish, or otherwise use, including prepare derivative works, distribute copies to the public, and perform publicly and display publicly such data. For data required by the contract but not first produced in the performance of this contract, the Contractor will identify such data and grant to the CITY OF COSTA MESA or acquires on its behalf a license of the same scope as for data first produced in the performance of this contract. Data, as used herein, shall include any work subject to copyright under 17 U.S.C. § 102, for example, any written reports or literary works, software and/or source code, music, choreography, pictures or images, graphics, sculptures, videos, motion pictures or other audiovisual works, sound and/or video recordings, and architectural works. Upon or before the completion of this contract, the Contractor will deliver to the CITY OF COSTA MESA data first produced in the performance of this contract and data required by the contract but not first produced in the performance of this contract in formats acceptable by the CITY OF COSTA MESA.

D. Rights to Data

The Grantor and the CITY shall have unlimited rights or copyright license to any

data first produced or delivered under this Agreement. "Unlimited rights" means the right to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform and display publicly, or permit others to do so; as required by 48 CFR 27.401. Where the data are not first produced under this Agreement or are published copyrighted data with the notice of 17 U.S.C. Section 401 or 402, the Grantor acquires the data under a copyright license as set forth in 48 CFR 27.404(f)(2) instead of unlimited rights. (48 CFR 27.404(a)).

E. Obligations Binding on Subcontractors

SUB-RECIPIENT shall require all subcontractors to comply with the obligations of this section by incorporating the terms of this section into all subcontracts.

F. No Obligation by Federal Government

The federal government is not a party to this contract and is not subject to any obligations or liabilities to the non-federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

§415. Minority, Women, And Other Business Enterprise Outreach Program

It is the policy of the CITY to provide minority business enterprises (MBEs), women business enterprises (WBEs) and all other business enterprises an equal opportunity to participate in the performance of all SUB-RECIPIENT contracts, including procurement, construction and personal services. This policy applies to all Contractors and Sub-Contractors.

V
DEFAULTS, SUSPENSION, TERMINATION, AND AMENDMENTS

§501. Defaults

Should SUB-RECIPIENT fail for any reason to comply with the contractual obligations of this Agreement within the time specified by this Agreement, the CITY reserves the right to terminate the Agreement, reserving all rights under state and federal law.

§502. Amendments

Any change in the terms of this Agreement, including changes in the services to be performed by SUB-RECIPIENT and any increase or decrease in the amount of compensation which are agreed to by the CITY and SUB-RECIPIENT shall be incorporated into this Agreement by a written amendment properly executed and signed by the person authorized to bind the parties thereto.

SUB-RECIPIENT agrees to comply with all future CITY directives, or any rules, amendments or requirements promulgated by the CITY affecting this Agreement.

VI
ENTIRE AGREEMENT

§601. Complete Agreement

This Agreement contains the full and complete Agreement between the two parties. Neither verbal agreement nor conversation with any officer or employee of either party shall affect or modify any of the terms and conditions of this Agreement.

§602. Number of Pages and Attachments

This Agreement is executed in two (2) duplicate originals, each of which is deemed to be an original. This Agreement includes thirty-one (31) pages and three (3) Exhibits which constitute the entire understanding and agreement of the parties.

IN WITNESS WHEREOF, the City and CITY OF COSTA MESA have caused this Agreement to be executed by their duly authorized representatives on the date first set forth above.

EXHIBIT A

California Governor's Office of Emergency Services
FY2021 Grant Assurances
(All HSGP Applicants)

As the duly authorized representative of the Applicant, I hereby certify that the Applicant has the legal authority to apply for federal assistance and the institutional, managerial and financial capability (including funds sufficient to pay any non-federal share of project cost) to ensure proper planning, management, and completion of the project described in this application, within prescribed timelines.

I further acknowledge that the Applicant is responsible for reviewing and adhering to all requirements within the:

(a) Applicable Federal Regulations (see below);
(b) Federal Program Notice of Funding Opportunity (NOFO);
(c) Federal Preparedness Grants Manual;
(d) California Supplement to the NOFO; and
(e) Federal and State Grant Program Guidelines.

Federal Regulations
Government cost principles, uniform administrative requirements, and audit requirements for federal grant programs are set forth in Title 2, Part 200 of the Code of Federal Regulations (C.F.R.). Updates are issued by the Office of Management and Budget (OMB) and can be found at http://www.whitehouse.gov/omb/.

State and federal grant award requirements are set forth below. The Applicant hereby agrees to comply with the following:

1. Proof of Authority

The Applicant will obtain proof of authority from the city council, governing board, or authorized body in support of this project. This written authorization must specify that the Applicant and the city council, governing board, or authorized body agree:

(a) To provide all matching funds required for the grant project and that any cash match will be appropriated as required;
(b) Any liability arising out of the performance of this agreement shall be the responsibility of the Applicant and the city council, governing board, or authorized body;
(c) Grant funds shall not be used to supplant expenditures controlled by the city council, governing board, or authorized body;
(d) Applicant is authorized by the city council, governing board, or authorized body to apply for federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-federal share of project cost, if any) to ensure proper planning, management and completion of the project described in this application; and
(e) Official executing this agreement is authorized by the Applicant.

This Proof of Authority must be maintained on file and readily available upon request.

Initials _____

2. Period of Performance

The period of performance is specified in the Award. The Applicant is only authorized to perform allowable activities approved under the award, within the period of performance.

3. Lobbying and Political Activities

As required by Section 1352, Title 31 of the United States Code (U.S.C.), for persons entering into a contract, grant, loan, or cooperative agreement from an agency or requests or receives from an agency a commitment providing for the United States to insure or guarantee a loan, the Applicant certifies that:

(a) No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

(b) If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

The Applicant will also comply with provisions of the Hatch Act (5 U.S.C. §§ 1501- 1508 and §§ 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with federal funds.

Finally, the Applicant agrees that federal funds will not be used, directly or indirectly, to support the enactment, repeal, modification or adoption of any law, regulation or policy without the express written approval from the California Governor's Office of Emergency Services (Cal OES) or the federal awarding agency.

4. Debarment and Suspension

As required by Executive Orders 12549 and 12689, and 2 C.F.R. § 200.213 and codified in 2 C.F.R. Part 180, Debarment and Suspension, the Applicant will provide protection against waste, fraud, and abuse by debarring or suspending those persons deemed irresponsible in their dealings with the federal government. The Applicant certifies that it and its principals, recipients, or subrecipients:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (federal, state, or local) transaction or contract under a public transaction; violation of federal or state

antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state, or local) with commission of any of the offenses enumerated in paragraph (2)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transaction (federal, state, or local) terminated for cause or default.

Where the Applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

5. Non-Discrimination and Equal Employment Opportunity

The Applicant will comply with all state and federal statutes relating to non-discrimination, including:

(a) Title VI of the Civil Rights Act of 1964 (Public Law (P.L.) 88-352 and 42 U.S.C. § 2000d et. seq.) which prohibits discrimination on the basis of race, color, or national origin and requires that recipients of federal financial assistance take reasonable steps to provide meaningful access to persons with limited English proficiency (LEP) to their programs and services;

(b) Title IX of the Education Amendments of 1972, (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex in any federally funded educational program or activity;

(c) Section 504 of the Rehabilitation Act of 1973, (29 U.S.C. § 794), which prohibits discrimination against those with disabilities or access and functional needs;

(d) Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. §§ 12101- 12213), which prohibits discrimination on the basis of disability and requires buildings and structures be accessible to those with disabilities and access and functional needs;

(e) Age Discrimination Act of 1975, (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age;

(f) Public Health Service Act of 1912 (42 U.S.C. §§ 290 dd—2), relating to confidentiality of patient records regarding substance abuse treatment;

(g) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), relating to nondiscrimination in the sale, rental or financing of housing as implemented by the Department of Housing and Urban Development at 24 C.F.R. Part100. The prohibition on disability discrimination includes the requirement that new multifamily housing with four or more dwelling units—i.e., the public and common use areas and individual apartment units (all units in buildings with elevators and ground-floor units in buildings without elevators)— be designed and constructed with certain accessible features (See 24 C.F.R. § 100.201);

(h) Executive Order 11246, which prohibits federal contractors and federally assisted construction contractors and subcontractors, who do over $10,000 in Government business in one year from discriminating in employment decisions on the basis of race, color, religion, sex, sexual orientation, gender identification or national origin;

(i) Executive Order 11375, which bans discrimination on the basis of race, color, religion, sex, sexual orientation, gender identification, or national origin in hiring and employment in both the United States federal workforce and on the part of government contractors;

(j) California Public Contract Code § 10295.3, which prohibits discrimination based on domestic partnerships and those in same sex marriages;

Initials _____

(k) DHS policy to ensure the equal treatment of faith-based organizations, under which all applicants and recipients must comply with equal treatment policies and requirements contained in 6 C.F.R. Part 19;
(l) California's Fair Employment and Housing Act (FEHA) (California Government Code §§12940, 12945, 12945.2), as applicable. FEHA prohibits harassment and discrimination in employment because of ancestry, familial status, race, color, religious creed (including religious dress and grooming practices), sex (which includes pregnancy, childbirth, breastfeeding and medical conditions related to pregnancy, childbirth or breastfeeding), gender, gender identity, gender expression, sexual orientation, marital status, national origin, ancestry, mental and physical disability, genetic information, medical condition, age, pregnancy, denial of medical and family care leave, or pregnancy disability leave, military and veteran status, and/or retaliation for protesting illegal discrimination related to one of these categories, or for reporting patient abuse in tax supported institutions;
(m) Any other nondiscrimination provisions in the specific statute(s) under which application for federal assistance is being made; and
(n) The requirements of any other nondiscrimination statute(s) that may apply to this application.

6. Drug-Free Workplace

As required by the Drug-Free Workplace Act of 1988 (41 U.S.C. § 701 et seq.), the Applicant certifies that it will maintain a drug-free workplace and a drug-free awareness program as outlined in the Act.

7. Environmental Standards

The Applicant will comply with state and federal environmental standards, including:

(a) California Environmental Quality Act (CEQA) (California Public Resources Code §§ 21000- 21177), to include coordination with the city or county planning agency;
(b) CEQA Guidelines (California Code of Regulations, Title 14, Division 6, Chapter 3, §§ 15000- 15387);
(c) Federal Clean Water Act (CWA) (33 U.S.C. § 1251 et seq.), which establishes the basic structure for regulating discharges of pollutants into the waters of the United States and regulating quality standards for surface waters;
(d) Federal Clean Air Act of 1955 (42 U.S.C. § 7401) which regulates air emissions from stationary and mobile sources;
(e) Institution of environmental quality control measures under the National Environmental Policy Act (NEPA) of 1969 (P.L. 91-190); the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA; and Executive Order 12898 which focuses on the environmental and human health effects of federal actions on minority and low-income populations with the goal of achieving environmental protection for all communities;
(f) Evaluation of flood hazards in floodplains in accordance with Executive Order 11988;
(g) Executive Order 11514 which sets forth national environmental standards;
(h) Executive Order 11738 instituted to assure that each federal agency empowered to enter into contracts for the procurement of goods, materials, or services and each federal agency empowered to extend federal assistance by way of grant, loan, or contract shall undertake such procurement and assistance activities in a manner that will result in effective enforcement of the Clean Air Act and the Federal Water Pollution Control Act Executive Order 11990 which requires preservation of wetlands;
(i) The Safe Drinking Water Act of 1974, (P.L. 93-523);
(j) The Endangered Species Act of 1973, (P.L. 93-205);

(k) Assurance of project consistency with the approved state management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.);
(l) Conformity of Federal Actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.);
(m) Wild and Scenic Rivers Act of 1968 (16 U.S.C. § 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

The Applicant shall not be: 1) in violation of any order or resolution promulgated by the State Air Resources Board or an air pollution district; 2) subject to a cease and desist order pursuant to § 13301 of the California Water Code for violation of waste discharge requirements or discharge prohibitions; or 3) determined to be in violation of federal law relating to air or water pollution.

8. Audits

For subrecipients expending $750,000 or more in federal grant funds annually, the Applicant will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and Title 2 of the Code of Federal Regulations, Part 200, Subpart F Audit Requirements.

9. Access to Records

In accordance with 2 C.F.R. § 200.337, the Applicant will give the awarding agency, the Comptroller General of the United States and, if appropriate, the state, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award. The Applicant will require any subrecipients, contractors, successors, transferees and assignees to acknowledge and agree to comply with this provision.

10. Conflict of Interest

The Applicant will establish safeguards to prohibit the Applicant's employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

11. Financial Management

False Claims for Payment - The Applicant will comply with 31 U.S.C §§ 3729-3733 which sets forth that no subrecipient, recipient, or subrecipient shall submit a false claim for payment, reimbursement or advance.

12. Reporting - Accountability

The Applicant agrees to comply with applicable provisions of the Federal Funding Accountability and Transparency Act (FFATA) (P.L. 109-282), specifically (a) the reporting of subawards obligating $25,000 or more in federal funds and (b) executive compensation data for first-tier subawards. This includes the provisions of FFATA, which includes requirements for executive compensation, and also requirements implementing the Act for the non-federal entity at 2 C.F.R. Part 25 Financial Assistance Use of Universal Identifier and Central Contractor Registration and 2 C.F.R. Part 170 Reporting Subaward and Executive Compensation Information.

13. Whistleblower Protections

The Applicant also must comply with statutory requirements for whistleblower protections at 10 U.S.C. § 2409, 41 U.S.C. § 4712, and 10 U.S.C. § 2324, 41 U.S.C. § 4304 and § 4310.

Initials _____

14. Human Trafficking

The Applicant will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act of 2000, as amended (22 U.S.C. § 7104) which prohibits grant award recipients or a subrecipient from: (1) engaging in trafficking in persons during the period of time that the award is in effect; (2) procuring a commercial sex act during the period of time that the award is in effect; (3) using forced labor in the performance of the award or subawards under the award.

15. Labor Standards

The Applicant will comply with the following federal labor standards:

(a) The Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), as applicable, and the Copeland Act (40 U.S.C. § 3145 and 18 U.S.C. § 874) and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally-assisted construction contracts or subcontracts, and

(b) The Federal Fair Labor Standards Act (29 U.S.C. § 201 et al.) as they apply to employees of institutes of higher learning (IHE), hospitals and other non-profit organizations.

16. Worker's Compensation

The Applicant must comply with provisions which require every employer to be insured to protect workers who may be injured on the job at all times during the performance of the work of this Agreement, as per the workers compensation laws set forth in California Labor Code §§ 3700 et seq.

17. Property-Related

If applicable to the type of project funded by this federal award, the Applicant will:

(a) Comply with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of federal participation in purchase;

(b) Comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires subrecipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more;

(c) Assist the awarding agency in assuring compliance with Section 106 of the

(d) National Historic Preservation Act of 1966, as amended (16 U.S.C. § 470), Executive Order 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §469a-1 et seq.); and

(e) Comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. § 4831 and 24 CFR Part 35) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.

18. Certifications Applicable Only to Federally-Funded Construction Projects

For all construction projects, the Applicant will:

(a) Not dispose of, modify the use of, or change the terms of the real property title or other interest in the site and facilities without permission and instructions from the awarding agency. Will record the federal awarding agency directives and will include a covenant

Initials _____

in the title of real property acquired in whole or in part with federal assistance funds to assure nondiscrimination during the useful life of the project;

(b) Comply with the requirements of the awarding agency with regard to the drafting, review and approval of construction plans and specifications; and

(c) Provide and maintain competent and adequate engineering supervision at the construction site to ensure that the complete work conforms with the approved plans and specifications and will furnish progressive reports and such other information as may be required by the assistance awarding agency or State.

19. Use of Cellular Device While Driving is Prohibited

Applicants are required to comply with California Vehicle Code sections 23123 and 23123.5. These laws prohibit driving motor vehicle while using an electronic wireless communications device to write, send, or read a text-based communication. Drivers are also prohibited from the use of a wireless telephone without hands-free listening and talking, unless to make an emergency call to 911, law enforcement, or similar services.

20. California Public Records Act and Freedom of Information Act

The Applicant acknowledges that all information submitted in the course of applying for funding under this program, or provided in the course of an entity's grant management activities that are under Federal control, is subject to the Freedom of Information Act (FOIA), 5 U.S.C. § 552, and the California Public Records Act, California Government Code section 6250 et seq. The Applicant should consider these laws and consult its own State and local laws and regulations regarding the release of information when reporting sensitive matters in the grant application, needs assessment, and strategic planning process.

HOMELAND SECURITY GRANT PROGRAM (HSGP) – PROGRAM SPECIFIC ASSURANCES / CERTIFICATIONS

21. Acknowledgment of Federal Funding from DHS

All recipients must acknowledge their use of federal funding when issuing statements, press releases, requests for proposals, bid invitations, and other documents describing projects or programs funded in whole or in part with federal funds.

22. Activities Conducted Abroad

All recipients must ensure that project activities carried on outside the United States are coordinated as necessary with appropriate government authorities and that appropriate licenses, permits, or approvals are obtained.

23. Best Practices for Collection and Use of Personally Identifiable Information (PII)

DHS defines personally identifiable information (PII) as any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual. All recipients who collect PII are required to have a publically-available privacy policy that describes standards on the usage and maintenance of PII they collect. Recipients may also find the DHS Privacy Impact Assessments: Privacy Guidance and Privacy template a useful resource respectively.

24. Copyright

All recipients must affix the applicable copyright notices of 17 U.S.C. §§ 401 or 402 and an acknowledgement of U.S. Government sponsorship (including the award number) to any work first produced under federal financial assistance awards.

Initials _____

25. Duplication of Benefits

Any cost allocable to a particular federal financial assistance award provided for in 2 C.F.R. Part 200, Subpart E may not be charged to other federal financial assistance awards to overcome fund deficiencies, to avoid restrictions imposed by federal statutes, regulations, or federal financial assistance award terms and conditions, or for other reasons. However, these prohibitions would not preclude recipients from shifting costs that are allowable under two or more awards in accordance with existing federal statutes, regulations, or the federal financial assistance award terms and conditions.

26. Energy Policy and Conservation Act

All recipients must comply with the requirements of 42 U.S.C. § 6201 which contain policies relating to energy efficiency that are defined in the state energy conservation plan issued in compliance with this Act.

27. Federal Debt Status

All recipients are required to be non-delinquent in their repayment of any federal debt. Examples of relevant debt include delinquent payroll and other taxes, audit disallowances, and benefit overpayments. See OMB Circular A-129.

28. Fly America Act of 1974

All recipients must comply with Preference for U.S. Flag Air Carriers: (air carriers holding certificates under 49 U.S.C. § 41102) for international air transportation of people and property to the extent that such service is available, in accordance with the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. § 40118) and the interpretative guidelines issued by the Comptroller General of the United States in the March 31, 1981, amendment to Comptroller General Decision B- 138942.

29. Hotel and Motel Fire Safety Act of 1990

In accordance with Section 6 of the Hotel and Motel Fire Safety Act of 1990, all Applicants must ensure that all conference, meeting, convention, or training space funded in whole or in part with federal funds complies with the fire prevention and control guidelines of the Federal Fire Prevention and Control Act of 1974, as amended, 15 U.S.C. § 2225a.

30. Non-supplanting Requirement

All recipients who receive federal financial assistance awards made under programs that prohibit supplanting by law must ensure that federal funds do not replace (supplant) funds that have been budgeted for the same purpose through non- federal sources.

31. Patents and Intellectual Property Rights

Unless otherwise provided by law, recipients are subject to the Bayh-Dole Act, Pub. L. No. 96-517, as amended, and codified in 35 U.S.C. § 200 et seq. All recipients are subject to the specific requirements governing the development, reporting, and disposition of rights to inventions and patents resulting from financial assistance awards located at 37 C.F.R. Part 401 and the standard patent rights clause located at 37 C.F.R. § 401.14.

32. SAFECOM

All recipients who receive federal financial assistance awards made under programs that provide emergency communication equipment and its related activities must comply with the SAFECOM Guidance for Emergency Communication Grants, including provisions on technical standards that ensure and enhance interoperable communications.

Initials _____

33. Terrorist Financing

All recipients must comply with Executive Order 13224 and U.S. law that prohibit transactions with, and the provisions of resources and support to, individuals and organizations associated with terrorism. Recipients are legally responsible to ensure compliance with the Order and laws.

34. Reporting of Matters Related to Recipient Integrity and Performance

If the total value of the recipient's currently active grants, cooperative agreements, and procurement contracts from all federal assistance offices exceeds $10,000,000 for any period of time during the period of performance of this federal financial assistance award, you must comply with the requirements set forth in the government-wide Award Term and Condition for Recipient Integrity and Performance Matters located at 2 C.F.R. Part 200, Appendix XII, the full text of which is incorporated here by reference in the award terms and conditions.

35. USA Patriot Act of 2001

All recipients must comply with requirements of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (USA PATRIOT Act), which amends 18 U.S.C. §§ 175–175c.

36. Use of DHS Seal, Logo, and Flags

All recipients must obtain permission from their DHS Financial Assistance Office, prior to using the DHS seal(s), logos, crests or reproductions of flags or likenesses of DHS agency officials, including use of the United States Coast Guard seal, logo, crests or reproductions of flags or likenesses of Coast Guard officials.

IMPORTANT
The purpose of the assurance is to obtain federal and state financial assistance, including any and all federal and state grants, loans, reimbursement, contracts, etc. The Applicant recognizes and agrees that state financial assistance will be extended based on the representations made in this assurance. This assurance is binding on the Applicant, its successors, transferees, assignees, etc. Failure to comply with any of the above assurances may result in suspension, termination, or reduction of grant funds.

All appropriate documentation, as outlined above, must be maintained on file by the Applicant and available for Cal OES or public scrutiny upon request. Failure to comply with these requirements may result in suspension of payments under the grant or termination of the grant or both and the subrecipient may be ineligible for award of any future grants if the Cal OES determines that any of the following has occurred: (1) the recipient has made false certification, or (2) violates the certification by failing to carry out the requirements as noted above.

All of the language contained within this document must be included in the award documents for all subawards at all tiers. All recipients are bound by the Department of Homeland Security Standard Terms and Conditions 2021 ,Version 11.4, hereby incorporated by reference, which can be found at: https://www.dhs.gov/publication/fy15-dhs-standard-terms-and-conditions.

The undersigned represents that he/she is authorized to enter into this agreement for and on behalf of the Applicant.

EXHIBIT B

CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under the applicable CFR covering New Restrictions on Government-wide Debarment and Suspension (Nonprocurement). The certification shall be treated as a material representation of fact upon which reliance will be placed when the Agency determines to award the covered transaction or cooperative agreement.

As required by Executive Order 12549, Debarment and Suspension, and implemented under the applicable CFR, for prospective participants in covered transactions, as defined in the applicable CFR

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, sentenced to a denial of Federal benefits by a State or Federal court, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a government entity (Federal State or local) with commission of any of these offenses enumerated in paragraph (1) (b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

Title

INSTRUCTIONS FOR CERTIFICATION

1. By signing and submitting this document, the prospective recipient of Federal assistance funds is providing the certification as set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective recipient of Federal assistance funds knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective recipient of Federal assistance funds shall provide immediate written notice to the person to whom this agreement is entered, if at any time the prospective recipient of Federal assistance funds learns that its certification was erroneous, when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549.

5. The prospective recipient of Federal assistance funds agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective recipient of Federal assistance funds further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the List of Parties Excluded from Procurement or Non Procurement Programs.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under Paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntary excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

EXHIBIT C

CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form LLL "Disclosure Form to Report Lobbying" in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

4. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

   The Subrecipient, as identified below, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Subrecipient understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

COSTA MESA FIRE & RESCUE STRATEGIC PLAN 2022-2027

DEPARTMENT: **COSTA MESA FIRE & RESCUE**

PRESENTED BY: **DANIEL A. STEFANO, FIRE CHIEF**

CONTACT INFORMATION: **DANIEL A. STEFANO, FIRE CHIEF, (714) 754-5106**

RECOMMENDATION:

Staff recommends the City Council approve the Costa Mesa Fire & Rescue Strategic Plan 2022 - 2027.

BACKGROUND:

The 2015-2020 Costa Mesa Fire & Rescue (CMFR) Strategic Plan was developed through a comprehensive collaborative process and has served as a valued road map for the department.

Over the past five years, the department has made considerable progress and accomplished many of the goals and objectives included in the Strategic Plan including, but not limited to: opening a new fire station; acquiring new and standardized apparatus and equipment; increasing efficiencies through an enhanced deployment model and ambulance transportation program; establishing new cost recovery programs; increasing leadership, professional development, technical and formal education training opportunities within the department; increasing health, safety & wellness programs; establishing City Council approved key lead and support positions for Training & Safety, Emergency Medical Services and Community Risk Reduction; increasing technology capabilities; and firmly re-establishing CMFR as a recognized destination department.

All of the successful outcomes achieved through the road map of the 2015-2020 strategic plan were a direct result of the support the Department has received from the City Council, City Manager, City Leadership Team, and the Costa Mesa Community. With the successful completion of the goals and objectives of the 2015-2020 Strategic Plan CMFR began preparing for the **next five-year Strategic Plan while** navigating the challenges of the pandemic. CMFR contracted with the Center for Public Safety Excellence (CPSE), a not-for-profit 501(c) (3) corporation, whose role is to help high-performing fire departments and emergency services professionals in their efforts to continuously improve. CPSE was brought in to help facilitate the development of the department's path into the future via a "Community-Driven Strategic Plan".

ANALYSIS:

CMFR participated in a number of preparatory meetings and trainings over a four-day period, which included a community-based strategic planning workshop with external stakeholders, and a meeting with internal stakeholders. The Strategic Planning team worked on developing future strategic goals and objectives for the Department that were based on the feedback received from the community, internal stakeholders, and also in alignment with the City Council's and City's own Strategic Goals and Objectives.

To continue achieving the mission of Costa Mesa Fire & Rescue, specific, measurable, achievable, relevant and time bound goals and objectives were established for 2022-2027. The established goals and objectives will enhance strengths, address identified weaknesses, provide a clear direction, and address the community's concerns. The established goals and objectives will direct the organization to its desired future while reducing the obstacles and distractions along the way. Leadership-established workgroups will meet and manage progress toward accomplishing these goals and objectives and adjust timelines as needs and the environment change. Regular reports of progress and changes will be shared with CMFR's leadership and the City Manager, while also being incorporated into the department's annual report.

GOAL #1: Upgrade our technological infrastructure by investing in equipment, systems, and personnel to enhance and sustain high service levels and positively impact our community.

GOAL #2: Evaluate, develop, and execute comprehensive administrative and operational staffing levels that enhance and advance our ability to meet and exceed community expectations, governance, and department objectives.

GOAL #3: Upgrade our infrastructure by investing in our facilities, equipment, and systems to enhance and sustain a high level of service and positively impact our community.

GOAL #4: Collectively and continuously assess, develop, execute, and monitor a comprehensive training plan that strengthens, enhances, and advances the organization's operational, administrative, and professional goals.

GOAL #5: Enhance internal and external communication to provide clarity and alignment with those we serve and serve with.

GOAL #6: Prepare for, pursue, achieve, and maintain international accreditation to better serve our community and embrace excellence.

The CMFR strategic planning team participated in breakout groups for each of the six goals. Each group developed key objectives to implement during the next six-month period and beyond. A detailed work plan was prepared with specific deliverables for each Goal including specific timeframes that will be updated and monitored on a monthly, quarterly and annual basis, throughout the duration of the strategic plan, and adjust as needed.

ALTERNATIVES:

The City Council can provide alternate direction regarding the department's Strategic Plan.

FISCAL REVIEW:

Many of the stated priorities and action steps can be funded within the current (FY 2022-23) budget. Other actions will be included in the proposed budget for FY 2023-2024 as needed, either in whole, or as part of a multi-year funding plan.

The Fire Chief will be working closely with the City Manager and the Finance Director on all related funding needs for inclusion in future proposed budgets as needed.

LEGAL REVIEW:

The City Attorney reviewed and approved this report as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goal:

- Strengthen the Public's Safety and Improve the Quality of Life

CONCLUSION:

Staff recommends the City Council approve the Costa Mesa Fire & Rescue Strategic Plan 2022 -2027.

COSTA MESA FIRE & RESCUE

DRAFT B

Message from the Fire Chief

Just over five years ago, our collective team worked together to develop our Costa Mesa Fire & Rescue (CMFR) Strategic Plan 2015-2020. The original document was the result of a comprehensive collaboration within our organization, intended to establish a clear roadmap and to help define and guide our Mission, Vision, and Values for the future.

With any successful plan, it is extremely important to develop the plan through engaged and thoughtful collaboration, implement the plan, and then regularly review and assess our progress to ensure we remain on track, adapting and making necessary adjustments along the way. Our team has made extraordinary progress and collectively accomplished so much over the past five years. These accomplishments have been achieved around the foundation and focus of four primary areas. These areas include:

1. Our People (Wellness, Training, Professional Development & Succession Planning);

2. Our Infrastructure (Facilities, Vehicles, and Equipment);

3. Our Service (Appropriate Staffing, Deployment, and Quality Service to the Community); and

4. Our Technology and Innovation (Enhanced GIS Resource & Response Mapping, CAD RMS Upgrades, Technology Advances, Firefighter Safety, and Innovation).

There is no question that we have observed outstanding results and outcomes as the result of our extensive preparations, comprehensive planning, steadfast hard work, and exhaustive execution. These successful outcomes have also been a direct result of the valued, strong support from our City Council, City Manager, City Leadership Team, and the Costa Mesa Community!

With the success of our previous Strategic Plan, we have recently finalized our next CMFR Strategic Plan, 2022-2027. This is a community-based strategic plan developed in alignment with our City Council's Strategic Goals and Objectives. This updated Strategic Plan will build on the outstanding progress made to date and will serve as an essential road map as we embark on thoughtfully carrying out our next chapters, continuing to elevate the department's progress and strong upward trajectory.

We will continue to actively pursue and achieve our goals and objectives, as we work on our gaps and areas of improvement, utilizing the 2022-2027 Strategic Plan to help define, refine, and provide a clear direction for our organization. We will remain committed to moving forward to serve the best interests of the community and each other to the absolute best of our abilities.

This Strategic Plan 2022-2027 is the result of strong partnerships within our organization and with our internal and external stakeholders. This community-driven process was a true team effort, and the valued input provided helped to create an outstanding final product, now memorialized in writing.

This would not have been possible without the participation and efforts of everyone involved engaging and participating at all levels, so thank you!

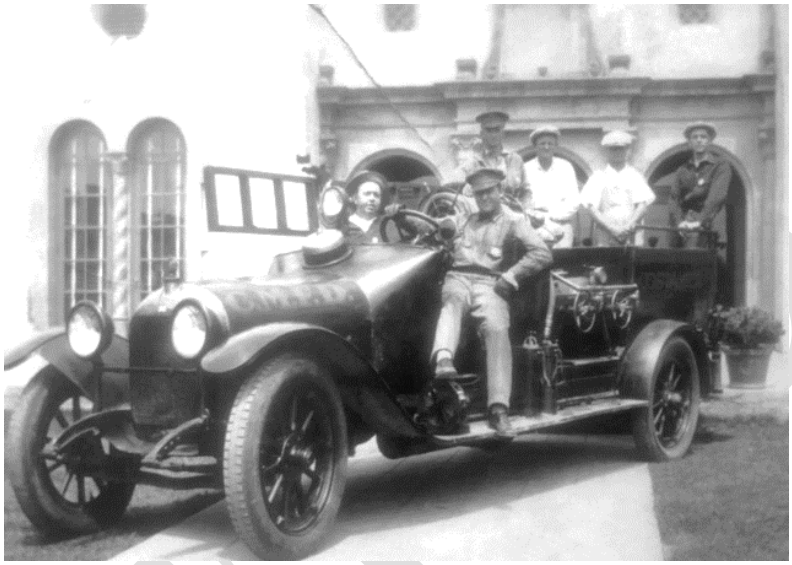
In closing, I want to thank our City Council, City Manager Lori Ann Farrell Harrison, our City Leadership and City Team, our Costa Mesa Fire Family, our incredible Costa Mesa community, and all our partners for the strong support we continue to receive. It is our greatest honor and privilege to serve Costa Mesa with Respect, Integrity, and Compassion - 24/7/365 – and our future is truly brighter than it has ever been!

Daniel A. Stefano, Fire Chief
City of Costa Mesa Fire & Rescue

DRAFT

Introduction

Costa Mesa Fire & Rescue (CMFR) provides an all-hazards approach in the protection of the lives and property of the residents, businesses, and visitors of Costa Mesa, California. CMFR is consistently working to achieve and/or maintain the highest level of professionalism and efficiency on behalf of those it serves, and thus, contracted with the Center for Public Safety Excellence® (CPSE) to facilitate a method to document the department's path into the future via a "Community-Driven Strategic Plan." The following strategic plan was written with a basis in the Commission on Fire Accreditation International's® (CFAI) fire and emergency service accreditation model and is intended to guide the organization within established parameters set forth by the authority having jurisdiction.



The CPSE utilized the community-driven strategic planning process to go beyond just developing a document. It challenged the department's members to critically examine paradigms, values, philosophies, beliefs, and desires and challenged individuals to work in the best interest of the "team." It further provided the department with an opportunity to participate in the development of the organization's long-term direction and focus. Members of the organization's community and agency stakeholders' groups demonstrated commitment to this important project and remain committed to the document's completion and plan execution.

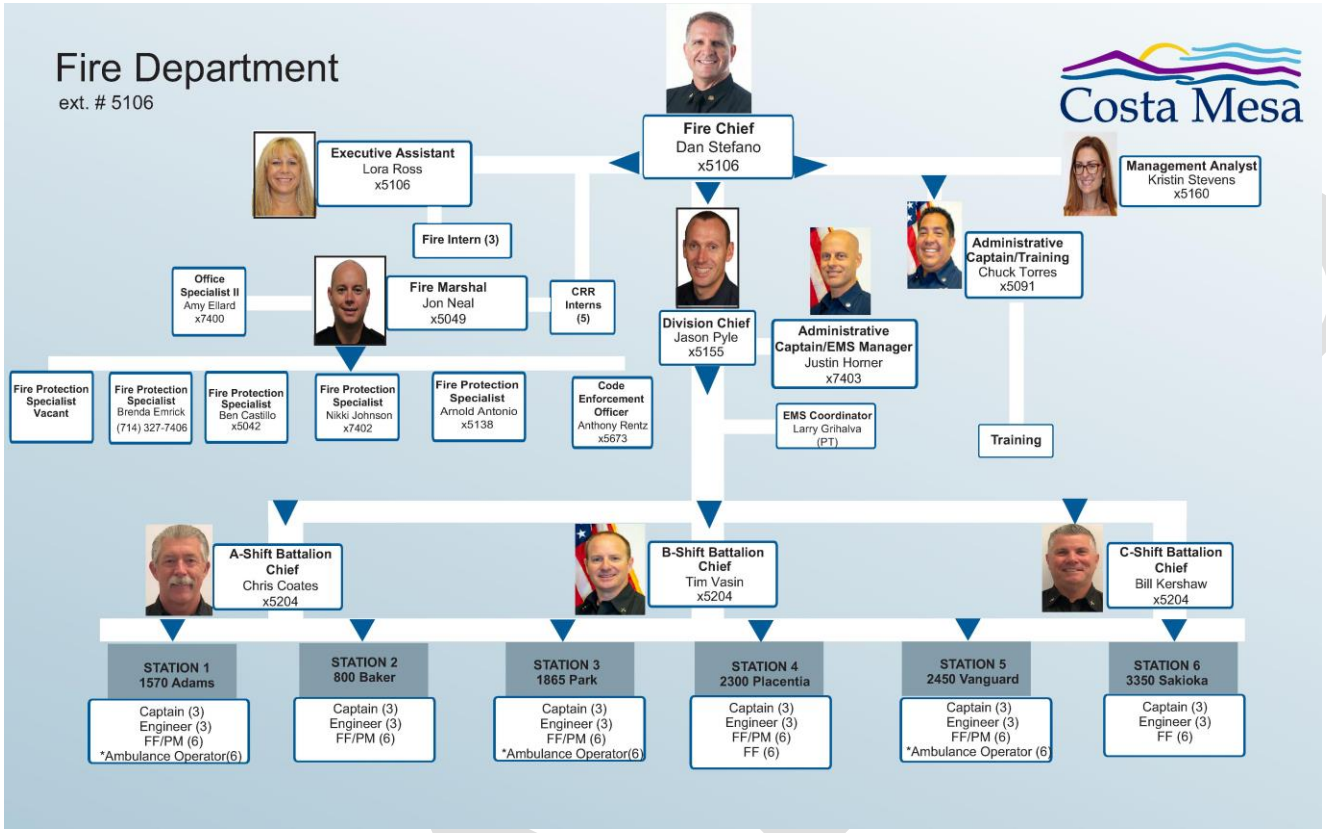
DRAFT

Organizational Background



Costa Mesa Fire & Rescue was first organized in 1925 as a volunteer department in response to several disastrous fires in the local community. Over the years, the organization evolved from its original all-volunteer form to the present all-hazards response team approaching its 100th anniversary.

Costa Mesa Fire & Rescue, boasting an ISO rating of 2, serves an approximate population of 113,000 residents. In addition, the local area has thousands of visitors and many others who are employed within the community. Growth and increase in population have and will provide for specific risks for which Costa Mesa Fire & Rescue considers, prepares, and deploys its resources and personnel.

Today, CMFR reflects on its history and remains committed to providing all-hazards emergency services and education to its community with courage, leadership, and duty. Costa Mesa Fire & Rescue continues to honor its community by providing quality services through its proactive focus on risks and deployment from six stations located strategically throughout the 16 square miles of coverage area. Staffed to support the community, CMFR embraces its future vision and excellence in service delivery.

Organizational Structure

Community-Driven Strategic Planning

For many successful organizations, the community's voice drives their operations and charts the course for their future. A community-driven emergency service organization seeks to gather and utilize the needs and expectations of its community in the development and/or improvement of the services provided. A community-driven strategic planning process was used to develop this strategic plan to ensure that the community remains a focus of an organization's direction.

A strategic plan is a living management tool that provides short-term direction, builds a shared vision, documents goals and objectives, and optimizes the use of resources. Effective strategic planning benefits from a consistent and cohesively structured process employed across all levels of the organization. Planning is a continuous process with no clear beginning and no defined end. While plans can be developed regularly, it is the process of planning that is important, not the publication of the plan itself. Most importantly, strategic planning can be an opportunity to unify the management, employees, and stakeholders through a shared understanding of where the organization is going, how everyone involved can work toward that common purpose, and how progression and success will be measured.

Community Stakeholders Work Session

The Community–Driven Strategic Planning Process Outline

1. Define the programs provided to the community.
2. Establish the community's service program priorities and expectations of the organization.
3. Identify any concerns the community may have about the organization and aspects of the organization that the community views positively.
4. Revisit the mission statement, giving careful attention to the current services and programs and those which logically can be provided in the future.
5. Revisit the values of the organization's membership.
6. Identify the internal strengths and weaknesses of the organization.
7. Identify areas of opportunity or potential threats to the organization.
8. Identify the organization's critical issues and service gaps.
9. Determine strategic initiatives for organizational improvement.
10. Establish a realistic goal and objectives for each initiative.
11. Identify implementation tasks for the accomplishment of each objective.
12. Determine the vision of the future.
13. Develop organizational and community commitment to accomplishing the plan.

Process and Acknowledgements

The Center for Public Safety Excellence (CPSE) acknowledges and thanks the community and agency stakeholders for their participation and input in this community-driven strategic planning process. The

DRAFT

CPSE also recognizes Fire Chief Dan Stefano and the team of professionals that participated for their leadership and commitment to this process.

Development of this strategic plan took place in April 2022, beginning with meetings hosted by a representative from the CPSE for members of the community (as named in the following table). The department identified community stakeholders to ensure broad representation. The community stakeholders were comprised of some who reside or work within Costa Mesa Fire & Rescue's coverage area and some who were recipients of CMFR's service(s).

Costa Mesa Fire & Rescue Community Stakeholders

Tom Arnold	Mike Decker	David Geck	Diane Pritchett
Daniel Baume	Maurice DePasquale	Jon Hampe	Michele Richards

Community Stakeholders Work Session

DRAFT B

Community Group Findings

A key element of Costa Mesa Fire & Rescue's organizational philosophy is having a high level of commitment to the community and recognizing the importance of community satisfaction. Thus, the department invited community representatives to provide feedback on the services provided by the department. Respondents were asked to provide a prioritized perspective of the programs and services provided by the department. Additionally, input was gathered during the meeting that revolved around community expectations and concerns (prioritized) and positive and other comments about the organization. Specific findings of the community stakeholders are provided in the appendix of this document. The agency stakeholders utilized the full feedback from the community stakeholders in understanding the current challenges encountered within the organization. Additionally, the community stakeholders' feedback provided a process to ensure alignment with the work completed on the organizational mission, values, vision, and goals for improvement.

Community Stakeholders Work Session

Community Priorities

To best dedicate time, energy, and resources to services most desired by its community, Costa Mesa Fire & Rescue needs to understand what the customers consider to be their priorities. With that, the community stakeholders were asked to prioritize the programs offered by the department through a process of direct comparison. The results were as follows:

Programs	Ranking	Score
Emergency Medical Services/Rescue	1	167
Fire Suppression	2	134
Technical Rescue	3	121
Emergency Management	4	96
Community Risk Reduction	5	73
Wildland Fire Services and State-wide Mutual Aid	6	72
Hazardous Materials Mitigation	6	72
Fire Investigation	8	65
Community Emergency Response Teams and Volunteer Programs	9	55
Public Fire and Life Safety Education	10	45

See Appendix 1 for a complete list of the community findings, including expectations, areas of concern, positive feedback, and other thoughts and comments.

Agency Stakeholder Group Findings

The agency stakeholder work sessions were conducted over three days. These sessions served to discuss

DRAFT

the organization's approach to community-driven strategic planning, focusing on the department's mission, values, core programs, and support services. Additionally, focus was given to the organization's perceived strengths, weaknesses, opportunities, and threats. The work sessions involved participation by a stakeholder group that represented a broad cross-section of the department, as named and pictured below.

Costa Mesa Fire & Rescue Agency Stakeholders

Steve Airey	Justin Horner	Fred McDowell	Daniel Stefano
Cinnamon Basco	Nikki Johnson	Jon Neal	Kristin Stevens
Morgan Cain	William Kershaw	Josh Ortega	Chuck Torres
Steve Cathey	Paul Kim	Jason Pyle	Maurilo Torres
Cristopher Coates	Mark Martinez	Lora Ross	Taylor Voss
Aaron Davis			

Agency Stakeholders

Mission

The mission provides an internal aspect of the existence of an organization and, to a degree, an empowering consideration for all department members. The purpose of the mission is to answer the questions:

- Who are we?
- Why do we exist?
- What do we do?
- Why do we do it?
- For whom?

A workgroup met to revisit the existing mission and, after ensuring it answered the questions, the following mission statement was created, discussed, and accepted by the entire group:

Costa Mesa Fire & Rescue is an all-hazard team dedicated to serving and protecting our community through professionalism, leadership, and excellence.

Values

Values embraced by all members of an organization are extremely important, as they recognize the features that make up the personality and culture of the organization. A workgroup met to revisit the existing values and proposed a revision that was discussed, enhanced further, and agreed upon by the entire group:

Respect
Integrity
Compassion

Agency Stakeholders Work Session

Vision

Vision statements can inspire and motivate the organization around concepts or ideas that establish benchmarks, provide line of sight, direction, and where the organization wants to be over time. The purpose of setting a vison is to institute something on the horizon that is out of the agency's comfort zone, challenging it to stretch thinking beyond daily functions while being somewhat attainable. It should clearly indicate the direction in which the agency should move, allowing stakeholders to invest in the future with an understanding of purpose. The workgroup of members reviewed and considered the established vision during deliberations that produced the strategic initiatives in this plan

Costa Mesa Fire and Rescue is committed to exceeding the expectations of those we serve by being a leader in Fire Protection, Rescue, Emergency Services, and Community Risk Reduction.

The mission, values, and vision are the foundation of this organization. Thus, every effort will be made to keep these current and meaningful so that they guide the individuals who make up Costa Mesa Fire & Rescue to accomplish the goals, objectives, and day-to-day tasks.

Programs and Services

To ensure a deeper focus exists in determining issues and gaps within an organization, there must be a delineation between core programs and supporting services. Core programs are those core deliverables provided by the department. Supporting services are all of the internal and external programs and services that help CMFR deliver its core programs.

The importance of understanding the difference is that issues and gaps may exist in core programs or supporting services, and the department's strategic approach may bring forth different considerations for improvement. Additionally, supporting services may be internal or external to the organization and requires an understanding of how the difference impacts their location within the analysis of strengths, weaknesses, opportunities, and threats if identified. Finally, it is important that the agency stakeholders understand that many local, state, and national services support the delivery of identified core programs.

Through a facilitated brainstorming session, the agency stakeholders agreed upon the core programs provided to the community and many of the supporting services that support the programs. This session provided the sought understanding of the differences and the important key elements of the delineation.

DRAFT

SWOT Analysis

An organization candidly identifies its positive and negative attributes through a SWOT analysis (strengths, weaknesses, opportunities, and threats). The SWOT analysis also provides an opportunity for an organization to evaluate its operating environment for areas it can capitalize on and those that pose a danger. Agency stakeholders recorded CMFR's strengths and weaknesses and the possible opportunities and potential threats. Information gathered through this analysis guides the agency's more significant issues and gaps. The information gleaned will assist the agency in finding its broader critical issues and service gaps.

Appendix 2 consists of the SWOT data and analysis collected by the agency stakeholders.

Critical Issues and Service Gaps

Following the identification and review of the department's SWOT, two separate groups of agency stakeholders met to identify themes as primary critical issues and service gaps (*found in Appendix 3*). The critical issues and service gaps identified by the stakeholders provide further guidance toward identifying strategic initiatives, which ultimately lend direction for the development of goals, objectives, critical tasks, and timelines.

Strategic Initiatives

Based upon all previously captured information and the determination of critical issues and service gaps, the following strategic initiatives were identified as the foundation for developing goals and objectives.

Technology	**Staffing**	**Infrastructure**
Training	**Communication**	**Accreditation**

Agency Stakeholders Work Session

DRAFT

Goals and Objectives

To continuously achieve the mission of Costa Mesa Fire & Rescue, realistic goals and objectives with timelines for completion must be established. These will enhance strengths, address identified weaknesses, provide a clear direction, and address the community's concerns. These should become a focus of the department's efforts, as they will direct the organization to its desired future while reducing the obstacles and distractions along the way. Leadership-established workgroups should meet and manage progress toward accomplishing these goals and objectives and adjust timelines as needs and the environment change. Regular reports of progress and changes should be shared with CMFR's leadership.

Goal 1	**Upgrade our technological infrastructure by investing in our equipment, systems, and personnel to enhance and sustain high service levels and positively impact our community.**

Objective 1A	**Identify and analyze current levels of funding, resources, and workload indicators related to our technological infrastructure.**	
Timeframe	6 months	**Assigned to:**
Critical Tasks	☐ Fire and city budget analysis of current budget allocation related to technical infrastructure. ☐ Identify individuals responsible for each budget area. ☐ Identify current technology, applications, and capabilities. ☐ Determine what technology can be enhanced, better utilized, replaced, or added. ☐ Analyze all current workload indicators. ☐ Create and disseminate a report of findings.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 1B	**Create a needs analysis to prioritize the appropriate funding, resources, and workload requirements.**	
Timeframe	6-9 months	**Assigned to:**
Critical Tasks	☐ Evaluate and review the current conditions in collaboration with IT specialists and individuals responsible for specific technology elements. ☐ Identify technical infrastructure origination dates, anticipated life span, and the required ongoing support. ☐ Incorporate qualitative and quantitative assessments. ☐ Conduct a cost analysis of identified technology needs.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Objective 1C	**Establish and implement action plans for specific outlined areas of priorities from the needs analysis.**	
Timeframe	9-12 months	**Assigned to:**
Critical Tasks	☐ Allocate and identify roles and responsibilities for collaboration on the plan development. ☐ Update the cost analysis based on assigned responsibilities and the action plan. ☐ Secure necessary funding and approval for the plan. Establish timelines and benchmarks for construction, purchasing, and acquisition. ☐ Monitor the progress through the construction periods.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 1D	**Establish a system to identify, validate, track, and measure progress and impact on the community.**	
Timeframe	12 months-ongoing	**Assigned to:**
Critical Tasks	☐ Establish metrics and assess capability for the collection of data. ☐ Collect data relative to the effectiveness of the plan upon implementation. ☐ Evaluate the collected data to determine the effectiveness and progress relative to established metrics. ☐ Analyze the collected data to determine needs, updates, or adjustments.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Goal 2	**Evaluate, develop, and execute comprehensive administrative and operational staffing levels that enhance and advance our ability to meet and exceed community expectations, governance, and department objectives.**

Objective 2A	**Evaluate current staffing level efficiencies and effectiveness related to community expectations, governance, and department objectives.**	
Timeframe	6 months	**Assigned to:**
Critical Tasks	☐ Seek volunteers for assignment to the identified action items detailed below. ☐ Analyze best practices from comparable agencies associated with staffing levels and areas of responsibility. ☐ Obtain a list of CMFR's current job descriptions and current areas of responsibility. ☐ Create a survey to identify, at minimum, task processing, commitment times, roles/responsibilities, and critical versus non-critical tasks. ☐ Conduct analysis and create a report of findings and recommendations on the conclusion. ☐ Create a report of findings on the conducted analysis.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 2B	**Perform a needs assessment to determine adequate staffing to meet and exceed community expectations, governance, and department objectives.**	
Timeframe	6 months	**Assigned to:**
Critical Tasks	☐ Seek volunteers for assignment to the identified action items detailed below. ☐ Analyze current workload and Areas of Responsibility (AOR). ☐ Create a list of tasks that are must-do versus nice to do. ☐ Create a staffing priority list, including options, and review annually. ☐ Conduct analysis and create a report of findings and recommendations on the conclusion. ☐ Create a report of findings on the conducted analysis.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Objective 2C	**Develop methods to enhance professional development programs for all staffing levels.**		
Timeframe	3 months	**Assigned to:**	
Critical Tasks	☐ Seek volunteers for assignment to the identified action items detailed below. ☐ Create a list of subject matter experts (SME) in program delivery areas to create methods of professional development. ☐ Identify available classes and/or training opportunities for each position. ☐ Use current department processes to disseminate the identified opportunities. ☐ Ensure and encourage members to seek tuition reimbursement per a memorandum of understanding. ☐ Conduct analysis and create a report of findings and recommendations on the conclusion. ☐ On an annual basis, make needed adjustments to the program based on the results of the analysis.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 2D	**Procure funding sources for additional staffing as identified.**		
Timeframe	12 months-ongoing	**Assigned to:**	
Critical Tasks	☐ Seek volunteers for assignment to the identified action items detailed below. ☐ Determine financial requirements for any identified additional staffing needs. ☐ Determine the return on investment (ROI) of any additional staffing needs. ☐ Seek alternative funding opportunities for any full-time equivalents or parts thereof. ☐ Allocate funds based on a prioritization of those staffing needs. ☐ Conduct analysis and create a report of findings and recommendations on the conclusion. ☐ On an annual basis, make needed adjustments to the program based on the results of the analysis.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 2E	**Create an evaluation process to develop performance measures that enhance and advance our ability to meet and exceed community expectations, governance, and department objectives.**		
Timeframe	3-6 months	**Assigned to:**	
Critical Tasks	☐ Develop focus groups to create metrics to evaluate the efficiencies and effectiveness of current and desired staffing levels and AORs. ☐ Evaluate current RMS to ensure that the metrics are being captured appropriately. ☐ Determine areas that require more focus is needed based on stakeholder feedback. ☐ Conduct analysis and create a report of findings and recommendations on the conclusion. ☐ On an annual basis, make needed adjustments to the program based on the results of the analysis.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Goal 3	**Upgrade our infrastructure by investing in our facilities, equipment, and systems to enhance and sustain a high level of service and positively impact our community.**

DRAFT

Objective 3A	**Identify and analyze current levels of funding, resources, and workload indicators related to our equipment, facilities, and systems.**	
Timeframe	6 months	**Assigned to:**
Critical Tasks	☐ Perform a departmental budget analysis of current equipment, facilities, and systems budget allocations. ☐ Identify appropriate individuals responsible for each budget area. ☐ Inventory all current equipment, facilities, and systems. ☐ Create and disseminate a report of findings.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 3B	**Create a needs analysis to prioritize the appropriate funding, resources, and workload requirements.**	
Timeframe	6 months	**Assigned to:**
Critical Tasks	☐ Evaluate and review current conditions in collaboration with the individuals responsible for equipment, facilities, and systems. ☐ Determine the following for all equipment, facilities, and systems: ▪ Year built and year delivered ▪ General condition of each item ▪ Prioritize need for replacement or upgrade ▪ Cost analysis and projected workload requirements ☐ Incorporate a qualitative/quantitative assessment with the subjective/objective data. ☐ Establish the prioritized needs and respective timelines.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT B

Objective 3C	**Establish and implement action plans for specific outlined areas of priority from the needs analysis.**	
Timeframe	12 months-ongoing	**Assigned to:**
Critical Tasks	☐ Allocate and identify roles and responsibilities to collaborate to create a plan of action. ☐ Conduct a cost analysis of the developed program. ☐ Secure any needed funding. ☐ Establish timelines and benchmarks for construction, purchasing, and acquisition. ☐ Monitor, track, and report on progress through completion.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 3D	**Establish a system to identify, validate, track, and measure service level progress and community impact.**	
Timeframe	12 months-ongoing	**Assigned to:**
Critical Tasks	☐ Collect data relative to our benchmarks. ☐ Collect historical perspectives for a timeline of equipment, facilities, and systems. ☐ Collect baseline data on community impact and effectiveness. ☐ Collect current and ongoing data for community impact and effectiveness. ☐ Establish mechanisms for inclusive community feedback. ☐ Annually collect and analyze data and make changes as needed.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Goal 4	**Collectively and continuously assess, develop, execute, and monitor a comprehensive training plan that strengthens, enhances, and advances the organization's operational, administrative, and personal goals.**

Objective 4A	**Evaluate the current status of our existing training programs to determine the plan's current status.**		
Timeframe	12 months	**Assigned to:**	
Critical Tasks	☐ Seek volunteers for assignment to the identified action items. ☐ Establish a list of all current training programs. ☐ Build performance measures for current curriculums and programs. ☐ Evaluate the strengths and weaknesses of current curriculums and programs. ☐ Publish and disseminate the results of the evaluation.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 4B	**Identify gaps or deficiencies in training programs and procedures in operations, administration, and CRR to improve the training plan.**		
Timeframe	12 months	**Assigned to:**	
Critical Tasks	☐ Seek volunteers for assignment to the identified action items. ☐ Using the established list, identify current gaps or areas of concern in programs relative to industry best practices. ☐ Through analysis, prioritize gaps that have the highest importance to the organization. ☐ Conduct cost analysis on the prioritized program results and any associated needed props and facilities. ☐ Publish and disseminate results.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 4C	**Implement a plan to strengthen career development for all positions to strengthen skill sets.**		
Timeframe	3-6 months	**Assigned to:**	
Critical Tasks	☐ Seek volunteers for assignment to the identified action items listed below. ☐ Seek SMEs to address the list of priorities. ☐ Have SMEs develop curriculum and determine needed props. ☐ Submit training plans to the training officer for addition to the training calendar. ☐ Deliver new training curriculum, collect feedback from personnel and make adjustments as needed.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

DRAFT

Objective 4D	**Identify ways to incorporate training with county-wide agencies to strengthen operational consistencies.**	
Timeframe	3-6 months	**Assigned to:**
Critical Tasks	☐ Determine current training and its effectiveness with county partners for all involved organizations. ☐ Establish a list of desired training with county partners in a collaborative effort. ☐ Survey neighboring agencies for the desire to engage in multi-agency training. ☐ Create a list of topics each neighboring agency wants to engage in training. ☐ Participate in a collaborative effort to build a curriculum. ☐ Establish a training calendar coordinated with neighboring agencies.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 4E	**Identify leadership development opportunities to improve the skill sets of organizational leaders.**	
Timeframe	9 months	**Assigned to:**
Critical Tasks	☐ Create a survey for department personnel to identify the current status of leadership ☐ Create priorities for training based on survey responses. ☐ Develop routine leadership curriculums based on priorities. ☐ Implement the established curriculum. ☐ Re-survey group to measure improvement after implementation of the curriculum.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 4F	**Develop methods to improve the accountability of supervisors to ensure congruency with the department's mission and values.**	
Timeframe	6-9 months	**Assigned to:**
Critical Tasks	☐ Survey personnel to identify the level of accountability of supervisors. ☐ Create a list of strengths and weaknesses in accountability ☐ Create a working group to identify strengths, issues, and challenges. ☐ Develop best practices for accountability ☐ Train leadership on best practices through focused training and education ☐ Resurvey group to measure the effectiveness of methods.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Objective 4G	**Procure funding sources for training programs, SMEs, and training facilities to meet the plan's financial requirements.**	
Timeframe	12 months-ongoing	**Assigned to:**
Critical Tasks	☐ Assign personnel to source funding options. ☐ Determine financial requirements needed to operate desired training programs, props, and facilities. ☐ Seek opportunities and methods for funding specified training programs, props, and facilities. ☐ Allocate funds based on the prioritized list of training projects/programs. ☐ Make adjustments to the program based on the allocation of funds.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 4H	**Create an evaluation process to develop performance measures that strengthen, advance, and enhance the organization's operational, administrative, and personal goals.**	
Timeframe	3 months-ongoing	**Assigned to:**
Critical Tasks	☐ Develop focus groups to create metrics to evaluate the effectiveness of training in desired areas of improvement. ☐ Identify industry and agency-specific standards for each desired program area. ☐ Evaluate current RMS to ensure that the metrics are being captured appropriately. ☐ Assess whether we have met our goals for the previous training period. ☐ Determine areas that require more focus is needed based on the analysis. ☐ Review annually and make needed adjustments to the program based on the results of the analysis.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT B

Goal 5	**Enhance internal and external communication to provide clarity and alignment with those we serve and serve with.**

Objective 5A	**Identify and evaluate current and potential communications delivery systems for disseminating information relating to organizational activities and events for public interest.**	
Timeframe	2-3 months	**Assigned to:**
Critical Tasks	☐ Establish program lead/s for the analysis. ☐ Identify and list current platforms and applications used in communication. ☐ Identify the audience/end-user of the identified applications and platforms. ☐ Identify the team and areas of responsibility that manage the systems. ☐ Identify alternate platforms that may be appropriate for the department's use. ☐ Define current content information disseminated and conduct an evaluation, ☐ Utilize the collected community feedback to determine the importance and demand for information. ☐ Conduct a cost analysis of the identified programs and applications.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 5B	**Evaluate existing SOPs and operation/organization manuals for applicability and legality.**	
Timeframe	9-12 months	**Assigned to:**
Critical Tasks	☐ Establish a review committee/ team and point of contact to conduct evaluation. ☐ Explore third-party platform systems contracts (e.g., Lexipol). ☐ Evaluate current and future SOPs for relevance and compliance. ☐ Research and identify third-party records management system options (RMS). ☐ Evaluate it for applicability and select platforms to interface with our system needs. ☐ Compile and build a report performance.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Objective 5C	**Identify and train personnel on the systems used to organize all vital operational information to organizational personnel.**	
Timeframe	9-12 months	**Assigned to:**
Critical Tasks	☐ Identify and develop SMEs for new systems use and application. ☐ Develop a training curriculum based on SME input. ☐ Publish a training manual for initial training. ☐ Establish a train-the-trainer group. ☐ Implement a training program and evaluate the effectiveness of the delivery. ☐ Adjust the training program based on analysis. ☐ Based on the effectiveness and training adjustments, build a future end-user guide.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 5D	**Implement the system to organize and make easily accessible all vital operational information to the organization and support personnel.**	
Timeframe	2-3 months	**Assigned to:**
Critical Tasks	☐ Establish a rollout timetable. ☐ Identify SMEs to ensure efficient rollout. ☐ Identify and allocate potential rollout expenses. ☐ Coordinate with IT point of contact to mitigate any crossover issues.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 5E	**Continually obtain feedback to evaluate the clarity and alignment of information and the relevance of the systems used.**	
Timeframe	2-3 months	**Assigned to:**
Critical Tasks	☐ Create a feedback method to gather information from the end user. ☐ Analyze the collected information to determine if clarity and alignment of information are achieved. ☐ Make necessary adjustments to the systems in use and determine any additional needs required. ☐ Establish the frequency for continuous evaluation of the systems, their use, and relevance to department systems. ☐ Evaluate end-user response for potential program enhancements.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Goal 6	**Prepare for, pursue, achieve, and maintain international accreditation to better serve our community and embrace excellence.**

Objective 6A	**Form team or committee structures with management components as needed to pursue and maintain accreditation.**	
Timeframe	30 days	**Assigned to:**
Critical Tasks	☐ Identify the team or committee for the various components of the accreditation process. ☐ Create management oversight positions to lead the teams or committees and overall process. ☐ Establish team or committee member criteria. ☐ Determine the composition of the teams or committees. ☐ Solicit participation to meet the composition of the teams or committees. ☐ Develop and complete the workgroup selection process. ☐ Provide the needed educational components available through the CFAI. ☐ Guide the team or committee in constructing a work plan to manage the accreditation process.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 6B	**Develop a community-driven strategic plan.**	
Timeframe	3 months and ongoing	**Assigned to:**
Critical Tasks	☐ Hold an external stakeholder meeting where community members provide feedback on program priorities, service expectations, concerns, and strengths perceived about the agency. ☐ Provide agency stakeholder work sessions to evaluate/update the mission, vision, and values; determine internal strengths and weaknesses, external opportunities, and threats. ☐ Identify critical issues, service gaps, and specific strategic initiatives. ☐ Develop goals, objectives, critical tasks, and appropriate timelines, including measurability levels, to achieve improvement over five years. ☐ Create a department or agency vision statement from the developed strategic plan. ☐ Publish and distribute the formal strategic plan to stakeholders, including the authority having jurisdiction as determined by the organization.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

Objective 6C	**Implement the community-driven strategic plan.**	
Timeframe	3 months, ongoing	**Assigned to:**
Critical Tasks	☐ Create a strategic planning subcommittee to carry out the strategic plan. ☐ Determine a work plan to accomplish each goal and implement the plan. ☐ Continuously evaluate and revise the objectives and tasking as the plan is implemented. ☐ Report annual plan progress to community and agency stakeholders.	
Funding Estimate	Capital Costs: Personnel Costs:	Consumable Costs: Contract Services Costs:

DRAFT

Objective 6D	**Conduct a comprehensive community hazards and risk assessment and document findings to develop a standards of cover.**		
Timeframe	6 – 9 months	**Assigned to:**	
Critical Tasks	☐ Gather and consider geophysical characteristics data of the jurisdictional responsibilities. ☐ Gather and evaluate population, population demographics, area economics, and socioeconomic data of the jurisdiction. ☐ Gather and consider physical asset development, service, and transportation infrastructure types in the jurisdiction. ☐ Describe the department's programs, services, core deliverables, human and physical resources to establish baseline information. ☐ Determine an appropriate methodology for dividing the area of responsibility into geographical planning zones. ☐ Build a methodology that identifies, assesses, classifies, and categorizes risk in the jurisdiction's response areas. ☐ Document the information collected and the results of the applied methodologies in the risk assessment process.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 6E	**Develop standards of cover based on community hazards and risk assessment results and combine results to complete the community risk and standards of cover study document.**		
Timeframe	3 - 6 months	**Assigned to:**	
Critical Tasks	☐ Evaluate historical jurisdictional emergency response performance and coverage for baseline data. ☐ Establish benchmark and baseline emergency response service level and performance objectives. ☐ Develop methodologies and policies for qualifying and validating data sets. ☐ Conduct a gap analysis of performance across classes and categories of risk in each of the established planning zones to illuminate opportunities for improvement. ☐ Build a compliance methodology for monitoring, evaluating, and reporting delivery performance. ☐ Utilize the overall system performance data to create short- and long-term plans for maintaining and improving the system's response capabilities. ☐ Combine and publish the community risk assessment/standards of cover study information, performance data, established objectives, and gap analysis results and ☐ Maintain and annually update the community risk assessment/standards of cover document. ☐ Present the CRA/SOC study results as updated annually to the authority having jurisdiction to provide transparency, build consensus, and align expectations.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

DRAFT B

Objective 6F	**Achieve agency accreditation by the CFAI.**		
Timeframe	4 months	**Assigned to:**	
Critical Tasks	☐ Apply for "Candidate Agency" status with the CFAI. ☐ Prepare for the CFAI peer assessment team visit. ☐ Upload strategic plan, community risk assessment/standards of cover, and self-assessment documentation for review and comment by the CFAI peer assessment team. ☐ Host the CFAI peer assessment team site visit for accreditation review. ☐ Receive the CFAI peer assessment team recommendation to CFAI for Accredited status. ☐ Review the peer assessment team's recommendations to determine applicability to agency processes or systems to determine the scope of the annual compliance report process. ☐ Receive vote during the CFAI hearings in favor of accredited status.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

Objective 6G	**Maintain accreditation with the CFAI.**		
Timeframe	Ongoing	**Assigned to:**	
Critical Tasks	☐ Continue collecting and evaluating all relevant data for continuous improvement opportunities. ☐ Submit initial required annual compliance reports. ☐ Participate in as many offerings from CPSE as possible for continued education. ☐ Participate in the accreditation process by providing "peer assessors" for external department review and identification of possible best practices. ☐ Participate in the annual CPSE Excellence Conference for continued education and networking with other accreditation teams and accredited agencies. ☐ Submit annual compliance reports as required by CFAI policies. ☐ Establish succession development of the internal accreditation team in preparation for the next accreditation cycle.		
Funding Estimate	Capital Costs: Personnel Costs:		Consumable Costs: Contract Services Costs:

DRAFT

Vision

On the final day of the process, the CPSE presented a strategic plan vision of where the organization will be in the future if the strategic plan is accomplished. This is not to override the department's global vision but rather to confirm the futurity of the work that the agency stakeholders designed. This vision is intended as a target of excellence to strive toward and provides a basis for its goals and objectives.

"Vision is knowing who you are, where you're going, and what will guide your journey."

Ken Blanchard

Costa Mesa Fire & Rescue's 2027 vision is to be an internationally accredited agency that strives for continuous improvement with its all-hazard approach to delivering excellence. As a forward-thinking organization, we will employ and operate modern technology with a fiscally viable approach to the deployment and sustainability of resources. In addition, we will strengthen our relationships with the community, our service partners, and the member stakeholders we serve through comprehensive communication practices.

In recognition of our greatest resource and human investment, we will make every effort to develop, support, mentor, and prepare our members to be the best they can be. Our concept is to achieve this through the use of appropriate staffing models and contemporary professional development. We envision a future agency that recruits, welcomes, and retains new, inventive members with expertise and demonstrative principles of respect and integrity.

We will be an initiative-focused agency that builds a collaborative leadership environment through individual professionalism and organizational accountability to deliver our mission, live our values, and make this vision a reality.

Performance Measurement

To assess and ensure that an organization is delivering on the promises made in its strategic plan, leaders must determine performance measures for which they are fully accountable. As output measurement can be challenging, the organization must focus on assessing progress toward achieving data-driven improved output. Organizations must further be prepared to revisit and revise their goals, objectives, and performance measures to keep up with accomplishments and environmental changes.

To establish that the department's strategic plan is achieving results, performance measurement data will be implemented and integrated as part of the plan. An integrated process, known as "Managing for Results," will be utilized, which is based upon:

- The identification of strategic goals and objectives;
- The determination of resources necessary to achieve them;
- The analysis and evaluation of performance data; and
- The use of that data to drive continuous improvement in the organization.

• If you don't measure the results of your plan, you can't tell success from failure.
• If you can't see success, you can't reward it.
• If you can't reward success, you're probably rewarding failure.
• If you can't see success, you can't learn from it.
• If you can't recognize failure, you can't correct it.
• If you can demonstrate results, you can win public support.

Reinventing Government
David Osborn and Ted Gaebler

A "family of measures" typically utilized to indicate and measure performance includes:

- **Inputs -** Value of resource used to produce an output.
- **Outputs –** Quantifiable data-driven units produced which are activity-oriented and measurable.
- **Efficiency -** Inputs used per output (or outputs per input).
- **Service Quality -** The degree to which customers are satisfied with a program or how accurately or timely service is provided.
- **Outcome -** Qualitative consequences associated with a program/service, i.e., the ultimate benefit to the customer. Focused on the "why" of providing a service.

The Success of the Strategic Plan

The department has approached its desire to develop and implement a strategic plan by asking for and receiving input from the community and organization members during the development stage of the planning process. To assist in developing this plan, the department used professional guidance to conduct a community-driven strategic planning process. The success of this strategic plan will not depend upon the implementation of the goals and related objectives but on support received from the authority having jurisdiction, the members of the organization, and the community at large.

Provided the community-driven strategic planning process is kept dynamic and supported by effective leadership and active participation, it will be a considerable opportunity to unify agency and community stakeholders. This can be accomplished through a jointly developed understanding of organizational direction, focusing on all vested parties working to achieve the mission, goals, and vision. Further consideration must be made on how the organization will measure and be accountable for its progress and successes.

DRAFT

Glossary of Terms, Acronyms, and Initialisms

Accreditation	A process by which an association or agency evaluates and recognizes a program of study or an institution as meeting certain predetermined standards or qualifications. It applies only to institutions or agencies and their programs of study or their services. Accreditation ensures a basic level of quality in the services received from an agency.
CAD	Computer-Aided Dispatch
CERT	Citizens Emergency Response Team
CFAI	Commission on Fire Accreditation International
COOP	Continuity of Operations Plan
CPSE	Center for Public Safety Excellence
CRR	Community Risk Reduction
Customer(s)	The person or group who establishes the requirement of a process and receives or uses the outputs of that process; or the person or entity directly served by the department or agency.
Efficiency	A performance indication where inputs are measured per unit of output (or vice versa).
EMS	Emergency Medical Services
Environment	Circumstances and conditions that interact with and affect an organization. These can include economic, political, cultural, and physical conditions inside or outside the organization's boundaries.
FEMA	Federal Emergency Management Agency
GIS	Global Information System
Input	A performance indication where the value of resources is used to produce an output.
ISO	Insurance Services Office
IT	Information Technology
MCT	Mobile Computer Terminal
Mission	An enduring statement of purpose; the organization's reason for existence. Describes what the organization does, for whom it does it, and how.
NMUSD	Newport Mesa Unified School District
OCFEC	Orange County Fair and Events Center
Outcome	A performance indication where qualitative consequences are associated with a program/service, i.e., the ultimate benefit to the customer.
Output	A performance indication where a quality or number of units produced is identified.
PSAP	Public Safety Access Point
RMS	Record Management System
SME	Subject Matter Expert

DRAFT B

SOG Standard Operating Guideline

SOP Standard Operating Procedure

Stakeholder Any person, group, or organization that can place a claim on, or influence the organization's resources or outputs, is affected by those outputs or has an interest in or expectation of the organization.

Strategic Goal A broad target that defines how the agency will carry out its mission over a specific period. An aim. The final result of an action. Something to accomplish in assisting the agency in moving forward.

Strategic Objective A specific, measurable accomplishment required to realize the successful completion of a strategic goal.

Strategic Plan A long-range planning document that defines the agency's mission and broadly identifies how it will be accomplished and that provides the framework for more detailed annual and operational plans.

Strategic Planning The continuous and systematic process whereby guiding members of an organization make decisions about its future, develop procedures and operations to achieve that future, and determine how success is measured.

Strategy A description of how a strategic objective will be achieved. A possibility. A plan or methodology for achieving a goal.

SWOT Strengths, Weaknesses, Opportunities, and Threats

USAR Urban Search and Rescue

Vision An idealized view of a desirable and potentially achievable future state - where or what an organization would like to be in the future.

DRAFT

Appendix 1 – Community Input

Understanding the community's perspective allows the department to change or bolster processes and strategies to fulfill community needs. The following includes feedback from participating community stakeholders, collected and processed by CPSE on behalf of Costa Mesa Fire & Rescue.

Should Change

Respondents were asked to provide one thing the department should change. The data were processed thematically and listed with the number of responses matched the theme, as represented by the number in the parentheses. The following are the responses related to what the department should change:

1. Accessibility and communication of fire department resources available to the community. Outreach and contact with neighbors adjacent to stations. Greater community-building presence. More involvement with educators at schools. (5)
2. Increase staffing. Staffing levels. Staffing levels for community outreach. (3)
3. Advanced disaster planning. (1)
4. Publish and discuss key performance indicators. (1)
5. Number of bilingual staff. (1)
6. Social media presence. (1)

Should *Not* Change

Respondents were asked to provide one thing the department should *not* change. The data were processed thematically and listed with the number of responses matched the theme, as represented by the number in the parentheses. The following are the responses related to what the department should change:

1. Showing up at community events. Being responsive to our community needs. Your community presence and accessibility. Accessibility of staff to community. Available to contact. (5)
2. Leadership style. Top management. Leadership. (3)
3. Visual appearance of trucks and stations. (1)
4. Management of department and personnel. (1)
5. Their culture. (1)
6. Responsiveness in real time. (1)
7. Decrease in stations. (1)
8. Sending out both trucks and ambulances to the scene of accidents. (1)
9. Customer service. (1)
10. Training. (1)
11. Community-driven performance improvement. (1)

Community Expectations

Understanding what the community expects of its fire service organization is critically important to developing a long-range perspective. With this knowledge, internal emphasis may need to be changed or bolstered to fulfill the community's needs.

DRAFT

Respondents were asked to list, in priority order, up to five subjects relative to their expectations for Costa Mesa Fire & Rescue. Responses were then analyzed for themes and weighted. The weighting of the prioritized responses was as follows: if it was the respondent's first entry, it received five weighted points. Weighting gradually decreased so that if it was the respondent's fifth entry, it received one weighted point. The weighted themes were then sorted from the highest cumulative weight to the lowest cumulative weight and listed below. The numbers in the parentheses are the cumulative weighted value that correlated with the theme identified. While the themes are listed in prioritized, weighted order, all responses were important in the planning process. The following are the expectation responses of the community stakeholders (in priority order):

1. To be there when the emergency occurs. High-quality and timely response. Absolutely lowest response time in each Costa Mesa neighborhood. Service quickly, I want a quick response. Response times. Available and timely response when called. Quick and effective response. (32)
2. Community interaction / presence. To evaluate current community engagement after Covid and reengage with the community in things like CERT. Know the community and encourage others to follow by example. Commitment to the community. Community training and communication. Be active in the community, at local events, and provide education at community events. Family-friendly attitude when in uniform to the community. (19)
3. Emergency response. Save life and property. Quality of service. Emergency prevention and mitigation. To be responsive to emergency needs. (17)
4. Maintain a well-trained and highly capable fire and rescue staff. That they have the training, tools, and equipment necessary to provide excellent service. To maintain a highly trained and professional staff. Provide best-in-class training for the firefighters and paramedics. Firefighter expertise. (11)
5. Life safety inspections. Fire prevention - both in open areas and in homes and businesses. Fire prevention and mitigation resources. Continually improve fire prevention efforts. (6)
6. Ensure CMFR has the most up-to-date tools and technology available. Fire/medical assistance will be performed with excellence using the highest quality/advanced equipment and technology. (4)
7. Be healthy and ready to do what is needed to save lives. Personnel to be healthy. (3)
8. Medical response. (3)
9. Access/partnership with staff to work through school safety issues or concerns. (2)
10. Costa Mesa Fire Rescue recruits and retains the top of the class. (2)
11. Stay out of politics (city council member campaigning). (2)
12. Support of the city decision-makers to ensure proper resources are provided. Fire rescue will have the resources immediately available to respond to all emergencies. (2)
13. Fire response. (2)
14. Caring, understanding, and being empathetic during emergency situations. (2)
15. Disaster response and leadership implementation of procedures. Disaster planning/response model. (2)
16. Communication. (2)
17. To continue to work collaboratively with other safety organizations. (1)

DRAFT

Areas of Community Concern

The planning process would be incomplete without an expression from the community stakeholders regarding concerns about the organization. Some areas of concern may be a weakness within the delivery system, while some weaknesses may also be misperceptions based upon a lack of information, understanding, or incorrect information.

Respondents were asked to list, in priority order, up to five concerns they have about or for the department. Responses were then analyzed for themes and weighted. The weighting of the prioritized concerns was as follows: if it was the respondent's first entry, it received five weighted points. Weighting gradually decreased so that if it was the respondent's fifth entry, it received one weighted point. The weighted themes were then sorted from the highest cumulative weight to the lowest cumulative weight and listed below. The numbers in the parentheses are the cumulative weighted value that correlated with the theme identified. While the themes are listed in prioritized, weighted order, all responses were important in the planning process. The following are the concerns of the community stakeholders prioritized and weighted accordingly (verbatim, in priority order):

1. Emergency communications staffing vacancies from burnout. Can you hire what you need or will there be a staffing shortage. My hope is that staffing levels are not reduced as the result of any fiscal issues. Staffing to handle the increase in office use residential growth/expansion. (12)
2. Funding. Do you have enough funding for staff and equipment? It does not have the resources necessary to perform all the tasks being asked. Will be able to provide sufficient dollars so they can meet their mission. Efforts to control costs may not be widely understood. funding is sufficient to modernize and train. (11)
3. Consistency of fire inspections moving forward. Turnaround time for plan check. Need more inspections, on a quarterly basis in the retail corridor. (8)
4. We all know the stations are staffed; however, there is little to no interaction with the adjacent businesses and residents. Fire department holding community-friendly events in neighborhoods to promote fire safety. Community-wide initiative such as replacing batteries at every Costa Mesa household, handout fire extinguishers. sufficient time and commitment to build community leadership and relationships. (7)
5. With the growth of the northeast portion of the city, can CMFR handle the response in normal day-to-day operations. Will they be able to stay ahead of safety needs as the city grows? (6)
6. Homeless calls and continued training around mental illness. It is having to use its valuable resources to respond to mental health call/concerns from chronically homeless individuals. (5)
7. That outside forces - politics, legislative measures will hamper their ability to serve. May be vulnerable to political challenges in the future. Internal vision may be constrained by politics or third-party agenda. (5)
8. Disaster planning beyond documentation. Enough equipment and personnel in natural or manmade disasters. (5)
9. Concern for succession planning for key leadership roles. Is there a succession plan in place to fill vacancies in leadership positions as staff retires or moves on? (4)
10. Amount of training to do rescues on trees when people are dying with no way to access the back without a ladder. (3)
11. Response times. (3)

DRAFT

12. Was someone from NMUSD, Orange County Department of Education, or private school system invited today? (3)
13. Aging or outdated technology and or equipment. (3)
14. Do they respond to calls the same in Mesa Verde and the westside? (3)
15. Firefighters knowing community resources when responding to an emergency of individual families at risk. (3)
16. Not clear if objectives are being met. (3)
17. Equipment to climb trees in case of any emergencies. (2)
18. Health/wellness/staffing of your personnel. (2)
19. Employee morale. (2)
20. Are there enough bilingual employees to interact with our large Hispanic population? (2)
21. Understanding of existing location/ building infrastructure. (2)
22. Instructors to teach them about the failure and risk (trees). (1)
23. Other city entities not doing their job, and that results in CMFR having to step into areas they should not. (1)
24. Are there other ways to involve youth in understanding fire safety without having them be members of the explorers? (1)

DRAFT B

Positive Community Feedback

The CPSE promotes the belief that the community's view on the organization's strengths must be established for a strategic plan to be valid. Needless efforts are often put forth in over-developing areas that are already successful. However, proper utilization and promotion of the strengths may often help the organization overcome or offset some identified weaknesses. The following are the identified strengths recognized by the community stakeholders (verbatim, in no particular order):

- Great looking fire trucks and fire stations are very beneficial to the community.
- Strong leadership and cooperation with similar departments.
- Establish community presence at city events.
- Staff engagement and access while working through issues and concerns.
- Emergency response-arriving quickly and professionalism of the staff.
- Improved quality of fire inspections being done.
- Very involved.
- On-time and ready for what's up.
- Trained for all emergencies, except trees.
- They do well with training and succession planning within the ranks and file firefighters.
- Our CMFR are personal, friendly, and professional.
- Dan Stefano is an amazing leader; humble, engaging, and politically savvy.
- Positive and welcoming attitude by Chief Stefano, humble, access able, and professional.
- Professional attitude and service by CMFR, even during difficult times.
- They do love their job of saving lives.
- Staff and employees – firefighters are kind and willing to help.
- The response time at night has been swift.
- The department is trying to do more community outreach.
- Station crews are always great to work with.
- The fire marshal's office is always responsive.
- Great community partner.
- Rapid response time.
- Positive community role modeling through opportunities for greater community building.
- Excellent community service attitudes with all department individuals that I have encountered.
- Extremely well-led.
- Excellent community presence.
- Very responsive, not only to emergencies but to requests in general.
- Thank you for including us in this process.
- OCFEC is proud to be a neighbor and partner.
- When you engage with CMFD personnel they are professional and present a unified front-everyone smiles!

DRAFT B

- The chief/management play a very visible and active role in the community.
- The mutual aid system works well when other departments are needed to assist.
- Outstanding leadership at all levels.
- Excellent community outreach and a positive reputation.
- Highly skilled and well-trained staff.
- Excellent and caring personnel.
- Overall passion for providing good service.
- Having worked at Orange County fairgrounds for the past 18 years, the communication and partnership has been great.
- Response time.
- Leadership.
- Past emergency/non-emergency response was fast and effective.
- Personnel interactions were professional.
- Fire marshal and CERT resource assistance was/is extremely valuable.
- Outstanding leadership.
- Excellent communication with the community, great outreach.
- Proud of their image among peer groups.
- They stop and say hi to kids and hand out stickers.
- Always friendly interaction with staff.
- Positive social media presence.
- Great team! Fire specialist team is top-notch and very assessable to answer questions and meet on-site.
- The fire department personnel are very helpful, professional, and friendly.
- If the staff does not have the answer, they look for it in the fire code books and are seasoned to view the situation in spirit of the code.
- Well regarded and respected by many in the business community.
- Community involvement on all levels.
- Thorough building and business inspections.
- Resiliency of the team during the last 2+ years.
- Willingness by the leadership and department to be transparent and search for a higher vision, purpose, and level of performance.
- Apparent healthy relationship between the elected, the city manager, and the fire chief. Very important to have genuine alignment and commitment.

Other Thoughts and Comments

The community was asked to share any other comments they had about the department or its services. The following written comments were received (verbatim, in no particular order):

- Two gardeners on my street passed away from climbing trees around electrical conductors. We need to educate our community and firefighters of all risks.

DRAFT B

- They are effective at resourcing, engaging, and mobilizing the community for emergency response contingencies (CERT).
- My friend Debbie Magnussen started Project Cuddle here in Costa Mesa - she wants every fire and police station to have a safe surrender sign for women in crisis.
- Love the flags on the trucks.
- I would love to see more community events where families are able to interact, buy shirts/hats.
- CMFR is doing a great job and I am thrilled they are undertaking this process.
- Community training and other interaction.
- I could not be prouder of our CMFR department-they are professionals and leaders in their profession.
- I am proud to be a Costa Mesa resident and protected by these men and women.
- Thank you for all you do and taking the time to go through this community input process.
- It would be helpful to know when fire is dispatched to an emergency on Vanguard University campus when the call/emergency was not generated by Vanguard.
- It is my perception that the City of Costa Mesa is in good hands with the CMFR organization.
- Share my community fire hazards that are preventable.

DRAFT B

Appendix 2 - SWOT

Strengths

It is important for any organization to identify its strengths to ensure that it can provide the services requested by the community and that strengths are consistent with the issues facing the organization. Often, identifying organizational strengths leads to the channeling of efforts toward primary community needs that match those strengths. Programs that do not match organizational strengths or the organization's primary function, should be seriously reviewed to evaluate the rate of return on staff time and allocated funds.

Through a consensus process, the agency stakeholders identified the department's strengths as follows:

Department's recognition processes; social media, employee of the month, and awards	Commitment to service through the empowerment to do good deeds
Awareness and priority of our succession planning that builds redundancy in the agency	Individual commitment, involvement, and volunteerism of our members
Positive stakeholder relationships, both internally and externally	Equipment is well maintained, with new equipment on order
Probationary firefighter training, mentoring, and academy	Communication
Operational adaptability in our deployment model	Professionalism
The welcomed outcome data from our EMS training	Regional and state involvement
Teamwork exampled by peer-to-peer communication	People (our fire family)
Existence and application of a department-specific COOP	Professional development (i.e., education)

DRAFT B

Weaknesses

For any organization to either begin or continue to move progressively forward, it must be able to identify its strengths and those areas where it functions poorly or not at all. These areas of needed enhancements are not the same as threats to be identified later in this document but rather those day-to-day issues and concerns that may slow or inhibit progress. The following items were identified by the agency stakeholders as weaknesses:

Lack of a comprehensive, user-friendly, easily accessible administrative procedure manual	Lack of procedure to update site maps and printed map books
Lack of performance measures / CQI	Lack of arson investigation capabilities
Applications and programs used for data collection and reporting are owned and managed by external agencies limiting agency control of data	The reliance on functions managed by volunteers, such as EMS supplies, and tools, may impact their passion for participation
Program area(s) workload balance between shift stations and crews	Confusion between the application of management vs. leadership
SOP manual out of date	Lack of multi-company drills
Lack of appropriate compensation for additional workload from program area assignments	Lack of training with our neighboring agencies and Costa Mesa Police Department
Lack of hazmat specialist	Lack of empowerment in decision making
Lack of administrative staff (executive, EMS, training)	Budgetary mechanism to identify money in and out
Lack of an IT strategic plan on the fire side	USAR equipment and training
Communications – email vs. policy/procedure objectives being worked on by multiple people and don't know it	Lack of comprehensive formal mentorship and professional development training for all positions in the organization
Insufficient staffing to provide needed reliable administration support	The need for appropriate mission-critical support vehicles
Lack of formal and documented career path involvement process for members of the organization	

DRAFT B

Opportunities

The opportunities for an organization depend on identifying strengths and weaknesses and how they can be enhanced. The focus of opportunities is not solely on existing service but on expanding and developing new possibilities inside and beyond the traditional service area. The agency stakeholders identified the following potential opportunities:

Evaluation and expansion of the current regional ambulance operator program	PSAP position growth to improve communications, 911 call-taking, and dispatch processes
Determining IT / GIS software processes or systems to update mapping	Enhancing current/future external stakeholder relationships
Increase opportunities for fire department/state incident management teams	Enhance the relationship between OCEHD and the department in the management of the hazmat program
Need for improved city fleet management SOP	Need for additional emergency vehicle technician
Increase funding to assist in meeting agency-appropriate standards	Current COVID/COOP level prevents us from engaging the public (schools, open houses)
Enhance grant opportunities	Increase in participation in outside state fire committees
Determine opportunities for external funding sources other than grants	Identify external training opportunities (other fire departments, FEMA, state, etc.)
Staffing to allow dual company fire stations that increases presence in the community (money)	Increase funding to provide for more subject matter expert use in agency development

DRAFT B

Threats

By recognizing possible threats, an organization can reduce the potential for loss. Fundamental to the success of any strategic plan is the understanding that threats are not entirely and/or directly controlled by the organization. Some of the current and potential threats identified by the agency stakeholders were as follows:

Changes in the economic variables of inflation, interest rates, property values, sale tax revenue, etc.	The policies and agendas produced through political activities
Supply chain	IT limitations
Domestic and international terrorist acts	Commercial/industrial demographics/evolution
Natural and manufactured disasters	Social influences/movements/generational ideology
The impact of unfunded state mandates on the organization	Shrinking candidate pool due to multiple agencies hiring and a decrease in qualified candidates
Ambulance patient offload time during busy times	Increasing call volume
Homeless / mental illness /facilities	Privatization of fire and/or EMS service delivery
Commercial/residential development impact on call volume	Retention issues causing the loss of employees to other agencies
Relocation of the workforce to greater distances and/or out of state	Legislative changes at the local, state, and federal levels impacting the organization
Pandemics	Paramedic school product quality
Population density changes that may drive political and legislative changes that negatively impact the organization	

DRAFT B

Appendix 3 - Critical and Service Gap Issues Identified by Agency Stakeholders

The following information is the raw data comprised from the deliberation of the two workgroups. The information in each table is linked to a strategic initiative that the overall group, by consensus, determined was something that the department should pursue for change and continuous improvement.

Initiative Link	Group 1	Group 2
Technology	Technology ○ Lack of funding ○ Grossly deficient mapping program ○ Outdated RMS program ○ Lack of contemporary CAD and MCT technology ○ Lack of department clearance with inter-departmental functions ○ Lack of real-time data/dashboard ○ F-drive overhaul	Technology ○ RMS ○ CAD ○ GIS/mapping ○ Inspections ○ Telestaff ○ Payroll ○ Communication ○ Data collection/control ○ Training ○ Vector solutions ○ Program availability ○ Billing
Staffing	Staffing ○ Lack of administrative staffing ○ Forecasting/proactive approach for staffing needs ○ Arson staffing ○ Specialty staffing for committees, special events, and areas of responsibility	Staffing ○ Lack of admin support staff ○ Lack of SMRs ○ Funding needed ○ Qualification/experience ○ Recruitment/retention ○ Employee development/opportunity ○ Overload
Infrastructure	Infrastructure ○ Continuing issues with ambulances ○ Lack of a real-time asset management system ○ Lack of completion on modernizing the fire stations ○ Lack of modernization of training tower for EMS and USAR ○ Lack of a contemporary information technology program ○ Lack of mission support vehicles	Equipment/facilities ○ Funding ○ Outdated equipment and facilities ○ Lack of supply availability ○ Procedural process ○ Project bid/management process ○ IT. ○ Organizational structure/ownership

DRAFT

Initiative Link	Group 1	Group 2
Training	Training ○ Lack of multi-company drills ○ Lack of training with neighbor departments ○ Lack of USAR training ○ Wide range of topics to cover ○ Lack of funding for training ○ Identify and develop/strengthen subject matter experts ○ Strengthen career development ○ Lack of driver education ○ Implementation of new training programs ○ Leadership development ○ Accountability of chiefs and company officers	N/A
Communication	Organizational Information Management ○ Lack of structure ○ Lack of succession planning ○ Lack of an evaluation process ○ Lack of updated manuals/best practices ○ Lack of contemporary SOP/SOG library ○ Lack of time and funding for the overhaul ○ Lack of access to special notices/training bulletins	Communication ○ Email ○ Policies ○ Objectives ○ Social media with the public ○ RMS ○ Organizational accessibility to information (F-drive) ○ Continuity

The following information is the raw data comprised from the deliberation of the two workgroups. The information in each table is not linked directly to a strategic initiative but remains important. The department is best served to understand and embrace this other information as it moves forward for deliberative purposes and consideration of support of the strategic initiatives.

Topic	Group 1	Group 2
Leadership	N/A	Leadership ○ Roles and responsibilities ○ Subject matter experts ○ Mentorship ○ Decentralized command ○ Empowerment ○ Relinquishment of control ○ Communication ○ Ownership/responsibility vs. management ○ Facilitation of internal/external relationships

DRAFT B

Appendix 4 - City Council Goals and Objectives

The following information is a reference to the Costa Mesa City Council's Goals and Objectives.

MISSION STATEMENT

The City of Costa Mesa serves our residents, businesses, and visitors while promoting a safe, inclusive, and vibrant community.

CORE VALUES

Integrity
Sustainability
Compassion
Innovation
Inclusion
Collaboration

COSTA MESA CITY COUNCIL

Front Row: Council Member Arlis Reynolds, Mayor John Stephens, Mayor Pro Tem Andrea Marr
Second Row: Council Member Don Harper, Council Member Loren Gameros, Council Member Jeffrey Harlan, Council Member Manuel Chavez

Costa Mesa

Strategic planning establishes goals and objectives that highlight the key priorities for the City. In 2021, the City conducted two Strategic Planning sessions. Based on these sessions, the City Council adopted Three-Year Goals and Six-Months Objectives, as well as the City's first-ever Mission Statement and Core Values.

3-YEAR GOALS

- Recruit and Retain High Quality Staff
- Achieve Long-Term Fiscal Sustainability
- Strengthen the Public's Safety and Improve the Quality of Life
- Diversify, Stabilize, and Increase Housing to Reflect Community Needs
- Maintain and Enhance the City's Facilities, Technology, and Equipment
- Advance Environmental Sustainability and Climate Resiliency

Recruit and Retain High Quality Staff

- Develop recommendations for City Council consideration regarding increased staffing to address critical needs.
- Develop a framework for a market analysis of employee compensation for hard-to-fill positions and present the results to the City Manager.
- Issue a Request for Proposal for a consultant who will identify opportunities to innovate and modernize recruitment, hiring and retention through succession and talent management planning.
- Develop a framework for a robust training, mentorship and leadership development program and present the results to the City Manager.
- Initiate the process to map and evaluate the employee recruitment process to innovate and modernize recruitment and commence development of the succession plan and present to the City Manager.
- Present to the City Council for consideration the first phase of hard-to-fill positions requiring a market adjustment based on current data.
- Perform a market analysis of City Council compensation for comparable agencies and special districts within the county and report results to the City Manager.
- Launch the Costa Mesa University Wellness, Leadership, Training and Mentorship Program for all city employees.
- Develop HR staffing recommendations for inclusion in the mid-year budget to be presented to the City Council for consideration.
- Update and begin implementation of the online employee onboarding, training and evaluation processes by updating the NeoGov System.

Achieve Long-Term Fiscal Sustainability

- Develop and define a quarterly report format, including financial metrics, to improve fiscal transparency and report to the City Council and FIPAC.
- Secure a consultant for the Economic Development Strategic Plan.
- Procure and implement an upgrade of the public safety systems, subject to Dept. of Justice approval, and citywide database servers.
- Provide an update to the City Council regarding the state of retail cannabis implementation, including revised revenue projections.

- Present the Measure Q cannabis permitting fees, ordinance, procedures, and staffing to City Council for action.
- Develop the scope of work for the Economic Development planning consulting contract and present to the City Council.
- Develop and define a quarterly reporting format, including financial metrics, to improve fiscal transparency and report to the City Council and FIPAC.

Strengthen the Public's Safety and Improve the Quality of Life

- Provide updates to the City Council regarding management of the COVID pandemic, including management of COVID vaccinations.
- Establish a community communication and engagement plan to support health and safety initiatives.
- Develop approaches to mitigate collisions and injuries on roadways, including providing 3-5 options for City Council direction.
- Develop a plan for expanding our community policing and report to the City Council with a timeframe for implementation.
- Enhance the Communications and Engagement Plan to support the public's health, safety and quality of life and present results to the City Manager.
- Present a plan to reduce collisions and injuries on roadways, including providing 3-5 options for City Council direction.
- Engage the community to obtain feedback on the community's sense of safety and well-being and present results to the City Council
- Update the City Council on the Open Space Master Plan, with a focus on access to parks.
- Present options to the City Council for a behavioral health response model.
- Identify, develop and implement a measurement tool(s) to determine the effectiveness of the City's communications and public engagement with all segments of the community.

Diversify, Stabilize and Increase Housing to Reflect Community Needs

- Complete resource planning to implement longer-term programs such as ADU's, STR's, and HOME funds and present the results to the City Manager.
- Evaluate and identify short-term and long-term staffing needs to assist with core Development Services Department programs.
- Complete a Public Review Draft Housing Element and present to the City Council.
- Present a Development Program to the City Council for senior housing at the Senior Center site.

- Present to the City Council opportunity sites for potential motel conversions with site control options.
- Present to the City Council for action necessary code amendments to address SB 8, 9, and 10.
- Initiate and convene a Citizens Advisory Group to discuss Measure Y and Housing Element compliance.
- Present to the City Council for action the Housing Element.
- Present to the Planning Commission a draft Inclusionary Housing Ordinance.
- Initiate a draft STR Ordinance and an evaluation of program implementation options.
- Present to the City Council for consideration a development plan and land use documentation for affordable housing at the Senior Center.

Maintain and Enhance the City's Facilities, Equipment and Technology

- Provide an update to the City Council on the Culture and Arts Master Plan.
- Provide an update to the City Council on the Open Space Master Plan.
- Implement IT backup system, refresh Wi-Fi, and IT room chiller upgrade.
- Present the Pedestrian Master Plan Update, including results from Community Outreach and walk audits.
- Develop long-range facility and equipment needs assessment and report the results to the City Manager.

- Provide an update to the City Council on the development of Community Center, Shalimar Park and Ketchum-Libolt Park improvements and other strategies to increase park access.
- Review the Community Workforce Agreement and present to the City Manager for future City Council action.

Advance Environmental Sustainability and Climate Resiliency

- Present the Pedestrian Master Plan update to the City Council for direction.
- Develop a scope of work for the Climate Action and Adaptation Plan and present to the City Council for action.
- Provide an update of the Stormwater Management Master Plan to the City Council.
- Re-evaluate the existing Municipal Sustainable Policy, including landscape, organic waste and infrastructure planning and present the results to the City Council for action.

LEADERSHIP TEAM

Front Row: Assistant City Manager Susan Price, City Manager Lori Ann Farrell Harrison, City Attorney Kimberly Barlow
Second Row: Finance Director Carol Molina, Development and Economic Services Director Jennifer Le, Public Services Director Raja Sethuraman
Third Row: Parks and Community Services Director Jason Minter, Chief of Police Ron Lawerence, Chief of Fire and Rescue Dan Stefano, Information Technology Director Steve Ely

Costa Mesa

After the City Council adopts the City's Three-Year Goals and Six-Months Objectives, the leadership team works diligently to ensure that each objective is achieved. The progress for each Six-Month Objective is reported on a monthly basis to the City Council.

Costa Mesa

2022-2027 STRATEGIC PLAN

ATTACHMENT 2

CITY OF COSTA MESA
OFFICE OF THE FIRE CHIEF
INTEROFFICE MEMORANDUM

TO: ALL FIRE & RESCUE DEPARTMENT PERSONNEL

FROM: DANIEL A. STEFANO, FIRE CHIEF

DATE: JANUARY 10, 2020

SUBJECT: STRATEGIC PLAN 2015-2020 – ANNUAL PROGRESS STATUS UPDATE

In 2014-15, just over five years ago, our collective team worked together to develop our Costa Mesa Fire & Rescue Strategic Plan 2015-2020. The original document was the result of a comprehensive collaboration within our organization, intended to help define and guide our *Mission, Vision, and Values* for the future in providing the most effective, efficient, and quality service to the community we serve.

With any successful plan, it is extremely important to review and assess progress to ensure we remain on track, adapting and making necessary adjustments along the way. To that end, the following document will serve as our annual review. Our team continues to make incredible progress and to quantify this past year appropriately, the *Success/Status Indicators* serve as an update for the calendar year of 2019 (Jan. 1 - Dec. 31). There is no question that we have observed outstanding results and outcomes as the result of our collective planning, hard work, and execution, as well as the valued support from our City Council, City Team, and the Costa Mesa Community!

Attached to the back of this document is our original strategic plan, which served as a snapshot of our organization *at that point in time*, and is outlined in our four primary *Strategic Goals* for the future:

#1) Our People (Wellness, Training, Professional Development & Succession Planning)
#2) Our Infrastructure (Facilities, Vehicles and Equipment)
#3) Our Service (Proper Staffing, Deployment and Quality Service to the Community)
#4) Our Technology and Innovation (Enhanced GIS Resource & Response Mapping, CAD RMS Upgrades, Firefighter Safety and Innovation)

Placed in front of the strategic plan is a copy of our *Success/Status Indicators* for the year ending 2019. The indicators are also included with the other respective attachments (i.e., A-2015; B-2016; and C-2017, D-2018 and E-2019), inclusive of summary points of our progress to date.

Our strategic plan continues to provide a very strong road map as we continue to push forward and acknowledge the receipt of our third new fire engine, the successful implementation of our ambulance transportation program, 10 new firefighters on the floor in 2019, along with so many other positive things continuing *for our team* and *because of our team*! Keep up the outstanding work as we enter a new decade and prepare to develop our next strategic plan!

Thank you for your continued engagement and commitment to our team, to each other and to the Costa Mesa Fire Family! *Thank you for Keeping Our Fire Going Strong!*

ATTACHMENT E – ACTION PLAN: PROGRESS / STATUS UPDATES - DECEMBER 2019

Goal 1: Costa Mesa Fire & Rescue seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
1) Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional needs *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2) Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional support needs *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2a) Upgrade/Separate EMS Coordinator position as a stand alone.	• Establish a stand-alone Part-time EMS Coordinator position		*Fire Chief & Command Staff		**JANUARY 2017**	Part-time EMS Coordinator position approved and filled in 2017. EMS and Ambulance Program focus.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
2b) Increase/Enhance EMS Coordinator	• Increase hours of EMS Coordinator • Prepare justification for inclusion in the FY 2020-21 budget.		*Fire Chief & Command Staff	FY 2020-2021		Part-time EMS Coordinator position hours increase.
3) Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position • Determine training plan • Include a mentorship program • Prevention Interns • Define who is doing what (Institutional know edge)		*Fire Chief and Command Staff	Making progress in this area –new target date for final formal plan 2020-2021		New Community Risk Reduction Intern program was implemented in 2014; preparatory academies have been implemented for promotional exams; formal education option plan is being worked on; a mentoring program for new firefighters is being worked on. AOR's are continuing to be transferred and institutional knowledge is being shared in the process. Our new probationary training program continues to evolve, including our 4th 7-week academy and more structured evaluations. Final formal plan pending.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
4).Study a reserve / apprentice program	• Prepare a report regarding the implementation of a reserve program • Identify and assign project leads		*Fire Chief, Command Staff, and CMFA Liaison	**No significant progress noted – new target date for final formal plan 2020-2021**		Preliminary research has been completed; a potential pilot program remains on the table for consideration for 2020-2021. Identify project leads in 2020-2021.
5) Add Fire Marshal position			*Fire Chief & Command Staff		**JULY 2017**	Assistant Fire Marshal Position was approved in the 2017-18 budget and is now in place. Working to establish a Fire Marshal Position and tiered CRR positions in 2019-20.
5a) Reclassify Assistant Fire Marshal to Fire Marshal			*Fire Chief & Command Staff		**JULY 2019**	Proposed inclusion in the FY 2019-2020budget. Approved Fire Marshal Position in FY 2019-2020.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
6) Fill Community Risk Reduction Positions - Inspector			*Fire Chief & Command Staff		JULY 2015	A Code Enforcement Officer was included in the 2015-16 Budget and the P/T Inspector position was filled. A part-time position was added in 2018 to assist.
6a) Add Community Risk Reduction Positions	• Prepare justifications for inclusion in the FY 2020-21 budget.		*Fire Chief, Fire Marshal, Management Analyst	FY 2020-2021		Additional requests for CRR positions are being proposed through sound justifications (i.e., cost recovery increases from $177k to $559k annually & increasing workloads)
7) Create full-time Administrative Secretary position			We will continue to evaluate additional needs		JULY 2016	No additional full-time position was created, but it was addressed and deferred.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
7a) Expand part-time CRR Office Assistant position to full-time	• Prepare justifications for inclusion in the FY 2020-21 budget. • This position will also assist with permits and ambulance billing support.		*Fire Chief, Fire Marshal, Management Analyst	**FY 2020-2021**		Additional requests for CRR positions are being proposed through sound justifications (i.e., cost recovery increases from $177k to $559k annually & increasing workloads). A full-time CRR administrative assistant.
8) EOC Liaison			*Chief Officer		**JULY 2015; to be updated 2019-2020**	CMPD is the EOC lead and we are re-evaluating our EOC liaison assignment in 2019.
9) Department priorities on Fire Service Safety, Wellness, Behavioral Health & Cancer Prevention	• Establish and support programs specific to each need • Identify funding sources • Support training opportunities • Continue to evaluate		*Command Staff, Company Officers & CMFA	**Much Progress, but this will remain *ON-GOING***		*SAC Wellness Program & JAC Program *Peer Support & Behavioral Health Teams *Chaplain Program *Cancer Prevention

Goal 2: Costa Mesa Fire & Rescue seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Maintain vehicles	• Annual certification • Develop a realistic maint. schedule with Fleet Services and annual certifications		*Ops Chief, Apparatus Committee & Fleet Services	**Continuing to make some progress in this area – new target date for final formal plan 2020-2021**		Annual certifications have begun to be addressed (e.g., annual pump testing to 3rd party). More formal structure is needed with new Fleet Serv. Manager - TBD. Additional support is needed in Fleet Services; 2020-2021. Vehicle maintenance is hindered due to vehicles that are no longer supported by the manufacturer.
2) Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan		*Ops Chief & Apparatus Committee *Much accomplished; additional work to be done		**JULY 2017**	Two Pierce Engines were placed into service in 2017, along with two Command Vehicles & a CRR vehicle. An initial reset/short-term replacement plan was successful, but a long-tern plan needs to be memorialized (reference item 2b). Our 3rd Pierce Engine was placed into service in 2019.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2a) Develop a long-term plan to replace vehicles after they are past their useful life.	• Develop a vehicle replacement plan and funding plan		*Command Staff	FY 2020-2021		Replacement engine & truck were proposed for preliminary budgets (2019-2021 FY's), but deferred – budget challenges.
2b) Obtain an assignment of a Cal OES Engine to support the regional and statewide fire, rescue and emergency services collaborative efforts			*Command Staff		2019	Cal OES Engine assigned and placed into service in 2019.
2c) Replace our truck (i.e., Quint)	• Develop a replacement and funding plan		*Command Staff & Apparatus Committee	FY 2020-2021		Inclusion in 2020-2021 FY budget.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3) Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan		*Ops Chief & Small Tools & Equipment Committee	**Ongoing; 2020-2021 new target date.**		Ongoing evaluation. Final maintenance schedule needs to be proposed pending a permanent City Fleet Services Manager.
3a) Radio Upgrades	• New P25 Radio Deployment		*Ops Chief & Command Staff		**FALL 2018**	Completed.
3b) USA Flag Project	• Install USA Flags into permanent service on all CMFR Fire Engines & Trucks		*Command Staff, Apparatus Committee		**2019**	Completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
4) Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan		*Ops Chief, Command Staff	2018-2020		An updated fire station maintenance plan is currently being evaluated. Annual Station Inspection Program was reworked and implemented in 2019. Ongoing annual inspections in 2020.
5) Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a short and long-term renovation schedule • Study for all stations to determine whether building modifications can be made versus new station.		*Fire Chief, Ops Chief, Command Staff, Management Analyst, and Public Works Liaison *Progress being made	2018-2020		Our new Fire Station #1 was completed (2018). Fire Station #6 Security Gate Upgrade is Completed (2017). Initiation of Fire Station #2 rebuild project in 2019. Rebuild project of Fire Station #2 deferred and removed from budget in FY 2019-2020 due to budget shortfalls; inclusion in FY 2020-2021 budget and SOC assessment.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5a) Station Upgrades/Enhancements Critical Infrastructure Enhancements	• Critical Infrastructure Enhancements		*Ops Chief, Command Staff	**Ongoing, with some progress; 2020-2021 new target date.**		Critical infrastructure security enhancements/improvements have been initiated and will continue. Secured Interior Door Access Project (2017 completion). Station Security Cameras in Progress; target 2020-2021 FY.
5b) Station Upgrades/Enhancements Fire Station Washer/Dryer Project	• Washer/Dryer Project for All Fire Stations		*Fire Chief, Ops Chief, Management Analyst & Command Staff		**2019**	Washer/Dryer project is now 100% completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5c) Station Upgrades/Enhancements Fire Station Diesel Exhaust Extraction (Plymovent) Project	• Plymovent Systems to be installed in all Fire Stations		*Fire Chief, Ops Chief & Command Staff *Approved in the Budget and by City Council in 2017-18		**FALL 2018**	Approved in Budget previous Process and formal Contract Approved by City Council in 2017-18. All Stations completed in 2018.
5d) Station Upgrades/Enhancements Fire Station Training Ground Area	• Asphalt Project, removal of old props, introduction of new ATM prop, and replacement of hydrant location.		*Ops Chief & Public Works Liaison		**2017**	Project Complete, inclusive of asphalt at Fire Station #2 & #4.
5e) Fire Station #4 Training Room	• Funding & project management		*Command Staff, Engineer Brian Brown & FF/PM Giovanni La Placa		**2019**	Project Completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5f) Multiple "Crew-Initiated" projects	• Funding & project management		*Multiple Crews		2019	Multiple projects completed, including, but not limited to stations #3 & #4 backyard areas, apparatus areas stations #4 & #5, old BC office and fitness room fire station #5.
6) Modify the stations to address the gender accommodation issues.	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications		*Ops Chief, Command Staff, and Public Works Liaison	2019-2020 – not entirely met due to rebuild, but currently meets or exceeds minimum standards; 2020-2021 new target date for budget approval.		Preliminary assessments have been conducted, including funding for Fire Station modifications, which were ultimately placed on hold due to the rebuild. Additional resources are required for this. Continue to be included in recommendations for Fire Station #2 rebuild and Fire Station #4 remodel planning.

Goal 3: Costa Mesa Fire & Rescue seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention		Ongoing; *Fire Chief, Ops Chief, Command Staff *Staffing will continue to be evaluated		**2017**	The City Council Approved the Fire Chief & City Manager Recommendation to keep Fire Station #6 Open, along with six additional positions. A Part-Time EMS Coordinator was approved, along with an Assistant Fire Marshal position. Staffing needs will continue to be evaluated as an ongoing process.
2) Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2017**	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment and potential Accreditation Process. An external Standards of Cover evaluation was initiated in 2019. A final report will be completed in 2020.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2a) Complete a comprehensive Standards of Coverage (SOC).	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Command Staff	**JULY 2020**		The department initiated a comprehensive SOC assessment with Citygate, LLC. A final report will be completed in 2020. Prepare for a future Accreditation Process (CPSE).
3) Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CM and City Council		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2015**	A third party consultant (AP Triton, LLC) was brought in and a joint presentation was made to City Council with different Ambulance Transportation Models. The City Council voted 3-2 to leave the current model in place with a provide provider. This was reworked for a later (2017) City Council presentation.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3a) Implement the City Provider Based Ambulance Transportation Program	• Complete the RFP Processes for ambulance staffing & billing • Implement the new (City Provider Based) Ambulance Transportation Program.		*Fire Chief, Ops Chief, Command Staff EMS Coordinator, Ambulance Committee		**SEPT 2018**	Our Ambulance Staffing Program was approved by a 5-0 City Council Vote (2017). Our Ambulance Transportation & Billing Programs were implemented September 1, 2018.

Goal 4: Costa Mesa Fire & Rescue seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus		*Operations Chief & Command Staff	2020		Continuing to be evaluated.
2) Implement a modern station alerting system	• Install new modern station alert system		*Operations Chief & Command Staff		2018	$200,000 was approved in 2015-16 Budget; total cost doubled for system backbone and hardware; West Net Alerting System was implemented and officially placed into service in 2018.
3) Continue to look for innovative solutions in technology and communication systems related to our CAD and dispatching resources	• Re-evaluate our current CAD system • Assess other regional-based dispatch options		*Fire Chief, Ops Chief, Command Staff	2018-20		In progress and under review.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators Comments
3a) Next Gen CAD to CAD Project Implementation	• Next Gen CAD to CAD		*Ops Chief, City I.T. Team *Project is underway	**Still in progress; New target date FY 2020-2021**		In progress.
3b) Evaluate new data analytic options to assist in our current and future decision making and deployment processes.	• Re-evaluate Fireview's capabilities. • Pilot and/or implement other data analytic options.		*Fire Chief, Ops Chief, Command Staff, City I.T. Team		**2019**	We are currently working with two outside vendors to provide more practical (and viable) options. We have a signed agreement with Fire Stats, LLC (Paul Rottenberg). Currently working on City IT limitation issues. Final data project is now underway and in progress

EXECUTIVE SUMMARY

The Costa Mesa Fire Department (CMFD) provides services to the City of Costa Mesa serving a population of over 112,000. The Department is responsible for protecting life, property and the environment through its mitigation, prevention, preparedness, and response and recovery services.

The Costa Mesa Fire Department initiated its strategic planning process to set goals and priorities for its future. Through the strategic planning process, the department has been able to assess its organization, create a blueprint for the future and develop a plan to accomplish the new direction and goals. The strategic plan defines current and future needs and recommends goals and strategies to meet those needs during the next five (5) years.

A collaborative process was used to create this strategic plan. A variety of department members and others were involved throughout the process, including the department's Strategic Planning Committee. The process involved an extensive review of documents, interviews with members of the department, an electronic opinion survey of department staff, preparation of an environmental scan and two workshops to discuss the department's goals for the future.

The CMFD strategic plan contains the following elements:

- Organizational mission, vision and values
- Four goals
- Strategies for each goal
- Implementation action plan

The department's four goals are:

Goal 1: The Costa Mesa Fire Department seeks to have well trained and certified individuals to carry out its mission and all responsibilities.

Goal 2: The Costa Mesa Fire Department seeks to have well maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Goal 3: The Costa Mesa Fire Department seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Goal 4: The Costa Mesa Fire Department seeks to have technology and communication systems that allow the department to perform at optimum levels.

The draft implementation action plan (Attachment A) contains key steps for implementing each of the strategies, identifies the individual responsible for completing the strategy and resources needed (e.g., financial and staff), as well as a timeline and success indicators.

OVERVIEW OF THE DEPARTMENT

This section provides an overview of the Costa Mesa Fire Department in terms of workload/calls for service, customers served and the budget.

Description of the Department

The Costa Mesa Fire Department is responsible for protecting life, property and the environment through its mitigation, prevention, preparedness, response and recovery services. The Department includes three (3) divisions:

- Fire Administration
- Fire/Rescue/Emergency Medical Services
- Fire Prevention/Community Risk Reduction

Fire Administration

Fire Administration directs the strategic, operational and emergency planning of the department. Further, this division establishes department policies and procedures, coordinates the internal functions of all divisions and programs and external functions with other City Departments and community organizations.

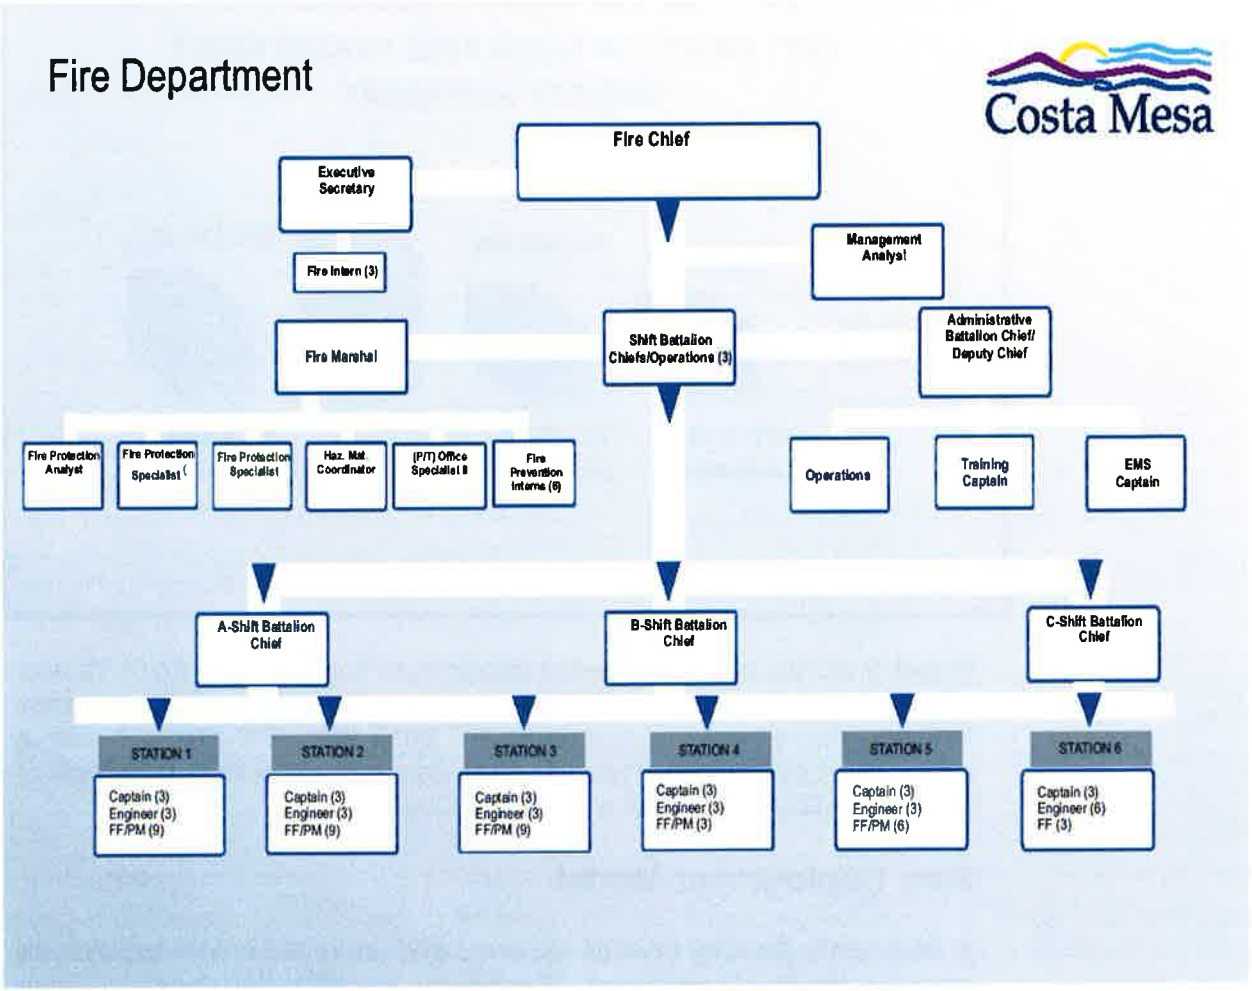
Fire/Rescue/Emergency Medical Services

The Fire/Rescue Operations section of this division is responsible for managing, supervising the rapid response to life, health, fire, rescue and environmental emergencies, as well as the protection of property, fire cause and origin determination and life safety inspections and education.

The Emergency Medical Services section manages, supervises, and provides the functions required to support these services including, emergency planning, communications, training and education, equipment maintenance repair, supplies, records and quality control.

Fire Prevention/Community Risk Reduction

The Fire Prevention Division is responsible for developing and enforcing local fire, life safety, property, and environmental protection standards; enforces State adopted fire and life safety codes; reviews building construction plans; conducts building construction and business inspections; investigates citizen complaints; manages the City's hazardous materials disclosure program; provides training to department personnel in regard to fire and life safety codes; assists professional trades with technical fire code requirements and department community education efforts. Further, this division also develops, provides, and coordinates community preparedness activities including volunteer, outreach, education, training and response programs.



The Fire Department serves a population of over 112,000 as of 2013 *(Source: US Census Data)* and has 84.75 total full-time equivalents in FY 2014-15. In 2014 the department responded to 11,599 calls for service.

The department operates six (6) fire stations providing fire suppression, emergency medical, rescue, fire prevention and related services. Figure 1 shows the City of Costa Mesa Fire Department organizational chart.

FIGURE 1: ORGANIZATION CHART (CURRENT AS OF JULY 2015)

Fire Department Budget

Fiscal trends are important in making strategic planning decisions. The department can make informed plans for the future by examining its fiscal foundation. The following information provides an overview of the Costa Mesa Fire Department budget shown in Figure 2 below.

FIGURE 2: COSTA MESA FIRE DEPARTMENT TOTAL BUDGET FY 2011-12 TO FY 2014-15

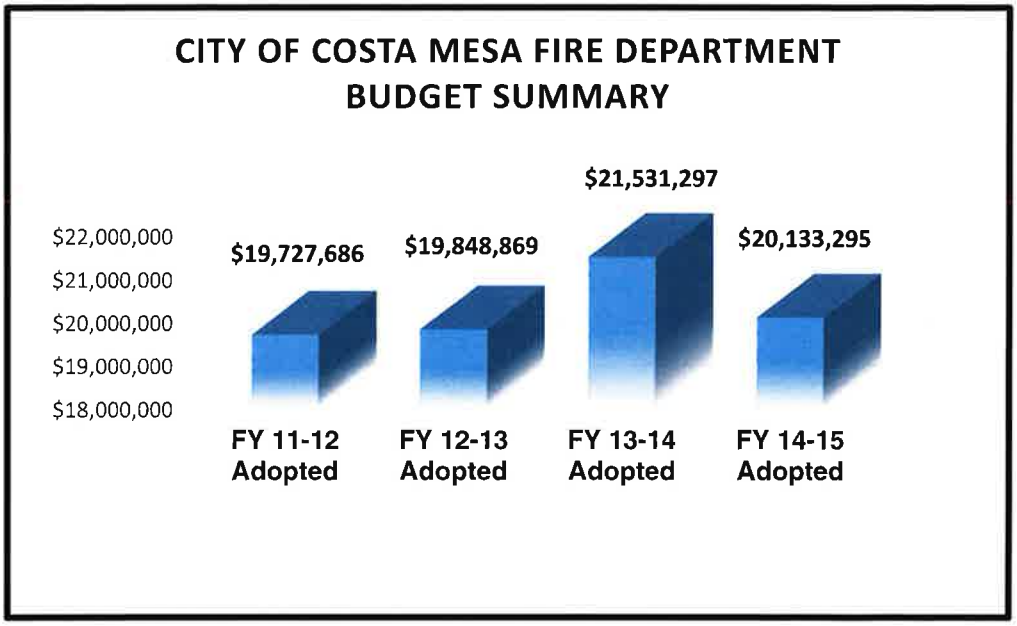


Figure 2 shows that the adopted department budget in FY 2011-12 was over $19 million and in FY 2014-15 it was over $20 million. The difference between the adopted budget from FY 2013-14 to FY 2014-15 was a decrease of $1,398,002. This is in large part due to the implementation of the new deployment model which is discussed below.

New Deployment Model

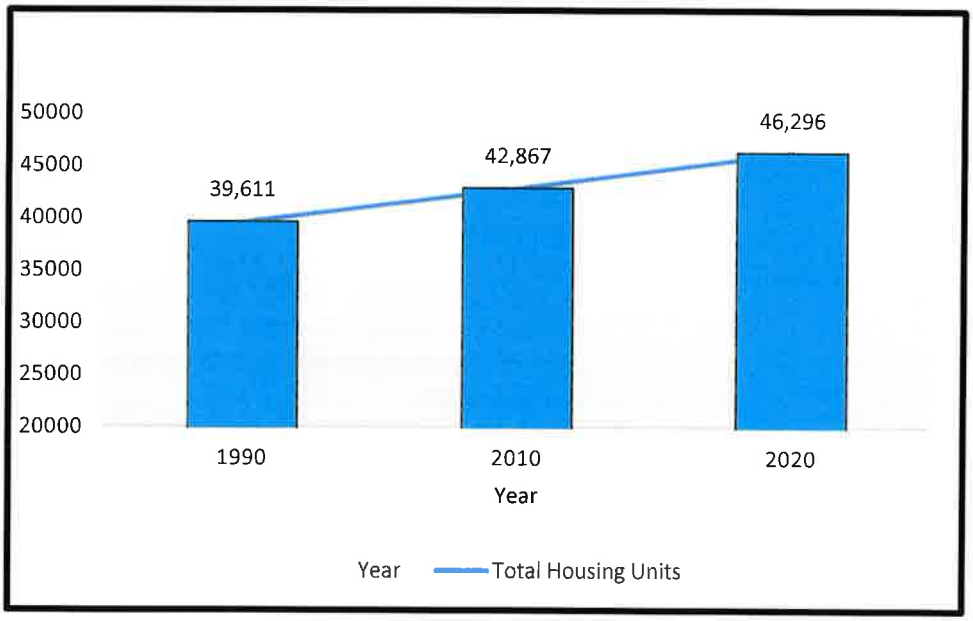
In May 2013, the City Council reviewed and approved a new deployment model for the Fire Department. These items are still in the process of being implemented. This includes the direction to transition from a six station model to a five station model with the potential closure of Station 6. Further direction from the City Council is needed in the full implementation of several of the elements in this plan and the outcome of those decisions will need to be discussed as the decisions are made.

The 17 components of this new model included the following:

1. Implementation of Emergency Vehicle Preemption (EVP) to facilitate faster city-wide emergency response times.
2. Implementation of capital improvements to various fire stations as well as other one-time budget needs.
3. Approval of the Fire Department's FY 2013-14 budget requests for some new and on-going costs for the City.
4. Studying the apparatus needs of the Fire Department and explore the need to purchase replacements and/or surplus older apparatus.

5. Implementation of a study to analyze the effectiveness of utilizing a three person unit model on the Tiller Truck.
6. Annually depositing $500,000 in an interest bearing account for the eventual replacement of Fire Station 1.
7. Authorizing the increase in on-duty paramedic personnel from 10 to 13 per day.
8. Implementing a study that analyzes the fire department and City's role in requiring organizations to provide mandatory paramedic support specific to large events that occur in Costa Mesa so as to not strain existing required life safety support.
9. Updating Fire Station alerting systems to expedite personnel readiness (improve turnout times).
10. Authorizing the study of a possible Joint Powers Authority with surrounding agencies for shared services regarding fire dispatch, mutual aide, etc.
11. Providing funding for upgraded routing/mapping and mobile GPS software.
12. Continuing to study the need to retrofit the Tiller Truck with the capabilities to pump water or foam.
13. Continuing to study innovative technologies that have the potential to provide 21st Century life saving techniques for the benefit of Costa Mesa residents.
14. Studying the concept of requiring all new hires to be paramedic certified. Study the concept of all personnel being paramedic trained. This will require discussion and negotiation with fire labor associations.
15. Studying the personnel needs of the administrative division of the Fire Department.
16. Studying the concept of when a fifth rescue ambulance is needed in the community. When the Fire Department increases staff to manage a heavy workload then study the possibility of having this shift of paramedics be staffed for a period of less than 24 hours to reduce costs.
17. Studying the concept of establishing a reserve firefighter program. The Police Department utilizes reserves to provide valuable assistance to the City.

ENVIRONMENTAL SCAN



In preparing this Strategic Plan, an environmental scan was conducted to provide a framework for understanding some of the issues the department has faced and would be likely to face. A variety of sources were used including interviews with staff, an online employee survey, document reviews and workshops with department staff.

This section contains a summary of important information, including housing and population trends, calls for service and staffing information.

Housing Trends

Figure 3 below shows the City of Costa Mesa housing trends from 1990 to 2020.

FIGURE 3: COSTA MESA HOUSING TRENDS 1990 TO 2020

Source: 1. Bureau of the Census, 1990, 2000, 2010 Census. 2. 2006-2010 American Community Survey 5-Year Estimates.

Figure 3 shows the number of housing units in the City in 1990 was 39,611 and by the year 2020 that is expected to grow to 46,296, which is a 6,685 unit increase in a 30 year period.

Population Data

Just as the number of housing units grow in the chart shown above, so does the population. Figure 4 shows the City's population growth from 2010 to 2019.

FIGURE 4: COSTA MESA POPULATION DATA FROM 2010 TO 2019

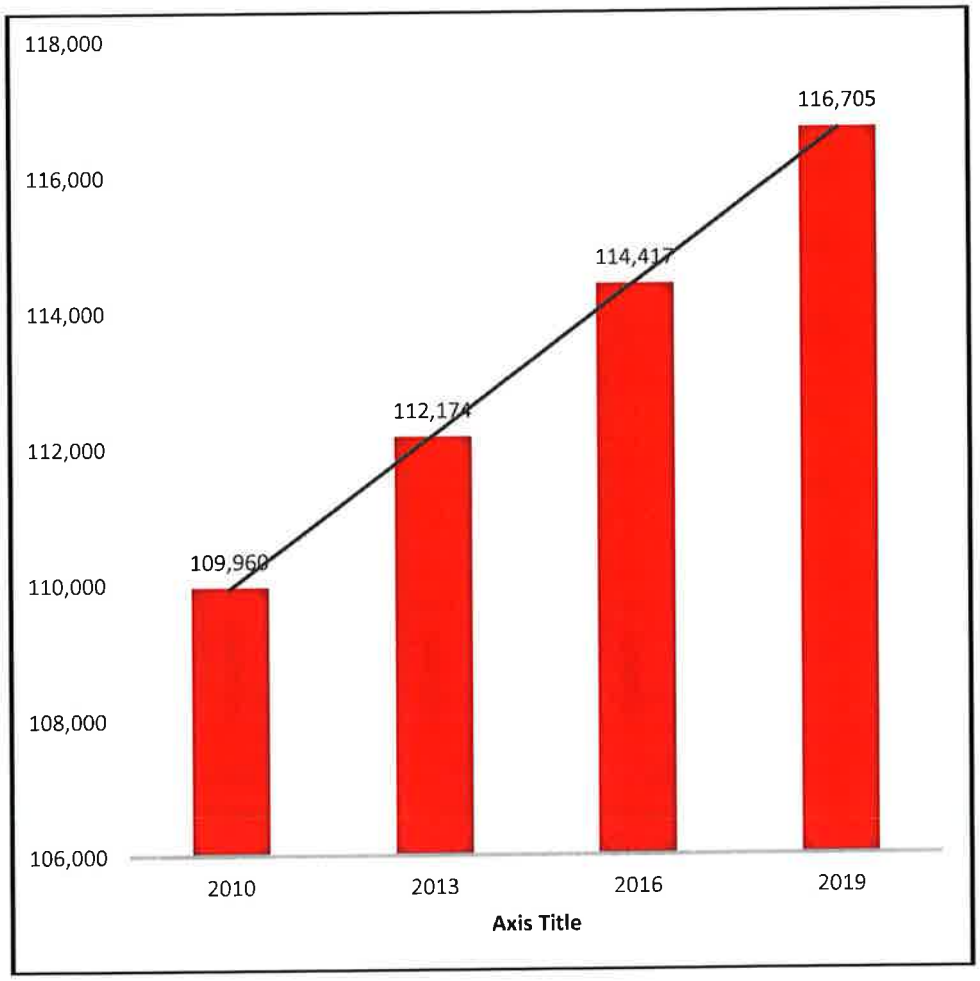


Figure 4 shows that based upon a 2% growth model of the US Census, in 2010 the City's population was 109,960 and in 2019 it is expected to be 116,705 which is an increase of 6,745.

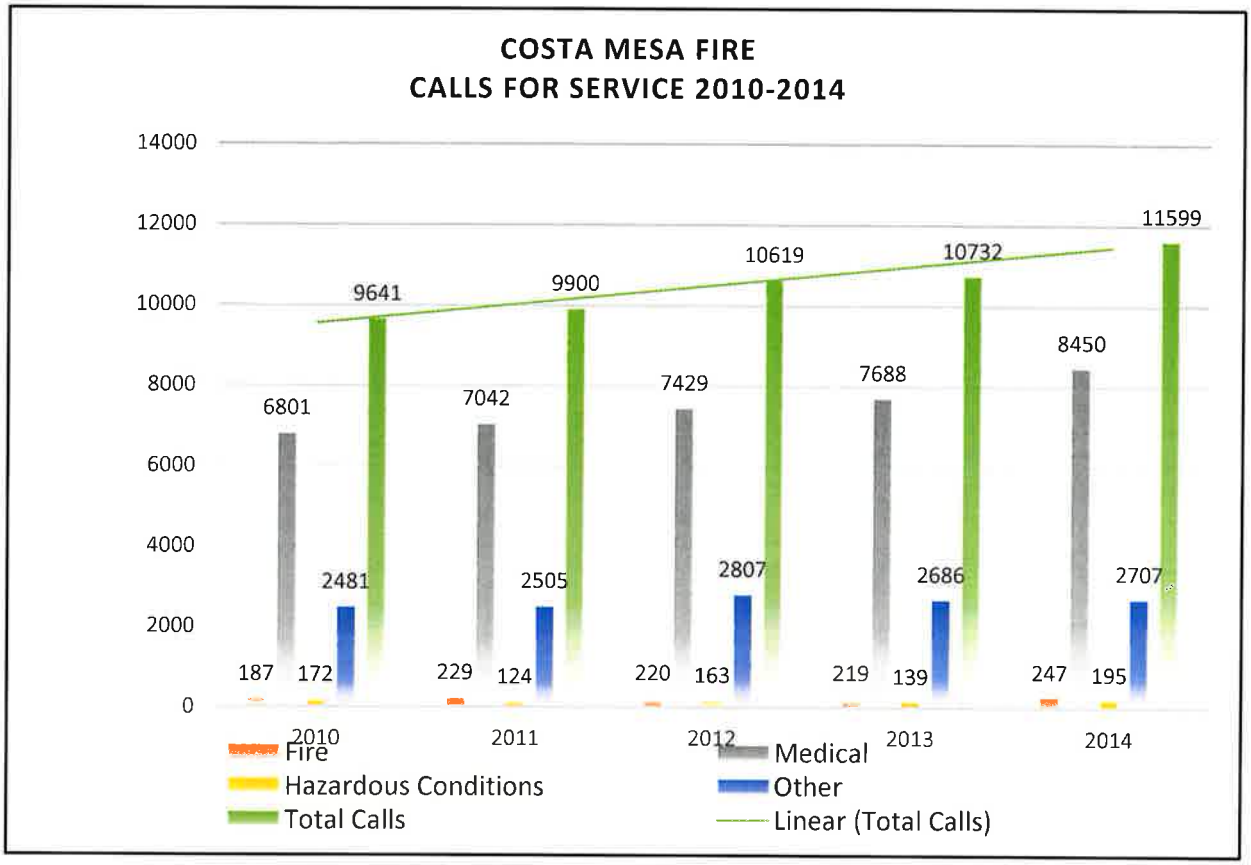

Calls for Service & Response Times

The department responded to 11,599 calls for service in 2014. Trends regarding calls for service (CFS) are shown in Figure 5. (FY's 2010-2014)

The majority of calls are medical calls, which in 2014 made up 73% of the total calls for service.

FIGURE 5: CALLS FOR SERVICE FROM 2010 TO 2014

As Figure 5 shows, there were 1,958 more calls for service from 2010 to 2014. The percent change for each call type between 2013 and 2014 is shown in Table 1 and Table 2 shows priority response times from 2010 to 2014.

TABLE 1: PERCENT CHANGE IN CALLS FOR SERVICE FROM 2010 TO 2014

Type of Call	Percent Change
Fire	+32%
Medical	+24%
Hazmat	+13%
Other	+9%

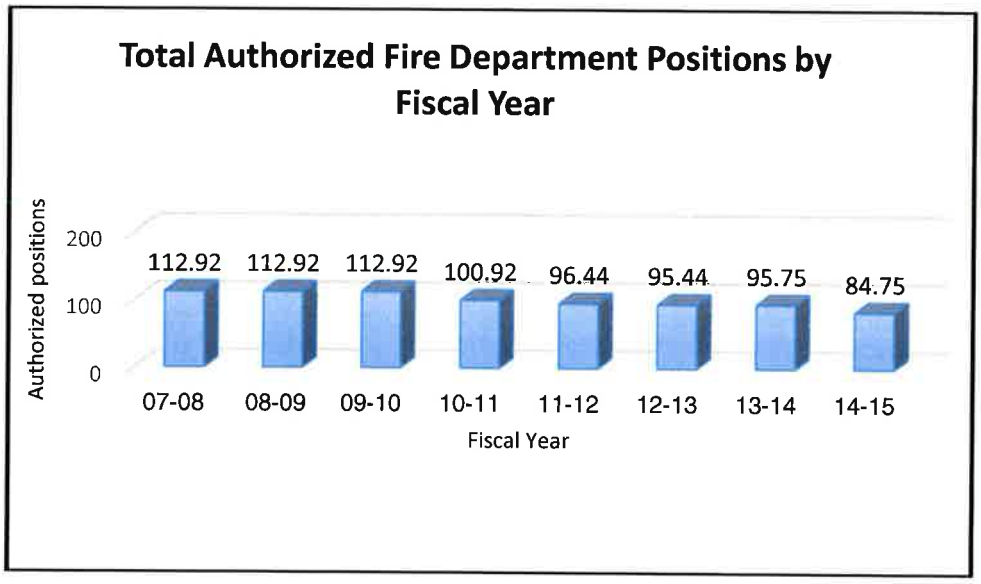

TABLE 2: PRIORITY RESPONSE TIMES FROM 2010 TO 2014

CMFD		Response	Time	Data		
Station Response	YEAR	# of Priority Calls	Avg Resp Times	%<=4Min	%<=6Min	%<=8Min

Staffing

Figure 6 shows that total authorized positions in the Fire Department from FY 2007-08 to FY 2014-15.

FIGURE 6: FIRE DEPARTMENT – TOTAL AUTHORIZED POSITIONS BY FISCAL YEAR

In FY 2007-08 the department had 112.92 full-time equivalents and in FY 2014-15 the full-time equivalents is 84.75. The current authorized staffing level includes the following:

- 77 sworn
  - 1 Chief
  - 4 Battalion Chief's
  - 15 Captains
  - 18 Engineers
  - 39 Firefighters

- 5 non-sworn
- 2.75 part-time Full-time equivalents

Staffing changes approved in FY 13-14 are explained in the Department Overview Section regarding the new deployment model.

Interviews

The stakeholder process included conducting 20 interviews with staff members from all levels of the department. The purpose of the interviews was to determine what is working well in the department now and what can be improved. The themes from the interviews are listed below:

Working Well

- The department has great staff who work well together.
- All department staff are dedicated to providing the best service to this community.
- Staff has pulled together to get the work done even though the staffing levels were reduced.

Needs Improvement

- The facilities are aging and need to be upgraded or replaced.
- Staffing levels and the deployment model need to be reviewed given the increased call volume.
- Lack of training academies for various positions (e.g. engineers and captains).
- The department needs a full-time EMS Coordinator and dedicated training officer.
- There is a lack of prioritizing career development in the department.
- There is a disconnect between the Battalion Chiefs and line staff.
- There is low morale throughout the department.
- The Battalion Chief's need to manage consistently and praise staff for great work while addressing issues that need to be corrected.
- New rules and policies are implemented in what feels like a punishing manner.

Employee Survey Results

As part of the environmental scan, a confidential online survey was prepared and implemented for all Costa Mesa Fire Department employees to elicit their opinions on the following topic areas:

- Staffing levels
- Employee safety
- Employee skills and training
- Technology, facilities and equipment
- Organization, support services and technical response
- Customer service and community involvement

A total of 55 department employees responded to the survey (a 69% response rate).

Employee Survey Responses

Respondents were asked to provide their own assessment of the strengths, weaknesses, opportunities and threats that affect the Costa Mesa Fire Department.

More than 45% of respondents identified the following items as department **strengths**.

- Safety procedures and practices
- Availability of safety equipment
- Condition of safety equipment
- Technical expertise of employees
- Employee performance
- Teamwork
- Response time
- Overall customer service

In assessing **weaknesses**, more than 45% of respondents agreed that the following areas need attention.

- Level of staffing
- Succession planning
- Level of employee recognition
- Level of employee moral
- Management of employee performance
- EMS Training
- Availability of up-to-date administrative technology
- Adequacy of communications systems
- Condition of stations
- Condition of vehicles and other motorized equipment
- General department-wide communications
- Radio communications
- Timely provision of supplies to stations

Opportunities that the department has that were identified by more than 45% of the respondents are listed below.

- Recruitment of full-time firefighters
- New employee orientation

More than 45% of the respondents identified the following **threats** facing the department now.

- Level of staffing
- Lack of an EMS Coordinator
- Lack of a Training Officer

General Trends Affecting the Fire Service

Significant changes have occurred over the past 25 years that impact the fire service.

- **Improvements to Building Codes.** Significant improvements have been made to building codes in the State of California and in specific municipalities that include enhanced fire protection requirements.
- **Increased Medical Emergencies.** Medical emergencies have increased over the years and will continue to do so in the future because of two important factors:
    - **Aging Population.** As the baby boomer generation ages, their need for emergency medical care and medical services increases, which increases EMS calls in communities.
    - **Increased Cost of Medical Insurance.** As the cost of medical insurance continues to rise and fewer preventative services are offered, individuals do not have access to or cannot afford many preventative medical treatments. Thus, individuals wait longer to seek treatment, resulting in the need for emergency medical services, which increases the EMS calls in communities.
- **Legislative and Regulatory Changes**. Increased training requirements have impacted the fire service and will continue to do so. New mandates to enhance training programs to meet the needs of the population as well as increased training requirements will add to the fiscal challenge of funding these programs.

- **Technology.** Technological innovations have resulted in enhanced equipment and service delivery in the fire service over the years. As technology continues to advance, there will be a desire to continue to purchase the latest innovation to improve service. However, this will have to be balanced with the fiscal constraints and the enhanced service that the particular innovation will provide.

- **Climate.** California has experienced an increase in wildfires during the last several years. These fires burned thousands of acres across the state and destroyed numerous structures as well. The increase in wildfires is a result of warmer temperatures coupled with dry fuel and a drought. It is likely that these factors could be in place for the next several years, which will undoubtedly put a burden on fire protection services. This is especially true when multiple wildfires take place at the same time, draining the available resources.

- **Water Supply.** Droughts not only dry out the vegetation, they also impact the water supply needed to put out the fires. The severe drought conditions make fires more dangerous and more difficult for fire agencies to protect life and property.

STRATEGIC PLAN

In September 2014, the Department began the strategic plan process. This plan is intended to define current and future needs and recommend goals and objectives that, when implemented, will enable the department to meet those needs during the next five (5) years.

A systematic strategic planning process was used to evaluate the organization's strengths and weaknesses, identify external influences and opportunities, and establish priorities that will help foster a productive future. Using an environmental scan and considering data likely to affect the department in the future, the list of priorities were developed which were used to formulate the goals and strategies for the future.

In developing the Strategic Plan, the department considered a broad range of concerns that could potentially impact the operation of the organization, including:

- Problems or issues that arise on a daily basis that need long-range attention
- Budget objectives and limitations
- Data and trends
- Fire service best practices
- Regional issues

The strategic planning process for the Department consisted of six (6) activities:

- **Activity 1:** Project Kick Off
- **Activity 2:** Conduct Stakeholder Analysis
- **Activity 3:** Prepare Environmental Scan
- **Activity 4:** Facilitate First Workshop
- **Activity 5:** Facilitate Second Workshop
- **Activity 6:** Prepare the Final Strategic Plan

The stakeholder analysis included individual interviews and an online employee survey. Further, an environmental scan was conducted. This included an analysis of trends in the fire service, fiscal information pertaining to the department, stakeholder input and a SWOT (strengths, weaknesses, opportunities and threats) analysis.

The results of the interviews, employee survey and environmental scan were presented to the Department Strategic Plan Committee in January 2015. This session allowed for feedback from the committee and identified additional information that would be useful in moving forward.

In February 2015, the first workshop was conducted during which workshop participants revised the Department's mission statement, vision statement and articulated the department's values. In addition, workshop participants developed a list of priorities which were used to develop the draft goals and strategies for the second workshop. Following the first workshop, draft goals were created, which were then reviewed and refined in the second workshop, held in March 2015.

During the second workshop, participants also identified key elements for the implementation action plan to achieve their goals and strategies.

Department Mission

A mission statement describes the purpose for the organization's existence. It defines the principles and objectives of the organization and is used to prioritize the services provided. It states what the organization stands for and the reason for its existence. The Department revised its mission statement during the strategic planning workshops. The new mission statement is:

> *Costa Mesa Fire and Rescue is an all risk department committed to protecting the community from all emergencies and disasters through innovative leadership, service and excellence.*

Vision for the Future

A vision statement articulates where the organization hopes to be in the future. A vision statement provides targets of excellence that the organization will strive towards and provides a basis for its goals and objectives. It does not predict the future, but provides an image of success. The words should conjure up a similar picture for each person so that the desired destination is clear. During the strategic planning workshops the Department developed the following vision statement.

> *Costa Mesa Fire and Rescue is committed to exceeding the expectations of our customers by being a leader in Fire Protection, Rescue, Emergency Services and Community Risk Reduction.*

Values Guiding Department Personnel

The values of an organization are the underlying set of core beliefs the department deems to be important. Core values help to define the organization, guide behavior, are the foundation of operational activities, and set the standard by which all members will be measured.

As part of the strategic planning process, the Department staff identified the following core values.

- Respect
- Integrity
- Compassion

Goals and Strategies for the Future

For this Strategic Plan, the terms "goals" and "strategies" are used. Both terms are described below.

Goals are multi-year in nature and set the framework for policies and decisions. Four (4) goals, which state the desired future, have been identified by the department in the following areas:

1. Training and Certification
2. Facilities and Equipment
3. Optimum Deployment
4. Technology and Communication Systems

Strategies are the means to achieve the goals. They are the projects and plans to achieve the goals. Strategies are measureable and are the specific projects for which the organization is accountable. Strategies provide a way for progress to be tracked. A set of strategies has been created for each of the four goals.

Each of the goals for this Strategic Plan is provided below with a set of strategies to achieve the goal.

Goal 1: Training and Certification

Goal 1: ***The Costa Mesa Fire Department seeks to have well trained and certified individuals to carry out its mission and all responsibilities.***

Strategies

1. Create a Training Officer position
2. Create an EMS Coordinator position
3. Develop a succession plan
4. Study a reserve program
5. Add a Fire Marshal position
6. Fill Prevention positions
7. Create a full-time Prevention Secretary
8. Create a full-time Administrative Assistant in Administration

Goal 2: Facilities and Equipment

Goal 2: ***The Costa Mesa Fire Department seeks to have well maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.***

Strategies

1. Maintain vehicles
2. Replace vehicles after they are past the useful life
3. Maintain and update equipment
4. Maintain fire stations
5. Update the fire stations
6. Modify the stations to address the gender accommodation issues

Goal 3: Optimum Deployment

Goal 3: ***The Costa Mesa Fire Department seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.***

Strategies

1. Ensure proper staffing in the department
2. Review the new deployment model to ensure that it continues to meet the needs of the community
3. Analyze the fire based EMS transportation options

Goal 4: Technology and Communication Systems

Goal 4: ***The Costa Mesa Fire Department seeks to have technology and communication systems that allow the department to perform at optimum levels.***

Strategies

1. Upgrade the GIS System
2. Implement a modern station alert system or Update current alerting system to reflect current technology and innovation.

Implementation Action Plan

An implementation action plan identifies, for each strategy in the plan, the following items:

- Key implementation tasks
- Other agencies or departments that will be involved
- Resources available or needed for implementation
- Timeline
- Success indicators

The implementation action plan for this strategic plan is provided as Attachment A. While the major actions needed to fulfill each strategy are

provided, additional internal staff work will be needed to identify more specific steps, assignments and timetables for accomplishment. The action plan will serve as a mechanism to monitor progress and identify challenges or necessary changes to the strategic plan.

Successful implementation also requires that each person in the Costa Mesa Fire Department understand his or her role in carrying out the goals and strategies. All other internal work planning processes at a division or other level and the department's budgeting process should align with and support the department's overall goals and mission.

Communicating and Updating the Strategic Plan

An annual review of progress in accomplishing the strategies will be an important way for the Costa Mesa Fire Department to keep its Strategic Plan current. The goals should serve the department well but during the annual review, there may be a need to revise them. The strategies should be updated annually on the basis of what has been accomplished. New strategies should be created as necessary to continue making progress toward the goals.

Additionally, communicating the Strategic Plan and its progress to stakeholders will enable the Department to ensure the goals and strategies are meeting the needs of the people it serves. Staff within the department should be engaged in regular discussions about the Strategic Plan and how they are helping to achieve its goals and strategies. Additionally, discussions with stakeholders will ensure relevancy of the plan as well as timeliness of implementation.

CONCLUSION

The Costa Mesa Fire Department is privileged to have a staff that is committed to providing effective and efficient services to the communities they serve. The department has taken an important step in developing this Strategic Plan. Through this process the department has agreed upon a mission, vision and values. In addition, priorities led to the creation of goals that will serve the department well into the future. Specific strategies, each of which is measurable, have been created to move the organization forward. Each goal and the strategies associated with each goal have been incorporated into an implementation action plan. The continued commitment from the department staff to implementing the goals and strategies is critical for successful implementation of the strategic plan.

ATTACHMENT A

ATTACHMENT A – IMPLEMENTATION ACTION PLAN

Goal 1: The Costa Mesa Fire Department seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
1.Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position	Chief Officer (Captain as an alternate)	N/A	N/A	TBD	FY 2015-16	When the position is filled
2. Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position	Chief Officer (Captain as an alternate)	N/A	N/A	TBD	FY 2015-16	When the position is filled

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
3. Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position (including new hires) • Determine training plan • Include a mentorship program • Prevention Interns	Chief Officers and Company Officers	N/A	Committees	TBD	FY2016-17	Succession Plan has been implemented
4.Study a reserve program	• Prepare a report regarding the pros and cons of the implementation of a reserve program	Chief Officers and Company Officers	N/A	Committees	TBD	FY 2016-17	When the memo is completed and determination is made
5. Add Fire Marshal position		Fire Chief					
6. Fill Prevention Positions - Inspector		Fire Chief					
7. Create full-time Administrative Secretary position.		Executive Secretary					
8. EOC Liaison		Operations Chief					

Goal 2: The Costa Mesa Fire Department seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
1. Maintain vehicles	• Annual certification • Develop a realistic maintenance schedule with Fleet Services and annual certifications	Chief Officer	N/A	Public Services Staff	TBD	Annual task	Completion of the certification each year
2. Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan	Apparatus Committee	Fleet Services		TBD	TBD	When the vehicle replacement plan is developed and implemented
3. Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan	Chief Officer	N/A	Tools & Equip. Apparatus Committee and Fleet Services	Determine if additional funding is needed to maintain the equipment or if it is already included in the department budget	Needs to be completed according to the schedule that is developed	When the maintenance plan is completed and implemented according to the plan developed

Strategy	Key Implementation Tasks	Lead Responsibility	Other Agencies Involved	Staff Resources (List staff available and staff needed)	Financial Resources (List funding available and needed)	Timeline Note the year to **start** and year to **complete**	Success Indicators (How impact or result of this strategy will be measured)
4. Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan	Chief Officer	N/A	Public Services Facilities staff	TBD	Completion of the maint. plan in FY 15-16	When the maintenance plan is completed and implemented
5. Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a 50 year renovation schedule	Chief Officer	N/A	Public Services	TBD	TBD	When the new stations are built
6. Modify the stations to address the gender accommodation issues	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications	Chief Officer	N/A	• Public Services – Facilities Staff • Purchasing Staff (bidding)	TBD	Complete the updates to all stations within 5 years	When the station modifications have been completed

Goal 3: The Costa Mesa Fire Department seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
1. Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention	Chief Officer	N/A	Administration and Prevention	TBD	1-3 years	When the staffing plan is reviewed and a determination is made
2. Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed	Chief Officer	N/A	TBD	TBD	TBD	When the deployment plan is reviewed and a determination is made

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
3. Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CEO and City Council	Chief Officer	N/A	Ambulance Task Force	TBD	9/1/15	When the transportation options are analyzed and a determination is made

Goal 4: The Costa Mesa Fire Department seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	***Key Implementation Tasks***	***Lead Responsibility***	***Other Agencies Involved***	***Staff Resources*** *(List staff available and staff needed)*	***Financial Resources*** *(List funding available and needed)*	***Timeline*** *Note the year to **start** and year to **complete***	***Success Indicators*** *(How impact or result of this strategy will be measured)*
1. Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus	Operations Chief	N/A	IT Dept.	TBD	FY 16-17	• Locations are being found in a timely manner • Maps are being updated within a reasonable time frame
2. Implement a modern station alert system	• Install new modern station alert system	Chief Officer	N/A	IT Dept.	$200,000 in CIP	FY 15-16	• System stability is achieved • Notification of calls is immediate

ATTACHMENT B

ATTACHMENT B – ACTION PLAN: PROGRESS / STATUS UPDATES – DECEMBER 2016

Goal 1: Costa Mesa Fire & Rescue seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators / Comments*
1) Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional needs. *Fire Chief	JULY 2015		Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2) Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		Additionally, we will continue to look for additional support. Part-time employee or intern. *Fire Chief	JULY 2015		Training/EMS Captain Position requested and approved in the 2015-16 Budget.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators / Comments*
3) Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position • Determine training plan • Include a mentorship program • Prevention Interns • Define who is doing what (Institutional knowledge)		*Fire Chief and Command Staff		**July 2017**	New Community Risk Reduction Intern program was implemented in 2014; preparatory academies have been implemented for promotional exams; formal education option plan is being worked on; a mentoring program for new firefighters is being worked on. AOR's are being transferred and institutional knowledge is being shared in the process. A new probationary training program is being implemented, including a 6 week academy and more structured evaluations.
4).Study a reserve / apprentice program	• Prepare a report regarding the implementation of a reserve program		*Fire Chief and Command Staff		**2017-18**	Preliminary research has been completed; a potential pilot program is being considered for 2017-18.
5) Add Fire Marshal position			*Fire Chief		**2017-18**	Assistant FM to be proposed for FY 2017-18.
6) Fill Prevention Positions - Inspector			*Fire Chief	**JULY 2015**		A Code Enforcement Officer was included in the 2015-16 Budget and the P/T Inspector position was filled.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators / Comments*
7) Create full-time Administrative Secretary position.			We will continue to evaluate additional needs *Fire Chief	**JULY 2015**		No additional full-time position will be created, but additional hours are being considered for our PT CRR Office Assistant.
8) EOC Liaison			*Ops Chief	**JULY 2015**		Operations Chief is now assigned as our EOC Liaison; CMPD is the EOC lead.

Goal 2: Costa Mesa Fire & Rescue seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
1) Maintain vehicles	• Annual certification • Develop a realistic maint..schedule with Fleet Services and annual certifications		*Ops Chief		**July 2017**	Annual certifications have begun to be addressed (e.g., annual pump testing to 3rd party). More formal structure is needed with fleet services.
2) Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan		*Ops Chief & Apparatus Committee		**July 2017**	Two Pierce Engines are to be delivered in early 2017; one command vehicle is being built, but a formal and long term replacement plan and funding needs to be memorialized.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
3) Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan		*Chairperson for Small Tools & Equipment Committee		**July 2017**	Currently being evaluated.
4) Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan		*Ops Chief		**July 2018**	An updated fire station maintenance plan is currently being evaluated.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point of Contact*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
5) Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a 50-year renovation schedule • Study for all stations to determine whether building modifications can be made versus new station. In conjunction with Public Works.		*Fire Chief, Ops Chief and Management Analyst		**July 2018**	Fire Station #1 is in the process of being rebuilt. During 2017, we will work to assess all of our facilities, inclusive of a 50-year plan. CM and City Council approval for $60,000 in FY 16-17 budget for critical infrastructure enhancements/improvements.
6) Modify the stations to address the gender accommodation issues	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications		*Fire Chief, OpeChief and Management Analyst		**July 2018**	Preliminary assessments have been conducted, including funding for Fire Station modifications, which were ultimately placed on hold due to the rebuild. Additional resources are required for this.

Goal 3: Costa Mesa Fire & Rescue seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress Ongoing / Alternatives*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
1) Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention		Ongoing; *Fire Chief		**July 2017**	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment in the 2017-18 timeframe. The City Manager and Fire Chief are working on related staffing levels. Additional internal evaluations are being reviewed for others areas of the organization as well.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress Ongoing / Alternatives*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
2) Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Fire Chief and Command Staff		**July 2017**	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment in the 2017-18 timeframe. The City Manager and Fire Chief are working on related staffing levels. Additional internal evaluations are being reviewed for others areas of the organization as well.
3) Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CM and City Council		Ongoing; *Fire Chief and Command Staff	**JULY 2015**		A third party consultant (AP Triton) was brought in and a joint presentation was made to City Council with different EMS transportation models. The Council voted 3-2 to leave the current transportation model in place with a private provider. This will to be reevaluated in 2017-18.

Goal 4: Costa Mesa Fire & Rescue seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing / Alternatives*	*Completed*	*Target Date*	*Success / Status Indicators Comments*
1) Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus		*Operations Chief		**December 2017**	Currently being evaluated. Implement Westnet Alerting first, then look at other options.
2) Implement a modern station alert system	• Install new modern station alert system		Bring forward in early 2017 *Operations Chief		**Spring 2017**	$200,000 was approved in 2015-16 Budget; total cost doubled for system backbone and hardware; administrative preparation has been completed and additional funding request is anticipated for early Spring 2017 City Council consideration.

ATTACHMENT C

ATTACHMENT C – ACTION PLAN: PROGRESS / STATUS UPDATES – DECEMBER 2017

Goal 1: Costa Mesa Fire & Rescue seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
1) Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional needs. *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2) Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional support needs. *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2a) Upgrade/Separate EMS Coordinator position as a stand alone.	• Establish a stand-alone Part-time EMS Coordinator position		*Fire Chief & Command Staff		**JANUARY 2017**	Part-time EMS Coordinator position approved and filled in 2017. EMS and Ambulance Program focus.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
3) Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position • Determine training plan • Include a mentorship program • Prevention Interns • Define who is doing what (Institutional knowledge)		*Fire Chief and Command Staff	2018-19		New Community Risk Reduction Intern program was implemented in 2014; preparatory academies have been implemented for promotional exams; formal education option plan is being worked on; a mentoring program for new firefighters is being worked on. AOR's are continuing to be transferred and institutional knowledge is being shared in the process. A new probationary training program has been implemented, including our 2nd 7-Week academy and more structured evaluations.
4).Study a reserve / apprentice program	• Prepare a report regarding the implementation of a reserve program		*Fire Chief, Command Staff, and CMFA Liaison	2018-19		Preliminary research has been completed; a potential pilot program remains on the table for consideration for 2018-19.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
5) Add Fire Marshal position			*Fire Chief & Command Staff		JULY 2017	Assistant Fire Marshal Position was approved in the 2017-18 budget and is now in place.
6) Fill Prevention Positions - Inspector			*Fire Chief & Command Staff		JULY 2015	A Code Enforcement Officer was included in the 2015-16 Budget and the P/T Inspector position was filled.
7) Create full-time Administrative Secretary position.			We will continue to evaluate additional needs *Fire Chief		JULY 2016	No additional full-time position will be created, but additional hours are being considered for our PT CRR Office Assistant.
8) EOC Liaison			*Ops Chief		JULY 2015	Operations Chief is now assigned as our EOC Liaison; CMPD is the EOC lead.

Goal 2: Costa Mesa Fire & Rescue seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	***Key Implementation Tasks***	***Not Started***	***In Progress / Ongoing Alternatives / Primary Point(s) of Contact***	***Target Date***	***Completed***	***Success / Status Indicators Comments***
1) Maintain vehicles	• Annual certification • Develop a realistic maintenance.schedule with Fleet Services and annual certifications		*Ops Chief, Apparatus Committee & Fleet Services	2018-19		Annual certifications have begun to be addressed (e.g., annual pump testing to 3rd party). More formal structure is needed with new Fleet Serv. Manager - TBD.
2) Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan		*Ops Chief & Apparatus Committee *Much accomplished; additional work to be done.		JULY 2017	Two Pierce Engines were placed into service in 2017, along with two Command Vehicles & a CRR vehicle. A 3rd approved Pierce Engine is being delivered in late 2018. A formal long term replacement plan needs to be memorialized.

Strategy	Key Implementation Tasks	Not Started	In Progress / Ongoing Alternatives / Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators Comments
3) Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan		*Ops Chief & Small Tools & Equipment Committee	2018-19		Ongoing evaluation. Final maintenance schedule needs to be proposed pending a permanent City Fleet Services Manager.
3a) Radio Upgrades	• New P25 Radio Deployment		*Ops Chief & Command Staff	MAY 2018		In progress.
4) Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan		*Ops Chief, Command Staff	2018-20		An updated fire station maintenance plan is currently being evaluated. Annual Station Inspections will take place in early 2018.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5) Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a short and long-term renovation schedule • Study for all stations to determine whether building modifications can be made versus new station.		*Fire Chief, Ops Chief, Command Staff, Management Analyst, and Public Works Liaison *Progress being made	2018-20		Fire Station #1 is in the process of being rebuilt. Our goal is to assess all of our facilities, inclusive of a short and long term plan. Fire Station #6 Security Gate Upgrade is Completed (2017).
5a) Station Upgrades/Enhancements Critical Infrastructure Enhancements	• Critical Infrastructure Enhancements		*Ops Chief, Command Staff	2018-19		Critical infrastructure security enhancements/improvements have been initiated and will continue. Secured Interior Door Access Project (2017 completion). Station Security Cameras in Progress.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5b) Station Upgrades/Enhancements Fire Station Washer/Dryer Project	• Washer/Dryer Project for All Fire Stations		*Fire Chief, Ops Chief, Management Analyst & Command Staff *Substantial Progress being Made	SEPT 2018		Washer/Dryer project is now over 50% completed; it will be 100% complete in 2018.
5c) Station Upgrades/Enhancements Fire Station Diesel Exhaust Extraction (Plymovent) Project	• Plymovent Systems to be installed in all Fire Stations		*Fire Chief, Ops Chief & Command Staff *Approved in the Budget and by City Council in 2017-18.	DEC 2018		Approved in Budget Process and Contract Approved by City Council in 2017-18. Currently in the Plan Review Phase.
5d) Station Upgrades/Enhancements Fire Station Training Ground Area	• Asphalt Project, removal of old props, introduction of new ATM prop, and replacement of hydrant location.		*Ops Chief & Public Works Liaison		2017	Project Complete, inclusive of asphalt at Fire Station #2 & #4.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
6) Modify the stations to address the gender accommodation issues.	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications		*Ops Chief, Command Staff, and Public Works Liaison	2018-19		Preliminary assessments have been conducted, including funding for Fire Station modifications, which were ultimately placed on hold due to the rebuild. Additional resources are required for this.

Goal 3: Costa Mesa Fire & Rescue seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention		Ongoing; *Fire Chief, Ops Chief, Command Staff *Staffing will continue to be evaluated.		2017	The City Council Approved the Fire Chief & City Manager Recommendation to keep Fire Station #6 Open, along with six additional positions. A Part-Time EMS Coordinator was approved, along with an Assistant Fire Marshal position. Staffing needs will continue to be evaluated as an ongoing process.
2) Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Fire Chief, Ops Chief, Command Staff		JULY 2017	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment and potential Accreditation Process in the 2018-20 timeframe. Additional internal evaluations will continue to be reviewed for other areas of the organization as well.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3) Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CM and City Council		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2015**	A third party consultant (AP Triton, LLC) was brought in and a joint presentation was made to City Council with different Ambulance Transportation Models. The City Council voted 3-2 to leave the current model in place with a provide provider. This was reworked for a later (2017) City Council presentation.
3a) Implement the City Provider Based Ambulance Transportation Program	• Complete the RFP Processes for ambulance staffing & billing • Implement the new (City Provider Based) Ambulance Transportation Program.		*Fire Chief, Ops Chief, Command Staff EMS Coordinator, Ambulance Committee	**JULY 2018**		Our Ambulance Staffing Program was approved by a 5-0 City Council Vote (2017). We are currently working with AP Triton, LLC in the RFP process.

Goal 4: Costa Mesa Fire & Rescue seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus		*Operations Chief & Command Staff	2018-19		Currently being evaluated. Implement Westnet Alerting first, then look at other options.
2) Implement a modern station alerting system	• Install new modern station alert system		*Operations Chief & Command Staff	2018		$200,000 was approved in 2015-16 Budget; total cost doubled for system backbone and hardware; administrative preparation has been completed and additional funding request was approved by the City Council.
3) Continue to look for innovative solutions in technology and communication systems related to our CAD and dispatching resources	• Re-evaluate our current CAD system • Assess other regional-based dispatch options		*Fire Chief, Ops Chief, Command Staff	2018-20		In progress and under review.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3a) Next Gen CAD to CAD Project Implementation	• Next Gen CAD to CAD		*Ops Chief, City I.T. Team *Project is underway	DEC 2019		In progress.
3b) Evaluate new data analytic options to assist in our current and future decision making and deployment processes.	• Re-evaluate Fireview's capabilities. • Pilot and/or implement other data analytic options.		*Fire Chief, Ops Chief, Command Staff, City I.T. Team	DEC 2018		We are currently working with two outside vendors to provide more practical (and viable) options.

ATTACHMENT D

ATTACHMENT D – ACTION PLAN: PROGRESS / STATUS UPDATES – DECEMBER 2018

Goal 1: Costa Mesa Fire & Rescue seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
1) Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional needs. *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2) Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional support needs. *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2a) Upgrade/Separate EMS Coordinator position as a stand alone.	• Establish a stand-alone Part-time EMS Coordinator position		*Fire Chief & Command Staff		**JANUARY 2017**	Part-time EMS Coordinator position approved and filled in 2017. EMS and Ambulance Program focus.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
3) Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position • Determine training plan • Include a mentorship program • Prevention Interns • Define who is doing what (Institutional knowledge)		*Fire Chief and Command Staff	2019-20		New Community Risk Reduction Intern program was implemented in 2014; preparatory academies have been implemented for promotional exams; formal education option plan is being worked on; a mentoring program for new firefighters is being worked on. AOR's are continuing to be transferred and institutional knowledge is being shared in the process. A new probationary training program has been implemented, including our 3rd 7-Week academy and more structured evaluations.
4).Study a reserve / apprentice program	• Prepare a report regarding the implementation of a reserve program		*Fire Chief, Command Staff, and CMFA Liaison	2019-20		Preliminary research has been completed; a potential pilot program remains on the table for consideration for 2019-20.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
5) Add Fire Marshal position			*Fire Chief & Command Staff		JULY 2017	Assistant Fire Marshal Position was approved in the 2017-18 budget and is now in place.
5a) Reclassify Assistant Fire Marshal to Fire Marshal			*Fire Chief & Command Staff	2019-20 FY		Proposed inclusion in the FY 2019-2020 budget.
6) Fill Prevention Positions - Inspector			*Fire Chief & Command Staff		JULY 2015	A Code Enforcement Officer was included in the 2015-16 Budget and the P/T Inspector position was filled.
6a) CRR Inspector			*Fire Chief	February 2019		A part-time position was added in 2018 to assist.
7) Create full-time Administrative Secretary position.			We will continue to evaluate additional needs *Fire Chief		JULY 2016	No additional full-time position will be created, but additional hours are being considered for our PT CRR Office Assistant.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
7a) Increase P/T CRR Office Specialist II position to full-time Office Specialist II position.			*Fire Chief	2019-20 FY		Proposed Full-time OS II in the FY 2019-2020 budget. This position is necessary due to increased workload due to Measure X, AO Program, and development projects.
8) EOC Liaison			*Chief Officer	2019-20 FY		CMPD is the EOC lead and we are re-evaluating our EOC liaison assignment in 2019. Considering a BC for this position.

Goal 2: Costa Mesa Fire & Rescue seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Maintain vehicles	• Annual certification • Develop a realistic maint..schedule with Fleet Services and annual certifications		*Ops Chief, Apparatus Committee & Fleet Services	2018-19 – not met; 2019-20 new target date.		Annual certifications have begun to be addressed (e.g., annual pump testing to 3rd party). More formal structure is needed with new Fleet Serv. Manager - TBD. Additional support is needed in Fleet Services; 2019-20 goal.
2) Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan		*Ops Chief & Apparatus Committee *Much accomplished; additional work to be done.		JULY 2017	Two Pierce Engines were placed into service in 2017, along with two Command Vehicles & a CRR vehicle. A 3rd approved Pierce Engine is being placed into service in early 2019.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2a) Formalize long-term vehicle replacement plan			*Ops Chief & Apparatus Committee	**2019-20 FY**		A long-term replacement plan needs to be memorialized in 2019-20.
3) Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan		*Ops Chief & Small Tools & Equipment Committee	**2018-19 – not met in its entirety; 2019-2020 new target date.**		Ongoing evaluation. Final maintenance schedule needs to be proposed pending a permanent City Fleet Services Manager.
3a) Radio Upgrades	• New P25 Radio Deployment		*Ops Chief & Command Staff		**FALL 2018**	Completed.

Strategy	Key Implementation Tasks	Not Started	In Progress / Ongoing Alternatives / Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators Comments
4) Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan		*Ops Chief, Command Staff	2018-2020		An updated fire station maintenance plan is currently being evaluated. Annual Station Inspection Program will be reworked and implemented in 2019.
5) Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a short and long-term renovation schedule • Study for all stations to determine whether building modifications can be made versus new station.		*Fire Chief, Ops Chief, Command Staff, Management Analyst, and Public Works Liaison *Progress being made	2018-20		Our new Fire Station #1 was completed (2018.) Fire Station #6 Security Gate Upgrade is Completed (2017).

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5a) Reconstruction of Fire Station #2			*Fire Chief, Ops Chief, Command Staff, Management Analyst, and Public Works Liaison	2020-21		Initiation of Fire Station #2 rebuild project in 2019.
5b) Station Upgrades/Enhancements Critical Infrastructure Enhancements	• Critical Infrastructure Enhancements		*Ops Chief, Command Staff	2018-20		Critical infrastructure security enhancements/improvements have been initiated and will continue. Secured Interior Door Access Project (2017 completion). Station Security Cameras in Progress; target 2019-20.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5c) Station Upgrades/Enhancements Fire Station Washer/Dryer Project	• Washer/Dryer Project for All Fire Stations		*Fire Chief, Ops Chief, Management Analyst & Command Staff *Substantial Progress being Made	**DEC 2018; not 100 % completed. New target date is April 2019.**		Washer/Dryer project is now over 90% completed; target date of 2018 was not met. It will be 100% complete in 2019.
5d) Station Upgrades/Enhancements Fire Station Diesel Exhaust Extraction (Plymovent) Project	• Plymovent Systems to be installed in all Fire Stations		*Fire Chief, Ops Chief & Command Staff *Approved in the Budget and by City Council in 2017-18.		**FALL 2018**	Approved in Budget previous Process and formal Contract Approved by City Council in 2017-18. All Stations completed in 2018.
5e) Station Upgrades/Enhancements Fire Station Training Ground Area	• Asphalt Project, removal of old props, introduction of new ATM prop, and replacement of hydrant location.		*Ops Chief & Public Works Liaison		**2017**	Project Complete, inclusive of asphalt at Fire Station #2 & #4.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5f) Training Room remodel at Fire Station #4	• Remodel and upgrade of Training Room		*Fire Chief, Ops Chief, Eng Brown and FF/PM La Placa	2018-19		Project 90% complete; anticipate opening January 2019.
6) Modify the stations to address the gender accommodation issues.	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications		*Ops Chief, Command Staff, and Public Works Liaison	2018-19 – not entirely met due to rebuild, but currently meets or exceeds minimum standards; 2019-2020 new target date.		Preliminary assessments have been conducted, including funding for Fire Station modifications, which were ultimately placed on hold due to the rebuild. Additional resources are required for this. To be included in recommendations for Fire Station #2 rebuild and Fire Station #4 remodel planning.

Goal 3: Costa Mesa Fire & Rescue seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	***Key Implementation Tasks***	***Not Started***	***In Progress / On Going Alternatives / *Primary Point(s) of Contact***	***Target Date***	***Completed***	***Success / Status Indicators Comments***
1) Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention		Ongoing; *Fire Chief, *Ops Chief *Command Staff *Staffing will continue to be evaluated.		**2017**	The City Council Approved the Fire Chief & City Manager Recommendation to keep Fire Station #6 Open, along with six additional positions. A Part-Time EMS Coordinator was approved, along with an Assistant Fire Marshal position.
1a) Continue to assess and evaluate staffing needs.			*Fire Chief, Ops Chief & Command Staff	**2019-20**		Staffing needs will continue to be evaluated as an ongoing process. SOC proposed for 2019-20.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2) Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2017**	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment and potential Accreditation Process.
2a) Initiate an external Standards of Cover report / evaluation.			*Fire Chief, Ops Chief, Command Staff	**2019**		An external Standards of Cover evaluation is being planned for 2019.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3) Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CM and City Council		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2015**	A third party consultant (AP Triton, LLC) was brought in and a joint presentation was made to City Council with different Ambulance Transportation Models. The City Council voted 3-2 to leave the current model in place with a provide provider. This was reworked for a later (2017) City Council presentation.
3a) Implement the City Provider Based Ambulance Transportation Program	• Complete the RFP Processes for ambulance staffing & billing • Implement the new (City Provider Based) Ambulance Transportation Program.		*Fire Chief, Ops Chief, Command Staff EMS Coordinator, Ambulance Committee		**SEPT 2018**	Our Ambulance Staffing Program was approved by a 5-0 City Council Vote (2017). Our Ambulance Transportation & Billing Programs were implemented September 1, 2018.

Goal 4: Costa Mesa Fire & Rescue seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus		*Operations Chief & Command Staff	2020		Continuing to be evaluated.
2) Implement a modern station alerting system	• Install new modern station alert system		*Operations Chief & Command Staff		2018	$200,000 was approved in 2015-16 Budget; total cost doubled for system backbone and hardware; West Net Alerting System was implemented and officially placed into service in 2018.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3) Continue to look for innovative solutions in technology and communication systems related to our CAD and dispatching resources	• Re-evaluate our current CAD system • Assess other regional-based dispatch options		*Fire Chief, Ops Chief, Command Staff	2018-20		In progress and under review.
3a) Next Gen CAD to CAD Project Implementation	• Next Gen CAD to CAD		*Ops Chief, City I.T. Team *Project is underway	2019-20		In progress.
3b) Evaluate new data analytic options to assist in our current and future decision making and deployment processes.	• Re-evaluate Fireview's capabilities. • Pilot and/or implement other data analytic options.		*Fire Chief, Ops Chief, Command Staff, City I.T. Team	DEC 2018; target date missed. New target date JULY 2019.		We are currently working with two outside vendors to provide more practical (and viable) options. We have a signed agreement with Fire Stats, LLC (Paul Rottenberg). Currently working on City IT limitation issues.

ATTACHMENT E

ATTACHMENT E – ACTION PLAN: PROGRESS / STATUS UPDATES - DECEMBER 2019

Goal 1: Costa Mesa Fire & Rescue seeks to have well-trained and certified individuals to carry out its mission and all responsibilities.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
1) Create a Training Officer position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional needs *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2) Create an EMS Coordinator position	• Develop a job description • Determine the salary and benefits • Prepare a memo describing the need for the position		We will continue to evaluate additional support needs *Fire Chief & Command Staff		**JULY 2015**	Training/EMS Captain Position requested and approved in the 2015-16 Budget.
2a) Upgrade/Separate EMS Coordinator position as a stand alone.	• Establish a stand-alone Part-time EMS Coordinator position		*Fire Chief & Command Staff		**JANUARY 2017**	Part-time EMS Coordinator position approved and filled in 2017. EMS and Ambulance Program focus.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators / Comments*
2b) Increase/Enhance EMS Coordinator	• Increase hours of EMS Coordinator • Prepare justification for inclusion in the FY 2020-21 budget.		*Fire Chief & Command Staff	FY 2020-2021		Part-time EMS Coordinator position hours increase.
3) Develop a succession plan	• Prepare a detailed succession plan for all levels of staffing in the department • Determine training that is needed for each position • Determine training plan • Include a mentorship program • Prevention Interns • Define who is doing what (Institutional knowledge)		*Fire Chief and Command Staff	Making progress in this area –new target date for final formal plan 2020-2021		New Community Risk Reduction Intern program was implemented in 2014; preparatory academies have been implemented for promotional exams; formal education option plan is being worked on; a mentoring program for new firefighters is being worked on. AOR's are continuing to be transferred and institutional knowledge is being shared in the process. Our new probationary training program continues to evolve, including our 4th 7-week academy and more structured evaluations. Final formal plan pending.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
4).Study a reserve / apprentice program	• Prepare a report regarding the implementation of a reserve program • Identify and assign project leads		*Fire Chief, Command Staff, and CMFA Liaison	**No significant progress noted – new target date for final formal plan 2020-2021**		Preliminary research has been completed; a potential pilot program remains on the table for consideration for 2020-2021. Identify project leads in 2020-2021.
5) Add Fire Marshal position			*Fire Chief & Command Staff		**JULY 2017**	Assistant Fire Marshal Position was approved in the 2017-18 budget and is now in place. Working to establish a Fire Marshal Position and tiered CRR positions in 2019-20.
5a) Reclassify Assistant Fire Marshal to Fire Marshal			*Fire Chief & Command Staff		**JULY 2019**	Proposed inclusion in the FY 2019-2020budget. Approved Fire Marshal Position in FY 2019-2020.

Strategy	Key Implementation Tasks	Not Started	In Progress / On Going Alternatives / *Primary Point(s) of Contact	Target Date	Completed	Success / Status Indicators / Comments
6) Fill Community Risk Reduction Positions - Inspector			*Fire Chief & Command Staff		**JULY 2015**	A Code Enforcement Officer was included in the 2015-16 Budget and the P/T Inspector position was filled. A part-time position was added in 2018 to assist.
6a) Add Community Risk Reduction Positions	• Prepare justifications for inclusion in the FY 2020-21 budget.		*Fire Chief, Fire Marshal, Management Analyst	**FY 2020-2021**		Additional requests for CRR positions are being proposed through sound justifications (i.e., cost recovery increases from $177k to $559k annually & increasing workloads)
7) Create full-time Administrative Secretary position			We will continue to evaluate additional needs		**JULY 2016**	No additional full-time position was created, but it was addressed and deferred.

Strategy	***Key Implementation Tasks***	***Not Started***	***In Progress / On Going Alternatives / *Primary Point(s) of Contact***	***Target Date***	***Completed***	***Success / Status Indicators / Comments***
7a) Expand part-time CRR Office Assistant position to full-time	• Prepare justifications for inclusion in the FY 2020-21 budget. • This position will also assist with permits and ambulance billing support.		*Fire Chief, Fire Marshal, Management Analyst	**FY 2020-2021**		Additional requests for CRR positions are being proposed through sound justifications (i.e., cost recovery increases from $177k to $559k annually & increasing workloads). A full-time CRR administrative assistant.
8) EOC Liaison			*Chief Officer		**JULY 2015; to be updated 2019-2020**	CMPD is the EOC lead and we are re-evaluating our EOC liaison assignment in 2019.
9) Department priorities on Fire Service Safety, Wellness, Behavioral Health & Cancer Prevention	• Establish and support programs specific to each need • Identify funding sources • Support training opportunities • Continue to evaluate		*Command Staff, Company Officers & CMFA	**Much Progress, but this will remain *ON-GOING***		*SAC Wellness Program & JAC Program *Peer Support & Behavioral Health Teams *Chaplain Program *Cancer Prevention

Goal 2: Costa Mesa Fire & Rescue seeks to have well-maintained facilities and equipment that enable personnel to perform their jobs safely and efficiently.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Maintain vehicles	• Annual certification • Develop a realistic maint. schedule with Fleet Services and annual certifications		*Ops Chief, Apparatus Committee & Fleet Services	**Continuing to make some progress in this area – new target date for final formal plan 2020-2021**		Annual certifications have begun to be addressed (e.g., annual pump testing to 3rd party). More formal structure is needed with new Fleet Serv. Manager - TBD. Additional support is needed in Fleet Services; 2020-2021. Vehicle maintenance is hindered due to vehicles that are no longer supported by the manufacturer.
2) Replace vehicles after they are past their useful life	• Develop a vehicle replacement plan and funding plan		*Ops Chief & Apparatus Committee *Much accomplished; additional work to be done		**JULY 2017**	Two Pierce Engines were placed into service in 2017, along with two Command Vehicles & a CRR vehicle. An initial reset/short-term replacement plan was successful, but a long-tern plan needs to be memorialized (reference item 2b). Our 3rd Pierce Engine was placed into service in 2019.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2a) Develop a long-term plan to replace vehicles after they are past their useful life.	• Develop a vehicle replacement plan and funding plan		*Command Staff	FY 2020-2021		Replacement engine & truck were proposed for preliminary budgets (2019-2021 FY's), but deferred – budget challenges.
2b) Obtain an assignment of a Cal OES Engine to support the regional and statewide fire, rescue and emergency services collaborative efforts			*Command Staff		2019	Cal OES Engine assigned and placed into service in 2019.
2c) Replace our truck (i.e., Quint)	• Develop a replacement and funding plan		*Command Staff & Apparatus Committee	FY 2020-2021		Inclusion in 2020-2021 FY budget.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3) Maintain and update equipment	• Develop a list of Department equipment that needs to be maintained • Determine the maintenance schedule • Determine who is responsible for the maintenance • Determine the funding source for the maintenance plan		*Ops Chief & Small Tools & Equipment Committee	**Ongoing; 2020-2021 new target date.**		Ongoing evaluation. Final maintenance schedule needs to be proposed pending a permanent City Fleet Services Manager.
3a) Radio Upgrades	• New P25 Radio Deployment		*Ops Chief & Command Staff		**FALL 2018**	Completed.
3b) USA Flag Project	• Install USA Flags into permanent service on all CMFR Fire Engines & Trucks		*Command Staff, Apparatus Committee		**2019**	Completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
4) Maintain Fire Stations	• Develop a plan of the maintenance required at each station • Develop a schedule for the maintenance • Determine the funding plan		*Ops Chief, Command Staff	2018-2020		An updated fire station maintenance plan is currently being evaluated. Annual Station Inspection Program was reworked and implemented in 2019. Ongoing annual inspections in 2020.
5) Renovations or Reconstruction of the Fire Stations	• Rebuild the stations from oldest to newest • Implement a short and long-term renovation schedule • Study for all stations to determine whether building modifications can be made versus new station.		*Fire Chief, Ops Chief, Command Staff, Management Analyst, and Public Works Liaison *Progress being made	2018-2020		Our new Fire Station #1 was completed (2018). Fire Station #6 Security Gate Upgrade is Completed (2017). Initiation of Fire Station #2 rebuild project in 2019. Rebuild project of Fire Station #2 deferred and removed from budget in FY 2019-2020 due to budget shortfalls; inclusion in FY 2020-2021 budget and SOC assessment.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5a) Station Upgrades/Enhancements Critical Infrastructure Enhancements	• Critical Infrastructure Enhancements		*Ops Chief, Command Staff	**Ongoing, with some progress; 2020-2021 new target date.**		Critical infrastructure security enhancements/improvements have been initiated and will continue. Secured Interior Door Access Project (2017 completion). Station Security Cameras in Progress; target 2020-2021 FY.
5b) Station Upgrades/Enhancements Fire Station Washer/Dryer Project	• Washer/Dryer Project for All Fire Stations		*Fire Chief, Ops Chief, Management Analyst & Command Staff		**2019**	Washer/Dryer project is now 100% completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5c) Station Upgrades/Enhancements Fire Station Diesel Exhaust Extraction (Plymovent) Project	• Plymovent Systems to be installed in all Fire Stations		*Fire Chief, Ops Chief & Command Staff *Approved in the Budget and by City Council in 2017-18		**FALL 2018**	Approved in Budget previous Process and formal Contract Approved by City Council in 2017-18. All Stations completed in 2018.
5d) Station Upgrades/Enhancements Fire Station Training Ground Area	• Asphalt Project, removal of old props, introduction of new ATM prop, and replacement of hydrant location.		*Ops Chief & Public Works Liaison		**2017**	Project Complete, inclusive of asphalt at Fire Station #2 & #4.
5e) Fire Station #4 Training Room	• Funding & project management		*Command Staff, Engineer Brian Brown & FF/PM Giovanni La Placa		**2019**	Project Completed!

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / Ongoing Alternatives / Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
5f) Multiple "Crew-Initiated" projects	• Funding & project management		*Multiple Crews		**2019**	Multiple projects completed, including, but not limited to stations #3 & #4 backyard areas, apparatus areas stations #4 & #5, old BC office and fitness room fire station #5.
6) Modify the stations to address the gender accommodation issues.	• Determine the modifications to each station that are necessary • Determine the cost of the modifications • Develop a phasing plan for implementation • Identify a funding source • Complete the modifications		*Ops Chief, Command Staff, and Public Works Liaison	**2019-2020 – not entirely met due to rebuild, but currently meets or exceeds minimum standards; 2020-2021 new target date for budget approval.**		Preliminary assessments have been conducted, including funding for Fire Station modifications, which were ultimately placed on hold due to the rebuild. Additional resources are required for this. Continue to be included in recommendations for Fire Station #2 rebuild and Fire Station #4 remodel planning.

Goal 3: Costa Mesa Fire & Rescue seeks to have an optimum deployment model where service is provided in the most efficient and effective manner while maintaining the highest level of customer service.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Ensure proper staffing in the department	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed • Review workload; Admin/Prevention		Ongoing; *Fire Chief, Ops Chief, Command Staff *Staffing will continue to be evaluated		**2017**	The City Council Approved the Fire Chief & City Manager Recommendation to keep Fire Station #6 Open, along with six additional positions. A Part-Time EMS Coordinator was approved, along with an Assistant Fire Marshal position. Staffing needs will continue to be evaluated as an ongoing process.
2) Review the new deployment model to ensure that it continues to meet the needs of the community	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2017**	The department worked with Citygate to assess Fire Station #6 options and will pursue a more comprehensive SOC assessment and potential Accreditation Process. An external Standards of Cover evaluation was initiated in 2019. A final report will be completed in 2020.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
2a) Complete a comprehensive Standards of Coverage (SOC).	• Review calls for service, current staffing levels and response times • Determine appropriate staffing • Obtain approval if modifications are needed		Ongoing; *Command Staff	**JULY 2020**		The department initiated a comprehensive SOC assessment with Citygate, LLC. A final report will be completed in 2020. Prepare for a future Accreditation Process (CPSE).
3) Analyze the Fire based EMS transportation options	• Analyze the pros and cons of each transportation option in the department • Make a recommendation to the CM and City Council		Ongoing; *Fire Chief, Ops Chief, Command Staff		**JULY 2015**	A third party consultant (AP Triton, LLC) was brought in and a joint presentation was made to City Council with different Ambulance Transportation Models. The City Council voted 3-2 to leave the current model in place with a provide provider. This was reworked for a later (2017) City Council presentation.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3a) Implement the City Provider Based Ambulance Transportation Program	• Complete the RFP Processes for ambulance staffing & billing • Implement the new (City Provider Based) Ambulance Transportation Program.		*Fire Chief, Ops Chief, Command Staff EMS Coordinator, Ambulance Committee		**SEPT 2018**	Our Ambulance Staffing Program was approved by a 5-0 City Council Vote (2017). Our Ambulance Transportation & Billing Programs were implemented September 1, 2018.

Goal 4: Costa Mesa Fire & Rescue seeks to have technology and communication systems that allow the department to perform at optimum levels.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
1) Upgrade the GIS System	• Update the paper mapping system • Explore the use of Smart Technology (iPhone) for all areas of the department and apparatus		*Operations Chief & Command Staff	2020		Continuing to be evaluated.
2) Implement a modern station alerting system	• Install new modern station alert system		*Operations Chief & Command Staff		2018	$200,000 was approved in 2015-16 Budget; total cost doubled for system backbone and hardware; West Net Alerting System was implemented and officially placed into service in 2018.
3) Continue to look for innovative solutions in technology and communication systems related to our CAD and dispatching resources	• Re-evaluate our current CAD system • Assess other regional-based dispatch options		*Fire Chief, Ops Chief, Command Staff	2018-20		In progress and under review.

Strategy	*Key Implementation Tasks*	*Not Started*	*In Progress / On Going Alternatives / *Primary Point(s) of Contact*	*Target Date*	*Completed*	*Success / Status Indicators Comments*
3a) Next Gen CAD to CAD Project Implementation	• Next Gen CAD to CAD		*Ops Chief, City I.T. Team *Project is underway	**Still in progress; New target date FY 2020-2021**		In progress.
3b) Evaluate new data analytic options to assist in our current and future decision making and deployment processes.	• Re-evaluate Fireview's capabilities. • Pilot and/or implement other data analytic options.		*Fire Chief, Ops Chief, Command Staff, City I.T. Team		**2019**	We are currently working with two outside vendors to provide more practical (and viable) options. We have a signed agreement with Fire Stats, LLC (Paul Rottenberg). Currently working on City IT limitation issues. Final data project is now underway and in progress

GOALS AND OBJECTIVES

Costa Mesa

21/24

COSTA MESA | CALIFORNIA | USA | WWW.COSTAMESACA.GOV

MISSION STATEMENT

The City of Costa Mesa serves our residents, businesses, and visitors while promoting a safe, inclusive, and vibrant community.

CORE VALUES

Integrity
Sustainability
Compassion
Innovation
Inclusion
Collaboration

COSTA MESA CITY COUNCIL

Front Row: Council Member Arlis Reynolds, Mayor John Stephens, Mayor Pro Tem Andrea Marr
Second Row: Council Member Don Harper, Council Member Loren Gameros, Council Member Jeffrey Harlan, Council Member Manuel Chavez

Costa Mesa

Strategic planning establishes goals and objectives that highlight the key priorities for the City. In 2021, the City conducted two Strategic Planning sessions. Based on these sessions, the City Council adopted Three-Year Goals and Six-Months Objectives, as well as the City's first-ever Mission Statement and Core Values.

3-YEAR GOALS

- Recruit and Retain High Quality Staff
- Achieve Long-Term Fiscal Sustainability
- Strengthen the Public's Safety and Improve the Quality of Life
- Diversify, Stabilize, and Increase Housing to Reflect Community Needs
- Maintain and Enhance the City's Facilities, Technology, and Equipment
- Advance Environmental Sustainability and Climate Resiliency

Recruit and Retain High Quality Staff

- Develop recommendations for City Council consideration regarding increased staffing to address critical needs.
- Develop a framework for a market analysis of employee compensation for hard-to-fill positions and present the results to the City Manager.
- Issue a Request for Proposal for a consultant who will identify opportunities to innovate and modernize recruitment, hiring and retention through succession and talent management planning.
- Develop a framework for a robust training, mentorship and leadership development program and present the results to the City Manager.

- Initiate the process to map and evaluate the employee recruitment process to innovate and modernize recruitment and commence development of the succession plan and present to the City Manager.
- Present to the City Council for consideration the first phase of hard-to-fill positions requiring a market adjustment based on current data.
- Perform a market analysis of City Council compensation for comparable agencies and special districts within the county and report results to the City Manager.
- Launch the Costa Mesa University Wellness, Leadership, Training and Mentorship Program for all city employees.
- Develop HR staffing recommendations for inclusion in the mid-year budget to be presented to the City Council for consideration.
- Update and begin implementation of the online employee onboarding, training and evaluation processes by updating the NeoGov System.

Achieve Long-Term Fiscal Sustainability

- Develop and define a quarterly report format, including financial metrics, to improve fiscal transparency and report to the City Council and FIPAC.
- Secure a consultant for the Economic Development Strategic Plan.
- Procure and implement an upgrade of the public safety systems, subject to Dept. of Justice approval, and citywide database servers.
- Provide an update to the City Council regarding the state of retail cannabis implementation, including revised revenue projections.

- Present the Measure Q cannabis permitting fees, ordinance, procedures, and staffing to City Council for action.
- Develop the scope of work for the Economic Development planning consulting contract and present to the City Council.
- Develop and define a quarterly reporting format, including financial metrics, to improve fiscal transparency and report to the City Council and FIPAC.

Strengthen the Public's Safety and Improve the Quality of Life

- Provide updates to the City Council regarding management of the COVID pandemic, including management of COVID vaccinations.
- Establish a community communication and engagement plan to support health and safety initiatives.
- Develop approaches to mitigate collisions and injuries on roadways, including providing 3-5 options for City Council direction.
- Develop a plan for expanding our community policing and report to the City Council with a timeframe for implementation.
- Enhance the Communications and Engagement Plan to support the public's health, safety and quality of life and present results to the City Manager.
- Present a plan to reduce collisions and injuries on roadways, including providing 3-5 options for City Council direction.
- Engage the community to obtain feedback on the community's sense of safety and well-being and present results to the City Council
- Update the City Council on the Open Space Master Plan, with a focus on access to parks.
- Present options to the City Council for a behavioral health response model.
- Identify, develop and implement a measurement tool(s) to determine the effectiveness of the City's communications and public engagement with all segments of the community.

Diversify, Stabilize and Increase Housing to Reflect Community Needs

- Complete resource planning to implement longer-term programs such as ADU's, STR's, and HOME funds and present the results to the City Manager.
- Evaluate and identify short-term and long-term staffing needs to assist with core Development Services Department programs.
- Complete a Public Review Draft Housing Element and present to the City Council.
- Present a Development Program to the City Council for senior housing at the Senior Center site.
- Present to the City Council opportunity sites for potential motel conversions with site control options.
- Present to the City Council for action necessary code amendments to address SB 8, 9, and 10.
- Initiate and convene a Citizens Advisory Group to discuss Measure Y and Housing Element compliance.
- Present to the City Council for action the Housing Element.
- Present to the Planning Commission a draft Inclusionary Housing Ordinance.
- Initiate a draft STR Ordinance and an evaluation of program implementation options.
- Present to the City Council for consideration a development plan and land use documentation for affordable housing at the Senior Center.

Maintain and Enhance the City's Facilities, Equipment and Technology

- Provide an update to the City Council on the Culture and Arts Master Plan.
- Provide an update to the City Council on the Open Space Master Plan.
- Implement IT backup system, refresh Wi-Fi, and IT room chiller upgrade.
- Present the Pedestrian Master Plan Update, including results from Community Outreach and walk audits.
- Develop long-range facility and equipment needs assessment and report the results to the City Manager.

- Provide an update to the City Council on the development of Community Center, Shalimar Park and Ketchum-Libolt Park improvements and other strategies to increase park access.
- Review the Community Workforce Agreement and present to the City Manager for future City Council action.

Advance Environmental Sustainability and Climate Resiliency

- Present the Pedestrian Master Plan update to the City Council for direction.
- Develop a scope of work for the Climate Action and Adaptation Plan and present to the City Council for action.
- Provide an update of the Stormwater Management Master Plan to the City Council.
- Re-evaluate the existing Municipal Sustainable Policy, including landscape, organic waste and infrastructure planning and present the results to the City Council for action.

LEADERSHIP TEAM

Front Row: Assistant City Manager Susan Price, City Manager Lori Ann Farrell Harrison, City Attorney Kimberly Barlow
Second Row: Finance Director Carol Molina, Development and Economic Services Director Jennifer Le, Public Services Director Raja Sethuraman
Third Row: Parks and Community Services Director Jason Minter, Chief of Police Ron Lawerence, Chief of Fire and Rescue Dan Stefano, Information Technology Director Steve Ely

Costa Mesa

After the City Council adopts the City's Three-Year Goals and Six-Months Objectives, the leadership team works diligently to ensure that each objective is achieved. The progress for each Six-Month Objective is reported on a monthly basis to the City Council.

Costa Mesa

File #: 22-933 **Meeting Date:** 11/15/2022

TITLE:

APPROVAL OF RESPONSE TO GRAND JURY REGARDING ORANGE COUNTY EMS AND THE FIRE SERVICE

DEPARTMENT: **CITY MANAGER AND COSTA MESA FIRE & RESCUE**

PRESENTED BY: **CITY MANAGER AND COSTA MESA FIRE & RESCUE**

CONTACT INFORMATION: **DANIEL A. STEFANO, FIRE CHIEF, (714) 754-5106**

RECOMMENDATION:

Staff recommends the City Council authorize the City Manager and Fire Chief to respond to the Presiding Judge of the Superior Court concerning the findings and recommendations made by the Orange County Grand Jury Report. 2021-2022.

BACKGROUND:

Pursuant to Article 1, Section 23, of the California Constitution, each county is required to summon and impanel a Civil Grand Jury at least once a year. The purpose of the Civil Grand Jury is to investigate and report on the operations of local government, and to provide their findings and recommendations for improvement where appropriate.

The City of Costa Mesa was included in a response request, along with the majority of cities who provide Fire & Rescue services, including those served by contractual agreement with the Orange County Fire Authority (OCFA). As such, a report was prepared by the Orange County Grand Jury during 2021-2022 regarding Fire-Based Emergency Medical Services and a final report was presented to the City and City Fire Chief. Under California Penal Code Sections 933 and 933.05, a response to the Presiding Judge of the Superior Court regarding the Civil Grand Jury's Report is required.

ANALYSIS:

GRAND JURY FINDING #F1

FINDING: ***"Despite fire departments throughout Orange County having evolved into emergency medical departments, most have not updated their emergency response protocols accordingly, but have simply absorbed emergency medical responses into their existing fire response models."***

RESPONSE: The City Disagrees Wholly with this Finding.

This finding is inconsistent with the historical facts of the California Fire Service generally and with the City of Costa Mesa specifically.

For over half a century, the California Fire Service, including Costa Mesa Fire & Rescue (CMFR), has been the primary provider of prehospital EMS throughout the state, long before the existence of an organized statewide EMS system. Recognizing the obvious value-in terms of both operational and financial efficiency and effectiveness-of already-existing strategically located fire stations and emergency apparatus, staffed by highly trained and experienced firefighters who possess a vast array of rescue skills and capabilities, in 1969 the California Legislature enacted Health & Safety Code §219, which created minimum first aid training standards for all public safety personnel. During that same year, a pilot program was launched by three physicians in Los Angeles County to train 18 Firefighters as "Mobile Intensive Care Paramedics" (MICPs) who would provide Advanced Life Support (ALS) level care to the critically ill and injured in the prehospital setting. The success of this program led to passage of the Wedworth-Townsend Paramedic Act of 1970 for the purpose of expanding paramedic services throughout the state.

The California Fire Service-based model for the delivery of ALS/paramedic-level care was so overwhelmingly successful that the television series "Emergency" (1972-1977) was developed to bring national attention to the importance of prehospital EMS through the characters of Firefighter-Paramedics Johnny Gage and Roy DeSoto (actors Randolph Mantooth and Kevin Tighe). When "Emergency" first aired, there were only about six paramedic systems nationwide. However, the series was tremendously popular, and people all over the United States began to ask their local officials why they did not also have such a system.

In its efforts to better organize and coordinate the newly developing field of prehospital EMS, the California Legislature adopted the Emergency Medical Services System and Prehospital Medical Care Personnel Act of 1980 ("1980 EMS Act") that established Division 2.5 of the Health & Safety Code (HSC). Due to the fundamental and essential role of the Fire Service in developing the EMS infrastructure over preceding decades-that included an enormous commitment of time, staffing, training, and money from cities and citizen taxpayers-the Legislature wrote California Health & Safety Code §1797.201 to formally recognize and preserve the pre-existing authority of those local cities and fire agencies to continue in the provision, administration, and operational control of all prehospital EMS their jurisdiction, in compliance with, and subject to, state and local medical (i.e., patient care) standards and guidelines.

Section 1797.201 also reflects the Legislature's acknowledgement that the administrative and operational aspects of an EMS system are best determined at the local level, based on the specific needs and nuances of the community served, ultimately defined by local policy through jurisdictional governance and based on the subject-matter expertise of the public safety representatives (e.g., Fire Chief, EMS Division/Section, etc.) who best understand the particular needs of their community and who are directly accountable to the community served.

With that all said, the distinction between the ***operational and administrative*** control of an EMS system and the ***medical*** control of an EMS system need to be clearly acknowledged and clarified. Whereas the various local governments and fire agencies have the sovereign legal authority over the

administration and operational control of prehospital EMS within their respective jurisdictions (HSC §1797.201), the Local Emergency Medical Services Agency (LEMSA) maintains absolute legal authority over *medical* control. "Medical control" is statutorily defined as, and expressly limited to, "the *medical* management" and the "*medical* direction" of the EMS system. In other words, decisions and actions that directly impact patient care such as assessment, treatments/interventions, and transport destination decisions (HSC §§ 1797.90, 1797.220, 1798(a), 1798.8). Costa Mesa has not in our history challenged the medical control of our LEMSA. In fact, this acknowledgement and delineation is extremely important, combined with the significant value placed on local governmental agencies and the LEMSA working within a highly collaborative environment for the best interests of EMS system itself and the communities served.

Further, the California Fire Service, which includes Costa Mesa Fire & Rescue (CMFR), has continued to be the primary provider of prehospital EMS throughout the State, with Orange County being one of the best examples of a well-functioning and efficiently structured EMS system. This is primarily because of our long history as a highly unified fire service-based EMS system composed of fire agencies that are capable of providing "All-Hazards" Emergency Services (i.e., Fire, Rescue, Medical, Community Risk Reduction, etc.), including both BLS and ALS/paramedic level prehospital emergency care, in all types of hazardous environments and across all jurisdictional boundaries due to our emphasis on inter-agency coordination and standardization of training and procedures according to local, state, and national guidelines. In fact, inter-agency and cross-jurisdictional coordination and standardization is absolutely critical for operational effectiveness and firefighter safety, but it is also necessary to achieve the goals of *optimal quality* patient care, as well as *equality* of patient care, for all county residents and visitors regardless of their location or situation. Moreover, this is predicated on the reciprocity of like resources and services between fire service agencies, without a reduction in type, level, or quality of care. The Orange County Fire Chiefs Association (OCFCA)-which includes CMFR and represents all Orange County Fire Service-ALS-Level provider agencies-remains committed to all of these goals, as well as continuing its tradition of innovation and ongoing improvement in the rapidly changing world of healthcare and medicine, because the people who depend on us deserve nothing less.

In 1975, Costa Mesa initiated a three-platoon schedule for the fire department, resulting in a 56-hour workweek. Later that year, seven firefighters were trained as paramedics and the Mobile Intensive Care (MIC) program was initiated.

The first "Medic" unit was a 1975 Chevy ambulance. Later a Ford ambulance was purchased so that one could be kept in reserve. It is interesting to note that these ambulances were not utilized for patient transport; a private ambulance company was utilized to perform that function. Soon, the single paramedic unit for Costa Mesa's 70,000 people proved to be inadequate. In January of 1983, a second Medic unit, Medic Truck 3 was placed in service at the Park Avenue Fire Station.

Over the subsequent decades and up to the present time, Costa Mesa has made many positive improvements and enhancements in our EMS system and EMS system protocols. For example, in addition to strong BLS EMS education and training efforts, a nurse educator was added to our EMS education cadre. Similarly, we added the positions of *both* an EMS Manager *and* an EMS Coordinator due to the ever-expanding prehospital EMS needs of our community as well as evolving

CQI (Continuous Quality Improvement) requirements, among other areas.

As the number of emergency medical responses increased, it became apparent that more than two paramedic units were necessary to achieve the goals of the MIC program. An aggressive purchasing program saw the replacement of nearly every front line apparatus in 1989-90, and within 5 years, the department had converted all of the five engine companies to Paramedic Engines, each staffed with four personnel and the continued utilization of a private ambulance company from an off-site location to assist with our emergency transportation.

From 2010-2013, during the city's initial recovery planning from the Great Recession of 2008-2009, the city and the department continued to analyze different options of deployment and delivery, including the formal evaluation of joining the Orange County Fire Authority. Ultimately, the decision was made to retain our city fire department and explore the most effective and efficient model of emergency service delivery moving forward. In 2013, the department initiated the purchase of six brand new rescue ambulances and began piloting an expanded paramedic program. In 2014, the department initiated its first strategic planning process, which included updating the department's name from "Fire" Department to "Fire & Rescue" Department to reflect the robust "all-hazard" response approach and focus on continuous improvement and innovative evolution.

In 2018, the City Council approved the Fire Chief and City Manager recommendation to implement a city based ambulance operator emergency transportation program, which brought the emergency ambulance transportation in-house in an innovative public-private partnership model, that Costa Mesa continuously monitors and adapts "real-time" to the changing health and safety needs of the community.

Regarding specific technologies and procedures, prehospital EMS in 2022 is obviously substantially different than the prehospital EMS provided by fire departments 50 years ago when the Mobile Intensive Care Paramedic was first created. Indeed, the assessment and treatment interventions performed by the modern-day Firefighter-Paramedic, along with evidence-based system protocols governing patient triage and hospital destination, have dramatically improved survival and outcome for victims of sudden illness and injury. Moreover, technological advances in the field of medicine traditionally utilized exclusively in the hospital setting are more and more being adapted for use in the prehospital setting by fire department paramedics. The following are just some of the many examples of major improvements in prehospital assessment and treatment that demonstrates Costa Mesa is not only evolving, but always working diligently to be on the forefront of advancement and thoughtful innovation, for the benefit of our residents to prevent and minimize premature death and disability, while maximizing positive neurological outcomes.

A. Electronic Patient Care Reporting (E-PCR)

CMFR transitioned from a paper based patient care record to an electronic patient care record (ePCR) system in 2012, after being brought in as the first Orange County fire service agency to pilot and initiate the ePCR program. This happened in conjunction with the Orange County Emergency Medical Services Agency (OCEMSA) and allowed for significant improvements in the ability to operate a Continuous Quality Improvement (CQI) program. In 2016, again in conjunction with the

OCEMSA, a transition was made to an upgraded ePCR program that continues to be used and refined today. CMFR participates in a multi-agency CQI committee which utilizes the ePCR format and its data to improve emergency medical service delivery.

B. Prehospital 12-Lead Electrocardiogram (EKG) & Cardiac Center Triage

Cardiovascular disease (CVD) is the number one cause of death for both men and women in the United States, killing over one million people each year. CVD kills more people than cancer, AIDs, and the other top five causes of death combined. One of the primary mechanisms of death from cardiovascular disease is heart attack, which kills over 450,000 people each year. A heart attack, known more accurately as myocardial infarction, is when a person's coronary artery suddenly becomes blocked. The heart muscle that was supplied by the blocked artery then begins to die as it is deprived of oxygen rich blood. According to American Heart Association (AHA) Emergency Cardiovascular Care (ECC) guidelines, in order to survive a myocardial infarction "it is imperative that healthcare providers evaluate, triage, and treat patients as quickly as possible," because "half of the patients who die of myocardial infarction do so before reaching the hospital" (2005 AHA ECC Guidelines, IV-89). Accordingly, AHA makes the performance of a 12-Lead EKG a Class I recommendation, which means it is deemed essential for survival. The sooner a myocardial infarction is identified by paramedics in the field, the sooner they can initiate the appropriate treatments and notify the nearest Cardiac Center hospital, so that when the patient arrives the coronary artery blockage can be rapidly removed. CMFR was one of the first EMS agencies in Orange County to implement at 12-Lead EKG and Cardiac Triage program and, along with Hoag Hospital (Newport Beach), set national records for the successful treatment of heart attack victims.

C. Public Access Defibrillation Program

Another primary mechanism of death from cardiovascular disease is Sudden Cardiac Arrest, which kills over 250,000 people each year. Unfortunately, the national survival rate for Sudden Cardiac Arrest is only 5%, which means that 95% of all Sudden Cardiac Arrest victims die. However, in places with strong Public Access Defibrillation (PAD) programs, the survival rates are substantially higher (~40-70%). This is because for every minute that goes by without defibrillation, a Sudden Cardiac Arrest victim has a 10% less chance of survival (if CPR is not performed, there is a 20% less chance of survival for each minute). Costa Mesa is one of the handful of cities in the nation that has taken a proactive approach to fighting premature death due to Sudden Cardiac Arrest. Back in the mid-2000s, CMFR implemented a City-wide PAD (Public Access Defibrillation) system making AEDs (Automated External Defibrillators) available in all City facilities accessible by the public. Further, CMFR assisted many public and private organizations, such as Orange Coast College and South Coast Plaza, implement their own PAD programs, thus making our community significantly safer for victims of sudden cardiac arrest. CMFR continues to partner and provide our local businesses, schools and broad range of community stakeholders and members with support, information and training with respect to all emergency and disaster preparedness matters.

D. Transcutaneous Pacing

Some people experience cardiac emergencies where their heart beats too slow due to an electrical

problem in the heart's conduction system. When this happens, the brain and other vital organs are deprived of an adequate supply of oxygen rich blood, which can rapidly lead to cardiac arrest and brain death. An important treatment for these patients is a procedure called Transcutaneous Pacing (TCP), in which adhesive electrode pads are placed on the chest, and an electrical current is generated to override the patient's cardiac conduction system and achieve a heart rate sufficient for the patient's needs. Although this procedure has been standard in hospitals for decades, it was not introduced into the prehospital setting until the recent decade. CMFR was one of the first EMS agencies in Orange County to implement Transcutaneous Pacing, which has greatly improved our ability to care for victims of these heart problems.

E. Prehospital Stroke Assessment & Stroke Center Triage

Stroke is the third leading cause of death in the United States, and is a leading cause of disability in the United States (there are currently over 6,400,000 stroke survivors in the United States today). The key to reducing death and disability due to stroke is rapid recognition and rapid triage to a designated Stroke Center hospital. CMFR EMTs and Paramedics were among the first in the County, in conjunction with Hoag Hospital (Newport Beach), to initiate new stroke assessment protocols and triage procedures that continues to afford specialized physicians to remove the blockage in the cerebral blood vessel as soon as possible, thus minimizing the damage to brain tissue due to lack of oxygen, which results in substantially improved quality of life for stroke survivors.

F. Capnography

One of the most important interventions in the treatment of cardiac and respiratory arrest victims is endotracheal intubation, in which a breathing tube is inserted into the patient's trachea. Unfortunately, this procedure involves the potential complications of misplaced and displaced tubes, which may result in the death of the patient and resultant lawsuits. In fact, this is one of the most legally risky procedures performed by paramedics. CMFR paramedics were among the very first in the County to use the technology of Capnography/Capnometry, which allows us to confirm tube placement by measuring the patient's expired carbon dioxide levels: If the tube is properly placed in the patient's trachea, then the cardiac monitor will detect the presence of carbon dioxide, which will be represented by a visible waveform on the monitor screen. The confirmation afforded by the technology of capnography substantially increases intubation success rates while significantly decreasing the liability exposure of the City. CMFR paramedics were also among the first EMS professionals in Orange County to utilize capnography for conscious patients with breathing/respiratory problems to better and more precisely determine their actual pathophysiology and decide on the most appropriate treatment intervention.

G. Intra-Osseous Infusion

All life-threatening emergencies require the administration of medications and/or fluids into the patient's circulation. This is usually accomplished with an intravenous ("I.V.") catheter that is inserted through the patient's skin into a vein. However, sometimes it is not possible to insert an intravenous catheter due to the patient's condition or size. In the past, if paramedics were unable to insert an intravenous catheter, they would be unable to administer life-saving medications and fluids.

As of 2010, CMFR became one of the few EMS agencies in Orange County whose paramedics were trained and equipped to insert a catheter directly into a patient's tibia bone in a process called Intra-Osseous ("I.O.") Infusion, which is often easier to do than intravenous access on critical patients. Paramedics may then administer medications and fluids directly into the patient's bone marrow, from where they rapidly flow into the patient's circulation. Because of the addition of Intra-Osseous Infusion to the paramedic scope of practice, Costa Mesa residents have an exponentially greater chance of receiving life-saving medications and fluids than in the past, when this critical procedure was not allowed in the prehospital setting.

H. Commercially Available Tourniquets

Although the treatment of a life-threatening extremity bleed with a tourniquet is actually a Boy Scout level skill, at the change of the millennium, OCEMS had no protocol dealing specifically with this issue. In fact, it was the CMFR EMS Coordinator who, after meeting with Special Operations personnel with extensive combat experience in the Middle East, added the "Combat Application Tourniquet - CAT" to the CMFR EMS inventory. In the next several years, CMFR was ultimately able to persuade the OCEMS DEAG (Drug & Equipment Advisory Group, which unfortunately no longer exists) to add OCEMS-approved commercially available tourniquets to the official OCEMS mandatory inventory pursuant to OCEMS Policy 325.00 ("ALS Unit Provider Inventory").

I. Emergency Transport Model

Most recently, over the course of the past several years, Costa Mesa has significantly enhanced our emergency ambulance transport system by adding six rescue ambulances and implementing a city (local government) based ambulance transport program, inclusive of both ALS and BLS configurations that are dynamically deployed in the same manner as all of our emergency response resources. This includes now being housed and staffed throughout our six strategically located city fire and rescue stations for optimum emergency response. Costa Mesa has continued to evolve into the most effective and efficient EMS ambulance transport model, incorporating the best advantages of a public-private partnership model for our community, utilizing a combination of EMT-level Ambulance Operators and our own cross-trained professional Firefighter/Paramedics who are completely and dynamically integrated into the Costa Mesa EMS system. The current deployment and transport model has resulted in increased paramedic availability in their designated areas of primary responsibility throughout the city because of the flexibility our model to adapt to the acuity of medical emergencies and treatment needs, as well as increased fire and rescue resource availability. Simply put, Costa Mesa's Emergency Transport Model a shining example of "updating emergency response protocols."

J. Definition of "Patient"

It is worth noting that it was the CMFR EMS Division and EMS Coordinator back in the early 2000s, who literally wrote the official definition of "patient" for our City EMS protocols (with some help from Anne Stratton, RN), that was ultimately formally adopted by OCEMS and is *still used as the official definition in OCEMS protocols for the entire County EMS system.*

There are a wide range of many other examples of CMFR evolving the structure, model, and corresponding protocols of our EMS system according to the changing needs of our city, however the aforementioned items serve to clearly substantiate our conclusion of this finding. Further, while a majority of our emergency responses are EMS-related, many of our EMS responses require additional specialized training and skills for situations such as vehicle heavy rescue that only professionally cross-trained firefighters are qualified to handle. Consequently, every CMFR Firefighter, like all OCFCA Fire/ALS agencies, is cross-trained and certified as an EMT (Emergency Medical Technician), capable of providing BLS (Basic Life Support) emergency medical care. For those patients with more serious problems, the CMFR has 30+ Mobile Intensive Care Paramedics who have received additional training and are licensed to provide ALS (Advanced Life Support) emergency medical care.

One of core elements of CMFR's mission is focused on minimizing death, disability, and injury by optimizing patient outcomes with superior quality medical care by professionally cross-trained firefighters who conduct themselves with *Respect, Integrity and Compassion*. Because, like all branches of medicine, Prehospital EMS is a science that is constantly changing due to advances in concepts, technologies, and procedures, modern day "all-hazard" fire service agencies, such as CMFR, are also continuously adapting, adjusting, evaluating and improving the services we provide according to those changing standards, which includes the updating of all emergency response and related protocols when and where appropriate.

GRAND JURY FINDING #F3

FINDING: ***"ALS staffed ambulances or smaller squad vehicles are often the most appropriate response to medical aid calls and do not compromise the quality of medical care."***

RESPONSE: The City Disagrees Wholly with this Finding.

The goal of emergency medical aid (and any emergency) response is to send the appropriate resource(s) as expeditiously and safely as possible to most effectively manage the emergency, incident or situation identified. As such, we disagree wholly with a "one-size-fits-all" approach to define the most appropriate emergency response for a given emergency, incident or situation.

The deployment of emergency resources should be directly related to the unique community risks, needs and characteristics (e.g., demographics, topography, call history, type of incident reported vs. type of incident/situation found upon arrival, etc.) of each jurisdiction, while being integrated into the broader system of standardization and reciprocity between neighboring and regional jurisdictions. The intent of the Legislature with the creation of the 1980 EMS Act and its clear recognition of the importance of local control was memorialized with all possible clarity §1797.201.

A more appropriate and objective finding would be along the line of ***"ALS and BLS staffed ambulances or smaller squad vehicles are included as part of the many appropriate emergency response apparatus and vehicles (i.e., one of the many valued "tools in the tool***

box") to effectively manage medical aid calls and other emergencies when properly deployed. Thus, a "one-size-fits-all" approach is definitively not an appropriate approach, as the goal of emergency medical aid (and any emergency) response is to deploy the appropriate resource (s) as expeditiously and safely as possible to most effectively and efficiently manage the emergency, incident or situation identified and subsequently found.

For example, a medical aid in the respective Fairview Park or Talbert Park areas would not be effective within Costa Mesa (and Orange County) without a combination response of appropriate resources (i.e., four-wheel drive vehicles, fire apparatus with specialized rescue equipment and tools, and ambulance, etc.). Additionally, in Costa Mesa, and in the fire and emergency services in general, we frequently have emergency medical aids that are the secondary result of a primary incident, such as a vehicle or other technical rescue related accident, which requires specialized expertise of our professionally cross-trained and highly skilled "all-hazard response" firefighters. This is important to note because the value of professionally cross-trained firefighters have the knowledge, skills and abilities to safely and appropriately manage a high risk emergency scene, (i.e., inclusive of the incident management, safety risk management, technical rescue and the medical aid itself, etc.).

Furthermore, the unpredictable nature of calls for emergency medical services (and many emergencies) include the reality that what is initially reported to an emergency dispatch center and/or responding crews is not always the situation found when emergency resources arrive on scene. Some of our most labor-intensive calls for service, such as sudden cardiac arrest, are often reported as falls, syncope, or other well intended, but not clearly accurate descriptions of the emergency. Our deployment model allows us to adapt and provide the appropriate level of emergency service truly needed, with the least amount of emergency response delay.

GRAND JURY FINDING #F4

FINDING: ***"There has been a breakdown of communication and trust between OCEMS and Orange County Fire Chiefs."***

RESPONSE: The City Agrees Wholly with this Finding.

We agree that there has been a breakdown of communication and trust between OCEMS and Orange County Fire Chiefs. Specifically, the breakdown of communication and trust began following the transition of the new OCEMS leadership change in 2019, and to be clear, the breakdown in communication and trust appeared to primarily reside with certain lead managers from OCEMS, not the entire organization.

Prior to that, the OCEMS and the OCFCA had a long established and strong relationship, grounded in mutual respect, trust and collaboration. When EMS matters came up that were disagreed upon and/or needed additional clarification, OCEMSA and OCFCA always worked to find a way to come together and meet to professionally resolve the issue at hand. While each party may have mutually not agreed on a policy, order or decision that was ultimately issued, OCFCA respected the end result, because we were all substantively part of the process.

From the inception of the Mobile Intensive Care Paramedic (MICP) by Article 3 of the California Wedworth-Townsend Paramedic Act of 1970, Orange County residents have received the highest quality pre-hospital emergency medical care through the fire service-based EMS system, that is widely acknowledged as the most effective and efficient utilization of professionally cross-trained emergency resources. Although the fire service-based EMS model demonstrates a wide array of benefits to Orange County residents, CMFR recognizes that the quality of our EMS system is not effective if it is not a comprehensive team effort that depends on all EMS system members and stakeholders who each contribute in different ways that are equally important to the overall success of the system. Accordingly, CMFR's guiding principle continues to be good communication and meaningful collaboration with all of our EMS system partners in the spirit of cooperation and mutual respect, never losing sight or focus on our joint and solemn purpose to humbly and compassionately care for the people of Costa Mesa who we serve.

The Costa Mesa Fire Chief served as the President of the Orange County Fire Chiefs Association prior to, during and following the leadership transition of 2019 and it became abundantly clear that the transition of leadership in OCEMS became adversarial and autocratic in nature, lacking collaboration. The rationale that was provided by the new leadership of OCEMS to the Orange County Fire Chiefs was that OCEMS did not have the staff or the time to regularly meet with the OCFCA on these issues, nor did they need to have the approval of the OCFCA for policy changes. The latter assertion was not one the OCFCA was seeking, the OCFCA was merely seeking collaboration.

Understandably, any leadership transition will have some growing pains, with some grace and space a welcomed component to provide the organization and partnerships time to grow. Unfortunately, in this case, the escalating lack of desire for interpersonal communications, collaboration, and building trust from the new OCEMSA leadership began to get worse instead of improving. One example of this included the OCEMS leadership unilaterally putting out policies and orders without meeting to informally or formally confer with the Orange County Fire Chiefs and/or the OCFCA's EMS subject matter experts, affording the opportunity to provide thoughtful collaborative input in advance of policies being implemented. Instead of viewing and utilizing the OCFCA and OCFCA's EMS subject matters experts as valuable resources and professional partners, the new OCEMS leadership team did not fully utilize the OCFCA and the EMS SME's as valuable resources or subject matter experts thereby inhibiting the development of mutual professional understanding. This exclusionary approach and change in disposition of the OCEMS toward partnering with the OCFCA was not something that was previously observed and/or noted as a point of historical reference. Moreover, it has been broadly communicated that this same approach was indicative of the tone received by other stakeholders, including, but not limited to the Orange County Chiefs of Police and Sheriffs Association as well as the Hospital Administrators, among others. That said, our goal is resolution and one recommendation would be for the OCHCA to reach out to other stakeholders who regularly work with OCEMS (i.e., inclusive a 360-degree evaluation) to determine the breadth and depth of the breakdowns of trust and communication with all partners to help guide a formal memorialized pathway to help rebuild two-way professional collaborations and relationships with OCEMSA and all of their related stakeholders. Despite all of this, the City of Costa Mesa and OCFCA has and will continue to resiliently look for opportunities to build bridges of trust and collaboration where ever

possible.

As another example, during the fall of 2020, during the initial peak of the COVID Pandemic and during the engagement of active wildland fire seasons, OCEMS leadership attempted to push through an update to the Orange County Ambulance Ordinance without effectively notifying the OCFCA or the 34 cities within the County. Again, this was at the peak of the Pandemic and during historic wildfire seasons that this ordinance change became a sudden urgency for OCEMS to bring forward, with no previous communication. As soon as the OCFCA identified that this was happening, the OCFCA actively advocated to collaboratively work through the issue on behalf of the Orange County Fire Chiefs and the California Fire Chiefs, as well as City Managers.

After continued unsuccessful efforts to resolve this issue directly with OCEMS Leadership, the Orange County Fire Chiefs engaged their respective City Managers and/or legal counsels, among others, including the Orange County CEO, Frank Kim and the OCHCA Director Dr. Clayton Chau. After key leadership representing all of the referenced groups came together in a number of different meetings with CEO Kim, OCHCA Director Chau, and members of the OCEMS leadership team, it became clear that the Fire Chiefs and the respective cities intent all centered around that of collaboration and resolution, of which was acknowledged by the outcome of the final meeting and the facilitation by CEO Kim. The Orange County Fire Chiefs and the City of Costa Mesa acknowledged and appreciated the collaborative leadership approach demonstrated by CEO Kim and Dr. Chau, as well as the valued engagement of the City Managers and legal counsels. Subsequently, after all of the stakeholders spent some time working together, including the Orange County Fire Chiefs in direct collaboration with OCEMS, a final draft product was created that was tentatively acceptable to all parties involved. This final draft product now remains in the possession of OCEMS for a final group review before being formally being brought to the Orange County Board of Supervisors for formal approval. Interestingly enough, as of the date of this Grand Jury response, November 2022, the Orange County Fire Chiefs have yet to see any final closure to the ambulance ordinance update. This example is provided to illustrate that the Orange County Fire Chiefs have committed to and will continue to be unwavering in our efforts to build trust, collaboration and partnerships with all stakeholders, including OCEMS.

To that end, and as another example in the spirit of working to rebuild trust and communication, the OCFCA initiated an EMS advisory group established to rebuild that line of communication. The Costa Mesa Fire Chief, on behalf of and under unanimous direction from the Orange County Fire Chiefs, directly reached out to the OCEMS Medical Director with the request and it was ultimately mutually agreed and established.

Lastly, throughout the entirety of the Pandemic, when the OCEMSA and OCHCA were significantly challenged with managing the impacts of COVID and the Pandemic, the Orange County Fire Chiefs and the Orange County Fire Service took the initiative and stepped up to take a lead role in managing a number of areas, including, but not limited to establishing the first vaccination point of dispensing (POD) sites, and thereafter, the super POD vaccination sites, all from the tip of the spear and all while still serving their respective communities throughout the duration of the Pandemic, infused with thoughtful communication, trust, collaboration, compassion and partnership.

Lastly, here are a few narrative summaries that are of importance to acknowledge and highlight:

A. Medical Control - Whereas the various Fire Service agencies have the sovereign legal authority over the *administration and operational* control of prehospital EMS within their respective jurisdictions (HSC §1797.201), the LEMSA maintains absolute legal authority over *medical* control. "Medical control" is statutorily defined as, and expressly limited to, "the *medical* management" and the "*medical* direction" of the EMS system, in other words, decisions and actions that directly impact patient care such as assessment, treatments/interventions, and transport destination decisions (HSC §§ 1797.90, 1797.220, 1798(a), 1798.8). NOTE: *Costa Mesa and/or CMFR has not ever challenged the Medical Control authority of our LEMSA.*

B. EMS Protocols - The main statutory mechanism for a LEMSA to exercise its medical control authority is through written EMS protocols (i.e., polices, procedures, guidelines, standing orders, etc.) that are the basis for all field patient care-related decisions and actions and, therefore, represent the standard of care against which prehospital personnel will be judged in any administrative or civil legal action, and in any disciplinary action initiated by the LEMSA, Base Hospital, or employing agency. Consequently, for EMS protocols to be valid, effective, practical, and equitable, they must:

1. Comply with the letter, intent, and spirit of federal and state law, in addition to accepted medical principles and standards; and

2. Be written with sufficient clarity and in a logical format so that the average prehospital professional can reasonably understand what is expected and how to comply; and

3. Provide the minimal direction necessary to guide/achieve the desired decisions and actions, while affording the maximal reasonable flexibility to account for the volatile and unpredictable nature of the prehospital environment, as well as to avoid unnecessarily exposing the EMT/Paramedic and employing agency to undue or excess legal liability.

C. Fire Service Compliance - The Orange County Fire Service (and the California Fire Service), including CMFR, has a consistent history of respecting the authority of the LEMSA Medical Director and abiding by the medical guidance of the LEMSA and Base Hospital physicians and nurses who represent the Medical Director, including following all LEMSA protocols in good faith to the best of our ability. This is especially true in the Orange County EMS System, where the Fire Service and OCEMSA, in conjunction with the various Base Hospitals, have always worked very closely together with an open and constructive dialogue for the benefit of our patients. We are not aware of any time in the past decades where an Orange County Fire Service agency challenged the actual Medical Control of our LEMSA, though state history is replete with examples of many LEMSAs-and even the state EMS Authority (EMSA) itself-that had to be addressed with legal action.

This legal action was taken due to their attempts to expand the definition of "medical" control with the utilization of illegal "underground regulations" to undermine the authority of local

jurisdictions and the communities they represent. Specifically, the Sacramento Superior Court entered judgment <https://wlelaw.com/wp-content/uploads/2020/08/Conformed-Judgment.pdf> on behalf of the California Fire Chiefs Association (CalChiefs) and issued a peremptory writ of mandate <https://wlelaw.com/wp-content/uploads/2020/08/Peremptory-Writ-of-Mandate-ISSUED.pdf> against the California Emergency Medical Services Authority ("EMSA"), in *California Fire Chiefs Association Inc. v. California Emergency Medical Services Authority*, No. 34-2019-80003163. CalChiefs, a professional association for more than 800 fire service agencies across the state, alleged that EMSA, the State of California's regulatory agency for EMS had been operating in violation of mandatory state law for at least 30 years. CalChiefs' verified petition for writ of mandate and complaint for declaratory and injunction relief <https://wlelaw.com/wp-content/uploads/2020/08/CalChiefs-Petition-and-Complaint-re- alleged, among other things, that EMSA's rules implementing two key statutes regarding local governments' provision and administration of EMS and ambulance services were void "underground regulations" because they had not been lawfully adopted pursuant to California's Administrative Procedures Act ("APA"). The Hon. Laurie M. Earl, Judge of the Superior Court agreed, declaring that EMSA's rules were void "underground regulations" and commanding EMSA to cease enforcing its invalid rules until and unless the state agency properly adopts the rules in compliance with the APA. Judge Earl also concluded that CalChiefs should be allowed to petition for an award of its attorneys' fees for bringing an action to vindicate important public rights (Schouten, 2020).

The good news is that the relationship between the California fire service and the state EMSA has begun the transition to a more collaborative partnership, much credited to both sides working closely together since the arrival and formal appointment of Elizabeth "Liz" Basnett to the position of Acting Director of the state EMSA in November of 2021. Since her arrival, EMSA and the California fire service have been working closely together with all of the statewide EMS stakeholders to rebuild the professional relationships and trust, including the development of an inclusive strategic planning process. It is our hope that this model and approach can be embraced and integrated in the same manner with our OCEMSA.

D. Fire Service Input - It is a true statement that the LEMSA Medical Director has no legal obligation to seek advice or approval from any EMS provider agency when modifying (i.e., creating, revising, deleting) EMS protocols, even though such a change may have a substantial impact on the administrative and operational planning of EMS provider agencies and their cities, including significant financial burdens on the citizen taxpayers who fund those agencies. Nonetheless, due to the many and diverse ramifications of protocol modification, and to ensure that the patient care goals of the Medical Director are accurately conveyed to, and understood by, field personnel, input and feedback from the EMS provider agencies that must comply with the protocols is highly recommended. CMFR is grateful for the fact that the OCEMSA has historically been very collaborative with the fire service and all other EMS system members by not only allowing, but actively seeking meaningful input whenever protocol modification or system improvement decisions were being considered. This commitment to strong teamwork and professional partnership is clearly evidenced by our county EMS history in terms of collaborative and effective protocol modification. From the early 2000s under Dr. Bruce Haynes' OCEMS administration, through Dr. Samuel Stratton's OCEMS administration, and well before that, Orange County was literally known as one of the

most effective and synergistic amongst the many other counties and LEMSAs in California. This is because the OCFCA, OCEMSA, and other EMS provider agencies have traditionally worked together in a manner of great cooperation, collaboration, teamwork, support, and in good faith, even when there was disagreement. However, with the exit of the Dr. Stratton administration, this dynamic of strong teamwork and highly productive collaboration changed dramatically for reasons still unknown to us.

E. OCFCA EMS Section - To further ensure that the Orange County Fire Service continues to meet the goals and expectations of the OCEMS Medical Director, as well as to provide the OCEMS Agency practical input to help ensure that those goals and expectations are effectively translated to the field, decades ago OCFCA established a sub-committee called the "EMS Section," which is composed of all the EMS Coordinators from the various Fire-Rescue 911 ALS Provider agencies, as well as other Fire agency members in EMS-related positions. EMS Section meetings are routinely attended by Fire agency members, OCEMSA officials, Base Hospital Coordinators, and other EMS system representatives for the purpose of maintaining good communication and strong collaboration in our joint efforts to maintain and improve our high quality of patient care. In the post-Stratton era, amidst the challenges with OCEMSA and the OCFCA, the OCFCA EMS Advisory Group (EMSAG) was created after being initiated by the OCFCA. Although EMSAG and OCEMS has had limited success in its meetings and making progress, it is our desire and hope that EMSAG and OCEMSA continue to foster and build a valuable foundation to work from in the future, per the intent of the group's formation.

In closing, while we agree with this finding, CMFR and the OCFCA will continue to resiliently look for opportunities to build bridges of trust and collaboration in every way possible including, but not limited to:

1. Re-establishing and re-building the decades-long collaborative relationship between the OCEMSA and the Orange County Fire Service agencies that comprise the County EMS system in furtherance of our joint mission to provide optimal patient care and outcomes for the people who we serve.

2. Facilitate open lines of collaborative communication between OCEMSA and the Orange County Fire Service on all matters that impact the County EMS System.

GRAND JURY FINDING #F5

FINDING: ***"Over-deployment of firefighters for medical calls contributes to the current climate of forced hiring and firefighter fatigue."***

RESPONSE: The City Disagrees Wholly with this Finding.

Costa Mesa Fire & Rescue does not engage in an "over-deployment" of firefighters for medical calls. Costa Mesa Fire & Rescue has a robust and dynamic deployment model that is continually being monitored to make any necessary adjustments. Most importantly, Costa Mesa always places the health and safety of our professional firefighters as a highest priority.

Appropriate staffing is a necessary aspect of every public safety staffing model, in some way, shape or form. Simply put, we need to have sworn and trained public safety professionals on duty at all times, based on the community needs and risks of each jurisdiction served. Therein, different variables impact the need for forced hiring, including, but not limited to no firefighter voluntarily signed up to work the overtime; rank specific or department-wide staffing gaps; lack of budgeted and approved sworn and trained public safety positions consistent with the needs of the community; local, regional, statewide or national emergencies, or special circumstances. At this time, Costa Mesa does not have any staffing gaps and the city is currently in the midst of evaluating our Standards of Coverage for the City, as well as entering into the final stage of implementing a new five-year strategic plan.

Lastly, firefighter fatigue has been a noted discussion point over the past few years, regionally, statewide and nationwide, primarily due to the extraordinary role that professional firefighters take on every day in answering the call for any and every emergency, from historic wildfires to the COVID Pandemic to the day to day emergencies and operations on all fronts. As an example, from the onset of the COVID Pandemic throughout its peak and wind down phase, professional firefighters, emergency responders and healthcare workers remained on the front lines, start to finish, without pause or hesitation. With that in mind, mental and behavioral health for firefighters, all public safety personnel and healthcare workers needs to remain a highest priority for all levels of government.

GRAND JURY FINDING #F9

FINDING: ***"OCEMS has the authority and responsibility to inspect all for-profit ambulances operating in Orange County; however, publicly owned ambulances are not automatically subject to OCEMS oversight."***

RESPONSE: The City Agrees Partially with this Finding.

Costa Mesa agrees that "OCEMS has the authority and responsibility to inspect all for-profit ambulances operating in Orange County." However, the second part of the finding that "…publicly owned ambulances are not automatically subject to OCEMS oversight" would read more appropriately as follows: "…publicly owned ambulances are not automatically subject to OCEMS oversight *as it relates to areas exclusive of medical control*."
To that end, all other responsibilities, risks and rights are held with and through the City of Costa Mesa, as legally and lawfully memorialized by state, county, and local statute (HSC §1797.201). We agree that OCEMS does not currently inspect publicly owned ambulances.

For further clarification purposes, Costa Mesa agrees that all EMS entities, public and private, including CMFR, are statutorily required to comply with all LEMSA *medical control* protocols, including, but not limited to the mandatory medical inventory, medications, supplies and equipment of ambulances (i.e., OCEMS Policy 300 - Medical Control; specifically, Policy #325.00 - Advanced Life Support (ALS) Provider Unit Minimum Inventory). However, it is not under the authority and responsibility of the OCEMSA to determine other areas outside of that statutory and regulatory purview, including, but not limited to our emergency response deployment model or determine vehicle related requirements with no defined nexus to medical control (e.g., apparatus/vehicle type,

apparatus/vehicle permitting, wheel size/brand, fuel used, etc.).

The City of Costa Mesa welcomes and encourages OCEMS to inspect our ambulances, stations, or EMS system, in alignment with the aforementioned response and in alignment as evidenced by the efforts of collaboration outlined in the City's response to the Grand Jury Finding 4, detailing the Orange County Ambulance Ordinance meetings with OC CEO Frank Kim and OCHCA Director Dr. Clayton Chau. As an interesting side note, specific to this finding and given the time and effort the Grand Jury placed on preparing this comprehensive report, it was surprising that there was no inclusion of information or discussion on the significant issues related to OCEMSA's Orange County Ambulance Ordinance update.

GRAND JURY RECOMMENDATION #R1

RECOMMENDATION: ***"By 2024, all Orange County fire agencies utilize criteria-based dispatch protocols and send a single response to those incidents triaged as non-life-threatening (BLS)."***

RESPONSE: The recommendation of utilizing criteria-based dispatch protocols has already been implemented.

Costa Mesa's dispatch center (CMCC/Costa Mesa Communications Center) is a joint Police/Fire Emergency Communications Center. We have historically mirrored, and continue to use, the King County Washington Criteria Based Dispatch (CBD) Guidelines as adapted by and modified for the Orange County Fire Authority. Thus, Costa Mesa continues to use CBD dispatching, inclusive of determining the most effective, efficient and viable deployment of emergency resources, based on the community risks and needs and all established through local policy (HSC §1797.201) of the City Council, under approved recommendations of the City Manager and Fire Chief. NOTE: Please review the response summaries to F1 & F3 for further detail.

GRAND JURY RECOMMENDATION #R4

RECOMMENDATION: ***"While OCEMS should recognize how certain policy changes may pose operational challenges to emergency responders in the field, fire leadership should recognize and respect the independent oversight authority and expertise of OCEMS."***

RESPONSE: This Recommendation Has Already Been Implemented

Costa Mesa Fire Leadership recognizes and respects the expertise and authority of OCEMSA as our standard operating practice, highlighted by the acknowledgement of OCEMSA's authority as it pertains to *medical control*. NOTE: Please review the response summaries to F4 & F9 for further detail.

GRAND JURY RECOMMENDATION #R5

RECOMMENDATION: ***"Departments with public owned ambulances should allow OCEMS to inspect their ambulances for compliance with State EMS guidelines and adopt OCEMS recommendations."***

RESPONSE: This Recommendation Has Never Been Denied.

As previously shared, Costa Mesa remains committed to meet and exceed all State and OCEMS guidelines, policies and statutory requirements related to our public owned ambulances, in alignment with OCEMS authority of medical control and the City's legal, statutory, and regulatory rights, including, but not limited to the California Health & Safety Code, Section 1797.201 and the City of Costa Mesa's Municipal Code. Moreover, this recommendation was addressed through a number of meetings related to resolving the updates to the Orange County Ambulance Ordinance, including a final summary meeting with clear consensus on how we would proceed with a mutual agreement of under of understanding. The final meeting included representatives from the Orange County Fire Chiefs, including the Costa Mesa Fire Chief, representatives from the Orange County City Managers, OCEMSA Leadership, OCHCA Director Dr. Clayton Chau and Orange County CEO Frank Kim. NOTE: Please review the response summaries to F4 & F9 for further detail.

ALTERNATIVES:

The City Council has the following options:

1. Approve staff's recommendation; or
2. Provide alternative direction

FISCAL REVIEW:

There is no financial impact as a result of the Grand Jury Report responses.

LEGAL REVIEW:

The City Attorney's Office has reviewed and approved this report as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goal:

- Strengthen the Public's Safety and Improve the Quality of Life

CONCLUSION:

Staff recommends the City Council authorize the City Manager and Fire Chief to respond to the Presiding Judge of the Superior Court concerning the findings and recommendations made by the Orange County Grand Jury Report. 2021-2022.

ORANGE COUNTY GRAND JURY
700 CIVIC CENTER DRIVE WEST • SANTA ANA, CALIFORNIA 92701 • 714/834-3320
www.ocgrandjury.org • FAX 714/834-5555

May 16, 2022

Dan Stefano, Fire Chief
City of Costa Mesa
77 Fair Drive
Costa Mesa, CA 92626

Dear Chief Stefano:

Enclosed is a copy of the 2021-2022 Orange County Grand Jury report, **WHERE'S THE FIRE? Stop Sending Fire Trucks to Medical Calls.** Pursuant to *Penal Code* 933.05(f), a copy of the report is being provided to you at least two working days prior to its public release. Please note that under that subsection, "No officer, agency, department, or governing body of a public agency shall disclose any contents of the report *prior to the public release of the final report.*" (Emphasis added.) It is requested that you provide a response to each of the findings and recommendations of this report directed to your office in compliance with *Penal Code* 933.05(a) and (b), copy enclosed.

For each Grand Jury recommendation accepted and not implemented, provide a schedule for future implementation. In addition, by the end of March of each subsequent year, please report on the progress being made on each recommendation accepted but not completed. These annual reports should continue until all recommendations are implemented.

Please mail the response to the recommendations to Erick L. Larsh, Presiding Judge of the Superior Court, 700 Civic Center Drive West, Santa Ana, CA 92701, with a separate copy mailed to the Orange County Grand Jury, 700 Civic Center Drive West, Santa Ana, CA 92701, no later than 60 days after the public release date, May 20, 2022, in compliance with *Penal Code* 933, copy enclosed. The due date then is July 20, 2022.

Should additional time for responding to this report be necessary for further analysis, *Penal Code* 933.05(b)(3) permits an extension of time up to six months from the public release date. Such extensions should be advised in writing, with the information required in *Penal Code* 933.05(b)(3), to the Presiding Judge of the Superior Court, with a separate copy of the request to the Grand Jury.

We tentatively plan to issue the public release on May 20, 2022. Upon public release, the report will be available on the Grand Jury website at www.ocgrandjury.org.

Very truly yours,

Gwen P. Isarowong, Foreperson

WHERE'S THE FIRE?

Stop Sending Fire Trucks to Medical Calls

WHERE'S THE FIRE?

Stop Sending Fire Trucks to Medical Calls

SUMMARY

In Orange County, nearly 80 percent of all 911 calls to fire departments are for medical services. Efficient and effective responses to 911 calls are of utmost importance to every community. Even though 911 calls are categorized by severity, responses by most Orange County fire departments do not change accordingly. Current protocol requires sending multiple vehicles to the scene which involves not only additional personnel but also expensive fire equipment. This is the case even when an ambulance or rescue squad vehicle could provide all the necessary medical supplies and personnel. Sending a 36,000 to 60,000-pound fire engine or aerial ladder truck down residential streets for strictly medical calls is not only dangerous and costly, but it also results in unnecessary wear and tear on our streets.

Our Orange County firefighters perform an exemplary job under extremely stressful circumstances. They often work compulsory overtime hours. After considering the demands placed on our firefighters and the importance of optimizing efficiency while maintaining a high level of care and response time, the Orange County Grand Jury recommends the following: Fire departments implement a universal tiered response system to dispatch ambulances or rescue squad units to most medical calls rather than deploying larger fire equipment as the standard response.

While the Orange County Grand Jury sees distinct advantages to separating EMS from Fire response, we are not currently recommending privatization of medical services. We applaud the level of care provided by all paramedics, including firefighter paramedics. The Orange County Grand Jury does recommend, however, that the emergency medical services response model should change.

This investigation also revealed a breakdown in communication and trust between Orange County Emergency Medical Service (OCEMS) and OC Fire Chiefs, which includes Fire Chiefs of the Orange County Fire Authority (OCFA) and various city fire departments. Although their mandated responsibilities are clear, there is a mutual reluctance to acknowledge their respective spheres of authority, in particular the critical role of OCEMS as an independent regulatory body.

BACKGROUND

The Evolution of Fire Departments Providing Medical Services

Over 100 years ago, organized firefighting in America was established primarily to guard against loss of property. Prior to the 1970s, emergency medical calls were transferred to either private ambulance companies or hospital ambulance companies. By the 1970s, the number of calls for

fire service declined due to the development and enforcement of stringent building codes and fire prevention systems. As a result, the role of local fire department has changed substantially.

In conjunction with the development of the 911 emergency call system, fire departments broadened their service models and capabilities, creating an all-hazards approach to emergency services delivery. The strategic location of firehouses throughout their service area made them a logical choice to respond to time critical calls. Fire departments now respond to any number of emergencies, including but not limited to traffic collisions, hazardous spills, cat rescues, and natural disasters as well as fires. However, 80 percent of all calls are for medical assistance.

An Explanation of Acronyms

This report looks at the ways in which fire departments respond to and provide emergency medical services (EMS). There are two levels of support systems in any kind of medical emergency: Basic Life Support and Advanced Life Support.

Basic Life Support (BLS) generally refers to the type of care that first-responders, healthcare providers, and public safety professionals provide to anyone who is experiencing a non-life-threatening medical event. BLS treatment is noninvasive and is usually performed by an Emergency Medical Technician (EMT).[1]

Advanced Life Support (ALS) is a response to critical care patients who may require invasive procedures such as injections, intubation, or the administration of medication. Due to the more severe nature of the patient's condition, ALS calls require a response from a crew that includes ALS-certified responders, specifically paramedics. All paramedics, including firefighter paramedics, are required to undergo a higher level of training than EMTs. Paramedics are trained to administer drugs, intubate patients, and insert IVs. EMTs are not certified to perform these procedures.

California's EMS Act authorizes each county to develop an EMS program and to designate a local Licensed Emergency Medical Services Agency (LEMSA) that oversees the delivery of EMS within that geographic area. This level of governance allows for local control of emergency medical services. In Orange County, the LEMSA is the Orange County Office of Emergency Medical Services (OCEMS) which operates under the Orange County Health Care Agency. OCEMS is responsible for the oversight of licensing all BLS and ALS responders, the management and inspection of privately owned ambulances, and the creation of response protocols including mass casualty incident response plans.

---

[1] California Emergency Medical Services "Scope of Practice," (November 2017).

A Paramedic Assessment Unit (PAU) provides initial field paramedic assessment and interventions utilizing a minimum of one qualified paramedic and an EMT. A PAU may escort, monitor, and treat patients during transport to a hospital in accordance with that paramedic's provider agency policy.[2]

REASON FOR THE STUDY

Previous studies within Orange County and elsewhere have come to the same conclusion: there is an over-deployment of equipment and personnel for non-life-threatening emergency medical calls. For example, in 2014, the OCFA commissioned Emergency Services Consulting International to conduct a study on OCFA deployment. One of their recommendations is as follows:

> To improve the overall response performance of the OCFA delivery system the number of units sent to most emergency medical incidents must be reduced. Criteria-based dispatch (CBD) protocols could be implemented allowing a single unit response to most emergency medical incidents.[3]

Furthermore, as part of the Anaheim Fire & Rescue 2015-2020 Strategic Plan, at page 25, it was recommended that a Community Care Response Unit be established as "an alternative and innovative response model that will deploy a single vehicle utilizing a nurse practitioner and paramedic to respond to non-urgent call requests in place of a standard paramedic engine/truck and ambulance unit response."

Grand Juries in Orange County (2011-12) and Santa Clara County (2010-11) both delivered the same message in their reports: re-evaluate your response model to enable an appropriate EMS response, thereby reducing costs and equipment wear and tear.

Despite all these recommendations, the response deployment for medical calls remains substantially unchanged. This Grand Jury will revisit concerns about the expensive deployment of fire equipment and personnel for routine medical calls.

CONFIDENTIAL

METHOD OF STUDY

To understand the structure, staffing, and response models for various fire departments within California, as well as the relationship among the fire agencies and OCEMS, the Orange County Grand Jury engaged in the following:

- Reviewed statutes, articles, ordinances, reports, OCFA Memorandum of Understanding (MOU), and commissioned studies.
- Interviewed OCFA leadership, Fire Chiefs inside and outside of Orange County, City Managers, personnel from OCEMS, private ambulance company executives, and firefighter union leadership.
- Reviewed a large volume of material from various relevant websites.
- Reviewed OCFA Board of Directors and various City Council meeting minutes, agendas, and staff reports related to fire and medical services.
- Toured OCFA Headquarters and Training facility.
- Reviewed multiple written communications, deployment protocols, annual reports, and financial reports.

INVESTIGATION AND ANALYSIS

The Vast Majority of 911 Emergency Calls Routed to Fire Stations Are Medical in Nature

OCEMS data, as well as most fire department representatives interviewed, agree that of all 911 calls routed to a fire department for response, at least 80 percent are for EMS; the lowest figure provided was an estimated 75 percent. In areas with older demographics, the EMS percentage of medical calls as opposed to other emergencies is even higher. At least one fire department reported that nearly 90 percent of its calls are purely medical in nature. Furthermore, it has been estimated that up to 80 percent of those EMS calls can be classified as BLS.[4]

In an OCFA-commissioned comprehensive study, it was reported in 2018 that OCFA responded to 139,287 incidents of which 77.39 percent were EMS. Only 1.47 percent of the 911 calls routed to OCFA stations were dispatched as fire calls.[5] The remaining 21.14 percent were classified as "other," which included calls for persons in distress, smoke, odor problems, hazardous conditions, electrical wiring arcing, false alarms, children or pets locked in cars, and calls that

[5] Citygate, Associates, Inc., *Standards of Coverage Service Level Assessment OCFA,* p. 53 (June 30, 2020).

were resolved prior to OCFA arrival. Consistent with this report, the OCFA Comprehensive Annual Financial Report for fiscal year ending June 30, 2021, provided statistics showing that out of the 152,289 emergency calls directed to OCFA, close to 75 percent were classified as EMS, while only 1.7 percent were considered fire calls.

Orange County Fire Departments and Personnel

Orange County cities are either part of the Orange County Fire Authority or have their own independent fire departments. Founded in 1995, the OCFA is a regional fire service agency that currently serves 25 cities in Orange County and all its unincorporated areas. The OCFA protects nearly two million residents with 77 fire stations located throughout Orange County. The nine Orange County cities that are not OCFA members each have a separate fire department and collectively protect approximately 1,187,000 residents. These independent cities include Anaheim, Brea/Fullerton, Costa Mesa, Fountain Valley, Huntington Beach, Laguna Beach, Newport Beach, Orange, and Placentia.

OCEMS has established a minimum requirement that one paramedic and one EMT respond to EMS calls. It is left up to the individual fire departments to determine how to deploy personnel and whether to exceed these minimum staff requirements. According to several OCEMS employees and its written protocols, one paramedic and one EMT are sufficient to provide appropriate care in response to an EMS call.

In its June 4, 2019 presentation "Consideration of Placentia Fire and Emergency Service," the City of Placentia reported that out of 43 fire departments surveyed in Los Angeles, Orange, and Riverside Counties, 27 departments (67 percent) utilize a three-person engine crew. This was the most common standard among the three counties. San Bernardino County and several Orange County cities (including La Habra, Laguna Beach, and Huntington Beach) also allow three-person engine companies. OCFA and several other independent fire departments within Orange County staff their engines and trucks with four-person crews.

Different Areas, Different Needs

Based on local demographics, geographic features (for example: beaches vs. forest areas), and other community differences, the needs of various individual communities are radically different. Fire Station 22, located in Laguna Woods, serves a median resident age over 78 years old which results in a very high number of medical responses. Fire Station 2, located in Los Alamitos, operates within a very different demographic and a service territory that includes beaches, a large military installation, as well as a large retirement community. And Station 18 in Trabuco Canyon provides services to a wildland area as well as a 'suburban' area with a much lower age demographic than Fire Station 22. Different equipment and staff deployment models are

warranted for each environment. The OCFA approach appears to be to add 'engines and trucks' to provide service, rather than taking a much more tailored approach. The trend within OCFA has been to remove Paramedic Squad units and replace them with Engines and Trucks.

Anatomy of a Medical Call: Dispatch to Response.

The goal of any emergency responder is to arrive on site quickly with the appropriate equipment and personnel needed to handle the emergency. The goal of a tiered dispatch system is to match the emergency with the appropriate level of response in terms of urgency, personnel, and equipment.

The most well-known of the tiered dispatch systems is the Clawson system of priority dispatch. Emergency medical dispatchers use call screening to determine what level of response is required by determining what Clawson refers to as the four commandments of medical dispatch: 1) chief complaint, 2) approximate age, 3) status of consciousness, and 4) status of breathing.

Several of the independent city departments are members of Metro Cities Fire Authority, also known as Metro Net Fire Dispatch or Metro Net, a joint powers agency that provides professional dispatch services for fire and emergency medical services. Metro Net uses a modified version of the Clawson model software to triage medical calls. Once it has been established that the call is for medical services, the dispatchers use a software package to walk through triage questions.

OCFA uses a severity model based loosely on the Clawson system for assessing medical emergency calls. Dispatch employees make a preliminary determination as to the nature and severity of the medical emergency through a series of carefully designed questions and computer applications. However, regardless of the preliminary assessment, a full ALS response is dispatched. This means that an engine or truck staffed with four personnel, often in partial or full firefighter turnout, is dispatched, at least two of whom are paramedic/firefighters. A transport ambulance with two EMT trained attendants is also dispatched, regardless of the classification of the medical emergency.

Firefighter Fatigue

Overworked and fatigued firefighters have been the topic of several articles and commentaries in counties throughout the State, and Orange County is no exception. There are staff shortages due to retirements. Firefighters have been forced to take extra shifts when voluntary coverage is not available. This can occur when firefighters are out ill, injured, on workers' compensation, or

absent for personal reasons. Absences have been exacerbated by the COVID pandemic and the increased prevalence of wildfires. According to the OCFA, "The volume of vacant shifts is substantially exceeding the overtime our firefighters wish to work."[6] As publicly explained by OCFA Fire Chief Brian Fennessy, "Workplace burnout is an occupational phenomenon marked by exhaustion, negativity to one's job, and reduced professional efficacy."[7]

Compulsory overtime work, often referred to as "forced hiring," is not new. While an increase in wildfires as well as the various reasons described above contribute to the firefighter shortage, routinely and unnecessarily sending out fire engines and trucks with the fire personnel required to staff that equipment is also a contributing factor. Using ambulances and other similar paramedic assessment units (PAUs) or paramedic squad units that are more efficient, nimble, and less personnel-intensive would substantially reduce the demand on firefighters leading to a reduction in work time and stress for on-duty firefighters. This is especially important when they are working compulsory overtime.

The Different Approaches to EMS Response in Orange County

Independent City Fire Departments

Several long-established cities in Orange County have independent fire departments. Examples include Anaheim Fire and Rescue, Huntington Beach Fire Department, Fullerton Fire Department, and Laguna Beach Fire Department. Most of these departments utilize Metro Net (described above) as their dispatcher. Even though medical priorities are evaluated by the Metro Net dispatcher, in most cases an engine or truck with firefighter/paramedics is dispatched to the incident, along with an EMT ambulance, regardless of the severity of the medical call. OCFA and Metro Net communicate when necessary.

To avoid competition and to ensure quality of service, OCEMS is also responsible for contracting qualified ambulance companies to service a particular geographic area, known as Exclusive Operating Areas (EOA) for patient transport to hospitals. However, some cities can own and operate ambulances that are not subject to the EOA ambulance agreements provided by OCEMS. Under California law, only cities that had their own ambulance services prior to 1980 (including cities served by OCFA) have the option of purchasing or contracting for their own ambulances. Those cities may also contract with private ambulance companies independently of OCEMS.

---

[6] OC Register, Saavedra, T. and Licas, E., *"OCFA Firefighters Burned Out By Overtime"* (Oct. 29, 2021).
[7] *Ibid.*

Huntington Beach and Anaheim are two examples of this. Both cities deploy city-owned and operated ambulances which are based in fire stations; however, not all fire stations have ambulances. Where available, the ambulance rolls concurrently with the fire apparatus and typically arrives at the same time. The consensus among those interviewed indicated that this is a far better scenario in terms of overall response than relying on contracted private ambulances. There are also significant economic and long-term staffing advantages associated with this model. One example is that having EMTs working within the fire department serves as a pipeline for developing qualified firefighter paramedics. A disadvantage, however, is that city-owned ambulances are not subject to required inspection and approval by OCEMS, which the Orange County Grand Jury finds problematic.

Other benefits to cities able to operate their own ambulances are potential economic and service advantages for residents. In those cases, fees for ambulance services are payable to the city either by individuals or through medical insurance. Those fees typically offset the costs and, in some cases, provide marginal revenue. That excess revenue can be then provided to the overall city Fire/EMS department budgets to enhance services.

Most of the independent city fire agencies within Orange County offer a paramedic subscription service for residents and local businesses. An annual fee (around $60 per household) provides "free" paramedic services to subscribers. Otherwise, there is a per-call fee charged which is not typically covered by health insurance companies. Huntington Beach, Fountain Valley, and Anaheim are examples of cities with subscription paramedic services. The fees cover many of the fire department costs for paramedic services within the jurisdiction.

San Bernardino County Fire Protection District

For comparison, San Bernardino County uses a staffing model like many other counties in the state. Engines are staffed with a crew of three: a captain, an engineer, an ALS paramedic/firefighter. The captain and engineer are BLS certified. Each engine is considered an ALS response unit. In some areas, depending on budget, there may be an additional paramedic squad unit staffed by an ALS certified paramedic/firefighter and a BLS certified firefighter. These units can participate in rescue activities and carry appropriate rescue equipment. Contract EMS ambulances are provided in parts of the service territory by a private provider while the other areas are covered by the San Bernardino County Fire Protection District Ambulance Operator Program which staffs ambulances with a single function paramedic as well as an EMT.

Dispatch is staffed by Emergency Medical Dispatch (EMD) certified personnel. Each medical call is screened to determine its category and severity. Based on that screening, appropriate response units are dispatched. Typically for a critical situation an engine and an ambulance will

be dispatched Code 3 (lights and sirens). In situations that are deemed to be less critical, the response can be a single unit or a transfer to a nurse's hotline. Their current MOU allows for single paramedics on engines, squads, or aerial ladder trucks.

Placentia Model for EMS – A New Approach

Due to severe economic pressures, in 2019 the City of Placentia notified OCFA that they would be withdrawing from OCFA and forming their own fire department. To save money and become more efficient, Placentia separated the paramedic EMS response team from its Fire Department personnel and contracted with a private ambulance company to deliver EMS paramedic services.

Placentia also decided to keep dispatching responsibilities within its Police Department which receives all 911 calls. The police dispatcher determines whether the police, the Fire Department, a private ambulance EMS unit, or some combination thereof (as in the case of a serious traffic accident) should be dispatched to respond. Based on preliminary reports, the system is efficient and results in faster EMS responses, especially for coronary and stroke cases.[8] This is attributed in large part to the fact that "turnout time" for fire equipment and firefighter personnel (listed at over three minutes and 30 seconds for OCFA) is essentially eliminated with this model. Preliminary statistics show that not only have City costs have gone down, the time taken to appear on site for an EMS call also has been reduced by four minutes, from 9.5 to 5.5.[9]

Despite the positive results and cost savings, Placentia has withstood considerable criticism as well as a lack of cooperation from OCFA and its union.[10] The cost savings could be partially attributed to several factors: its very small geographical area; fewer wildland fires to contend with; no fast-water rescue requirements; and the City's firefighters do not earn the same salary or benefits that OCFA firefighters enjoy. From a cost perspective, why should they be charged by OCFA for services they do not require? Placentia should receive credit for attempting (and in many ways delivering) a new and better approach to EMS.

Orange County Fire Authority

As noted above, OCFA makes an initial determination as to the nature and severity of the medical emergency. Regardless of the preliminary assessment, a full ALS response is dispatched. This means that an engine or truck company, staffed with at least two paramedic/firefighters, two EMT trained firefighters, and a transport ambulance with two EMT trained attendants is sent to the scene. While this approach means less time is spent with the caller before the dispatch for services occurs, it also results in a minimum of six people and two vehicles being dispatched for all EMS calls, even for minor medical events. The OCFA MOU with the firefighter's union specifies a minimum of two paramedic/firefighters on each ALS unit.

OCEMS agrees that a single PAU unit staffed with a paramedic and EMT provides the service needed for most types of emergency medical calls if the requests for service are properly triaged and dispatched based on medical priority.[11]

In a 2014 OCFA-commissioned report,[12] recommendations included the following:

> Formally establish "criteria based" dispatch protocols to allow a single unit response to those incidents triaged as non-life threatening. Staff the majority of fire engines with three personnel, one of whom is a paramedic; in areas considered hard to cover, or those lacking an effective response force coverage (for example areas covered by stations 40 and 53), staff fire engines with four persons, two being paramedics. Response to a life-threatening incident would be two units.
>
> For nonlife-threatening incidents, any response unit can be dispatched. If for example, a squad and engine are both available and the same distance from the incident the squad can be dispatched preserving the engine in the event of a fire incident.

Because over 75 percent of all fire dispatch calls are for medical emergencies, dispatching an ALS response with a truck or engine to every emergency medical call does not make sense and results in a consistent over-deployment of equipment and personnel.

Avoiding the dispatch of fire engines and trucks offers an additional advantage. If one (or both) of the responding firefighter/paramedics must accompany the patient in the ambulance to the hospital, then their engine typically follows the ambulance to the hospital. The fire engine and its crew must wait until the hospital staff takes charge of the patient and releases the paramedic to

---

[11] OCEMS Policy #330.70

[12] Emergency Services Consulting, *OCFA Standards of Coverage and Deployment Plan*, pp. 146-47 (2014).

rejoin their unit. The time the engine or truck is out of service waiting for the firefighter paramedic to be released is referred to as "wall time." COVID-19 has made wall time longer as many emergency rooms have not been able to deal with the high volumes of patients, resulting in much longer wait times and potential degradation of service.

Within OCFA's jurisdiction, there are at least two geographic areas with even higher medical emergency call volumes. One such area is Laguna Woods which is served by OCFA Station 22. Laguna Woods comprises 3.1 square miles and is home to approximately 16,000 residents with a median age of over 78. Notwithstanding its size, Laguna Woods has the same number of calls as the City of Tustin, which consists of a service territory of 11.1 square miles and a population of approximately 80,000. The table below depicts the high volume of calls and the proportion of medical calls between the two areas with the overall same number of calls.[13]

CITY	POPULATION	SIZE (Sq Miles)	# EMS CALLS	# FIRE CALLS	# TOTAL CALLS
Laguna Woods	16,000	3.31	4,876	24	5,000
Tustin	80,000	11.14	4,062	95	5,395

CITY	% EMS CALLS/TOTAL	CALL/POP	EMS CALLS/POP	% FIRE CALLS/POP	% EMS CALLS/SIZE
Laguna Woods	97.52%	31.25%	30.48%	0.48%	2.07%
Tustin	75.29%	6.74%	5.08%	1.76%	1.39%

While averaging just two fire calls each month, Laguna Woods is equipped with two Type 1 Engines and one aerial truck. Given the size and weight of these large fire vehicles, there is unnecessary wear and tear on the streets of Laguna Woods when Station 22 equipment is sent out on such a high volume of simple medical calls. Replacement of one of the two Type 1 Engines assigned to Station 22 with two paramedic squad vehicles would save the expense of wear and tear, maintenance, equipment, and operating costs. It would also result in faster response times since the time it takes for fire personnel to gear up and get the larger trucks to move out is at

[13] OCFA Comprehensive Annual Financial Report, FY ending June 30, 2021, pp. 135, 142-43.

least two minutes longer than for the smaller vehicles to roll out.[14] Although that approach adds a fourth paramedic unit to the service area, causing a shift in assignments, additional staffing would not be necessary. Additionally, the cost of two fully equipped paramedic squad vehicles is less than the cost of a single Type 1 Engine. The typical cost for a fully equipped Type 1 engine is between $750,000 and $1,000,000 as opposed to the typical cost for a fully equipped Paramedic Squad vehicle (based on a Ford F-350 Super Duty Diesel chassis) which is under $200,000.[15]

Friction Between OCEMS and OCFA

Fractures between OCEMS, the OCFA, and independent city Fire Chiefs are apparent. This is exemplified in a letter written to OCEMS from the Fire Chiefs that pointed to OCEMS's "offensive" action in implementing policy changes without prior notice or collaboration. This complaint was made despite the Fire Chiefs' specific acknowledgment in the same letter that a joint advisory committee had been formed and had been discussing the issues.[16]

Despite the OC Fire Chiefs' complaint about OCEMS overstepping its authority, the only example provided to the Orange County Grand Jury was the emergency action taken by OCEMS in 2021 when hospitals were backed up. This caused long wait-times for first responders who transported patients to the emergency room and kept them unavailable to respond to other emergencies. In response, OCEMS introduced an emergency measure which allowed EMT and paramedic transporters to leave patients in the hands of the hospital on a portable cot provided by the ambulance squad.[17] Although the change addressed the fire departments' problem of extended "wall time" for fire paramedics, it resulted in a strong rebuke from Fire Chiefs for failing to provide adequate notice to them or provide an opportunity to collaborate. Although OCEMS could possibly have provided better notice to OCFA and the independent Fire Chiefs, the OCEMS appeared to be working in the best interest of all parties involved. This was a fact that was, at best, only begrudgingly acknowledged by a few OCFA union representatives and other fire agency personnel.

Tensions have been further exacerbated by COVID and the demand placed on ambulances that, reportedly, have failed to respond to calls in a timely manner. The extent of the problem is debatable. However, the OCFA Fire Chief took the problem into his own hands. In December 2021, the OCFA Chief directed that all EMS responses be classified as Code 3 to speed up ambulance response times. A

---

[14] Citygate Associates, Inc., *Standards of Coverage Service Level Assessment* OCFA, p. 8 (June 2020).
[15] OCFA Comprehensive Annual Financial Report, FY ending June 30, 2021, p. 148.
[16] Letter from OC Fire Chiefs Association to OCEMS, November 8, 2021.
[17] OCEMS Temporary Suspension of Diversion and Actions to Reduce APOTs, December 29, 2021.

Code 3 response requires lights and sirens.[18] Code 3 responses have been shown to pose a significantly greater danger to the public and emergency personnel.[19] The Orange County Grand Jury is concerned that this OCFA directive and the power struggles existing between the Fire Chiefs Association and OCEMS may be viewed as self-serving rather than serving the best interests of the public.

Similar acrimony was evident when OCEMS received pointed criticism for taking a position on 2021 proposed legislation that was pending in Sacramento that directly affected OCEMS without conferring with the OCFA or independent Fire Chiefs. While Orange County fire leadership is free to disagree with the position taken by OCEMS, OCEMS had no obligation to consult with them prior to advocating for itself in Sacramento.

There is consensus from both sides that the problems between these entities have escalated over the past year; however, there have been some recent signs of better collaboration and communication.

COMMENDATIONS

- Fire department personnel for their professional service and steadfast concern for public safety.
- All Emergency Medical Services personnel for their tireless efforts on behalf of Orange County residents.
- Interviewees for their cooperation and time spent with the Orange County Grand Jury to explore these issues.
- Special commendation to the City of Placentia for innovation in the face of concerted opposition.

FINDINGS

F1 Despite fire departments throughout Orange County having evolved into emergency medical departments, most have not updated their emergency response protocols accordingly, but have simply absorbed emergency medical responses into their existing fire response models.

---

[18] Correspondence from OCFA to OC Public Health, cc: County Executive Officer, January 25, 2022.
[19] Joint Statement on Lights & Siren Vehicle Operations on Emergency Medical Services (EMS) Responses February 14, 2022.

CONFIDENTIAL

F2 Despite use of a tiered dispatch system, OCFA's deployment of resources for medical responses are the same for nearly all calls, resulting in unnecessary wear and tear on expensive fire-fighting equipment and public infrastructure.

F3 ALS staffed ambulances or smaller squad vehicles are often the most appropriate response to medical calls and do not compromise the quality of medical care.

F4 There has been a breakdown of communication and trust between OCEMS and Orange County Fire Chiefs.

F5 Over-deployment of firefighters for medical calls contributes to the current climate of forced hiring and firefighter fatigue.

F6 Code 3 response is over utilized by OCFA, unnecessarily putting the responders and public at risk.

F7 Since the outbreak of the COVID pandemic, there has been an emergency medical personnel shortage. The pandemic also has contributed to longer wait times at hospitals resulting in firefighter personnel being out of service for longer periods.

F8 There are specific areas within Orange County, such as Laguna Woods and Seal Beach, that have an extremely high percentage of medical calls which, under the current model, results in the stations servicing those communities to require two engines.

F9 OCEMS has the authority and responsibility to inspect all for-profit ambulances operating in Orange County; however, publicly owned ambulances are not automatically subject to OCEMS oversight.

F10 Placentia's changes to the emergency medical response protocols after leaving OCFA have resulted in improved medical call response times.

RECOMMENDATIONS

R1 As recommended in the 2012 and 2014 OCFA Standards of Coverage and Deployment Plans, as well as other studies, the Grand Jury recommends that, by 2024, all Orange County fire agencies utilize criteria-based dispatch protocols and send a single unit response to those incidents triaged as non-life-threatening (BLS). F1, F2, F5

R2 By 2024, OCFA should station a paramedic squad vehicle, which is more nimble and less costly to operate, in place of a second engine in stations with high volumes of medical calls. F8

R3 OCFA should immediately stop the practice of requesting Code 3 responses on all non-life threatening (BLS) calls. F6

R4 While OCEMS should recognize how certain policy changes may pose operational challenges to emergency responders in the field, fire leadership should recognize and respect the independent oversight authority and expertise of OCEMS. F4

R5 Departments with publicly owned ambulances should allow OCEMS to inspect their ambulances for compliance with State EMS guidelines and adopt OCEMS recommendations. F9

RESPONSES

California Penal Code Section 933 requires the governing body of any public agency which the Grand Jury has reviewed, and about which it has issued a final report, to comment to the Presiding Judge of the Superior Court on the findings and recommendations pertaining to matters under the control of the governing body. Such comment shall be made *no later than 90 days* after the Grand Jury publishes its report (filed with the Clerk of the Court). Additionally, in the case of a report containing findings and recommendations pertaining to a department or agency headed by an elected County official (e.g. District Attorney, Sheriff, etc.), such elected County official shall comment on the findings and recommendations pertaining to the matters under that elected official's control *within 60 days* to the Presiding Judge with an information copy sent to the Board of Supervisors.

Furthermore, California Penal Code Section 933.05 specifies the manner in which such comment(s) are to be made as follows:

(a) As to each Grand Jury finding, the responding person or entity shall indicate one of the following:

(1) The respondent agrees with the finding.

(2) The respondent disagrees wholly or partially with the finding; in which case the response shall specify the portion of the finding that is disputed and shall include an explanation of the reasons therefor.

(b) As to each Grand Jury recommendation, the responding person or entity shall report one of the following actions:

(1) The recommendation has been implemented, with a summary regarding the implemented action.

(2) The recommendation has not yet been implemented, but will be implemented in the future, with a time frame for implementation.

(3) The recommendation requires further analysis, with an explanation and the scope and parameters of an analysis or study, and a time frame for the matter to be prepared for

discussion by the officer or head of the agency or department being investigated or reviewed, including the governing body of the public agency when applicable. This time frame shall not exceed six months from the date of publication of the Grand Jury report.

(4) The recommendation will not be implemented because it is not warranted or is not reasonable, with an explanation therefor.

(c) If a finding or recommendation of the Grand Jury addresses budgetary or personnel matters of a county agency or department headed by an elected officer, both the agency or department head and the Board of Supervisors shall respond if requested by the Grand Jury, but the response of the Board of Supervisors shall address only those budgetary /or personnel matters over which it has some decision-making authority. The response of the elected agency or department head shall address all aspects of the findings or recommendations affecting his or her agency or department.

Responses Required

Comments to the Presiding Judge of the Superior Court in compliance with Penal Code §933.05 are required from:

GLOSSARY

ALS	Advanced Life Support
ALL HAZARD	Emergencies, including but not limited to traffic collisions, hazardous spills, cat rescues, natural disasters, house and car fires
BLS	Basic Life Support
CBD	Criteria-based dispatch
CODE 3	The use of sirens and lights on emergency vehicles
EMD	Emergency Medical Dispatch
EMS	Emergency Medical Service
EMT	Emergency Medical Technician
EOA	Exclusive Operation Area
LEMSA	Local Emergency Services Agency – California's EMS Act authorizes each county to develop an EMS program and to designate a local EMS agency (LEMSA) for local control of emergency medical services
METRO NET	Joint Powers Authority agency that provides professional dispatch services for fire and medical services
MOU	Memorandum of Understanding
OCEMS	Orange County Emergency Service-Certifies Ambulances, Paramedics and EMTs

OCFA	Orange County Fire Authority
OCGJ	Orange County Grand Jury
PAU	Paramedic Assessment Unit
PM	Paramedic
SEVERITY MODEL	A ranking, either alpha or numerical, on how critical the medical emergency.
TIERED	Calls are categorized by severity
TURNOUT TIME	The time from the dispatch call and change their status to responding
TURNOUT GEAR	Fire Fighters personal protective gear
TYPE 1 ENGINE	Designed for structural firefighting. It will typically include a pump that operates at 1000 gpm, a 400 gal/tank, 1200 ft. 2 1/2" hose, 400 ft. 1 1/2" hose, 200 ft. 1" hose, 20 + feet of ladder, a 500 gpm Master Stream, and minimum staffing of four firefighters. Some cities utilize Type 1 fire engines with only three firefighters due to budget or other staffing issues.
WALL TIME	The time the Paramedic or fire fighter spends at the hospital after delivering a patient

California Penal Code Sections §933 and §933.05

[Note: to reduce grand jury requests for additional response information, the grand jury has **bolded** those words in §933.05 which should be appropriately included in a response]

§933 (a) Each grand jury shall submit to the presiding judge of the superior court a final report of its findings and recommendations that pertain to county government matters during the fiscal or calendar year. Final reports on any appropriate subject may be submitted to the presiding judge of the superior court at any time during the term of service of a grand jury. A final report may be submitted for comment to responsible officers, agencies, or departments, including the county board of supervisors, when applicable, upon finding of the presiding judge that the report is in compliance with this title. For 45 days after the end of the term, the foreperson and his or her designees shall, upon reasonable notice, be available to clarify the recommendations of the report.
(b) One copy of each final report, together with the responses thereto, found to be in compliance with this title shall be placed on file with the clerk of the court and remain on file in the office of the clerk. The clerk shall immediately forward a true copy of the report and the responses to the State Archivist who shall retain that report and all responses in perpetuity.
(c) No later than 90 days after the grand jury submits a final report on the operations of any public agency subject to its reviewing authority, the governing body of the public agency shall comment to the presiding judge of the superior court on the findings and recommendations pertaining to matters under the control of the governing body, and every elected county officer or agency head for which the grand jury has responsibility pursuant to Section 914.1 shall comment within 60 days to the presiding judge of the superior court, with an information copy sent to the board of supervisors, on the findings and recommendations pertaining to matters under the control of that county officer or agency head and any agency or agencies which that officer or agency head supervises or controls. In any city and county, the mayor shall also comment on the findings and recommendations. All of these comments and reports shall forthwith be submitted to the presiding judge of the superior court who impaneled the grand jury. A copy of all responses to grand jury reports shall be placed on file with the clerk of the public agency and the office of the county clerk, or the mayor when applicable, and shall remain on file in those offices. One copy shall be placed on file with the applicable grand jury final report by, and in the control of the currently impaneled grand jury, where it shall be maintained for a minimum of five years.
(d) As used in this section "agency" includes a department.

§933.05 (a) For purposes of subdivision (b) of Section 933, as to each grand jury finding, the responding person or entity shall indicate one of the following:

(1) The respondent **agrees** with the finding.

(2) The respondent **disagrees wholly** or **partially** with the finding, in which case the response shall specify the portion of the finding that is disputed and shall include an explanation of the reasons therefor.

(b) For purposes of subdivision (b) of Section 933, as to each grand jury recommendation, the responding person or entity shall report one of the following actions:

(1) The recommendation **has been implemented**, with a summary regarding the implemented action.

(2) The recommendation **has not yet been implemented, but will be implemented** in the future, with a **timeframe** for implementation.

(3) The recommendation **requires further analysis**, with an explanation and the scope and parameters of an analysis or study, and a **timeframe** for the matter to be prepared for discussion by the officer or head of the agency or department being investigated or reviewed, including the governing body of the public agency when applicable. This timeframe shall not exceed six months from the date of publication of the grand jury report.

(4) The recommendation **will not be implemented** because it is not warranted or is not reasonable, with an explanation therefor.

(c) However, if a finding or recommendation of the grand jury addresses budgetary or personnel matters of a county agency or department headed by an elected officer, both the agency or department head and the board of supervisors shall respond if requested by the grand jury, but the response of the board of supervisors shall address only those budgetary or personnel matters over which it has some decision making authority. The response of the elected agency or department head shall address all aspects of the findings or recommendations affecting his or her agency or department.

(d) A grand jury may request a subject person or entity to come before the grand jury for the purpose of reading and discussing the findings of the grand jury report that relates to that person or entity in order to verify the accuracy of the findings prior to their release.

(e) During an investigation, the grand jury shall meet with the subject of that investigation regarding the investigation, unless the court, either on its own determination or upon request of the foreperson of the grand jury, determines that such a meeting would be detrimental.

(f) A grand jury shall provide to the affected agency a copy of the portion of the grand jury report relating to that person or entity two working days prior to its public release and after the approval of the presiding judge. No officer, agency, department, or governing body of a public agency shall disclose any contents of the report prior to the public release of the final report.

CITY OF COSTA MESA

P.O. BOX 1200 / 77 FAIR DRIVE
COSTA MESA, CA 92628-1200

The Honorable Erick L. Larsh
Presiding Judge of the O.C. Superior Court Grand Jury
700 Civic Center Drive West
Santa Ana, California 92701

RE: **CITY OF COSTA MESA RESPONSE TO GRAND JURY REPORT**
"Where's the Fire? Stop Sending Fire Trucks To Medical Calls"

Honorable Judge Larsh:

The City of Costa Mesa and the Costa Mesa Fire & Rescue Department appreciate the time and effort the Orange County Grand Jury spent on their report titled "Where's The Fire? Stop Sending Fire Trucks to Medical Calls." In alignment with the original subpoena request dated March 16, 2022 and subsequent extension to respond that was formally approved on September 14, 2022, allow this document to serve as our formal response on behalf of the City of Costa Mesa and the Costa Mesa Fire Chief.

Thank you for the opportunity to respond and if you should you need any additional information or clarifications, please do not hesitate to contact Fire Chief Dan Stefano at (714) 754-5106 or by email at dan.stefano@costamesaca.gov.

Sincerely,

_____
Lori Ann Farrell Harrison
City Manager

_____
Daniel A. Stefano
Fire Chief

Cc: Honorable Mayor & City Council
City Attorney

GRAND JURY FINDING #F1

FINDING: ***"Despite fire departments throughout Orange County having evolved into emergency medical departments, most have not updated their emergency response protocols accordingly, but have simply absorbed emergency medical responses into their existing fire response models."***

RESPONSE: The City Disagrees Wholly with this Finding.

This finding is inconsistent with the historical facts of the California Fire Service generally and with the City of Costa Mesa specifically.

For over half a century, the California Fire Service, including Costa Mesa Fire & Rescue, has been the primary provider of prehospital EMS throughout the state, long before the existence of an organized statewide EMS system. Recognizing the obvious value—in terms of both operational and financial efficiency and effectiveness—of already-existing strategically located fire stations and emergency apparatus, staffed by highly trained and experienced firefighters who possess a vast array of rescue skills and capabilities, in 1969 the California Legislature enacted Health & Safety Code §219, which created minimum first aid training standards for all public safety personnel. During that same year, a pilot program was launched by three physicians in Los Angeles County to train 18 Firefighters as "Mobile Intensive Care Paramedics" (MICPs) who would provide Advanced Life Support (ALS) level care to the critically ill and injured in the prehospital setting. The success of this program led to passage of the Wedworth-Townsend Paramedic Act of 1970 for the purpose of expanding paramedic services throughout the state.

The California Fire Service-based model for the delivery of ALS/paramedic-level care was so overwhelmingly successful that the television series "Emergency" (1972-1977) was developed to bring national attention to the importance of prehospital EMS through the characters of Firefighter-Paramedics Johnny Gage and Roy DeSoto (actors Randolph Mantooth and Kevin Tighe). When "Emergency" first aired, there were only about six paramedic systems nationwide. However, the series was tremendously popular, and people all over the United States began to ask their local officials why they did not also have such a system.

In its efforts to better organize and coordinate the newly developing field of prehospital EMS, the California Legislature adopted the Emergency Medical Services System and Prehospital Medical Care Personnel Act of 1980 ("1980 EMS Act") that established Division 2.5 of the Health & Safety Code (HSC). Due to the fundamental and essential role of the Fire Service in developing the EMS infrastructure over preceding decades—that included an enormous commitment of time, staffing, training, and money from cities and citizen taxpayers—the Legislature wrote California Health & Safety Code §1797.201 to formally recognize and preserve the pre-existing authority of those local cities and fire agencies to continue in the provision, administration, and operational control of all prehospital EMS their jurisdiction, in compliance with, and subject to, state and local medical (i.e., patient care) standards and guidelines.

Section 1797.201 also reflects the Legislature's acknowledgement that the administrative and operational aspects of an EMS system are best determined at the local level, based on the specific needs and nuances of the community served, ultimately defined by local policy through jurisdictional governance and based on the subject-matter expertise of the public safety representatives (e.g., Fire Chief, EMS Division/Section, etc.) who best understand the particular needs of their community and who are directly accountable to the community served.

With that all said, the distinction between the *operational and administrative* control of an EMS system and the *medical* control of an EMS system need to be clearly acknowledged and clarified. Whereas the various local governments and fire agencies have the sovereign legal authority over the *administration and operational* control of prehospital EMS within their respective jurisdictions (HSC §1797.201), the Local Emergency Medical Services

Agency (LEMSA) maintains absolute legal authority over *medical* control. "Medical control" is statutorily defined as, and expressly limited to, "the *medical* management" and the "*medical* direction" of the EMS system. In other words, decisions and actions that directly impact patient care such as assessment, treatments/interventions, and transport destination decisions (HSC §§ 1797.90, 1797.220, 1798(a), 1798.8). Costa Mesa has not in our history challenged the medical control of our LEMSA. In fact, this acknowledgement and delineation is extremely important, combined with the significant value placed on local governmental agencies and the LEMSA working within a highly collaborative environment for the best interests of EMS system itself and the communities served.

Further, the California Fire Service, which includes Costa Mesa Fire & Rescue (CMFR), has continued to be the primary provider of prehospital EMS throughout the State, with Orange County being one of the best examples of a well-functioning and efficiently structured EMS system. This is primarily because of our long history as a highly unified fire service-based EMS system composed of fire agencies that are capable of providing "All-Hazards" Emergency Services (i.e., Fire, Rescue, Medical, Community Risk Reduction, etc.), including both BLS and ALS/paramedic level prehospital emergency care, in all types of hazardous environments and across all jurisdictional boundaries due to our emphasis on inter-agency coordination and standardization of training and procedures according to local, state, and national guidelines. In fact, inter-agency and cross-jurisdictional coordination and standardization is absolutely critical for operational effectiveness and firefighter safety, but it is also necessary to achieve the goals of *optimal quality* patient care, as well as *equality* of patient care, for all county residents and visitors regardless of their location or situation. Moreover, this is predicated on the reciprocity of like resources and services between fire service agencies, without a reduction in type, level, or quality of care. The Orange County Fire Chiefs Association (OCFCA)—which includes CMFR and represents all Orange County Fire Service-ALS-Level provider agencies—remains committed to all of these goals, as well as continuing its tradition of innovation and ongoing improvement in the rapidly changing world of healthcare and medicine, because the people who depend on us deserve nothing less.

In 1975, Costa Mesa initiated a three-platoon schedule for the fire department, resulting in a 56-hour workweek. Later that year, seven firefighters were trained as paramedics and the Mobile Intensive Care (MIC) program was initiated.

The first "Medic" unit was a 1975 Chevy ambulance. Later a Ford ambulance was purchased so that one could be kept in reserve. It is interesting to note that these ambulances were not utilized for patient transport; a private ambulance company was utilized to perform that function. Soon, the single paramedic unit for Costa Mesa's 70,000 people proved to be inadequate. In January of 1983, a second Medic unit, Medic Truck 3 was placed in service at the Park Avenue Fire Station.

Over the subsequent decades and up to the present time, Costa Mesa has made many positive improvements and enhancements in our EMS system and EMS system protocols. For example, in addition to strong BLS EMS education and training efforts, a nurse educator was added to our EMS education cadre. Similarly, we added the positions of *both* an EMS Manager *and* an EMS Coordinator due to the ever-expanding prehospital EMS needs of our community as well as evolving CQI (Continuous Quality Improvement) requirements, among other areas.

As the number of emergency medical responses increased, it became apparent that more than two paramedic units were necessary to achieve the goals of the MIC program. An aggressive purchasing program saw the replacement of nearly every front line apparatus in 1989-90, and within 5 years, the department had converted all of the five engine companies to Paramedic Engines, each staffed with four personnel and the continued utilization of a private ambulance company from an off-site location to assist with our emergency transportation.

From 2010-2013, during the city's initial recovery planning from the Great Recession of 2008-2009, the city and the department continued to analyze different options of deployment and delivery, including the formal evaluation of joining the Orange County Fire Authority. Ultimately, the decision was made to retain our city fire department and explore the most effective and efficient model of emergency service delivery moving forward. In 2013, the department initiated the purchase of six brand new rescue ambulances and began piloting an expanded

paramedic program. In 2014, the department initiated its first strategic planning process, which included updating the department's name from "Fire" Department to "Fire & Rescue" Department to reflect the robust "all-hazard" response approach and focus on continuous improvement and innovative evolution.

In 2018, the City Council approved the Fire Chief and City Manager recommendation to implement a city based ambulance operator emergency transportation program, which brought the emergency ambulance transportation in-house in an innovative public-private partnership model, that Costa Mesa continuously monitors and adapts "real-time" to the changing health and safety needs of the community.

Regarding specific technologies and procedures, prehospital EMS in 2022 is obviously substantially different than the prehospital EMS provided by fire departments 50 years ago when the Mobile Intensive Care Paramedic was first created. Indeed, the assessment and treatment interventions performed by the modern-day Firefighter-Paramedic, along with evidence-based system protocols governing patient triage and hospital destination, have dramatically improved survival and outcome for victims of sudden illness and injury. Moreover, technological advances in the field of medicine traditionally utilized exclusively in the hospital setting are more and more being adapted for use in the prehospital setting by fire department paramedics. The following are just some of the many examples of major improvements in prehospital assessment and treatment that demonstrates Costa Mesa is not only evolving, but always working diligently to be on the forefront of advancement and thoughtful innovation, for the benefit of our residents to prevent and minimize premature death and disability, while maximizing positive neurological outcomes.

A. Electronic Patient Care Reporting (E-PCR)

CMFR transitioned from a paper based patient care record to an electronic patient care record (ePCR) system in 2012, after being brought in as the first Orange County fire service agency to pilot and initiate the ePCR program. This happened in conjunction with the Orange County Emergency Medical Services Agency (OCEMSA) and allowed for significant improvements in the ability to operate a Continuous Quality Improvement (CQI) program. In 2016, again in conjunction with the OCEMSA, a transition was made to an upgraded ePCR program that continues to be used and refined today. CMFR participates in a multi-agency CQI committee which utilizes the ePCR format and its data to improve emergency medical service delivery.

B. Prehospital 12-Lead Electrocardiogram (EKG) & Cardiac Center Triage

Cardiovascular disease (CVD) is the number one cause of death for both men and women in the United States, killing over one million people each year. CVD kills more people than cancer, AIDs, and the other top five causes of death combined. One of the primary mechanisms of death from cardiovascular disease is heart attack, which kills over 450,000 people each year. A heart attack, known more accurately as myocardial infarction, is when a person's coronary artery suddenly becomes blocked. The heart muscle that was supplied by the blocked artery then begins to die as it is deprived of oxygen rich blood. According to American Heart Association (AHA) Emergency Cardiovascular Care (ECC) guidelines, in order to survive a myocardial infarction "it is imperative that healthcare providers evaluate, triage, and treat patients as quickly as possible," because "half of the patients who die of myocardial infarction do so before reaching the hospital" (2005 AHA ECC Guidelines, IV-89). Accordingly, AHA makes the performance of a 12-Lead EKG a Class I recommendation, which means it is deemed essential for survival. The sooner a myocardial infarction is identified by paramedics in the field, the sooner they can initiate the appropriate treatments and notify the nearest Cardiac Center hospital, so that when the patient arrives the coronary artery blockage can be rapidly removed. CMFR was one of the first EMS agencies in Orange County to implement at 12-Lead EKG and Cardiac Triage program and, along with Hoag Hospital (Newport Beach), set national records for the successful treatment of heart attack victims.

C. Public Access Defibrillation Program

Another primary mechanism of death from cardiovascular disease is Sudden Cardiac Arrest, which kills over

250,000 people each year. Unfortunately, the national survival rate for Sudden Cardiac Arrest is only 5%, which means that 95% of all Sudden Cardiac Arrest victims die. However, in places with strong Public Access Defibrillation (PAD) programs, the survival rates are substantially higher (~40-70%). This is because for every minute that goes by without defibrillation, a Sudden Cardiac Arrest victim has a 10% less chance of survival (if CPR is not performed, there is a 20% less chance of survival for each minute). Costa Mesa is one of the handful of cities in the nation that has taken a proactive approach to fighting premature death due to Sudden Cardiac Arrest. Back in the mid-2000s, CMFR implemented a City-wide PAD (Public Access Defibrillation) system making AEDs (Automated External Defibrillators) available in all City facilities accessible by the public. Further, CMFR assisted many public and private organizations, such as Orange Coast College and South Coast Plaza, implement their own PAD programs, thus making our community significantly safer for victims of sudden cardiac arrest. CMFR continues to partner and provide our local businesses, schools and broad range of community stakeholders and members with support, information and training with respect to all emergency and disaster preparedness matters.

D. Transcutaneous Pacing

Some people experience cardiac emergencies where their heart beats too slow due to an electrical problem in the heart's conduction system. When this happens, the brain and other vital organs are deprived of an adequate supply of oxygen rich blood, which can rapidly lead to cardiac arrest and brain death. An important treatment for these patients is a procedure called Transcutaneous Pacing (TCP), in which adhesive electrode pads are placed on the chest, and an electrical current is generated to override the patient's cardiac conduction system and achieve a heart rate sufficient for the patient's needs. Although this procedure has been standard in hospitals for decades, it was not introduced into the prehospital setting until the recent decade. CMFR was one of the first EMS agencies in Orange County to implement Transcutaneous Pacing, which has greatly improved our ability to care for victims of these heart problems.

E. Prehospital Stroke Assessment & Stroke Center Triage

Stroke is the third leading cause of death in the United States, and is a leading cause of disability in the United States (there are currently over 6,400,000 stroke survivors in the United States today). The key to reducing death and disability due to stroke is rapid recognition and rapid triage to a designated Stroke Center hospital. CMFR EMTs and Paramedics were among the first in the County, in conjunction with Hoag Hospital (Newport Beach), to initiate new stroke assessment protocols and triage procedures that continues to afford specialized physicians to remove the blockage in the cerebral blood vessel as soon as possible, thus minimizing the damage to brain tissue due to lack of oxygen, which results in substantially improved quality of life for stroke survivors.

F. Capnography

One of the most important interventions in the treatment of cardiac and respiratory arrest victims is endotracheal intubation, in which a breathing tube is inserted into the patient's trachea. Unfortunately, this procedure involves the potential complications of misplaced and displaced tubes, which may result in the death of the patient and resultant lawsuits. In fact, this is one of the most legally risky procedures performed by paramedics. CMFR paramedics were among the very first in the County to use the technology of Capnography/Capnometry, which allows us to confirm tube placement by measuring the patient's expired carbon dioxide levels: If the tube is properly placed in the patient's trachea, then the cardiac monitor will detect the presence of carbon dioxide, which will be represented by a visible waveform on the monitor screen. The confirmation afforded by the technology of capnography substantially increases intubation success rates while significantly decreasing the liability exposure of the City. CMFR paramedics were also among the first EMS professionals in Orange County to utilize capnography for conscious patients with breathing/respiratory problems to better and more precisely determine their actual pathophysiology and decide on the most appropriate treatment intervention.

G. Intra-Osseous Infusion

All life-threatening emergencies require the administration of medications and/or fluids into the patient's circulation. This is usually accomplished with an intravenous ("I.V.") catheter that is inserted through the patient's skin into a vein. However, sometimes it is not possible to insert an intravenous catheter due to the patient's condition or size. In the past, if paramedics were unable to insert an intravenous catheter, they would be unable to administer life-saving medications and fluids.

As of 2010, CMFR became one of the few EMS agencies in Orange County whose paramedics were trained and equipped to insert a catheter directly into a patient's tibia bone in a process called Intra-Osseous ("I.O.") Infusion, which is often easier to do than intravenous access on critical patients. Paramedics may then administer medications and fluids directly into the patient's bone marrow, from where they rapidly flow into the patient's circulation. Because of the addition of Intra-Osseous Infusion to the paramedic scope of practice, Costa Mesa residents have an exponentially greater chance of receiving life-saving medications and fluids than in the past, when this critical procedure was not allowed in the prehospital setting.

H. Commercially Available Tourniquets

Although the treatment of a life-threatening extremity bleed with a tourniquet is actually a Boy Scout level skill, at the change of the millennium, OCEMS had no protocol dealing specifically with this issue. In fact, it was the CMFR EMS Coordinator who, after meeting with Special Operations personnel with extensive combat experience in the Middle East, added the "Combat Application Tourniquet – CAT" to the CMFR EMS inventory. In the next several years, CMFR was ultimately able to persuade the OCEMS DEAG (Drug & Equipment Advisory Group, which unfortunately no longer exists) to add OCEMS-approved commercially available tourniquets to the official OCEMS mandatory inventory pursuant to OCEMS Policy 325.00 ("ALS Unit Provider Inventory").

I. Emergency Transport Model

Most recently, over the course of the past several years, Costa Mesa has significantly enhanced our emergency ambulance transport system by adding six rescue ambulances and implementing a city (local government) based ambulance transport program, inclusive of both ALS and BLS configurations that are dynamically deployed in the same manner as all of our emergency response resources. This includes now being housed and staffed throughout our six strategically located city fire and rescue stations for optimum emergency response. Costa Mesa has continued to evolve into the most effective and efficient EMS ambulance transport model, incorporating the best advantages of a public-private partnership model for our community, utilizing a combination of EMT-level Ambulance Operators and our own cross-trained professional Firefighter/Paramedics who are completely and dynamically integrated into the Costa Mesa EMS system. The current deployment and transport model has resulted in increased paramedic availability in their designated areas of primary responsibility throughout the city because of the flexibility our model to adapt to the acuity of medical emergencies and treatment needs, as well as increased fire and rescue resource availability. Simply put, Costa Mesa's Emergency Transport Model a shining example of "updating emergency response protocols."

J. Definition of "Patient"

It is worth noting that it was the CMFR EMS Division and EMS Coordinator back in the early 2000s, who literally wrote the official definition of "patient" for our City EMS protocols (with some help from Anne Stratton, RN), that was ultimately formally adopted by OCEMS and is *still used as the official definition in OCEMS protocols for the entire County EMS system.*

There are a wide range of many other examples of CMFR evolving the structure, model, and corresponding protocols of our EMS system according to the changing needs of our city, however the aforementioned items serve to clearly substantiate our conclusion of this finding. Further, while a majority of our emergency responses are EMS-related, many of our EMS responses require additional specialized training and skills for situations such

as vehicle heavy rescue that only professionally cross-trained firefighters are qualified to handle. Consequently, every CMFR Firefighter, like all OCFCA Fire/ALS agencies, is cross-trained and certified as an EMT (Emergency Medical Technician), capable of providing BLS (Basic Life Support) emergency medical care. For those patients with more serious problems, the CMFR has 30+ Mobile Intensive Care Paramedics who have received additional training and are licensed to provide ALS (Advanced Life Support) emergency medical care.

One of core elements of CMFR's mission is focused on minimizing death, disability, and injury by optimizing patient outcomes with superior quality medical care by professionally cross-trained firefighters who conduct themselves with *Respect, Integrity and Compassion*. Because, like all branches of medicine, Prehospital EMS is a science that is constantly changing due to advances in concepts, technologies, and procedures, modern day "all-hazard" fire service agencies, such as CMFR, are also continuously adapting, adjusting, evaluating and improving the services we provide according to those changing standards, which includes the updating of all emergency response and related protocols when and where appropriate.

GRAND JURY FINDING #F3

FINDING: ***"ALS staffed ambulances or smaller squad vehicles are often the most appropriate response to medical aid calls and do not compromise the quality of medical care."***

RESPONSE: **The City Disagrees Wholly with this Finding.**

The goal of emergency medical aid (and any emergency) response is to send the appropriate resource(s) as expeditiously and safely as possible to most effectively manage the emergency, incident or situation identified. As such, we disagree wholly with a "one-size-fits-all" approach to define the most appropriate emergency response for a given emergency, incident or situation.

The deployment of emergency resources should be directly related to the unique community risks, needs and characteristics (e.g., demographics, topography, call history, type of incident reported vs. type of incident/situation found upon arrival, etc.) of each jurisdiction, while being integrated into the broader system of standardization and reciprocity between neighboring and regional jurisdictions. The intent of the Legislature with the creation of the 1980 EMS Act and its clear recognition of the importance of local control was memorialized with all possible clarity §1797.201.

A more appropriate and objective finding would be along the line of ***"ALS and BLS staffed ambulances or smaller squad vehicles are included as part of the many appropriate emergency response apparatus and vehicles (i.e., one of the many valued "tools in the tool box") to effectively manage medical aid calls and other emergencies when properly deployed. Thus, a "one-size-fits-all" approach is definitively not an appropriate approach, as the goal of emergency medical aid (and any emergency) response is to deploy the appropriate resource(s) as expeditiously and safely as possible to most effectively and efficiently manage the emergency, incident or situation identified and subsequently found.***

For example, a medical aid in the respective Fairview Park or Talbert Park areas would not be effective within Costa Mesa (and Orange County) without a combination response of appropriate resources (i.e., four wheel drive vehicles, fire apparatus with specialized rescue equipment and tools, and ambulance, etc.). Additionally, in Costa Mesa, and in the fire and emergency services in general, we frequently have emergency medical aids that are the secondary result of a primary incident, such as a vehicle or other technical rescue related accident, which requires specialized expertise of our professionally cross-trained and highly skilled "all-hazard response" firefighters. This is important to note because the value of professionally cross-trained firefighters have the knowledge, skills and abilities to safely and appropriately manage a high risk emergency scene, (i.e., inclusive of the incident

management, safety risk management, technical rescue and the medical aid itself, etc.).

Furthermore, the unpredictable nature of calls for emergency medical services (and many emergencies) include the reality that what is initially reported to an emergency dispatch center and/or responding crews is not always the situation found when emergency resources arrive on scene. Some of our most labor-intensive calls for service, such as sudden cardiac arrest, are often reported as falls, syncope, or other well intended, but not clearly accurate descriptions of the emergency. Our deployment model allows us to adapt and provide the appropriate level of emergency service truly needed, with the least amount of emergency response delay.

GRAND JURY FINDING #F4

FINDING: ***"There has been a breakdown of communication and trust between OCEMS and Orange County Fire Chiefs."***

RESPONSE: **The City Agrees Wholly with this Finding.**

We agree that there has been a breakdown of communication and trust between OCEMS and Orange County Fire Chiefs. Specifically, the breakdown of communication and trust began following the transition of the new OCEMS leadership change in 2019, and to be clear, the breakdown in communication and trust appeared to primarily reside with the two lead managers from OCEMS, not the entire organization.

Prior to that, the OCEMS and the OCFCA had a long established and strong relationship, grounded in mutual respect, trust and collaboration. When EMS matters came up that were disagreed upon and/or needed additional clarification, OCEMSA and OCFCA always worked to find a way to come together and meet to professionally resolve the issue at hand. While each party may have mutually not agreed on a policy, order or decision that was ultimately issued, OCFCA respected the end result, because we were all substantively part of the process.

From the inception of the Mobile Intensive Care Paramedic (MICP) by Article 3 of the California Wedworth-Townsend Paramedic Act of 1970, Orange County residents have received the highest quality pre-hospital emergency medical care through the fire service-based EMS system, that is widely acknowledged as the most effective and efficient utilization of professionally cross-trained emergency resources. Although the fire service-based EMS model demonstrates a wide array of benefits to Orange County residents, CMFR recognizes that the quality of our EMS system is not effective if it is not a comprehensive team effort that depends on <u>all</u> EMS system members and stakeholders who each contribute in different ways that are equally important to the overall success of the system. Accordingly, CMFR's guiding principle continues to be good communication and meaningful collaboration with all of our EMS system partners in the spirit of cooperation and mutual respect, never losing sight or focus on our joint and solemn purpose to humbly and compassionately care for the people of Costa Mesa who we serve.

The Costa Mesa Fire Chief served as the President of the Orange County Fire Chiefs Association prior to, during and following the leadership transition of 2019 and it became abundantly clear that the transition of leadership in OCEMS became adversarial and autocratic in nature, lacking collaboration. The rationale that was provided by the new leadership of OCEMS to the Orange County Fire Chiefs was that OCEMS did not have the staff or the time to regularly meet with the OCFCA on these issues, nor did they need to have the approval of the OCFCA for policy changes. The latter assertion was not one the OCFCA was seeking, the OCFCA was merely seeking collaboration.

Understandably, any leadership transition will have some growing pains, with some grace and space a welcomed component to provide the organization and partnerships time to grow. Unfortunately, in this case, the escalating lack of desire for interpersonal communications, collaboration, and building trust from the new OCEMSA

leadership began to get worse instead of improving. One example of this included the OCEMS Medical Director unilaterally putting out policies and orders without meeting to informally or formally confer with the Orange County Fire Chiefs and/or the OCFCA's EMS subject matter experts, affording the opportunity to provide thoughtful collaborative input in advance of policies being implemented. Instead of viewing and utilizing the OCFCA and OCFCA's EMS subject matters experts as valuable resources and professional partners, the new OCEMS leadership team treated the OCFCA and the EMS SME's as adversaries, inclusive of demonstrating a dismissive demeanor that did not serve anyone well in building mutual professional respect. This exclusionary approach and change in disposition of the OCEMS toward the OCFCA was not something that was previously observed and/or noted as a point of historical reference. Moreover, it has been broadly communicated that this same approach was indicative of the tone received by other stakeholders, including, but not limited to the Orange County Chiefs of Police and Sheriffs Association as well as the Hospital Administrators, among others. That said, our goal is resolution and one recommendation would be for the OCHCA to reach out to other stakeholders who regularly work with OCEMS (i.e., inclusive a 360 degree evaluation) to determine the breadth and depth of the breakdowns of trust and communication with all partners to help guide a formal memorialized pathway to help rebuild two-way professional relationships with OCEMSA and all of their related stakeholders. Despite all of this, the OCFCA has and will continue to resiliently look for opportunities to build bridges of trust and collaboration where ever possible.

As another example, during the fall of 2020, during the initial peak of the COVID Pandemic and during the engagement of active wildland fire seasons, OCEMS leadership attempted to push through an update to the Orange County Ambulance Ordinance without effectively notifying the OCFCA or the 34 cities within the County. Again, this was at the peak of the Pandemic and during historic wildfire seasons that this ordinance change became a sudden urgency for OCEMS to bring forward, arguably under the radar. As soon as the OCFCA identified that this was happening, the OCFCA actively advocated to collaboratively work through the issue on behalf of the Orange County Fire Chiefs and the California Fire Chiefs.

Unfortunately, the OCFCA was met with immediate and continued pushback from the OCEMS Administrator and OCEMS Medical Director, re-stating the urgency to get the updated ambulance ordinance put in place immediately. After continued unsuccessful efforts to resolve this issue directly with OCEMS Leadership, the Orange County Fire Chiefs engaged their respective City Managers and/or legal counsels, among others, including the Orange County CEO, Frank Kim and the OCHCA Director Dr. Clayton Chau. After key leadership representing all of the referenced groups came together in a number of different meetings with CEO Kim, OCHCA Director Chau, and members of the OCEMS leadership team, it became clear that the Fire Chiefs and the respective cities intent all centered around that of collaboration and resolution from start to finish, of which was acknowledged by the outcome of the final meeting and the facilitation by CEO Kim. The Orange County Fire Chiefs and the City of Costa Mesa acknowledged and appreciated the collaborative leadership approach demonstrated by CEO Kim and Dr. Chau, as well as the valued engagement of the City Managers and legal counsels. Subsequently, after all of the stakeholders spent some time working together, including the Orange County Fire Chiefs in direct collaboration with OCEMS, a final draft product was created that was tentatively acceptable to all parties involved. This final draft product now remains in the possession of OCEMS for a final group review before being formally being brought to the Orange County Board of Supervisors for formal approval. Interestingly enough, as of the date of this Grand Jury response, November 2022, the Orange County Fire Chiefs have yet to see any final closure to the ambulance ordinance update. This example is provided to illustrate that the Orange County Fire Chiefs have committed to and will continue to be unwavering in our efforts to build trust, collaboration and partnerships with all stakeholders, including OCEMS. That said, this commitment needs to be reciprocated by OCEMS and clearly needs to have vesting and accountability going both ways, including transparency.

To that end, and as another example in the spirit of working to rebuild trust and communication, the OCFCA initiated an EMS advisory group established to rebuild that line of communication. The Costa Mesa Fire Chief, on behalf of and under unanimous direction from the Orange County Fire Chiefs, directly reached out to the OCEMS Medical Director with the request and it was ultimately mutually agreed and established.

Lastly, throughout the entirety of the Pandemic, when the OCEMSA and OCHCA were significantly challenged with managing the impacts of COVID and the Pandemic, the Orange County Fire Chiefs and the Orange County Fire Service took the initiative and stepped up to take a lead role in managing a number of areas, including, but not limited to establishing the first vaccination point of dispensing (POD) sites, and thereafter, the super POD vaccination sites, all from the tip of the spear and all while still serving their respective communities throughout the duration of the Pandemic, infused with thoughtful communication, trust, collaboration, compassion and partnership.

Lastly, here are a few narrative summaries that are of importance to acknowledge and highlight:

A. **Medical Control** – Whereas the various Fire Service agencies have the sovereign legal authority over the *administration and operational* control of prehospital EMS within their respective jurisdictions (HSC §1797.201), the LEMSA maintains absolute legal authority over *medical* control. "Medical control" is statutorily defined as, and expressly limited to, "the *medical* management" and the "*medical* direction" of the EMS system, in other words, decisions and actions that directly impact patient care such as assessment, treatments/interventions, and transport destination decisions (HSC §§ 1797.90, 1797.220, 1798(a), 1798.8). NOTE: *Costa Mesa and/or CMFR has not ever challenged the Medical Control authority of our LEMSA.*

B. **EMS Protocols** – The main statutory mechanism for a LEMSA to exercise its medical control authority is through written EMS protocols (i.e., polices, procedures, guidelines, standing orders, etc.) that are the basis for all field patient care-related decisions and actions and, therefore, represent the standard of care against which prehospital personnel will be judged in any administrative or civil legal action, and in any disciplinary action initiated by the LEMSA, Base Hospital, or employing agency. Consequently, for EMS protocols to be valid, effective, practical, and equitable, they must:

1. Comply with the letter, intent, and spirit of federal and state law, in addition to accepted medical principles and standards; and

2. Be written with sufficient clarity and in a logical format so that the average prehospital professional can reasonably understand what is expected and how to comply; and

3. Provide the minimal direction necessary to guide/achieve the desired decisions and actions, while affording the maximal reasonable flexibility to account for the volatile and unpredictable nature of the prehospital environment, as well as to avoid unnecessarily exposing the EMT/Paramedic and employing agency to undue or excess legal liability.

C. **Fire Service Compliance** – The Orange County Fire Service (and the California Fire Service), including CMFR, has a consistent history of respecting the authority of the LEMSA Medical Director and abiding by the medical guidance of the LEMSA and Base Hospital physicians and nurses who represent the Medical Director, including following all LEMSA protocols in good faith to the best of our ability. This is especially true in the Orange County EMS System, where the Fire Service and OCEMSA, in conjunction with the various Base Hospitals, have always worked very closely together with an open and constructive dialogue for the benefit of our patients. We are not aware of any time in the past decades where an Orange County Fire Service agency challenged the actual Medical Control of our LEMSA, though state history is replete with examples of many LEMSAs—and even the state EMS Authority (EMSA) itself—that had to be addressed with legal action.

This legal action was taken due to their attempts to expand the definition of "medical" control with the utilization of illegal "underground regulations" to undermine the authority of local jurisdictions and the communities they represent. Specifically, the Sacramento Superior Court entered judgment on behalf of the California Fire Chiefs Association (CalChiefs) and issued a peremptory writ of mandate against the

California Emergency Medical Services Authority ("EMSA"), in *California Fire Chiefs Association Inc. v. California Emergency Medical Services Authority*, No. 34-2019-80003163. CalChiefs, a professional association for more than 800 fire service agencies across the state, alleged that EMSA, the State of California's regulatory agency for EMS had been operating in violation of mandatory state law for at least 30 years. CalChiefs' verified petition for writ of mandate and complaint for declaratory and injunction relief alleged, among other things, that EMSA's rules implementing two key statutes regarding local governments' provision and administration of EMS and ambulance services were void "underground regulations" because they had not been lawfully adopted pursuant to California's Administrative Procedures Act ("APA"). The Hon. Laurie M. Earl, Judge of the Superior Court agreed, declaring that EMSA's rules were void "underground regulations" and commanding EMSA to cease enforcing its invalid rules until and unless the state agency properly adopts the rules in compliance with the APA. Judge Earl also concluded that CalChiefs should be allowed to petition for an award of its attorneys' fees for bringing an action to vindicate important public rights (Schouten, 2020).

The good news is that the relationship between the California fire service and the state EMSA has begun the transition to a more collaborative partnership, much credited to both sides working closely together since the arrival and formal appointment of Elizabeth "Liz" Basnett to the position of Acting Director of the state EMSA in November of 2021. Since her arrival, EMSA and the California fire service have been working closely together with all of the statewide EMS stakeholders to rebuild the professional relationships and trust, including the development of an inclusive strategic planning process. It is our hope that this model and approach can be embraced and integrated in the same manner with OCEMSA.

D. **Fire Service Input** – While it is a true statement that the LEMSA Medical Director has no legal obligation to seek advice or approval from any EMS provider agency when modifying (i.e., creating, revising, deleting) EMS protocols, even though such a change may have a substantial impact on the administrative and operational planning of EMS provider agencies and their cities, including significant financial burdens on the citizen taxpayers who fund those agencies. Nonetheless, due to the many and diverse ramifications of protocol modification, and to ensure that the patient care goals of the Medical Director are accurately conveyed to, and understood by, field personnel, input and feedback from the EMS provider agencies that must comply with the protocols is highly recommended. CMFR is grateful for the fact that the OCEMSA has historically been very collaborative with the fire service and all other EMS system members by not only allowing, but actively seeking meaningful input whenever protocol modification or system improvement decisions were being considered. This commitment to strong teamwork and professional partnership is clearly evidenced by our county EMS history in terms of collaborative and effective protocol modification. From the early 2000s under Dr. Bruce Haynes' OCEMS administration, through Dr. Samuel Stratton's OCEMS administration, and well before that, Orange County was literally known as one of the most effective and synergistic amongst the many other counties and LEMSAs in California. This is because the OCFCA, OCEMSA, and other EMS provider agencies have traditionally worked together in a manner of great cooperation, collaboration, teamwork, support, and in good faith, even when there was disagreement. However, with the exit of the Dr. Stratton administration, this dynamic of strong teamwork and highly productive collaboration changed dramatically for reasons still unknown to us.

E. **OCFCA EMS Section** – To further ensure that the Orange County Fire Service continues to meet the goals and expectations of the OCEMS Medical Director, as well as to provide the OCEMS Agency practical input to help ensure that those goals and expectations are effectively translated to the field, decades ago OCFCA established a sub-committee called the "EMS Section," which is composed of all the EMS Coordinators from the various Fire-Rescue 911 ALS Provider agencies, as well as other Fire agency members in EMS-related positions. EMS Section meetings are routinely attended by Fire agency members, OCEMSA officials, Base Hospital Coordinators, and other EMS system representatives for the purpose of maintaining good communication and strong collaboration in our joint efforts to maintain and improve our high quality of patient care. In the post-Stratton era, amidst the challenges with OCEMSA and the

OCFCA, the OCFCA EMS Advisory Group (EMSAG) was created after being initiated by the OCFCA. Although EMSAG and OCEMS has had limited success in its meetings and making progress, it is our desire and hope that EMSAG and OCEMSA continue to foster and build a valuable foundation to work from in the future, per the intent of the group's formation.

In closing, while we agree with this finding, CMFR and the OCFCA will continue to resiliently look for opportunities to build bridges of trust and collaboration in every way possible including, but not limited to:

1. Re-establishing and re-building the decades-long collaborative relationship between the OCEMSA and the Orange County Fire Service agencies that comprise the County EMS system in furtherance of our joint mission to provide optimal patient care and outcomes for the people who we serve.

2. Facilitate open lines of collaborative communication between OCEMSA and the Orange County Fire Service on all matters that impact the County EMS System.

GRAND JURY FINDING #F5

FINDING: ***"Over-deployment of firefighters for medical calls contributes to the current climate of forced hiring and firefighter fatigue."***

RESPONSE: The City Disagrees Wholly with this Finding.

Costa Mesa Fire & Rescue does not engage in an "over-deployment" of firefighters for medical calls. Costa Mesa Fire & Rescue has a robust and dynamic deployment model that is continually being monitored to make any necessary adjustments. Most importantly, Costa Mesa always places the health and safety of our professional firefighters as a highest priority.

Appropriate staffing is a necessary aspect of every public safety staffing model, in some way, shape or form. Simply put, we need to have sworn and trained public safety professionals on duty at all times, based on the community needs and risks of each jurisdiction served. Therein, different variables impact the need for forced hiring, including, but not limited to no firefighter voluntarily signed up to work the overtime; rank specific or department-wide staffing gaps; lack of budgeted and approved sworn and trained public safety positions consistent with the needs of the community; local, regional, statewide or national emergencies, or special circumstances. At this time, Costa Mesa does not have any staffing gaps and the city is currently in the midst of evaluating our Standards of Coverage for the City, as well as entering into the final stage of implementing a new five year strategic plan.

Lastly, firefighter fatigue has been a noted discussion point over the past few years, regionally, statewide and nationwide, primarily due to the extraordinary role that professional firefighters take on every day in answering the call for any and every emergency, from historic wildfires to the COVID Pandemic to the day to day emergencies and operations on all fronts. As an example, from the onset of the COVID Pandemic throughout its peak and wind down phase, professional firefighters, emergency responders and healthcare workers remained on the front lines, start to finish, without pause or hesitation. With that in mind, mental and behavioral health for firefighters, all public safety personnel and healthcare workers needs to remain a highest priority for all levels of government.

GRAND JURY FINDING #F9

FINDING: ***"OCEMS has the authority and responsibility to inspect all for-profit ambulances operating in Orange County; however, publicly owned ambulances are not automatically subject to OCEMS oversight."***

RESPONSE: **The City Agrees Partially with this Finding.**

Costa Mesa agrees that "OCEMS has the authority and responsibility to inspect all for-profit ambulances operating in Orange County." However, the second part of the finding that "…publicly owned ambulances are not automatically subject to OCEMS oversight" would read more appropriately as follows: "…publicly owned ambulances are not automatically subject to OCEMS oversight *as it relates to areas exclusive of medical control*." To that end, all other responsibilities, risks and rights are held with and through the City of Costa Mesa, as legally and lawfully memorialized by state, county, and local statute (HSC §1797.201). We agree that OCEMS does not currently inspect publicly owned ambulances.

For further clarification purposes, Costa Mesa agrees that all EMS entities, public and private, including CMFR, are statutorily required to comply with all LEMSA *medical control* protocols, including, but not limited to the mandatory medical inventory, medications, supplies and equipment of ambulances (i.e., OCEMS Policy 300 – Medical Control; specifically Policy #325.00 – Advanced Life Support (ALS) Provider Unit Minimum Inventory). However, it is not under the authority and responsibility of the OCEMSA to determine other areas outside of that statutory and regulatory purview, including, but not limited to our emergency response deployment model or determine vehicle related requirements with no defined nexus to medical control (e.g., apparatus/vehicle type, apparatus/vehicle permitting, wheel size/brand, fuel used, etc.).

The City of Costa Mesa welcomes and encourages OCEMS to inspect our ambulances, stations, or EMS system, in alignment with the aforementioned response and in alignment as evidenced by the efforts of collaboration outlined in the City's response to the Grand Jury Finding 4, detailing the Orange County Ambulance Ordinance meetings with OC CEO Frank Kim and OCHCA Director Dr. Clayton Chau. As an interesting side note, specific to this finding and given the time and effort the Grand Jury placed on preparing this comprehensive report, it was surprising that there was no inclusion of information or discussion on the significant issues related to OCEMSA's Orange County Ambulance Ordinance update.

GRAND JURY RECOMMENDATION #R1

RECOMMENDATION: ***"By 2024, all Orange County fire agencies utilize criteria-based dispatch protocols and send a single response to those incidents triaged as non-life-threatening (BLS)."***

RESPONSE: **The recommendation of utilizing criteria-based dispatch protocols has already been implemented.**

Costa Mesa's dispatch center (CMCC/Costa Mesa Communications Center) is a joint Police/Fire Emergency Communications Center. We have historically mirrored, and continue to use, the King County Washington Criteria Based Dispatch (CBD) Guidelines as adapted by and modified for the Orange County Fire Authority. Thus, Costa Mesa continues to use CBD dispatching, inclusive of determining the most effective, efficient and viable deployment of emergency resources, based on the community risks and needs and all established through local policy (HSC §1797.201) of the City Council, under approved recommendations of the City Manager and Fire Chief. NOTE: Please review the response summaries to F1 & F3 for further detail.

GRAND JURY RECOMMENDATION #R4

RECOMMENDATION: ***"While OCEMS should recognize how certain policy changes may pose operational challenges to emergency responders in the field, fire leadership should recognize and respect the independent oversight authority and expertise of OCEMS."***

RESPONSE: **This Recommendation Has Already Been Implemented**

Costa Mesa Fire Leadership recognizes and respects the expertise and authority of OCEMSA as our standard operating practice, highlighted by the acknowledgement of OCEMSA's authority as it pertains to *medical control*. NOTE: Please review the response summaries to F4 & F9 for further detail.

GRAND JURY RECOMMENDATION #R5

RECOMMENDATION: ***"Departments with public owned ambulances should allow OCEMS to inspect their ambulances for compliance with State EMS guidelines and adopt OCEMS recommendations."***

RESPONSE: **This Recommendation Has Never Been Denied.**

As previously shared, Costa Mesa remains committed to meet and exceed all State and OCEMS guidelines, policies and statutory requirements related to our public owned ambulances, in alignment with OCEMS authority of medical control and the City's legal, statutory, and regulatory rights, including, but not limited to the California Health & Safety Code, Section 1797.201 and the City of Costa Mesa's Municipal Code. Moreover, this recommendation was addressed through a number of meetings related to resolving the updates to the Orange County Ambulance Ordinance, including a final summary meeting with clear consensus on how we would proceed with a mutual agreement of under of understanding. The final meeting included representatives from the Orange County Fire Chiefs, including the Costa Mesa Fire Chief, representatives from the Orange County City Managers, OCEMSA Leadership, OCHCA Director Dr. Clayton Chau and Orange County CEO Frank Kim. NOTE: Please review the response summaries to F4 & F9 for further detail.

File #: 22-952 **Meeting Date:** 11/15/2022

TITLE:

PUBLIC HEARING REGARDING THE DEVELOPMENT IMPACT FEES ANNUAL REPORT FOR THE FISCAL YEAR ENDED JUNE 30, 2022 AND THE TRAFFIC IMPACT FEE ANALYSIS

DEPARTMENT: **FINANCE / PUBLIC WORKS DEPARTMENT**

PRESENTED BY: **CAROL MOLINA, FINANCE DIRECTOR / RAJA SETHURAMEN, PUBLIC WORKS DIRECTOR**

CONTACT INFORMATION: **CAROL MOLINA, FINANCE DIRECTOR, (714) 754-5243 / RAJA SETHURAMEN, PUBLIC WORKS DIRECTOR, (714) 754-5343**

RECOMMENDATION:

Staff recommends the City Council:

1. Receive and file the Development Impact Fees Annual Report (Attachment 1) for the Fiscal Year ended June 30, 2022.

2. Adopt the attached resolution (Attachment 2) continuing the citywide traffic impact fee for new development that incorporates recommendations from the Traffic Impact Fee Ad Hoc Committee and staff, which include:

   - Continue a traffic impact fee of $235 per Average Daily Trip (ADT) for Capital Improvement Projects and Active Transportation projects

   - Approve allocation of up to ten (10) percent of traffic impact fees towards traffic signal synchronization projects

BACKGROUND:

Pursuant to the Mitigation Fee Act (California Government Code Sections 66001 through 66009), the City Council established certain Development Impact Fees (DIFs) that must be paid by developers of property to help offset some (or all) of the cost of public facilities related to the development project. The DIFs are for Park Development Impact Fees, Drainage Impact Fees, Traffic Impact Fees, and Fire Systems Development Fees. The Mitigation Fee Act requires that City Council approve an annual report that provides information about the DIFs. These fees are required to be deposited into their own separate accounts or funds. The law also requires that certain findings be made in association with accumulated DIFs after the deposit into their

respective account or fund.

ANALYSIS:

Reporting requirements under California Government Code 66006 specify that the City must prepare annual reports of Development Impact Fees within 180 days of the close of the fiscal year.

The reports must describe the fee, the amount of the fees collected, interest earned, and identification of any expenditures from those funds. The code also specifies that reports must be reviewed by the City Council at a regularly scheduled meeting not less than 15 days following release to the public. The FY2021-22 Development Impact Fee Annual Report was released for public review on November 1, 2022.

The Traffic Impact Fee Ad Hoc Committee and staff met on October 20, 2022 to review the program. Recently completed projects, project cost escalation and available traffic impact fee balance were accounted in the review. While this resulted in calculation of new traffic impact fee of $232 per ADT, the Ad Hoc Committee recommended continuation of current fees as it is within the overall range of $176 per ADT to $476 per ADT. A detailed report documenting the analysis is included in Attachment 3.

The FY2021-22 Development Impact Fee Annual Report is attached for City Council's review and approval (Attachment 1). A summary of the fees collected and expenditures incurred in FY 2021-22 are included in the Financial Summary Report section.

Staff recommends that the City Council receive and file this Annual Report. Staff also requests the adoption of the attached resolution, continuing the citywide traffic impact fee for new development in the City. The resolution incorporates the recommendations from the Traffic Impact Fee Ad Hoc Committee and staff.

ALTERNATIVES:

The City Council may choose to reject all or part of the Annual Report as presented. California Government Code Section 66006 requires that the report be reviewed at a public meeting.

FISCAL REVIEW:

There is no fiscal impact by the recommended action as this report is not requesting that City Council adopt new development impact fees, but is reporting development impact fee activity for the Fiscal Year ended June 30, 2022 and traffic impact fee analysis.

LEGAL REVIEW:

The City Attorney’s Office has reviewed this report and approves as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item is administrative in nature.

CONCLUSION:

Staff recommends the City Council receive and file the Development Impact Fees Annual Report for the Fiscal Year ended June 30, 2022.

Legal Requirements for Development Impact Fee Reporting

Legal Requirements for Development Impact Fee Reporting

California Government Code Section 66006 (b)

California Government Code Section 66006 (b) defines the specific reporting requirements for local agencies that impose AB 1600 DIFs on new development. Annually, for each separate fund established for the collection and expenditure of DIFs, the local agency shall, within 180 days of the close of the fiscal year, make available to the public the information shown below for the most recent fiscal year.

a) A brief description of the type of fee in the account or fund.
b) The amount of the fee.
c) The beginning and ending balance of the account or fund.
d) The amount of the fees collected and interest earned.
e) An identification of each public improvement on which fees were expended and the amount of the expenditures on each improvement, including the total percentage of the cost of the public improvement that was funded with fees.
f) An identification of an approximate date by which the construction of the public improvement will commence if the local agency determines that sufficient funds have been collected to complete financing on an incomplete public improvement, as identified in paragraph (2) of subdivision (a) of Section 66001, and the public improvement remains incomplete.
g) A description of each inter-fund transfer or loan made from the account or fund, including the public improvement on which the transferred or loaned fees will be expended, and, in the case of an inter-fund loan, the date on which the loan will be repaid, and the rate of interest that the account or fund will receive on the loan.
h) The amount of refunds made pursuant to subdivision (e) of Section 66001 and any allocations pursuant to subdivision (f) of Section 66001.

California Government Code Section 66001

For all funds established for the collection and expenditure of DIFs, California Government Code Section 66001 (d) has additional requirements. For the fifth fiscal year following the first deposit into the fund and every five years thereafter, the local agency shall make all of the following findings with respect to that portion of the fund remaining unexpended, whether committed or uncommitted:

a) Identify the purpose to which the fee is to be put.
b) Demonstrate a reasonable relationship between the fee and purpose for which it is charged.
c) Identify all sources and amounts of funding anticipated to complete financing in incomplete improvements identified in paragraph (2) of subdivision (a).
d) Designate the approximate dates on which the funding referred to in subparagraph (c) is expected to be deposited into the appropriate account or fund.

California Government Code Section 66002

The State of California Government Code Section 66002 states that:

a) Any local agency, which levies a fee subject to Section 66001, may adopt a capital improvement plan, which shall indicate the approximate location, size, time of availability, and estimates of cost for all facilities or improvements to be financed with the fees.

b) The capital improvement plan shall be adopted by, and shall be annually updated by, a resolution of the governing body of the local agency adopted at a noticed public hearing. Notice of the hearing shall be given pursuant to Section 65090. In addition, mailed notice shall be given to any city or county, which may be significantly affected by the capital improvement plan. This notice shall be given no later than the date the local agency notices the public hearing pursuant to Section 65090. The information in the notice shall be not less than the information contained in the notice of public hearing and shall be given by first-class mail or personal delivery.

c) "Facility" or "improvement," as used in this section, means any of the following:

1. Public buildings, including schools and related facilities; provided that school facilities shall not be included if Senate Bill 97 of the 1987-88 Regular Session is enacted and becomes effective on or before January 1, 1988.
2. Facilities for the storage, treatment, and distribution of nonagricultural water.
3. Facilities for the collection, treatment, reclamation, and disposal of sewage.
4. Facilities for the collection and disposal of storm waters and for flood control purposes.
5. Facilities for the generation of electricity and the distribution of gas and electricity.
6. Transportation and transit facilities, including but not limited to streets and supporting improvements, roads, overpasses, bridges, harbors, ports, airports, and related facilities.
7. Parks and recreation facilities.
8. Any other capital project identified in the capital facilities plan adopted.

Description of Development Impact Fees with Corresponding Fee Schedule

Park Development Impact Fees (Quimby Act Fees)

Fee Description: This fee provides funding for additional or improved park and/or recreation facility improvements for which the need is generated by new development within the City.

Fee Schedule: The table below indicates the applicable park development fee per unit that will be applied to new residential projects based on the net increase in residential units.

Development	Fee per Unit
Single-family Dwelling Unit	$13,572.00
Multi-family Dwelling Unit	$13,829.00
Apartment Dwelling Unit	$5,000.00

Drainage Impact Fees

Fee Description: This fee provides funding for additional construction and maintenance of the City's drainage system for which the need is generated by new development or redevelopment within the City.

Fee Schedule: The table below indicates the applicable drainage impact fee per acre that will be applied to new or redeveloped projects.

Development Type	Fee per Acre
Low Density Residential Use	$6,283.00
Medium Density Residential Use	$7,539.00
High Density Residential Use	$10,052.00
Commercial / Industrial Density Residential Use	$11,309.00

Traffic Impact Fees

Fee Description: This fee provides funding for additional or improved traffic signal, operation, and infrastructure improvements for which the need is generated by new or expanding development within the City.

Fee Schedule: The citywide Traffic Impact Fee is assessed on the increased number of average daily trips generated by the proposed project. The City Council adopted a fee of $235 per daily trip on November 13, 2018. On December 17, 2020, the City Council voted to continue the Traffic Impact fees at $235 per daily trip.

Fire System Development Fees

Fee Description: This fee provides funding for additional fire protection facilities, equipment, and paramedic support for which the need is generated by future development within the North Costa Mesa area. This fee is only levied against five identified developments: Home Ranch, South Coast Plaza Town Center, South Coast Metro Center, and Sakioka Farms' Lots 1 and 2.

Fee Schedule: The fee is $0.285 per square foot of new commercial, industrial or residential development.

Statement of Revenues, Expenditures and Changes in Fund Balance

A summary of activities in each type of development impact fee for fiscal year ended June 30, 2022 is shown below:

Development Impact Fee Project Identification

The City's current, Adopted Budget 2022-2023, which includes the Five-Year Capital Improvement Plan (CIP) 2022/23 — 2026/27 can be found on the City's website at: https://www.costamesaca.gov/home/showpublisheddocument/51218/637877023662070000

Funding of Infrastructure

The FY 2022/23 — FY 2026/27 CIP identifies all funding sources and amounts for individual projects through FY 2026/27. The CIP is updated annually to reflect the current City's infrastructure needs. As a CIP is identified, the project is evaluated to determine the portion of the project that will service existing residents and businesses versus new development.

Once the determination of use is made, the percentage of use attributed to new development is then funded by the appropriate development fee based on the type of project. The percentage of use associated with existing residents or businesses are funded from other appropriate sources. Estimated construction start dates for projects are adjusted, as needed, to reflect the needs of the community.

City Council Action and Studies

The following attachments are Development Impact Fees related recent and prior Council Reviews (Traffic Impact Fees and Park Development Fees).

File #: 21-482 **Meeting Date:** 12/7/2021

TITLE:

ANNUAL REVIEW OF THE CITYWIDE TRAFFIC IMPACT FEE PROGRAM

DEPARTMENT: PUBLIC SERVICES DEPARTMENT /TRANSPORTATION SERVICES DIVISION

PRESENTED BY: RAJA SETHURAMAN, PUBLIC SERVICES DIRECTOR

CONTACT INFORMATION: JENNIFER ROSALES, TRANSPORTATION SERVICES MANAGER (714) 754-5343

RECOMMENDATION:

Staff recommends the City Council adopt the proposed resolution, continuing the citywide traffic impact fee for new development in the City of Costa Mesa and conducting the related annual review of the citywide traffic impact fee program and capital improvement plan for transportation improvements (Attachment 1). The resolution incorporates the recommendations from the Traffic Impact Fee Ad Hoc Committee and staff, which include:

1. Continue a traffic impact fee of $235 per Average Daily Trip (ADT) based on the Capital Improvement Projects in Attachment 2 and Active Transportation projects in the adopted Active Transportation Plan (ATP);

2. Approve allocation of up to ten percent (10%) of traffic impact fees towards traffic signal synchronization projects;

3. Approve a five percent (5%) reduction in automobile trips as a result of ATP implementation and an additional five percent (5%) reduction in automobile trips for developments proposing to implement active transportation improvements beyond typical development requirements; and

4. Approve the annual accounting of the Citywide Traffic Impact Fee Program.

BACKGROUND:

Pursuant to California Government Code Section 66000, et seq. and the Costa Mesa Municipal Code, a traffic impact fee study is required by the City to establish a basis for the imposition of Citywide traffic impact fees on new and expanding developments within the City. The purpose of the fee is to fund the necessary transportation/circulation improvements, which are related directly to the

incremental traffic impacts imposed on the City's transportation system by the development of new and/or changing commercial, industrial, and residential uses as permitted by the General Plan. The fee also maintains compliance with the eligibility requirements of the Orange County Transportation Authority's (OCTA) Renewed Measure "M2" Program (Measure "M2").

The City Council has reviewed the Citywide Traffic Impact Fee Program each year since the fee program was first adopted in 1993. The City Council, in July 1993, also approved the formation of an Ad Hoc Committee consisting of representatives from various stakeholder groups to work with staff on all aspects related to the revision and updating of traffic impact fees.

The City Council subsequently appointed an Ad Hoc Committee consisting of members representing large and small developers, the Chamber of Commerce, citizens-at-large, as well as members representing the City Council and the Planning Commission, to assist staff in the development and review of the traffic impact fee.

The current Ad Hoc Committee members and their representation are as follows:

Jason Kensey (Chair)	At Large Representative
George Sakioka (Vice Chair)	Major Developers' Representative
Steve Brahs	Small Developers' Representative
Matt Eimers	At Large Representative
Carla Valenzuela	Chamber of Commerce

City Council Liaisons:

Council Member Don Harper
Council Member Arlis Reynolds

Planning Commission Liaison:

Commissioner Jonathan Zich

The City Council, in June 2012, authorized a comprehensive review of the City's General Plan, including the Land Use and Circulation Elements. The General Plan was completed and finalized in 2016.

The last major update of the Traffic Impact Fee Study was completed in November 2018. The update took into account the most recent land use and circulation information contained in the 2016 General Plan update. The proposed General Plan circulation improvements identified in the new transportation model form the basis for the traffic impact fee update. A revised traffic impact fee calculation was conducted taking into account the 2016 General Plan and updated traffic analysis model. The estimated costs for various improvements were reviewed and updated using the most recent construction cost data. The Ad Hoc Committee, together with staff, reviewed all conditions and analyzed different trip fee scenarios. Several variations of improvement options were considered, and it was determined that trip fees in the range of $176 per ADT through $476 per ADT could be justified.

On November 17, 2020, the City Council adopted Resolution No. 20-60, approving a traffic impact

fee of $235 per Average Daily Trip (ADT) to be continued with the inclusion of Active Transportation projects, selecting a fee from the calculated range of between $176 and $476 per ADT. The City Council also approved up to ten percent (10%) of traffic impact fees being allocated toward traffic signal synchronization projects. In addition, City Council approved a five percent (5%) reduction in automobile trips as a result of ATP implementation and an additional five percent (5%) reduction in automobile trips for developments proposing to implement active transportation improvements beyond typical development requirements. A chronology of actions taken by the City Council on the Citywide Traffic Impact Fee Program between the years of 1993 and 2020 is included in Attachment 3.

ANALYSIS:

The Traffic Impact Fee Ad Hoc Committee and staff met on October 27, 2021 to review the traffic impact fee program and calculation. Recently completed projects, consideration of active transportation projects, and the available traffic impact fee fund balance were accounted for in this review.

Attachment 2 provides the calculation of the traffic impact fee of $221 per ADT based on a revised list of capital improvement projects and the inclusion of Active Transportation projects. Following a review of the fee analysis and staff input, the Ad Hoc Committee recommended to continue the current traffic impact fee of $235 per Average Daily Trip (ADT) with the inclusion of Active Transportation projects in the Traffic Impact Fee program. In addition, the Ad Hoc Committee recommended to continue the allocation of up to ten percent (10%) of traffic impact fees towards traffic signal synchronization projects.

The Ad Hoc Committee also recommended to continue to provide a five percent (5%) reduction in automobile trips for development projects due to the implementation of the Active Transportation Plan (ATP) and an additional five (5) percent reduction in ADT if a development proposes to implement active transportation improvements beyond typical code requirements. The improvements have to be substantial such as addition of a multipurpose trail, conversion of lower-class active bicycle facility to a higher-class bicycle facility, or enhanced pedestrian improvements in the vicinity of the project.

Annual Accounting of the Traffic Impact Fee:

California Government Code Section 66006(b) requires an annual review and accounting of the Citywide Traffic Impact Fee Program. Section 66001(d) requires that the City make specified findings every five years relating to any portion of the traffic impact fees collected that remain unexpended in its account. The City has elected to conduct the review of traffic impact fees required by California Government Code Section 66001(d) on an annual basis in conjunction with its review of the capital improvement plan required by California Government Code Section 66002(b) and the annual accounting required by California Government Code Section 66006(b). Attachment 4 depicts the opening balance, the ending balance on June 30, 2021, interest earned, revenues, expenditures, and unexpended funds from the Citywide Traffic Impact Fee Account. This attachment also shows that there are no funds unexpended or uncommitted in the account five (5) or more years after deposit and that no administrative costs have been charged to the fee account. The accounting was presented to the Committee at their meeting on October 27, 2021, and was approved.

As required by the Government Code, the updated Capital Improvement Plan (CIP) is contained in the Fiscal Year 2021-22 adopted budget and remains valid for the current traffic impact fee review. The traffic impact fee account information, including the interest earned, shown in Attachment 4, is available for public review.

ALTERNATIVES:

The City Council has the option to choose a traffic impact fee rate anywhere in the range of $176 per ADT to $476 per ADT, based on the most recent update of the traffic impact fee analysis. An additional alternative is to not have a Citywide Traffic Impact Fee Program at all. This alternative, however, would make the City ineligible to receive funds from any of the competitive grant programs processed through the Orange County Transportation Authority's Combined Transportation Funding Programs. The City Council could also increase or decrease the percent of traffic impact fees for traffic signal synchronization. The City Council could also not approve the addition of active transportation projects to the traffic impact fee program.

FISCAL REVIEW:

Traffic impact fees fiscally support required capital transportation improvements outlined in the City's General Plan Circulation Element.

LEGAL REVIEW:

The City Attorney's Office has reviewed the agenda report and resolution and approves them both as to form.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goals:

- Achieve long-term fiscal sustainability.
- Strengthen the public's safety and improve the quality of life.

CONCLUSION:

The Citywide Traffic Impact Fee Program had the last major update in 2018 and the Traffic Impact Fee Ad Hoc Committee reviewed the Traffic Impact Fee Program in October 2021 as part of the annual review. The Traffic Impact Fee Ad Hoc Committee recommended that the current traffic impact fee of $235 per ADT be continued with the inclusion of Active Transportation projects. In addition, the Ad Hoc Committee recommended continuing allocation of up to ten percent (10%) of traffic impact fees toward traffic signal synchronization projects. The Ad Hoc Committee also recommended that the automobile trip generation for development projects continue to be reduced by five percent (5%) due to the inclusion of Active Transportation projects in the City's General Plan and a further five percent (5%) reduction in ADT for developments that incorporate substantial Active Transportation improvements beyond those required by code.

Staff requests that the City Council adopt the proposed resolution, continuing the citywide traffic

impact fee for new development in the City of Costa Mesa and conducting the related annual review of the citywide traffic impact fee program and capital improvement plan for transportation improvements. The resolution incorporates the recommendations from the Traffic Impact Fee Ad Hoc Committee and staff.

RESOLUTION NO. 2021-xx

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA, CONTINUING THE CITYWIDE TRAFFIC IMPACT FEE FOR NEW DEVELOPMENT IN THE CITY OF COSTA MESA AND CONDUCTING THE RELATED ANNUAL REVIEW OF THE CITYWIDE TRAFFIC IMPACT FEE PROGRAM AND CAPITAL IMPROVEMENT PLAN FOR TRANSPORTATION IMPROVEMENTS

WHEREAS, California Government Code section 66000 *et seq.* enables cities to charge fees for transportation facilities; and

WHEREAS, Section 13-274 of the Costa Mesa Municipal Code authorizes the City Council to, by resolution, establish a development impact fee program based on the capital improvement program; and

WHEREAS, in 1993, by Resolution No. 93-43, the City Council established a traffic impact fee program and the rate of the traffic impact fee based upon a Traffic Impact Fee Study; and

WHEREAS, each year since 1993, the City has continued the traffic impact fee program; and

WHEREAS, on November 17, 2020, the City Council established a traffic impact fee of Two Hundred Thirty-Five Dollars ($235.00) per Average Daily Trip (ADT) based upon a Traffic Impact Fee Study completed in 2018; and

WHEREAS, California Government Code section 66001(d) requires the City to make specified findings every five years with respect to any portion of the traffic impact fees collected that remain unexpended in its account, including (1) identifying the purpose to which the fee is to be put; (2) demonstrating a reasonable relationship between the fee and the purpose for which it is charged; (3) identifying all sources and amounts of funding anticipated to complete financing of incomplete improvements; and (4) designating approximate dates on which the anticipated funding is expected to be deposited into the appropriate account; and

WHEREAS, California Government Code section 66002(b) further requires a separate annual review and update of the City's capital improvement plan for improvements to be paid for by traffic impact fees; and

WHEREAS, California Government Code section 66006(b) requires the City to make available to the public within 180 days of the last day of the fiscal year certain information, including but not limited to, a description of the type of fee, the amount of the fee, the amount of fees collected and the interest earned thereon, identification of each public improvement on which fees were expended and the amount of the expenditures on each improvement, identification of an approximate date by which the construction of the public improvement will commence if the City determines that sufficient funds have been collected to complete financing of an incomplete public improvement, and the beginning and ending balance of the traffic impact fee account or fund for the previous fiscal year; and

WHEREAS, the 2016 General Plan requires the City to maintain a traffic impact fee for improvements to the Master Plan of Streets and Highways and that the City review and update the fees on a regular basis; and

WHEREAS, pursuant to the 2016 General Plan and the Costa Mesa Municipal Code, the City has elected to conduct the review of traffic impact fees required by California Government Code section 66001(d) on an annual basis in conjunction with its review of the capital improvement plan required by California Government Code section 66002(b) and the annual accounting required by California Government Code section 66006(b)(1); and

WHEREAS, the City reviewed and updated the capital improvement plan on June 15, 2021 in connection with its Measure M2 reporting; and

WHEREAS, a primary purpose of this resolution is to continue the traffic impact fee based on the 2018 Traffic Impact Fee Study and to enable the City to continue the traffic impact fee; and

WHEREAS, the traffic impact fee is necessary because new development increases the need for transportation/circulation facilities in the City of Costa Mesa not only during peak periods, but throughout the day, and the City transportation/circulation system will be burdened by the demands of carrying vehicles of a larger number of persons and cargo due to new commercial, industrial, and residential uses; and

WHEREAS, the 2015-2035 General Plan as well as Environmental Impact Report No. 1049 indicate that development of new commercial, industrial and residential uses is

expected to exceed current commercial, industrial and residential uses and, accordingly, the City transportation/circulation systems will need to be increased in capacity to carry the increase in the number of vehicles due to new commercial, industrial and residential uses; and

WHEREAS, the Public Services Department has conducted an audit of the accounts for the traffic impact fee program for the fiscal year ending June 30, 2021, which is attached hereto as Exhibit "A" and incorporated herein; and

WHEREAS, pursuant to California Government Code section 66006, the audit was available for public inspection and review at least fifteen (15) days prior to the City Council review of the audit on December 7, 2021 and notice was mailed to all interested parties on record at least fifteen (15) days prior to the public hearing held on December 7, 2021; and

WHEREAS, the City Council conducted a public hearing on December 7, 2021, received testimony and evidence from interested parties in the City of Costa Mesa, and has evaluated justification for renewal of the traffic impact fee given economic and social factors, as well as average fees charged by surrounding cities.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF COSTA MESA HEREBY FINDS, DETERMINES, AND RESOLVES AS FOLLOWS:

Section 1. The City Council hereby finds that:

a. The foregoing recitals are true and correct and are incorporated herein by reference.

b. The purpose of the traffic impact fee is to fund transportation/circulation improvements including active transportation improvements within the City of Costa Mesa which are directly related to the incremental traffic/vehicle burden imposed upon the City transportation/circulation system by the development of new commercial, industrial and residential uses.

c. The fee will be used to fund transportation and circulation improvements within the City of Costa Mesa.

d. There is a reasonable relationship between the traffic impact fee's use and the development projects on which the fee is imposed because the transportation/circulation facilities funded by the fee are needed to

accommodate the incremental new traffic/vehicle burdens generated by the development of new commercial, industrial and residential uses upon which the fee is imposed.

e. There is a reasonable relationship between the need for the transportation/circulation facilities and the development of new commercial, industrial and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged; the cost of transportation/circulation facilities attributed to existing deficiencies, existing land uses and population, excess and reserve capacity, and regional transportation needs have been excluded from the fee calculation, and such costs are not included in the fee to be paid by the development.

f. There is no portion of the fees deposited into the traffic impact fee fund that remains unexpended.

g. The capital improvement plan is adequate to provide the facilities for which the traffic impact fee is charged and does not need to be amended.

h. The audit by the Public Services Department set forth in Exhibit "A" accurately reflects the balance of the traffic impact fee account on the fees collected, the interest thereon, and other income and amount of expenditures and refunds of the traffic impact fee made by the City of Costa Mesa during the prior fiscal year.

Section 2. The City Council of the City of Costa Mesa hereby renews the traffic impact fee and establishes traffic impact fee regulations as follows:

a. The traffic impact fee shall be a fee of $235.00 per each new average daily vehicle trip end generated by all new commercial, industrial and residential developments. To encourage active transportation in Costa Mesa, staff shall provide a five percent (5%) reduction in ADT development trips for

active transportation project benefits and may provide an additional five percent (5%) reduction in ADT development trips for a development project which proposes to implement active transportation improvements beyond those which would ordinarily be required by the City as a condition of approval for such development project.

b. The traffic impact fee established pursuant to this resolution shall be collected and administered in accordance with all requirements of California Government Code section 66000 *et seq.*, the Costa Mesa Municipal Code and prior resolutions of the City Council.

c. There shall be no limitation on the amount of traffic impact fees which may be allocated toward active transportation projects.

d. Staff may allocate up to ten percent (10%) of traffic impact fees towards traffic signal synchronization projects.

Section 3. The City Council of the City of Costa Mesa hereby approves the updated comprehensive transportation/circulation system capital improvement plan as identified at the June 15, 2021 City Council meeting pursuant to Government Code section 66002.

PASSED AND ADOPTED this 7th day of December, 2021.

CITY COUNCIL AGENDA REPORT

MEETING DATE: August 4, 2015 **ITEM NUMBER: PH-1**

SUBJECT: PROPOSED 2015 UPDATE TO THE PARK IN-LIEU IMPACT FEES (PARK FEES)

DATE: JULY 29, 2015

PRESENTATION BY: DANIEL INLOES, AICP, ASSOCIATE PLANNER

FOR FURTHER INFORMATION CONTACT: DANIEL INLOES (714) 754-5088
daniel.inloes@costamesaca.gov

RECOMMENDATIONS:

Adopt attached Ordinance and Resolution to:

1) Give first reading to the Ordinance to institute new park fees for apartment projects (multi-family residences, renter);
2) Adopt resolution to update the City's parkland impact fees for residential subdivisions and apartments, including the corresponding formula.

--OR--

1) Provide direction to staff regarding the park fee update and continue the meeting to a future specified date.

Development Type	Current Fees	Fees Based on Existing Formula	Park Fee Alternative 1: Park Expenditure Trends: Based on 10-year Historic Trends in Park Expenditures	Park Fee Alternative 2: Costa Mesa Housing Trends: Based on 10-year Historic Trends in Housing Development
Single-Family Residence	$13,572	$29,713.50	$11,285	$18,006
Condominiums - *Multi-Family Residence, Owner*	$13,829	$23,110.50	$8,777	$14,005
Apartments less than 50 units - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$14,005
Apartments 50 units or more - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$5,057

BACKGROUND:

The proposal is an update to the City of Costa Mesa's park in-lieu impact fee, ("park fee"). California Government Code Section 66477, the Quimby Act, and section 66000 authorizes the legislative body of the City to allow the payment of park fees for recreation purposes for these specified residential projects. These new fees will ensure a fair fee assessment per development type while also reflecting the current cost of parkland acquisition and construction for:

- Single Family Residences;
- Multi-family Residences (Owner);
- Apartments 50 units or less;
- Apartments 50 units or more.

Quimby Act of 1975

The municipal responsibility to set aside parkland and open space for its residents is additionally burdened by future development, and therefore Cities have been authorized since the passage of the 1975 Quimby Act to pass ordinances that require developers to set aside land, donate conservation easements, or pay fees for park acquisition or improvements.

AB 1600 of 1987

This bill allowed for development impact fees to defray all or a portion of the cost of public facilities related to new development projects. Since apartment developments do not require a subdivision, new fees for apartments are not secured by Quimby; however, apartments do place additional burdens on the City's public open space. The City has a General Plan goal of 4.26 acres of park space per 1,000 people; therefore, apartments may be assessed a fair and proportionate park fee through AB 1600. It is this additional fee and its methodology which requires an ordinance to be established.

Current Park Fees

The current park fees were adopted in May of 2005 and only apply to residential projects requiring a subdivision and do not apply to apartments.

The City Council approved the park fees for new residential subdivisions at $13,572 for single family homes per unit and $13,829 for multi-family homes per unit. The current park fee only applies to new subdivided residential projects and not apartments.

Existing 2015 Park Fees	
Single Family Residence per Unit	$13,572
Multi-Family Residence per Unit	$13,829

Using the current park fees formula with the updated cost of land, people per household averages, and our general plan goal, the fees would be $29,713.50 for a single-family residence, $23,110.50 for a multi-family owner residence, and no fee for apartments since they are not subdivided. These fees would be thousands of dollars over any other

park impact fee in the county and would hamper immediate development within the City. Due to this alternative park fees and their associated methodology was investigated.

The Planning Commission provided feedback on Park Fee Alternative #1. Subsequent to the Planning Commission meeting, staff further developed Park Fee Alternative #2 to address some issues that were raised at the meeting. (Attachment 4, PC staff report and minutes).

ANALYSIS:

Objectives of Updated Park Fee Program

Following are the objectives of the park fees update:

- To establish apartment categories. The park fees would apply to all major forms of residential development within the City including apartments.
- To update the persons per household factor based on current demographic information.
- To update the per–unit-cost per development type.
- To update the parkland acquisition cost and construction cost based on historic park funding trends, development trends within the City, and future park acquisition goals.

Types of Residential Developments Subject to Park Fee

The updated fee program is intended to account for all types of new residential development, including apartments.

Residential Development Subject to Park Fees

Residential Projects subject To Park Impact Fees	Residential Projects exempt from Park Impact Fees
• New common-interest condominium • New single-family "detached" subdivisions • New townhouse "attached" subdivisions • New condominiums in mixed-use developments • New condo conversions increasing units • New apartments*	• Conversion of apartments to condominiums without changing the unit count.** • Granny units and accessory apartments • Single-family home remodels or additions • Multi-family remodels or additions

**Note: A new category for Apartments is being proposed in the Updated Park Impact Fee Program.*
***Note: Additional units will be subject to a fee for new apartment conversions resulting in an increase in units.*

Eligible Expenditures for the Park Fee

All park fees for all types of residential development will meet the same Quimby Act requirement as to the eligible expenditures of park fee funds. The fees will be used only for the purpose of developing new or rehabilitating existing neighborhood or community parks or potential school district properties based on a specified formula that meet the State Law requirements.

New Methodology to be Adopted

State law requires that new parkland impact fees be adopted and that the fee schedule be set pursuant to Council conducting a public hearing and approving an ordinance. A

general methodology for calculating park fees is described in the Quimby Act, but AB 1600 also allows Cities to adopt their own methodology granted that; the purpose and use of the fee is identified, there is a reasonable relationship between the fee's use and the type of development on which the fee is to be imposed, there is a reasonable relationship between the need of the public facility and the type of development project on which the fee is imposed, the fee is proportionate to the cost of the associated use. Within Article 5 of Chapter XI of Title 13 of the City's Municipal Code the procedures for obtaining park land dedications or assessing and collecting park fees are established. Because this section strictly applies to new residential subdivisions and not apartments, an ordinance is required to be adopted to allow application of park fees to rental projects and a resolution to institute all updated and established fees.

PROPOSED PARK FEES ALTERNATIVES

David Taussig & Associates, Inc. and Stanley R. Hoffman Associates were contracted by the City to assist in the park fee update process and assist in developing park impact fees that would meet AB 1600 benefit requirements. The following summary table provides park fee alternatives for Council to consider in the adoption of new park fees:

Development Type	Existing Fees	Fees with Updated Rates but same Quimby Formula	Park Fee Alternative 1: Park Expenditure Trends: Based on 10-year Historic Trends in Park Expenditures	Park Fee Alternative 2: Costa Mesa Housing Trends: Based on 10-year Historic Trends in Housing Development
Single-Family Residence	$13,572	$29,713.50	$11,285	$18,006
Condominiums - *Multi-Family Residence, Owner*	$13,829	$23,110.50	$8,777	$14,005
Apartments less than 50 units - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$14,005
Apartments 50 units or more - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$5,057

PARK FEE ALTERNATIVE #1: Based on Historic Park Fee Expenditures

Park Fee Methodology
Based on Park Fee Expenditure Trends Over the past 10 years

Cost per Acre = 390,000 + .2238(2,500,000) = 949,500						
Single-Family Residential						
949500	cost	4.26	acre	2.79	people	$11,285.19 per unit
1	acre	1000	people	1	unit	
Multi-Family Owner Residential						
949500	cost	4.26	acre	2.17	people	$8,777.37 per unit
1	acre	1000	people	1	unit	
Apartments						
949500	cost	4.26	acre	2.62	people	$10,597.56 per unit
1	acre	1000	people	1	unit	

Methodology for Per Unit Cost

- **Park land-to-population ratio established by 2000 General Plan**. General Plan Policy OSR-1A. 1 establishes the park land-to-population ratio of 4.26 acres per 1,000 people. Any adjustment to this rate requires a General Plan amendment.

- **Population density standard based on the US Census**.
  Since the last update, demographic trends resulted in changes in the average household size of the various types of residential units within the City. This data was gathered by Stanley Hoffman & Associates from the 2013 ACS 5-year estimates from the US Census.

People Per Household by Dwelling Type

Type of Dwelling	Number of Units	Number of People	People Per Household
Single Family	19,861	55,491	2.79
Multi-Family Owner	1,138	2,469	2.17
Multi-Family Renter	18,349	48,125	2.62

- **Park land acquisition & construction costs based on 2014 study by David Taussig & Associates, Inc.** For purposes of determining land costs an analysis of multiple park acquisitions and developments within our region were gathered and assessed to determine the fair market value of park land acquisition and construction. This methodology was utilized because there were few recent comparable land sales to analyze specifically in regards to infill parks which are the most likely park acquisitions the City can make moving forward.

  David Taussig & Associates, Inc. reviewed land sales price data for eight (8) properties sold within the City since 2003. The weighted average sales price based on such review was $2,500,000.00 per acre, whereas the cost of construction or upgrades on existing park space is estimated at $390,000.00. The total cost of acquiring and constructing park space would be $2,890,000.00 per acre.

Park Fee Expenditures in the Past 10 (Years 2005 – 2015)

Description	Date	Adjusted For Inflation (2014 Dollars)	Total Acres	Construction	Land Acquisition
Fairview, stairs and signage	2010	$488,550	2.00	$488,549.73	
Fairview, constructed wetlands	2013	$5,589,220	45.00	$5,589,220.33	
Joann Street Bicycle Trail	2011	$1,262,934	2.00	$1,262,934.40	
Wilson Park, picnic shelter	2014	$45,000	0.05	$45,000.00	
Del Mesa Park, new picnic shelter	2014	$45,000	0.05	$45,000.00	
Brentwood Park	2011	$3,262,581	1.20		$3,262,580.52
Brentwood Park Upgrades	2011	$315,734	1.20	$315,733.60	
Volcom Skate Park Dev	2006	$1,761,429	1.25	$1,761,428.57	
Angels Playground	2008	$1,869,232	2.00	$1,869,231.73	
Lions Park/Davis Field Baseball	2011	$526,223	2.50	$526,222.66	
Bark Park	2008	$208,914	2.00	$208,914.13	
Shalimar Park, new playground	2014	$120,000	0.16	$120,000.00	
	Total	$15,494,816	59.41	$12,232,235.15	$3,262,580.52

Due to the lack of land and priority to upgrading existing parks only 1.2 acres of land was acquired over the past ten years. This represents 22.38% of the 5.36 possible acres the City could have acquired. Therefore, having a cost per acre which includes the full cost of construction and only 22.38% of land acquisition is a reasonable approach. This comes out to $949,500.00 per acre.

Average Units Developed Per Year

Based on Actual Units Developed over the last 15 years.

	Single Family Housing	Condominium	Apartments

PARK FEE ALTERNATIVE #2: Based on Historic Costa Mesa Housing Trends

Park Fee Methodology
Based on Historic Housing Development Trends Over the past 10 years

Cost per Acre = 390,000 + .45 (2,500,000) = 1,515,000

Single-Family Residential

1,515,000	cost	4.26	acre	2.79	people	
1	acre	1,000	people	1	unit	$18,006.38

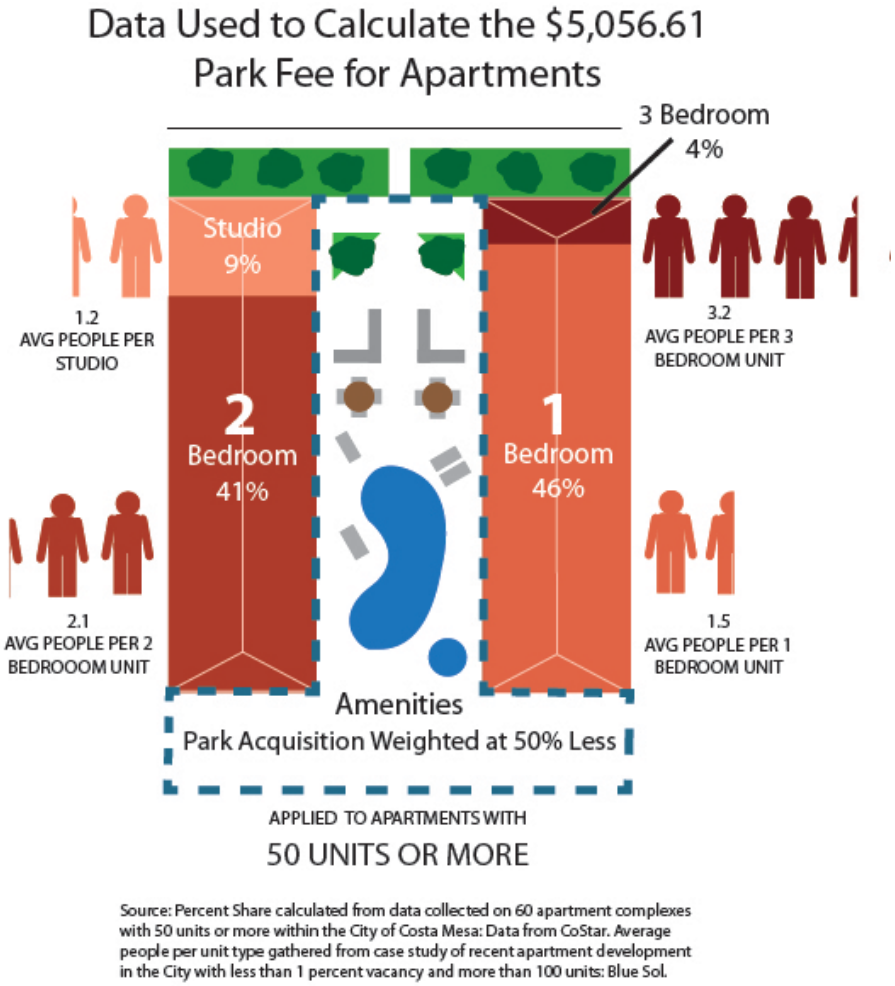
Multi-Family Owner Residential and Small Apartments

1,515,000	cost	4.26	acre	2.17	people	
1	acre	1,000	people	1	unit	$14,005.96

Cost per Acre = 390,000 + .11 (2,500,000) = 669,750

Large Apartment Projects

669,750	cost	4.26	acre	Uses an average people per unit of 1.7723 for large apartments.*	
1	acre	1,000	people		$5,056.61



*This average was calculated by finding average people per unit for various apartment sizes and calculating one rate by using the average proportions for various apartments sizes in a typical developmet with 50 units of more.

Previous park expenditures were hampered by only receiving funds from 40% of the overall units developed in the last 15 years and therefore limited the potential

projects that could be developed by this fund. This is shown in the infographic above. This graphic also confirms that if apartments are paying park fees in the future the potential fund overall will grow and perhaps will be sufficient for more opportunities for acquisition in the future. This alternative proposes to increase the weighting of the cost of acquisition to 45% for single family residences and multi-family projects. This provides further funding for park upgrades and acquisition but does not raise the fee much higher than the existing fees. Some of the high-end apartment projects (entitled or completed) are listed below.

Apartment Projects

Name	Address	Number of Units
Blue Sol (Occupied)	421 Bernard Street	113
Symphony Apartments	585 and 595 Anton Boulevard	393
Baker Street Apartments	125 Baker Street	240
Anton Midrise Residential	580 Anton Boulevard	250
Azulon (Occupied)	1500 Mesa Verde Drive	230

Source: Percent Share calculated from data collected on 60 apartment complexes with 50 units or more within the City of Costa Mesa: Data from CoStar. Average people per unit type gathered from case study of recent apartment development in the City with less than 1 percent vacancy and more than 100 units: Blue Sol.

The threshold of 50 units was taken from the Zoning Code as a starting point for discussion. The Zoning Code already recognizes 50 units as a threshold for large developments. To account for the common space amenities and the complexities of

person per household ratios within apartments the information below was used to create an apartment park fee, for developments with a significant number of units, of $5,056.61.

COMPARISON OF PARK FEES IN OTHER OC CITIES

The following table indicates park impact fees of other Orange County cities. Because cities vary in their approach to calculating park impact fees, and demographic and housing characteristics also differ from city to city, the following table is provided for reference purposes only and is not intended to be a direct comparison.

City	Park Fee (Per Unit)
City of Laguna Beach	$4,580
City of Santa Ana	Varies; up to $4,823
City of Seal Beach	$5,000 to $10,000
City of Anaheim	$5,388 to $6,936
City of Garden Grove	$5,500
City of Tustin	$5,931 to $6,386
City of San Clemente	$6,823
City of Newport Beach	Varies; $6,894 to $26,125
City of Brea	$6,945
City of Fountain Valley	$7,421
City of Laguna Hills	$7,700
City of Orange	$8,894
City of Seal Beach	$10,000
City of Huntington Beach	No Subdivision: Detached $11,540 Attached $8,576 Subdivision: Detached $17,857 Attached $13,385
City of San Juan Capistrano	$11,600
City of Irvine	Fee varies based on acreage value of land to be dedicated. May be as low as $1,150 per acre of land dedication.
City of Costa Mesa	$13,572 to $13,879

Automatic Adjustment of Park Fee based on Consumer Price Index Every Year

The current park fees have not been adjusted for ten years. The consultants propose that the park fee be increased on July 1st of each year, starting July 1, 2016, based on the change to the Los Angeles – Riverside-Orange County Consumer Price Index in comparison to the previous calendar year. This would adjust for escalation and allow for the City to update the park fees in 5 years as opposed to biennially as stated in the code.

New Park Fees to be applied for Pending Entitlement Projects

State law requires that the new fees shall not go into effect until **after 60 days** of Council adoption of the resolution. Park fees may be applied to all pending projects, including

rental projects. Staff recommends that the new park impact fees shall apply to any live/work or residential development project which meets any of the following criteria:

(1) Any discretionary application for a live/work or residential development project which was approved by the final decision making body after the effective date of the resolution; OR
(2) Any pending ministerial application for a residential development project which was not subject to discretionary review and which was submitted into plan check after the effective date of the resolution; OR
(3) Any previously-approved live/work or residential development project which has expired after the effective date of this resolution.

Note: If park fees are reduced, Council would need to direct staff to modify the resolution to reflect whether or not reduced fees will be applied retroactively to previously-approved projects.

LEGAL REVIEW:

The City Attorney's office has approved the attached resolution as to form.

ALTERNATIVES:

The City Council may select one of the following actions with the Park Fees;

- *Existing Fees*: Keep current park fees; however, Council may wish to add new park fees for apartments as identified in Alt #1 or Alt #2.

- *Park Fee Alternative #1*: Adopt this alternative based on trends in park fee expenditures.

- *Park Fee Alternative #2*: Adopt this alternative based on Costa Mesa housing trends.

- *Continue hearing:* Provide direction to staff to research and identify other alternatives.

The resolution would be modified to include the selected alternative and park fees.

Development Type	Existing Fees	Fees with Current Rates but same Quimby Formula	Park Fee Alternative 1: Park Expenditure Trends: Based on 10-year Historic Trends in Park Expenditures	Park Fee Alternative 2: Costa Mesa Housing Trends: Based on 10-year Historic Trends in Housing Development
Single-Family Residence	$13,572	$29,713.50	$11,285	$18,006
Condominiums - *Multi-Family Residence, Owner*	$13,829	$23,110.50	$8,777	$14,005
Apartments less than 50 units - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$14,005
Apartments 50 units or more - *Multi-Family Residence, Renter*	No Fee	No Fee	$10,598	$5,057

CONCLUSION:

The City's park fees have not been updated for over ten years. Council may select a methodology for calculating park fees and adopt new park fees. Important note: Staff recommends that the park fees be updated automatically every year based on the consumer price index and that the new park fees be applied to pending/future development projects that have not received zoning entitlements to date.

ORDINANCE NO. 15-

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA ADOPTING CODE AMENDMENT CO-15-04, AMENDING TITLE 13, CHAPTER XI, ARTICLE 5 RELATING TO THE ADOPTION OF NEW PARK IMPACT FEES FOR MULTI-FAMILY RESIDENTIAL RENTER DEVELOPMENT (APARTMENTS) IN COSTA MESA

THE CITY COUNCIL OF THE CITY OF COSTA MESA FINDS AND DECLARES AS FOLLOWS:

WHEREAS, Objective OSR-1A.1 of the Costa Mesa 2000 General Plan establishes the park land-to-population ratio of 4.26 acres for every 1,000 residents.

WHEREAS, California Government Code Section 66477 authorizes the legislative body of a City to require the payment of fees in-lieu of the dedication of land for park and recreation purposes.

WHEREAS, California Government Code Section 66000 authorizes the legislative body of a City to require the payment of development impact fees to defray all or a portion of the cost of public facilities related to a type of development as long as the benefit requirements are met.

WHEREAS, Chapter IX, Subdivisions, of Title 13 of the Costa Mesa Municipal Code sets forth provisions relating to the dedication of land and collection of park impact fees for park and recreation purposes on single family and multiple family residential development which are subdivided.

WHEREAS, the City Council reviewed the methodology related to calculating the park impact fees, including a review of historic parkland expenditures, review of historic housing trends, and consideration of population density standards.

WHEREAS, a duly noticed public hearing was held by the City Council on August 4, 2015 where public testimony was received for and against the fee methodology, amended park impact fees, and ordinance.

WHEREAS, in accordance with the California Environmental Quality Act (CEQA), the CEQA Guidelines, and the City's environmental procedures, the City Council finds that the adoption of this ordinance is covered by CEQA General Rule Exemption [Section 15061(b)(3)] which exempts activities that can be seen with certainty to have no possibility for causing a significant effect on the environment. A significant effect is defined as, "a substantial, or potentially substantial, adverse change in the physical conditions within the area," and the adoption of this Ordinance is therefore not subject to CEQA.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Costa Mesa hereby finds and determines that additional park fees shall be collected from all projects which meet Government Code Section 66477 and for apartment projects in the City which do not require a residential subdivision (i.e. multi-family residences; renter) by applying development impact fees for park development and acquisition purposes based on California Government Code Section 66000.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF COSTA MESA DOES HEREBY ORDAIN AS FOLLOWS:

SECTION 1: Title 13 of the Costa Mesa Municipal Code is hereby amended as described below.

A. Title 13, Chapter XI, Article 5, Section 13-250 is hereby amended to as follows:

"Sec. 13-250. PURPOSE

The purpose of this article is to establish the procedures for requiring park and recreational facilities in conjunction with residential developments ("PARK FEES"). Sections 13-251 through 13-261 relate to residential developments which require a subdivision and which shall be subject to State Government Code Section 66410 et seq. Section 13-261.1 through Section 262.8 refer to multi-family residential developments for renters ("apartments") which shall be subject to State Government Code Section 66000 et seq."

B. Title 13, Chapter XI, Article 5, Section 13-250.1 is hereby added as follows:

"Sec. 13-250.1 SINGLE-FAMILY AND MULTI-FAMILY RESIDENTIAL DEVELOPMENT WITH SUBDIVISION"

C. Title 13, Chapter XI, Article5, Section 13-256 (h) is hereby amended to as follows:

"(h) In order that the fees levied pursuant to subsection (a) keep pace with the cost of land, the fee schedule described in subsection (a) shall be periodically adjusted on a biennial basis, or as specified by City Council by resolution. The fee schedule shall be adjusted using the methodology described in subsection (a) for establishing the fee schedule."

D. Title 13, Chapter XI, Article 5, is hereby amended to include the following new sections:

"Sec. 13-261.1 MULTI-FAMILY RESIDENTIAL DEVELOPMENT FOR RENTERS (APARTMENTS)

Sec. 13-261.2 REQUIREMENT

Every residential developer who creates a multi-family residential development for renter households ("apartments") shall be required to remit a park fee as established in this section for the purpose of providing park and recreational facilities to serve the future residents of the apartments.

Sec. 13-261.3. APPLICATION

The provisions of this article shall apply to all residential developments, which are not subdivided and subject to State Government Code Section 66000 et. seq.

Sec. 13-261.4 RELATION OF LAND REQUIRED TO POPULATION DENSITY

Consistent with the General Plan, it is hereby found and determined that the public interest, convenience, health, welfare and safety require that 4.26 acres of property for each 1,000 persons residing within the City be devoted to public park and recreational purposes.

Sec. 13-261.5 POPULATION DENSITY

For the purposes of this section, population density shall be established by resolution of the City Council, utilizing the following classifications:

(a) **Apartments** Any building (or portion thereof) or collection of buildings which provide two or more self-contained dwelling units not designated for separate ownership.

(b) **Small Multiple-Family residential, renter.** Apartments and other multiple-family residential developments, with less than 50 units, where the units are for rent and are not legally subdivided for homeownership.

(c) **Large Multiple-Family residential, renter.** Apartments and other multiple-family residential developments, with 50 units or more, where the units are for rent and are not legally subdivided for homeownership.

(d) **Determination of the number of dwelling units.** The total number of dwelling units shall be determined by the number of units proposed for construction. When the actual number of units is unknown, the number of the units shall be based on the maximum number of units which are permitted by the General Plan for the property at the time the tentative or parcel map is filed with the City.

Sec. 13-261.6 PARK FEE FORMULA FOR APARTMENTS

The amount of park fee required pursuant to this section shall be based on the following formulas:

For Apartment projects with less than 50 units:

Use the fee assigned to multi-family subdivided developments in Sec. 13-255

For Apartment projects with 50 units or more:

FEE = 4.26 (D.F. x D.U. x P.C.) / 1,000

Definition of terms:

FEE – The per unit cost to be appraised for fee payment

4.26- Number of acres per 1000 persons.

A.D.F. - Apartment density factor obtained from Section 13-261.5 POPULATION DENSITY as applicable to the proposed development.

D.U. - Number of dwelling units.

P.C. Proportionate cost is the sum of the weighted cost of park land acquisition per acre of land and cost of construction per acre of land.

Sec. 13-261.7. AMOUNT OF PARK FEE FOR APARTMENTS

(a) The park impact fee for apartments must meet all benefit requirements for State Government Code Section 66000 as follows:

(1) Identifies the purpose of the fee;

(2) Identifies the use to which the fee is applied;

(3) Shows a reasonable relationship between the use of the fee and the type of development project on which the fee is imposed;

(4) Demonstrates a reasonable relationship between the need for the public facilities and the type of development projects on which the fee is imposed; and

(5) Demonstrates a reasonable relationship between the amount of the fee and the cost of the public facilities or portion of the public facilities attributable to the development on which the fee is imposed.

(b) Nothing in this section shall prohibit the dedication and acceptance of land for park and recreation purposes where the developer proposes the dedication voluntarily and the land is accepted by the City Council at their discretion. When land dedication is provided, it shall be accomplished in accordance with the provisions of the Subdivision Map Act and applicable local ordinances.

(c) If the developer objects to the amount of the fee pursuant to this section, an appeal may be made to the City Council by filing an application of appeal with the City Clerk and payment of an appeal processing fee as determined by the City Council. A notice of appeal shall be filed with the City Clerk within 7 days of payment of the fee. The developer shall have the burden of proof in contesting the amount of the fee. Within 30 days of receipt of the notice of appeal, a public hearing on the appeal shall be held by the City Council, and the decision shall be final and conclusive in determining the amount of the fee.

(d) The fee shall be paid to the Development Services Department and shall be deposited and held in appropriate trust accounts and may be expended therefrom only for the purpose of developing new or rehabilitating existing neighborhood or community park or recreation facilities to serve the development on which the fee is charged. Upon receipt of the fee, the Development Services Department shall issue a receipt, and the receipt shall be presented as proof of payment of the fee prior to the issuance of any permit for buildings and structures pursuant to this Zoning Code.

(e) In order that the fees levied pursuant to subsection (a) keep pace with the cost of land, the fee schedule described in subsection (a) shall be periodically adjusted on a biennial basis, or as specified by City Council by resolution. The fee schedule shall be adjusted using the methodology described in subsection (a) for establishing the fee schedule.

(f) Upon application to the Development Services Department, the payment of the fee may be deferred where the department makes the following findings:

(1) The developer has entered into a fee agreement with written evidence of adequate security to assure payment of the fee at a date prior to the issuance of a certificate of occupancy, and in a form approved by the City Attorney; and

(2) The deferral of the fee shall not adversely impact the development of new or the rehabilitation of existing neighborhood or community park or recreational facilities to serve the development.

Sec. 13-261.8 PROCEDURE, CREDIT

(a) **Procedure.** When fees are required, the same shall be deposited with the Development Services Department prior to issuance of building permits.

(b) **Credit.** Credit shall be granted for dwelling units demolished as a part of the development. This credit shall be limited to the number of units existing at the time of the approval of the project and shall not be transferred to other developments. A second dwelling unit legally established in conjunction with and subordinate to a primary dwelling unit in an R1 zone (i.e. accessory apartment, granny unit, granny flat, or in-law apartment) shall not be subject to the park fee."

SECTION 2: INCONSISTENCIES. Any provision of the Costa Mesa Municipal Code or appendices thereto inconsistent with the provisions of this ordinance, to the extent of such inconsistencies and or further, is hereby repealed or modified to the extent necessary to affect the provisions of this ordinance.

SECTION 3: SEVERABILITY. If any provision of clause of this ordinance or the application thereof to any person or circumstances is held to be unconstitutional or otherwise invalid by any court of competent jurisdiction, such invalidity shall not affect other provisions or clauses or applications of this ordinance which can be implemented without the invalid provision, clause or application; and to this end, the provisions of this ordinance are declared to be severable.

SECTION 4: PUBLICATION. This Ordinance shall take effect and be in full force thirty (30) days from and after the passage thereof, and prior to the expiration of fifteen (15) days from its passage shall be published once in the ORANGE COAST DAILY PILOT, a newspaper of general circulation, printed and published in the City of Costa Mesa or, in the alternative, the City Clerk may cause to be published a summary of this Ordinance and certified copy of the text of this Ordinance shall be posted in the office of the City Clerk five (5) days prior to the date of adoption of this Ordinance, and within fifteen (15) days after adoption, the City Clerk shall cause to be published the aforementioned summary and shall post in the office of the City Clerk a certified copy of this Ordinance together with the names and member of the City Council voting for and against the same.

PASSED AND ADOPTED this 4th day of August 2015.

STEPHEN M. MENSINGER

Mayor of the City of Costa Mesa

City Clerk
City Council of the City of Costa Mesa

ATTACHMENT 2

RESOLUTION NO. 05-

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA, TO IDENTIFY AND DETERMINE A METHODOLOGY FOR THE CALCULATION OF PARKLAND IMPACT FEES AND TO ADOPT NEW PARK IMPACT FEES FOR NEW SINGLE-FAMILY AND MULTI-FAMILY RESIDENTIAL DEVELOPMENT, INCLUDING APARTMENTS, IN COSTA MESA.

THE CITY COUNCIL OF THE CITY OF COSTA MESA FINDS AND DECLARES AS FOLLOWS:

WHEREAS, California Government Code Section 66477 authorizes the legislative body of a City to require the payment of fees in-lieu of the dedication of land for park and recreation purposes.

WHEREAS, Objective OSR-1A.1 of the Costa Mesa 2000 General Plan establishes the park land-to-population ratio of 4.26 acres for every 1,000 residents.

WHEREAS, Chapter IX, Subdivisions, of Title 13 of the Costa Mesa Municipal Code sets forth provisions relating to the dedication of land and collection of park impact fees for park and recreation purposes.

WHEREAS, Article 5, Section 13-256, Amount of fee in lieu of land dedication, of Title 13 of the Costa Mesa establishes the methodology for calculating parkland in-lieu fees. Based on this methodology, parkland in-lieu fees would be in excess of $23,000 per unit for single-family and multi-family residential development for specified residential subdivisions.

WHEREAS, State Law allows Council to adopt reduced parkland impact fees.

WHEREAS, the City Council reviewed the methodology related to calculating the park impact fees, including a review of historic parkland expenditures, review of historic housing trends, and consideration of population density standards.

WHEREAS, a duly noticed public hearing was held by the City Council on July 21, 2015 where public testimony was received for and against the fee methodology and amended park impact fees.

WHEREAS, Any provision of the Costa Mesa Municipal Code or appendices thereto inconsistent with the provisions of this ordinance, to the extent of such inconsistencies and or further, is hereby repealed or modified to the extent necessary to affect the provisions of this ordinance.

WHEREAS, in accordance with the California Environmental Quality Act (CEQA), the CEQA Guidelines, and the City's environmental procedures, the City Council finds that the adoption of this ordinance is covered by CEQA General Rule Exemption [Section 15061(b)(3)] which exempts activities that can be seen with certainty to have no possibility for causing a significant effect on the environment. A significant effect is defined as, "a substantial, or potentially substantial, adverse change in the physical conditions within the area," and the adoption of this Ordinance is therefore not subject to CEQA.

WHEREAS, If any provision of clause of this ordinance or the application thereof to any person or circumstances is held to be unconstitutional or otherwise invalid by any court of competent jurisdiction, such invalidity shall not affect other provisions or clauses or applications of this ordinance which can be implemented without the invalid provision, clause or application; and to this end, the provisions of this ordinance are declared to be severable.

BE IT FURTHER RESOLVED that the new park impact fees shall apply to: (1) Any live/work or residential development pending ministerial or discretionary application which is filed on or after the effective day of the resolution or (2) any previously-approved live/work or residential project which has an expiration date on or after the effective date of the resolution regardless if a time extension is approved.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Costa Mesa hereby finds and determines that the park impact fees shall be calculated based on the

methodology described in Exhibit A. This methodology also includes the calculation of park impact fees for apartment projects in the City which do not require a residential subdivision (i.e. multi-family residences; renter).

BE IT FURTHER RESOLVED that the City Council also hereby adopts new parkland impact fees as described in Exhibit B.

BE IT FURTHER RESOLVED that park impact fees shall apply to current and pending as described in Exhibit C.

BE IT FURTHER RESOLVED that the park impact fees shall be updated to ensure it meets State Government Code 66470 and 66000 in four years but be automatically adjusted on an annual basis every July using the Los Angeles-Riverside-Orange CO CA Consumer Price Index to adjust for escalation.

BE IT FURTHER RESOLVED that pursuant to State Law the above-fees shall go into effect no sooner than **60 days** after Ordinance No.____ is final and effective.

PASSED AND ADOPTED this 4th day of August 2015.

STEPHEN M. MENSINGER
Mayor of the City of Costa Mesa

ATTACHMENT 3

ARTICLE 5. PARK AND RECREATION DEDICATIONS

Sec. 13-250. PURPOSE

The purpose of this article is to establish the procedures for requiring park and recreational facilities in conjunction with residential developments ("PARK FEES"). Sections 13-251 through 13-261 relate to residential developments which require a subdivision and which shall be subject to State Government Code Section 66410 et seq. Section 13-261.1 through Section 262.8 refer to multi-family residential developments for renters ("apartments") which shall be subject to State Government Code Section 66000 et seq.

~~**Sec. 13-250. PURPOSE**~~

~~The purpose of this article is to establish the procedures for requiring park and recreational facilities in conjunction with residential subdivisions.~~

Sec. 13-250.1 SINGLE-FAMILY AND MULTI-FAMILY RESIDENTIAL DEVELOPMENT WITH SUBDIVISION

Sec. 13-251. REQUIREMENT

Every residential subdivider who creates a subdivision shall be required to dedicate a portion of the land, pay a fee in lieu thereof, or do a combination of both, as established in this article for the purpose of providing park and recreational facilities to serve future residents of the subdivision.

Sec. 13-252. APPLICATION

The provisions of this article shall apply to all residential subdivisions, as defined in State Government Code Section 66410 et seq..

(a) Subdivisions containing fewer than 5 lots and not used for residential purposes shall be exempted from the requirements of this article. However, a condition may be placed on the approval of the tentative or parcel map that if a building permit is requested for construction of a residential structure or structures on one or more of the lots within 4 years, the fee may be required to be paid by the owner of each such lot as a condition of issuing the permit.

(b) This section does not apply to commercial or industrial subdivisions, or to residential common interest development projects or stock cooperatives which consist of the subdivision of airspace in an existing apartment building which is more than 5 years old when no new dwelling units are added.

Sec. 13-253. RELATION OF LAND REQUIRED TO POPULATION DENSITY

Consistent with the General Plan, it is hereby found and determined that the public interest, convenience, health, welfare and safety require that 5.76 acres of property for each 1,000 persons residing within the City be devoted to public park and recreational purposes. The requirement will be satisfied in part by arrangements between the City and the local school district to make available for park and recreation purposes, 1.5 acres of school sites adjacent to the proposed park for each 1000 persons residing within the City. The remaining 4.26 acres of the required 5.76 acres shall be supplied as required by this article.

Sec. 13-254. POPULATION DENSITY

For the purposes of this article, population density shall be established by resolution of the City Council, utilizing the following classifications:

(a) **Single-family residential.** Detached single-family homes where there is no more than one dwelling unit on a lot.

(b) **Multiple-family residential.** Apartments, common interest developments, townhouses and similar multiple-family residential developments, including detached single-family homes where there is more than one dwelling unit on a lot.

(c) **Determination of the number of dwelling units.** The total number of dwelling units shall be determined by the number of units proposed for construction. When the actual number of units is unknown, the number of the units shall be based on the maximum number of units which are permitted by the General Plan for the property at the time the tentative or parcel map is filed with the City.

Sec. 13-255. AMOUNT OF LAND TO BE DEDICATED

The amount of land required to be dedicated by a subdivider pursuant to this section shall be based on the following formula:

A = 4.26(D.F. X D.U.)/1,000

Definition of terms:

A - The area in acres required to be dedicated as park sites or to be appraised for fee payment in lieu of dedication.

4.26- Number of acres per 1000 persons.

D.F.- Density factor obtained from Section 13-254 POPULATION DENSITY as applicable to the proposed development.

D.U.- Number of dwelling units.

Sec. 13-256. AMOUNT OF FEE IN LIEU OF LAND DEDICATION

(a) Where there is no public park or recreation facility required within the proposed subdivision, or where the subdivision contains 50 lots or fewer, the subdivider shall pay a fee in lieu of land dedication reflecting the value of land required for park and recreation purposes in accordance with the schedule of fees as adopted by resolution of the City Council. This fee shall reflect the average fair market value of neighborhood and community park land within the City. The fair market value shall be determined by an appraisal of at least one neighborhood park site and one community park site. The appraisal shall be conducted by an M.A.I. appraiser and shall consider the factors set forth in subsection (e), where applicable to the appraisal of public park land.

(b) Nothing in this section shall prohibit the dedication and acceptance of land for park and recreation purposes in subdivisions of 50 lots or fewer, where the subdivider proposes the dedication voluntarily and the land is accepted by the City Council.

(c) When a common interest development project, stock cooperative, or community apartment project exceeds 50 dwelling units, the City may elect to require dedication of land notwithstanding that the number of lots may be 50 lots or fewer.

(d) For subdivisions in excess of 50 lots, the City Council may elect to receive a fee in lieu of land dedication. The amount of such a fee shall be based upon the fair market value of land which would

otherwise be required for dedication. The fair market value shall be determined by an M.A.I. appraiser acceptable to the City and at the expense of the developer as set forth in subsection (e). If more than one year elapses between the appraisal and recording of the final map, the City shall have prepared a new appraisal and shall invoice the subdivider for the cost of the appraisal.

(e) For purposes of this section, the determination of the fair market value of neighborhood and community park land or unimproved residential land which would otherwise be required for dedication shall be determined by an M.A.I. appraiser acceptable to the City and shall consider, but not necessarily be limited to, the following:

(1) The value of the unimproved residential land by residential density shown on the tentative subdivision map at the time the final map is to be recorded;

(2) Approval of and conditions of the tentative subdivision map;

(3) The General Plan land use designation of the property;

(4) The zoning classification of the property;

(5) Property location;

(6) Off-site improvements facilitating use of the property; and

(7) Site characteristics.

(f) If the subdivider objects to the amount of the fee pursuant to this section, an appeal may be made to the City Council by filing an application of appeal with the City Clerk and payment of an appeal processing fee as determined by the City Council. A notice of appeal shall be filed with the City Clerk within 7 days of payment of the in-lieu fee. The subdivider shall have the burden of proof in contesting the amount of the fee. Within 30 days of receipt of the notice of appeal, a public hearing on the appeal shall be held by the City Council, and the decision shall be final and conclusive in determining the amount of the fee.

(g) The fee shall be paid to the Development Services Department and shall be deposited and held in appropriate trust accounts and may be expended therefrom only for the purpose of developing new or rehabilitating existing neighborhood or community park or recreation facilities to serve the subdivision on which the fee is charged. Upon receipt of the fee, the Development Services Department shall issue a receipt, and the receipt shall be presented as proof of payment of the fee prior to the issuance of any permit for buildings and structures pursuant to this Zoning Code.

(h) In order that the fees levied pursuant to subsection (a) keep pace with the cost of land, the fee schedule described in subsection (a) shall be periodically adjusted on a biennial basis, or as specified by City Council by resolution. The fee schedule shall be adjusted using the methodology described in subsection (a) for establishing the fee schedule.

~~(h) In order that the fees levied pursuant to subsection (a) keep pace with the cost of land, the fee schedule described in subsection (a) shall be periodically adjusted on a biennial basis. The fee schedule shall be adjusted using the methodology described in subsection (a) for establishing the fee schedule.~~

(i) Upon application to the Development Services Department, the payment of the fee in lieu of land dedication pursuant to this section may be deferred where the department makes the following findings:

(1) The subdivider has entered into a fee agreement with written evidence of adequate security to assure payment of the fee at a date prior to the issuance of a certificate of occupancy, and in a form approved by the City Attorney; and

(2) The deferral of the fee shall not adversely impact the development of new or the rehabilitation of existing
neighborhood or community park or recreational facilities to serve the subdivision.

Sec. 13-257. COMBINATION OF LAND AND FEE

In determining whether a subdivider shall dedicate land, pay a fee in lieu of land dedication, or a combination of both, the following procedure shall be used:

(a) Subdividers required to or desiring to dedicate property for park and recreational purposes shall, upon filing a tentative map for approval, check with the City to determine whether their property has been designated for a park site in the General Plan. If a subdivider's property is so designated, the subdivider shall coordinate with the necessary departments to incorporate the park sites(s) into the property's development plan.

(b) If the subdivider's property is not so designated, and a school site is proposed within or in proximity to the property, a park site adjacent to the school site shall be developed and the subdivider shall coordinate with the necessary departments to incorporate the park site(s) into the property's development plan.

Sec. 13-258. ACTION OF CITY

(a) At the time of tentative or parcel map approval, the Planning Commission shall determine whether to require dedication of land within the subdivision, payment of a fee in lieu thereof, or a combination of both.

(b) Determination: Whether the City accepts land dedication, requires payment of fees in lieu thereof, or a combination of both, shall be determined by consideration of the following factors:

(1) The Open Space Sub-Element of the General Plan.

(2) Provisions of Sections 13-256 AMOUNT OF FEE IN LIEU OF LAND DEDICATION, and 13-257 COMBINATION OF LAND AND FEE, of this article.

(3) Topography, geology, access and location of land in the subdivision available for dedication.

(4) Size and shape of the subdivision and the land available for dedication.

(c) The determination of the City that land shall be dedicated or a fee paid in lieu thereof, or a combination of both, shall be final and conclusive.

Sec. 13-259. PROCEDURES, CREDITS

(a) **Procedures.** When land dedication is required, it shall be accomplished in accordance with the provisions of the Subdivision Map Act and applicable local ordinances. When fees are required, the same shall be deposited with the Development Services Department prior to recordation of the map or issuance of building permits.

(b) **Credits.** Credits against the amount of land to be dedicated or the amount of fees to be paid in lieu of dedication shall be granted as follows:

(1) Existing dwelling units: Credit shall be granted for dwelling units demolished as a part of the development of the subdivision. This credit shall be limited to the number of units existing at the time of the approval of the project and shall not be transferred to other subdivisions.

(2) Privately developed, owned and maintained open space: Where private facilities for park and recreational purposes are provided in a proposed subdivision and the facilities are to be privately owned and maintained by the future residents of the subdivision, the areas occupied by the facilities shall be credited against the requirement of dedication of land for park and recreation purposes or the payment of fees in lieu thereof, to the extent that the Planning Commission finds it is in the public interest to do so and that the following standards are met:

a. That each facility is available for use by all the residents of the subdivision;

b. That the area and the facilities satisfy the recreation and park needs of the subdivision so as to reduce the need for public recreation and park facilities to serve the subdivision residents;

c. That the area provided is in excess of the minimum amount of open space required for the subdivision;

d. That the area provided in excess of required open space is not used as a credit or bonus incentive as provided in other sections of this Zoning Code; and

e. That the area provided is of sufficient size, location and design to facilitate functional use of the area to meet the park and recreation demands of the future subdivision residents.

(3) Credits shall be granted, dollar for dollar, for the value of park and recreational area and other improvements as approved by the Planning Commission. The value of the facilities shall be established by written documentation of the actual acquisition cost of the facilities paid by the subdivider.

(c) **Previous fees.** Credit shall be granted, dollar for dollar, for any park and recreation fees paid for the property pursuant to this Zoning Code within the preceding 5 years.

(d) **Improvements to dedicated land.** Credit shall be granted, dollar for dollar, if the subdivider provides park and recreation facilities and/or improvements to land dedicated for park and recreation purposes. The value of the facilities and/or improvements shall be established by written documentation of the actual acquisition cost of the facilities or construction costs of the improvements paid by the subdivider.

(e) **Limitation on credits.** The maximum amount of credits provided by this section shall not exceed 100% of the calculated fee in lieu of land dedication.

(f) **Transfer of credits.** Credits provided by this section shall not be transferred or assignable to apply to property outside of the subdivision awarded the credit.

(g) **The granting of credits.** Pursuant to Section 13-259(b) PROCEDURES AND CREDITS, credits shall be granted subject to the following conditions:

(1) The private ownership and maintenance of the facilities shall be adequately provided for by written agreement in a form acceptable to the City Attorney;

(2) The use of the private facilities is restricted for park and recreational purposes by recorded covenants which run with the land in favor of the future owners of property within the subdivision and which cannot be defeated or eliminated without the consent of the City Council;

(3) The proposed private facilities are reasonable and adaptable for use for park and recreational purposes taking into consideration such factors as size, shape, topography, geology, access and location of the private open space land; and

(4) The facilities proposed are in substantial accordance with the General Plan.

(h) **Additional credits.** In lieu of the dedication of land for park and recreation purposes or the payment of a fee, the Development Services Director, with the approval of the Planning Commission may permit the following:

(1) Dedication of land for park or recreation purposes outside of the subdivision;

(2) Improvements to be made to an existing City park or upon land being dedicated as a public park;

(3) Recreational facility to be installed upon land being dedicated as a City park; or

(4) Any combination of 1, 2, or 3, above, provided that the land to be dedicated, the improvements to be made or the facilities to be installed or constructed are so located as to bear a reasonable relationship to the use thereof by future inhabitants of the subdivision.

The dedication of land or providing of improvements or facilities may only be used as a credit against the otherwise required dedication or fee to the extent of the value of the land, improvements or facilities as determined by the Planning Commission to be equal to or greater than the value of the land which would have been dedicated or the fee which would be paid pursuant to Section 13-256 AMOUNT OF FEE IN LIEU OF LAND DEDICATION.

Sec. 13-260. STATEMENT OF CITY RESPONSIBILITY

The City shall comply with all requirements of State Government Code Section 66477 with regard to acceptance and use of land dedicated or fees paid for park and recreational purposes.

Sec. 13-261. PARK AND RECREATION FEE IN LIEU OF LAND DEDICATION NOTICE

Where the residential subdivision contains 50 lots or fewer, the Development Services Department shall affix to any permit for buildings or structures and any vesting tentative map issued pursuant to this Zoning Code located within the subdivision a notice to read as follows:

PARK AND RECREATION FEE IN LIEU OF LAND DEDICATION NOTICE:

The City of Costa Mesa is giving consideration to enactment of a resolution or ordinance, or a combination thereof, for the increase in the park and recreation fees in lieu of land dedication pursuant to Section 13-256(a) AMOUNT OF FEE IN LIEU OF LAND DEDICATION, and State Government Code Section 66477. The owner of the project designated in this permit or vesting tentative map shall be obligated to pay to the Development Services Department a park and recreation fee in lieu of land dedication if such a fee is adopted in the future by the City of Costa Mesa. The fee will only be used for the purpose of developing new or rehabilitating existing neighborhood or community park or recreational facilities to serve the subdivision.

Sec. 13-261.1 MULTI-FAMILY RESIDENTIAL DEVELOPMENT FOR RENTERS (APARTMENTS)

Sec. 13-261.2 REQUIREMENT

Every residential developer who creates a multi-family residential development for renter households ("apartments") shall be required to remit a park fee as established in this section for the purpose of providing park and recreational facilities to serve the future residents of the apartments.

Sec. 13-261.3. APPLICATION

The provisions of this article shall apply to all residential developments, which are not subdivided and subject to State Government Code Section 66000 et. seq.

Sec. 13-261.4 RELATION OF LAND REQUIRED TO POPULATION DENSITY

Consistent with the General Plan, it is hereby found and determined that the public interest, convenience, health, welfare and safety require that 4.26 acres of property for each 1,000 persons residing within the City be devoted to public park and recreational purposes.

Sec. 13-261.5 POPULATION DENSITY

For the purposes of this section, population density shall be established by resolution of the City Council, utilizing the following classifications:

(e) **Apartments** Any building (or portion thereof) or collection of buildings which provide two or more self-contained dwelling units not designated for separate ownership.

(f) **Small Multiple-Family residential, renter.** Apartments and other multiple-family residential developments, with less than 50 units, where the units are for rent and are not legally subdivided for homeownership.

(g) **Large Multiple-Family residential, renter.** Apartments and other multiple-family residential developments, with 50 units or more, where the units are for rent and are not legally subdivided for homeownership.

(h) **Determination of the number of dwelling units.** The total number of dwelling units shall be determined by the number of units proposed for construction. When the actual number of units is unknown, the number of the units shall be based on the maximum number of units which are permitted by the General Plan for the property at the time the tentative or parcel map is filed with the City.

Sec. 13-261.6 PARK FEE FORMULA FOR APARTMENTS

The amount of park fee required pursuant to this section shall be based on the following formulas:

For Apartment projects with less than 50 units:

Use the fee assigned to multi-family subdivided developments in Sec. 13-255

For Apartment projects with 50 units or more:

FEE = 4.26 (D.F. x D.U. x P.C.) / 1,000

Definition of terms:

FEE – The per unit cost to be appraised for fee payment

4.26- Number of acres per 1000 persons.

A.D.F. - Apartment density factor obtained from Section 13-261.5 POPULATION DENSITY as applicable to the proposed development.

D.U. - Number of dwelling units.

P.C. Proportionate cost is the sum of the weighted cost of park land acquisition per acre of land and cost of construction per acre of land.

Sec. 13-261.7. AMOUNT OF PARK FEE FOR APARTMENTS

(i) The park impact fee for apartments must meet all benefit requirements for State Government Code Section 66000 as follows:

(6) Identifies the purpose of the fee;

(7) Identifies the use to which the fee is applied;

(8) Shows a reasonable relationship between the use of the fee and the type of development project on which the fee is imposed;

(9) Demonstrates a reasonable relationship between the need for the public facilities and the type of development projects on which the fee is imposed; and

(10) Demonstrates a reasonable relationship between the amount of the fee and the cost of the public facilities or portion of the public facilities attributable to the development on which the fee is imposed.

(j) Nothing in this section shall prohibit the dedication and acceptance of land for park and recreation purposes where the developer proposes the dedication voluntarily and the land is accepted by the City Council at their discretion. When land dedication is provided, it shall be accomplished in accordance with the provisions of the Subdivision Map Act and applicable local ordinances.

(k) If the developer objects to the amount of the fee pursuant to this section, an appeal may be made to the City Council by filing an application of appeal with the City Clerk and payment of an appeal processing fee as determined by the City Council. A notice of appeal shall be filed with the City Clerk within 7 days of payment of the fee. The developer shall have the burden of proof in contesting the amount of the fee. Within 30 days of receipt of the notice of appeal, a public hearing on the appeal shall be held by the City Council, and the decision shall be final and conclusive in determining the amount of the fee.

(l) The fee shall be paid to the Development Services Department and shall be deposited and held in appropriate trust accounts and may be expended therefrom

only for the purpose of developing new or rehabilitating existing neighborhood or community park or recreation facilities to serve the development on which the fee is charged. Upon receipt of the fee, the Development Services Department shall issue a receipt, and the receipt shall be presented as proof of payment of the fee prior to the issuance of any permit for buildings and structures pursuant to this Zoning Code.

(m) In order that the fees levied pursuant to subsection (a) keep pace with the cost of land, the fee schedule described in subsection (a) shall be periodically adjusted on a biennial basis, or as specified by City Council by resolution. The fee schedule shall be adjusted using the methodology described in subsection (a) for establishing the fee schedule.

(n) Upon application to the Development Services Department, the payment of the fee may be deferred where the department makes the following findings:

(1) The developer has entered into a fee agreement with written evidence of adequate security to assure payment of the fee at a date prior to the issuance of a certificate of occupancy, and in a form approved by the City Attorney; and

(2) The deferral of the fee shall not adversely impact the development of new or the rehabilitation of existing neighborhood or community park or recreational facilities to serve the development.

Sec. 13-261.8 PROCEDURE, CREDIT

(a) **Procedure.** When fees are required, the same shall be deposited with the Development Services Department prior to issuance of building permits.

(b) **Credit.** Credit shall be granted for dwelling units demolished as a part of the development. This credit shall be limited to the number of units existing at the time of the approval of the project and shall not be transferred to other developments. A second dwelling unit legally established in conjunction with and subordinate to a primary dwelling unit in an R1 zone (i.e. accessory apartment, granny unit, granny flat, or in-law apartment) shall not be subject to the park fee.

REGULAR MEETING OF THE CITY OF COSTA MESA PLANNING COMMISSION

March 9, 2015

These meeting minutes represent an "action minute" format with a concise summary of the meeting. A video of the meeting may be viewed on the City's website at www.costamesaca.gov or purchased on DVD upon request.

Counsel Yolanda Summerhill led in the Pledge of Allegiance.

ROLL CALL

Present: Chair Robert Dickson
Vice-Chair Jeff Mathews
Commissioner Colin McCarthy
Commissioner Tim Sesler
Commissioner Stephan Andranian

Staff: Claire Flynn, Assistant Development Services Director
Yolanda Summerhill, Planning Commission Counsel
Fariba Fazeli, City Engineer
Willa Bouwens-Killeen, Principal Planner
Dan Inloes, Associate Planner
Chelsea Crager, Assistant Planner
Martha Rosales, Recording Secretary

PUBLIC COMMENTS

Martin Millard, Costa Mesa resident, requested Mesa North improvements on Baker Street from Fairview Street to Babb Street. Mr. Millard discussed the following; concern with outdated north-side block wall, possible barrier median at 1097 Baker Street; and improvements to dated shopping center south of Baker.

Beth Refakes, Costa Mesa resident representing the Costa Mesa Military Affairs Team, reported they were collecting Easter items through Friday, March 27, 2015 for the 1/5 Troop. A trunk is placed on the 1st Floor of City Hall to collect the Easter items.

Barrie Fisher, Costa Mesa resident representing the west side, expressed concerns of outdated and dangerous sidewalks, narrow streets and vehicle congestion, and the need for improvements before allowing more redevelopment into the area.

Ann Parker, Costa Mesa resident, inquired clarification on Abbie Way matter approved at the previous commission meeting and asked could the item be pulled back.

PLANNING COMMISSIONER COMMENTS AND SUGGESTIONS

Commissioner Andranian addressed Ms. Fisher's comment and stated he attended the meeting regarding sober living homes on March 4th, 2015. He agreed this is an important issue for the City and staff is working on a new ordinance for R2 neighborhoods.

Commissioner Sesler mentioned the crime mapping feature on the City of Costa Mesa's website is functioning after a yearlong absence.

Commissioner Sesler appreciated Ms. Fisher on her consistent requests for City repairs through Costa Mesa Connect and agreed an investment - either public and/or private - needs to be made.

Commissioner Sesler addressed Ms. Park's concern and acknowledged the challenging issue and asked the citizens to report incidents or complaints thru Costa Mesa Connect.

Commissioner McCarthy requested clarity on the Wharf decision and how it could affect the City.

Commissioner McCarthy agreed the block wall on Baker Street needs an update and requested staff to look into it.

Commissioner McCarthy attended Costa Mesa Little League opening day and expressed concern that many children are migrating to other cities to play sports.

Vice Chair Mathews addressed comments made regarding condition of the west side of the City and offered to look into the matter.

Chairman Dickson announced the city is conducting a community workshop for the East West bicycle connection taking place Wednesday, March 18, 2015 in the Emergency Operation Center adjacent to the police department from 6:00pm-7:30pm.

Chairman Dickson addressed speaker comments regarding the cinder block walls on Baker Street; plans for possible medians; and sidewalk infrastructure and rehabilitation. Fariba Fazeli, City Engineer, provided an update.

Chairman Dickson addressed the Abbie Way appeal. Claire Flynn, Assistant Development Services Director, stated that the appeal deadline expired Monday, March 2, 2015 and absent the receipt of a timely appeal application and appeal fee if applicable, the matter cannot be re-opened.

Chairman Dickson addressed west side plan review. Claire Flynn, Assistant Development Services Director, confirmed the matter will go before the Planning Commission in April or May.

CONSENT CALENDAR:

Chair Dickson pulled Consent Calendar Item No. 2 for discussion.

1. Minutes for the meeting of February 23, 2015.

   MOTION: Approve February 23, 2015 Minutes. Moved by Commissioner McCarthy, seconded by Commissioner Sesler.

   The motion carried by the following roll call vote:

Ayes:	Dickson, Mathews, McCarthy, Sesler, Andranian
Noes:	None
Absent:	None
Abstained:	None

2. Update of major development activity and demographic trends in Costa Mesa.

   Claire Flynn, Assistant Development Services Director, presented part one of a two part PowerPoint that showcased major development activity and trends.

Chair Dickson expressed excitement on the median projects presented and asked if any Baker Street improvements were included in the plan. Claire Flynn, Assistant Development Services Director, and Fariba Fazeli, City Engineer, provided an update.

Commissioner McCarthy asked if Fairview Development Center still employed 1,500 employees and inquired on statistics, plans and tracking of soil remediation. He commended the staff on the great presentation and for doing a great job meeting applicant and community needs.

Commissioner Sesler asked whether staff tracked economic impact in terms of taxes. Claire Flynn, Assistant Development Services Director, provided some general information and added an economic consultant will produce additional data for Part Two of the presentation coming in April.

Commissioner Andranian asked for data on park fees and increased property tax revenue generated by new developments. He also requested to see before and after pictures of the developments in part two of the presentation. Commissioner Andranian asked for clarification on the resident statistics, specifically the 19-39 age range and if they were employed. Claire Flynn, Assistant Development Services Director, confirmed the statistic shows working age only.

Chair Dickson agreed before and after pictures for planning projects are important.

PUBLIC COMMENTS - None

MOTION: Receive and file. Moved by Commissioner McCarthy, seconded by Commissioner Sesler.

The motion carried by the following roll call vote:

Ayes:	Dickson, Mathews, McCarthy, Sesler, Andranian
Noes:	None
Absent:	None
Abstained:	None

PUBLIC HEARINGS:

1. **Application No.** PA-14-48, R-14-05 and TT-17824; Master Plan Development for a 13-Unit, Two-Story Residential Development with a Rezone and Tentative Tract Map at 2880 Mesa Verde Drive East
   Applicant: Pinnacle Residential
   Site Address: 2880 Mesa Verda Drive East
   Zone: I & R
   Project Planner: Mel Lee
   Environmental Determination: The project is categorically exempt under Section 15332 of the State CEQA (California Environmental Quality Act) Guidelines – Class 32 (In-Fill Development Projects).

   Description: The proposed project involves the following:
   1. ***Rezone R-14-05:*** An ordinance to rezone the 2-acre site from I&R (Institutional and Recreational) to PDR-LD (Planned Development Residential—Low Density). The maximum allowable General Plan density would be 16 dwelling units at a density of 8 dwelling units per acre.
   2. ***Planning Application PA-14-48:*** Master Plan for the development of a 13-unit, two-story detached residential development at a density of 6.5 dwelling units

per acre. The Master Plan also includes the following requested deviations from Zoning Code requirements:

- Variance from perimeter open space requirement for location of block walls (20 feet required, 3 feet proposed on Mesa Verde Drive East);
- Administrative Adjustment from perimeter open space requirement for buildings (20 feet required, 13 feet proposed on Andros Street);

3. ***Tentative Tract Map T-17824:*** Subdivision of property into fee simple lots for homeownership.

Mel Lee, Senior Planner, reported the applicant was reviewing comments received from Mesa Verde residents and possibly making modifications to the proposed development; hence, the request for a continuance to the first meeting in March.

PUBLIC COMMENTS - None

MOTION: Continue to a future Planning Commission meeting with public noticing required. Moved by Commissioner McCarthy, seconded by Commissioner Andranian.

The motion carried by the following roll call vote:

Ayes:	Dickson, Mathews, McCarthy, Sesler, Andranian
Noes:	None
Absent:	None
Abstained:	None

2. **Application No.:** ZA-14-38: An appeal by the applicant of the denial of a minor conditional use permit at 111 Del Mar Avenue
Applicant: ZA-14-38
Site Address: 111 Del Mar Avenue
Zone: C1
Project Planner: Chelsea Crager
Environmental Determination: This project is categorically exempt under CEQA section 15301 if approved; or exempt under CEQA section 15270(a) if disapproved.

Description: Appeal by the applicant of the denial of a minor conditional use permit to legalize existing outdoor kiosks for DVDs (Redbox) and Glacier Water in front of a Circle K convenience store. This request was denied by the Zoning Administrator.

Chelsea Crager, Assistant Planner, presented the staff report in response to appeal filed on January 24, 2015. The project was found to be exempt from the provisions of the California Environmental Quality Act under Section 15301 Existing Facilities and staff recommends planning commission uphold the Zoning Administrator's decision to deny Minor Conditional Use Permit ZA-14-38.

Commissioner McCarthy asked if water and movie rentals could be located inside or outside. Ms. Crager, Assistant Planner, confirmed there are no codes requiring items to be located outside.

Chair Dickson asked if adding a new vending machine such as water or Redbox kiosk impact parking calculations. Ms. Crager, Assistant Planner, confirmed the vending machines are not used in parking calculations as they are considered part of the convenience store.

Ahmad Gharderi, applicant, thanked the staff for their work and guidance through the process. Mr. Ghaderi addressed three items of concern; first that the two vending machines are not visible from Del Mar; second there have been no water leakage issues as the water vending machines are self-contained and are equipped with a containment tray to catch possible leaks; and third there is approximately 48 inches plus in front of the units to allow safe ADA accessibility. Mr. Gharderi stated inside or outside placement of DVD and water vending machines have no impact on sales generated; however, outside placement is preferred for customer's convenience. Mr. Gharderi asked if the Planning Commission would reconsider their decision based on the information he provided.

Commissioner McCarthy referred to the Supplemental Staff Report which chronicled 135 Police calls for service and asked applicant if more calls were anticipated and given the volume of disturbances, would it not be safer to have the vending machines inside. Mr. Gharderi was not familiar with the Supplemental Staff Report but does not anticipate more calls.

Commissioner Mathews asked if 24 hour security could be provided. Mr. Gharderi stated he could not provide a response.

Commissioner Sesler referred to a July 2014 code enforcement violation which required outside vending machines be removed and Circle K did not comply. Mr. Gharderi was unaware of the July 2014 violation and could not respond. Commissioner Sesler asked what type of security cameras operate at the store and if there was access to a security guard. Mr. Gharderi stated the store is open 24 hours a day and runs closed circuit cameras running 24/7 and the store does not have a security guard.

Commissioner Andranian asked if the vending machine were moved inside would other merchandise be displaced. Mr. Gharderi stated yes and reiterated the outside placement is for customer convenience.

PUBLIC COMMENTS – None

Chair Dickson stated concern for safety given proximity to a residential area and is amendable to continuing the matter.

Commissioner McCarthy stated he was not in support of placing services outside the store and upholds the staff's recommendation.

Commissioner Mathews agreed with the decision and upholds the staff's recommendation.

MOTION: Planning Commission uphold the Zoning Administrator's decision to deny a minor conditional use permit to legalize outdoor placement of a water vending machine and an outdoor DVD rental kiosk at the Circle K convenience store based on the findings put forth in the record. Moved by Commissioner McCarthy, seconded by Commissioner Andranian.

RESOLUTION 15-13 - A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF COSTA MESA UPHOLDING THE ZONING ADMINISTRATOR'S DENIAL OF ZONING APPLICATION ZA-14-38 AND DENY A MINOR CONDITIONAL USE PERMIT FOR OUTDOOR USES LOCATED AT 111 DEL MAR AVENUE (CIRCLE K STORE)

Chair Dickson stated the commission encourages business but in this case, the commission does not support the permit.

The motion carried by the following roll call vote:

Ayes:	Dickson, Mathews, McCarthy, Sesler, Andranian
Noes:	None
Absent:	None
Abstained:	None

NEW BUSINESS ITEM(S):

1. Review of Proposed Parkland Impact Fees

Dan Inloes, Associate Planner, presented the staff report.

David Taussig, president of David Taussig & Associates, gave presentation on the Quimby Act and Methodology of Park Fee Update.

PUBLIC COMMENTS:

Jay Humphrey, Costa Mesa resident, stated he was happy staff brought the item forward but. Mr. Humphrey expressed concern with the numbers of residents and acreage used in the presentation and how that could impact fee cost, property owners opting to pay fees since they are less than property dedication and if conversions are allowed, they should not get fee exemptions.

Steven LaMotte, Director of Government Affairs of the Business Industry Association, supported the proposal.

Beth Refakes, Costa Mesa resident, addressed concerns with the fee proposal. Ms. Refakes would like to see further breakdown of bedrooms per residence, to see an automatic adjustment for inflation and what other cities are doing to calculate fees.

Commissioner McCarthy stated he doesn't think it is realistic for the city to be purchasing park space in the future but supports the methodology and BIA support. Commissioner McCarthy would like a future meeting to see if there are plans from Public Services to acquire park space.

Chair Dickson supported the methodology but would like to find a better way of quantifying apartments.

Commissioner Sesler supports the methodology but is concerned with the location.

MOTION: Receive and file. Moved by Commissioner McCarthy, second by Chair Dickson.

The motion carried by the following roll call vote:

Ayes:	Dickson, Mathews, McCarthy, Sesler, Andranian
Noes:	None
Absent:	None
Abstained:	None

EXECUTIVE SUMMARY

In order to adequately plan for new development and identify the public park and recreation facilities and costs associated with mitigating the direct and cumulative impacts of new development, David Taussig & Associates, Inc. ("DTA") was retained by the City of Costa Mesa (the "City") to prepare an AB 1600 Fee Justification Study (the "Park Fee Study"). The Park Fee Study is intended to comply with Section 66000 *et. seq.* of the Government Code (the "Act" or "AB 1600"), which was enacted by the State of California in 1987, by identifying the additional public park and recreation facilities required by new development ("Future Park Facilities") and determining the level of fees that may be imposed to pay the costs of the Future Park Facilities. Fee amounts have been determined that will finance park and recreation facilities at the standard established in the City's General Plan, or 4.26 acres of improved park and recreation facilities for every 1,000 new residents. The Future Park Facilities and estimated land acquisition and associated construction costs per residential dwelling unit are identified in Section IV of the Park Fee Study. A description of the methodology used to calculate the fees is included in Section V. All new residential development may be required to pay its "fair share" of the cost of the new infrastructure through the development fee program.

ORGANIZATION OF THE REPORT

Section I of this report provides an introduction to the Park Fee Study including background information on development fee financing. Section II provides an overview of the legal requirements for implementing and imposing the fee amounts identified in the Park Fee Study. Section III includes a discussion of household sizes, or persons per household, for residential land uses within the City. Section IV includes a description of the Future Park Facilities needed to serve new residential development that are eligible for funding by the impact fees, including estimated costs, offsetting revenues, net costs to the City and costs attributable to new residential development. Section V discusses the findings required under the Mitigation Fee Act and requirements necessary to be satisfied when establishing, increasing or imposing a fee as a condition of new residential development, and satisfies the nexus requirements for the Future Park Facilities. In addition, Section V contains the description of the methodology used to determine the fees. Appendix A includes a map showing the location of the properties comprising the vacant land sale data employed in the Park Fee Study. Appendices B – J identify the park and recreation facilities cost data employed in the Park Fee Study.

IMPACT FEE SUMMARY

The recommended Future Park Facilities fee amounts are summarized in Table ES-1 below. Table ES-1 includes two fee level alternatives developed by City staff that reflect historical and projected rates of parkland acquisition. Fees within this Park Fee Study reflect a range of fee levels that may be imposed on new residential development depending upon the residential dwelling unit type.

TABLE ES-1
DEVELOPMENT IMPACT FEE SUMMARY

FACILITY	RESIDENTIAL DEVELOPMENT			
			APARTMENT	
	SINGLE FAMILY ($ PER UNIT)	MULTI-FAMILY ($ PER UNIT)	<50 UNIT PROJECTS ($ PER UNIT)	>=50 UNIT PROJECTS ($ PER UNIT)
Park and Recreation Facilities				
Alternative 1 (Historical Parkland Acquisition[1])	$11,285.19	$8,777.37	$10,597.56	$10,597.56
Alternative 2 (Projected Parkland Acquisition[2])	$18,006.38	$14,004.96	$14,004.96	$5,056.61[3]

[1] Based on the City's rate of parkland acquisition from 2006 through 2014 which results in park and recreation facilities costs of $949,500 per acre.

[2] Based on the City's projected rate of parkland acquisition which results in park and recreation facilities costs of $1,515,000 per acre.

[3] Fee for apartment projects with 50 or dwelling units adjusted (i) in consideration of typical on-site amenities, (ii) persons per household case study for an existing greater than 50 dwelling unit apartment project, and (iii) citywide distribution of apartment dwelling unit type (i.e., studio, 1 bedroom, 2 bedroom, and 3 or more bedroom dwelling units) for greater than 50 dwelling unit apartment projects.

I. INTRODUCTION

In order to adequately plan for new residential development and identify the public park and recreation facilities and costs associated with mitigating the direct and cumulative impacts of new residential development, David Taussig & Associates, Inc. ("DTA") was retained by the City to prepare a new AB 1600 Fee Justification Study (the "Park Fee Study"). The need for this Park Fee Study is driven by anticipated residential development, including development on which the City's existing Quimby Act fee cannot generally be imposed, such as the redevelopment of existing property into multi-family uses without the subdivision of land.

The Park Fee Study is intended to comply with Section 66000 *et. Seq.* of the Government Code, which was enacted by the State of California in 1987, by identifying additional public park and recreation facilities required by new residential development ("Future Park Facilities") and determining the level of fees that may be imposed to pay the costs of the Future Park Facilities. Fee amounts have been determined that will finance park and recreation facilities at the standard established in the City's General Plan, or 4.26 acres of improved park and recreation facilities for every 1,000 new residents. The Future Park Facilities and estimated land acquisition and associated construction costs per residential dwelling unit are identified in Section IV of the Park Fee Study. All new residential development may be required to pay its "fair share" of the cost of the Future Park Facilities through the development fee program.

Based upon projections from the Center for Demographics Research, California State University, Fullerton (the "Center"), new residential development is expected to result in approximately 5,213 new residents within the City by 2040, representing an approximate 4.7% increase compared to the Center's 2012 population estimate for the City. The City will need to expand its public park and recreation facilities to accommodate the impacts of this growth and the levy of impact fees in conformance with AB 1600 legislation will help finance new park and recreation facilities which are needed to mitigate these impacts. The following steps were incorporated in the Park Fee Study:

1. **Demographic Assumptions**: Identify future housing growth that will generate the increased demand for park and recreation facilities.
2. **Facility Needs and Costs**: Identify the amount and cost of park and recreation facilities required to meet the demands of new residential development. Facilities costs are discussed in Section IV.
3. **Cost Allocation**: Allocate these costs per new residential dwelling unit.
4. **Fee Schedule**: Calculate the fee per new residential dwelling unit.

II. LEGAL REQUIREMENTS TO JUSTIFY DEVELOPMENT IMPACT FEES

Prior to World War II, development in California was held responsible for very little of the cost of public infrastructure. Public improvements were financed primarily through jurisdictional general funds and utility charges. It was not uncommon during this period for speculators to subdivide tracts of land without providing any public improvements, expecting the closest city to eventually annex a project and provide public improvements and services.

However, starting in the late 1940s, the use of impact fees grew with the increased planning and regulation of new development. During the 1960s and 1970s, the California Courts broadened the right of local government to impose fees on developers for public improvements that were not located on-site. More recently, with the passage of Proposition 13, the limits on general revenues for new infrastructure have resulted in new development being held responsible for a greater share of public improvements, and both the use and levels of impact fees have grown substantially. Higher fee levels were undoubtedly driven in part by a need to offset the decline in funds for infrastructure development from other sources.

The levy of impact fees is one authorized method of financing the public facilities necessary to mitigate the impacts of new development. A fee is "a monetary exaction, other than a tax or special assessment, which is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project..." (California Government Code, Section 66000). A fee may be levied for each type of capital improvement required for new development, with the payment of the fee typically occurring prior to the beginning of construction of a dwelling unit. Fees are often levied at final map recordation, issuance of a certificate of occupancy, or more commonly, at building permit issuance. However, Assembly Bill ("AB") 2604 (Torrico) which was signed into law in August 2008, encourages public agencies to defer the collection of fees until close of escrow to an end user in an attempt to assist California's then troubled building industry.

The authority of local governments to impose impact fees on development is derived from their police power to protect the health and welfare of citizens under the California Constitution (Article 11, Section 7). Furthermore, the California Mitigation Fee Act provides a prescriptive guide to establishing and administering impact fees based on "constitutional and decisional law." Development impact fees ("DIFs") were enacted under Assembly Bill 1600 by the California Legislature in 1987 and codified under California Government Code §66000 *et. seq.*, also referred to as the Mitigation Fee Act (the "Act" or "AB 1600").

AB 1600 defines local governments to include cities, counties, school districts, special districts, authorities, agencies, and other municipal corporations. Fees governed by the Act include development fees of general applicability, and fees negotiated for individual projects. The Act does not apply to user-fees for processing development applications or permits, fees governed by other statutes (e.g., the Quimby Act), developer agreements, or penalties, or fees specifically

excluded by the Act (e.g., fees collected pursuant to agreements with redevelopment agencies or various reimbursement agreements).

Public facilities that can be funded with impact fees are defined by the Act as "public improvements, public services, and community amenities." Government Code, §65913.8 precludes the use of DIFs to fund maintenance or services, with limited exceptions for very small improvements and certain temporary measures needed by certain special districts. In combination, these provisions effectively restrict the use of most impact fees to public capital improvements.

For general information, please see:

- "Exactions and Impact Fees in California: A Comprehensive Guide to Policy, Practice, and the Law," edited by William Abbott, et al., Solano Press Books, 2012 Third Edition.

The City has identified the need to levy development impact fees to pay for public park and recreation facilities. The development impact fees presented in this study will finance public park and recreation facilities for new development at the level established by the City in its General Plan. Upon the adoption of the Park Fee Study and required legal documents by the City Council, all new residential development will be required to pay its "fair share" of the cost of public park and recreation facilities through these development impact fees.

In 2006, Government Code Section 66001 was amended to clarify that a development impact fee cannot include costs attributable to existing deficiencies, but can fund costs used to maintain the existing level of service or meet an adopted level of service that is consistent with the general plan. This Park Fee Study for the City is intended to meet the nexus or benefit requirements of AB 1600, which mandates that there is a nexus between fees imposed, the use of the fees, and the development projects on which the fees are imposed.

Section 66000 et seq. of the Government Code requires that all public agencies satisfy the following requirements when establishing, increasing or imposing a fee as a condition of new development:

1. Identify the purpose of the fee. (Government Code Section 66001(a)(1))

2. Identify the use to which the fee will be put. (Government Code Section 66001(a)(2))

3. Determine that there is a reasonable relationship between the fee's use and the type of development on which the fee is to be imposed. (Government Code Section 66001(a)(3))

4. Determine how there is a reasonable relationship between the need for the public facility and the type of development project on which the fee is to be imposed. (Government Code Section 66001(a)(4))

5. Discuss how there is a reasonable relationship between the amount of the fee and the cost of the public facility or portion of the public facility attributable to the development on which the fee is imposed.

Identifying these items will enable a development impact fee to meet the nexus and rough proportionality requirements established by previous court cases. This section presents each of these items as they relate to the imposition within the City of the proposed development impact fees for public park and recreation facilities. Current state financing and fee assessment requirements only allow new development to pay for its fair share of new facilities' costs. Any current deficiencies resulting from the needs of existing development must be funded through other sources. Therefore, a key element to establishing legal development impact fees is to determine what share of the benefit or cost of the new facilities can be equitably assigned to existing development, even if the facilities have not yet been constructed. By removing this factor, the true impact of new development can be assessed and equitable development impact fees assigned.

A. Purpose of the Fee (Government Code Section 66001(a)(1))

Based upon projections from the Center for Demographics Research, California State University, Fullerton (the "Center"), new residential development is expected to result in approximately 5,213 new residents within the City by 2040. These future residents will create an additional demand for public park and recreation facilities that existing public park and recreation facilities cannot accommodate. In order to accommodate new residential development in an orderly manner, without adversely impacting the current quality of life in the City, additional public park and recreation facilities will need to be constructed.

It is the projected direct and cumulative effect of future residential development that has required the preparation of this Park Fee Study. Each new residential dwelling unit will contribute to the need for new public park and recreation facilities, and as such, the proposed impact fee will be charged to all future residential development, irrespective of location, in the City. While a significant portion of the City's future residential development can be characterized as "in fill" development projects, these projects contribute to impacts on public park and recreation facilities because they are an interactive component of a much greater universe of development located throughout the City. First, the residents associated with any new residential development in the City have access to and in fact may regularly utilize and benefit from the City's park and recreation facilities. Second, these residents may have chosen to purchase or rent the specific homes in which they reside partially as a result of the parks and other recreational opportunities located nearby. Third, the availability of park and recreation facilities throughout the City has a growth-inducing impact, in that it enhances the City's reputation as a great place to live, thereby attracting new development that may have otherwise gone elsewhere. As a result, all residential development projects in the City contribute to the cumulative need for new park and recreation facilities throughout the

City. The development impact fees, when collected, will be placed into a dedicated fund that will be used solely for the design, acquisition, installation, and construction of public park and recreation facilities and other appropriate costs to mitigate the direct and cumulative impacts of new residential development in the City.

The discussion in this subsection of the Park Fee Study sets forth the purpose of the development impact fee as required by Section 66001(a)(1) of the California Government Code.

B. THE USE TO WHICH THE FEE IS TO BE PUT (GOVERNMENT CODE SECTION 66001(A)(2))

The development impact fee will be used specifically for the design, acquisition, installation, and construction of the public park and recreation facilities discussed in Section IV of the Park Fee Study and related costs necessary to mitigate the direct and cumulative impacts of new residential development in the City. By directly funding these costs, the development impact fees will both enhance the quality of life for future City residents and protect their health, safety, and welfare.

The discussion presented in this subsection of the Park Fee Study identifies the use to which the development impact fee is to be put as required by Section 66001(a)(2) of the California Government Code.

C. DETERMINE THAT THERE IS A REASONABLE RELATIONSHIP BETWEEN THE FEE'S USE AND THE TYPE OF DEVELOPMENT PROJECT UPON WHICH THE FEE IS IMPOSED (BENEFIT RELATIONSHIP) (GOVERNMENT CODE SECTION 66001(A)(3))

As discussed in Section A above, it is the projected direct and cumulative effect of future residential development that has prompted the preparation of this Park Fee Study. Each residential dwelling unit will contribute to the need for new public park and recreation facilities. Even future "in fill" development projects, which may be adjacent to existing park and recreation facilities, contribute to impacts on such facilities because they are an interactive component of a much greater universe of development located throughout the City. Consequently, all residential new development within the City, irrespective of location, contributes to the direct and cumulative impacts of development on public park and recreation facilities and creates the need for new facilities to accommodate growth.

As set forth in Section V of the Park Fee Study, the fees will be expended for the design, acquisition, installation, and construction of new public park and recreation facilities identified in Section IV, as that is the purpose for which the DIF is collected. As previously stated, all new residential development creates either a direct impact on park and recreation facilities or contributes to the cumulative impact on park and recreation facilities.

For the foregoing reasons, there is a reasonable relationship between the design, acquisition, construction, and installation of the public park and recreation facilities and new residential development as required under Section 66001(a)(3) of the Mitigation Fee Act.

D. Determine How There is a Reasonable Relationship Between the Need for the Public Facility and the Type of Development Project Upon Which the Fee is Imposed (Impact Relationship) (Government Code Section 66001(a)(4))

As set forth in part A above, all new residential development contributes to the direct and cumulative impacts on public park and recreation facilities and creates the need for new facilities to accommodate growth. Also as previously stated, all new residential development within the City, irrespective of location, contributes to the direct and cumulative impacts of development on public park and recreation facilities and creates the need for new facilities to accommodate growth. Moreover, the public park and recreation facilities identified in Section IV are specifically a function of the number of projected future residents within the City and do not reflect any unmet needs of existing development.

For the reasons presented herein and in Section V, there is a reasonable relationship between the need for the public park and recreation facilities and all new residential development within the City as required under Section 66001(a)(4) of the Mitigation Fee Act.

E. The Relationship Between the Amount of the Fee and the Cost of the Public Facilities Attributable to the Development Upon Which the Fee is Imposed ("Rough Proportionality" Relationship) (Government Code 66001(a)

As set forth above, all new residential development in the City impacts public park and recreation facilities. Moreover, each individual residential development project and its related increase in population will adversely impact existing park and recreation facilities. Thus, imposition of the development impact fee to finance new public park and recreation facilities is an efficient, practical, and equitable method of permitting development to proceed in a responsible manner.

New development impacts the need for public park and recreation facilities directly and cumulatively. Even new development located adjacent to existing facilities will have access to and benefit from new public park and recreation facilities. Again, the design, acquisition, construction, and installation of the public parks and recreation facilities in Section IV are specifically a function of projected new residents within the City and do not reflect any unmet needs of existing development.

As set forth in part F below, the proposed development impact fee amounts are roughly proportional to the impacts resulting from new residential development. Thus there is a

reasonable relationship between the amount of the development impact fee and the cost of the public park and recreation facilities.

F. AB 1600 Nexus Test and Apportionment of Facilities Costs

Section 66000 of the Government Code requires that a reasonable relationship exist between the need for public facilities and the type of development on which a development impact fee is imposed. The need for public park and recreation facilities is related to the level of service established in the City's General Plan, which varies in proportion to the persons per household ("PPH") generated by a particular residential land use.

DTA established fees for the following three residential land use categories to acknowledge the difference in PPH impacts from various residential land uses. The City will develop a table of general plan land use designations that link to the land use classifications used in this study for clarification and consistency with City zoning. This table will be made a part of the ordinance or resolution that will be adopted for the purpose of implementing this development impact fee program.

Table II-1

Land Use Classification for Park Fee Study
Single Family Residential ("SFR")
Multi-family Owner ("Multi-family")
Apartment

The costs associated with the public park and recreation facilities needed to serve new residential development are identified in Section IV. As mentioned above, the public park and recreation facilities costs per person drive the development impact fee amount for each land use classification and establish that there is a reasonable relationship between the need for public park and recreation facilities and the residential land use type characterizing the development on which a development impact fee is being imposed. Section V presents the nexus test and the analysis undertaken to apportion public park and recreation facilities costs to each residential land use classification.

III. DEMOGRAPHICS

In order to determine the public park and recreation facilities needed to serve new development as well as establish fee amounts to fund such facilities, the City commissioned a demographics analysis from Stanley R. Hoffman Associates ("SRH"). SRH utilized Public Use Microdata Areas ("PUMA") data to estimate PPH for each residential land use type. Population and occupied households derived from the PUMA data for the Costa Mesa area are shown in Tables III-1 and III-2 below.

TABLE III-1

POPULATION AND HOUSEHOLD – OWNER OCCUPIED UNITS		
RESIDENTIAL DWELLING UNIT TYPE	PERSONS	HOUSEHOLDS
Mobile Home or Trailer	1,013	439
One-Family House Detached	35,500	12,476
One-Family House Attached	5,015	2,502
2 Apartments	347	119
3-4 Apartments	992	385
5-9 Apartments	513	293
10-19 Apartments	333	166
20-49 Apartments	111	94
50 or More Apartments	173	81
Boats	20	20
Total	**44,017**	**16,575**

TABLE III-2

POPULATION AND HOUSEHOLD – RENTER OCCUPIED UNITS		
RESIDENTIAL DWELLING UNIT TYPE	PERSONS	HOUSEHOLDS
Mobile Home or Trailer	159	121
One-Family House Detached	10,867	3,373
One-Family House Attached	4,109	1,510
2 Apartments	4,228	1,317
3-4 Apartments	15,208	4,572
5-9 Apartments	7,668	2,624
10-19 Apartments	7,360	3,047
20-49 Apartments	7,435	3,678
50 or More Apartments	6,226	3,111
Boats	26	26
Total	**63,286**	**23,379**

All One-Family House Detached and One-Family House Attached units are classified as SFR units. Owner occupied Apartments are classified as Multi-family units. Renter occupied Apartments are classified as Apartment units. Grouping the data accordingly results in the PPH shown in Table III-3 below.

TABLE III-3

PPH			
RESIDENTIAL DWELLING UNIT TYPE	PERSONS	HOUSEHOLDS	PPH
SFR	55,491	19,861	2.79
Multi-family	2,469	1,138	2.17
Apartment	48,125	18,349	2.62
Total/Average	**106,085**	**39,348**	**2.70**

In addition, City staff conducted a case study analysis of the PPH for large apartment projects using an existing apartment project with over one hundred (100) dwelling units. City staff

calculated PPH separately for studio, one bedroom, two bedroom, and three or more bedrooms. The results of this case study are shown in Table III-4 below.

TABLE III-4

PPH AND EDUs
LARGE APARTMENT PROJECT CASE STUDY

RESIDENTIAL DWELLING UNIT TYPE	DISTRIBUTION[1]	PPH
Studio	9.5%	1.2000
1 Bedroom	45.5%	1.5000
2 Bedroom	40.6%	2.1000
3+ Bedroom	4.4%	2.8000
Total/Weighted Average	**100.0%**	**1.7723**

[1]Distribution based on all existing apartment projects within the City with 50 or more dwelling units.

IV. PARK AND RECREATION FACILITIES

Government Code Section 66000, which codifies California's Mitigation Fee Act, requires that if impact fees are going to be used to finance public facilities, those facilities must be identified prior to the adoption of the fee. There are three basic methodologies that can be employed to determine the facilities to be financed. The first methodology, which is called a "Plan-Based Approach," is based on the existence of a "Facilities Plan" that lists the specific facilities necessary to serve future growth. The Facilities Plan utilized under this approach is usually prepared by a municipality's staff and/or consultants, often with community input, and is then adopted by the municipality's legislative body either prior to or at the same time the fee program is approved. The Facilities Plan also identifies the costs of the facilities listed, and these costs are in turn allocated based on the level of benefit to be received by projected future land uses anticipated to be developed within the time period being analyzed. In the case of the City, the only existing Park and Recreation Facilities Plan was prepared and adopted by the City Council in 2002 and is out of date. While the City is now working with the community to prepare a new Park and Recreation Facilities Plan, the completion of this Facilities Plan and its adoption by City Council is not imminent. As a result, a Plan-Based Approach is infeasible at this time.

A second methodology to identify facilities needs is the "Capacity-Based Approach," and is based on the magnitude of existing capacity or expanded capacity needed for a type of public facility in order to handle projected growth during the selected time period. This approach works best for facilities such as an existing water storage facility or sewer treatment plant where existing costs or facilities expansion costs necessary to serve future development are already known (and in the case of existing capacity, may have already been expended). This kind of fee is not necessarily dependent on a particular land use plan for future development, but is instead based on the cost per unit of constructing the remaining existing capacity in a facility, or the cost to expand such capacity, which can then be applied to any type of future development. However, the City has already determined that, based on a standard of 4.26 acres per 1,000 residents, there is no existing surplus of park and recreation facilities that is available to serve new development. Furthermore, the City has not determined what specific improvements could be added to existing park facilities to adapt them to use by a greater population of residents, nor the cost of such improvements, so insufficient information was available to employ the "Capacity-Based Approach" in this Park Fee Study.

A third approach is to utilize a facilities "standard" established for future development, against which facilities costs are determined based on units of demand from this development. This approach, which is often applied to park and recreation facilities when there is no existing Facilities Plan, establishes a generic unit cost for capacity, which is then applied to each land use type per unit of demand. This standard is not based on the cost of a specific existing or future facility, but rather on the cost of providing a certain standard of service, such as the 4.26 acres of park and recreation facilities per 1,000 residents established by the General Plan. This method has several advantages, including not requiring a municipality to know (i) the cost of a specific facility, (ii) how much capacity or service is provided currently (as the new standard does not

necessarily need to reflect the existing standard), or (iii) the size, site, or characteristics of specific future facilities.

In the case of the City, in which specific facility sites or sizes, or types of park and recreation improvements or facilities have not yet been determined, the City does intend to acquire (or require future development to provide on-site) 4.26 acres per 1,000 new residents, whether those residents are generated by Single Family, Multi-family, or Apartment dwelling units. As a result, a "Standards-Based Approach" was determined by the City and DTA to be the most appropriate methodology for purposes of calculating impact fees for the Park Fee Study. Since no specific park and recreation sites and/or facilities have been determined to-date, specific costs are not yet known. Consequently, it was necessary to estimate what anticipated land acquisition costs could be expected, as well as which types of improvements should be included in developing these future parks and the costs related to constructing these improvements. Further information on these improvement costs and types is provided below in Section IV.A, below.

A. LAND ACQUISITION COSTS

As the City is already substantially built out, it is anticipated that sites for new park and recreation facilities will be limited to the acquisition of small parcels of vacant or underutilized land, such as underutilized public facilities, surplus school property, or industrial property or low-density residential property on which existing uses could be cost-effectively demolished. Without knowing which specific sites will be acquired by the City, DTA conducted a survey of vacant sites within the City that have been purchased over the past twelve years, and calculated a weighted average price per acre. Table IV-1, below, reflects land use and acreage data, dates of sale, and sale prices per acre for the eight (8) vacant land parcels reported by LoopNet.com as having been sold within the City since 2003. Based on these data, the City will be utilizing an estimated land price of $2,500,000 per acre as the cost of new parkland, with an annual price escalator applied on July 1st of each year, starting July 1, 2016, based on the change to the Los Angeles-Riverside-Orange County Consumer Price Index in the previous calendar year.

TABLE IV-1

VACANT LAND SALES CITY OF COSTA MESA				
DATE SOLD	PARCEL LOCATION[1]	SITE ACREAGE	TYPE OF USE	SALE PRICE PER ACRE
4/30/2009	2	0.76	Industrial	$1,650,000
9/22/2008	6	1.61	Multifamily	$3,226,667
12/31/2006	1	0.72	Commercial/Other	$2,969,655
5/5/2006	5	0.42	Multifamily	$2,744,384
6/8/2005	7	0.25	Multifamily	$3,682,801
2/23/2004	8	0.24	Commercial/Other	$2,534,389
7/14/2003	3	0.61	Retail	$2,131,147
5/21/2003	4	0.76	Retail	$1,578,947
			Weighted Average Sales Price per Acre	**$2,564,000**

[1] See Appendix A
Source: LoopNet.com

B. PARK IMPROVEMENT TYPES AND COSTS

As noted previously, the specific types of improvements/facilities to be constructed within future City parks have not yet been specifically identified, but are expected to be included in the City Park Facilities Plan that is currently being prepared by City staff, with the assistance of the community. In order to maintain as much flexibility as possible, City and DTA staff have prepared a generic list of facilities/improvements that could potentially be included within these future parks. The types of park facilities listed in Table IV-2 are expected to be financed, in whole or in part, through the levy of a development impact fee on all future residential development in the City.

TABLE IV-2

TYPES OF PARK IMPROVEMENTS TO BE FINANCED	
Amphitheatre	Picnic Tables
Ball Fields (Baseball, Football, Soccer, Multi-Use)	Playground (Tot Lot, Water Play)
Bike Paths	Recreation Center
Bike Rack	Restrooms
Community Events Center	Retaining Walls and Fencing
Concession Building	Security Lighting
Courts (Basketball, Horseshoe, Tennis, Volleyball)	Shade Structures
Demolition	Site Furniture
Drinking Fountains	Site Preparation
Grading / Earthwork	Skate park
Irrigation and Landscaping	Swimming Pool
Park Benches	Synthetic Turf Fields
Parking Lot/Paving	Trash Receptacles
Pedestrian Path/Trails	Utilities (Drainage, Sewer, Water, Gas, Electrical)
Permanent Sports Lighting	

In an effort to determine the appropriate cost of the types of public park and recreation facilities listed in Table IV-2, DTA collected park and recreation facilities cost information for recently constructed public parks in Southern California. These cost data are shown in Table IV-3 and were obtained from a park and recreation facilities cost database derived from other DTA park fee studies, as well as on-line and municipality-provided park cost information. While the source data for certain parks included design and other soft costs, the majority of the source data did not. Therefore, with the exception of Desiderio Park, for which it was not feasible to exclude design costs, the park and recreation facilities cost figures in Table IV-3 do not include design costs, meaning that they are generally conservative. Notably, the Cities of Encinitas, Lake Forest, and Laguna Niguel park construction costs are based on actual bids, while the construction costs for the other parks listed are estimates provided by the municipalities in which the parks were to be developed.

To determine the weighted average public park and recreation facilities construction cost per acre, the high and low construction cost estimates (Desiderio Park and Veteran's Memorial Park) were excluded from the computations because they appeared to be outliers. The resulting weighted average public park and recreation facilities construction cost is $391,074 per acre and the City will be utilizing an estimated construction cost of $390,000 per acre. As is the case for land acquisition costs, estimated park improvement/facilities costs will be adjusted on July 1st of

each year, starting July 1, 2016, based on the change to the Los Angeles-Riverside-Orange County Consumer Price Index in the previous calendar year. Detailed park and recreation facilities construction costs are included in Appendices B - J.

TABLE IV-3

PARK AND RECREATION FACILITIES CONSTRUCTION COSTS					
PUBLIC AGENCY	PARK	YEAR	ACRES	ESTIMATED CONSTRUCTION COST	ESTIMATED CONSTRUCTION COST PER ACRE
Encinitas	Encinitas Community Park	2012	44.0	$13,927,642 [1]	$316,537
Jurupa Area Rec and Parks District	Horseshoe Lake Park	2006	13.0	$2,375,000	$182,692
Jurupa Area Rec and Parks District	Veteran's Memorial Park	2006	9.98	$1,487,750	$149,073
Lake Forest	Sports Park	2013	86.20	$35,888,810	$416,344
Laguna Niguel	Crown Valley Park	2014	18.00	$4,599,531	$255,529
Pasadena	Desiderio Park	2014	3.80	$2,410,000 [3]	$634,211
Redondo Beach	Heart Park	2003	76.5	$32,473,900 [2]	$424,495
San Marcos	Bradley Park	2012	34.0	$12,492,484	$367,426
Tustin	Tustin Legacy	2014	31.50	$16,816,265	$533,850
Weighted Average (Excluding High and Low Data Points)					**$391,074**

[1] Excludes $5,250,000 for EIR, design, and development.
[2] Excludes $91,864,600 for remediation/site preparation.
[3] Includes design costs.

C. PARK AND RECREATION FACILITIES COSTS

1. MAXIMUM PARK AND RECREATION FACILITIES COSTS

Adding the $2,500,000 per acre in land acquisition costs to the $390,000 per acre in improvements costs yields a full cost for park and recreation facilities of $2,890,000 per acre. Note, the City has no revenues (e.g., grants, general obligation bond proceeds, etc.) with which it can offset these facilities costs.

2. ALTERNATIVE 1

The City's ability to acquire parkland has been hampered for two reasons. One, the City has to-date imposed park fees pursuant to the Quimby Act which is not applicable to apartment projects. As a result, only forty percent (40.00%) of the residential dwelling units developed within the City since 2000 have paid park fees. In short, park fee revenues have been insufficient to acquire parkland in amounts consistent with the City's

goals. Two, there is a limited supply of vacant land remaining within the City. Since 2006, the City has acquired park land equivalent to twenty-two and thirty-eight hundredths percent (22.38%) of the potential park acreage it would have purchased had it expended the full component of park impact fees collected that were intended for land acquisition. Specifically, total park fee expenditures since 2006 have equaled $15,494,816 which indicates that the City could have acquired and developed 5.36 acres of parkland ($15,494,816 divided by $2,890,000). The actual park acreage acquired since 2006 was only 1.2 acres, which equals 22.38% of the potential park acres that should have been acquired. Given a continuation of this practice by the City, the amount anticipated to be spent on land acquisition would be only 22.38% of $2,500,000 per acre, or the equivalent of $559,500 per acre for each of the 4.26 acres per 1,000 new residents. If this trend was to continue in the future, total adjusted parkland acquisition and recreation facilities costs would be $949,500 per acre ($559,500 for land acquisition plus $390,000 for improvements).

3. ALTERNATIVE 2

Alternative 2 recognizes that this Park Fee Study will establish a development impact fee for park and recreation facilities that will be applicable to all residential development, and therefore the City anticipates that there will be fee revenues sufficient to acquire parkland in the future at approximately twice the historical (2006 – 2014) rate, or forty-five percent (45.00%), resulting in the expenditure of an equivalent of $1,125,000 per acre for each of the 4.26 acres per 1,000 new residents. Total adjusted parkland acquisition and recreation facilities costs projected under this scenario would be $1,515,000 per acre ($1,125,000 for land acquisition plus $390,000 for improvements). In addition, Alternative 2 (i) caps the fee for apartment projects comprised of fewer than fifty (50) dwelling units at the fee level for Multi-family and (ii) substitutes the Alternative 1 land acquisition cost of $559,500 per acre adjusted by an additional fifty percent (50.00%) for apartment projects with fifty (50) or more dwelling units in recognition that a DIF for Apartments has not previously been imposed and large apartment projects typically include on-site recreation amenities such as a recreation or community room, dog runs, pools, barbecues, etc. Total adjusted parkland acquisition and recreation facilities costs for apartment projects with 50 or more dwelling units would be $669,750 per acre ($559,500 for land acquisition multiplied by 0.50 (or $279,750) plus $390,000 for improvements).

Section V below shows the calculation of the development impact fees for park and recreation facilities for all three scenarios.

V. METHODOLOGY UTILIZED TO CALCULATE DEVELOPMENT IMPACT FEES

Pursuant to the nexus requirements of Government Code 66000, a local agency is required to "determine how there is a reasonable relationship between the amount of the development impact fee and the cost of the public facility or portion of the public facility attributable to the development on which the fee is imposed." It is impossible to accurately determine the impact that a specific new residential unit will have on existing facilities. Predicting future residents' specific behavioral patterns, park, and health and welfare requirements is extremely difficult, and would involve numerous assumptions that are subject to substantial variances. Recognizing these limitations, the Legislature drafted AB 1600 to specifically require that a "reasonable" relationship be determined, not a direct cause and effect relationship. This reasonable relationship, which was discussed in detail in Section II of the Park Fee Study, is summarized in Table V-1.

TABLE V-1

PUBLIC PARK AND RECREATION FACILITIES AB 1600 NEXUS TEST	
Identify Purpose of Fee	Park and Recreation Facilities
Identify Use of Fee	The design, acquisition, installation, and construction of public park and recreation facilities, including parkland
Demonstrate how there is a reasonable relationship between the need for the public facility, the use of the fee, and the type of development project on which the fee is imposed	New residential development will generate additional residents who will increase the demand for active and passive park and recreation facilities within the City. Land will have to be purchased and improved to meet this increased demand, thus a reasonable relationship exists between the need for park and open space facilities and the impact of residential development. Fees collected from new development will be used exclusively for park and open space facilities identified in Section IV.

There are many methods or ways of calculating development impact fees, but they are all based on determining the cost of needed improvements and assigning those costs equitably to various types of development. Development impact fees in this study have been calculated utilizing a "standards-based" methodology. The fee levels are a function of (i) the City's existing park standard of 4.26 acres per 1,000 residents, (ii) the estimated cost per acre for new park and recreation facilities, and (iii) the estimated PPH. One global assumption utilized within this Park Fee Study for the allocation of costs between existing and new development relates to the allocation of costs based on the facilities standard. The public parks and recreation facilities described in Section IV are 100% allocated to new residential development because these facilities are specifically a function of projected new residents within the City and do not reflect any unmet needs or deficiency pertaining to existing development. The recommended fee levels and fee calculation methodologies are summarized in Tables V-2 and V-3 below.

TABLE V-2

PARK AND RECREATION ALTERNATIVE 1 DEVELOPMENT IMPACT FEES BASED ON HISTORICAL RATE OF PARKLAND ACQUISITION FROM 2006 - 2014				
(A) RESIDENTIAL DWELLING UNIT TYPE	(B) PPH	(C) ACRES / 1,000[1]	(D) COST / ACRE	(E) FEE
Single Family	2.79	4.26	$949,500	$11,285.19[2]
Multi-family	2.17	4.26	$949,500	$8,777.37[2]
Apartment	2.62	4.26	$949,500	$10,597.56[2]

[1] Column C represents the General Plan standard of 4.26 park and recreation acres per 1,000 residents.
[2] Fee equals Column B x Column C / 1,000 x Column D.

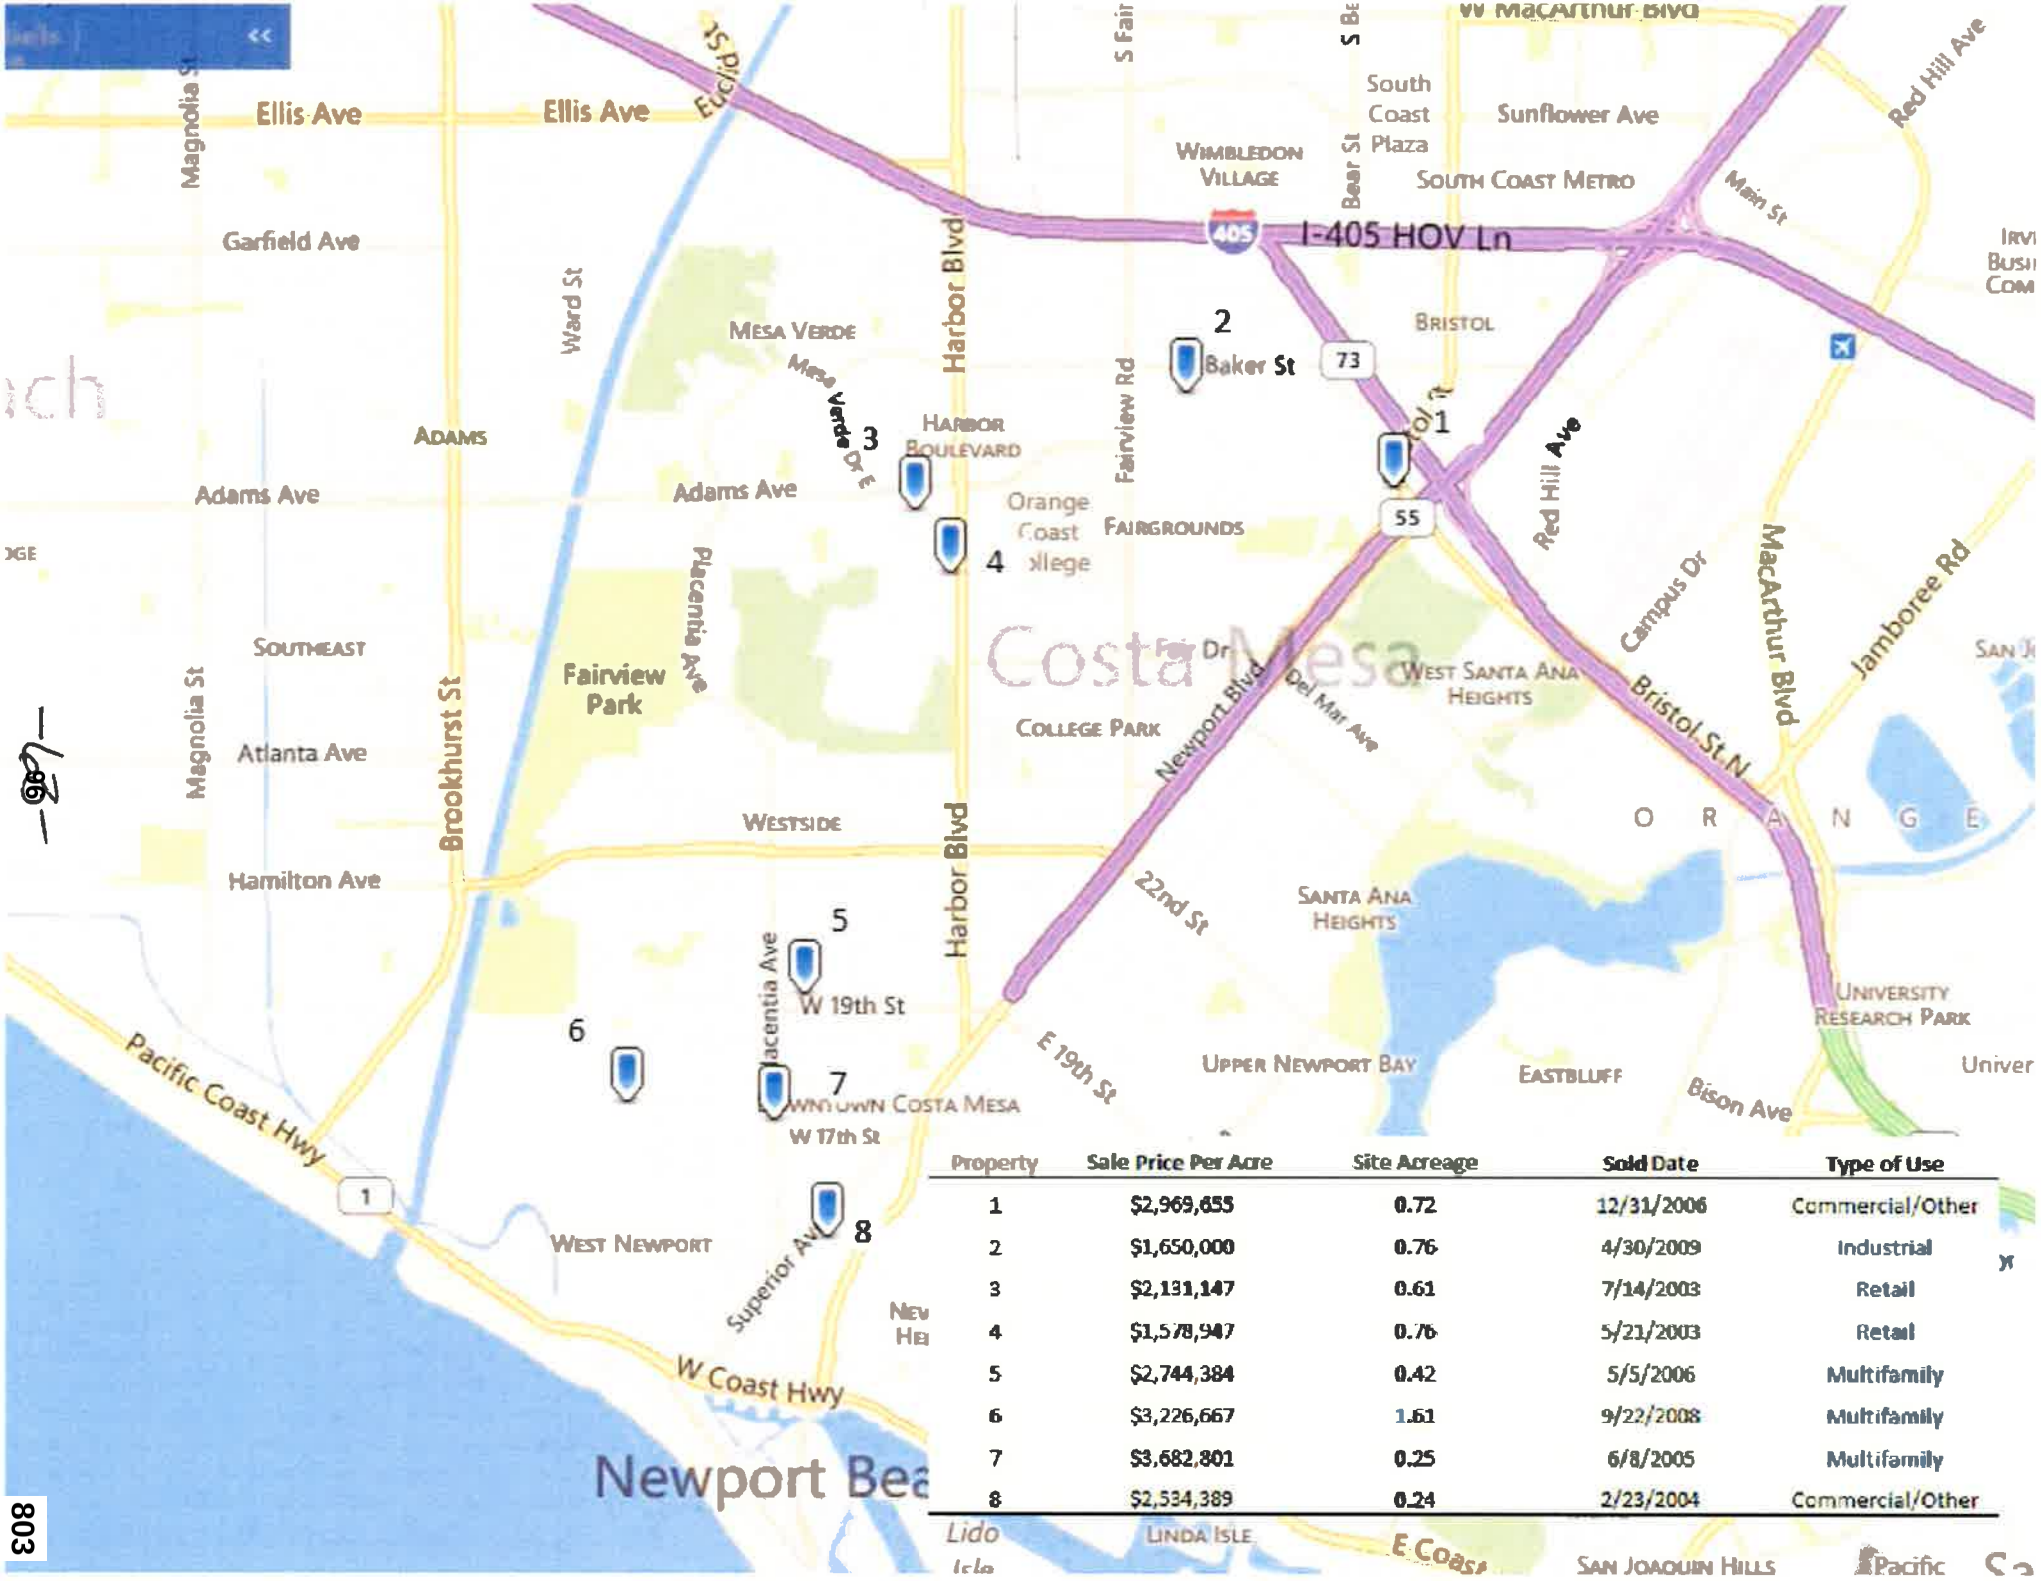

TABLE V-3

PARK AND RECREATION ALTERNATIVE 2 DEVELOPMENT IMPACT FEES BASED ON PROJECTED RATE OF PARKLAND ACQUISITION				
(A) RESIDENTIAL DWELLING UNIT TYPE	(B) PPH	(C) ACRES / 1,000[1]	(D) COST / ACRE	(E) FEE
Single Family	2.7900	4.26	$1,515,000	$18,006.38[2]
Multi-family	2.1700	4.26	$1,515,000	$14,004.96[2]
Apartment				
< 50 Project Dwelling Units	2.6200	4.26	$1,515,000	$14,004.96[3]
>= 50 Project Dwelling Units	1.7723	4.26	$669,750	$5,056.61

[1] Column C represents the General Plan standard of 4.26 park and recreation acres per 1,000 residents.
[2] Fee equals Column B x Column C / 1,000 x Column D.
[3] Capped at fee level for Multi-family.

APPENDIX A

MAP OF VACANT LAND SALES

Property	Sale Price Per Acre	Site Acreage	Sold Date	Type of Use
1	$2,969,655	0.72	12/31/2006	Commercial/Other

JURUPA AREA RECREATION AND PARKS DISTRICT
HORSESHOE LAKE PARK CONSTRUCTION COST DATA

Jurupa Area Recreation and Park District
Source: DTA, DIF Study, 2006

Summary

	Total Costs
Land Acquisition	n/a
Construction	$2,375,000
Park Acres	13.00
Construction Cost per Acre	$182,692

Improvement/Construction Costs Detail

Description	**Subtotal**	**Total**
Horseshoe Lake Park		
Design and Development of Horseshoe Lake Park	$2,375,000	$2,375,000

APPENDIX D

JURUPA AREA RECREATION AND PARKS DISTRICT
VETERAN'S MEMORIAL PARK CONSTRUCTION COST DATA

Jurupa Area Recreation and Park District
Source: DTA, DIF Study, 2006

Summary

	Total Costs
Land Acquisition	n/a
Construction	$1,487,750
Park Acres	9.98
Construction Cost per Acre	$149,073

Improvement/Construction Costs Detail

Description	Subtotal	Total
Veteran's Memorial Park		$1,487,750
BBQs, Picnic Tables, Benches, and Trash Receptacles	$18,750	
ADA Drinking Fountains	$4,000	
Security Lighting	$31,250	
Picnic Shelter and Slab	$81,250	
Half Court Basketball Court	$27,500	
Construction of Restroom Combination Storage Building	$181,250	
Demolition of Horseshoe Court Area	$18,750	
Construction of Teen Mini-Activity Center with Outdoor Amphitheatre	$1,125,000	

APPENDIX E

CITY OF LAKE FOREST – SPORTS PARK

Lake Forest - Skate Park
Source: Bid Results, 2013

Summary

	Total Costs
Land Acquisition	n/a
Construction	$35,888,810
Park Acres	86.20
Construction Cost per Acre	$416,344

Improvement/Construction Costs Detail

Description	**Subtotal**	**Total**	
			$35,888,810
Project Start Up		$1,937,400	
General Construction	$1,700,000		
Temporary Construction Fence	$60,900		
Construction Staking and Surveying	$120,000		
Traffic Control, Public	$6,500

Landscape		$3,997,500
Soil Preparation / Fine Grading	$230,000	
Planting and Landscape	$2,035,000	
Dwarf Hybrid Bermuda Turf (Sod), Complete	$865,000	
Hydroseed Mix No. 1	$10,000	
Synthetic Turf Drainage System		
Fields A & B	$260,000	
Batting Cages	$12,500	
Sand at South Tot Lot	$1,000	
Engineered Wood Fiber at South Tot Lot	$27,500	
Infield Mix at Ball Fields 1-5	$180,000	
Hilltopper' Mound Mix at Ball Field 4	$5,000	
'La Cresta' Boulders for	$65,000	
Thematic Dry Creek Bed	$10,000	
Dos Rios Cobble for all	$40,000	
Cobble Edging at Building Perimeter	$2,000	
90-Day Site	$254,500	
Bid Alternatives		$1,935,000
Dwarf Hybrid Bermuda	$605,000	
Natural Stone Veneer	$1,130,000	
Import Dirt Contingency	$100,000	
Export Dirt Contingency	$100,000	

APPENDIX F

CITY OF LAGUNA NIGUEL – CROWN VALLEY PARK

Laguna Niguel - Crown Valley Community Park
Source: Bid Results, 2014

Summary

	Total Costs
Land Acquisition	n/a
Construction	$4,599,531
Park Acres	18.00
Construction Cost per Acre	$255,529

Improvement/Construction Costs Detail

Description	Quantity		Unit Cost	Subtotal	Total	Grand Total
						$4,599,531
General					$177,052.00	
Mobilization (Not to exceed 2% of contract price)	1.00	LS	$90,000.00	$90,000.00		
Develop Construction Water	1.00	LS	$9,740.00	$9,740.00		
Payment and Performance Bonds	1.00	LS	$68,850.00	$68,850.00		
Construction Field Office	1.00	LS	$6,377.00	$6,377.00		
Traffic Control	1.00	LS	$2,085.00	$2,085.00		
Site Preparation					$28,907.38	
Clearing and Grubbing	1.58	AC	$11,361.00	$17,950.38		
Instill Temporary Construction Chain Link Fence	1.00	LS	$10,957.00	$10,957.00		
Rough Grading						
Over Excavation (5 ft average) unsuitable material excavation and recompaction (keyway)	13,010.00	CY	$6.50	$84,565.00	$171,342.00	
Ampitheatre - 4" PVC Schedule 40 Perforated Pipe	3,280.00	CY	$8.60	$28,208.00		
Back Drain with Filter Material	304.00	LF	$50.00	$15,200.00		
4" PVC Schedule 40 Pipe	135.00	LF	$21.00	$2,835.00		
On-Site Export Materials Disposal/Handling	3,070.00	CY	$8.00	$24,560.00		
Erosion Control (Entire Site)	1.00	LS	$15,974.00	$15,974.00		
Demolition					$71,950.00	
Exist Ampitheatre Area - Demolition	1.00	LS	$40,433.00	$40,433.00		
Ex. Spray Ground Play Area - Demolition	1.00	LS	$31,517.00	$31,517.00		
Precise Grading Construction - Ampitheatre					$120,902.00	
6" Curb per OCPW STD 120-2	103.00	LF	$18.00	$1,854.00		
3' Cross Gutter	69.00	SF	$17.00	$1,173.00		
4" AC/10" AB	1,271.00	SF	$10.00	$12,710.00		
Sidewalk Access Ramp	1.00	EA	$1,768.00	$1,768.00		
Grade Keyway 5'x15'	150.00	CY	$36.28	$5,442.00		
Replace Salvaged Gate	1.00	EA	$3,305.00	$3,305.00		
0" to 6" Curb Transition	-	LF	$0.00	$0.00		
0" Curb per OCPW STD 120-2	-	LF	$0.00	$0.00		
10" Wide Seatwall	122.00	LF	$222.00	$27,084.00		
Seatwall (18" Wall Retaining-Note 18)	112.00	LF	$243.00	$27,216.00		
Concrete (Retaining Wall-H-Varies)	400.00	SF	$75.83	$30,332.00		
12" Wide Border with Grooves	1.00	EA	$185.00	$185.00		
Landscape Tie Steps	3.00	EA	$692.00	$2,076.00		
Seatwall (18" Wall Retaining-Note 20)	23.00	LF	$263.00	$6,049.00		
DG Trail	427.00	SF	$4.00	$1,708.00

ORANGE COUNTY CHAPTER

March 9, 2015

Chairman Robert Dickson and Planning Commission Members
City of Costa Mesa
77 Fair View Drive
Costa Mesa, CA 92626

Re: **COMMENTS ON PROPOSED PARKLAND IMPACT FEES**

Dear Chairman Dickson,

On behalf of our membership, we are in support of the proposed update to the City's Parkland In-Lieu Fees Program (Parkland Impact Fees). We would like to thank City staff for the opportunity to review the proposed fee adjustment, and for requesting our input in this important matter.

The Building Industry Association of Southern California, Orange County Chapter (BIA/ OC) is a non-profit trade association of nearly 1,000 companies employing over 100,000 people affiliated with the home building industry. The Orange County Chapter represents the largest member base within BIA Southern California. Our mission is to champion housing as the foundation of vibrant and sustainable communities.

After review of the City staff's report related to the proposed Parkland Impact Fees, we are pleased to see a reduction from the current fee program for Single Family and Multi-Family Owner dwelling units (condominiums). Housing costs in our region are affected by development fees, we applaud City staff for re calibrating the City's park fees in accordance with the requirements of State law.

As always, we remain a resource to the City on important issues that are related to the well-being of our local communities.

Thank you for time and thoughtful consideration.

Respectfully,

Michael Balsamo

RESOLUTION NO. 2022-xx

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA, CONTINUING THE CITYWIDE TRAFFIC IMPACT FEE FOR NEW DEVELOPMENT IN THE CITY OF COSTA MESA AND CONDUCTING THE RELATED ANNUAL REVIEW OF THE CITYWIDE TRAFFIC IMPACT FEE PROGRAM AND CAPITAL IMPROVEMENT PLAN FOR TRANSPORTATION IMPROVEMENTS

WHEREAS, California Government Code section 66000 *et seq.* enables cities to charge fees for transportation facilities; and

WHEREAS, Section 13-274 of the Costa Mesa Municipal Code authorizes the City Council to, by resolution, establish a development impact fee program based on the capital improvement program; and

WHEREAS, in 1993, by Resolution No. 93-43, the City Council established a traffic impact fee program and the rate of the traffic impact fee based upon a Traffic Impact Fee Study; and

WHEREAS, each year since 1993, the City has continued the traffic impact fee program; and

WHEREAS, on December 7, 2021, the City Council established a traffic impact fee of Two Hundred Thirty-Five Dollars ($235.00) per Average Daily Trip (ADT) based upon a Traffic Impact Fee Study completed in 2018; and

WHEREAS, California Government Code section 66001(d) requires the City to make specified findings every five years with respect to any portion of the traffic impact fees collected that remain unexpended in its account, including (1) identifying the purpose to which the fee is to be put; (2) demonstrating a reasonable relationship between the fee and the purpose for which it is charged; (3) identifying all sources and amounts of funding anticipated to complete financing of incomplete improvements; and (4) designating approximate dates on which the anticipated funding is expected to be deposited into the appropriate account; and

WHEREAS, California Government Code section 66002(b) further requires a separate annual review and update of the City's capital improvement plan for improvements to be paid for by traffic impact fees; and

WHEREAS, California Government Code section 66006(b) requires the City to make available to the public within 180 days of the last day of the fiscal year certain information, including but not limited to, a description of the type of fee, the amount of the fee, the amount of fees collected and the interest earned thereon, identification of each public improvement on which fees were expended and the amount of the expenditures on each improvement, identification of an approximate date by which the construction of the public improvement will commence if the City determines that sufficient funds have been collected to complete financing of an incomplete public improvement, and the beginning and ending balance of the traffic impact fee account or fund for the previous fiscal year; and

WHEREAS, the 2016 General Plan requires the City to maintain a traffic impact fee for improvements to the Master Plan of Streets and Highways and that the City review and update the fees on a regular basis; and

WHEREAS, pursuant to the 2016 General Plan and the Costa Mesa Municipal Code, the City has elected to conduct the review of traffic impact fees required by California Government Code section 66001(d) on an annual basis in conjunction with its review of the capital improvement plan required by California Government Code section 66002(b) and the annual accounting required by California Government Code section 66006(b)(1); and

WHEREAS, the City reviewed and updated the capital improvement plan on June 15, 2022 in connection with its Measure M2 reporting; and

WHEREAS, a primary purpose of this resolution is to continue the traffic impact fee based on the 2018 Traffic Impact Fee Study and to enable the City to continue the traffic impact fee; and

WHEREAS, the traffic impact fee is necessary because new development increases the need for transportation/circulation facilities in the City of Costa Mesa not only during peak periods, but throughout the day, and the City transportation/circulation system will be burdened by the demands of carrying vehicles of a larger number of persons and cargo due to new commercial, industrial, and residential uses; and

WHEREAS, the 2015-2035 General Plan as well as Environmental Impact Report No. 1049 indicate that development of new commercial, industrial and residential uses is

expected to exceed current commercial, industrial and residential uses and, accordingly, the City transportation/circulation systems will need to be increased in capacity to carry the increase in the number of vehicles due to new commercial, industrial and residential uses; and

WHEREAS, the Public Services Department has conducted an audit of the accounts for the traffic impact fee program for the fiscal year ending June 30, 2022, which is attached hereto as Exhibit "A" and incorporated herein; and

WHEREAS, pursuant to California Government Code section 66006, the audit was available for public inspection and review at least fifteen (15) days prior to the City Council review of the audit on November 15, 2022 and notice was mailed to all interested parties on record at least fifteen (15) days prior to the public hearing held on November 15, 2022; and

WHEREAS, the City Council conducted a public hearing on November 15, 2022, received testimony and evidence from interested parties in the City of Costa Mesa, and has evaluated justification for renewal of the traffic impact fee given economic and social factors, as well as average fees charged by surrounding cities.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF COSTA MESA HEREBY FINDS, DETERMINES, AND RESOLVES AS FOLLOWS:

Section 1. The City Council hereby finds that:

a. The foregoing recitals are true and correct and are incorporated herein by reference.

b. The purpose of the traffic impact fee is to fund transportation/circulation improvements including active transportation improvements within the City of Costa Mesa which are directly related to the incremental traffic/vehicle burden imposed upon the City transportation/circulation system by the development of new commercial, industrial and residential uses.

c. The fee will be used to fund transportation and circulation improvements within the City of Costa Mesa.

d. There is a reasonable relationship between the traffic impact fee's use and the development projects on which the fee is imposed because the transportation/circulation facilities funded by the fee are needed to

accommodate the incremental new traffic/vehicle burdens generated by the development of new commercial, industrial and residential uses upon which the fee is imposed.

e. There is a reasonable relationship between the need for the transportation/circulation facilities and the development of new commercial, industrial and residential projects upon which the fee is imposed because the new development projects paying the fee will receive a direct benefit from the transportation/circulation facilities funded by the fee; the transportation/circulation facilities funded by the fee will increase traffic/vehicle circulation capacity on streets and highways directly burdened by the increase in traffic/vehicles generated by new development projects upon which the fee is charged; the cost of transportation/circulation facilities attributed to existing deficiencies, existing land uses and population, excess and reserve capacity, and regional transportation needs have been excluded from the fee calculation, and such costs are not included in the fee to be paid by the development.

f. There is no portion of the fees deposited into the traffic impact fee fund that remains unexpended.

g. The capital improvement plan is adequate to provide the facilities for which the traffic impact fee is charged and does not need to be amended.

h. The audit by the Public Services Department set forth in Exhibit “A” accurately reflects the balance of the traffic impact fee account on the fees collected, the interest thereon, and other income and amount of expenditures and refunds of the traffic impact fee made by the City of Costa Mesa during the prior fiscal year.

Section 2. The City Council of the City of Costa Mesa hereby renews the traffic impact fee and establishes traffic impact fee regulations as follows:

a. The traffic impact fee shall be a fee of $235.00 per each new average daily vehicle trip end generated by all new commercial, industrial and residential developments. To encourage active transportation in Costa Mesa, staff shall provide a five percent (5%) reduction in ADT development trips for

active transportation project benefits and may provide an additional five percent (5%) reduction in ADT development trips for a development project which proposes to implement active transportation improvements beyond those which would ordinarily be required by the City as a condition of approval for such development project.

b. The traffic impact fee established pursuant to this resolution shall be collected and administered in accordance with all requirements of California Government Code section 66000 *et seq.*, the Costa Mesa Municipal Code and prior resolutions of the City Council.

c. There shall be no limitation on the amount of traffic impact fees which may be allocated toward active transportation projects.

d. Staff may allocate up to ten percent (10%) of traffic impact fees towards traffic signal synchronization projects.

Section 3. The City Council of the City of Costa Mesa hereby approves the updated comprehensive transportation/circulation system capital improvement plan as identified at the June 21, 2022 City Council meeting pursuant to Government Code section 66002.

PASSED AND ADOPTED this 15th day of November, 2022.

CITYWIDE TRAFFIC IMPACT FEE ANNUAL REVIEW - REPORT

Background

Pursuant to California Government Code Section 66000, et seq. and the Costa Mesa Municipal Code, a traffic impact fee study is required by the City to establish a basis for the imposition of Citywide traffic impact fees on new and expanding developments within the City. The purpose of the fee is to fund the necessary transportation/circulation improvements, which are related directly to the incremental traffic impacts imposed on the City's transportation system by the development of new and/or changing commercial, industrial, and residential uses as permitted by the General Plan. The fee also maintains compliance with the eligibility requirements of the Orange County Transportation Authority's (OCTA) Renewed Measure "M2" Program (Measure "M2").

The City Council has reviewed the Citywide Traffic Impact Fee Program each year since the fee program was first adopted in 1993. The City Council, in July 1993, also approved the formation of an Ad Hoc Committee consisting of representatives from various stakeholder groups to work with staff on all aspects related to the revision and updating of traffic impact fees.

The City Council subsequently appointed an Ad Hoc Committee consisting of members representing large and small developers, the Chamber of Commerce, citizens-at-large, as well as members representing the City Council and the Planning Commission, to assist staff in the development and review of the traffic impact fee.

The current Ad Hoc Committee members and their representation are as follows:

Jason Kensey (Chair)	At Large Representative
George Sakioka (Vice Chair)	Major Developers' Representative
Steve Brahs	Small Developers' Representative
Matt Eimers	At Large Representative
Vacant	Chamber of Commerce

City Council Liaisons:

Council Member Don Harper
Council Member Arlis Reynolds

Planning Commission Liaison:

Commissioner Jonathan Zich

The City Council, in June 2012, authorized a comprehensive review of the City's General Plan, including the Land Use and Circulation Elements. The General Plan was completed and finalized in 2016.

The last major update of the Traffic Impact Fee Study was completed in November 2018. The update took into account the most recent land use and circulation information contained in the 2016 General Plan update. The proposed General Plan circulation improvements identified in the new transportation model form the basis for the traffic impact fee update. A revised traffic impact fee calculation was conducted taking into account the 2016 General Plan and updated traffic analysis model. The estimated costs for various improvements were reviewed and updated using the most recent construction cost data. The Ad Hoc Committee, together with staff, reviewed all conditions and analyzed different trip fee scenarios. Several variations of improvement options were considered, and it was determined that trip fees in the range of $176 per ADT through $476 per ADT could be justified.

On December 7, 2021, the City Council adopted Resolution No. 21-48, approving a traffic impact fee of $235 per Average Daily Trip (ADT) to be continued with the inclusion of Active Transportation projects, selecting a fee from the calculated range of between $176 and $476 per ADT. The City Council also approved up to ten percent (10%) of traffic impact fees being allocated toward traffic signal synchronization projects. In addition, City Council approved a five percent (5%) reduction in automobile trips as a result of ATP implementation and an additional five percent (5%) reduction in automobile trips for developments proposing to implement active transportation improvements beyond typical development requirements. A chronology of actions taken by the City Council on the Citywide Traffic Impact Fee Program between the years of 1993 and 2020 is included in Appendix A.

Traffic Impact Fee Ad Hoc Committee – Annual Review

The Traffic Impact Fee Ad Hoc Committee and staff met on October 20, 2022 to review the traffic impact fee program and calculation. Recently completed projects, consideration of active transportation projects, and the available traffic impact fee fund balance were accounted for in this review.

Appendix B provides the calculation of the traffic impact fee of $232 per ADT based on a revised list of capital improvement projects and the inclusion of Active Transportation projects. Following a review of the fee analysis and staff input, the Ad Hoc Committee recommended to continue the current traffic impact fee of $235 per Average Daily Trip (ADT) with the inclusion of Active Transportation projects in the Traffic Impact Fee program. In addition, the Ad Hoc Committee recommended to continue the allocation of up to ten percent (10%) of traffic impact fees towards traffic signal synchronization projects.

The Ad Hoc Committee also recommended to continue to provide a five percent (5%) reduction in automobile trips for development projects due to the implementation of the Active Transportation Plan (ATP) and an additional five percent (5%) reduction in ADT if a development proposes to implement active transportation improvements beyond typical code requirements. The improvements have to be substantial such as addition of a multipurpose trail, conversion of lower-class active bicycle facility to a higher-class bicycle facility, or enhanced pedestrian improvements in the vicinity of the project.

Annual Accounting of the Traffic Impact Fee:

California Government Code Section 66006(b) requires an annual review and accounting of the Citywide Traffic Impact Fee Program. Section 66001(d) requires that the City make specified findings every five years relating to any portion of the traffic impact fees collected that remain unexpended in its account. The City has elected to conduct the review of traffic impact fees required by California Government Code Section 66001(d) on an annual basis in conjunction with its review of the capital improvement plan required by California Government Code Section 66002(b) and the annual accounting required by California Government Code Section 66006(b). Appendix C depicts the opening balance, the ending balance on June 30, 2022, interest earned, revenues, expenditures, and unexpended funds from the Citywide Traffic Impact Fee Account. This attachment also shows that there are no funds unexpended or uncommitted in the account five (5) or more years after deposit and that no administrative costs have been charged to the fee account. The accounting was presented to the Committee at their meeting on October 20, 2022, and was approved.

As required by the Government Code, the updated Capital Improvement Plan (CIP) is contained in the Fiscal Year 2022-23 adopted budget and remains valid for the current traffic impact fee review. The traffic impact fee account information, including the interest earned, shown in Appendix C, is available for public review.

CITY OF COSTA MESA

TITLE:

APPEAL OF PLANNING APPLICATION 21-07 FOR A CONDITIONAL USE PERMIT TO ALLOW OFF-SITE VALET PARKING ON THE PROPERTY LOCATED AT 1645 SUPERIOR AVENUE AND FOR OUTDOOR SEATING FOR AN EXISTING RESTAURANT (TRENTA PIZZA & CUCINA) LOCATED AT 1661 SUPERIOR AVENUE, SUITE C & D AND ZONING APPLICATION 19-50 (ZA-17-16 A1) FOR A MINOR CONDITIONAL USE PERMIT TO AMEND THE PREVIOUS APPROVAL FOR THE RESTAURANT

DEPARTMENT: ECONOMIC AND DEVELOPMENT SERVICES DEPARTMENT / PLANNING DIVISION

PRESENTED BY: JUSTIN ARIOS, ASSOCIATE PLANNER

CONTACT INFORMATION: JUSTIN ARIOS, (714) 754-5667

RECOMMENDATION:

Staff recommends the City Council uphold the Planning Commission's decision and:

1. Find that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per CEQA Guidelines Section 15301 (Class 1), Existing Facilities.

2. Approve Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1), subject to conditions of approval.

APPLICANT OR AUTHORIZED AGENT:

The applicant and authorized agent is Marco Palazzo (with Trenta Pizza & Cucina), representing the property owner, 126 Properties LLC.

BACKGROUND:

Project Site / Environs

The subject property is located along Superior Avenue, between West 16th Street and West 17th Street. The property is zoned MG (General Industrial), and has a General Plan land use designation of Light Industrial; the subject property is also located within the 19 West Urban Plan. Physical on-site improvements include an 8,446-square-foot single-story, multi-tenant building, with a 25-space parking lot, and two points of ingress/egress located on Superior Avenue. The project site is surrounded by properties with the same zoning designation of MG (General Industrial); however, there are two residential live/work communities (zoned MG, General Industrial) located to the north and west of the project site ("Superior Pointe" and "Westside Gateway"). Superior Pointe (PA-13-22,

1667 and 1695 Superior Avenue) was developed pursuant to the 19 West Urban Plan and Westside Gateway (PA-14-29, 671 West 17th Street) was developed pursuant to the Mesa West Bluffs Urban Plan.

Prior Land Use Approvals

On June 22, 2017, the Zoning Administrator approved Minor Conditional Use Permit (MCUP) ZA-17-16, allowing a proposed restaurant (Superior Pie and Liquor, Suite D) with more than 300 square feet of public seating area to deviate from shared parking requirements applied to a multi-tenant center. The deviation from shared parking requirements was approved based on offset hours of operation of the restaurant proposed at the time (described below) in relation to the existing hours of operation of the other businesses located on-site. The MCUP also approved a small (250 square foot) outdoor patio for the restaurant, in accordance with Costa Mesa Municipal Code (CMMC) Section 13-47 and 13-48. The applicant (Trenta Pizza & Cucina) has since taken over the previously approved restaurant space and its entitlements.

The previously approved hours of operation for the restaurant use are:

- Monday through Friday, 8 AM to 12 PM and 4 PM to 11 PM (the business closed between 12 PM and 4 PM, Monday through Friday); and
- Saturday and Sunday, 8 AM to 11 PM

The staff report for the MCUP approval can be found at the link below:
<https://www.costamesaca.gov/home/showpublisheddocument/26538/636490563866670000>

Temporary Use Permit (TUP) for Outdoor Dining Approval

On June 2, 2020, in response to the COVID-19 pandemic and the associated State regulations limiting indoor activities for restaurants and other uses, the City Council approved Urgency Ordinance No. 2020-15, which temporarily suspended the permit requirements and development standards for outdoor activities, parking applicable to dining patios, places of religious assembly, and valet parking. The ordinance authorized the issuance of “Temporary Use Permits” to allow for such uses, subject to certain requirements. On November 1, 2022, the City Council extended the Urgency Ordinance, which will now expire on December 31, 2023.

On November 30, 2020, a Temporary Use Permit (TUP) for outdoor dining was approved for the subject restaurant, in accordance with Ordinance No. 2020-15. Similar to the currently proposed project, the TUP approval allowed for an additional 842 square feet of patio seating area utilizing a portion of the existing parking lot (this area is in addition to the previously approved 250 square foot patio seating). The TUP approval is provided as an attachment to the Planning Commission agenda report.

Applicant Request
The applicant's request included the following:

1. To allow the restaurant to occupy Suite C (575 square feet) in addition to the existing restaurant space located in Suite D (1,575 square feet)

2. To permanently allow the use of the temporary outdoor seating area (located on a portion of the site's parking area) that was approved by the TUP;

3. To modify their previously approved hours of operation (including use of the outdoor seating area) to:

    - Sunday - Thursday, 5 PM to 9 PM
    - Friday and Saturday, 5 PM to 10 PM; and
    - Saturday and Sunday, 11:30 AM to 2:30 PM

4. As a component of the proposal, the restaurant would use only the 250-square-foot outdoor patio previously approved under ZA-17-16, and would not utilize the 842-square-foot patio seating area in the parking lot during the weekend lunchtime hours. The applicant proposes to remove the outdoor seating area when not in use by the restaurant, making three of the existing parking spaces available for use by the other tenants on-site during non-restaurant hours of operation.

Staff evaluated the application submitted and determined that parking onsite was adequate to support the request, with the exception of during the proposed evening hours (after 5 PM). In response, during the evening hours, the applicant proposed valet off-site parking to increase the parking supply for the use during those times to satisfy the parking requirement. The off-site parking is proposed at 1645 Superior Avenue, which is occupied by "Beach Cities Car Wash." The car wash is located approximately 200 feet south of the restaurant location, developed with 39 parking spaces and the car wash operations conclude before 5 PM.

Planning Commission Approval
The application was heard by the Planning Commission at their September 12, 2022 meeting. During the hearing, the applicant requested to add weekday lunchtime hours (from 11:30 AM to 2:30 PM, Monday through Friday) to the proposed project (see the below for restaurant operation hours proposed by the applicant):

- Sunday - Thursday: 11:30 AM to 2:30 PM & 5 PM to 9 PM
- Friday & Saturday: 11:30 AM to 2:30 PM & 5 PM to 10 PM

Following presentations, public comments and Commission discussion, the Planning Commission deliberated and approved the project as presented at the meeting on a 6-1 vote. As part of Planning Commission's approval, the Planning Commission added a condition of approval to allow the requested lunchtime operation hours on Mondays through Fridays, from 11:30 AM to 2:30 PM, conditioned upon the submittal of a Parking Management Plan, as approved by the Director of Economic and Development Services, and limiting the outdoor dining area to the originally approved 250-square-foot patio (specifically excluding use of the larger patio area) during those lunchtime hours.

Appeal of Planning Commission's Approval

On September 19, 2022 an appeal of Planning Commission's approval of the project was filed by a neighboring resident. In summary, the application for appeal noted the following topics/areas of concern:

- Parking Shortage;
- Safety Concerns;
- Community/Resident objection;
- Need for Traffic Study; and
- Evening Noise Impacts at the Car Wash Site.

The appeal application is provided as Attachment 2 to this report.

ANALYSIS:

The following analysis summarizes the pertinent topics raised in the September 19, 2022 appeal application. For a full analysis of the proposed project, please refer to the September 12th, 2022 Planning Commission staff report and attachments (previously linked).

Parking Shortage

As described in the appeal application, the appellant states that the Planning Commission "was concerned with safety and parking issues." In addition, the appellant states that with the utilization of 25% of the existing parking and doubling the restaurant's area to over 2,000 SF, the parking shortage at the site would be exacerbated.

The restaurant is located in a multi-tenant industrial center. The applicant provided the current tenant list with hours of operation for the uses that exist on-site, provided below in Table 1 (this table also reflects the proposed hours of operation for Trenta Pizza, as revised at the September 12th Planning Commission meeting). At this time, the applicant has not submitted the required parking management plan for weekday lunchtime operations as conditioned; therefore, although indicated in Table 1, weekday lunchtime operations remain restricted until such a plan is approved by the City.

Table 1

Address	Business Name	Suite Size	Hours of Operation	
1661 Superior, Suite A	Davis Ink	1,800 SF	Monday - Friday:	9 AM to 6 PM
			Saturday & Sunday:	CLOSED
1661 Superior, Suite C	Trenta Pizza & Cucina	575 SF	Sunday - Thursday:	11:30 AM to 2:30 PM & 5 PM to 9 PM
1661 Superior, Suite D		1,575 SF	Friday & Saturday:	11:30 AM to 2:30 PM & 5 PM to 10 PM
1663 Superior, Suite A	Crème Collective	1,500 SF	Monday - Friday:	9AM to 5 PM
			Saturday & Sunday:	CLOSED
1663 Superior, Suite B	The Unlikely Cyclist	2,996 SF	Sunday & Monday:	CLOSED
			Tuesday - Thursday:	10 AM to 4 PM
			Friday:	10 AM to 5 PM
			Saturday:	12 PM to 5 PM

In accordance with CMMC Table 13-89, when a single-development, multiple-tenant site includes mixed uses that share the same parking spaces, the total requirement for parking is determined by the "City of Costa Mesa Procedure for Determining Shared Parking Requirements." Based on this shared parking analysis, the total required peak parking demand for the restaurant use (including the enlarged outdoor seating and the additional suite area), and considering the other onsite businesses, is 38 parking spaces.

As indicated in the below Table 2, at peak parking demand (38 parking spaces), the restaurant would operate with 23 surplus parking spaces (including on-site and off-site valet parking); therefore, the proposal complies with City parking requirements. (Operations during weekday lunchtime hours are allowed only after City approval of a Parking Management Plan).

Table 2

Restaurant Hours	Parking Required	Parking Provided
Monday – Thursday & Sunday 5PM – 9PM Friday & Saturday 5PM – 10PM	38 spaces [1, 2]	Onsite – 22 spaces Offsite valet – 39 spaces Total – 61 spaces
Saturday & Sunday 11:30AM – 2:30PM	21 spaces [1, 3]	Onsite – 25 spaces
Monday – Friday 11:30AM – 2:30PM	38 spaces [1, 3]	Onsite – 25 spaces ** Subject to a City-approved Parking Management Plan **
Note 1: Based on the shared parking demand analysis; Note 2: Including the 1,092-square-foot outdoor patio (250-square-foot patio approved pursuant to ZA-17-16 plus the 842-suqare-foot outdoor patio area using the parking lot); Note 3: Including the 250-square-foot outdoor patio approved pursuant to ZA-17-16.		

Safety Concerns

The City's Transportation Division has reviewed the proposed site and valet operation plan and have indicated that the valet operations are anticipated to perform sufficiently, and without interruptions to the City's local circulation system. Furthermore, the City's Fire and Building Departments have reviewed the proposal and no safety issues are anticipated.

Community / Resident Objection

The appeal application states that "other residents objected to the proposed Beach Cities parking utilization as overflow car parking with or without valet assistance." Community objection and/or support for a request is received by the City via written public comments and/or public testimony provided during the public hearing. At the September 12th Planning Commission meeting, the Commission was provided written comments from the public, and verbal public comments were also accepted during the meeting. A link to the previously submitted written comments are provided below under the Public Notice section of this report.

Traffic Study

The appellant indicates that a traffic study needs to be conducted for the project, given the danger presented to traffic on Superior Avenue and the proposed three ingress/egress movements per vehicle, proposed by the valet plan. The City's Transportation Division has confirmed that the proposed modifications to the existing restaurant operations are anticipated to perform sufficiently, without interruptions to the City's local circulation system and does not necessitate a Traffic Study. Pursuant to the CMMC, a traffic study is required when a project generates more than 100 peak daily trips; the proposed project generates 24 peak daily trips.

Evening Noise Impacts at the Car Wash Site

The appellant notes noise concerns from the proposed usage of the Beach Cities car wash site during evening hours for overflow parking. However, the Planning Commission considered and approved Resolution Condition No.16 which indicates that:

> "Valet attendants when entering or leaving the offsite parking location shall not "rev" engines and shall turn-off vehicles as soon as parked. Vehicle radios shall remain off at all times when on the offsite parking property. Valet attendants will also keep their voices low in respect to the adjacent residential properties."

Additionally, the valet operations are required to comply with the City's Noise Ordinance provisions. Lastly, the existing adjacent residential development is located in the industrial zone, and approved via the Mesa West Bluffs Urban Plan. The approval for this residential project, as well as other residential projects approved in the Mesa West Bluffs or Mesa West Residential Ownership Urban Plans, included a standard condition of approval requiring a "Notice to Buyers". The purpose of the notice is to disclose that the project is located within an area designated as Light Industry in the City's General Plan and is subject to existing and potential annoyances or inconveniences associated with industrial land uses. In addition, the notice also states that the existing land use characteristics are

subject to change in the event that new businesses move or existing businesses change ownership.

ENVIRONMENTAL DETERMINATION:

The project has been reviewed for compliance with the California Environmental Quality Act (CEQA), the CEQA Guidelines, and the City's environmental procedures. The project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per CEQA Guidelines Section 15301 for Existing Facilities. This exemption allows for the permitting of uses involving negligible or no expansion of the use beyond what is existing. The project is consistent with the applicable General Plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

ALTERNATIVES:

The City Council has the following alternatives:

1. *Approve the request.* The City Council may adopt the attached Resolution upholding the Planning Commission's decision and approve the request as proposed. The Resolution reflects the Planning Commission decisions with two clarifications shown in underline/strikethrough format ;

2. *Approve the request with modifications.* The City Council may uphold the Planning Commission's decision and approve the request with specific changes that are necessary to alleviate concerns;

3. *Continue the item.* The City Council may continue the item to a future meeting to allow for modifications or additional analysis; or

4. *Deny the request.* If the City Council believes that there are insufficient facts to support the findings for approval, the City Council may deny the request. A similar application could not be submitted for at least six months.

FISCAL REVIEW:

There are no fiscal impacts with this agenda item.

LEGAL REVIEW:

The City Attorney's Office has reviewed this report and approves it as to form.

PUBLIC NOTICE:

Pursuant to Title 13, Section 13-29(d), of the Costa Mesa Municipal Code, three types of public notification have been completed no less than 10 days prior to the date of the public hearing:

1. Mailed notice. A public notice was mailed to all property owners and occupants within a 500-foot radius of the project site. The required notice radius is measured from the external boundaries of the property. (See attached Notification Radius Map.)

2. On-site posting. A public notice was posted on each street frontage of the project site.

3. Newspaper publication. A public notice was published once in the Daily Pilot newspaper.

As of this report, four written public comments have been received. Any public comments received prior to the November 15, 2022 City Council meeting will be provided separately.

Notice for the Planning Commission hearing was provided in the same manner as described above. For the Planning Commission hearing, seven written public comments were received both in support and in opposition with the request, and can be found at the links below (the first link provides public comments received prior to the reports being published; the second link provides public comments received after publishing of the report and prior to the September 12th meeting):

CITY COUNCIL GOALS AND PRIORITIES:

This item is administrative in nature.

CONCLUSION:

Approval of the request will permanently allow outdoor seating for the subject restaurant (Trenta Pizza & Cucina) as well as allow the operation of off-site valet parking at 1645 Superior Avenue for the use of the property at 1661 Superior Avenue. The proposed outdoor patio operations have existed since 2020 by approval of a Temporary Use Permit. Since that time, the outdoor patio was used more than anticipated for normal operations due to pandemic related restrictions on indoor activities; however, the indoor restrictions have been lifted which will allow less reliance on the restaurant's outdoor dining areas. The project is consistent with the General Plan, Zoning Code and 19 West Urban Plan, and with developments in the general neighborhood. In addition, approval of the project will improve parking and circulation conditions for the restaurant by providing professional valet services and increasing the parking supply for the restaurant during hours of operations. Lastly, the off-site valet parking area is available and the car wash is not operating during proposed restaurant offsite parking operations.

Staff recommends the City Council uphold the Planning Commission's decision and:

1. Find that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) per CEQA Guidelines Section 15301 (Class 1), Existing Facilities.

2. Approve Planning Application 21-07 and Zoning Application 19-50 (ZA 17-16 A1), subject to conditions of approval.

ATTACHMENT 1

RESOLUTION NO. 2022-XX

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF COSTA MESA, CALIFORNIA, DENYING THE APPEAL OF AND UPHOLDING THE PLANNING COMMISSION'S DECISION APPROVING PLANNING APPLICATION 21-07 AND ZONING APPLICATION 19-50 (ZA-17-16 A1) FOR A CONDITIONAL USE PERMIT TO ALLOW OFF-SITE VALET PARKING AND TO PERMANENTLY ALLOW TEMPORARY OUTDOOR SEATING FOR AN EXISTING RESTAURANT (TRENTA PIZZA AND CUCINA) AND A MINOR CONDITIONAL USE PERMIT TO AMEND THE PREVIOUS APPROVAL FOR THE RESTAURANT (ZA-17-16) IN THE MG ZONE FOR PROPERTY AT 1661 SUPERIOR AVENUE, SUITE C & D

THE CITY COUNCIL OF THE CITY OF COSTA MESA HEREBY FINDS AND DECLARES AS FOLLOWS:

WHEREAS, Planning Application 21-07 and the first amendment to Zoning Application 17-16 was filed by Marco Palazzo (with Trenta Pizza), authorized agent for the property owner, 126 Properties LLC, requesting approval of the following:

1. Planning Application (Conditional Use Permit) 21-07 to allow off-site parking at 1645 Superior Avenue for the use of the property at 1661 Superior Avenue and a request to permanently allow temporary outdoor seating for the restaurant, and
2. Zoning Application (Minor Conditional Use Permit) 19-50 (ZA-17-16 A1) to amend previously approved minor conditional use permit for the restaurant.

WHEREAS, a duly noticed public hearing was held by the Planning Commission on September 12, 2022 with all persons having the opportunity to speak for and against the proposal, and the project was approved by the Commission on a 6-1 vote.

WHEREAS, a review of the Planning Commission's approval of the project was filed on September 19, 2022.

WHEREAS, a duly noticed public hearing was held by the City Council on November 15, 2022 with all persons having the opportunity to speak for and against the proposal;

WHEREAS, pursuant to the California Environmental Quality Act (CEQA), the project is exempt from the provisions of CEQA per CEQA Guidelines Section 15301 (Class 1), for Existing Facilities.

WHEREAS, the CEQA categorical exemption for this project reflects the independent judgement of the City of Costa Mesa.

NOW, THEREFORE, based on the evidence in the record and the findings contained in Exhibit A, and subject to the conditions of approval contained within Exhibit B, the City Council hereby denies the appeal of the Planning Commission's decision and **APPROVES** Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1).

BE IT RESOLVED that the Costa Mesa City Council does hereby find and determine that adoption of this Resolution is expressly predicated upon the activity as described in the staff report for Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1) and upon applicant's compliance with each and all of the conditions in Exhibit B, and compliance of all applicable federal, state, and local laws. Any approval granted by this resolution shall be subject to review, modification or revocation if there is a material change that occurs in the operation, or if the applicant fails to comply with any of the conditions of approval.

BE IT FURTHER RESOLVED that if any section, division, sentence, clause, phrase or portion of this resolution, or the document in the record in support of this resolution, are for any reason held to be invalid or unconstitutional by a decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining provisions.

PASSED AND ADOPTED this 15th day of November, 2022.

BRENDA GREEN, CITY CLERK

EXHIBIT A

FINDINGS

A. The proposed project complies with Costa Mesa Municipal Code Section 13-29(g)(2) because:

Finding: The proposed use is substantially compatible with developments in the same general area and would not be materially detrimental to other properties within the area.

Facts in Support of Findings: The proposed project includes the permanent approval of an existing temporary outdoor seating area that is currently operating without impacts to neighboring properties. The applicant proposes to remove the outdoor seating area when not in use by the restaurant, making all 25 on-site parking spaces available for use by the other tenants on-site. The proposed outdoor patio is currently operating without affecting other properties in the area and therefore the permanent approval of the outdoor seating is not anticipated to result in impacts to surrounding properties. Lastly, as proposed, the site will be in conformance with Code required parking requirements for the restaurant and maintain a surplus of customer parking.

Finding: Granting the conditional use permit will not be materially detrimental to the health, safety, and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Facts in Support of Finding: The proposed restaurant project would not generate adverse noise or traffic impacts that are unusual for this zoning designation. Condition of approval number six requires the operation to be conducted in a manner that would allow for the quiet enjoyment of the surrounding neighborhood. Furthermore, the project has been conditioned (Condition of Approval No. 7) so that if parking problems arise, the restaurant shall institute appropriate operational measures necessary to minimize or eliminate the problem. Compliance with the applicable Building, Fire Safety and Health Codes will also ensure that the project is not materially detrimental to the health, safety and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Finding: Granting the conditional use permit will not allow a use, density, or intensity which is not in accordance with the General Plan designation and any applicable specific plan for the property.

Facts in Support of Finding: Granting the conditional use permit will not allow a use, density or intensity, which is not in accordance with the general plan designation and any applicable specific plan for the property. In accordance with CMMC Section 13-93(m) and Section 13-96, off-site parking and valet parking may be authorized with approval of a conditional use permit and as proposed with

the off-site and valet parking, the use would maintain a parking surplus. In addition, the existing restaurant is a complementary use to the area, including the adjacent residential uses, and as conditioned, the restaurant does not generate noise or parking impacts unusual for an industrially-zoned property, and the current operations (which are essentially the same as proposed) do not adversely impact the surrounding uses. Lastly, the proposed project is consistent with applicable policies and objectives of the 2015-2035 General Plan as described below.

1. **Policy LU-1.1:** *Provide for the development of a mix and balance of housing opportunities, commercial goods and services, and employment opportunities in consideration of the needs of the business and residential segments of the community.*

   Consistency: The proposed project upholds the balance of land uses satisfying the needs of the community as it pertains to commercial goods and services, and employment opportunities by providing for outdoor dining restaurant options.

2. **Policy LU-6.7:** *Encourage new and retain existing businesses that provide local shopping and services.*

   Consistency: The proposed project would allow for the retention of an existing restaurant within the City, thus encouraging the long-term productivity and viability of the community's economic base. The proposed project would expand an existing successful local land use, which contributes to the City's tax base and ultimately preserves the City's long-term fiscal health.

3. **Policy LU-6.19:** *Provide flexibility and support for development of residential, office, small retail centers, and similar uses that would serve local residents and would also benefit from the high visibility along major corridors outside of significant commercial or industrial nodes.*

   Consistency: Approval of the project would provide permanent restaurant outdoor seating that is currently being conducted under an approved TUP. In addition, the applicant proposes to remove the outdoor seating area when not in use by the restaurant, making the parking spaces (used to accommodate the outdoor dining area) available for use by the other tenants on-site. Lastly, the proposed restaurant satisfies Land Use Policy LU-1.1 because it provides an outdoor dining experience that signals economic vitality on one of the City's commercial corridors.

B. **Finding:** The project has been reviewed for compliance with the California Environmental Quality Act (CEQA), the CEQA Guidelines, and the City's environmental procedures. The project is categorically exempt from the provisions of

the California Environmental Quality Act (CEQA) under Section 15301 for Existing Facilities. This exemption allows for the alteration and permitting involving negligible or no expansion of an existing use. The proposed project involves approval of a restaurant outdoor seating that is already operating under a temporary use permit and is in current operation and therefore complies with the CEQA Exemption. The project is also consistent with the applicable General Plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

C. The project is exempt from Chapter XII, Article 3 Transportation System Management, of Title 13 of the Costa Mesa Municipal Code.

EXHIBIT B

CONDITIONS OF APPROVAL

Plng.

1. The use shall be limited to the type of operation described in this staff report: a restaurant use with offsite valet parking and an outdoor seating patio, and change in restaurant operation hours. Any change in the operational characteristics shall be subject to Planning Division review and may require an amendment to the conditional use permit, subject to either Zoning Administrator or Planning Commission approval, depending on the nature of the proposed change. The applicant is reminded that Code allows the Planning Commission to modify or revoke any planning application based on findings related to public nuisance and/or noncompliance with conditions of approval [Title 13, Section 13-29(o)].
2. The conditions of approval, code requirements, and special district requirements of PA-21-07 & ZA-17-16 A1 shall be blueprinted on the face of the site plan as part of the plan check submittal package.
3. The applicant shall defend, indemnify, and hold harmless the City, its elected and appointed officials, agents, officers and employees from any claim, legal action, or proceeding (collectively referred to as "proceeding") brought against the City, its elected and appointed officials, agents, officers and/or employees arising out of, or which are in any way related to, the applicant's project, or any approvals granted by City related to the applicant's project. The indemnification shall include, but not be limited to, damages, fees and/or costs awarded against the City, if any, and cost of suit, attorney's fees, and other costs, liabilities and expenses incurred in connection with such proceeding whether incurred by the applicant, the City and/or the parties initiating or bringing such proceeding. This indemnity provision shall include the applicant's obligation to indemnify the City for all the City's costs, fees, and damages that the City incurs in enforcing the indemnification provisions set forth in this section. City shall have the right to choose its own legal counsel to represent the City's interests, and applicant shall indemnify City for all such costs incurred by the City.
4. The applicant shall contact the Planning Division to arrange a Planning inspection of the site prior to the release of occupancy/utilities. This inspection is to confirm that the conditions of approval and code requirements have been satisfied.
5. A copy of the conditions of approval for the conditional use permit must be kept on premises and presented to any authorized City official upon request. New business/property owners shall be notified of conditions of approval upon transfer of business or ownership of land.
6. The business shall be conducted, at all times, in a manner that will allow the quiet enjoyment of the surrounding neighborhood. The applicant and/or business owner shall institute whatever security and operational measures that are necessary to comply with this requirement.

7. If parking problems arise, the restaurant shall institute appropriate operational measures necessary to minimize or eliminate the problem including, but not limited to, reducing the operating hours of the business and/or obtaining an entitlement for additional off-site or valet parking.
8. All dining areas shall observe State and local health guidelines for restaurants.
9. Any service of alcoholic beverages in outdoor seating areas is subject to approval by the ABC.
10. The patio shall be posted with a contact phone number so any noise concerns can be reported to the business owner or her/his representative.
11. Any canopies or tents (with or without heaters) will require Fire and Building Department approval prior to installation.
12. The applicant shall maintain a parking agreement that secures offsite parking as described in the report. Should the agreement for off-site parking provided at 1645 Superior be terminated, the applicant must notify the Director of Economic and Development Services in writing at least 30 days prior to termination and modify operations appropriately (including but not limited to removal of outdoor seating), or secure other equivalent offsite parking to address parking requirements. Any changes to the off-site parking location or valet service may require an amendment to the Conditional Use Permit.
13. The restaurant shall operate the valet service and provide the available parking as described in the report. A minimum of three valet attendants shall be utilized.
14. The restaurant hours of operation, including the outdoor seating area, are Sunday through Thursday, 5 PM to 9 PM and Friday and Saturday, 5 PM to 10 PM. The restaurant may also be open during lunchtime hours (11:30 AM to 2:30 PM), seven days a week; however, during this time outdoor seating is limited to the 250-square-foot outdoor seating patio area noted on the approved plans and shall not include use of the expanded outdoor seating area located within the parking lot. Weekday lunchtime hours of operation are also specifically limited pursuant to Condition of Approval No. 17.
15. When not in operation, the outdoor seating area shall be removed to provide for sufficient parking for the other onsite tenants, pursuant to the CMMC.
16. Valet attendants when entering or leaving the offsite parking location shall not “rev” engines and shall turn-off vehicles as soon as parked. Vehicle radios shall remain off at all times when on the offsite parking property. Valet attendants will also keep their voices low in respect to the adjacent residential properties.

PC 17. Prior to implementation of weekday lunchtime hours (11:30 AM to 2:30 PM), a Parking Management Plan shall be submitted and approved by the Director of Economic and Development Services.

CODE REQUIREMENTS

The following list of federal, state and local laws applicable to the project has been compiled by staff for the applicant's reference. Any reference to "City" pertains to the City of Costa Mesa.

Plng. 1. Approval of the planning/zoning application is valid for two (2) years from the effective date of this approval and will expire at the end of that period unless applicant establishes the use by one of the following actions: 1) a building permit has been issued and construction has commenced, and a valid building permit has been maintained by making satisfactory progress as determined by the Building Official; 2) a certificate of occupancy has been issued; or 3) the use has been established and a business license has been issued. A time extension can be requested no less than thirty (30) days or more than sixty (60) days before the expiration date of the permit and submitted with the appropriate fee for review to the Planning Division. The Director of Development Services may extend the time for an approved permit or approval to be exercised up to 180 days subject to specific findings listed in Title 13, Section 13-29 (k) (6). Only one request for an extension of 180 days may be approved by the Director. Any subsequent extension requests shall be considered by the original approval authority.

2. Permits shall be obtained for all signs according to the provisions of the Costa Mesa Sign Ordinance.

3. Development shall comply with all requirements of Articles 5 and 9, Chapter V, Title 13 of the Costa Mesa Municipal Code relating to industrial development standards.

4. Parking stalls on both projects site locations (1661/1663 Superior Ave. & 1645 Superior Ave.) shall be double-striped in accordance with City standards.

5. Any mechanical equipment such as air-conditioning equipment and duct work shall be screened from view in a manner approved by the Planning Division.

Bldg. 6. Comply with the requirements of the following adopted codes: 2019 California Building Code, 2019 California Electrical Code, 2019 California Mechanical Code, 2019 California Plumbing Code, 2019 California Green Building Standards Code and 2019 California Energy Code (or the applicable adopted, California Building Code, California Electrical Code, California Mechanical Code, California Plumbing Code, California Green Building Standards and California Energy Code at the time of plan submittal or permit issuance) and California Code of Regulations also known as the California Building Standards Code, as amended by the City of Costa Mesa. Requirements for accessibility to sites, facilities, buildings and elements by individuals with disability shall comply with chapter 11B of the 2019 California Building Code.

7. Prior to issuing the Building permit the conditions of approval shall be on the approved Architectural plans.

8. A change of occupancy shall require compliance with the Disabled access requirements of chapter 11B of the 2019 California Building Code.

SPECIAL DISTRICT REQUIREMENTS

The requirements of the following special districts are hereby forwarded to the applicant:

AQMD 1. Prior to the Building Div. (AQMD) issuing a demolition permit contact South Coast Air Quality Management District located at:
21865 Copley Dr.
Diamond Bar, CA 91765-4178
Tel: 909- 396-2000
Or
Visit their web site
http://www.costamesaca.gov/modules/showdocument.aspx?documentid=23381
The Building Division will not issue a demolition permit until an Identification number is provided by AQMD.

2. Applicants shall contact the Air Quality Management District (AQMD) at 1-(800) 288-7664 for potential additional conditions of development or for additional permits required by AQMD

County 3. Provide a plan to the County of Orange Health Department for review and approval.

REQUEST FOR: ☒ **APPEAL** ☐ **REVIEW****

Decision of which appeal or review is requested: (give application number, if applicable, and the date of the decision, if known.)

9/12/2022 Planning Commission Meeting Trenta infractions on space utilization and car parking valet OBJECTION Costa Mesa Planning Application Number PA 21 07 AND ZA 19 50 ADDRESS 1661 Superior Avenue Units C and D and 1645 Superior Avenue

Decision by: Planning Commission

Reasons for requesting appeal or review:

1 There was significant confusion at the Commission meeting as to what was resolved On review of the video Costa Mesa planning commission staff agree that in the absence of a parking mediation plan that there is not additional space the restaurant can utilize at certain times of day, 7 days a week. The location continued and continues to act with impunity despite councils' best effort of field enforcement To quote the chairperson "my head is exploding" However it is a simple situation to resolve
2 This was a split decision commission members were concerned on safety and parking issues
3 Other residents objected to the proposed Beach Cities parking utilization as over flow carparking with or without valet assistance
The simple solution is to g back to pre-pandemic approved arrangements whereby this become an inside restaurant with 250 square feet of outside space with the correct safety barrier separating cars and patrons as is installed in that code approved section. In line with all other restaurants that are not leverage TUP situations into double scale with none of the correct infrastructure investments, restrooms increase usually as patrons increase, correct to code electrical installation and fire approval Plus permanent safety barriers which mean parking is not available for other business within the plaza at off hours. This would address all issues, we knew what was there when we bought Now it's a totally different scale
4 The utilization of 25% of the parking spaces in the present plaza (CM planning staffs calculations, although the Vice Chair and myself cannot see where the 25 spaces are in the facility today and they are not supported by drawings) by doubling the restaurants surface area to 2000+ square feet exacerbates the present shortage of parking for the facility within the plaza it is part of Essentially a negative double dip bring more patrons use the parking to seat them Banal at best against best practices for planning approval at worst. This restaurant could not pass code today and would not be approved as operating today
terraces facing the Beach Cities facility
5 The proposed parking at Beach Cities car wash creates significant noise after the 4 pm closure by making it a carpark nightly through 11 pm 20 feet from new homes that were bought knowing the carwash existed and is extremely noisy during the day but that stopped at 4pm, so they could enjoy quiet enjoyment of their properties that have a significant amount of outdoor terraces facing the Beach Cities facility. This impacting property values in our community
6 So many cars arrive that once Beach Cities facilities are full with approximately 70 vehicles, often turning twice patrons then trespass on the W 17th facility despite warning from the association to prevent this occurring. (Obviously a gate would prevent this issue occurring and increase safety within our community)
Note that the proposed PMP creates around 3 ingress and egress movements per vehicle so a traffic study needs to undertaken given the danger presented to traffic on a fast moving Superior Avenue and the entrances impacted by this incredible traffic invasion Video and photographic evidence has been provided to planning commission members
7 Noise and light pollution to the properties directly behind the facility will be drastically reduced by taking the restaurant back to what it was in scale and indoor facilities
8 The proprietors act with impunity ignoring city staff and assaulting people (Police case has been filed) There is no way the city should reward such behavior nor allow significant impact of citizens oif Costa Mesa who have invested and will continue toi invest in the city

Date: 9/19/2022. Signature:

SCHEDULED FOR THE CITY COUNCIL/PLANNING COMMISSION MEETING OF:
If appeal or review is for a person or body other than City Council/Planning Commission, date of hearing of appeal or review

Updated April 2020

[1] Includes owners and/or occupants of a property located within 500 feet of project site (excluding owners and/or occupants of the project site).

[2] Includes the project applicant, owners and/or occupants of the project site, and owners and/or occupants of a property located greater than 500 feet from the project site.

RESOLUTION NO. PC-2022-21

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF COSTA MESA, CALIFORNIA APPROVING PLANNING APPLICATION 21-07 FOR A CONDITIONAL USE PERMIT TO ALLOW OFF-SITE VALET PARKING AND TO PERMANENTLY ALLOW OUTDOOR SEATING FOR THE EXISTING RESTAURANT (TRENTA PIZZA & CUCINA) AND ZONING APPLICATION 19-50 (ZA-17-16 A1) FOR A MINOR CONDITIONAL USE PERMIT TO AMEND THE PREVIOUS APPROVAL FOR THE RESTAURANT (ZA-17-16) IN THE MG ZONE FOR PROPERTY AT 1661 SUPERIOR AVENUE, SUITE C & D

THE PLANNING COMMISSION OF THE CITY OF COSTA MESA, CALIFORNIA FINDS AND DECLARES AS FOLLOWS:

WHEREAS, Planning Application 21-07 and the first amendment to Zoning Application 17-16 was filed by Marco Palazzo (with Trenta Pizza), authorized agent for the property owner, 126 Properties LLC requesting approval of the following:

1. Planning Application 21-07 is a request for a Conditional Use Permit to allow off-site valet parking at 1645 Superior Avenue for the use of the property at 1661 Superior Avenue and a request to permanently allow outdoor seating for the restaurant, and
2. Zoning Application 19-50 (ZA-17-16 A1) is a request for a Minor Conditional Use Permit to amend the previously approved restaurant operating conditions.

WHEREAS, a duly noticed public hearing was held by the Planning Commission on September 12, 2022 with all persons having the opportunity to speak for and against the proposal;

WHEREAS, pursuant to the California Environmental Quality Act (CEQA), the project is exempt from the provisions of the California Environmental Quality Act (CEQA) per Section 15301 (Class 1), for Existing Facilities.

WHEREAS, the CEQA categorical exemption for this project reflects the independent judgement of the City of Costa Mesa.

NOW, THEREFORE, based on the evidence in the record and the findings contained in Exhibit A, and subject to the conditions of approval contained within Exhibit B, the Planning Commission hereby **APPROVES** Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1) with respect to the property described above.

BE IT FURTHER RESOLVED that the Costa Mesa Planning Commission does hereby find and determine that adoption of this Resolution is expressly predicated upon the activity as described in the staff report for Planning Application 21-07 and Zoning Application 19-50 (ZA-17-16 A1) and upon applicant's compliance with each and all of the conditions in Exhibit B, and compliance of all applicable federal, state, and local laws. Any approval granted by this resolution shall be subject to review, modification or revocation if there is a material change that occurs in the operation, or if the applicant fails to comply with any of the conditions of approval.

BE IT FURTHER RESOLVED that if any section, division, sentence, clause, phrase or portion of this resolution, or the document in the record in support of this resolution, are for any reason held to be invalid or unconstitutional by a decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining provisions.

PASSED AND ADOPTED this 12th day of September, 2022.

Byron de Arakal, Chair
Costa Mesa Planning Commission

STATE OF CALIFORNIA)
COUNTY OF ORANGE)ss
CITY OF COSTA MESA)

I, Scott Drapkin, Secretary to the Planning Commission of the City of Costa Mesa, do hereby certify that the foregoing Resolution No. PC-2022-21 was passed and adopted at a regular meeting of the City of Costa Mesa Planning Commission held on September 12, 2022 by the following votes:

AYES: de Arakal, Ereth, Rojas, Russell, Toler, Vivar

NOES: Zich

ABSENT: None

ABSTAIN: None

Scott Drapkin, Secretary
Costa Mesa Planning Commission

EXHIBIT A

FINDINGS

A. The proposed project complies with Costa Mesa Municipal Code Section 13-29(g)(2) because:

Finding: The proposed use is substantially compatible with developments in the same general area and would not be materially detrimental to other properties within the area.

Facts in Support of Findings: The proposed project includes the permanent approval of an existing temporary outdoor seating area that is currently operating without impacts to neighboring properties. The applicant proposes to remove the outdoor seating area when not in use by the restaurant, making all 25 on-site parking spaces available for use by the other tenants on-site. The proposed outdoor patio is currently operating without affecting other properties in the area and therefore the permanent approval of the outdoor seating is not anticipated to result in impacts to surrounding properties. Lastly, as proposed, the site will be in conformance with Code required parking requirements for the restaurant and maintain a surplus of customer parking with the implementation of offsite valet parking. The offsite parking location at 1645 Superior is located in close proximity to the restaurant use, has appropriate access and circulation, and will be utilized while the onsite carwash business is closed. In addition, the valet parking plan has been reviewed by the City's Transportation Division and would be implemented by a professional valet service operator.

Finding: Granting the conditional use permit will not be materially detrimental to the health, safety, and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Facts in Support of Finding: The proposed project would not generate adverse noise or traffic impacts that are unusual for this zoning designation in that conditions of approvalrequire the operation to be conducted in a manner that would allow for the quiet enjoyment of the surrounding neighborhood. Compliance with the applicable Building, Fire Safety and Health Codes will also ensure that the project is not materially detrimental to the health, safety and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood.

Finding: Granting the conditional use permit will not allow a use, density, or intensity which is not in accordance with the General Plan designation and any applicable specific plan for the property.

Facts in Support of Finding: Granting the conditional use permit will not allow a use, density or intensity, which is not in accordance with the general plan designation and the applicable Urban Plan for the property. In accordance with CMMC Section 13-93(m) and Section 13-96, off-site parking and valet parking may

be authorized with approval of a conditional use permit and as proposed with the off-site and valet parking, the use would maintain a parking surplus. In addition, the existing restaurant is a complementary use to the area, including the adjacent residential uses, and as conditioned, the restaurant does not generate noise or parking impacts unusual for an industrially-zoned property, and the current operations (which are essentially the same as proposed) do not adversely impact the surrounding uses. Lastly, the proposed project is consistent with applicable policies and objectives of the 2015-2035 General Plan as described below.

1. **Policy LU-1.1:** *Provide for the development of a mix and balance of housing opportunities, commercial goods and services, and employment opportunities in consideration of the needs of the business and residential segments of the community.*

   Consistency: The proposed project upholds the balance of land uses satisfying the needs of the community as it pertains to commercial goods and services, and employment opportunities by providing for outdoor dining restaurant options.

2. **Policy LU-6.7:** *Encourage new and retain existing businesses that provide local shopping and services.*

   Consistency: The proposed project would encourage the retention of an existing established restaurant within the City, thus encouraging the long-term productivity and viability of the community's economic base. The proposed project would expand an existing successful local land use, which contributes to the City's tax base and ultimately preserves the City's long-term fiscal health.

3. **Policy LU-6.19:** *Provide flexibility and support for development of residential, office, small retail centers, and similar uses that would serve local residents and would also benefit from the high visibility along major corridors outside of significant commercial or industrial nodes.*

   Consistency: Approval of the project would provide permanent restaurant outdoor seating that is currently being conducted under an approved TUP without neighborhood impacts or other land use issues. In addition, the proposed restaurant is consistent with the intent of Land Use Policy LU-1.1 because it provides an outdoor dining experience that signals economic vitality on one of the City's commercial corridors.

B. **Finding:** The project has been reviewed for compliance with the California Environmental Quality Act (CEQA), the CEQA Guidelines, and the City's environmental procedures. The project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA) under Section 15301 for Existing Facilities. This exemption allows for the alteration and permitting involving negligible

or no expansion of an existing use. The proposed project involves approval of restaurant outdoor seating that is already operating under a temporary use permit and therefore complies with the CEQA Exemption. The project is also consistent with the applicable General Plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

C. The project is exempt from Chapter XII, Article 3 Transportation System Management, of Title 13 of the Costa Mesa Municipal Code.

EXHIBIT B

CONDITIONS OF APPROVAL

Plng.

1. The use shall be limited to the type of operation described in this staff report and modified by the Planning Commission: a restaurant use with offsite valet parking and an outdoor seating areas. Any change in the operational characteristics shall be subject to Planning Division review and may require an amendment to the conditional use permit, subject to either Zoning Administrator or Planning Commission approval, depending on the nature of the proposed change. The applicant is reminded that Code allows the Planning Commission to modify or revoke any planning application based on findings related to public nuisance and/or noncompliance with conditions of approval [Title 13, Section 13-29(o)].
2. The conditions of approval, code requirements, and special district requirements of PA-21-07 & ZA-17-16 A1 shall be blueprinted on the face of the site plan as part of the plan check submittal package.
3. The applicant shall defend, indemnify, and hold harmless the City, its elected and appointed officials, agents, officers and employees from any claim, legal action, or proceeding (collectively referred to as "proceeding") brought against the City, its elected and appointed officials, agents, officers and/or employees arising out of, or which are in any way related to, the applicant's project, or any approvals granted by City related to the applicant's project. The indemnification shall include, but not be limited to, damages, fees and/or costs awarded against the City, if any, and cost of suit, attorney's fees, and other costs, liabilities and expenses incurred in connection with such proceeding whether incurred by the applicant, the City and/or the parties initiating or bringing such proceeding. This indemnity provision shall include the applicant's obligation to indemnify the City for all the City's costs, fees, and damages that the City incurs in enforcing the indemnification provisions set forth in this section. City shall have the right to choose its own legal counsel to represent the City's interests, and applicant shall indemnify City for all such costs incurred by the City.
4. The applicant shall contact the Planning Division to arrange a Planning inspection of the site prior to the release of occupancy/utilities. This inspection is to confirm that the conditions of approval and code requirements have been satisfied.
5. A copy of the conditions of approval for the conditional use permit must be kept on premises and presented to any authorized City official upon request. New business/property owners shall be notified of conditions of approval upon transfer of business or ownership of land.
6. The business shall be conducted, at all times, in a manner that will allow the quiet enjoyment of the surrounding neighborhood. The applicant and/or business owner shall institute whatever security and operational measures that are necessary to comply with this requirement.

7. If parking problems arise, the restaurant shall institute appropriate operational measures necessary to minimize or eliminate the problem including, but not limited to, reducing the operating hours of the business and/or obtaining an entitlement for additional off-site or valet parking.
8. All dining areas shall observe State and local health guidelines for restaurants.
9. Any service of alcoholic beverages in outdoor seating areas is subject to approval by the ABC.
10. The patio shall be posted with a contact phone number so any noise concerns can be reported to the business owner or her/his representative.
11. Any canopies or tents (with or without heaters) will require Fire and Building Department approval prior to installation.
12. The applicant shall maintain a parking agreement that secures offsite parking as described in the report. Should the agreement for off-site parking provided at 1645 Superior be terminated, the applicant must notify the Director of Economic and Development Services in writing at least 30 days prior to termination and modify operations appropriately (including but not limited to removal of outdoor seating), or secure other equivalent offsite parking to address parking requirements. Any changes to the off-site parking location or valet service may require an amendment to the Conditional Use Permit.
13. The restaurant shall operate the valet service and provide the available parking as described in the report. A minimum of three valet attendants shall be utilized.

PC

14. The restaurant hours of operation (including the 250-square-foot and 842-square-foot outdoor seating areas as delineated on the site plan) shall be limited to Sunday through Thursday, 5 PM to 9 PM and Friday and Saturday, 5 PM to 10 PM. The restaurant hours of operation shall also include weekend lunchtime hours (11:30 AM to 2:30 PM); however, during this time, outdoor seating shall be limited to the 250-square-foot outdoor seating area as delineated on the site plan.

    The restaurant may also be open on weekdays during lunchtime hours 11:30 AM to 2:30 PM with the applicant submittal of a Parking Management Plan (PMP), approved by the Director of Development Services. During this time, outdoor seating areas shall be limited to only the 250-square-foot outdoor seating area as delineated on the site plan and shall not include the 842-square-foot outdoor patio area.
15. When not in operation, the outdoor seating area shall be removed to provide for sufficient parking for the other onsite tenants, pursuant to the CMMC.
16. Valet attendants when entering or leaving the offsite parking location shall not "rev" engines and shall turn-off vehicles as soon as parked. Vehicle radios shall remain off at all times when on the offsite parking property. Valet attendants will also keep their voices low in respect to the adjacent residential properties.

CODE REQUIREMENTS

The following list of federal, state and local laws applicable to the project has been compiled by staff for the applicant's reference. Any reference to "City" pertains to the City of Costa Mesa.

Plng. 1. Approval of the planning/zoning application is valid for two (2) years from the effective date of this approval and will expire at the end of that period unless applicant establishes the use by one of the following actions: 1) a building permit has been issued and construction has commenced, and a valid building permit has been maintained by making satisfactory progress as determined by the Building Official; 2) a certificate of occupancy has been issued; or 3) the use has been established and a business license has been issued. A time extension can be requested no less than thirty (30) days or more than sixty (60) days before the expiration date of the permit and submitted with the appropriate fee for review to the Planning Division. The Director of Development Services may extend the time for an approved permit or approval to be exercised up to 180 days subject to specific findings listed in Title 13, Section 13-29 (k) (6). Only one request for an extension of 180 days may be approved by the Director. Any subsequent extension requests shall be considered by the original approval authority.

2. Permits shall be obtained for all signs according to the provisions of the Costa Mesa Sign Ordinance.

3. Development shall comply with all requirements of Articles 5 and 9, Chapter V, Title 13 of the Costa Mesa Municipal Code relating to industrial development standards.

4. Parking stalls on both projects site locations (1661/1663 Superior Ave. & 1645 Superior Ave.) shall be double-striped in accordance with City standards.

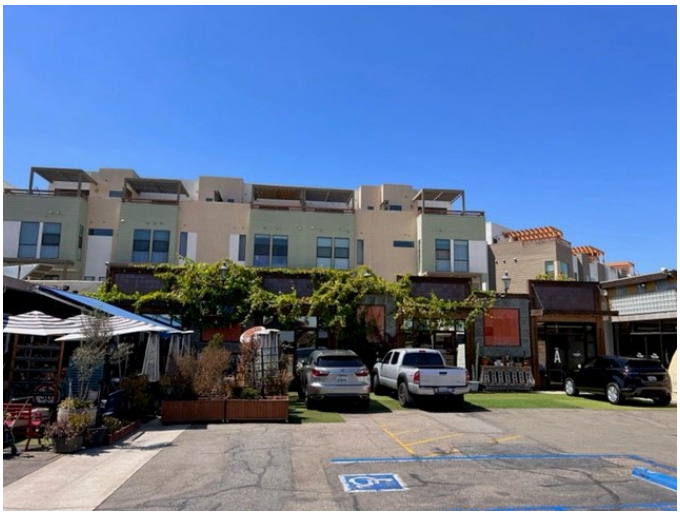
5. Any mechanical equipment such as air-conditioning equipment and duct work shall be screened from view in a manner approved by the Planning Division.

Bldg. 6. Comply with the requirements of the following adopted codes: 2019 California Building Code, 2019 California Electrical Code, 2019 California Mechanical Code, 2019 California Plumbing Code, 2019 California Green Building Standards Code and 2019 California Energy Code (or the applicable adopted, California Building Code, California Electrical Code, California Mechanical Code, California Plumbing Code, California Green Building Standards and California Energy Code at the time of plan submittal or permit issuance) and California Code of Regulations also known as the California Building Standards Code, as amended by the City of Costa Mesa. Requirements for accessibility to sites, facilities, buildings and elements by individuals with disability shall comply with chapter 11B of the 2019 California Building Code.

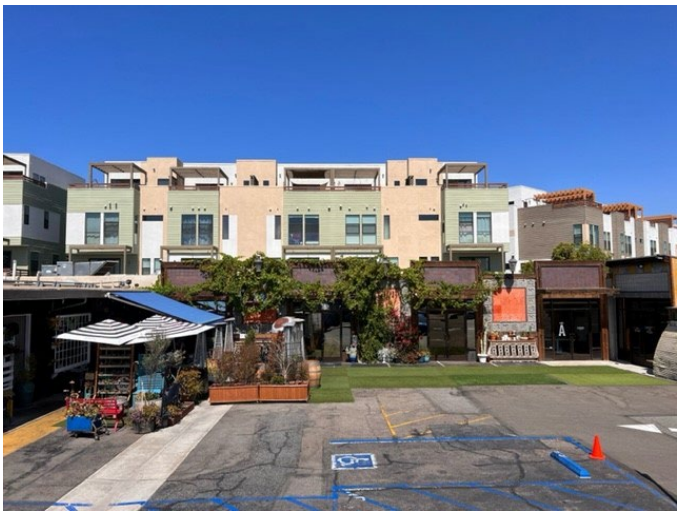
7. Prior to issuing the Building permit the conditions of approval shall be on the approved Architectural plans.
8. A change of occupancy shall require compliance with the Disabled access requirements of chapter 11B of the 2019 California Building Code.

SPECIAL DISTRICT REQUIREMENTS

The requirements of the following special districts are hereby forwarded to the applicant:



AQMD 1. Prior to the Building Div. (AQMD) issuing a demolition permit contact South Coast Air Quality Management District located at:
21865 Copley Dr.
Diamond Bar, CA 91765-4178
Tel: 909- 396-2000
Or
Visit their web site
http://www.costamesaca.gov/modules/showdocument.aspx?documentid=23381
The Building Division will not issue a demolition permit until an Identification number is provided by AQMD.



2. Applicants shall contact the Air Quality Management District (AQMD) at 1-(800) 288-7664 for potential additional conditions of development or for additional permits required by AQMD

County 3. Provide a plan to the County of Orange Health Department for review and approval.

Subject: I support Trenta Expansion

Hi Scott,

My name is Eric Eisenberg and I am an owner and investor in 17 West in Costa Mesa. My wife and I own three units in the project and we are in full support of Trenta expanding.

My neighbor reached out to me as he is leading an operation to block Trenta from parking at a car wash next to our community as he is citing potential crime? That seems like a pretty ridiculous case to make against a small business and neighborhood gem looking to expand.

Chris was a huge supporter of Trenta when it first opened and would constantly recommend it to me and others. There is something that happened personally between him and the owner that has caused him to want to hurt the owner's business. He has had issues with other residents at 17 West although I personally get along well with him.

I don't agree with letting personal vendettas come in the way of small businesses and feel as Costa Mesa should do anything we can as a community to support small businesses.

Thank you for taking the time to read.

--
Kind Regards,

Eric D. Eisenberg |

Subject: I Support Trenta

Hi Justin,

I am writing to let you know that I fully support the application no. PA-21-07 & ZA-19-50 (ZA-17-16 A1) by Trenta Pizza.

I have lived in 17 West in the condo directly overlooking Trenta for 3.5 years (1660 topanga) and love the vibrancy this restaurant has brought to our community. It has been amazing to see this restaurant grow, expand, and thrive. I love that it is family-owned and we get the opportunity to see Marco and Giorgio each time we walk over to dine there along with the many other neighbors who enjoy the restaurant - which ends up being about 1x per week minimum :)

I want to address the objections raised by someone in 17 West who I feel tends to be the loudest but represents the few, not the many. That individual also lives in an interior unit where some of the concerns he raised wouldn't affect him and he seems to have a personal issue with Trenta.

Property Values -

- Having a vibrant/thriving restaurant like Trenta has HELPED bring people to the area and increase property values.
- People who buy these types of condos typically want to live in an area where they can walk to an amazing restaurant/coffee shop/etc that has a strong sense of community
- I am VERY concerned that if Trenta moved or wasn't allowed to expand, then it would negatively impact our property values & the community because now that area would be deserted and likely become another homeless gathering area on Superior - This is a HUGE concern of mine.

Noise -

- This has never been a problem for me, and I live with my bedroom windows facing down at Trenta and sleep with my windows open frequently - the only thing you hear is the regular Superior car movement
- When I bought this condo, I knew I was going to be living in a more "urban" like area, not a quiet suburb, and a thriving, delicious restaurant that I can walk to was part of the attraction to live here
- I loved when Trenta used to have live music and we had the benefit of being able to slightly hear

- it when we opened our windows :)
-
-
-
- Outside of music (when they used to have it), we don't ever really hear the restaurant but do get
- the benefit of smelling their delicious pizzas every day from our home.
-
-
-
- At night this noise is not louder than the normal noise from cars driving on Superior. This is
- coming from someone who goes to bed before 9pm. I've never heard the restaurant noise.
-

Light Pollution -

-
-
- This would only affect the houses that face Superior/overlook Trenta directly (which is me). Trenta
- doesn't add to the light pollution, they have very low-lit lighting.
-
-
-
- Superior in general is already a well-lit area so any additional light added by Trenta is negligible
- and is not noticeable even though I sometimes go to bed before they close (again, my bedroom windows are directly overlooking the restaurant)
-
-
-
- I enjoy looking down and seeing the beautiful string lights they have and I think it adds a charm
- to the community.
-

Valet/Parking Expansion -

-
-
- Another neighbor said the Trenta restaurant expansion would impact parking at 17 West. I disagree
- with this because when they had the valet we never had patrons parking in our community, because Trenta took care of that!
-
-
-
- The valet and parking expansion are a great solution to make the nearby residents happy and to
- allow a local business to thrive.
-
-
-
- Trenta has always been considerate of the neighbors
-

Restroom -

-
-
- I disagree with this issue raised by another neighbor. Out of the many times I have been to Trenta
- since it opened, I have only had to wait for a stall 1 time.
-

Trenta Coffee Shop -

- I have been wishing that a coffee shop would open in that plaza! It would be the perfect addition to the community.

It's important that we support the local businesses in the area, especially Trenta since I love the sense of community they have created. After seeing Boathouse Collective not make it through the pandemic, I want to ensure we support our local businesses that contribute to a thriving/bright community like Trenta does.

We have so few restaurants right here and Trenta does a good job of being respectful and welcoming to the nearby residents.

I fully support the Trenta restaurant expansion and parking expansion. When we got the original notice that they were seeking to permanently expand, I was excited and felt I didn't need to speak up because I don't object. Then I got a package from a neighbor that said he wants neighbors to object to it – he has a personal issue with Trenta and has taken action in the past to make it hard for Trenta to do business here.

I urge you to consider this letter as the voice of many - because there are many other homeowners in this community and in Superior Pointe that feel the same as I do.

Thank you,
Melissa

Hello,

I would like to advocate for our beloved neighborhood pizza restaurant. I live in the condos directly behind the restaurant and my unit has balconies and bedrooms facing the restaurant almost directly behind. I have no issues with noise or light pollution. Georgio and Mario are very conscientious neighbors and by extension their staff is also very respectful of the neighborhood. Our family and most neighbors in this community value having walkable access to such a wonderful restaurant.

Best,
Sarah Stockstill

Regarding public hearing application # PA-21-07 & ZA-19-50 (ZA-17-16 A1)
Applicant: Marco Palazzo
I am a nearby industrial property owner and would like to say I have had dinner at this restaurant and support his request. I would like also to point out this is the conflict the city of Costa Mesa is encouraging by promoting residential occupation of the historically industrial West Side of Costa Mesa. Businesses and industrial property owners are now victims of the newly built residential housing who knew before purchasing that they were going to be living in an industrial neighborhood. The amount of post WWII tech and innovation that has come from the rich small business, R&D and creative spaces throughout West Side Costa Mesa should be allowed to grow and not be thrown out by the cities misguided plan. Don't put the burden on small business and the industrial spaces to defend their existence to new residents that are attracted to our working neighborhood of West Side Costa Mesa.

File #: 22-946 **Meeting Date:** 11/15/2022

TITLE:

APPROVAL OF GENERAL PLAN AMENDMENT 21-01 FOR THE CITY OF COSTA MESA 2021-2029 (SIXTH CYCLE) HOUSING ELEMENT UPDATE (AS REVISED), AND ADOPTION OF A RESOLUTION TO OVERRULE THE INCONSISTENCY DETERMINATION MADE BY THE AIRPORT LAND USE COMMISSION FOR ORANGE COUNTY FOR THE CITY OF COSTA MESA'S 2021-2029 SIXTH CYCLE HOUSING ELEMENT UPDATE

DEPARTMENT: ECONOMIC AND DEVELOPMENT SERVICES DEPARTMENT / PLANNING DIVISION

PRESENTED BY: JENNIFER LE, DIRECTOR OF ECONOMIC AND DEVELOPMENT SERVICES

CONTACT INFORMATION: JENNIFER LE, (714) 754-5270

RECOMMENDATION:

Staff recommends the City Council:

1. Find that potentially significant effects on the environment have been adequately analyzed in the Initial Study/Mitigated Negative Declaration previously adopted on February 1, 2022 for the 2021-2029 (Sixth Cycle) Housing Element pursuant to State law, and find that none of the conditions described in CEQA Guidelines Section 15162 exist; therefore, no further action is required to comply with CEQA.

2. Approve Resolution No. 2022-XX to Overrule the Orange County Airport Land Use Commission's March 17, 2022 Determination that Costa Mesa's 2021-2029 (Sixth Cycle) Housing Element is inconsistent with the John Wayne Airport Environs Land Use Plan.

3. Approve Resolution No. 2022-XX to approve the City of Costa Mesa 2021-2029 (Sixth Cycle) Housing Element (General Plan Amendment 21-01), as revised.

4. Direct the City Manager or designee to submit the adopted Housing Element to the State for certification, and authorize the City Manager or designee to make minor revisions to the adopted Housing Element as necessary to obtain State certification.

BACKGROUND:

The Housing Element is a chapter of the City's General Plan and is required by the State to be updated every eight years. It provides an analysis of the City's demographic, economic, and housing characteristics, identifies community housing needs, and establishes objectives, policies, and programs to meet those needs. To remain in compliance with State Housing Law, the City's Housing Element must respond to various State laws and requirements and must be adopted by City Council

and certified by California State Department of Housing and Community Development (HCD).

Regional Housing Needs Assessment (RHNA) Allocation

As required by State Housing law, the State prepared a Regional Housing Needs Assessment (RHNA), and in conjunction with the Southern California Association of Governments (SCAG), allocated 11,760 housing units to the City as the City's "fair share" of regional housing needs. Pursuant to the RHNA, the City is required by the State to plan and zone property to facilitate housing production that meets the City's RHNA allocation, including 2,919 "very low" income units, 1,794 "low" income units, 2,088 "moderate" income units and 4,959 "above moderate" income units. Refer to Table 1. The City is not required to build the aforementioned housing units; however, the City is obligated to update the Housing Element to support housing development through land use related goals, policies, and programs, and submit annual reports to the State as to the City's progress and implementation.

Table 1 – Final RHNA Allocation

Income Category	% of Area Median Income (AMI)	Income Range Min. – Max.		RHNA Allocation
Very Low Income	0-50% AMI	--	$64,050	2,919 units
Low Income	51-80% AMI	$64,051	$102,450	1,794 units
Moderate Income	81-120% AMI	$102,451	$123,600	2,088 units
Above Moderate Income	%120% AMI	$123,601	--	4,959 units
			Total RHNA	**11,760 units**

Public Review Drafts and Planning Commission Recommendation

Following a series of community outreach meetings including townhalls, an online community survey, and study sessions, staff and its expert consultant (Kimley-Horn) prepared an initial draft of the Housing Element Update. The draft Housing Element was made available for public comment in August 2021 and was subsequently discussed at a joint Planning Commission and City Council study session in September 2021. The Draft Housing Element update was submitted to HCD in October 2021, and incorporated City Council, Planning Commission and public comments. HCD comments on the City's draft were received in December 2021.

Subsequently, the Planning Commission reviewed the Draft Housing Element and received public comments at its November 8, 2021, November 22, 2021 and December 13, 2021 public hearings. The Planning Commission discussed the proposed revisions addressing HCD comments, and ultimately recommended approval by a 6-1 vote.

Information regarding the Housing Element Update process is accessible on the City's website at: <https://www.costamesaca.gov/city-hall/city-departments/development-services/planning/housing-element-update>

City Council Adopted Housing Element - February 1, 2022

Following a preliminary review of the Draft Housing Element at its January 18, 2022 public hearing, the City Council approved and adopted the 2021-2029 (Sixth Cycle) Housing Element (General Plan Amendment 21-01), and the associated Initial Study/Mitigated Negative Declaration (IS/MND) and Mitigation Monitoring and Reporting Program (MMRP) on February 1, 2022 by a 6-1 vote.

The staff report focused on responding to State HCD's December 2021 comment letter and recommended adoption of the Housing Element and its submittal to the State for certification prior to the February 11, 2022 statutory deadline. The staff report stated "if HCD requires additional corrections, staff will bring the Housing Element to the Council for an update at that time." At the meeting, staff also acknowledged a comment letter received from the Airport Land Use Commission (ALUC) and indicated that it would continue its work with the ALUC while the Housing Element was being reviewed by State. Staff submitted the adopted Housing Element to the State on February 5, 2022.

January 18, 2022 and February 1, 2022 City Council Reports:
<https://costamesa.legistar.com/LegislationDetail.aspx?ID=5384364&GUID=2517E4A6-107E-496C-84D3-24D70098F31F>

<https://costamesa.legistar.com/LegislationDetail.aspx?ID=5394490&GUID=F1DADF56-728F-4C7A-9E6E-70CEF2F0EC46&Options=&Search>=

City Council Approval of the Notice of Intent to Override the ALUC's Consistency Determination - April 5, 2022

When a jurisdiction proposes a General Plan amendment within the "planning boundary" established by the Airport Land Use Commission (ALUC), State law requires the ALUC to make a determination as to whether the proposed land use change is consistent with the applicable Airport Environs Land Use Plan. The ALUC serves as a "limited advisory body" and may make a determination as to consistency but the Costa Mesa City Council has the final authority to make land use decisions in the City.

On March 17, 2022, the ALUC considered the City's 2021-2029 6th Cycle Housing Element. After receiving the ALUC staff presentation and a follow up presentation by City staff, the ALUC determined that the City's Housing Element update is inconsistent with the John Wayne Airport Environs Land Use Plan (AELUP) by a vote of 4-0. Additional information regarding the ALUC March 17, 2022 meeting is available online at:

<https://www.ocair.com/about/administration/airport-governance/commissions/airport-land-use-commission/march-17-2022/>

Pursuant to Public Utilities 21676(b), the City may, after a public hearing, propose to overrule the ALUC's determination by a two-thirds vote of the City Council. Overruling an ALUC inconsistency decision requires two public hearings: one hearing for the City Council determination to notify ALUC of its intention to overrule the ALUC decision, and a second hearing for the City Council to include on the public record any ALUC and/or Caltrans Division of Aeronautics comments, and to adopt the findings to overrule ALUC's determination.

On April 5, 2022, the City Council reviewed a detailed staff analysis of the ALUC determination as well as the required findings necessary to overrule ALUC's inconsistency determination and unanimously adopted Resolution No. 2022-19. This Resolution included the justifications for finding that the 2021-2029 Sixth Cycle Housing Element is consistent with the AELUP pursuant to Public Utilities Code (PUC) Section 21670, and direction to staff to notify the ALUC of the City's intent to "overrule" ALUC's determination.

April 5, 2022 City Council Report:
<https://costamesa.legistar.com/LegislationDetail.aspx?ID=5542239&GUID=99E91626-EFB3-4F8C-9A0F-64160C54C4B7>

Pursuant to Public Utilities Code (PUC) Section 21676, on April 11, 2022, the City Council Resolution was forwarded to both the ALUC and the Caltrans Division of Aeronautics. Subsequently, both agencies provided comment letters (provided as an Attachment 5 to this report) which are hereby included in the public record of the City Council's final decision to overrule the commission.

As discussed in the Analysis section of this report, staff recommends that the City Council hold the second public hearing required as part of the ALUC "overrule" process, and adopt a Resolution to override the ALUC's inconsistency determination.

HCD Comment Letter - April 5, 2022

Following the submittal of the adopted Housing Element in February 2022, HCD provided an additional comment letter dated April 5, 2022. The letter outlined additional State comments and requested updates to certain sections of the adopted Housing Element. HCD's April 5th letter is attached to this report as Attachment 4. As noted in HCD's letter, the City's adopted 2021-2029 Sixth Cycle Housing Element addressed many of the State's statutory requirements. However, additional supporting information, data and updated implementing programs were requested in order to obtain Housing Element certification.

Since receiving HCD's comment letter, staff have worked with the City's expert consultant to complete the additional analyses and revisions and have also had several discussions with HCD staff in order to craft a revised Housing Element that the State will certify.

ANALYSIS:

The Analysis section of this report focuses on proposed revisions made to key sections of the adopted Housing Element to respond to the April 2022 HCD comments. It also provides a summary discussion of the required findings necessary to override ALUC's previous inconsistency determination.

Proposed Revisions to the Adopted Housing Element

In response to HCD's April 2022 comment letter (Attachment 4), the 2021-2029 (Sixth Cycle) Housing Element was revised to provide additional supporting data, analysis, and clarifications regarding Housing Needs, Resources and Constraints, and new and modified Housing Programs.

The revisions to the Housing Element in response to HCD comments do not modify the City's fundamental approach to planning for future housing. The City's Housing Element continues to propose to meet its RHNA allocation through a combination of 1) incremental growth in established single family residential neighborhoods through, for example, accessory dwelling units; and 2) rezoning of sites within and around existing Specific Plan, Urban Plan and residential overlay areas to accommodate the additional housing units necessary to meet the City's RHNA allocation. None of the corridors, housing opportunity sites, or anticipated densities cited in the previously-adopted Housing Element have been modified.

Rather, HCD comments and the proposed revisions focus on providing additional information justifying the City's approach, and providing modified and new housing "programs" specifically requested by the State. In addition, the timing for completion of certain Housing Element programs has been modified and "objectives" were added to each program to further clarify intended outcomes (refer to Housing Element Chapter 4, Housing Programs).

The below discussion highlights key revisions. The proposed revisions to the Housing Element in their entirety are provided in underline/~~strikethrough~~ format as Attachment 1 to this report. The proposed revisions were made available to the public online on November 8, 2022.

- **HCD requested additional analysis and expanded programs related to Extremely Low Income (ELI) Households** and **"Affirmatively Furthering Fair Housing" (AFFH)**

Proposed Housing Element Modification: HCD requested that the analysis for "Affirmatively further [ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2… shall include an assessment of fair housing in the jurisdiction." The revised Housing Element includes additional information regarding the City's capacity to address housing complaints, services provided to the community through the Fair Housing Foundation, concentrations of persons with disabilities and available resources, additional analysis regarding lower income areas and affordability, displacement risk, local knowledge of areas with substandard housing conditions and the estimated need for housing rehabilitation efforts. This information is added throughout Chapters 2 (Community Profile) and 3 (Resources and Constraints) of the Housing Element and also resulted in modified Housing Element Programs 2L *(Development of Housing for Extremely Low and Lower - Income Households)*, 4A (Fair Housing) and 4I (Partnerships with Local Organizations and Community Groups for high poverty census tracts).

- **HCD requested additional information regarding development trends and housing opportunity sites and new programs pertaining to small and large housing sites**

Proposed Housing Element Modification: HCD requested additional information and analysis regarding: 1) redevelopment trends for already- developed properties in Costa Mesa that are similar to identified housing opportunity sites; 2) small (less than an acre) and large (more than 10 acres)

housing opportunity sites; and 3) information regarding environmental constraints that could affect housing opportunity sites. In response, a market analysis and development trend analysis was included in Housing Element Appendix B (Adequate Sites Analysis). In addition, specific findings related to such development trends have been included in the attached Resolution for Housing Element adoption. Additional information regarding small and large housing sites was also added and Program 3Q (Lot Consolidation for small sites) and 3R (Large Sites), summarized below, were also added. Lastly, staff added additional details regarding hazardous materials sites located in Costa Mesa's industrial areas.

- **Program 3Q: *Lot Consolidation***
  - For smaller housing sites, this program commits the City to streamline processes and establish incentives for lot consolidation, publish this information online, monitor the effectiveness, and adjust such incentives as needed.
- **Program 3R: *Development of Large Sites***
  - This program commits the City to evaluating the development status of the five "large" housing opportunity sites identified within the Housing Element and to identify additional housing sites if no development progress is made for each of the five sites. The program will include outreach and promoting housing development.

- **HCD requested the City reduce its ADU construction estimates and expand ADU programs**

Proposed Housing Element Modification: HCD requested the City reduce its ADU construction estimate to 40 to 50 units per year. Staff included information that shows the number of ADU's approved in 2022 already exceed the State's annual estimate, adjusted the projected number of ADU's built per year from 70 ADUs to 50 ADUs, and modified Program 3E and Program 3M related to promoting ADU's and monitoring ADU production throughout the planning period.

- **Program 3E: Promote the Development of ADU's**
  - This program was modified to include a commitment to review and revise the City's ADU Ordinance as necessary to comply with State law. The revisions to the ADU Ordinance identified by the State were already reviewed and recommended for approval by the Planning Commission at its October 24, 2022 public meeting.

- **Program 3M: ADU and JADU Monitoring Program**
  - This program commits the City to monitor ADU production and affordability and make adjustments (e.g., provide additional incentives) if there is a shortfall in ADU construction.

- **HCD requested additional analysis and programs regarding the City's Code required "findings" for residential projects**

Proposed Housing Element Modification: Staff evaluated the City's findings for discretionary approvals that may apply to housing projects (such as a Master Plan, Design Review etc.) and determined that the findings do not adversely affect housing opportunities due to, for example, the denial of projects based on the strict interpretation of the findings' language. Nonetheless, some of the language used in findings may be interpreted broadly and could be modified for clarity. As such, new Program 3S was added.

- **Program 3S: Review and Revise Findings**
  - For housing development land use entitlements that require findings pursuant to the Zoning Code, this program commits the City to review and revise findings language that is capable of being interpreted broadly, with the goal of improving housing cost, supply, timing of approvals, or approval certainty.

- **HCD requested additional information regarding Emergency Shelters and programs regarding Permanent Supportive Housing**

Proposed Housing Element Modification: Staff added additional information clarifying that emergency shelters are already allowed by right in the Planned Development Industrial (PDI) zone and provided additional data regarding hazards and available parcels in this zone. In response to State comments, **Program 2J** was also added. This program commits the City to modifying its Zoning Code to include "transitional and supportive housing" in its land use matrix and to allow such uses in a manner that complies with State law.

- **HCD requested additional information and programs regarding the City's Reasonable Accommodation procedures, the definition of Single Housekeeping Unit, and Group Home regulations**

Proposed Housing Element Modification: In response to State comments, staff included additional information, modified Program 2N, and added Programs 2O and 2P as shown below.

- ***Program 2N: Reasonable Accommodation***
  *"The City has completed an analysis of its Reasonable Accommodation process in **Section 3** of this Housing Element. By the nature of Reasonable Accommodation requests and the range of potential modifications that could need to be accommodated, the City has to evaluate each request individually. This process is described within the City's Zoning Code and persons may contact the City's planning department for assistance with requests. The City will review and consider revisions to its Reasonable Accommodation process to be consistent with State and federal fair housing requirements.*

  Objectives:

  - *Review and revise the Reasonable Accommodation procedure to promote access to housing for persons with disabilities, address potential constraints and establish potential objective standards, and provide guidance and amend as necessary to promote greater certainty on how approval findings will be implemented.*

  - *Meet with local organizations and developers to promote access to housing for persons with disabilities and address potential constraints."*

- **Program 2O: Definition of Single Housekeeping Unit**
  "The City's definitions of "family" and "single housekeeping unit" within the zoning code do not differentiate between related and unrelated individuals, or between disabled and non-disabled individuals, living together. Notwithstanding, in order to promote flexibility to

accommodate residents with different living conditions, the City will review and consider revisions to its zoning code per the objectives below.

Objectives:

- *Review and revise the definition of "single housekeeping unit" within the zoning code to provide greater flexibility in consideration of accommodating a variety of household situations for related and unrelated individuals living together."*

- **Program 2P: *Group Homes***

"The City has completed an analysis of its regulations applicable to group homes in ***Section 3*** *of this Housing Element. Group homes are allowed in all residential zoning districts through a conditional or special use permit. The City will review and consider revisions to its zoning code applicable to group homes per the objectives below.*

Objectives:

- *Review and revise the City's zoning code and application procedures applicable to group homes to promote objectivity and greater approval certainty."*

- **HCD requested modifications to Housing Element Programs 3B (Fairview Development Center), 3C and 3D related to required rezoning, and Program 3G (the City-wide vote requirement).**

Proposed Housing Element Modification:

- **Program 3B: Fairview Development Center (FDC)**
  - Program 3B was modified to clarify the City's intent to facilitate development on the FDC property, including rezoning, and establishing incentives and expedited processing. The revisions also clarify that if the rezoning of FDC does not occur, the City is obligated to identify other sites to make up the shortfall. The program was also revised to include updated information regarding the City Council's October 2022 approval of an agreement to accept $3.5 Million in State funds to manage and lead establishment of a Specific Plan for the FDC site in coordination with the State. A Request for Proposals (RFP) will be released by year end.

- **Programs 3C (Update the North Costa Mesa Specific Plan) and Program 3D (Update the City's Urban Plans and Overlays):**
  - Programs 3C and 3D were modified to clarify that updating these plans consistent with the Housing Element is necessary and required to meet the City's RHNA allocation.

- **Program 3G: Address the City-wide Vote Requirement in Relation to Housing Element Compliance**

  In its December comment letter, State HCD stated that Measure Y is "clearly a constraint on development and conflicts with meeting state requirements. The element must include a specific analysis of the impacts on housing cost, supply, affordability,

timing and approval certainty. Based on this analysis, the element must include programs to address this constraint in addition to programs to make sites available to accommodate the RHNA." Staff amended the program adding specific "milestones" and a timeline as requested by the State.

In its April comment letter, the State HCD has requested the City "commit to adopt the various planning amendments, alternative actions if the appropriate zoning is not complete and provide parameters that the ballot measure or other actions will be undertaken to address this fundamental constraint to housing development (in addition to the RHNA requirements)."

As such, the City has modified Program 3G to clarify that if there remains a shortfall of sites after a Ballot Measure vote, the City will request an opinion from the State's Attorney General's Office as to the City's options. It also adds language stating that the City will "evaluate and pursue various options to minimize the constraints of a city-wide vote requirement on housing by providing the City Council greater discretion in approving housing and affordable housing…" Program 3G, as revised, is shown below.

*"***PROGRAM 3G: Address City-wide Vote Requirement in Relation to Housing Element Compliance**

As it exists upon adoption of the 2021 2029 Costa Mesa Housing Element, the City's Municipal Code requires voter approval of certain changes in land use, defined as those projects that amend, change or replace the General Plan, the Zoning Code, a specific plan, or an overlay plan, (collectively, legislative changes) and that involve any one of the following changes: adds 40 or more dwelling units, generates more than 200 additional average daily trips; increases the volume/capacity of an intersection based on specified formulas; changes the intersection capacity utilization or level of service based on specified formulas; adds 10,000 square feet of retail, office or other nonresidential; or, where the proposed project, combined with other projects within 8 years and a half mile of each other, meet the above criteria. Additionally, voter approval is required for projects that involve one of the above legislative changes and: changes from public uses to private uses under specified circumstances; land designated as utility right of way under specified circumstances; land donated, bequeathed, or otherwise granted to the City; land used or designated for Costa Mesa school property; or land owned, controlled, or managed by the City.

Through extensive community outreach with Costa Mesa residents, housing advocates, and members of the development community, the City of Costa Mesa has continued to contemplate the role of the City-wide vote requirements in relation to the City's 2021 2029 Housing Element Update. State HCD has identified the City-wide vote process as a clear constraint to the future development of residential uses within the City, a constraint to implementing the land use and zoning changes necessary to achieve State mandated compliance with the RHNA allocation, and also conflicts with meeting State housing requirements. The City recognizes that it must, in coordination with guidance from the City Attorney and input from the community, determine a path forward to be able to adopt

the subsequent changes to specific plans, urban plans, and overlays that are necessary to implement the City's adopted Housing Element and meet the City's RHNA allocation.

The City may move forward with adoption of a state-mandated Housing Element Update; however, it is not clear how the City-wide vote requirement affects the associated rezones and revisions to existing specific plans, urban plans, and overlays included as program actions within the Housing Element.

The City will take the following steps to identify and address specific ways in which the City-wide vote process functions as a constraint to housing compliance, the city's housing goals, and other shared community goals.

MILESTONES	***TIMING FOR COMPLETION***
(1) Engage the community and other stakeholders, and complete legal analysis necessary to identify appropriate modifications to the City's Municipal Code requirement for voter approval	*Complete by June 2022*
(2) Prepare ballot measure language and obtain City Council approval for placement of modifications on the ballot for the November 2022 general election.	*Complete by August 2022*
(3) Inclusion of the proposed measure on the Ballot of Local Election.	*Complete by November 2022*
(4) Creation and adoption of an inclusionary housing ordinance. The Municipal Code exempts "affordable housing proposals required by state or federal law" from the City-wide vote requirement. A City Council- approved inclusionary housing ordinance provides an opportunity to address affordable housing needs City-wide.	*Within 12 months of final adoption of the Housing Element, consistent with Program 2A*
(5) Engage in a community planning and visioning process. Prepare General Plan amendments, rezones, and revisions to existing specific plans, urban plans, and overlays included as program actions necessary to meet the City's RHNA allocation as identified within the Housing Element. Complete appropriate technical studies and CEQA compliance documents. Obtain City Council approval.	*Complete by June 2025*
(6) If there is a continued shortfall of sites after a Ballot Measure vote, the City will request an opinion from the State's Attorney General's Office as to the City's options.	*Complete by December 2025*

In addition to these actions, beginning in 2022 and in conjunction with the City Attorney's Office, the City will evaluate and pursue various options to minimize the constraints of a city-wide vote requirement on housing by providing the City Council greater discretion in approving housing and affordable housing projects to comply with all requirements in State Housing Element law without further ballot initiative.

Objective:

- *Minimize the constraint of a city-wide vote requirement on creation of housing including affordable housing through the modification of existing City overlays, urban plan areas, and specific plans to rezone candidate housing sites that can accommodate affordable housing and a variety of mixed use/ housing options near jobs and transit. By 2025, initiate a ballot measure, or other alternative option, to provide City Council greater discretion in approving affordable housing and mixed use/ housing options in appropriate locations."*

Overrule of ALUC's Inconsistency Determination

Pursuant to PUC Section 21676, on April 5, 2022, the City Council made the findings that the proposed Housing Element is consistent with the purpose of the AELUP as provided below:

- "*It is in the public interest to provide for the orderly development of each public use airport in this state and the area surrounding these airports so as to promote the overall goals and objectives of the California airport noise standards adopted pursuant to Section 21669 and to prevent the creation of new noise and safety problems."*

- *"It is the purpose of this article to protect public health, safety, and welfare by ensuring the orderly expansion of airports and the adoption of land use measures that minimize the public's exposure to excessive noise and safety hazards within areas around public airports to the extent that these areas are not already devoted to incompatible uses."*

As indicated in the "Background" section of this report, City staff forwarded to the ALUC and the Caltrans Division of Aeronautics the City Council decision and adopted findings to "overrule" ALUC's determination, and both agencies responded with comments. Staff has specifically responded to these comments in Attachment 5 - "*City Responses to Comments."* Below is a summary of the ALUC and the Caltrans Division of Aeronautics comments and staff responses.

ALUC's Comment Letter

The ALUC's comments related to two primary issues: (1) noise, and (2) safety hazards created by changing certain Housing Element sites land use from commercial/mixed use to residential in close proximity to John Wayne Airport.

In summary, the ALUC determined that the City's assessment for overrule regarding noise was not problematic and agreed that the City's Noise Element adequately addresses the interface of potential residential development and airport noise impacts.

The ALUC comments regarding safety hazards are specifically focused on 2021-2029 6th Cycle Housing Element proposed housing sites located in the North Costa Mesa Specific Plan area. The ALUC contends that because the North Costa Mesa Specific Plan permits building heights in excess of the JWA Horizontal Surface (141 to 145 feet), that these housing sites present a "safety hazard." However, the Public Utilities Code Section 21676 exempts "land use measures" for development in

areas that are “already devoted to incompatible uses.” The North Costa Mesa Specific Plan area is approved for a hotel/residential development project of 304 feet, and is also developed with the Plaza Tower and Center Tower which exceed 20 stories. Since the North Costa Mesa Specific Plan area is already entitled and developed (“devoted”) for residential development and uses that exceed the JWA Horizontal Surface, this PUC provision is not applicable and the Housing Element is consistent with the “purpose” outlined in PUC Section 21670.

Further, the Housing Element makes no changes to height standards already adopted as part of the North Costa Mesa Specific Plan many years ago. The North Costa Mesa Specific Plan only allows residential uses at heights taller than the ALUC’s Horizontal Surface guideline after it has consulted with the Caltrans Division of Aeronautics and received a determination of “no hazard.” The projects already built at such heights in the North Costa Mesa area went through this process and received such a determination”. As such, this issue is sufficiently addressed by existing regulations and no change is proposed.

Caltrans Division of Aeronautics Comment Letter

The Caltrans Division of Aeronautics’ letter primarily comments that the City’s findings related to Public Utilities Code Section 21670 are “not consistent with the planning regulations in the Government Code.” Specifically, the Division’s comments reference the California Land Use regulation relating to “Housing Elements” (Section 65583) and the “Authority for the Scope of General Plans” (Section 65302). However, neither of these provisions are specified for compliance in the PUC provisions relating to the “overrule” process, and therefore are not applicable to the “overrule.” Caltrans also broadly discusses the ALUC comment regarding PUC Purpose No. 2 relating to the housing sites in the North Costa Mesa Specific Plan Area; however, and as indicated above, since the North Costa Mesa Specific Plan area is already entitled and developed (“devoted”) for residential development and uses that exceed the JWA Horizontal Surface, this PUC provision is not applicable and the Housing Element is consistent with the “purpose” outlined in PUC Section 21670.

Staff Recommendation - ALUC Inconsistency Determination

City staff have thoroughly considered the comments by the ALUC and the Caltrans Division of Aeronautics in regard to the proposed Housing Element consistency with the PUC provisions. As further provided above, the ALUC’s and Caltrans’ comments that the proposed 2021-2029 Sixth Cycle Housing Element is inconsistent with the AELUP “purpose” is generally inaccurate. Staff is thus recommending that the City Council overrule the ALUCs determination. In order to effectuate the “overrule,” staff is recommending that the City Council adopt the proposed Resolution provided as Attachment 3, which includes the same findings the City Council previously reviewed and adopted on April 5, 2022.

Next Steps

Staff recommends that the City Council adopt the Resolution overruling ALUC’s inconsistency determination, and adopt the Resolution approving the Housing Element, as revised.

After City Council adoption, the Housing Element, as revised, will be forwarded to the HCD for its

review and certification. State HCD has up to 60 days to complete its review.

After certification, Development Services staff will process for Planning Commission and City Council review subsequent General Plan land use and zoning code amendments as required by the Housing Element. This effort will begin with a community outreach and visioning process.

In addition, City staff and various consultant teams will implement the other required Housing Element programs and actions. There are over 47 program actions identified in the Housing Element, which must be implemented during the eight year planning period. Most programs are required to be completed within the first two to three years of the Housing Element planning period (i.e., by the end of 2025). Compliance with such timelines will require a significant commitment of future City staff time and resources.

ENVIRONMENTAL DETERMINATION:

In accordance with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, an Initial Study was prepared to evaluate the potential environmental effects associated with the City of Costa Mesa 2021-2029 Housing Element Update. The Initial Study/Mitigated Negative Declaration (IS/MND) was circulated for public comments on October 29, 2021. The public comment period ended on November 29, 2021. On February 1, 2022, after consideration of a Planning Commission recommendation and public comments, the City Council adopted and approved the Initial Study/Mitigated Negative Declaration along with the associated Mitigation Monitoring and Reporting Program (MMRP). Pursuant to Government Code Section 15162(a), if changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation. Pursuant to CEQA Guidelines Section 15162(a)(1-3), the City as the lead agency has determined that none of the proposed revisions to the Housing Element require subsequent environmental analysis. Therefore, no further documentation is necessary.

ALTERNATIVES:

The City Council alternative actions include:

1. Adopting the Resolutions as proposed;
2. Adopting the Resolutions with modifications to the Housing Element Update; or
3. Not adopting the Resolutions.

Not Adopting the Housing Element update and not receiving State certification would make the City out of compliance with State Housing Element law and would subject the City to potential litigation and other enforcement actions by the State.

FISCAL REVIEW:

The adoption of the Housing Element will have no impact to the City's General Fund. A non-compliant Housing Element may affect the City's ability to receive certain federal, State and regional funding programs that require or consider housing element compliance for eligibility or competitive ranking purposes.

LEGAL REVIEW:

This report has been approved as to form by the City Attorney's Office.

CITY COUNCIL GOALS AND PRIORITIES:

This item supports the following City Council Goal:

- Diversify, stabilize and increase housing to reflect community needs.

CONCLUSION:

Staff recommends the City Council adopt the Resolution to overrule the Orange County ALUC's March 17, 2022 Inconsistency Determination and adopt the Resolution approving the 2021-2029 Housing Element, as revised.

After adoption, the Housing Element, as revised, will be forwarded to the State HCD for certification. After certification by the State, the City will begin implementing the required Housing Element plan and program actions.

EXECUTIVE SUMMARY

PURPOSE

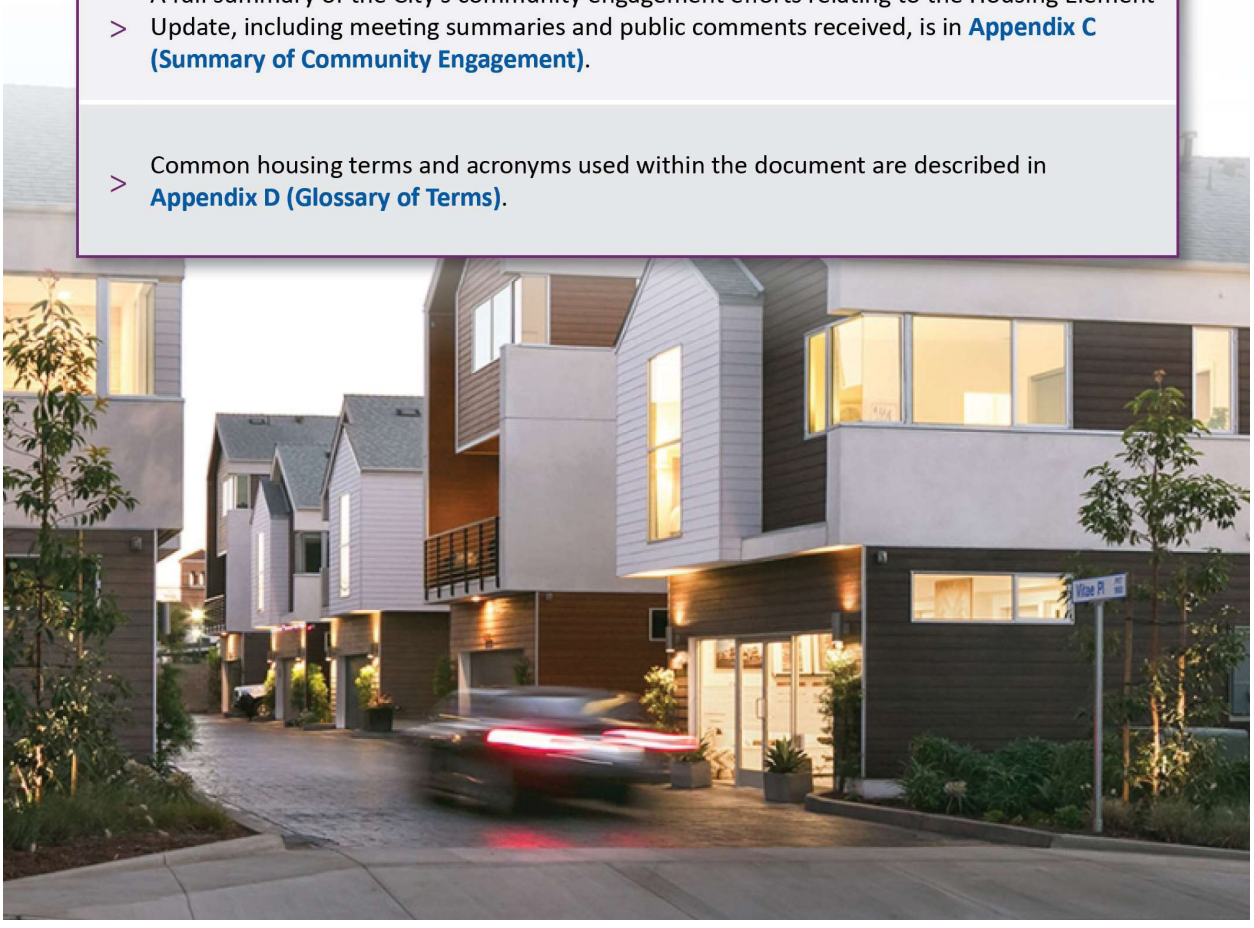
The Housing Element plans for future housing opportunities within the City of Costa Mesa while also addressing housing needs within the community. This is the 6th cycle of the Housing Element and is for the planning period from 2021 to 2029.

HOUSING ELEMENT UPDATE GUIDING PRINCIPLES

The City of Costa Mesa followed certain "guiding principles" in developing its approach and strategy for accommodating future housing growth. These guiding principles assist with implementation of the housing goals, policies and programs and will aid overall decision making. The guiding principles are rooted in community engagement and local knowledge and input into the planning process. The guiding principles are as follows:

The City will plan for future housing primarily along major commercial, industrial, and mixed use corridors within Costa Mesa that are compatible with growth, while preserving established residential neighborhoods.

Each neighborhood, community, and district within Costa Mesa has its own unique characteristics and needs. Future housing growth will build upon Costa Mesa's history and complement the diversity and unique characteristics that already exist within each area.



The City will plan for a diverse range of housing forms, types, and densities to address the housing needs of an inclusive and diverse community and provide housing opportunities that meet the needs of all residents, including low-income households, seniors, multi-generational families, larger households and special needs groups.

"HOW TO" GUIDE TO THE HOUSING ELEMENT

The City of Costa Mesa's Housing Element contains a lot of information relating to housing. The guide below is designed to help users navigate to the section of the document that contains the relevant information for each user's needs.

- Demographic information relating to housing, population, and family trends can be found in **Section 2 (Community Profile)**.
- **Section 3 (Constraints, Resources, and Fair Housing)** contains an overview of the City of Costa Mesa's 6th Cycle Candidate Sites Inventory and strategy. A more detailed analysis, including maps and a list of candidate housing sites by Assessor Parcel Number (APN) can be found in **Appendix B (Sites Analysis)**.
- A discussion of potential housing constraints, including governmental, non-governmental, and other constraints, is located in **Section 3**.
- The City's Action Plan to address and facilitate housing growth is located in **Section 4 (Housing Plan)**.
- A full summary of the City's community engagement efforts relating to the Housing Element Update, including meeting summaries and public comments received, is in **Appendix C (Summary of Community Engagement)**.
- Common housing terms and acronyms used within the document are described in **Appendix D (Glossary of Terms)**.

Chapter 1

Introduction

A. Role of the Housing Element

The Housing Element is one of the seven State mandated elements included in the City of Costa Mesa's General Plan. The purpose of the Housing Element is to identify a high-level strategy and blueprint for addressing the City's existing and projected housing needs over the eight-year planning cycle. It contains a detailed work program of the City's housing goals, policies, quantified objectives, and actions or programs for the preservation, improvement, and development of housing for a sustainable future.

Each eight-year planning cycle, the City is allocated a specific number of housing units called the Regional Housing Needs Allocation (RHNA) determined by the Southern California Association of Governments (SCAG). The RHNA quantifies future housing growth within a City. Through research and analysis, the Housing Element identifies potential candidate housing sites and establishes the City's official housing policies and programs to accommodate the City's RHNA allocation. As part of the Housing Element, focus areas and corridors are identified where future housing may be appropriate. Candidate housing sites within those areas are identified in order to show that the City has or will have sufficient land with the appropriate zoning to facilitate the development of housing by the private market in sufficient quantity to meet its RHNA allocation. The Housing Element is not a document that lays out specifically where future housing must go nor does it mandate housing construction. The Housing Element is an important tool for the City of Costa Mesa to plan for and accommodate current and future housing growth within the community, over the eight-year planning cycle (2021-2029).

B. State Policy and Authorization

1. Background

As a mandated element of the Costa Mesa General Plan, the Housing Element must meet all requirements of existing state laws. Goals, programs and policies, and quantified objectives developed within the Housing Element are consistent with state law and are implemented within a designated timeline to ensure the City accomplishes the identified actions as well as maintains compliance with state law. The California Department of Housing and Community Development (HCD) reviews each Housing Element for substantial compliance with state law. HCD's review is required before a local government can adopt its housing element as part of its overall General Plan.

2. State Requirements

California State Housing Element Law (California Government Code Article 10.6) establishes the requirements for the Housing Element. California Government Code Section 65588 requires that local governments review and revise the Housing Element of their comprehensive General Plans no less than once every eight years.

The California Legislature identifies overall housing goals for the State to ensure every resident has access to housing and a suitable living environment; Section 65580 of the California Government Code states the following Housing Element goals:

a. *The availability of housing is of vital statewide importance, and the early attainment of decent housing and a suitable living environment for every Californian, including farmworkers, is a priority of the highest order.*
b. *The early attainment of this goal requires cooperative participation of government and the private sector in an effort to expand housing opportunities and accommodate the housing needs of Californians in all economic levels.*
c. *The provisions of housing affordable to low- and moderate-income households requires the cooperation of all levels of the government.*
d. *Local and State governments have a responsibility to use the powers vested in them to facilitate the improvement and development of housing to make adequate provision for housing needs of all economic segments of the community. The Legislature recognizes that in carrying out this responsibility, each local government also has the responsibility to consider economic, environmental, and fiscal factors and community goals set forth in the general plan and to cooperate with other local governments and the state in addressing regional housing needs.*

Table 1-1 summarizes State Housing Element requirements and identifies location in this document where these requirements are addressed.

Table 1-1: Housing Element Requirements

Costa Mesa's current Housing Element was adopted in January 2014 for the 5th cycle for the 2014 - 2021 planning period. The 6th Cycle Housing Element will plan for the 2021-2029 planning period. Multiple amendments have been made to Housing Element law since the adoption of the City's 5th Cycle Housing Element; such amendments and subsequent housing laws change the required analysis, reporting and policies contained in the Housing Element. The contents of this updated Housing Element comply with these amendments to state housing law and all other federal, state and local requirements.

3. Regional Housing Needs Assessment

California's Regional Housing Needs Assessment (RHNA) is the basis for determining future housing need, by income category, within the state and is based on growth in population, households, and employment. The statewide RHNA is determined under the administration of the Department of Housing and Community Development (HCD). The quantified housing need is then allocated among the state's 18 Metropolitan Planning Organizations (MPOs). For the City of Costa Mesa's case, this agency is the Southern California Association of Governments (SCAG).

In accordance with Section 65583 of the California Government Code, SCAG then delegates a "fair share" of housing need to its member jurisdictions. The City of Costa Mesa's RHNA allocation is divided amongst four income categories, which are benchmarked on the County of Orange's median income for a family of

four. Table 1-2 below identifies the four income categories by which the City's RHNA allocation is divided. For the 2021-2029 planning period the City of Costa Mesa is allocated a total of 11,760 units as shown below.

Table 1-2: RHNA Income Categories		
Income Category	Percent of Median Family Income (MFI)	Costa Mesa's RHNA Allocation for the 2021-2029 Planning Period
Very Low Income	0-50% MFI	2,919 units
Low Income	51-80% MFI	1,794 units
Moderate Income	81-120% MFI	2,088 units
Above Moderate Income	>120% MFI	4,959 units
	Total	11,760 units

4. Relationship to Other General Plan Elements

The goals, policies, actions, and programs within the Housing Element relate directly to, and are consistent with, all other elements in the City's General Plan. The City's Housing Element identifies programs and resources required for the preservation, improvement, and development of housing to meet the existing and projected needs of its population.

The Housing Element works in tandem with development policies contained in the Land Use Element, most recently amended in 2018. The Land Use Element establishes the location, type, intensity and distribution of land uses throughout the City, and defines the land use build-out potential. By designating residential development, the Land Use Element places an upper limit on the densities and types of housing units constructed in the City. The Land Use Element also identifies lands designated for a range of other uses, including employment creating uses, open space, and public uses. The presence and potential for jobs affects the current and future demand for housing at the various income levels in the City.

The City's Transportation Element also affects the implementation of the Housing Element. The Transportation chapter establishes policies for a balanced circulation system in the City. Costa Mesa's Circulation Element establishes policies governing the system of roadways, intersections, bike paths, pedestrian ways, and other components of the circulations system, which collectively provide for the movement of persons and goods throughout the City. Consequently, the Housing Element must include policies and incentives that consider the types of infrastructure essential for residential housing units in addition to mitigating the effects of growth in the City.

The Housing Element has been reviewed for consistency with the City's other Community Plan Chapters, and the policies and programs in this Element are consistent with the policy direction contained in other parts of the General Plan. As portions of the General Plan are amended in the future, the Housing Element will be reviewed to ensure that internal consistency is maintained.

5. Public Participation

Public participation is a vital component of the Housing Element update process. Public engagement creates opportunities for community members to provide their input and feedback, information which then directs the Housing Element's goals, policies and programs. Section 65583 of the Government Code requires local governments to make diligent and continued efforts to achieve public participation of all

economic segments of the community. Meaningful community participation ensures that a variety of stakeholders and community members are offered a platform to engage in the City's planning process.

The City of Costa Mesa engaged in an extensive community outreach process as part of the development of the 6th Cycle Housing Element. The outreach plan focused on reaching as many segments of the population as possible through a series of citywide meetings, district-specific meetings, focused group meetings, and meetings with topical experts in the area of housing. These efforts were complemented by a series of online presentations, handouts, and community surveys.

Outreach for the 6th Cycle Housing Element to the community are outlined in detail in **Appendix C: Summary of Community Outreach**, and includes the following actions:

- Housing Element Update webpage with all housing materials available in English and Spanish, located at : www.costamesaca.gov/housing-element-update
- Virtual Townhall Meetings
- District Specific Meetings
- Stakeholder Meetings
- Online Community Survey
- City Council and Planning Commission Study Sessions

As required by Government Code Section 65585(b)(2), all written comments regarding the Housing Element made by the public have previously been provided to each member of the City Council.

Appendix C contains a summary of all public comments regarding the Housing Element received by the City during the update process.

6. Data Sources

The data used for the completion of this Housing Element comes from a variety of sources. These include, but are not limited to:

- 2000 and 2010 Census
- American Community Survey
- Regional Analysis of Impediments to Fair Housing (AI)
- Point-in-Time Homeless Census by the Regional Task Force on the Homeless, 2020
- Home Mortgage Disclosure Act (HMDA) lending data
- California Department of Economic Development
- California Employment Development Division Occupational Wage data, 2020
- Department of Housing and Urban Development, Comprehensive Housing Affordability Strategy (CHAS), 2013-2017

The data sources represent the best data available at the time this Housing Element Update was prepared. The original source documents contain the assumptions and methods used to compile the data.

7. Housing Element Organization

This Housing Element represents the City's policy program for the 2021-2029 6th Planning Period. The Housing Element is comprised of the following Chapters:

Chapter 1: Introduction contains as summary of the content, organization, and statutory considerations of the Housing Element;

Chapter 2: Community Profile contains an analysis of the City's population, household and employment base, and the characteristics of the housing stock;

Chapter 3: Housing Constraints, Resources, and Fair Housing examines governmental and non-governmental constraints on production, maintenance, and affordability of housing and provides a summary of housing resources, including sites identification and funding and financial considerations;

Chapter 4: Policy Plan addresses Costa Mesa's identified housing needs, including housing goals, policies, and programs.

Appendices provides various appendices with supplementary background resources including:

- Appendix A – Review of Past Performance of 5th Cycle Programs
- Appendix B – Summary of Adequate Sites Analysis
- Appendix C – Summary of Outreach
- Appendix D – Glossary of Housing Terms

Chapter 2

Community Profile

Community Profile

This Community Profile for the City of Costa Mesa provides an overview of the City's housing and population conditions. The Community Profile serves as the foundation for the 2021-2029 Housing Element's policies. It describes and assesses the factors and characteristics that contribute to the supply and demand for housing in Costa Mesa. Specifically, the Community Profile describes the community's population, employment, economics, and household characteristics. Special needs groups and housing stock characteristics are also described. The Community Profile provides baseline analysis to inform the goals, programs, and policies, included in the Housing Element.

The data used for this Community Profile has been collected using the most current available data from the Southern California Association of Governments (SCAG), 2010 U.S. Census, 2010-2018 U.S. Census American Community Survey (ACS), the California Department of Finance, the California Employment Development Department, the California Department of Education and other relevant available real estate and market data.

A. Population Characteristics

Population characteristics directly impact the current and future housing demand in a community. The type and extent of housing needs is often influenced by population growth, age composition of the community and the mix of race/ethnicity. These factors also determine the ability of the local population to afford housing costs. The following section describes and analyzes various population characteristics and local trends that affect housing needs.

1. Population Growth

Table 2-1 compares Costa Mesa's forecasted population growth from 2010 to 2040 to the surrounding cities. The U.S. Census reported a population of 109,960 in 2010. Costa Mesa's population represents 3.7 percent of the total Orange County population.

Table 2-1 estimates a 2010-2040 population growth of 5.8 percent, or 6,440 persons. Population growth estimates for Orange County anticipated an increase of 8.7 percent between 2010 to 2020. A 5.8 percent growth is projected for Orange County between 2020 and 2040. Costa Mesa's estimated future population growth rate during that time period is lower than surrounding cities. For example, Irvine's population is estimated to increase 10.5% through 2040 and Newport Beach's population is estimated to increase 3.8% over that same period. This is compared to 2.2% growth in Costa Mesa between 2020 and 2040.

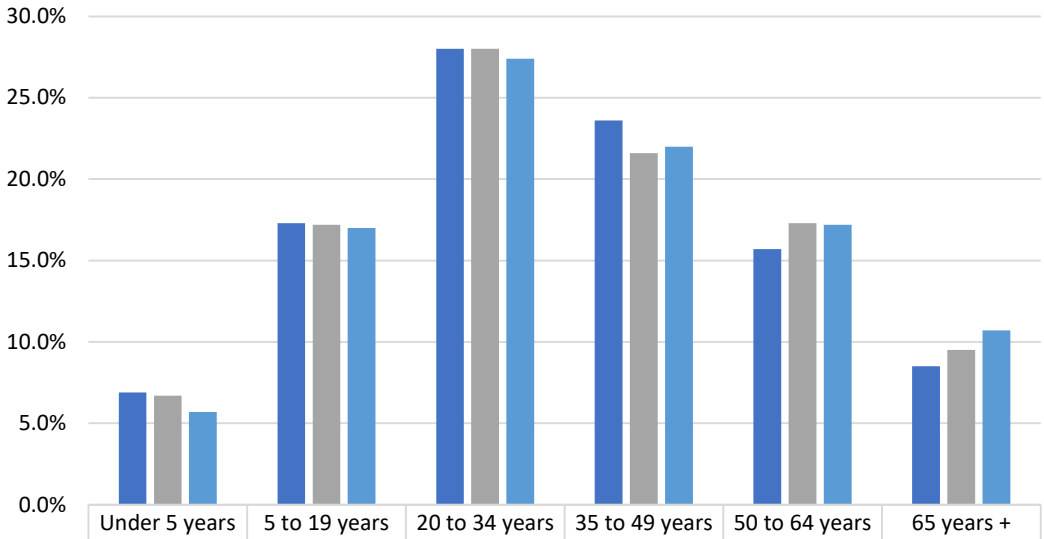

Table 2-1: Population Growth Forecast, 2010-2040							
Jurisdictions	Population					Percent Change	
	2010 Actual	2012 Projected	2020 Projected	2035 Projected	2040 Projected	2010-2020	2020-2040
Newport Beach	85,186	86,300	89,300	92,300	92,700	4.8%	3.8%
Costa Mesa	**109,960**	**111,200**	**113,900**	**116,500**	**116,400**	**3.6%**	**2.2%**
Irvine	212,375	227,100	296,300	326,700	327,300	39.5%	10.5%
Santa Ana	324,528	329,200	340,600	343,400	343,100	5%	0.7%
Huntington Beach	189,992	193,200	203,800	207,300	207,100	7.3%	1.6%
Orange County	3,010,232	3,072,000	3,271,000	3,431,000	3,461,000	8.7%	5.8%
Sources: Bureau of the Census (2010) and SCAG 2016-2040 Regional Growth Forecast by Jurisdiction Report.							

2. Age Characteristics

Age composition of a community is a consideration when evaluating housing need – housing demand within the local real estate market may be influenced by the unique preferences of certain age groups. For example, young adults and seniors may favor apartments, low to moderate-cost condominiums, and smaller or more affordable single-family units. Young adults and seniors tend to have comparatively lower or fixed incomes and may have a smaller family size. In comparison, the middle-aged demographic typically represents the largest portion of local home buyers.

As these age cohorts move through different stages of life, housing needs and preferences will likely change. Creating a well-balanced community that provides for the individual housing needs of its residents will consider the changing housing needs of the current and projected future population.

Figure 2-1: Age Distribution in Costa Mesa, 2010-2018

	Under 5 years	5 to 19 years	20 to 34 years	35 to 49 years	50 to 64 years	65 years +
2010	6.90%	17.30%	28.00%	23.60%	15.70%	8.50%
2015	6.70%	17.20%	28.00%	21.60%	17.30%	9.50%
2018	5.70%	17.00%	27.40%	22.00%	17.20%	10.70%

Source: American Community Survey, 5-Year Estimates, 2010, 2015, and 2018.

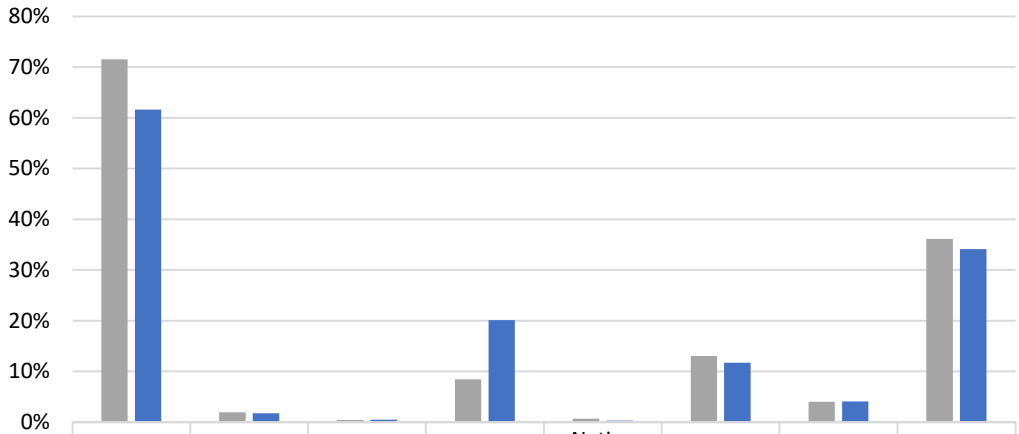
Figure 2-1 shows age distribution of Costa Mesa residents from 2010 to 2018. Young adults 20 to 34 years were estimated to represent the largest age group in Costa Mesa in 2018 (27.4 percent). Children aged 5 years and under were estimated to represent 5.7 percent of the City's population in 2018. Seniors aged 65 years and over experienced the largest percent change of all age groups between 2010 and 2018 (a 2.2% increase).

These data shown in Figure 2-1 indicate a slight aging trend in the City of Costa Mesa, with some decreases in the population aged 34 years and under and a larger increase for persons aged over 50 years. The population aged 65 and over experienced the most growth. An aging population may result in changing needs for different housing types, amenities, and accessibility to local services.

Table 2-2 displays estimated age characteristics in 2018 for Costa Mesa, Orange County, and adjacent cities. Persons aged 25 to 44 represent the largest population age group in Costa Mesa. Teenagers aged 15 to 17 represent the smallest age group in Costa Mesa (3.2 percent of the total population). Just under 11 percent of Costa Mesa's population are persons aged 65 years or older.

Table 2-2: Age Distribution by Jurisdiction, 2018

Jurisdiction	Under 5	5 to 14	15 to 17	18 to 24	25 to 44	45 to 64	65 years +
Newport Beach	3.9%	10%	3.5%	6.3%	23.4%	30.2%	22.7%
Costa Mesa	**5.7%**	**11.4%**	**3.2%**	**9.6%**	**35.2%**	**24.3%**	**10.7%**
Irvine	6.4%	12.4%	3.6%	13%	30.8%	23.9%	9.9%
Santa Ana	7.5%	15.2%	4.4%	11.3%	30.9%	22.1%	8.6%
Huntington Beach	5.2%	10.9%	3.5%	7.6%	27%	29%	16.9%
Orange County	6.0%	12.5%	4%	9.5%	27.4%	26.6%	13.9%



Source: American Community Survey, 5-Year Estimates, 2018

3. Race/Ethnicity Characteristics

Different racial and ethnic groups often represent a variety of household characteristics, income levels, and cultural backgrounds which may influence housing needs, housing choices, and housing types. Various cultures may also influence preferences for specific types of housing that need to be considered in future housing needs of a community.

Figure 2-2 and Table 2-3 compare racial and ethnic composition between Costa Mesa, adjacent communities, and Orange County. The White population represents the largest racial group (71.6 in Costa Mesa). The smallest racial groups, each representing less than 1 percent of the City and County populations, are the American Indian/Alaska Natives and the Native Hawaiian/other Pacific Islanders. The Asian population in Costa Mesa represents 8.4 percent of the total population, compared to 20.1 percent of the total Orange County population. Persons identifying as of Hispanic or Latino origin represent 36.1 percent of entire Costa Mesa's population, compared to 34.1 percent in Orange County. Persons identifying as being of Hispanic or Latino origin may be from any race. This is not additive to the racial composition information shown in Figure 2-2.

Figure 2-2: Percentage of Racial and Ethnic Composition, 2018

	White	Black or African American	American Indian and Alaska Native	Asian	Native Hawaiian and Other Pacific Islander	Some Other Race	Two or More Races	Hispanic or Latino
Costa Mesa	71.6%	1.9%	0.4%	8.4%	0.7%	13.0%	4.0%	36.1%
Orange County	61.7%	1.7%	0.5%	20.1%	0.3%	11.7%	4.1%	34.1%

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-3: Racial and Ethnic Composition, 2018

Jurisdiction	White	Black	American Indian and Alaska Native	Asian	Native Hawaiian or Other Pacific Islander	Some Other Race	Two or More Races	Persons of Hispanic or Latino Origin (of any race)
Newport Beach	85.3%	0.8%	0.3%	8.3%	0.2%	2.1%	3.1%	9%
Costa Mesa	**71.6%**	**1.9%**	**0.4%**	**8.4%**	**0.7%**	**13%**	**4%**	**36.1%**

Huntington Beach	72.4%	1.4%	0.6%	12.1%	0.4%	7.7%	5.4%	20.0%
Orange County	61.7%	1.7%	0.5%	20.1%	0.3%	11.7%	4.1%	34.1%

Source: American Community Survey, 5-Year Estimates, 2018.

Demographic analysis includes evaluating demographic changes over time. The U.S. Census and ACS report little change in racial and ethnic composition in Costa Mesa between 2010 and 2018, as displayed in **Table 2-4**. The greatest percent change was an increase of about 2 percent of the Hispanic and Latino population, regardless of race. The population of persons who identify as two or more races rose by 1.6 percent. The White population experienced the greatest percent decrease between 2010 and 2015 at 5.6 percent. In 2018 the White population increased by 5 percent. Those identifying as Some Other Race increased by 4 percent in 2015 and then decrease by 5.2 percentage points in 2018.

Table 2-4: Racial and Ethnic Composition, 2010-2018					
Race/Ethnicity	2010	2015	2018	Percent Change 2010 to 2015	Percent Change 2015 to 2018
White	72.3%	66.7%	71.6%	-5.6%	4.9%
Black	1.2%	1.6%	1.9%	0.4%	0.3%
American Indian and Alaska Native	0.4%	0.3%	0.4%	-0.1%	0.1%
Asian	9%	9%	8.4%	0%	-0.6%
Native Hawaiian or Other Pacific Islander	0.6%	0.5%	0.7%	-0.1%	0.2%
Some Other Race	14.1%	18.2%	13%	4.1%	-5.2%
Two or More Races	2.4%	3.6%	4%	1.2%	0.4%
Hispanic or Latino	34.2%	35.7%	36.1%	1.5%	0.4%
Source: American Community Survey, 5-Year Estimates, 2010, 2015, and 2018.					

B. Economic Characteristics

Economic characteristics of a community provide valuable insight into a community's ability to access the housing market. Different job types, income levels and the number of workers in a household could also affect housing affordability and choice. Therefore, a healthy balance between jobs and housing is important when evaluating the economic characteristics of a community.

1. Employment and Wage Scale

The SCAG Growth Forecast Report estimates employment growth for the City of Costa Mesa and nearby cities, as summarized in Table 2-5. From 2012 to 2040, Orange County forecasts a net gain of 373,000 new jobs – a 23.2 percent increase over 28 years. Santa Ana and Newport Beach are estimated to experience the smallest percent growth of approximately 7 percent. Irvine has the fastest growing job market with an estimated increase of almost 40 percent, or 95,600 new jobs. In contrast, Costa Mesa has a forecasted employment growth of 9.9 percent through 2040.

Table 2-6 shows how employment has changed amongst different sectors for Costa Mesa residents between 2010 and 2018. In 2010, the majority of the working population in the City was employed in education services, health care, and social assistance. In 2018, the majority of employed persons were estimated to be in the professional, scientific, management, and administrative services sector. This sector is estimated to have increased by 2.7 percent between 2010 and 2018. Agriculture, forestry, fishing and hunting, and mining represents the sector with the lowest rates of employment for all cities in Orange County.

Table 2-5: Employment Growth Trends, 2012-2040								
Jurisdiction	2012	2020	2035	2040	% Change 2012-2020	% Change 2020-2040	# Change 2012-2040	Total % Change

Source: American Community Survey, 5-Year Estimates, 2010 and 2018.					

The unemployment rate is essential to understand the current and projected housing needs and affordability. According to the 2018 ACS survey data in Table 2-7, Costa Mesa was estimated to have an unemployment rate of 4.8 percent, or 4,445 individuals unemployed in the City. This percentage is slightly less than Orange County's rate of 5.1 percent.

Table 2-7: Unemployment Rate, 2018

Jurisdiction	Unemployment Rate*
Newport Beach	3.4%
Costa Mesa	**4.8%**
Irvine	4.9%
Santa Ana	5.6%
Huntington Beach	4.3%
Orange County	5.1%

*Population 16 years and over
Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-7 shows approximately 4.8 percent of the population in Costa Mesa was estimated to be without work in 2018 and would therefore be more likely to need affordable housing options.

2. Regional Affordable Housing Rates

Income levels can determine affordability and choice of housing types offered in Costa Mesa. According to SCAG's Regional Housing Needs Assessment (RHNA), housing needs are defined by the following four income categories:

- Very Low Income (less than 50 percent of the Orange County's median family income)
- **Low Income** (50-80 percent of Orange County's median family income)
- **Moderate Income** (81-120 percent of Orange County's median family income)
- **Above Moderate Income** (120 percent and above of Orange County's median family income)

Included in the very low-income category is the extremely low-income group. Extremely low incomes are less than 30 percent of the County's median family income. Orange County's 2020 median family income, based on an assumed family of four, is $103,000. Table 2-8 provides a summary of median salary by occupation in Costa Mesa in 2018.

Table 2-8: Median Salary by Occupation in Costa Mesa, 2018	
Occupation	**Salary**
Management	$84,842
Legal	$154,293
Computer and Mathematical	$73,170

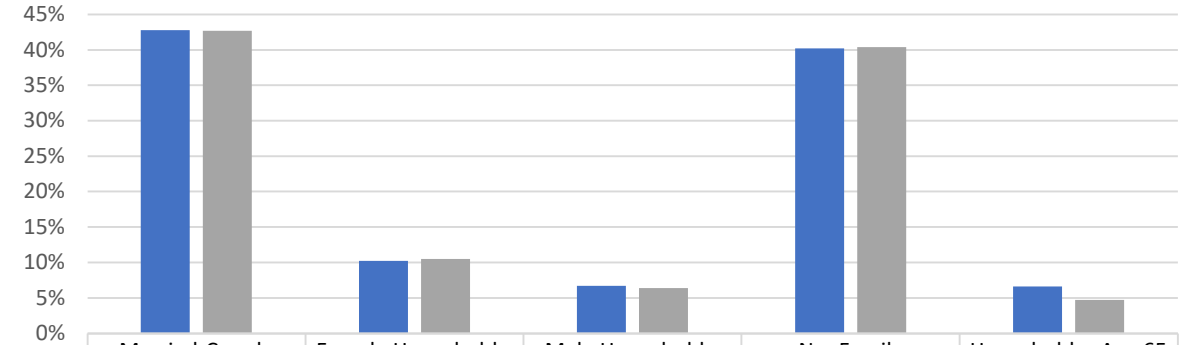
Material Moving	$27,401
Building, Grounds Cleaning, and Maintenance	$25,534
Farming, Fishing and Forestry	$31,090
Food Preparation and Serving Related	$26,465
Personal Care and Service	$34,167
Source: American Community Survey, 5-Year Estimates, 2018.	

C. Household Characteristics

A household is defined by the U.S. Census as all persons who occupy a housing unit. This may include single persons living alone, families related through marriage, blood or adoption, domestic partnerships and unrelated individuals living together. Not all housing is considered a housing unit including, nursing facilities, residential care facilities, dormitories, and other group living; the persons living with them also do not constitute a household.

Information on household characteristics assists in understanding growth and determining the housing needs of a community. Income and affordability are best measured at the household level. The special needs of certain groups, such as large families, single parent households, or low, very low, and extremely low-income households must also be assessed to identify potential housing needs. For example, if a city has a predominately aging population of homeowners who may have fixed incomes, the City may consider implementing a home rehabilitation or maintenance assistance program to assist in deferred maintenance due to lack of disposable income.

1. Household Type and Size



The City of Costa Mesa had an estimated 41,019 households in 2018. Married-couple families are the largest household type in Costa Mesa, representing 42.8 percent of the City's population **(Table 2-9)**. The percentage is lower by comparison to nearby cities. Just under 55 percent of all Orange County residents live in married-couple households. Households of this type typically occupy single family residences with multiple bedrooms. Non-family households are the second largest household type in Costa Mesa, representing 40.2 percent of all households. When combined with senior householders over the age of 65 and living alone, (as shown in **Figure 2-3**), it represents 46.8 percent of all households. Persons aged 65 or older tend to occupy apartments or smaller age-centric living.

Table 2-9: Household Characteristics by Jurisdiction, 2018

Jurisdiction	Married-couple Family Households		Female Household, No Spouse Present		Non-Family Household[1]		Total Households	
	2010	2018	2010	2018	2010	2018	2010	2018
Newport Beach	44.8%	50.1%	5.7%	4.9%	46.7%	42.5%	37,803	37,870
Costa Mesa	**42.7%**	**42.8%**	**10.5%**	**10.2%**	**40.4%**	**40.2%**	**40,104**	**41,019**

Figure 2-3: Costa Mesa Household Characteristics, 2010 and 2018

	Married-Couple Households	Female Households, No Spouse Present	Male Households, No Spouse Present	NonFamily Households	Householder Age 65 or above
2018	42.8%	10.2%	6.7%	40.2%	6.6%
2010	42.7%	10.5%	6.4%	40.4%	4.7%

Source: American Community Survey, 5-Year Estimates, 2010 and 2018.

Table 2-10 summarizes changes in household types between 2010 and 2018. Over this time period, households in Costa Mesa increased by 915. The changes in household types have remained generally constant for all housing types. The two largest percent changes between 2010 and 2018 were a 0.3% decrease for female households and a 0.3% increase for male households.

Table 2-10: Changes in Household Types, 2010-2018

Household Types	2010	Percent	2015	Percent	2018	Percent
Married-couple Family Households	17,127	42.7%	17,039	41.7%	17,568	42.8%

Source: American Community Survey, 5-Year Estimates, 2010, 2015, 2018.

Table 2-11: Average Household Size

Jurisdiction	Average Persons per Household
Newport Beach	2.3
Costa Mesa	**2.7**
Irvine	2.7
Santa Ana	4.3
Huntington Beach	2.6
Orange County	3.0

Source: American Community Survey, 5-Year Estimates, 2018.

The average household size in Costa Mesa is estimated to be 2.7 persons per household, as shown in Table 2-11. This is less than Orange County's average household size of 3.0 persons per household. Of Costa Mesa's adjacent communities, the smallest average household size is in Newport Beach (2.3 persons per household), and the largest household size is in Santa Ana (4.3 persons per household).

2. Household Income

Household income is directly connected to housing affordability and housing choice. As household income increases, it is more likely that the household can afford market rate housing units, larger units, and/or pursue ownership opportunities. As household income decreases, households may spend a disproportionate amount of their income on housing. State and federal guidance suggests that households paying more than 30 percent of their income for housing are considered overpaying. Household income and overpayment influences a household's housing cost burden and may influence increased incidences of overcrowding and substandard living conditions in the area. A high housing cost burden may also influence a household's available income for reinvestment in the local economy, education, and other similar investments.

The data for Table 2-12 comes from the Department of Housing and Urban Development (HUD)'s 2020 Comprehensive Housing Affordability Strategy (CHAS) estimates which are based on 2013-2017 American Community Survey (ACS) data and area median family income (AMFI). A total of 52.8 percent of the Costa Mesa population qualify for the moderate-income category. About 29 percent qualify for very low or extremely low income - this is about 11,842 Costa Mesa households that make less than $42,699 annually.

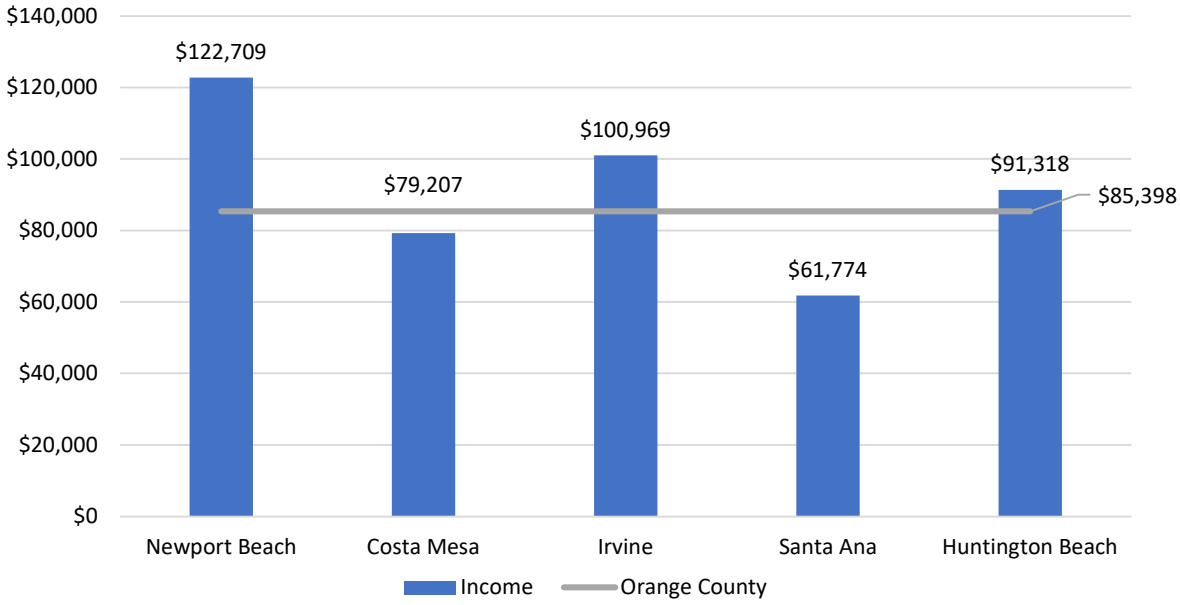

Table 2-12: Households by Income Category, 2020

Income Category (% of Orange County's AMFI)	No. of Households	Percent
Extremely Low (30% AMFI or less)	6,610	16.3%
Very Low (31 to 50% AMFI)	5,220	12.9%
Low (51 to 80% AMFI)	7,325	18.1%
Moderate or Above (over 80% AMFI)	21,405	52.8%
Total	**40,555**	**100%**

Source: Department of Housing and Urban Development (HUD) Comprehensive Housing Affordability Strategy (CHAS), 2013-2017.

The median household income in Costa Mesa is $6,191 lower than Orange County's median household income. Figure 2-4 compares Costa Mesa's median household income to that of Orange County and the City's neighboring communities. This figure shows that Costa Mesa households have a lower median household income comparatively.

Figure 2-4: Median Household Income by City, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

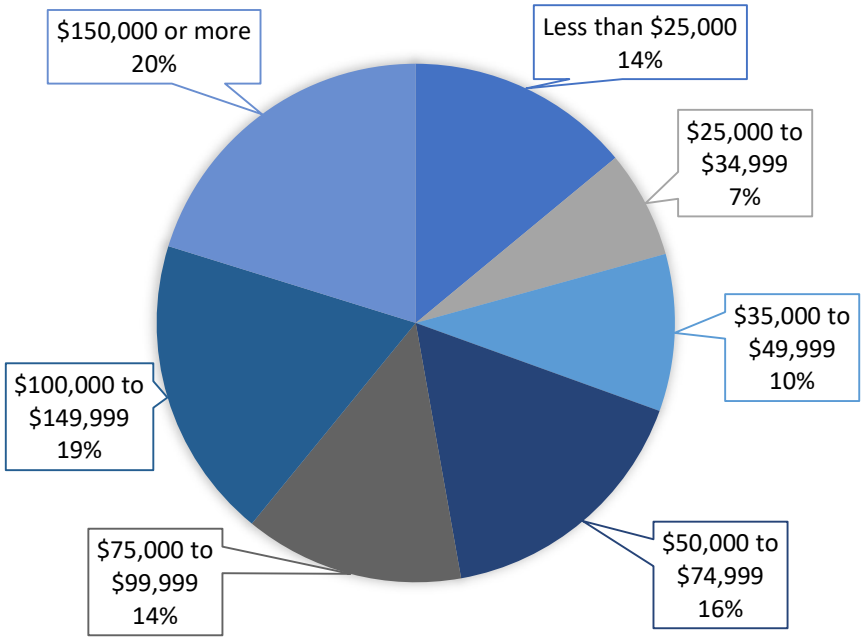

Table 2-13 presents the median income for Costa Mesa and its adjacent cities in comparison to the regional median for Orange County in 2018. Costa Mesa households have a median income 7.2 percent below the regional median. The City's median household income is higher than that of Santa Ana at $61,774. Aside from Costa Mesa and Santa Ana, the other nearby cities have a median income above the regional median. Newport Beach has a significantly higher median household income at $122,709 annually, approximately and 64.5 percent higher than the Costa Mesa's median household income.

Table 2-13: Median Household Income, 2018

Jurisdiction	Median Income	Percent Above/Below Regional Median
Newport Beach	$122,709	43.7%%
Costa Mesa	**$79,207**	**-7.2%**
Irvine	$100,969	18.2%
Santa Ana	$61,774	-27.7%
Huntington Beach	$91,318	6.9%
Orange County	$85,398	--

Source: American Community Survey, 5-Year Estimates, 2018.

D. Housing Problems and Housing Needs

The 2020 Comprehensive Housing Affordability Strategy (CHAS) provides detailed information on housing needs by income level for different types of households in Costa Mesa. The most recent available CHAS data for Costa Mesa was published in August 2020 and is based on 2013-2017 American Community Survey (ACS) data (Table 2-14). Housing problems considered by CHAS include:

- Units with physical defects (lacking complete kitchen or bathroom);
- Overcrowded conditions (housing units with more than one person per room – excluding bathrooms and kitchens);
- Housing cost burdens, including utilities, exceeding 30 percent of gross income; and
- Severe housing cost burdens, including utilities, exceeding 50 percent of gross income.

The types of housing problems in Costa Mesa vary according to household income, housing type, and tenure. Renters make up the greatest percentage of households at about 60 percent. Renters experiencing at least one of the four housing problems listed above represent 33.4 percent of all households and about 55 percent of all renters. Households who do not have any of the four housing problems are similar for both owners and renters (25.7 percent and 26.6 percent, respectively). For the City as a whole, 46.5 percent of households have at least one of the four housing problems.

The severe housing problems category relates to the livability of a residence and critically affects the quality of life of the occupants. These are important to analyze as it may reveal an aging housing stock, as well as a need for affordable housing. Severe housing problems include incomplete kitchen facilities, incomplete plumbing facilities, more than 1.5 persons per room (rate of severe overcrowding), and a cost burden greater than 50 percent of a household's annual income. Table 2-14 shows that at 70.6 percent or the

majority of Costa Mesa households do not have any of the four severe housing problems. However, 28.2 percent of households do experience at least one of these problems. Renters with at least one severe housing problem represent 21.5 percent of all Costa Mesa households. Owners with at least one severe housing problem represent 6.7 percent of all households.

Table 2-14: Housing Assistance Needs of Lower Income Households, 2013-2017

Housing Problem Overview*	Owner	% of total HH	Renter	% of total HH	Total	% of total HH
Household has at least 1 of 4 Housing Problems	5,330	13.1%	13,540	33.4%	18,870	46.5%
Household has none of 4 Housing Problems	10,425	25.7%	10,785	26.6%	21,210	52.3%
Cost Burden not available, no other problems	95	0.2%	380	0.9%	475	1.2%
Total	**15,850**	**39.0%**	**24,705**	**60.9%**	**40,555**	**100.0%**

Household has at least 1 of 4 Severe Housing Problems	2,720	6.7%	8,715	21.5%	11,435	28.2%
Household has none of 4 Severe Housing Problems	13,040	32.2%	15,610	38.5%	28,650	70.6%
Cost Burden not available, no other problems	95	0.2%	380	0.9%	475	1.2%
Total	**15,855**	**39.1%**	**24,705**	**60.9%**	**40,560**	**100.0%**

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) 2013-2017.
** The four housing problems are: incomplete kitchen facilities, incomplete plumbing facilities, more than 1 person per room, and cost burden greater than 30%.*
*** The four severe housing problems are: incomplete kitchen facilities, incomplete plumbing facilities, more than 1.5 persons per room, and cost burden greater than 50%.*

1. Overcrowding

"Overcrowding" is generally defined as a housing unit occupied by more than one person per room in a house (including living room and dining rooms, but excluding hallways, kitchen, and bathrooms). An overcrowded household results from either a lack of affordable housing and/or a lack of housing units of adequate size. The combination of lower incomes and high housing costs can result in households living in overcrowded housing conditions. Additionally, overcrowding can indicate that a community does not have an adequate supply of affordable housing, especially for larger families.

Overcrowded and severely overcrowded households can contribute to neighborhood deterioration. This can be due to more intensive use leading to excessive wear and tear, and/or the potential cumulative

overburdening of community infrastructure and service capacity. Generally, overcrowding in neighborhoods could contribute to overall decline in social cohesion and environmental quality. Such decline may spread geographically and impact the quality of life, the economic value of property, and the vitality of commerce within a city.

Table 2-15 summarizes the overcrowding condition in Costa Mesa. Data from the 2018 ACS reports an estimated 6 percent overcrowded housing units and 3 percent severely overcrowded housing units. About 1 percent of owner-occupied housing units are overcrowded and just under 8 percent of renter-occupied housing units are overcrowded. Renters living in overcrowded housing units represent 5.1 percent of all occupied housing units and renters living in severely overcrowded housing units represent 2.8 percent of all occupied housing units.

Table 2-15: Overcrowding by Tenure, 2018

Tenure	Overcrowded Housing Units (1.0 to 1.50 persons/room)		Severely Overcrowded Housing Units (>1.51 persons/room)		Total Overcrowded Occupied Housing Units	
	Count	Percent of Total Occupied Housing Units	Count	Percent of Total Occupied Housing Units	Count	Percent of Total Occupied Housing Units
Owner Occupied	361	0.9%	74	0.2%	435	1.1%
Renter Occupied	2,082	5.1%	1,169	2.8%	3,251	7.9%
Total	**2,443**	**6%**	**1,243**	**3%**	**3,686**	**9%**

Source: American Community Survey, 5-Year Estimates, 2018.

Costa Mesa has one of the largest estimated percentages of renters living in overcrowded housing units compared to nearby cities and Orange County (Table 2-16). With 88 percent of renter-occupied housing units overcrowded, Costa Mesa is slightly less than Newport Beach; however, Newport Beach reports 505 overcrowded renter-occupied units while Costa Mesa reports 3,251. Santa Ana has the lowest percentage of renters living in overcrowded units, but at 27 percent it has the highest rate of owner-occupied housing units experiencing overcrowding (15 percent more than Costa Mesa). Overcrowding in Costa Mesa is 12 percent below the regional percentage for owners and 12 percent above the regional percentage for renters. In comparison, Costa Mesa has one of the lowest rates of overcrowding in owner-occupied housing units (12 percent) behind Newport Beach. Table 2-17 shows the combination of renter occupied and owner occupied indicating that the City of Costa Mesa has the second highest rate of overcrowding in this area of Orange County (9 percent) which is 0.1 percent above the regional total.

Table 2-16: Overcrowded Housing Units by Tenure, 2018				
Jurisdiction	Owner Occupied Overcrowded Units (>1.0 persons/room)		Renter Occupied Overcrowded Units (>1.0 persons/room)

2. Overpayment (Cost Burden) for Housing In Relation to Income

Overpayment is an important consideration when evaluating housing need and affordability. State and federal guidance suggests that households paying more than 30 percent of their income for housing are considered overpaying. Overpayment for housing can cause an imbalance for overall household budgets.

Table 2-18 and Table 2-19 provides a summary of housing overpayment in Costa Mesa and a comparative analysis between homeowners and renters. In general, renters are more prone to overpayment than homeowners due to lower incomes that do not allow them to qualify for purchasing a home with a fixed mortgage payment or at an affordable price. In Costa Mesa, 48.8 percent of renters are estimated to spend more than 30 percent of their income on housing. In comparison, 31.8 percent of homeowners spend that same amount. For renters, as their household income rises so does their ability to afford rent. Renters who earn an Area Median Family Income (AMFI) of 30 percent or less have much greater cost burdens than homeowners with the same income; 17.5 percent of renters spend 30 percent or more of their income and 16.3 percent spend over 50 percent. By comparison, homeowners who also earn an AMFI of 30 percent or less, 7.3 percent spend 30 percent of more of their income on housing and 6.2 percent spend over 50 percent. Table 2-18 also shows that homeowners who earn a low to moderate income are the most likely to experience a cost burden of 30 percent or more.

Table 2-18: Summary of Housing Overpayment for Homeowners				
Income by Cost Burden*	Cost Burden > 30%	% of Owner HH	Cost Burden > 50%	% of Owner HH
Household Income is less-than or = 30%	1,165	7.3%	990	6.2%
Household Income >30% to less-than or = 50% AMFI	770	4.9%	505	3.2%
Household Income >50% to less-than or = 80% AMFI	1,230	7.8%	540	3.4%
Household Income >80% to less-than or = 100% AMFI	670	4.2%	185	1.2%
Household Income >100% AMFI	1,200	7.6%	115	0.7%
Total	**5,035**	**31.8%**	**2,335**	**14.7%**

* Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes.
Note: AMFI = Area Median Family Income, this is the median family income calculated by HUD for each jurisdiction, to determine Fair Market Rents (FMRs) and income limits for HUD programs. AMFI will not necessarily be the same as other calculations of median incomes (such as a simple Census number), due to a series of adjustments that are made.

E. Special Needs Groups

State law recognizes certain households may have more difficulty in finding adequate and affordable housing due to special circumstances. Special needs populations include seniors, persons with disabilities, female-headed households, large households, and farm workers. Based on the analysis included within this section the City of Costa Mesa has developed Program 2C which describes how the City will expend available CDBG funds to support residents with special housing needs.

Special circumstances may be related to one's employment and income, family characteristics, disability and household characteristics, or other factors. Consequently, certain Costa Mesa residents may experience higher incidences of housing overpayment (cost burden), overcrowding, or other housing problems. The special needs groups analyzed in the Housing Element include the elderly, persons with disabilities (including persons with developmental disabilities), individuals experiencing homelessness, single parents, large households, and farmworkers (Table 2-20). These groups may also overlap, for example some elderly people may have a disability of some type. The majority of these special needs groups could be assisted by an increase in affordable housing.

The following sections provide a detailed discussion of the housing needs facing each particular group in Costa Mesa as well as programs and services available to address their housing needs.

Table 2-20: Special Needs Groups in Costa Mesa

Special Needs Groups	# of People or Households	Percent of Total Households	Percent of Total Population
Senior Population	12,138 people	--	10.7%
Senior Headed Households	9,757 people	--	8.6%
Seniors Living Alone	3,075 households	7.5%	--
Persons with Disabilities	9,224 people	--	8.1%
Large Households (5 or more persons per household)	3,926 households	9.6%	--
Single-Parent Households	3,787 households	9.2%	--
Single-Parent, Female Headed Households with Children (under 18 years)	2,304 households	5.7%	--
People Living in Poverty[1]	14,554 people	--	12.9%
Farmworkers	557 people	--	0.5%
Migrant Farmworkers	340 people	--	--
Seasonal Farmworkers	666 people	--	--
Permanent Farmworkers	1,106 people	--	--
Persons Experiencing Homelessness	193 people	--	0.2%

1. The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If a family's total income is less than the family's threshold, then that family and every individual in it is considered in poverty.
Source: American Community Survey, 5-Year Estimates, 2018; Orange County Point in Time County /Homeless Count, 2019.

1. Seniors

The senior population is generally defined as those over 65 years of age. Seniors have a high likelihood of limited and fixed incomes, higher health care costs, greater mobility challenges and self-care limitations, transit dependency, and commonly live alone. Specific housing needs of the senior population include affordable housing, supportive housing, co-living, multi-generational settings such as Accessory Dwelling Units and other housing options that include a planned service component.

Table 2-21 shows that Costa Mesa has a lower senior population compared to some nearby cities and Orange County, in general. Seniors over the age of 65 comprise 10.7 percent of the Costa Mesa population. Costa Mesa seniors represent a greater population percentage than those in Irvine (9.9 percent) and Santa Ana (8.6 percent). Newport Beach has the largest senior population of the area compared at 22.7 percent (12 percent more than Costa Mesa). The senior population of the County of Orange (13.9 percent) is 3.2 percent greater than that of Costa Mesa.

Table 2-21: Persons Age 65 and Over in Costa Mesa

Jurisdiction	Population Count	Percent
Newport Beach	19,574	22.7%
Costa Mesa	**12,138**	**10.7%**
Irvine	26,228	9.9%
Santa Ana	28,621	8.6%
Huntington Beach	34,002	16.9%
Orange County	440,488	13.9%

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-22 illustrates the tenure of senior households in the City of Costa Mesa. The majority of senior households are owner-occupied with 58.8 percent of all senior households.

Table 2-22: Senior Households by Tenure

Tenure	Senior Households	Percent of Total Senior Households
Owner Occupied	5,143	58.8%
Renter Occupied	3,611	41.2%
Total	**8,754**	**100.0%**

Source: American Community Survey, 5-Year Estimates, 2019.

Federal housing data defines the household type as 'elderly family' if it consists of two persons with either or both age 62 or over. Table 2-23 summarizes the income and tenure of elderly family households in Costa Mesa. Of elderly households in Costa Mesa, 24.5 percent earn less than 30 percent of the surrounding area income, 39.4 percent earn less than 50 percent of the surrounding area.

Table 2-23: Elderly Households by Income and Tenure				
Income Category, relative to surrounding area	Owner	Renter	Total	Percent of Total Elderly Households
Extremely Low (30% HAMFI or less)	905	955	1,860	24.5%
Very Low (30% to 50% HAMFI)	840	290	1,130	14.9%
Low (50% to 80% HAMFI)	1,090	555	1,645	21.7%
Moderate (80% to 100% HAMFI)	465	195	660	8.7%
Above Moderate (100% HAMFI or more)	1,720	580	2,300	30.3%
Total	5,020	2,575	7,595	--
Source: HUD CHAS, 2012-2016, (Reported by the Southern California Association of Governments Per-Certified Local Housing Data for 2021).				

In addition to overpayment problems faced by seniors due to their relatively fixed incomes, seniors may be faced with various disabilities. In 2018, the American Community Survey (ACS) 5-year estimate reported 4,064 Costa Mesa seniors with a disability. Among these disabilities, the most common were ambulatory disabilities, independent living disabilities and hearing disabilities. Based on this analysis, the City has developed Program 2D to identify opportunities for Senior Housing developments within Costa Mesa. Actions include outreach and collaboration with the senior housing development community to understand needs and opportunities.

2. Persons with Physical and Developmental Disabilities

Physical and developmental disabilities may hinder access to traditionally designed housing units. Physical, mental, and/or developmental disabilities may deprive a person from earning an income, restrict one's mobility, or make self-care difficult. Some residents may also have disabilities that require living in a supportive or institutional setting. Thus, persons with disabilities generally have special housing needs that must be provided with the City's housing stock.

No current comparisons of disability with income, household size, or race/ethnicity are available. However, it is reasonable to assume that a substantial portion of persons with disabilities would have annual incomes within Federal and State income limits, especially households not in the labor force. Furthermore, lower income persons with disabilities are likely to require housing assistance and services. Housing needs for disabled persons are further compounded by costly design issues and location factors such as proximity to transit, medical services, and retail. For example, special needs households with wheelchair-bound or semi-ambulatory individuals may require ramps, holding bars, special bathroom designs, wider doorways, lower cabinets, elevators, and other interior and exterior design features.

The 2018 ACS identifies six disability types: hearing disability, vision disability, cognitive disability, ambulatory disability, self-care disability, and independent living disability. The Census and the ACS provides clarifying questions to determine persons with disabilities and to differentiate between disabilities. The ACS defines a disability as a report of one of the six disabilities identified by the following questions:

- **Hearing Disability**: Is this person deaf or does he/she have serious difficulty hearing?
- **Visual Disability**: Is this person blind or do they have serious difficulty seeing even when wearing glasses?
- **Cognitive Difficulty**: Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?
- **Ambulatory Difficulty**: Does this person have serious difficulty walking or climbing stairs?
- **Independent Living Difficulty**: Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctor's office or shopping?

Table 2-24: Disability Status in Costa Mesa

Disability Type	Under 18 with a Disability	18 to 64 with a Disability	65 years and Over with a Disability	Total	Percent of Population with Disability	Percent of Total Population
Population with a Hearing Difficulty	93	904	1,592	**2,589**	28.1%	2.3%
Population with a Vision Difficulty	112	894	905	**1,911**	20.7%	1.7%
Population with a Cognitive Difficulty	371	2,159	1,489	**4,019**	43.6%	3.6%
Population with an Ambulatory Difficulty	48	1,670	2,571	**4,289**	46.5%	3.8%
Population with a Self-care Difficulty	96	591	1,069	**1,756**	19%	1.6%
Population with an Independent Living Difficulty	--	1,403	1,993	**3,396**	36.8%	3%
Total	**535**	**4,625**	**4,064**	**9,224***	**100%***	**8.2%***

Source: American Community Survey, 5-Year Estimates, 2018.
**This number may include persons reporting having one or more disabilities. Percentages include persons reporting having more than one disability and are not additive.*

State law requires that the Housing Element discuss the housing needs of persons with developmental disabilities. As defined by federal law, "developmental disability" means a severe, chronic disability of an individual that:

- Is attributed to a mental or physical impairment or combination of mental and physical impairments;
- Is manifested before the individual attains age 22;
- Is likely to continue indefinitely;
- Results in substantial functional limitations in three or more of the following areas of major life activity: a) self-care; b) receptive and expressive language; c) learning; d) mobility; e) self-direction; f) capacity for independent living; or g) economic self- sufficiency; and
- Reflects the individual's need for a combination and sequence of special, interdisciplinary, generic services, individualized supports, or other forms of assistance that are of lifelong or extended duration and are individually planned and coordinated.

Per Section 4512 of the Welfare and Institutions Code, a "developmental disability" means a disability that originates before an individual attains the age of 18, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual. A developmental disability includes intellectual disability, cerebral palsy, epilepsy, and autism. This term also includes disabling conditions found to be closely related to intellectual disability or to require treatment like that required for individuals with intellectual disability. This term does not include other handicapping conditions that are solely physical in nature.

According to the Regional Center of Orange County's (RCOC) *Total Annual Expenditures and Authorized Services for Fiscal Year 2019-2020*, a total of 25,163 individuals living in Orange County received services. RCOC represents the fifth largest regional center in California and has over 300 service coordinators. Diagnosis reported by the individuals who received services include 37.6 percent with an intellectual disability, 31 percent with Autism, 2.5 percent with Cerebral Palsy, 1 percent with Epilepsy, 3.9 percent with a Category 5 disability, and 24.1 percent reported "Other". Of those who received services, 31.6 percent reported their race as White, 16 percent reported Asian, 16.1 percent reported Other Ethnicity or Race/Multi-Cultural, and 2 percent reporter Black/African American. Approximately 34 percent of those who received services also reported their ethnicity as Hispanic or Latino. Ages of the 25,163 individuals includes 21.1 percent 2 years or younger, 39.9 percent 3 to 21 years, and 39 percent over the age of 22. The majority of those who received services lived at the home of a parent or guardian (82.3 percent), but 6.8 percent live in a Community Care Facility and 5.6 percent live in Independent Living or Supported Living.

People with developmental disabilities may live and work independently within a conventional housing environment. Individuals with more severe developmental disabilities may require a supervised group living environment. The most severely affected individuals may require an environment where medical attention and physical therapy services are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for persons with developmental disabilities is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

There are several housing types and assistance programs appropriate for people living with a development disability: rent subsidized homes, licensed single-family homes, Section 8 vouchers, special programs for home purchase, HUD housing, and SB 962 (veterans) homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of housing opportunities represent some of the types of considerations that are important in serving the needs of this group. Incorporating 'barrier-free' design in all new, multi-family housing (as required by California and Federal Fair Housing laws) is especially important to provide the widest range of choices for residents with disabilities. Special consideration should also be given to the affordability of housing as people with disabilities may be living on a fixed income.

3. Large Households

Large households are defined as those consisting of five or more members. These households comprise a special need group because many communities have a limited supply of adequately sized and affordable housing units. To save for other basic necessities such as food, clothing, and medical care, it is common for lower income large households to reside in smaller units with a low number of bedrooms, which may result in overcrowding and can contribute to fast rates of deterioration.

Securing housing large enough to accommodate all members of a household is generally more challenging for renters as multi-family rental units are generally physically smaller with limited bedrooms than single-family ownership units. While apartment complexes offering two and three bedrooms are common, apartments with four or more bedrooms are rare; housing units with 4 or more bedrooms account for approximately 15 percent of housing units in the City. Therefore, it is more likely that large households will experience overcrowding in comparison to smaller households. Additionally, single-family homes with higher bedroom counts, whether rental or ownership units, are rarely affordable to lower income households in the region.

According to the 2018 ACS 5-year estimates, there is a much greater amount of large renter households than large owner-occupied households (**Table 2-25**). Approximately, 63 percent of large households are renter households, of which 56 percent are 5-person households. As **Table 2-25** also shows a reverse relation between household size and overcrowding; as the total number of large households decreases, the household size increases. Therefore, 58.3 percent of large households are 5-person households compared to 17.1 percent 7-person households.

Table 2- 25: Large Households by Tenure in Costa Mesa

Household Size	Owner		Renter		Total	
	Count	Percent	Count	Percent	Count	Percent
5-Person Household	944	62.1%	1,441	56%	2,385	58.3%
6-person household	278	18.3%	728	28.3%	1,006	24.6%
7-or-more person Households	298	19.6%	402	15.6%	700	17.1%
Total	**1,520**	**37.2%**	**2,571**	**62.8%**	**4,091**	**100%**

Source: American Community Survey, 5-Year Estimates, 2018

Table 2-26 provides comparisons of large households between Costa Mesa and its neighboring cities. At ten percent, Costa Mesa has a lower total number of large households than Orange County (14.2 percent). Of the neighboring cities, Santa Ana has the greatest number of large households (25 percent more than Costa Mesa). In comparison, Costa Mesa has approximately 5 percent more large households than Newport Beach. While lower than the County percentage as a whole, ten percent of the total households containing five or more persons is a large portion of the Costa Mesa community. In response, **Program 2E** describes actions the City will take to encourage the development of additional housing options for large-family households.

Table 2-26: Percent of Large Households by Jurisdiction

	5-Person Households	6-Person Households	7-or-More Person Households	Total Large Households
Newport Beach	3.6%	1.3%	0.3%	5.1%
Costa Mesa	**5.8%**	**2.5%**	**1.7%**	**10.0%**
Irvine	5.3%	1.9%	0.6%	7.8%
Santa Ana	14.2%	9.4%	11.4%	35.0%
Huntington Beach	5.3%	1.6%	0.9%	7.8%
Orange County	7.9%	3.5%	2.8%	14.2%

Source: American Community Survey, 5-Year Estimates, 2018.

4. Single-Parent Households

Single-parent households often require special consideration and assistance due to their greater need for affordable and accessible day care, health care, and other supportive services. Many female-headed households with children are susceptible to having lower incomes than similar two-parent households.

Table 2-27 shows a breakdown of single parent households and poverty status. Of the single parent households in Costa Mesa, the majority are estimated to be female households with no spouse present (60.7 percent) and 39.3 percent are estimated to be male households with no spouse present. With 3,110 single parent households, Costa Mesa is only 0.2 percentage points over Orange County's percentage. Over a quarter of these Costa Mesa single-parent households live under the poverty line (27.4 percent).

Table 2-27: Single Parent Households in Costa Mesa

Jurisdiction	Single Parent-Male, No Spouse Present		Single Parent-Female, No Spouse Present		Single Parent Households Living in Poverty		Single Parent Households	Percent of Total Households
	Count	% of Single Parent HH	Count	% of Single Parent HH	Count	% of Single Parent HH	Count	Percent
Costa Mesa	1,223	39.3%	1,887	60.7%	851	27.4%	3,110	7.6%
Orange County	22,456	29.5%	53,659	70.5%	22,999	30.2%	76,115	7.4%

Source: American Community Survey, 5-Year Estimates, 2018.

5. Farmworkers

Farmworkers are traditionally defined as persons whose primary incomes are earned through permanent or seasonal agricultural labor. Permanent farm laborers work in the fields, processing plants, or support activities on a generally year-round basis. When workload increases during harvest periods, the labor force is supplemented by seasonal workers, often supplied by a labor contractor. For some crops, farms may hire migrant workers, defined as those whose travel prevents them from returning to their primary residence every evening. Farm workers have special housing needs because they earn lower incomes than many other workers and move throughout the year from one harvest location to the next.

The United States Department of Agriculture, National Agriculture Statistics provides data on hired farm labor across the United States. The data is compiled at both a State and County level. Within Orange County, a total of 99 farms reportedly hired 1,772 workers in 2017. Permanent workers, those who work 150 days or more, represent the largest category of workers with 1,106 workers (62 percent). A total of 666 workers (38 percent) are considered seasonal and work less than 150 days. Orange County reported 340 migrant workers (19 percent) with full time hired labor in 2017. In addition, the County reported 176 unpaid workers.

The median annual salary for the agriculture, forestry, fishing, hunting, and mining industry in Costa Mesa is $31,023, which is 36 percent of the Orange County median income and is considered as a very-low income (2018).

6. Extremely Low-Income Households and Poverty Status

Extremely low-income households are those which earn less than 30 percent of the AMFI. The 2013-2017 Comprehensive Housing Affordability Strategy (CHAS) indicates that there are approximately 6,610 extremely low-income households in Costa Mesa. Table 2-8 identifies occupations with salaries that could qualify as extremely low-income, these include: healthcare support; material moving; building, grounds cleaning, and maintenance; food preparation and serving related.

Extremely low-income households represent approximately 16.3 percent of all Costa Mesa households. Of these households, 76.5 percent are renters and 23.5 percent are homeowners. Extremely low-income renter households represent about 20.5 percent of Costa Mesa renter households, and extremely low-income owner households represent about 9.8 percent of Costa Mesa owner households.

Table 2-28 illustrates the tendencies for extremely low-income households to experience housing problems and cost burdens. The housing problems identified by CHAS include the following:

- Units with physical defects (lacking complete kitchen or bathroom);
- Overcrowded conditions (housing units with more than one person per room);
- Housing cost burdens, including utilities, exceeding 30 percent of gross income; or
- Severe housing cost burdens, including utilities, exceeding 50 percent of gross income.

As the table shows, over double the percent of renters experience housing problems and cost burdens than homeowner. Cost burdens over 50 percent are more common than over 30 percent for both extremely low-income renter and owner households. In total, 13.8 percent of all Costa Mesa households earn an extremely low-income and experience at least one housing problem and 12.4 percent spend over half of their income on housing.

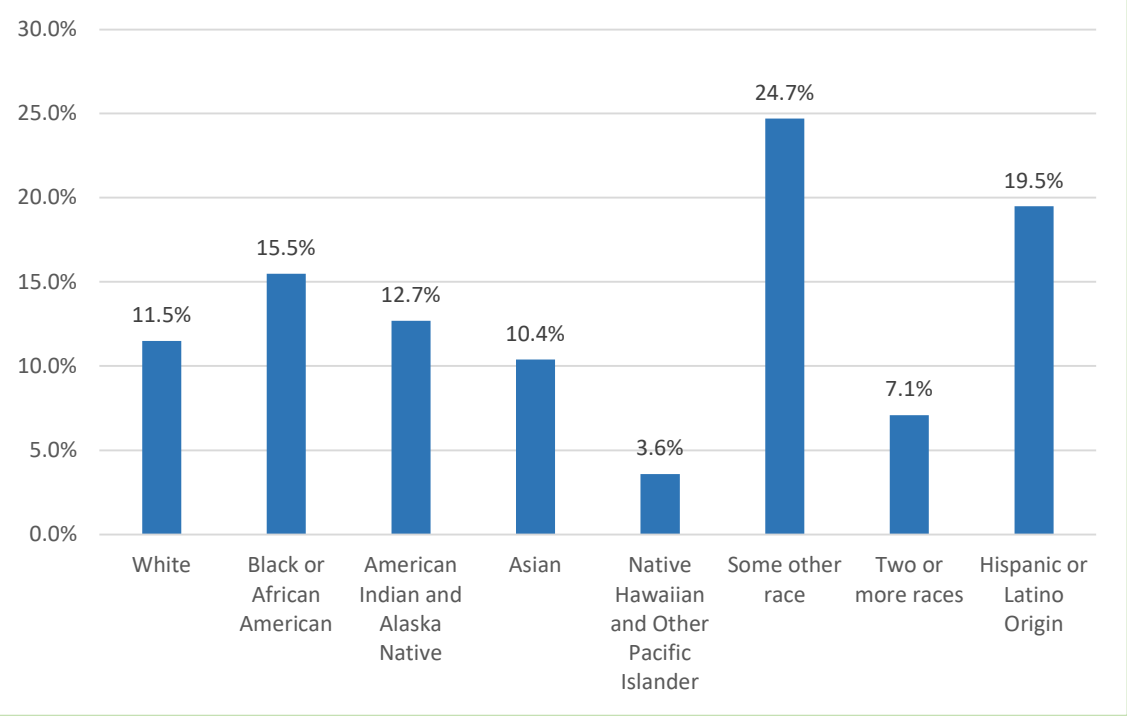

Table 2-28: Housing Needs of Extremely Low-Income Households

Housing Problems	Renter Households		Owner Households		Total Households	
	Count	% of Renter HH	Count	% of Owner HH	Count	% of Total HH
Household has at least 1 of 4 housing problem	4,400	17.8%	1,210	7.6%	5,610	13.8%
Cost burden > 30%	4,325	17.5%	1,165	7.3%	5,495	13.5%
Cost Burden > 50%	4,020	16.3%	990	6.2%	5,015	12.4%

Source: Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) 2013-2017.

Figure 2-6 compares poverty levels by race and ethnicity in order to identify disparities amongst people in Costa Mesa. Residents who report Some Other Race have the highest percentage of poverty in the City (24.7 percent). About 20 percent of people living under the poverty line are of Hispanic or Latino origin. Combined, the Black and American Indian/Alaska Native populations account for 28.2 percent of those below the poverty level, despite representing a total of just 2.3 percent of the entire population. Native Hawaiian and other Pacific Islander community members have the lowest percentage of poverty, but only represent 0.7 percent of the total City population. The White population is the largest racial group in the City and is estimated to have one of the lower poverty percentages at 11.5 percent.

Figure 2-6: Percent below Poverty Level, by Race and Hispanic or Latino Origin

Source: American Community Survey, 5-Year Estimates, 2018.

Projected Need

To calculate the future needs of extremely low-income households, the City assumes 50 percent of its very low-income RHNA are extremely low-income households. The City was allocated a very low-income RHNA of 2,919 units; as such, the extremely low-income unit need is projected to be 1,459 units.

To address the unique needs of extremely low-income households, the City has included programs in the Housing Plan that seek to provide a variety of housing types that may provide services for extremely low-income households facing other challenges, as well as facilitate the development of new affordable units. Programs that directly address the needs of extremely low-income households include:

- **Program 2J: Transitional and Supportive Housing** will amend the land use matrix to comply with SB 2, create an inventory of sites appropriate for the development of transitional and supportive housing units, and collaborate with organizations on addressing the needs of persons experiencing homelessness and extremely low-income residents.
- **Program 2L: Development of Housing for Extremely Low- and Lower-Income Households** will facilitate the development of housing for extremely low- and lower-income households by subsidizing up to 100 percent of the of the City's application processing fees for qualifying developments where all units are affordable to 80% AMI or lower (when funding is available), and promote the benefits of this program to the development community.

7. Persons Experiencing Homelessness

Throughout the Southern California region, homelessness has become an increasingly important issue. Factors contributing to the rise in homelessness include increased unemployment and underemployment, limited affordable housing available to lower and moderate-income persons (especially extremely low-income households), reductions in public subsidies to lower income persons, and legislative impacts pertaining to the behavioral health system of care and correctional reform mandates.

State law mandates that cities address the special needs of persons experiencing homelessness within their jurisdictional boundaries. "Homelessness" as defined by the U.S. Department of Housing and Urban Development (HUD) has recently been updated to include the following descriptions:

- People who are living in a place not meant for human habitation, in emergency shelter, in transitional housing, or are exiting an institution where they temporarily resided. The only significant change from existing practice is that people will be considered homeless if they are exiting an institution where they resided for up to 90 days (previously 30 days) and were in shelter or a place not meant for human habitation immediately prior to entering that institution.
- People who are losing their sleeping quarters, which may include a motel or hotel or a doubled-up situation, within 14 days and lack resources or support networks to remain in housing. HUD had previously allowed people who were being displaced within 7 days to be considered homeless. The proposed regulation also describes specific documentation requirements for this category.
- Families with children or unaccompanied youth who are unstably housed and likely to continue in that state. This category applies to families with children or unaccompanied youth who have not had a lease or ownership interest in a housing unit in the last 60 or more days, have had two or more moves in the last 60 days, and who are likely to continue to be unstably housed because of disability or multiple barriers to employment.
- People who are fleeing or attempting to flee domestic violence, have no other residence, and lack the resources or support networks to obtain other permanent housing. This category is similar to the current practice regarding people who are fleeing domestic violence.

This definition does not include persons living in substandard housing (unless it has been officially condemned); persons living in overcrowded housing (for example, doubled up with others); persons being discharged from mental health facilities (unless the person was homeless when entering and is considered to be homeless at discharge); or persons who may be at risk of homelessness (for example, living temporarily with family or friends.)

The Point in Time Count is required to be conducted every two years by the local Continuum of Care (CoC) jurisdiction led by the County of Orange Health Care Agency in accordance with the U.S. Department of Housing and Urban Development (HUD) guidelines to provide information on where individuals experiencing homelessness are located in the county. On January 22, 2019, 1,167 volunteers across Orange County counted 6,860 individuals experiencing homelessness; of those, 2,899 were sheltered and 3,961 were unsheltered. The 2021 Point in Time count was deferred to the COVID-19 pandemic and is anticipated to occur in January 2022. The 2019 Point In Time Count individual city results are shown in Table 2-29. Costa Mesa reported a total of 193 individuals experiencing homelessness (187 unsheltered and 6 sheltered); this represents 2.8 percent of the total homeless population for Orange County. This percentage is greater than that of the neighboring cities of Newport Beach and Irvine as both counted under 2 percent.

Santa Ana reported the largest population of people experiencing homelessness as a quarter of the total number for Orange County reside there (23 percent more than Costa Mesa).

Table 2-29: Homeless Count by Jurisdiction – January 22, 2019

Jurisdiction	Unsheltered	Sheltered	Total	% of County
Newport Beach	64	0	64	0.9%
Costa Mesa	**187**	**6**	**193**	**2.8%**
Irvine	127	3	130	1.9%
Santa Ana	830	939	1,769	25.8%
Huntington Beach	289	60	349	5.1%
Orange County	3,961	2,899	6,860	100%

Source: Orange County Point in Time Count, Everyone Counts Report 2019.

The City of Costa Mesa opened an emergency Bridge Shelter at a temporary location in April 2019 with 50 beds, while constructing a permanent shelter location with 72 beds which opened in April 2021. The Bridge Shelter assists persons experiencing homeless with temporary housing along with a variety of programs including:

- Collaborative Case Management
- Housing Related Support Services (including Coordinated Entry System housing assignments, Housing Search Assistance, linking clients to rental assistance programs and other general housing services)
- Legal Services
- Basic Needs (including food, clothing, and housing/emergency services)
- Social Services
- Transportation

The permanent Bridge Shelter publishes bi-weekly reports in which they regularly assist approximately 60 to 110+ persons over a two-week span.

8. Students

The need for student housing is another factor that affects housing demand. Student housing often only produces a temporary housing need based on the duration of the educational institution. The impact upon housing demand is important in areas that surround universities and colleges. Costa Mesa is home to a number of private and public universities and colleges. Located in Costa Mesa are Vanguard University (2,200 students), California Southern University (online), and Orange Coast Community College (24,000 students). Orange Coast Community College is primarily a commuter school serving students local to the south Orange County area. During pre-pandemic conditions when classes were fully in person, OCC had approximately 20,000 students, 39.1% of which were full-time. As OCC had very little on-campus housing, the majority of students commuted into campus. While data is not readily available, it is a fair assumption that the majority of these students live at home with family and do not require separate housing. OCC has recently built on-campus housing which may house up to 800 students.

Typically, students are low-income and may therefore require affordable housing options, especially within easy commuting distance from campuses. To reduce living cost, students may seek shared housing situations to decrease expenses, which may lead to overcrowding. Affordable housing may also influence choices students make after graduating, which may affect the region's economy. College graduates provide a specialized pool of skilled labor that contributes to the region's economy; however, the lack of affordable housing may lead to their departure from the region.

F. Housing Stock Characteristics

Characteristics of the housing stock (growth, type, availability and tenure, age and condition, housing costs, and affordability) may affect the housing needs for the community. This section details the Costa Mesa housing stock characteristics to identify how well the current housing stock meets the needs of its current and future residents.

1. Housing Growth

According to the American Community Survey (ACS), between 2010 and 2018 the Costa Mesa housing stock grew by 0.6 percent, or 1,233 units, as shown in Table 2-30. This is the smallest percent increase for the area. The City of Irvine experienced the largest housing surge of the area during this time with an addition of 25,250 more units (an increase of 30.4 percent more than Costa Mesa). Orange County as a whole saw an increase of 4.6 percent of its total housing stock.

Table 2-30: Housing Unit Growth Trends, 2010-2018

Jurisdiction	2010	2015	2018	Percent Change 2010 to 2015	Percent Change 2015 to 2018
Newport Beach	43,503	43,690	44,801	0.4%	2.5%
Costa Mesa	**42,867**	**43,030**	**43,100**	**0.4%**	**0.2%**

2. Housing Type

Table 2-31 is a breakdown of housing units in the City by type in comparison to Orange County. Costa Mesa is estimated to be predominantly made up of multi-family housing (50.3 percent). The City has an estimated 37.7 percent single-family detached housing and 9.6 percent attached single-family units. This differs from the rest of the region as Orange County reports an estimated 50.7 percent single-family detached units and 34.3 percent multi-family housing. The percentage of mobile homes in Costa Mesa is estimated to be comparable to that of Orange County (2.4 percent and 2.8 percent, respectively). Single-family attached units are less prevalent in Costa Mesa (9.6 percent) than County as a whole (12.2 percent).

Table 2-31: Total Housing Units by Type								
Jurisdiction	Single- Family Detached		Single-Family Attached		Multi-Family		Mobile Homes*	
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Costa Mesa	**16,236**	**37.7%**	**4,119**	**9.6%**	**21,692**	**50.3%**	**1,053**	**2.4%**
Orange County	553,164	50.7%	133,326	12.2%	374,176	34.3%	30,710	2.8%

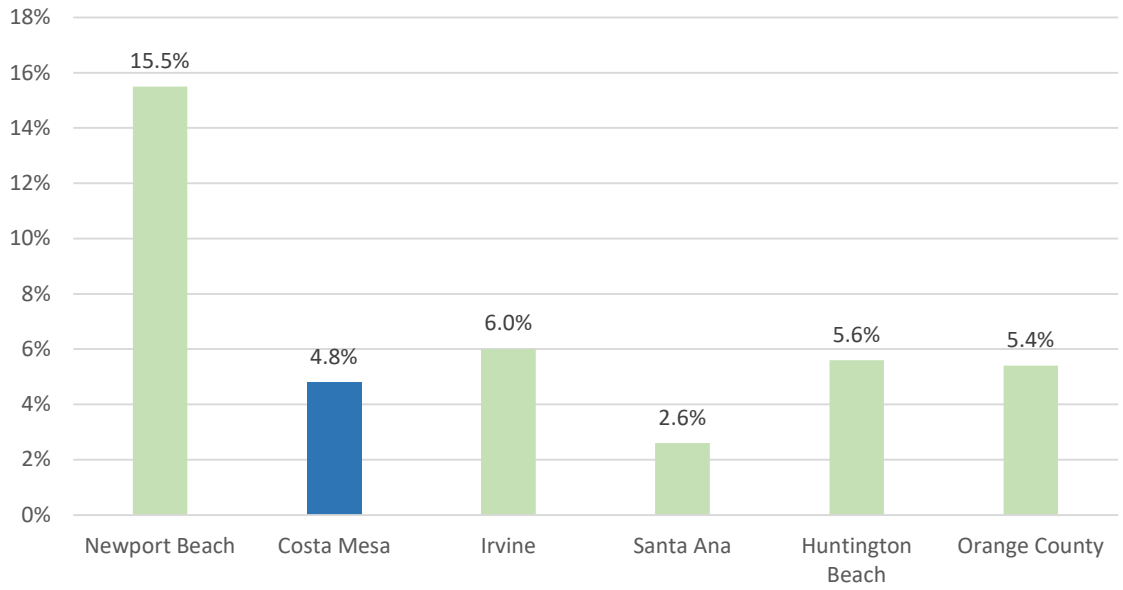
*Includes mobile homes, boats, RVs, vans, etc.
Source: American Community Survey, 5-Year Estimates, 2018.

3. Housing Availability and Tenure

Housing tenure and vacancy rates generally influence the supply and cost of housing. Housing tenure defines if a unit is owner-occupied or renter-occupied, and it relates to the availability of housing product types and length of tenure. The tenure characteristics in a community can indicate aspects of the housing market such as affordability, household stability, and availability of unit types, among others. Tenure distribution may correlate with household income, composition, and age of the householder.

In 2018, owner-occupied housing units accounted for 40.4 percent of the housing stock and 59.6 percent were rental occupied units (Table 2-32). At 88.7 percent, the large majority of single-family units are owner-occupied. Multi-family housing units are conversely predominantly occupied by renters (77.1 percent). Mobile homes in Costa Mesa are estimated to be occupied by mostly owners than renters (4.6 percent and 0.8 percent, respectively).

Table 2-32: Occupied Housing Units by Type and Tenure					
Tenure	Single-Family Detached	Single-Family Attached	Multi-Family	Mobile Homes	Total Occupied Units
Owner Occupied	76.1%	12.6%	6.6%	4.6%	40.4%
Renter Occupied	14.1%	7.9%	77.1%	0.8%	59.6%



Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-33 compares estimated average household sizes and tenure amongst cities surrounding Costa Mesa. Aside from Santa Ana, all of the cities included below have household sizes that are below that of Orange County and fairly similar amongst owner-occupied households. The average household size for Santa Ana is estimated to be nearly double that of the other cities for both renters and owners and is an average of about 1.6 persons per household more than Costa Mesa. Figure 2-7 illustrates vacancy rates by city and shows that Costa Mesa has the second lowest vacancy rate in the area (4.8 percent). Orange County's vacancy rate is 0.6 percent above that of Costa Mesa.

Table 2-33: Average Household Size by Tenure, 2018			
Jurisdiction	Owner Occupied Household Size	Renter Occupied Household Size	Average Household Size
Newport Beach	2.46	2.02	2.27
Costa Mesa	**2.8**	**2.66**	**2.71**
Irvine	2.81	2.61	2.7
Santa Ana	4.28	4.32	4.3
Huntington Beach	2.58	2.62	2.6
Orange County	2.99	3.06	3.02
Source: American Community Survey, 5-Year Estimates, 2018.			

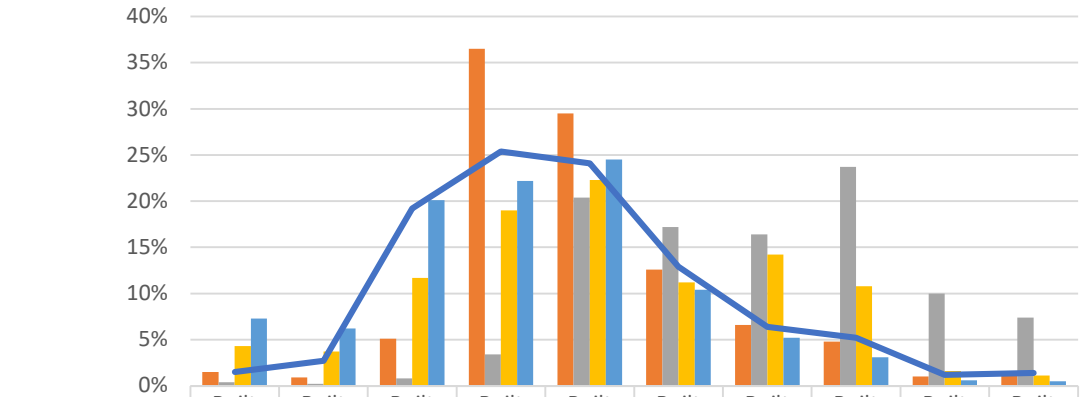
Vacancy rates may reveal the degree of housing choice available. High vacancy rates generally indicate low demand and/or high supply conditions in the housing market. Low vacancy rates typically indicate high demand and/or low supply conditions in the housing market. Too low of a vacancy rate can force prices up making it more difficult for lower and moderate-income households to find housing. Vacancy rates between two to three percent are usually considered healthy for housing that is owned, and rates of five to six percent are usually considered healthy for rental housing. Costa Mesa's vacancy rate indicates a healthy demand for housing within the City and a potential lack of available housing units at all income categories.

Figure 2-7: Vacancy Rates by Jurisdiction, 2018

Source: American Community Survey, 5-Year Estimates, 2018.

Based on 2018 ACS estimates, the most common reason for vacancies in Costa Mesa is due to units being up for rent (37.8 percent), as shown in Table 2-34. Another 566 units (31.5 percent) are vacant in the City because they are for seasonal, recreational, or occasional use. Homes that have been sold and are not yet occupied represent the lowest vacancy type (4.1 percent).

Table 2-34: Vacant Housing Units by Type in Costa Mesa		
Type of Housing	Estimate	Percent
For rent	786	37.8%
Rented, not occupied	191	9.2%
For sale only	115	5.5%
Sold, not occupied	86	4.1%
For seasonal, recreational, or occasional use	656	31.5%
Other vacant	247	11.9%
Total	**2,081**	**100%**
Source: American Community Survey, 5-Year Estimates, 2018.		



4. Housing Age and Condition

Housing age can be an important indicator of housing condition within a community. For example, housing that is over 30 years old may be in need of rehabilitation, such as a new roof, seismic retrofit, foundation, plumbing, etc. Many federal and state programs use housing age as one factor to determine housing rehabilitation needs.

Figure 2-8 shows the City of Costa Mesa's housing stock was mostly built prior to 1990 and is therefore more likely in need of certain renovations. Almost a quarter of the housing stock was built around the time the City was incorporated in 1953. About 2.6 percent of housing stock was built after 2010. In comparison to neighboring cities, the Cities of Costa Mesa, Huntington Beach, and Santa Ana experienced their peak unit growths between 1950 and 1979. Newport Beach experienced a growth similar to Costa Mesa until 1990 when Newport Beach housing unit growth picked up again. Unlike Costa Mesa, the City of Irvine experienced a housing boom in 1970 through 2009, and it continued building units at a greater rate than the other cities past 2014.

Much of Costa Mesa's housing stock is greater than 30 years old. Many of these houses may have experienced some level of housing renovations since initial construction, but in general an aging housing stock may indicate the potential for substandard housing conditions or a housing stock in need of rehabilitation or maintenance. The City tracks code enforcement cases due to substandard housing conditions and has established a quantified target objective in Chapter 4 for housing rehabilitation goals over the next 8 years.

Figure 2-8: Age distribution of Housing Stock

	Built 1939 or earlier	Built 1940 to 1949	Built 1950 to 1959	Built 1960 to 1969	Built 1970 to 1979	Built 1980 to 1989	Built 1990 to 1999	Built 2000 to 2009	Built 2010 to 2013	Built 2014 or later
Huntington Beach	1.5%	0.9%	5.1%	36.5%	29.5%	12.6%	6.6%	4.8%	1.0%	1.4%
Irvine	0.4%	0.2%	0.8%	3.4%	20.4%	17.2%	16.4%	23.7%	10.0%	7.4%
Newport Beach	4.3%	3.7%	11.7%	19.0%	22.3%	11.2%	14.2%	10.8%	1.6%	1.1%
Santa Ana	7.3%	6.2%	20.1%	22.2%	24.5%	10.4%	5.2%	3.1%	0.6%	0.5%
Costa Mesa	1.5%	2.7%	19.2%	25.4%	24.1%	12.9%	6.4%	5.2%	1.2%	1.4%

Source: American Community Survey, 5-Year Estimates, 2018.

Table 2-35 provides estimations on the number of units with substandard living conditions (lacking complete plumbing or kitchen facilities or having no telephone service available). In total, 2.4 percent of Costa Mesa units are considered substandard.

Table 2-35: Costa Mesa Units with Substandard Housing Conditions

Housing Condition	Estimate	Percent of Total Housing Units
Lacking complete plumbing facilities	79	0.2%
Lacking complete kitchen facilities	325	0.8%
No telephone service available	613	1.5%
Total	**1,017**	**2.4%**

Source: American Community Survey, 5-Year Estimates, 2018.

Additionally, proactively surveying the City's housing conditions is a primary component of the City's Code Enforcement efforts. The City's Community Improvement Division (Code Enforcement) employs approximately one-dozen full-time code enforcement officers that regularly survey the City's residential neighborhood housing conditions relating to rehabilitation and replacement. According to the Community Improvement Division Manager, rarely does any of the City's housing stock reach a condition that requires replacement (less than approximately one property per year). However, City staff confirmed, based on the 2021-2022 Annual Action Plan there are approximately 88 units in need of rehabilitation annually. This estimate was compiled based on a combination of code enforcement data (based on a review of total

project cases) and data from the City's Street Outreach Team and Housing and Community Development Team and represents approximately 1.6% of the total dwelling units within the City.

With the exception of relatively new housing communities recently developed in the City, the City's Community Improvement Division indicates that the City's residential areas require varying levels of proactive housing condition monitoring, with generally the older residential areas in the City being more prone to substandard housing conditions. These substandard housing conditions include but are not limited to, illegal and unsightly outdoor storage, common areas littered with trash and debris, vegetation overgrowth, and poor overall residential structure maintenance. According to City records, residential properties located in Shalimar neighborhood, Coolidge Avenue/Fillmore Way neighborhood, Mission Drive/Mendoza Drive neighborhood, and the neighborhood located on Wilson Street between Placentia Avenue and Harbor Boulevard require greater attention. For these and other neighborhoods, the City hosts "Community Clean-up Days" where community members and residents are organized to assist in neighborhood clean-up efforts. These efforts include City staff assistance, large dumpster rentals and donations from community businesses and no-profit community groups to support clean-up and rehabilitation efforts. They are held on a weekend day and publicized several weeks in advance by City newsletters and direct communication to community stakeholders. City-sponsored residential neighborhood clean-up events occur multiple times per year.

Also, in monitoring the City's housing stock in regard to the need for housing rehabilitation or replacement, both the City's Code Enforcement team and the City's Building Inspection team proactively and reactively engage in surveying the City's housing conditions as they perform their regular inspections. Housing and building code enforcement not only helps to ensure the habitability of specific properties, but also helps to keep surrounding homes and neighborhoods safe. For a home that shows clear signs of neglect, for example, the City will reach out to the tenant and owner and connect these individuals to resources such as local and regional grants and/or loans, or community service groups that are available to provide rehabilitation assistance. These proactive inspections of the City's housing stock lead to earlier detection of substandard housing conditions and ultimately improve local neighborhoods overall.

5. Housing Costs and Affordability

Housing costs reflect the supply and demand of housing in a community. This section summarizes the cost and affordability of the Costa Mesa housing stock.

The median home value in Costa Mesa is estimated to be $707,600, as shown in Table 2-36. This is $54,700 above the median home value for Orange County and comparable to the home values in Irvine and Huntington Beach. The City of Santa Ana has the lowest home value at $455,300 and the City of Newport Beach has the greatest median home value at $1,787,300.

Table 2-36: Median Home Value by Jurisdiction	
Jurisdiction	Median Home Value
Newport Beach	$1,787,300
Costa Mesa	**$707,600**
Irvine	$797,100
Santa Ana	$455,300
Huntington Beach	$728,200
Orange County	$652,900
Source: American Community Survey, 5-Year Estimates, 2018.	

Table 2-37 outlines the average monthly price of rent by number of bedrooms in Costa Mesa and how it has changed between 2017 and 2020. This data is provided by the Zillow Rent Index Report for Costa Mesa and shows that all units experienced increases in rates in the last three years; for example, one-bedroom rentals rose by 5.1 percent. The price per square foot saw a much greater increase for the three types of units, with 17.9 percent being the greatest increase for 3- or more bedroom units. This may indicate a higher demand and a need to plan for housing for large families within Costa Mesa.

Table 2-37: Average Monthly Rental Rates, 2017-2020					
Unit Type	January 2017	January 2018	January 2019	January 2020	% Change 2017-2020
1 Bedroom	$2,055	$2,077	$2,091	$2,159	5.1%
2 bedrooms	$2,553	$2,582	$2,579	$2,649	3.8%
3 Bedrooms	$3,027	$3,044	$3,097	$3,160	4.4%
Price per Square Foot					
Unit Type	January 2017	January 2018	January 2019	January 2020	% Change 2017-2020
1 Bedroom	$2.48	$2.57	$2.97	$2.83	14.1%
2 bedrooms	$2.20	$2.25	$2.32	$2.36	7.3%
3+ Bedrooms	$1.95	$2.15	$2.25	$2.30	17.9%
Source: Zillow Rent Index Report, January 2017-2020, accessed August 17, 2020.					

Housing affordability can be inferred by comparing the cost of renting or owning a home in the City with the maximum affordable housing costs for households at different income levels. Taken together, this information can generally show who can afford what size and type of housing and indicate the type of households most likely to experience overcrowding and overpayment.

The Federal Department of Housing and Urban Development (HUD) conducts annual household income surveys nationwide to determine a household's eligibility for federal housing assistance. Based on this survey, the California Department of Housing and Community Development (HCD) developed income limits, based on the Area Median Family Income (AMFI), which can be used to determine the maximum price that could be affordable to households in the upper range of their respective income category. Households in the lower end of each category can afford less by comparison than those at the upper end. The maximum affordable home and rental prices for residents in Orange County are shown in Table 2-38 and Table 2-39.

The data shows the maximum amount that a household can pay for housing each month without incurring a cost burden (overpayment). This amount can be compared to current housing asking prices (Table 2-36) and market rental rates (Table 2-37) to determine what types of housing opportunities a household can afford.

Extremely Low-Income Households

Extremely low-income households earn less than 30 percent of the County AMFI – up to $26,950 for a one-person household and up to $41,550 for a five-person household in 2020. Extremely low-income households cannot afford market-rate rental or ownership housing in Costa Mesa without assuming a substantial cost burden. An extremely low-income household at the maximum income limit can afford to pay approximately $1,039 in monthly rent, depending on household size.

Very Low-Income Households

Very low-income households earn between 31 percent and 50 percent of the County AMFI – up to $44,850 for a one-person household and up to $69,200 for a five-person household in 2020. A very low-income household cannot afford market-rate rental or ownership housing in Costa Mesa without assuming a substantial cost burden. A very low-income household at the maximum income limit can afford to pay approximately $1,121 to $1,730 in monthly rent, depending on household size. Given the high cost of housing in Costa Mesa, persons or households of very low-income could not afford to rent or purchase a home in the City.

Low-Income Households

Low-income households earn between 51 percent and 80 percent of the County's AMFI - up to $71,750 for a one-person household and up to $110,650 for a five-person household in 2020. The affordable home price for a low-income household at the maximum income limit ranges from $308,500 to $454,000. Based on the asking prices of homes for sale in 2020 (Table 2-36), ownership housing would not be affordable to low-income households. A one-person low-income household could afford to pay up to $1,794 in rent per month and a five-person low-income household could afford to pay as much as $2,766. Low-income households in Costa Mesa would not be able to afford to rent apartment units.

Moderate Income Households

Persons and households of moderate income earn between 81 percent and 120 percent of the County's AMFI – up to $133,500, depending on household size in 2020. The maximum affordable home price for a moderate-income household is $377,000 for a one-person household and $558,600 for a five-person family. Moderate income households in Costa Mesa would not be able to purchase a home in the City. In comparison to neighboring cities, at this affordable range, moderate income households would only be able to purchase a home in Santa Ana. The maximum affordable rent payment for moderate income households is between $2,163 and $3,338 per month. Appropriately sized market-rate rental housing is generally affordable to households in this income group.

Table 2-37: Affordable Housing Costs in Orange County, 2020						
Annual Income		Mortgage	Utilities^1	Tax and Insurance	Total Affordable Monthly Housing Cost	Affordable Purchase Price
Extremely Low-income (30% of AMFI)						
1-Person	$26,950	$455	$118	$101	$674	$99,990
2-Person	$30,800	$504	$151	$116	$770	$110,500
3-Person	$34,650	$539	$197	$130	$866	$118,000

Utilities based on Orange County Utility Allowance.

1. Utilities includes basic electric, water, sewer/trash, refrigerator, and stove.

This analysis shows that the moderate- and lower-income households in Costa Mesa generally cannot afford to own a home in Costa Mesa based on for sale housing costs. Lower income households generally cannot afford to rent or own in Costa Mesa based on for sale housing costs and rental prices. Long term, this trend may result in increased instances of overcrowding, an increased number of households with a high housing cost burden, and residents moving out of Costa Mesa for ownership opportunities.

G. Community Profile Summary

The Community Profile provides an analysis of the Costa Mesa population and housing stock for policy considerations within this Housing Element. The Costa Mesa community's housing needs are directly correlated to the demographic composition of the population and the conditions of existing housing within the City. The data analyzed in this Community Profile sets the baseline for the Housing Element goals, policies, and programs which are uniquely adapted to fit the needs of Costa Mesa.

The City will need to consider the following findings, but not limited to, based on the data presented in this Community Profile:

- The Costa Mesa population is showing aging trends – housing goals should consider the needs of seniors who may have less flexible income, need accessibility accommodations, or may seek assisted living options. **The City has established Housing Program 2D to address this finding.**
- Over a quarter of the Costa Mesa population identifies as Hispanic or Latino – housing needs should account for possible cultural needs such as larger or multigenerational housing units. Additionally, housing information should be made available in Spanish to assist in the location of appropriate housing within the community. **The City has established Housing Programs 2E and 4A to address this finding.**
- Approximately 47 percent of the Costa Mesa population earn a lower income, indicating that production of and access to affordable housing including affordable rental options and entry level home ownership facilitation should be considered. **The City has established Housing Programs 2B, 4A, 4B, and 4C to address this finding.**
- Approximately 48.8 percent of renters and 31.8 percent of homeowners are estimated to spend more than 30 percent of their income on housing, indicating a high housing cost burden overall with a higher proportion of renters compared to owners experiencing overpayment. **The City has established Housing Programs 2B, 4A, 4B, and 4C to address this finding.**
- Based on for sale and rental housing prices, a moderate-income household cannot afford to own a home in Costa Mesa, while lower income households cannot afford to own or rent in Costa Mesa without experiencing overpayment. **The City has established Housing Programs 2B, 4A, 4B, and 4C to address this finding.**
- The majority of housing units in Costa Mesa were built over 30 years ago – households in older homes may benefit from assistance in renovating their homes and ensuring safe living environments with access to all utilities. **The City has established Housing Programs 1A and 1B to address this finding.**
- Costa Mesa has a relatively low vacancy rate, indicating high demand for housing and low availability of housing units within the City. **The City has established Housing Programs 2B and 3A to address this finding.**
- 46.5 percent of Costa Mesa households have at least one of the four identified housing problems, which include:
    - Units with physical defects (lacking complete kitchen or bathroom);
    - Overcrowded conditions (housing units with more than one person per room – excluding bathrooms and kitchens);

- Housing cost burdens, including utilities, exceeding 30 percent of gross income; and
- Severe housing cost burdens, including utilities, exceeding 50 percent of gross income.

The City has established Housing Programs 1A, 1B, and 4A to address this finding.

The Housing Element's **Chapter 4: Housing Plan** provides goals, policies, and programs for the City of Costa Mesa based on the findings of this analysis. Policies established in the Housing Plan implement the goals and programs of the Housing Element and are reviewed on yearly-basis to identify progress and success.

Chapter 3

Housing Constraints, Resources, and Affirmatively Furthering Fair Housing

Housing Constraints

A variety of factors could affect the number, type, and affordability of housing and housing development in a community. Governmental housing constraints are often specific to the requirements and regulations local governments enforce. Governmental constraints in Costa Mesa may include land use controls, residential development standards, development and permitting fees, and permitting processes, amongst other constraints. Nongovernmental and market constraints are directly related to the conditions of the local and regional construction and the development market. Nongovernmental constraints in Costa Mesa may include the cost of land, construction costs, including materials and labor, availability of financing, and the local economic conditions. These factors could incentivize or create barriers for the maintenance and addition of housing in Costa Mesa, and predominantly affordable housing. The focus of this section is recognizing the existing constraints. The following sections will analyze the extent of each constraint on housing development.

A. Nongovernmental Constraints

Nongovernmental constraints are those associate with external market costs and rely predominantly on the economy and cost of land and construction. The availability and cost of land, labor costs, as well as financing, may pose barriers for housing developers and can often deter the development of housing, specifically affordable housing. The following sections highlights the primary market factors that affect the production of housing in Costa Mesa.

1. Land Costs and Construction Costs

Construction costs vary widely according to the type of development, with multi-family housing generally less expensive to construct than single-family homes due to square footage. However, there is wide variation within each construction type, depending on the size of the unit and the number and quality of amenities provided. An indicator of construction costs is Building Valuation Data compiled by the International Code Council (ICC). The ICC updates the estimated cost of construction at six-month intervals and provides estimates for the average cost of labor and materials for typical Type V-A wood-frame housing. Estimates are based on "good-quality" construction, providing for materials and fixtures well above the minimum required by state and local building codes. In August 2020, the ICC estimated that the average per square-foot cost for good-quality housing was approximately $118.57 for multi-family housing, $131.24 for single-family homes, and $148.44 for residential care/assisted living facilities. Construction costs for custom homes and units with extra amenities, run even higher. Construction costs are also dependent upon materials used and building height, as well as regulations set by the City's adopted Building Code. For example, according to the ICC, an accessory dwelling unit (ADU) or converting a garage using a Type V-B wood framed unit would costs about $123.68 per square foot. Although construction costs are a significant portion of the overall development cost, they are typically consistent throughout the region and, especially when considering land costs, are not considered a major constraint to housing production in Costa Mesa.

Land costs can also pose a significant constraint to the development of affordable and middle-income housing and represents a significant cost component in residential development. Land costs may vary depending on whether the site is vacant or has an existing use that must be removed. Similarly, site constraints such as environmental issues (e.g., steep slopes, soil stability, seismic hazards, flooding, and contamination) can also be factored into the cost of land. A September 2020 web search for vacant lots for sale in the City of Costa Mesa returned three lots for sale ranging in size from 0.23 acres at $749,000 to 1.03 acres at $2,000,000. Based on current prices of for sale lots, the vacant lots cost an estimated average price per square foot of $68, or about 2.9 million dollars per acre.

Costa Mesa has the lowest cost of land in comparison to the neighboring cities of Santa Ana, Huntington Beach, and Irvine, based on an October 2020 Zillow search for vacant lots. The cost of land in these cities range from $73 per square to $304 per square foot. However, the cost of land in Costa Mesa is still very expensive and though it is consistent with neighboring jurisdictions and the region, it may create a constraint to the development of housing, specifically affordable housing. The City cannot control the cost of land in Costa Mesa or the region, however Chapter 4 of this Housing Element outlines programs and policies to work with developers and interested parties to increase affordable housing options in the City.

2. Available Financing

The availability of financing in a community depends on a number of factors, including the type of lending institutions active in a community, lending practices, rates and fees charged, laws and regulations governing financial institutions, and equal access to such loans. Additionally, availability of financing affects a person's ability to purchase or improve a home. Under the Home Mortgage Disclosure Act (HMDA), lending institutions are required to disclose information on the disposition of loan applications and the income, gender, and race of loan applicants. The primary concern in a review of lending activity is to determine whether home financing is available to all residents of a community, regardless of income, sex, race, or ethnicity. The data presented in this section include the disposition of loan applications submitted to financial institutions for home purchase, home improvement, and refinancing in the Anaheim-Santa Ana-Irvine MSA.

Table 3-1 below displays the disposition of loan applications for the Anaheim-Santa Ana-Irvine MSA, per the 2016 Home Mortgage Discloser Act report. According to the data, applicants in the 120% MSA/MD median income or more had the highest rates of loans approved. Of that income category, applicants who reported White had the highest percentage of approval and the number of applications. Applicants in the less than 50% of the MSA/MD median income categories were showed higher percentages of denied loans than loans originated. According to the data, applicants who reported white were, on average, more likely to be approved for a loan than another race or ethnicity.

Given the relatively high rates of approval for home purchase, improvement, and refinance loans, home financing is generally available and not considered to be a significant constraint to the provision and maintenance of housing in Costa Mesa.

Table 3-1: Disposition of Loan Applications by Race/Ethnicity– Anaheim-Santa Ana-Irvine MSA				
Applications by Race/Ethnicity	Percent Approved	Percent Denied	Percent Other	Total (Count)
LESS THAN 50% OF MSA/MD MEDIAN				
American Indian and Alaska Native	26.2%	52.3%	23.1%	65

3. Economic Constraints

Market forces on the economy and the trickle-down effects on the construction industry can act as a barrier to housing construction and especially to affordable housing construction. It is estimated that housing price and development costs will continue to increase in the City and the region. Moving into 2020, the economy was growing, California was seeing a 1.6 percent growth in jobs from 2019 and experiencing all-time lows for unemployment rates. COVID-19 had stalled much of the economy in early 2020, however, as the California economy regains momentum, housing stock and prices in the Costa Mesa community remain stable. A housing market analysis by Redfin reports the number of homes sold in August 2020 experienced a 16.1% growth in year-over-year trends and over doubled since the low in May 2020. The same report shows that the median sale price of homes in Costa Mesa is the largest it has been in five years, except for a peak in February 2021; the median number of days on the market was 41 in August 2020 in contrast to 86.5 in at the start of the year.

A 2020 California Association of Realtors (CAR) report found that homes on the market in Orange County experienced a 10.2 percent year to year increase and cost an average of $915,000 in September 2020; over $250,000 higher than the Southern California median home price in the same month ($656,750). According to the CAR First Time Buyer Housing Affordability Index, the median value of a home in Orange County is $730,150 with monthly payments (including taxes and insurance) of $3,690, requiring an average qualifying income of $110,700.

Costa Mesa's home value index ($881,064), which includes single-family residences and condos, has been on a steady increase since Spring 2012, according to Zillow data from September 2020. According to Zillow, this value is seasonally adjusted to remove outliers and only includes the middle price-tier of homes. Costa Mesa home values have gone up 4.9 percent over the past year and Zillow predicts they will rise 4.8 percent within the next year. Orange County by comparison has a median home value index of $775,797, which is $105,267 less than Costa Mesa. Due to the high costs and increasing values, the cost of land and home prices in Costa Mesa may be considered a constraint to the development of and access to housing, particularly affordable housing.

4. Applicant Requests to Develop Below the Maximum Density

The City does not typically receive request to develop below the maximum density permitted for residential projects. Based on review of past projects and discussions with the development community, the existing development standards have not proved to be a constraint to meeting the maximum density. Programs 3B and 3C within the Housing Plan call for revisions to the development standards associated with the North Costa Mesa Specific Plan and the City's Urban Plans and Overlays, including the maximum density permitted. These densities are higher than what is currently permitted within Costa Mesa (with the exception of some areas in the North Costa Mesa Specific Plan where densities have exceeded 90 du/ac for specific projects). Until those zoning changes are made to permit the higher densities identified in the housing element, the City will not be able to evaluate potential requests to develop below the maximum density. The City has committed to working with the community, including the local development community, to create development standards which promote development consistent with the identified densities.

B. Governmental Constraints

In addition to market constraints, local policies and regulations also affect the price and availability of housing and the provision of affordable housing. For example, State and Federal regulations affect the availability of land for housing and the cost of housing production, making it difficult to meet the demand for affordable housing and limiting supply in a region. Regulations related to environmental protection, building codes, and other related topics have significant, often adverse, impacts on housing cost and availability.

While the City of Costa Mesa has no control over State and Federal Laws that affect housing, local laws including land use controls, site improvement requirements, fees and exactions, permit processing procedures, and other factors can constrain the maintenance, development, and improvement of housing as well as, create barriers to housing development.

1. Land Use Controls

Cities in California are required by Law to prepare a comprehensive, long term General Plan to guide future development. The Land Use Element of the General Plan establishes permitted land uses and development density throughout the City of Costa Mesa. These land uses provide for a wide variety of housing types throughout the City, while also ensuring compatibility between neighboring uses. The following lists the land uses that permit residential developments and the maximum allowable density:

- Low-Density Residential: 8 dwelling units per acre
- Medium-Density Residential: 12 dwelling units per acre
- High-Density Residential: 20 dwelling units per acre
- Commercial-Residential: 12 to 17.4 dwelling units per acre
- Urban Center Commercial: 20 dwelling units per acre / 80 dwelling units per acre
- Multi-Use Center: 6 dwelling units per acre / 40 dwelling units per acre

Overlay Districts

Overlay districts are created in order to incentivize particular development types in an area and/or to implement a Master Plan's strategies and goals. Overlay districts are applied to the Zoning Map and provide a development option in addition to the underlying zoning regulations as they often require stricter and/or more specific standards. An overlay district could also be created to administer the goals of a Master Plan. There are four overlay districts in Costa Mesa, which are detailed below.

Residential Incentive Overlay

The Residential Incentive Overlay District is intended to create opportunities for residential development at strategic locations along Harbor Boulevard and Newport Boulevard. The designation allows for development of new higher-density residential uses in areas where limited residential with lower densities are currently allowed. Small-lot single-family subdivisions are also appropriate in the designated areas. The Residential Incentive Overlay also expands development opportunities on residential and commercial

properties which are not currently developed to their full potential or supporting outdated buildings and underperforming uses.

The following are required for developments in the Residential Incentive Overlay District:

Residential Incentive Development Plan Screening Application – To provide initial feedback to developers, all residential and development projects proposed in this district must submit a screening application for review and approval by the City Council.

Master Plan – All developments proposed in this district require approval of a master plan by the Planning Commission. The master plan must be consistent with the General Plan and meet the intent and purpose of the overlay district. The project must include adequate resident-serving amenities in the common open space areas and private open space area; this may include patios, balconies, roof terraces, walkways, and landscaped areas. The project must be consistent with the compatibility standards for residential development in that it provides adequate protection for residents from excessive noise, odors, vibration, light and glare, and toxic emanations. The residences must have adequate separation and screening from adjacent commercial uses through site planning considerations, structural features, landscaping, and perimeter walls.

Development Standards – This overlay designation allows for developments that meet the following:

- **Minimum Lot Area:** 0.5 acres
- **Maximum Height**: 4 stories (not including permitted roof top terraces)
- **Maximum Density**: 40 units per acre
- **Minimum Open Space**: 40% of total site area
- **Common Open Space**: 50% of required open space. Recreational facilities for children are required for residential projects with 12 or more units.
- **Front Setback**: 20 feet
- **Side Setback**: 20 feet (30 feet minimum for 4-story developments abutting R2-MD zones)
- **Rear Setback:** 20 feet (30 feet minimum for 4-story developments abutting R2-MD zones)

SoBECA Mixed-Use Overlay

The SoBECA Overlay District establishes provisions for mixed-use development, including live/work development, in the 39-acre SoBECA plan area (located west of the Costa Mesa Freeway, east of the Corona Del Mar Freeway, and south of the San Diego Freeway). This overlay district allows for high-density residential developments with a maximum unit cap and is intended to allow a mix of housing, eclectic retail/services, creative studios, and entertainment/restaurant uses that attract local residents and visitors.

Development Standards – This overlay designation allows for developments that meet the following:

- **Maximum Density:** 40 units per acre
- **Maximum Residential Cap:** 450 units within the SoBECA Urban Plan

Harbor Mixed-Use Overlay

The Harbor Mixed-Use overlay district applies to select areas along Harbor Boulevard and between Wilson Street and 19th Street. The district is intended to introduce a diverse mix of uses to create a more integrated, walkable, and complementary balance of creative commercial and office spaces, neighborhood-serving retail and commercial services, and residential uses along the southern portion of Harbor Boulevard that intersects 19th Street. Since this overlay applies to a commercial corridor and is considered an extension of the 19 West Urban Plan (see below), Live/Work developments are not permitted in this overlay district. The provisions of the 19 West Urban Plan applies to the overlay district.

Development Standards – This overlay designation allows for developments that meet the following:

- **Maximum Density:** 20 units per acre
- **Maximum FAR:** 1.25 for commercial and residential mixed uses
  Maximum Building Height: 4 stories

Westside Urban Plans

In 2005, the City of Costa Mesa approved three strategies based on the Westside Revitalization Oversight Committee's (WROC) Final Report and Implementation Plan. Together these strategies make up the Westside Urban Plans and include the following three urban plans and their individual goals:

19 West Urban Plan – Improve the Urban Plan area by providing visual enhancement and facilitating development of mixed-use urban villages along the specified areas of West 17th Street, West 19th Street, and Superior Avenue.

Mesa West Bluffs Urban Plan – Improve the Urban Plan area by providing visual enhancement and encouraging the development of live/work units or residential development within the plan area.

Mesa West Residential Ownership Urban Plan – Encourage the development of new owner-occupied condominiums and clustered homes by allowing a higher density than currently zoned.

These plans aim to attract investments and improvements to the west side of Costa Mesa and avoids strict architectural guidelines to welcome flexible projects. These three plans provide a framework for major private market reinvestment and improvements for the Westside.

2. State Density Bonus Law

Density bonuses are another way to increase the number of dwelling units allowed in a residentially zoned area. The City of Costa Mesa does not have its own Density Bonus Ordinance but defers to the Government Code Section 65915. However, the City's Zoning Code identifies the purpose of a density bonus as providing incentives for the production of affordable housing, senior housing, and childcare facilities in compliance with State Government section 65915.

The City of Costa Mesa must grant one density bonus to housing developments which contain at least one of the following (excluding any units permitted by the density bonus awarded):

- 10 percent of the total units of a housing development for lower income households;
- 5 percent of the total units of a housing development for very low-income households;
- A senior citizen housing development or a mobile home park that limits residents based on age requirements for housing for older persons; or
- 10 percent of the total dwelling units in a common interest development for persons and families of moderate income, provide that all units the development are offered to the public for purchase;

In addition, a housing development which is awarded a density bonus must maintain an affordable cost for very low- and low-income rental units for a minimum of 55 years. Additional years may be required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program.

The following provides the density bonus to be calculated for very low-income, low-income, and moderate-income households:

Table 3-2: Density Bonus for Very Low-Income Households	
Percent Very Low-Income Units	Percent Density Bonus
5	20
6	22.5

38	33
39	34
40	35

In addition, the Government Code states that when an applicant for a tentative subdivision map, parcel map, or other residential development approval donates land to a city, county, or city and county in accordance with these subdivisions, the applicant shall be entitled to a 15 percent increase above the otherwise maximum allowable residential density for the entire development, as shown in Table 3-5. This increase may be added to the density bonuses listed above but may not exceed 35 percent.

30	35

Concessions and Incentives

According to the State Government Code section 65915, an applicant for a density bonus may submit a proposal for a specific concession or incentive; a waiver or reduction of development standards may not affect the number of incentives or concessions to which the applicant is entitled. The following concessions and incentives must be provided to eligible applicants:

- One incentive or concession for projects that include 10 percent of the total units for lower income households, at least 5 percent for very low-income households, or at least 10 percent for persons and families of moderate income in a common interest development.
- Two incentives or concessions for projects that include at least 20 percent of the total units for lower income households, at least 10 percent for very low-income households, or at least 20 percent for persons and families of moderate income in a common interest development.
- Three incentives or concessions for projects that include at least 30 percent of the total units for lower income households, at least 15 percent for very low-income households, or at least 30 percent for persons and families with moderate income in a common interest development.

Compliance with State Law

Until 2021, under Government Code Section 65915, known as the Density Bonus Law, the maximum bonus was 35%. California state law AB 2345 states that all jurisdictions in California are required to process

projects proposing up to 50% additional density, as long as those projects provide the additional Below Market Rate units (units affordable to low and very low-income households) in the original proposed project, unless the locality already allows a bonus above 35%. The City's Density Bonus program allows a maximum of 35% density increase; however, AB 2345 requires an allowance of up to 50% density bonus when the base BMR is proposed. The City has included a program in Chapter 4: Housing Plan to update the City's Development Code in compliance with state legislation.

3. Residential Development Standards

The City of Costa Mesa established four residential districts to provide a range of housing types. These standards and regulations are intended to create the highest quality residential development, minimize land use conflicts, encourage the maintenance of residential neighborhoods, and implement the goals of the City's General Plan. In addition to residential districts, Costa Mesa also includes three types of mixed-use designations to bring together residential and commercial developments.

- Single-Family Residential District (R1) – Single-Family Residential is intended to promote the development of single-family detached units on lots measuring at least 6,000 square feet. The maximum density is 7.26 dwelling units per gross acre.
- Multiple-Family Residential District, Medium Density (R2-MD) – Medium Density Multiple-Family Residential is intended to promote the development of multi-family properties on lots measuring a minimum of 12,000 square feet. The maximum density is 3,630 square feet per dwelling unit / 12 dwelling units per gross acre.
- Multiple-Family Residential District, High Density (R2-HD) – High Density Multiple-Family Residential is intended to promote the development of multi-family properties with a minimum of 12,000 square feet. The maximum density is 3,000 square feet per dwelling unit / 14.25 dwelling units per gross acre.
- Multiple-Family Residential District (R3) – Multiple-Family Residential is intended to promote the development of multi — family properties with a minimum of 12,000 square feet. The maximum density is 2,178 square feet per dwelling unit / 20 dwelling units per gross acre.
- Town Center District (TC) – Town Center is intended to allow intensely developed mixed commercial and residential uses within a limited geographical area located between Sunflower Avenue, I-405, Bristol Street, and Avenue of the Arts. Developments can range from one- to two-story office and retail buildings to mid- and high-rise buildings, including residential.
- Planned Development Commercial (PDC) – Planned Development Commercial is intended for retail shops, offices, and service establishments, including but not limited to, hotels, restaurants, theaters, museums, financial institutions, and health clubs. These uses are intended to serve adjacent residential area and the entire community and region. Complementary residential uses may also be included in the planned development.
- Institutional and Recreational Multi-Use District – Institutional and Recreational Multi-Use is only applicable to the Fairview Development Center and is intended to allow the integration of a variety of land uses and intensities at a low to moderate density and intensity.

As mentioned above, the City of Costa Mesa's Zoning Code establishes standards which regulate development throughout the City. The development standards include minimum requirements for lot size, width, building setbacks, and open space. **Table 3-6** provides the development standards applicable to each zoning district in Costa Mesa that permit residential development.

Table 3-6: Development Standards in Costa Mesa - Dimensions

Zone	Dimensions		Min. Yard Setbacks (ft)			Construction Standards		
	Min. Lot Size (square feet)	Min. Lot Width (feet)	Front (feet)	Side (feet)	Rear (feet)	Max. Height*	Min. Open Space (square feet)	Max. Density
Residential Districts								
R1	6,000 sq.ft.	Interior Lot: 50 ft. Corner Lot: 60 ft.	20 ft.	5 ft. (3)	2-story: 20 ft. 1-story: 10 ft.	27 feet	40%	1 DU (1) per 6,000 sq.ft.
R2-MD	12,000 sq.ft.	100 ft.	20 ft.	5 ft. (3)	2-story: 20 ft. 1-story: 10 ft.	27 feet	40%	1 DU per 3,630 sq.ft.(2)
R2-HD	12,000 sq.ft.	100 ft.	20 ft.	5 ft. (3)	2-story: 20 ft. 1-story: 10 ft.	27 feet	40%	1 DU per 3,000 sq.ft.
R3	12,000 sq.ft.	100 ft.	20 ft.	5 ft. (3)	2-story: 20 ft. 1-story: 10 ft.	27 feet	40%	1 DU per 2,178 sq.ft.
Planned Development Standards								
PDR-LD	5,500 sq.ft.	40 ft.	5 ft. (7)	0-10ft. (8)	5 ft.	27 ft.	45% (6)	8 DUs per acre
PDR-MD	5,500 sq.ft.	-	5 ft.	0-10ft. (8)	5 ft.	27 ft.	45%	12 DUs per acre
PDR-HD	3,000 sq.ft.	-	5 ft.	0-10ft. (8)	5 ft.	27 ft.	42%	20 DUs per acre (4)
PDR-NCM	3,000 sq.ft.	-	-	-	-	-	42%	35 DUs per acre
PDC	N/A	-	-	-	-	-	-	20 DUs per acre (5)
PDI	N/A	-	-	-	-	-	-	N/A

Note:
(1): Dwelling Unit
(2): 1 unit per DU for legal lots existing as of March 16, 1992, that are less than 7,260 sq.ft. in area but not less than 6,000 sq.ft. in area.
(3) Accessory structures that do not exceed 6.5 feet in height in the R1 zone or 15 feet in height in other residential zones may have a zero-side setback. Property line abutting a public street: 10 feet. Property line abutting an alley: 5 feet.
(4): See North Costa Mesa Specific Plan for exceptions. The maximum density for 125 East Baker Street is 58 dwelling units per acre (C0-13-02). The maximum density for 2277 Harbor Boulevard is 54 dwelling units per acre (C0-14-02).
(5): The maximum density for 1901 Newport Boulevard is 40 dwelling units per acre. See North Costa Mesa Specific Plan for exceptions. No residential development is permitted within the 23.4-acre project site generally addressed as 1375 Sunflower Ave. and 3370 Harbor Blvd.
(6): See section 13-60 required open space criteria for planned development residential.
(7): For individual DUs.
(8): feet on one side; 10 feet combination of both sides.
Source: City of Costa Mesa Zoning code

Yard Requirements

Yards provide light and air, pedestrian and vehicular circulation, emergency access, and general aesthetic improvements. The Costa Mesa Zoning Code establishes setback requirements in order to maintain yard area. Minimum setback requirements are consistent in residential districts, 5 feet, but they differ depending on type development in mixed-use districts. While it is possible that setback requirements may pose a constraint on reaching maximum permitted density in some cases, there is enough flexibility in the current ordinances that setback requirements do not constitute a significant constraint on residential development.

Site Coverage and FAR

The City of Costa Mesa establishes site coverage requirements in order to maintain bulk, mass, and intensity of use. Site coverage is not used towards planning residential districts in Costa Mesa as open space and setback requirements ensure structures are located within an area of a lot to avoid massing and excessive density. Site coverage is considered in mixed-use developments when combined with commercial uses.

Floor Area Ratio (FAR) refers to the gross floor area allowed on a site divided by the total gross area of the site. FAR requirements limit the usable floor area to limit the bulk of a building in comparison to the land, other buildings, and public facilities in the area.

Open Space

Open space is used in conjunction with site coverage to control intensity of use and provide for an area that is intended to add light and air. Open space may include, but is not limited to, lawns, decorative planting, walkways, active and passive recreational area, playgrounds, fountains, swimming pools, and wooded areas. Also included are unenclosed patios, water courses, and surfaces covered by no more than 5 feet in depth by projections which are at least 8 feet above ground. Driveways, parking lots, surfaces designed for vehicular access, upper floor decks, balconies, and areas under projections which are less than 8 feet above ground are not considered open space.

Maximum Building Heights

A structure's height is defined by the Zoning Code as the distance from the grade to the highest point on the roof, including roof-top mechanical equipment and screening. A standard 27 feet maximum height is established for two-story residential developments in Costa Mesa in order to maintain compatibility with existing and proposed developments, however a planned development is permitted to be developed up to four stories. The City's General Plan and Zoning Code permit up to four stories south of the 405 Freeway through planned development and in many of the City's urban plan and overlay areas where higher densities are allowed, as well as additional height north of the 405 Freeway in the North Costa Mesa Specific Plan area. Per the City's development standards shown in Table 3-6, a 2-story 14,400 square-foot multi-family development on a 12,000 square-foot lot could develop up to 14 potential 1,000 square-foot units, all while meeting the City's setback, open space, and height requirements. The City's 27-foot height limit for all residential developments does not pose a constraint to meeting the City's established densities and is not considered a constraint to the development of housing.

Parking Standards

The City of Costa Mesa mandates parking requirements be applied to all developments in the City. Table 3-7 provides the required parking for all housing types. The Zoning Code further identifies the number of parking spaces that must be covered and those that can remain uncovered. These requirements ensure that there is adequate parking provided for residents and for guests in both single-family and multi-family residences.

Table 3-7: Parking Requirements for Residential Uses		
Unit Type		Number of Spaces Required
Single-Family Detached with 4 Bedrooms or Less	Without garage access from alley	4
	With garage access from alley	3
Single-Family Detached with 5 Bedrooms of More	Without garage access from alley	5
	With garage access from alley	4
Multi-Family Residential	Bachelor/Studio	2
	1 Bedroom	2.5
	2 Bedrooms	3
	3 Bedrooms or more	4
Source: City of Costa Mesa Zoning Code		

The cost associated with garage parking construction can be viewed as a constraint to affordable housing development, especially for multi-family housing. However, Costa Mesa's parking regulations differ depending on the number of bedrooms proposed per unit. Affordable housing projects that qualify for a density bonus may also request application for additional incentives which can be provided in the form of reduction of parking requirements. While off-street parking requirements can affect planned residential density, particularly for small lots and in-fill areas, this potential constraint is mitigated by the flexible standards shown above.

Furthermore, in comparison to neighboring jurisdictions (Table 3-8), the City of Costa Mesa has similar parking requirements. Where Costa Mesa differs in single-family parking requirements is in its count of open/driveway parking spaces. The City of Costa Mesa specifically requires 2 spaces in a garage and 2 spaces on a driveway for a single-family detached residence with 4 bedrooms or less; the other cities only provide requirements for the number of vehicles that must be included in a garage. In addition, the other cities require guest parking as a percentage of the total number of units or required spaces, while Costa Mesa requires a set number per unit.

Table 3-8: Parking Standards of Neighboring Communities	
Unit Type	Number of Spaces Required
City of Newport Beach	
Accessory Dwelling Unit	1 parking space, with exceptions [(1)]
Junior Accessory Dwelling Unit	No additional parking required
Single-Unit Dwellings – Attached	2 per unit in a garage
Single-Unit Dwellings – Detached and less than 4,000 sq. ft. of floor area	2 per unit in a garage

Table 3-8: Parking Standards of Neighboring Communities		
Unit Type		Number of Spaces Required
City of Newport Beach		
Single-Unit Dwellings – Detached and 4,000 sq. ft. of floor area		3 per unit in a garage
Single-Unit Dwellings – Balboa Island		2 per unit in a garage
Multi-Unit Dwellings – 3 units		2 per unit covered, plus guest parking 1-2 units, no guest parking required 3 units, 1 guest parking space
Multi-Unit Dwellings – 4 units or more		2 per unit covered, plus 0.5 space per unit for guest parking
Two-Unit Dwellings		2 per unit; 1 in a garage and 1 covered or in a garage
Live/Work Units		2 per unit in a garage, plus 2 for guest/customer parking
Senior Housing – Market Rate		1.2 per unit
Senior Housing – Affordable		1 per unit
City of Irvine		
Single Family	1-3 bedrooms	2 spaces
	4+ bedrooms	3 spaces + visitor parking (2)
Attached Ownership	Studio	1 space + visitor parking (2)
	1 bedroom	1.5 spaces + visitor parking (2)
	2 bedroom	2 spaces + visitor parking (2)
Attached Rental	Studio	1 space + visitor parking (2)
	1 bedroom	1.4 spaces + visitor parking (2)
	2 bedroom	1.6 spaces + visitor parking (2)
	3 bedroom	2 spaces + visitor parking (2)
City of Fountain Valley		
Single-family, detached: up to 4 bedrooms		2 stalls in a garage
Single-family, detached: 5+ bedrooms or homes larger than 4,000 sq. ft.		3 stalls in a garage
Single-family, detached		Same as single-family, detached
Mobile home park		2 covered for unit, plus 0.2 visitor stall/unit provided independent of the unit
Accessory dwelling unit		No parking required beyond that which is required for the primary residence. Pursuant to California Government Code Section 65852.2, replacement parking cannot be required if an existing garage is converted to an ADU.
Multi-family: duplex, condos, other attached dwellings	1 bedroom or less	1 covered stall + 0.5 uncovered + 25% of total required spaces for visitor parking
	2 bedrooms	1 covered stall + 1 uncovered + 25% of total required spaces for visitor parking
	3 bedrooms	2 covered stall + 0.5 uncovered + 25% of total required spaces for visitor parking
	More than 3 bedrooms	2 covered stall + 0.5/room over 3 uncovered + 25% of total required spaces for visitor parking

Note:
1. Parking is waived for ADUs if the property is within ½ mile walking distance to transit (including ferry); within an architecturally or historically significant district; on-street parking permits are required and not provided to the occupant of the ADU; or within one block of a car-share vehicle pick-up/drop-off location
2. Visitor parking: 0.7 space/unit if project has resident garages or 0.4 spaces/unit if the project has resident carports.

Source: City of Newport Beach, Irvine, and Fountain Valley Municipal Codes

Program 2M is included in **Chapter 4: Housing Plan** to review and revise the City's residential off-street parking standards for multi-family residential projects in an effort to facilitate the development of multi-family developments, and specifically affordable housing projects.

4. Variety of Housing Types Permitted

California Housing Element Law mandates jurisdictions must make sites available through zoning and development standards to promote the development of a variety of housing types for all socioeconomic levels of the populations. Housing types include single-family homes, multi-family housing, accessory dwelling units, factory-built homes, mobile-homes, employee and agricultural work housing, transitional and supportive housing, single-room occupancy (SROs), and housing for persons with disabilities. **Table 3-9** shows the various housing types permitted throughout the City of Costa Mesa.

Single-Family Dwelling

The Costa Mesa Zoning Code defines a Single-Family Dwelling as a building of permanent character which is designed or used for residential occupancy by one family. A single mobile home on a foundation system on a single lot is a single-family dwelling. A single-family dwelling may be attached or detached from another single-family dwelling, including but not limited to an accessory dwelling unit. Single Family dwelling units are permitted in the R1, R2-MD, R2-HD, and R3 residential zones, as well as the PDR-LD, PDR-MD, PDR-HD, PDR-NCM, PDC, PDI, and I&R-MLT zones.

Multi-Family Dwelling

A Multi-Family Dwelling is a building of a permanent character which is designed or used for residential occupancy or two or more families. This housing designation may include, duplexes, triplexes, fourplexes, and apartments. The building is typically owned by a single person or agency and rented out to tenants. Each dwelling unit within the structure is occupied by a single housekeeping unit. Multifamily dwelling units are permitted in the R2-MD, R2-HD, and R3 residential zones, the TC commercial zone, and the PDR-LD, PDR-MD, PDR-HD, PDR-NCM, PDC, and PDI zones, and the I&R-MLT Institution zone.

Accessory Dwelling Unit (ADU)

An ADU is a second dwelling unit established in conjunction with and subordinate to the single-family dwelling unit existing on the property. The ADU may be a studio with no bedroom or contain any number of bedrooms and it may be attached to the single-family dwelling unit or detached and located on the same lot. An ADU may also be referred to as an "accessory apartment", "granny unit", "granny flat", or "in-law apartment". Refer to Costa Mesa City Ordinance 2021-03 for ADU-specific development standards. Accessory dwelling units are permitted in all zones where single-family residential units are also permitted.

Common Interest Development

The City Zoning Code defines Common Interest Developments as containing 2 or more common interest units, which may include, but is not limited to, a community apartment project, rights of exclusive occupancy, a stock cooperative, and/or exclusive occupancy. Common interest developments are permitted in all zones where multifamily developments and units are permitted.

Small Lot Subdivision, Residential

A Small Lot Subdivision refers to a residential development that contains a maximum of 15 detached or townhome style units with no common walls where each unit is independently constructed on an individual parcel. In a small lot subdivision, the land is subdivided into fee simple parcels containing each unit and each individual lot is provided with either a direct access to a public street/alley or an easement access through a recorded subdivision map. Small Lot subdivision projects are permitted in the R2-MD, R2-HD, and R3 residential zones.

Manufactured Housing

Manufactured housing includes detached housing that is built to the National Manufactured Housing Construction and Safety Standards Act of 1974, including structures known as manufactured homes and mobile homes. A factory-built structure is considered a single-family home and shall be reviewed under the same standards as a site-built structure if it is manufactured under the authority of 42 U.S.C. section 5401 - National Manufactured Housing Construction and Safety Standards Act. Mobile homes are permitted conditionally in the R2-MD, R2-HD, R3 residential zones and PDR-LD, PDR-MD, PDR-HD, PDR-NCM, PDC, and PDI zones.

Boarding House

A Boarding House is a residence or dwelling, other than a hotel, wherein rooms are rented under 2 or more separate written or oral rental agreements, leases, or subleases. The property owner, agent, or rental manager may or may not reside on the property. A small boarding house rents 2 or less rooms, while a large boarding house rents out 3 to 6 rooms. The City of Costa Mesa prohibits boarding houses that rent more than 6 rooms. Small boarding house developments are permitted in all zones where manufactured/mobile homes are permitted, and large boarding house developments are conditionally permit in these zones.

Residential Care Facility

In Costa Mesa, a Residential Care Facility must be licensed by the State to provide care, services, or treatment to persons living in supportive community residential setting. Residential care facilities may include, but may not be limited to: intermediate care facilities for the developmentally disabled; community care facilities; residential care facilities for the elderly; residential care facilities for the chronically ill; alcoholism and drug abuse facilities; pediatric day health and respite care facilities; residential health care facilities, including congregate living health facilities; family care home, foster home, group home for the mentally disordered or otherwise handicapped persons or dependent and neglected children. Residential care facilities are permitted in all residential, planned development, and institutional zones.

Group Homes

A Group Home is a facility that is being used as a supportive living environment for persons who are considered handicapped under state or federal law. A group home operated by a single operator or service provider (whether State licensed or unlicensed) constitutes a single facility, whether the facility occupies one or more dwelling units. Group homes are allowed in all residential zoning districts through a conditional or special use permit. Small group homes are permitted with a special use permit in residential and planned development zones, and they are permitted as a primary use in institutional zones subject to consistency with an adopted Master Plan. Large group homes are conditionally permitted in residential and planned

development zones and are permitted as a primary use in the institutional zones subject to consistency with an adopted Master Plan.

Although there are several different housing types outlined in the zoning code including group homes, the City's zoning code does not exclude group homes or more specifically housing for disabled people from any residential zones in the City. On the contrary, disabled individuals can live in any residential property in the City. The city's code provisions regarding group homes have been upheld by numerous courts in both state and federal court and have been found to be intended to and actually protective of persons with disabilities. Group homes are intended to be integrated into residential communities for the benefit of both the disabled and the non-disabled. The City's code protects the disabled from being forced to live in multiple adjoining properties clustered together -- institutionalized settings -- in crammed quarters, subject to eviction without warning and left vulnerable and homeless in a City far from their actual homes. It also preserves the very character of residential neighborhoods which make them desirable places to live, by preventing unreasonably increased traffic, noise, parking difficulties, and drug-related activity when residents relapse during the recovery process. The recovery community, including industry associations like Sober Living Network and the National Alliance for Recovery Residences, acknowledged these issues, and recommend that group recovery homes – including sober living homes – adopt model operational standards to ensure proper care of their residents. Costa Mesa's code does exactly that, regulating *operators*, not disabled individuals, and ensuring the disabled safe and appropriate residential environments. Numerous group homes for the disabled, including sober living homes have been approved and operate throughout the City. There is no shortage of options for those seeking to live in a recovery home in low or high density areas of the City. Further, the City does not regulate state licensed homes of six or fewer residents, as that is preempted by state law.

Based on California Health and Human Services (CHHS) data shown below, Costa Mesa has more Certified & Licensed group home facilities (in number and per capita) than the surrounding Orange County jurisdictions. Under the current regulations, there are significant portions of the City that can accommodate additional facilities. Per capita estimates are shown below (based on 2021 US Census population estimates).

- Costa Mesa: 55 Certified and Licensed Facilities (1 per 2,013 residents)
- Newport Beach: 35 Certified and Licensed Facilities (1 per 2,422 residents)
- Huntington Beach: 42 Certified and Licensed Facilities (1 per 2,777 residents)
- Fountain Valley: 16 Certified and Licensed Facilities (1 per 3,530 residents)
- Irvine: 5 Certified and Licensed Facilities (1 per 61,806 residents)
- Santa Ana: 28 Certified and Licensed Facilities (1 per 11,051 residents)

Notwithstanding, the City has included **Program 2P** in the Housing Element to review and consider revisions to its zoning code and application procedures applicable to group homes to promote objectivity and greater approval certainty.

Transitional Housing

The Costa Mesa Zoning Code defines Transitional Housing as a development with buildings configured as rental developments but operated under program requirements that call for the termination of assistance and recirculation of the assisted unit to another eligible program recipient at some predetermined future point in time, which may not be less than 6 months. Transitional housing that is provided in single family dwelling, multi-family dwelling units, residential care facilities, or boarding house uses, shall be permitted, conditionally permitted, or prohibited in the same manner as the other single-family dwelling, multi-family dwelling units, residential care facilities, or boarding house uses. Currently, the city permits transitional housing consistent with the development standards and regulations of the type of unit it is proposed as; for example, if a transitional housing project is proposed as a single-family unit (SFU), it is subject to the same provisions of the identified zone for a SFU. The City has identified **Program 2J** to update the zoning code to acknowledge transitional housing distinctively in the City's land use matrix, consistent with state law.

Supportive Housing

Supportive Housing includes housing with no limit on length of stay, that is occupied by the target population, and that is linked to onsite or offsite services that assist the supportive housing resident in retaining the housing, improving his or her health status, and maximizing their ability to live and, when possible, work in the community. Supportive housing that is provided in single family dwelling, multi-family dwelling units, residential care facilities, or boarding house uses, shall be permitted, conditionally permitted, or prohibited in the same manner as the other single-family dwelling, multi-family dwelling units, residential care facilities, or boarding house uses. Currently, the city permits supportive housing consistent with the development standards and regulations of the type of unit it is proposed as; for example, if a supportive housing project is proposed as a single-family unit (SFU), it is subject to the same provisions of the identified zone for a single family unit. The City has identified **Program 2J** to update the zoning code to acknowledge supportive housing distinctively in the City's land use matrix, consistent with state law.

Referral Facility

A Referral Facility or a group home may include one or more person who resides there pursuant to a court order or directive from an agency in the criminal justice system. Referral facilities are conditionally permitted in the R2-MD, R2-HD, and R3 residential zones, the PDR-MD, PDR-HD Planned Development zones and the C2 commercial zone.

Single Room Occupancy Residential Hotel (SRO)

An SRO is permitted in certain commercial zones and contains units designed for long-term occupancy by a single person. Double occupancy may be permitted. SROs are conditionally permitted in the C1 and C2 commercial zones.

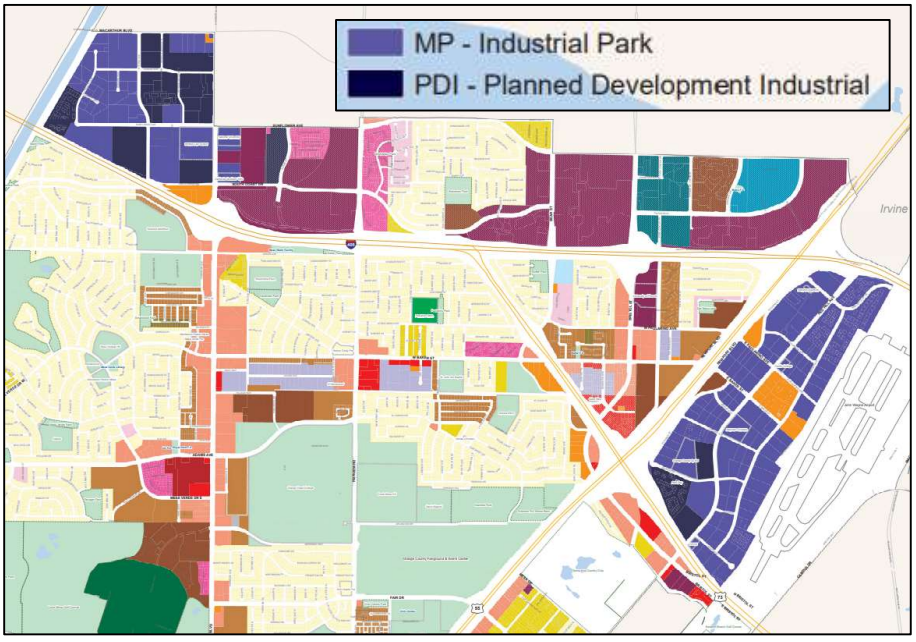
Emergency Shelter

An emergency shelter provides temporary housing and food for individuals in need or disaster victims. The shelters may be operated by a public or non-profit organization. Emergency shelters are permitted by-right

in the PDI Zone. Emergency shelters are also permitted in the MP Zone with approval of a Conditional Use Permit. All emergency shelters are subject to the following development standards (City-owned emergency shelters are exempt from certain provisions):

- The maximum length of stay may not exceed 120 days in a 365-day period.
- Each emergency shelter may have a maximum of 30 beds.
- Off-site parking must be provided at a parking rate of 1 parking space per 4 beds or one 1 space per employee, whichever is higher. In comparison to the Cities of Newport Beach, Huntington Beach, and Irvine, Costa Mesa's emergency shelter parking requirements are lowest and therefore not considered a constraint.
- Stays at an emergency shelter facility shall be limited to the hours of 5:00 p.m. and 8:00 a.m. the following day.
- Nonoperational and unregistered vehicles may not be kept on site.
- Each emergency shelter will provide an interior and exterior waiting area adequate to accommodate waiting clients and to prevent queuing into the public right-of-way. An exterior waiting area must be physically separated and visually screened from the public right-of-way.
- The emergency shelter facility will provide an on-site resident manager on site at all times.
- A minimum distance of 300 feet must be maintained from another emergency shelter. The distance of separation shall be measured in a straight line between the property lines of each use without regard to intervening structures or objects.
- The shelter operator shall provide minimum exterior lighting in compliance with the city's security requirements.
- The shelter operator shall patrol a half-mile radius surrounding the shelter site during hours that the shelter is in operation to ensure that shelter clients and homeless individuals who have been denied access are not congregating in the neighborhood.
- Alcohol and narcotics use, and consumption are prohibited within the facility and on the property.
- An operations plan will be submitted for review and approval by the development services director and police chief prior to operation of the emergency shelter. The plan must include minimum provisions related to on-site security and safety, staff training, loitering control, client eligibility, counseling services, and indoor and outdoor management of the facility.

In April 2021, the City of Costa Mesa completed the construction of its permanent Bridge Shelter within the City. The Costa Mesa City Council purchased the Airway property in March of 2019 and completed $4.5 million worth of capital improvements to convert the 26,000-square-foot industrial warehouse to a 12,000-square-foot 72-bed shelter with a 14,000-square-foot tenant space. The permanent Bridge Shelter was built in coordination with the neighboring City of Newport Beach who made a one-time payment of $1.4 million in capital costs as well as $200,000 in furniture, fixtures, and equipment for the site. Additionally, Newport Beach will provide $1 million annually for 20 set-aside beds.



Construction of the Bridge Shelter, as well as the organization and operation of the temporary Bridge Shelter at Lighthouse Church, represent the Costa Mesa's commitment to assisting those residents currently experiencing homelessness. With the shelter in full operation, the City is now able to assist up to

72 residents at one time. This multi-year effort is a tremendous step towards helping to house residents within the City of Costa Mesa who may need assistance and transition to more permanent housing. The City also provides services and assistance to residents of the Bridge Shelter.

In addition, a total of 294 parcels (483.5 total acres and an average parcel size of 1.6 acres) are zoned MP and 150 parcels (168.7 total acres and an average parcel size of 1.1 acres) are zoned PDI which allows for the development of emergency shelters by-right without discretionary approval. Additionally, the Bridge Shelter parcel is approximately 1.3 acres large – which is similar to the average size of other parcels in the MP and PDI zones. These parcels currently include industrial uses such as light manufacturing, warehousing, and logistics centers, office buildings, schools, churches, civic uses and surface parking lots. There are two areas of the City with a mix of PDI and MP zoning – these include the area between John Wayne Airport and the 55 Freeway and the area to the north-west of the City between the 405 Freeway and W MacArthur Boulevard. Parcels located in these PDI and MP zones are all located approximately within a half-mile of a transit stop. In the area closest to John Wayne Airport, the 71 OCTA line runs through Red Hill Avenue. In the area closest to W MacArthur Boulevard, OCTA lines 43, 76, and 37 run along Harbor Boulevard and W MacArthur Boulevard.

Based on CalEnviroScreen 4.0, there are 3 hazardous waste generators within the MP and PDI zones in the north-west portion of the City and 4 near the north-east portion of the City as shown in **Figure 3-1b**. These generators are light industrial uses and do not create an environment unfit for human habitation. Located in close proximity to the area are existing and new housing units. In fact, residential development is allowed in certain industrial zones in the City pursuant to residential overlay zoning and subject to an adopted master plan. As such, the hazardous waste generators identified by CalEnviroScreen 4.0 do not pose a threat to the development and use of future emergency shelters in the area.

Figure 3-1a: Map of MP Zones in Costa Mesa

Source: City of Costa Mesa, Zoning Code Map.

Figure 3-1b: Map of Hazardous Waste Generators

Source: CalEnviroScreen 4.0, Hazardous Waste.

Farmworker Housing

California Health and Safety Code Sections 17021.5 and 17021.6 require agricultural employee housing to be permitted by-right, without a conditional use permit (CUP), in single-family zones for six or fewer persons and in agricultural zones with no more than 12 units or 36 beds. The Costa Mesa Municipal Code does not address Farmworker Housing by definition. A program is included in **Chapter 4: Housing Plan** to ensure the City's development standards allow Farmworker Housing by-right, without a CUP, in single-family zones for six or fewer persons.

Low Barrier Navigation Centers

AB 101 states that "Low Barrier Navigation Center developments are essential tools for alleviating the homelessness crisis in this state." Low Barrier Navigation Centers are defined as a Housing First, low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. Low Barrier Navigation Centers are required as a use by right in areas zoned for mixed uses and nonresidential zones permitting multifamily uses if it meets specified requirements. The Costa Mesa Municipal Code does not address Low Barrier Navigations Centers by

definition. A program is included in Chapter 4: Housing Plan to ensure the City's development standards allow Low Barrier Navigation Centers by-right in all zones that permit mixed-uses and non-residential uses.

5. Planned Development

The intent and purposed of Planned Developments are to provide a method by which appropriately located areas of the City can be developed utilizing more imaginative and innovative planning concepts than would be possible through strict application of existing zoning and subdivision regulations. It is intended that these developments will meet the broader goals of the General Plan and Zoning Code by exhibiting excellence in design, site planning, integration of uses and structures, and protection of the integrity of neighboring developments. Additional standards for PDs may be found in Chapter V. Article 6 of the City's Zoning Code.

All PDs require approval through a Master Plan and must be reviewed and approved by the Planning Commission. The following provides the process by which PDs may be reviewed:

Preliminary Master Plan: a preliminary master plan may be processed in advance of the master plan to determine the general location, type, and intensities of uses proposed in large scale planned developments prior to the preparation and submittal or more detailed development plans. Preliminary master plans may also be used as conceptual plans for long-term or phased PDs.

Upon approval of the preliminary master plan, development plans for individual components or phases of the PD are required and will be processed according to the provisions for master plans. Subsequent plans must be consistent with the parameters and general allocation and intensity of uses of the approved preliminary master plan. At the time of approval of the preliminary master plan, the Planning Commission may determine that subsequent development plans may be approved by the Zoning Administrator. In such cases, development plans will be forwarded by the Zoning Administrator, upon an appeal filed or upon motion by the Planning Commission or City Council.

Amendments to the Master Plan: Minor changes in the location, siting or character of buildings and structures may be authorized by the planning division if required by engineering specifications or other circumstances not foreseen at the time the master plan was approved. No change authorized under this section may cause any of the following:

- A change in the use of character of the development;
- An increase in the overall density of the development;
- An increase in overall coverage of structures;
- A reduction or change in character of approved open space;
- A reduction of required off-street parking;
- A detrimental alteration to the pedestrian, vehicular and bicycle circulation, and utility networks; or
- A reduction in required street pavement widths.

Major changes involving substantial amendments to the master plan encompassing one or more of the minor changes listed above, or any other proposed change determined by the Development Services

Director as a major amendment, shall be subject to review and approval by the Zoning Administrator. If the major amendment results in an overall building square footage that exceeds the maximum density or building square footage allowed by the approved master plan, the Zoning Administrator must find that the major amendment is consistent with the density, floor area ratio, and trip budget standards established by the general plan, as applicable.

Minor Additions to an Existing PD:

- *Residential buildings—Single-story additions*: Minor single-story additions to existing residential buildings not meeting the criteria below may be approved by a Minor Modification application if the Planning Division finds that the proposed construction does not materially affect the required open space, site coverage, or parking of the PD.
- *Unenclosed patio covers*: Unenclosed patio covers in planned development residential zones, which meet the setback criteria may be approved by the Planning Division:
- *Enclosed patios and room additions*: Enclosed patios and room additions may be permitted pursuant to the parameters for such additions established in the master plan. In cases where the master plan does not include criteria for future enclosed patios and/or room additions, the addition may be permitted if the required open space percentage is met on the affected lot and the addition meets the setbacks established for patio covers with the exception of small lot developments.
- *Residential buildings—Second story additions*: In cases where the master plan does not include criteria for future second-story additions, the planning division may approve any proposed second-story addition that meets the setback standards. Any second-story addition that does not meet all of the following criteria will be subject to Minor Design Review: complies with residential design guidelines adopted by the City Council, and does not materially affect the required open space, site coverage, or parking of the planned development.
- *Nonresidential buildings*: Minor additions to existing nonresidential buildings may be approved by Development Review if the Planning Division finds that the proposed construction does not materially affect required open space, floor area ratio, and parking requirements specified in the approved master plan. If the minor addition results in an overall building square footage that exceeds the maximum building square footage allowed by the approved master plan, the Planning Division must find that the minor addition is consistent with the floor area ratio and trip budget standards established by the general plan, as applicable.

Site Design Concept

To maintain similar development designs and intensities within the different residential zones in the Costa Mesa, the City encourages the following standards and housing types:

Low-Density Zone: Small-lot, single-family detached residential developments including clustered development, zero lot line development and conventional development are appropriate.

Medium-Density and High-Density Zone, and North Costa Mesa Zones: Single- and multi-family residential developments containing any type or mixture of housing units, either attached or detached, including but

not limited to, clustered development, townhouses, patio homes, detached houses, duplexes, garden apartments, and high-rise apartments or common interest developments are appropriate.

As a Complementary Use: nonresidential use of a religious, educational, or recreational nature may be allowed if the planning commission finds the use to be compatible with the PD residential project.

As a Complementary Use in PDR-MD, PDR-HD, PDR-NCM Zones: nonresidential uses of a commercial nature may be allowed if the Planning Commission finds the uses to be compatible with the PD residential project and if the FAR does not exceed that established for the Neighborhood Commercial General Plan Land Use designation.

6. Growth Management Measures - Measure Y

Growth management measures allow cities to grow in a responsibly and orderly manner, however, if overly restrictive, these measures can produce constraints to the development of housing, specifically affordable and accessible housing.

In 2016, residents of Costa Mesa voted to pass Measure Y: An Initiative to Require Voter Approval on Certain Development Projects. The Measure amended the Costa Mesa Municipal Code to require voter approval of any projects involving certain legislative actions (i.e. projects that amend, change, or replace the General Plan, the Zoning Code, a specific plan, or an overlay plan) which:

- Add 40 or more dwelling units;
- Generates more than 200 additional average daily trips (ADT);
- Increases the volume/capacity of an intersection based on specified formulas;
- Changes the intersection capacity utilization or level of service (LOS) based on specified formulas;
- Adds 10,000 square feet of retail, office, or other nonresidential uses; and/or
- Where the proposed project, combined with other projects within 8 years and a half-mile of each other, meet the above criteria.

Voter approval is also required for projects involving the above listed legislative actions which involve:

- Changes from public uses to private uses under special circumstances;
- Land designated as utility right-of-way under specified circumstances;
- Land donated, bequeathed, or otherwise granted to the City;
- Land used or designated for Costa Mesa school property; and/or
- Land owned, controlled, or managed by the City.

Any of these proposed changes as listed above are required to be approved by the Costa Mesa voters through a special or general election after the City Council has approved the project. Applicants may choose to put their project on a General Election which could result in timing delays to the project as those typically only occur in June and November of even numbered years or may pay for a Special Election to occur. Special Elections typically cost approximately $200,000, a cost which must be paid for by the developer. This can be a significant capital investment that may return uncertain election results (even if a project is approved

by the City Council through an entitlement process). This process may discourage developers from pursuing housing development projects and particularly affordable housing projects.

The precise impact on development projects depends heavily on the type of project, number of residential units, and funding sources. The City has not had a project go through the entire Measure Y process to date. While the exact cost and impact is not known, it can be assumed based on the analysis above that the Measure Y process adds time to the entitlement schedule and potentially additional costs if a Special Election is required. Program 3G discusses specific actions the City will take to address Measure Y in the context of the Housing Element and making sites available to accommodate the City's RHNA.

7. Specific Plans

The purpose of a Specific Plan is to implement the goals and objectives of a city's General Plan in a more focused and detailed manner that is area and project specific. The Specific Plan promotes an enhanced aesthetic level throughout the project/community. Specific Plans can contain their own development standards and requirements that may be more restrictive than those defined for a city as a whole.

East 17th Street Specific Plan

The East 17th Street Specific Plan encompasses approximately 33 acres along 17th Street, east of Santa Ana Avenue and west of Irvine Avenue. The area is designated for General Commercial by the General Plan Land Use Element and contains a mix of office and commercial uses.

The intent and purpose of the specific plan is to provide a good transition to neighboring residential areas by alleviating the problems generated by the proximity of commercial and residential uses in the area. In order to do this, the City adopted the following development standards:

- Properties on the south side of the 400 block of the Specific Plan area must maintain a 10-foot landscape buffer and properties on the north side of the 400 block must maintain a 5-foot landscape buffer.
- A Conditional Use Permit is required to permit any development over 2 stories / 30 feet. Developments over 4 stories are prohibited.

Newport Boulevard Specific Plan

The Newport Boulevard Specific Plan was prepared in order to address the development issues that resulted from the completion of the Costa Mesa Freeway. The intent and purpose of this specific plan is to encourage viable commercial businesses along Newport Boulevard, as well as to encourage marginal uses to redevelop. The Newport Boulevard Specific Plan added the "Commercial-Residential" land use designation to allow for a mix of residential and commercial zoning, which would otherwise only occur in Planned Development zoning districts. Maximum residential density ranges from 12 units to 17.4 units per acre through the specific plan area; Table 3-10 below provides the permitted densities.

The Commercial-Residential land use designation is intended to allow commercial uses which serve and complement the residential neighborhoods to the east and within the specific plan. Appropriate uses

include markets, drug stores, retail shops, financial institutions, service establishments and support office uses. Single room occupancy hotels are also permitted in this area. The location of these uses near residential neighborhoods is further intended to reduce the need for longer vehicle trips to areas of more intense commercial activity in order to obtain goods or services.

Table 3-10: Permitted Residential Density		
Lot Size	Street Frontage	Allowable Density
40,000 square feet	120 feet	1 unit/ 3,630 square feet (Medium density at 12 units per acre)
60,000 square feet	150 feet	1 unit/ 3,000 square feet (High density at 14.5 units per acre)
80,000 square feet	180 feet	1 unit/2,500 square feet (High density at 17.4 units per acre)
Source: Newport Boulevard Specific Plan SP-96-01 (1996)		

North Costa Mesa Specific Plan

The North Costa Mesa Specific Plan encompasses 423 acres north of the San Diego Freeway and was adopted in 1994 and last updated in 2016. A specific plan was developed to set standards and strategies for the development of two large areas of undeveloped land in this area. The intent of the specific plan is to implement the policies of the General Plan in a manner that seamlessly integrates a variety of uses and considers the impact of new development on surrounding areas.

Table 3-11 provides the permitted land uses and densities within the specific plan areas, and Table 3-12 provides the maximum building heights allowed.

Table 3-11: Permitted Land Uses and Development Standards				
Land Use Designation	**Typical Uses**	**Zoning Districts**	**Residential Density**	**FAR**
Low Density Residential	Single family detached and attached units, granny units, accessory apartments, family day care	R1, PDR-LD, I&R	≤ 8 units per acre	0.15 high traffic 0.25 moderate traffic 0.35 low traffic
Medium Density Residential	Single-family attached units, multiple family units, senior congregate care facilities, convalescent hospitals, and group residential homes. Ancillary commercial uses are permitted the planned development zones.	R1, R2-MD, PDR-MD, MU, I&R	≤ 12 units per ace	0.15 high traffic 0.25 moderate traffic 0.35 low traffic
High Density Residential	Multiple family units, senior congregate care facilities, convalescent hospitals and group residential homes. Ancillary commercial uses are permitted in the planned development zones.	R2-HD, R3, PDR-HD, PDR-NCM, MU, I&R	≤ 20 units per acre (except the density in PDR-NCM zone is 25-35 units per acre)	0.15 high traffic 0.25 moderate traffic 0.35 low traffic
Commercial Center (1)	Major shopping, service, and office facilities designated serve city-wide and regional markets.	C1, C2, C1-S, PDC, AP, P, CL	≤ 20 units per acre	0.25 high traffic 0.35 moderate traffic 0.45 low traffic 0.75 very low traffic
Regional Commercial	Regional scale uses including major department stores, specialty retail outlets, restaurants, offices, and hotels.	PDC	≤ 20 units per acre	0.652 South Coast Plaza (east of Bear Street) 0.89 South Coast Plaza (west of Bear Street)
Urban Center Commercial	Intensively developed mixed commercial including offices, retail shops, restaurants, and hotels. Residential uses are also permitted pursuant to the North Costa Mesa Specific Plan	PDC, TC	≤ 20 units per acre	See Note 2.
Industrial Park	Wide variety of industrial and compatible office and support commercial uses.	MP, POI, CL	≤ 20 units per acre	0.20 high traffic 0.30 moderate traffic 0.40 low traffic 0.75 very low traffic

Notes:
(1) Home Ranch has a site-specific FAR: 0.37 for the IKEA portion of the project and 0.64 for the office portion
(2) South Coast Metro Center (Area 6) has a site- specific FAR of 0.79. Sakioka Lot 2 (Area 8) has a maximum site- specific FAR of 1.0.
Source: North Costa Mesa Specific Plan (2016)

Table 3-12: Maximum Building Height – North Costa Mesa Specific Plan	
Sub-Are	**Max. Building Height**
Area 1 – Home Ranch	Varies [1]
Area 2 – Metro Pointe	30 feet / 2 stories [2][3] (North of South Coast Drive) 90 feet / 6 stories [2][3] (South of South Coast Drive)
Area 3 – South Coast Plaza and Crystal Court	85 feet / 4 stories
Area 4 – SCP Town Center	315 feet / 25 stories [2]
Area 5 – The Lakes	90 feet / 6 stories [2] (Mid-Rise Residential) 280 feet / 26 stories [2] (High-Rise Residential)
Area 6 – South Coast Metro	Varies [2][4]
Area 7 – Sakioka Lot 1	60 feet / 4 stories [4]
Area 8 – Sakioka Lot 2	60 feet / 4 stories [2][4] (North of Collector Street) 180 feet / 12 stories [2][4] (South of Collector Street)
Notes: (1) See North Costa Mesa Specific Plan. (2) Buildings above 173 feet in height will require a determination of no hazard by the FAA. (3) Current development agreement allows buildings up to 15 stories. (4) Buildings which encroach into the setback for Anton Blvd. and/or Sakioka Dr. cannot exceed 30 feet (approx. 2 stories) within the setback area. *Source: North Costa Mesa Specific Plan (2016)*	

Costa Mesa Theater and Arts District Plan

The Costa Mesa Theater and Art District includes 54 acres of land located east of Bristol Street, south of Sunflower Avenue, west of Avenue of the Arts, and north of the San Diego Freeway. The specific plan area includes high-rise office buildings, cultural facilities, hotels, restaurants, and other commercial uses; it neighbors high-density residential developments. The goals of the plan are to:

- Create a strong sense of place and awareness of a coherent identity for the Costa Mesa Theater and Arts District that will recognize existing cultural and corporate resources in the area and successfully integrate new resources as they are developed.
- Assist pedestrians and vehicle operators in reaching their destinations quickly and easily, and, once they are in the area, make information available that highlights additional points of attraction throughout the district.
- Inform local, regional, national, and international communities about the Costa Mesa Theater and Arts District.
- Support occasional programs and installations in the Costa Mesa Theater and arts District that will recognize the importance of culture and the arts in daily life.

- Encourage appropriate interplay between policies that apply particularly to the Costa Mesa Theater Arts District and those policies that evolve in the City of Costa Mesa to serve regional needs.
- Improve communication and cooperation among area property owners in monitoring and fostering design and development within the district.

8. Housing for Persons with Disabilities

Both the Federal Fair Housing Amendment Act (FHAA) and the California Fair Employment and Housing Act require governments to make reasonable accommodations (that is, modifications or exceptions) in their zoning laws and other land use regulations to afford disabled persons an equal opportunity to housing. State law also requires cities to analyze potential and actual constraints to the development, maintenance, and improvement of housing for persons with disabilities.

The Housing Element Update must also include programs that remove constraints or provide reasonable accommodations for housing designed for persons with disabilities. The analysis of constraints must touch upon each of three general categories: 1) zoning/land use; 2) permit and processing procedures; and 3) building codes and other factors, including design, location, and discrimination, which could limit the availability of housing for disabled persons.

Reasonable Accommodation

Reasonable accommodation in the land use and zoning context means providing individuals with disabilities or developers of housing for people with disabilities, flexibility in the application of land use and zoning and building regulations, policies, practices, and procedures, or even waiving certain requirements, when it is necessary to eliminate barriers to housing opportunities. For example, it may be reasonable to accommodate requests from persons with disabilities to waive a setback requirement or other standard of the Zoning Code to ensure that homes are accessible for the mobility impaired. Whether a particular modification is reasonable depends on the circumstances.

The Reasonable Accommodations Chapter of the City of Costa Mesa's Municipal Code identifies the applicability and procedures needed to obtain relief from a Zoning Code provision, regulation, policy, or condition which may cause a barrier to equal opportunity for housing. This regulation applies to any person seeking approval to construct and/or modify residential housing for persons(s) with disabilities, and/or operate a residential care facility, group home, or referral facility, which will substantially serve persons with disabilities.

An application for a reasonable accommodation must be submitted to the City of Costa Mesa's Planning Division and requires approval by the Development Services Director within 60 days of the application being deemed complete. A denied application may be appealed to the Planning Commission and is subject to the notice, review, approval, and appeal procedures prescribed for any other discretionary permit. There are no fees associated with the application and it must include:

- The zoning code provision, regulation, policy, or condition from which accommodation is being requested;

- The basis for the claim that the individuals are considered disabled under state or federal law, and why the accommodation is necessary to provide equal opportunity for housing and to make the specific housing available to the individual;
- Any other information that the Director reasonably determines is necessary for evaluating the request;
- Documentation that the applicant is either an individual with a disability, applying on behalf of one or more individuals with a disability, or a developer or provider of housing for one or more individuals with a disability;
- The specific exception or modification to the zoning code provision, policy, or practices requested;
- Documentation that the specific exception or modification requested by the applicant is necessary to provide one or more individuals with a disability an equal opportunity to use and enjoy the residence; and
- Any other information that the hearing officer reasonably concludes is necessary to determine whether the grounds for reasonable accommodation can be made, so long as any request for information regarding the disability of the individual(s) benefited complies with fair housing law protections and the privacy rights of the individual(s) affected.

The following factors are considered during the review of the application:

- Is the requested accommodation necessary to afford a disabled person an equal opportunity to use and enjoy a dwelling? To determine whether the accommodation is necessary, the director may consider, among other things: The nature of the disability including the special needs created by the disability, the physical attributes and setting of the property and structures, the potential benefit that can be accomplished by the requested accommodation, and alternative accommodations that may provide a comparable level of benefit.
- Is the requested accommodation reasonable? A requested accommodation is not reasonable if it would impose an undue financial or administrative burden on the City. It is also not reasonable if it would fundamentally alter a City program, such as the City's zoning scheme.
    - In considering the financial or administrative burden on the City, the director may consider, among other things, the extent to which the City would have to dedicate resources, such as staff time and funds, to grant the request and other requests like it.
    - In considering the potential alteration to a City program, such as the City's zoning scheme, the director may consider, among other things, whether granting the request would be consistent with the City's General Plan, with the purpose and nature of the particular zoning district, and with nearby uses. The director may also consider whether the requested accommodation would potentially have adverse external impacts on properties in the vicinity.

The inherent constraints of any reasonable accommodation process are that the accommodation must be both "reasonable" and "necessary." Each of these concepts are unavoidably subjective in some ways and entail a highly specific inquiry into a particular, typically unique, set of circumstances. The examples offered by HCD in its comments on the draft element reference consideration of General Plan consistency, for

example. A General Plan and evaluation of uses as consistent or inconsistent with the General Plan may be a constraint, but both a General Plan and acting consistently with the General Plan are obligations imposed on the City by State law. Similarly, impacts to individuals and properties in the vicinity of any requested deviation from standards is a routine and appropriate factor to review in determining whether a particular accommodation requested is reasonable under all the circumstances presented. Nevertheless, the City has established **Program 2N** and has committed to review and revise its reasonable accommodation procedures to be consistent with the requirements of State law as needed, and to consider public comments to determine whether revisions can be made to minimize constraints in the process.

Definition of Family

Under the right of privacy, the California Constitution prohibits a restrictive definition of "family" which limits the number of unrelated persons and differentiates between related and unrelated individuals living together. The City of Costa Mesa's Municipal Code defines the term "family" as one or more persons occupying one dwelling unit and living together as a single housekeeping unit. The City also defines a "single housekeeping unit" as occupants which have established ties and familiarity with each other, jointly use common areas, interact with each other, share meals, household activities, and expenses and responsibilities. Membership in the single housekeeping unit must be fairly stable as opposed to transient, the members have some control over who becomes a member of the household, and the residential activities of the household are conducted on a nonprofit basis. The City also includes that there is a rebuttable presumption that integral facilities do not constitute single housekeeping units.

The City's Municipal Code provides the following indicators that a household is not operating a single housekeeping unit:

- The occupants do not share a lease agreement or ownership of the property;
- Members of the household have separate, private entrances from other members;
- Members of the household have locks on their bedroom doors; and/or
- Members of the household have separate food storage facilities, such as separate refrigerators.

The Courts have clearly distinguished between single housekeeping units and those of a more transient nature, such as boarding homes, motels, etc. The City's code does not restrict single housekeeping units to those who are related, but does properly define a single housekeeping unit consistently with the law. State zoning law allows the city to establish zones of different residential density, such as R-1 (single family residential), R-2 (two unit/family residential), multi-family, mixed use, etc. The City's definition of family does not touch on whether the members are disabled or not, is not based on and is not intended to discriminate against any based on different levels of ability or disability. The City has added **Program 2O** to review and revised the definition of single-housekeeping unit (which is language within the definition of family) to provide greater flexibility in consideration of accommodating a variety of household situations for related and unrelated individuals living together.

9. Development Fees

Residential developers are subject to a variety of fees and exactions to process permits and provide necessary services and facilities as allowed by State law. Development fees can be a constraint to the maintenance, improvement, and development of housing because the added costs for developers results in higher housing unit costs. Development fees are, however, necessary to provide planning and public services. Table 3-13 provides the planning processing fees and Table 3-14 provides the engineering fees.

Table 3-13: Planning Processing Fees

Review Process			Fee
ABC License Review			$500
Administrative Adjustment			$3,800
Address / Address Change			$200
Appeal	Planning Commission Decision	Located within 500 ft. of project site	$1,220
		Located greater than 500 ft. of project site	$3,825
	Non-Planning Commission Decision	Located within 500 ft. of project site	$690
		Located greater than 500 ft. of project site	$3,825
Banner Permit			$25
CC&Rs Review			$1,000
Certificate of Appropriateness			$7,500
Certificate of Compliance			$1,500
Conditional Use Permit			$7,500
Conditional Use Permit – Measure X			$27,508
Density Bonus Review			$12,000
Design Review	Minor		$1,500
	Major		$3,800
Designating a Cultural Resource			No fee
Development Agreement			Time and materials with $20,000 min. deposit
Development Agreement Annual Review	Planning Commission Review		$1,425
	City Council Review		$1,875
Development Review (Staff)			$1,500
Environmental Review / CEQA			Total consultant contract estimates plus 10%
Flood Zone Determination Letter			$250
Gate Permits			$500
General Plan Amendment Screening			$5,000
General Plan Amendment			$12,000
Home Occupation Permit (Planning Review)			$100
Land Use Restriction			$500
Lot Line Adjustment			$1,500

Table 3-13: Planning Processing Fees		
Review Process		Fee
Master Plan		$9,000
Master Plan Amendment	Minor Change	$1,250
	Minor Amendment	$6,000
	Major Amendment	$7,500
Minor Modification		$500
Minor Conditional Use Permit		$3,800
Minor Design Review		$1,500
Mixed-Use Development Plan Screening		$5,000
Mobile Home Park Applications	Mobile Home Park Conversion	$7,500
	Tenant Relocation (Staff Review)	$5,000
	Tenant Relocation (Third Party Review)	Total consultant contract estimates plus 10%
Off-Site Hazardous Waste Facility	Notice of Intent	$5,000
	Conditional Use Permit	$12,000
	Local Assessment Committee (Formation and Convening)	$5,000
Planned Signing Program		$1,500
Plan Check	Commercial	$250
	Industrial	$250
	Residential – Minor, 4 or Less	$250
	Residential – Major, 5 or More	$500
	Landscape Plan Only	$500
Pre-Application Review		$1,500
Public Entertainment Permit		$1,500
Public Notice (500-Foot Radius and Newspaper Publishing)		$1.00 per mailing address plus publishing costs
Reasonable Accommodation		No fee
Renewal/Time Extension	Director Action	$500
	Zoning Administrator Action	$2,500
	Planning Commission Action	$3,800
Residential and Non-Residential Common Interest Development Conversion		$7,500 plus $115 per unit for required building inspection
Rezone		$10,000
Second-Story Notification		$500
Shared Parking Approval		$500
Small Cell Facility Encroachment Permit – Planning Review		$1,000
Special Use Permit		$5,500
Specific Plan / Amendment		$12,000
Specific Plan Conformity Review		$9,000
Tentative Tract Map		$6,000
Tentative Parcel Map		$3,800

Table 3-14: Engineering Fees	
Type	**Fee**
Drainage Fee	$6,283 - $11,309 per acre + storm drain upgrade
Final Map Check Fee	$90/hour
Off-Site Plan Check	$90/hour
Street Improvement Plan Check Fee	$90/hour
Deposit/bond – Off-Site Work	Twice the amount of the cost estimate of off-site work
Construction Access Permit	$230
Curb and Gutter Permit	$365
Driveway Approach	$425
Sidewalk Approach	$380
Wheelchair Ramp	$365
Public Right-of-Way Inspection	$125/hour
Source: City of Costa Mesa Development Fees (2019)	

The City of Costa Mesa assesses impact fees on a project-by-project basis, taking into account the number of units proposed in the development and the impact these units may have on the local school district, parkland, circulation in the area, and sewage and water infrastructure. Table 3-15 provides the development impact fees as they relate to the development of housing in Costa Mesa.

Table 3-15: Development Impact Fees	
Use	**Fee**
Newport-Mesa Unified School District	
Residential Developer Fees	$1.84 per sq.ft. (additions under 500 sq.ft. may be exempt)
Transportation	
Low Density Residential (9.41 ADT)	$235 per net trip
Medium Density Residential (7.5 ADT)	$235 per net trip
High Density Residential (6.85 ADT)	$235 per net trip
Parkland	
Single-Family Residential	$13,572 per dwelling unit
Multi-Family Residential	$13,829 per dwelling unit
Apartment	$5,000 per dwelling unit
Costa Mesa Sanitary District	
Small New Development Plan Check	$420

Table 3-15: Development Impact Fees		
Use		**Fee**
Large New Development Plan Check		$1,260
Single Family Residential	1 Bedroom	$3,083
	2 Bedrooms	$4,029
	3 bedrooms	$4,973
	4 Bedrooms	$5,918
	5+ Bedrooms	$6,912
Multi-Family Residential	Studio	$1,591
	1 Bedroom	$2,486
	2 Bedrooms	$3,482
	3 bedrooms	$4,426
	4+ Bedrooms	$5,371
San Juaquin Hill Trans. Corridor Agency		
Single-Family Residential		$4,448 per dwelling unit
Multi-Family Residential		$2,595 per dwelling unit
Mesa Water District		
Service Establishment Fee		$20/account
Sources: City of Costa Mesa and Other Agencies Development Fees (2019) *Newport-Mesa Unified School District Developer Fees* *CMSD Sewer Connection Fees (2020)*		

The development fees associated with each project is dependent on the housing type, density, intensity of use, and location. In addition to these direct fees, the total cost of development is contingent on the project meeting the City's policies and standards, as well as the project applicant submitting necessary documents and plans in a timely manner.

The estimated total development and impact fees for a typical single-family residential project, assuming it is not part of a subdivision and is consistent with existing city policies and regulations, can range from $40,069 to $45,069. Estimated total development and impact fees for a typical multi-family residential project with ten units, assuming it is consistent with existing city policies and regulations range from $303,008 to $308,008.

These estimates are illustrative in nature and actual costs are contingent upon unique circumstance inherent in individual development project applications. Considering the cost of land in Costa Mesa, and the International Code Council (ICC) estimates for cost of labor and materials, the combined costs of permits and fees range from approximately 3.98 percent to 4.48 percent of the direct cost of development for a single-family residential project and 4.27 percent to 4.34 percent for a multi-family residential project. Direct costs do not include, landscaping, connection fees, on/off-site improvements, shell construction or amenities. The percentage of development and impact fees charged by the City may be smaller if all direct and indirect costs are included.

10. On-/Off-Site Improvements

Site improvements in the City consist of those typically associated with development for on-site improvements (street frontage improvements, curbs, gutters, sewer/water, and sidewalks), and off-site improvements caused by project impacts (drainage, parks, traffic, schools, and sewer/water). Because residential development cannot take place without the addition of adequate infrastructure, site improvement requirements are considered a regular component of development of housing within the City and may also influence the sale or rental price of housing. The majority of cost associated with on and off-site improvements is undertaken by the City and recovered in the City's development and impact fees.

The Costa Mesa Municipal Code requires that all abutting public rights-of-way must be fully improved to the full extent possible as required through the Master Plan of Highways, adopted specific plans, or applicable code sections as directed by the Public Services Department. On-site improvements may include, but are not limited to, curbs, gutters, sewers/water, sidewalks, and undergrounding utility lines for housing developments with at least five units. For example, a project may be accompanied by a condition to upgrade an existing sidewalk. Larger multi-family residential developments may also be conditioned to improve an intersection as a response to the change in traffic patterns. The required public improvements standards are used to ensure that the existing roadways adjacent to new residential construction maintain or provide the appropriate right-of-way. Street work permits are required to authorize construction in these areas.

On- and off-site improvements in Costa Mesa do not pose a constraint the development of housing. Although these improvements create an additional cost, they also ensure adequate services and infrastructure for residents and existing uses. In addition, the improvements are site and project specific. A multi-family project may require the addition of a sidewalk at a specific site, while the same project may not in a different location.

Subdivision Improvements

Title 13 Chapter XI of the Costa Mesa Municipal Code establishes on- and off-site improvements required for subdivisions. The Code states that subdividers must agree to improve all land dedicated for streets, highways, public ways, and easements as a condition precedent to acceptance and approval of a final map. The improvements must include grading, surfacing, sidewalks, curbs, gutters, culverts, bridges, storm drains, water mains, and service connections to the property line with cutoff valves, sanitary sewers, and other structures or improvements which may be required by ordinance for the general use of the lot in the subdivision and for local neighborhood traffic and drainage needs.

Subdivision improvements may add development costs for developers. However, these subdivision improvements are consistent with that of neighboring communities. Additionally, all improvements required add to the livability, safety, and resources of future housing units. Such requirements do not pose an unreasonable constraint to development.

11. Building Codes and Enforcement

The City of Costa Mesa's construction codes are based upon the California Code of Regulations, Title 24 that includes the California Administrative Code, Building Code, Residential Code, Electrical Code, Mechanical Code, Plumbing Code, Energy Code, Historical Building Code, Fire Code, Existing Building Code,

Green Building Standards Code, and California Referenced Standards Code. These are considered to be the minimum necessary to protect the public health, safety, and welfare of the City's residents. In compliance with State law, the California Building Standards Code is revised and updated every three (3) years. The newest edition of the California Building Standards Code is the 2019 edition with an effective date of January 1, 2020.

Code enforcement is conducted by the City and is based on systematic enforcement in areas of concern and on a complaint basis throughout the city. The Code Enforcement Division works with property owners and renters to assist in meeting State health and safety codes. The Code Enforcement Division investigates complaints regarding violations of the Costa Mesa Municipal Codes. The City's caseload is complaint-based, and deals with issues such as unpermitted structures, poor property maintenance, debris accumulation, and inappropriate storage of vehicles or materials with the intention and goal of working with the community to help resolve issues through voluntary compliance. On average, there are 1,292 total code enforcement cases generated per year.

12. Local Processing and Permit Procedures

The development community commonly cites the permit processing time as a contributor to the high cost of housing. Depending on the magnitude and complexity of the development proposal, the time that elapses from application submittal to project approval may vary considerably. Factors that can affect the length of development review on a proposed project include the completeness of the development application and the responsiveness of developers to staff comments and requests for information. Approval times are substantially lengthened for projects that are not exempt from the California Environmental Quality Act (CEQA), require rezoning or general plan amendments, or encounter community opposition. Applicants for all permits or reviews are recommended to request a pre-application meeting with the respective department to: confirm City requirements as they apply to the proposed project; review the City's review process, possible project alternatives or revisions; and identify information and materials the City will require with the application, and any necessary technical studies and information relating to the environmental review of the project.

The typical proposal for a single-family or multi-family residential development entitlement review is provided below:

- New single-family residences that comply with development standards are processed through the normal plan check process. Planning staff is the approval body for single-family developments and do not require public hearings.
- New multi-family developments (with 3 or fewer units) that comply with development standards are processed through the normal plan check process. Planning staff is the approval body for these type of developments (staff report written and posted online) and do not require public hearings. Approximate processing time to get to a decision is typically 6–8 weeks; following planning approval, the project would go through normal plan check process.
- New multi-family developments (with 3 or more units) that comply with development standards are processed through the Design Review application process. The Planning Commission is the

approval body for these types of developments, with a public hearing before the 7-member commission. Approximate processing time is 8–12 weeks; following planning commission approval, the project would go through normal plan check process.

All permit applications are first reviewed by City Staff for completeness, and discretionary applications must then receive a recommendation through a staff report prior to a review by the appropriate authority. Various applications may also require public noticing and a public hearing. **Table 3-16** identifies the appropriate review process for each planning permit application.

Table 3-16: Planning Application Review Process

Planning Application	Public Notice Required	Public Hearing Required	Recommending Authority	Final Review Authority	Notice of Decision
Development Review Minor Modification	No	No	None	Planning Division	No
Lot Line Adjustment	No	No	None	Planning Division	No
Administrative Adjustment Minor Conditional Use Permit Minor Design Review Planned Signing Program	Yes	No	None	Zoning Administrator	Yes
Design Review Mobile Home Park Conversion Common Interest Development Conversion Specific Plan Conformity Review Tentative Parcel Map Tentative Tract Map Variance	Yes	Yes	Planning Division	Planning Commission	Yes
Conditional Use Permit Density Bonus Master Plan Master Plan – Preliminary	Yes	Yes	Planning Division	Planning Commission (1)	Yes
Redevelopment Action	Yes	Yes	Planning Commission	Redevelopment Agency	Yes
Rezone	Yes	Yes	Planning Commission (2)	City Council	No
Local Register of Historic Places	No	No	Planning Commission (3)	City Council	Yes
Certificate of Appropriateness	No	No	Planning Commission (3)	Planning Commission (3)	No

Note:
(1) Except where noted otherwise in the Zoning Code.
(2) If located in a redevelopment project area, the Redevelopment Authority is the recommending authority.
(3) Or other commission/committee as designated by the City Council.
Source: City of Costa Mesa Municipal Code Section 13-29. Planning Application Review Process

Table 3-17 shows recent projects which received entitlement approval and the date applicants submitted for building permits. As shown, the gap between planning approval and building submittal ranges from about one week to a little over a year. Applicants may submit for building permits directly after the appeal

period ends (the appeal period is seven days). Timing of submittals is dependent on applicants and may vary based on unique situations unrelated to City processes.

Table 3-17: Residential Project Entitlements			
Application Reference	Entitlement Approval	Building Permit Submittal	Description
DR-18-13	09/10/2018	06/04/2019 (9 months)	Development Review for the construction of a new two-story residence with an attached two-car garage.
DR-18-07	10/02/2018	10/11/2018 (after end of appeal period)	Development Review for the demolition of an existing single-story residence, and the construction of a new, two-story 2,523 sq. ft.
DR-18-12	10/04/2018	11/02/2018 (1 month)	Development Review for a new, two-story single family residence (3,121 sq. ft.) with 4 bedrooms, 4.5 bathrooms and an attached two-car garage.
DR-18-16	01/07/2019	01/22/2019 (2 weeks)	Development Review for the demolition of an existing attached garage structure and 2nd floor deck, to be replaced with a new garage and 425 sq. ft. master bedroom above. Interior work is limited to the 2nd floor master bedroom only
DR-19-03	06/26/2019	08/24/2020 (1 year 2 months) *	Development Review to construct a new two-story residential unit (ADU) which consists of 1 bed, kitchen, family room, parlor and 2 baths. Total square footage is 1,196 sq. ft. Includes a new three car garage.
** The COVID-19 may have played a factor in delay of submitted plans. The City also had to adapt to taking in plans electronically.*			

Between 2017 and April 2022, the Planning Commission reviewed a total of 35 projects proposing 152 total housing units. The average entitlement processing for these projects was an average of 175 days from submittal (less than six months) to final entitlement approval with projects typically being approved in one hearing (only seven of the 35 projects had more than one hearing and none of the projects required more than two hearings). The City's entitlement processing fees are flat rate fees, with any costs associated with project delays resulting from the costs associated with holding the land. All but three of the proposed projects received approval. The following details the reasoning behind the denial of the three projects (eight total units):

- PA-16-68 (March 2017): 2-unit Small Lot Subdivision project
  Project did not meet the Residential Design Guidelines and was not compatible with the surrounding properties due to the large mass and scale of structures, lack of open space, and the side entryway design which resulted in a project closed itself off from the neighborhood.
- PA-16-20/ T-18034 (March 2018): Master Plan for 5-unit live/work development
  Proposed Master Plan does not meet the goals of the General Plan, 19 West Urban Plan and the Zoning Code in terms of design, site planning, integration of uses and structures and protection of the integrity of neighboring development. The project did not comply with live/work development standards such as setbacks and parking standards and the deviations from objective Code

requirements requested by the applicant would have resulted in a project that was inconsistent with the purpose and intent of the General Plan and Urban Plan for the area.

- PA-18-36/ ZA-18-40 (October 2018): Proposal does not meet minimum lot size development standards; applicant requested a Variance for ADU on an R1 property. Variance findings could not be made. ADU development standards have since been modified to remove minimum lot size requirements.

Development Reviews

A Development Review is the processing of a development plan when authority is vested in the Planning Division. The following are subject to development review:

- Single-Story Residential Construction: In the R2-MD, R2-HD, and R3 zones, any single-story construction of 2 or fewer new single-story dwelling units. Exception: New single-story accessory buildings, such as garages or carports, single-story room additions, and other minor construction that comply with all applicable development standards shall not be subject to development review but shall be reviewed by the Planning Division.
- Two-Story Residential Construction: In the R2-MD, R2-HD, and R3 zones, any two-story construction on a lot where there are 2 or fewer dwelling units or any second-story addition on a lot with more than 2 dwelling units that complies with any residential design guidelines adopted by City Council.
- Construction of new buildings or additions to existing buildings in the AP, CL, C1, C2, C1-S, MG, or MP zones. However, building additions that do not exceed 2,000 square feet or 50 percent of the existing building area, whichever is less, and comply with all applicable development standards shall not be subject to development review.
- Lot Line Adjustments.
- Any other uses specified in the City's Zoning Code as requiring development review.

13. Applicable Residential Entitlement Approval Findings

Indicated below are the applicable approval findings specified in the Costa Mesa Municipal Code for various residential project entitlements. In order to reduce processing time, and set clear application expectations, staff is trained to provide developers and applicants guidance for compliance with satisfying required findings. This guidance comes in the form of preliminary application reviews, creating and distributing residential development hand-outs (such as specific Residential Design Guidelines and FAQs), planning counter discussions, providing applicants with examples of successful project application submittals and various other types of staff/applicant assistance. In addition, the Planning Commission is regularly trained on the importance of adequately evaluating project findings and offerings project design modifications/solutions for project approval when the Commission believes that the findings are not being satisfied. As indicated further in this Section, very few residential projects have been denied in the last five years, which is an indicator of success for the aforementioned staff and Planning Commission residential development efforts.

Conditional Use Permit Findings.

- The proposed development or use is substantially compatible with developments in the same general area and would not be materially detrimental to other properties within the area;
- Granting the conditional use permit or minor conditional use permit will not be materially detrimental to the health, safety and general welfare of the public or otherwise injurious to property or improvements within the immediate neighborhood; and
- Granting the conditional use permit or minor conditional use permit will not allow a use, density or intensity, which is not in accordance with the general plan designation and any applicable specific plan for the property.

Design Review Findings.

- The project complies with the City of Costa Mesa Zoning Code and meets the purpose and intent of the residential design guidelines, which are intended to promote design excellence in new residential construction, with consideration being given to compatibility with the established residential community. This design review includes site planning, preservation of overall open space, landscaping, appearance, mass and scale of structures, location of windows, varied roof forms and roof plane breaks, and any other applicable design features;
- The visual prominence associated with the construction of a two-story house or addition in a predominantly single-story neighborhood has been reduced through appropriate transitions between the first and second floors and the provision of second floor offsets to avoid unrelieved two-story walls; and
- As applicable to affordable multi-family housing developments, the project complies with the maximum density standards allowed pursuant to the general plan and provides affordable housing to low or very-low income households, as defined by the California Department of Housing and Community Development. The project includes long-term affordability covenants in compliance with state law.

Master Plan Findings.

- The master plan meets the broader goals of the general plan, any applicable specific plan, and the Zoning Code by exhibiting excellence in design, site planning, integration of uses and structures and protection of the integrity of neighboring development;
- Master plan findings for mixed-use development projects in the mixed-use overlay district are identified in Chapter V, Article 11, mixed-use overlay district; and
- As applicable to affordable multi-family housing developments, the project complies with the maximum density standards allowed pursuant to the general plan and provides affordable housing to low or very-low income households, as defined by the California Department of Housing and Community Development. The project includes long-term affordability covenants in compliance with state law.

In its analysis, Costa Mesa reviewed the approval findings listed above that are applicable to residential projects and found that some contain language which may be interpreted broadly. For example, the first Master Plan finding requires that projects exhibit excellence in design. The master plan process applies to

specific areas of the City where flexibility in development standards is offered through the master plan process due to unique circumstances in the area and to promote revitalization and flexibility necessary to accommodate differing types of residential development within the city. As it is a process used to modify approved development standards, the City reviews development project Master Plans to promote a high quality of life for future residents at all income levels, as well as compatibility with surrounding development. Further, no project has been denied on the basis of not being able to meet these specific findings. Nevertheless, the City understands that approval findings should be clear to applicants and strives to promote quality development within the community. In an effort to further clarify this process, **Program 3S** requires the City to review all findings and revise those findings which are capable of being interpreted broadly, with the goal of improving housing cost, supply, timing of approvals, or approval certainty.

C. Infrastructure Constraints

Another factor that may constrain new residential construction is the requirement and cost to provide adequate infrastructure (major and local streets; water and sewer lines; and street lighting) needed to serve new residential development. In most cases, where new infrastructure is required, it is funded by the developer and then dedicated to the City, which is then responsible for its maintenance. Because the cost of these facilities is generally borne by developers, it increases the cost of new construction, with much of that increased cost often "passed on" as part of home rental or sales rates.

1. Water Supply

The Mesa Water District is responsible for providing safe, local, and reliable water to 110,000 customers in Costa Mesa, as well as some parts of Newport Beach and unincorporated areas of Orange County. Mesa Water pumps water from Orange County's groundwater basin, which is located beneath north-central Orange County between Irvine and the Los Angeles County border and from Yorba Linda to the Pacific Ocean. The groundwater basin derives its water from the Santa Ana River and imported water from the Metropolitan Water District of Southern California. Mesa Water does not depend on other water sources, however, water from Northern California and the Colorado River can be imported as necessary.

In addition to Mesa Water District, a small portion of the City to the east, south of the John Wayne Airport, receives its water from the Irvine Ranch Water District (IRWD). Approximately 50 percent of the IRWD water supply is derived from the Orange County Groundwater Basin. The remaining amount comes from recycled water (23 percent) and potable water imported from MWD (27 percent).

2. Water Production

The independent special district pumps, treats, and delivers about 5 billion gallons of drinking water to homes and businesses per year. The system includes 317 miles of pipeline, 7 wells, 2 reservoirs and the Mesa Water Reliability Facility (MWRF/ "Murph"). The MWRF features 2 deep-water wells, a million-gallon reservoir and nanofiltration technology for water treatment. [1]

[1] Mesa Water District

3. Water Quality

Mesa Water provides safe, drinking water to the community and is considered the most efficient water provider of the 10 Orange County water districts. The water is naturally filtrated through sand and gravel as the Orange County groundwater basin is replenished from the Santa Ana River. Before it enters the distribution system, the water is treated and disinfected with chloramines, which include chlorine and ammonia. In addition to the groundwater, Mesa Water also uses source water from the MWRF, which is safe to drink prior to treatment but has an amber tint. Nanofiltration technology is used to remove the tint prior to adding it to the water supply. [1]

In the event of an emergency, Mesa Water would be provided with water from the Municipal Water District of Orange County (MWDOC), which sources its water from the State Water Project and the Colorado River. The imported water is filtered at Metropolitan's Diemer and Weymouth Filtration Plants where the water is also disinfected with chloramines.

According to Mesa Water District and the City of Costa Mesa Conservation Element, access to water does pose a constraint to the development of housing in the City. Mesa Water District has adopted and regularly updates an Urban Water Management Plan in order to ensure an adequate supply of water for the following 5 years, and the District continuously maintains the reservoir, water mains, and wells. Through continued community outreach and water conservation strategies, the City and the District are able to conserve more water than before – customers have reduced their water usage by 20 percent since 2015[2].

4. Wastewater

Wastewater includes used water, solids, storm water, surface water, groundwater infiltration, and used water from industrial processes, which flows to a treatment plant. Costa Mesa Sanitary District (CMSD) oversees 224.2 miles of gravity sewer mains and, as of 2019, a total of 47,471 connections to single-family residences, multi-family residences, commercial properties, and industrial properties. The District continuously cleans the collection system and uses closed circuit televising (CCTV) to identify problems and ensure quick maintenance. Twenty (20) sewer pumps are located throughout the collection system to maintain gravity flow and continuously report data to the headquarters. Standby generators and bypass pumps are also used in case of emergency. Wastewater collected by CMSD is sent to and treated at the Orange County Sanitation District (OCSD)[3].

Wastewater does not pose a constraint on the development of housing in the City. Given the sufficient infrastructure, access to services, and continuous maintenance, CMSD is confident it can continue to serve the Costa Mesa community through the addition of more housing. Furthermore, CMSD has developed a Sewer Management Plan which ensures the District avoids sewage spills and maintains adequate facilities.

5. Fire and Emergency Services

The City of Costa Mesa's Fire & Rescue Department aims to protect life, property, and the environment using highly trained professionals committed to service excellence. Across six fire stations and City Hall, the

[2] Mesa Water District

[3] Costa Mesa Sanitary District

Department has 94 full-time employees, 84 sworn positions, ten non-sworn positions, and the equivalent of one full-time position with part-time staff to provide 24-hour protection and response to the community's residents, businesses, and visitors. The Costa Mesa Fire & Rescue Department is an "all-risk" and “all-hazard” organization.

Fire Administration Division

The Fire Administration Division provides direction for strategic, operational, and emergency planning through the following:

- Establish policies and procedures;
- Coordinate internal functions of all divisions, programs, and external functions with other City departments and community organizations;
- Develop and manage the budget;
- Coordinate ordering and purchasing;
- Manage the Department's human resources;
- Coordinate additional functions and performs duties as delegated by the City Manager or the City Council;
- Continue to manage and safeguard the City’s rights for local control, including the Emergency Medical Services (EMS) system, as expressly guaranteed by the Health & Safety Code Section 1797.201.

Operations Division

This Division manages Fire, Rescue, and Emergency Medical Services and maintains constant readiness to answer calls for assistance. The Division is tasked with responding to fire, rescue, and environmental emergencies that threaten life, health, and property. The Division also provides fire cause and origin determinations, life and safety inspections, and educational programs. To support these services, the Division offers the following services: emergency planning, communications, training and education, equipment maintenance and repair, supplies, records, and quality control.

Community Risk Reduction Division

This Division works to prevent and reduce risks to the community by enforcing protections standards and fire and life safety codes through fire prevention, planning, and code enforcement. The Department achieves such goals by doing the following:

- Reviewing building construction plans;
- Conducting building construction and business inspections;
- Investigating citizen complaints;
- Monitoring the City's hazardous materials disclosure program as Certified Unified Program Agency (CUPA) liaison to the Orange County Environmental Health Division;
- Providing training to department personnel regarding fire and life safety codes; and
- Assisting professional trades with technical fire code requirements and department public education efforts.

Community risk reduction and fire prevention strategies are critical components for new development projects and throughout the life of the building. During the entitlement and pre-construction phases of a new building or tenant improvement project, the CRR team applies the California Fire Code (CFC) and locally adopted amendments to building and fire system plan review to ensure conformance to state and international standards. Once plans are reviewed and approved and building permits are issued, Fire Protection Specialists perform technical inspections and acceptance tests of fire protection systems and building construction for Fire & Life Safety compliance. After the Certificate of Occupancy is issued for a new building or tenant improvement, Annual Operational Fire Permits are issued based on the hazard of the use, and Company Inspections are conducted to complete emergency response pre-planning operations and verify ongoing compliance with the CFC.

Fire and Emergency Services provide sufficient services which would not cause a strain on the Department's ability to respond to community emergencies. The City recognizes in its General Plan Safety Element that additional emergency services and funding will be required as the population ages and additional residents and employees come to the City; however, this is addressed and maintained in the Safety Element's goals and policies. The existing six facilities are spread out throughout the City in such a way to provide the fastest service possible; the Department aims to respond to at least 80 percent of emergency calls within 5 minutes. In addition, no part of Costa Mesa lies within a State Responsibility Area (SRA), which indicates a fire hazard area, nor the very High Fire Severity Zone[4].

6. Police Services

The Police Department is tasked with protecting life and property while preserving the peace. As of 2020, the department has 215 full-time positions, of which 138 are sworn and 77 are professional staff. Full-time staffing is composed of 13 management positions, 32 supervisory, and 170 line-level positions. Part-time staffing consists of 21.21 full-time equivalents. The department is comprised of three divisions and each division is further split into bureaus and units.

The three divisions are as follows:

- Police Administration
- Police Field Operations
- Police Support Services

Administration Division

The Administration Division is responsible for the department's overall direction and planning with input from other divisions; provides advice to the city manager and the City Council on public safety issues; manages the department budget and financial planning; oversees the department's Volunteer Program and Citizens' Academy through the Crime Prevention Unit; maintains and updates the department's policy and procedures manual; coordinates and disseminates information to the media; provides internal investigation services through the Professional Standards Unit; and supervises training and recruitment. Administration is comprised of the following bureaus and units:

[4] Costa Mesa Safety Element

- Professional Standards
- Public Affairs & Crime Prevention
- Training & Recruitment
- The Office of Emergency Management (OEM)

Field Operations Division

The Field Operations Division provides public safety services through both geographic-based and community-oriented policing. In January 2008, the Costa Mesa Police Department (CMPD) implemented geographic-based policing, which divided the City into two areas, based upon calls for service and geographical boundaries. Each area is overseen by a lieutenant who is the designated area commander for either Area 1 or Area 2. The area commanders are responsible for the delivery of police services to the communities within the designated geographical area. Field Operations is comprised of three bureaus:

- Patrol Services
- Traffic Safety
- Field Operations Administration

Within the three bureaus, there are various specialized units that provide specific police services. They include Patrol, Traffic Safety, Community Policing Unit, South Coast Plaza Detail, K9 Unit, Reserve Program and Park Rangers.

Support Services Division

The Support Services Division is responsible for specialized investigations and provides essential logistical support services to the Police Department. It is responsible for computer-related activities associated with the 24-hour operation of the City's public safety computer system; and responsible for the research and development of numerous programs, including safety equipment, new laws and regulations, and policy development. Support Services is comprised of the following bureaus:

- Investigative Services Bur
- Records and Evidence
- Telecommunications

The City contracts with G4S Secure Solutions (USA) Inc. for jail services and the City of Huntington Beach for airborne law enforcement services.

D. Environmental Constraints

The City of Costa Mesa contains a variety of natural landscapes and environmental features, which may cause constraints to the development of housing. The City is located approximately one mile from the Pacific Ocean, directly alongside the Santa Ana River, and atop an uplifted mesa. As with most of California cities, the City of Costa Mesa sits along major fault lines. In total, the City is susceptible to a variety of environmental hazards that could affect housing, including fires, flooding, and geological and seismic hazards. However, no known environmental or other conditions pose a constraint to or preclude development of housing on identified sites during the planning period.

1. Geologic and Seismic Hazards

According to the Costa Mesa Safety Element of the General Plan, geologic risks are defined as those associated with geological hazards such as seismically induced surface rupture, ground shaking, ground failure, tsunamis, seiches and dam failure, and slope instability leading to mudslides, landslides, and subsidence. The specific geological hazards that may affect the development of housing the City are detail below.

2. Mineral Resources

The City is located over portions of the West Newport Oil Field, particularly on the west side. The Safety Element of the General Plan identifies 15 active oil wells located west of Irvine Avenue, east of the City boundary with Huntington Beach, north of 16th Street, and south of Baker Street. Another 132 oil wells exist in the City; however, they are either plugged and abandoned, idle, or buried.

In addition to oil, peat deposits have been found adjacent to the Santa Ana River. While the quantity does not justify extraction, it is an unstable base for construction and requires removal prior to development. This may create a constraint to the development of housing as it creates additional costs to remove the peat deposits.

3. Seismic Hazards

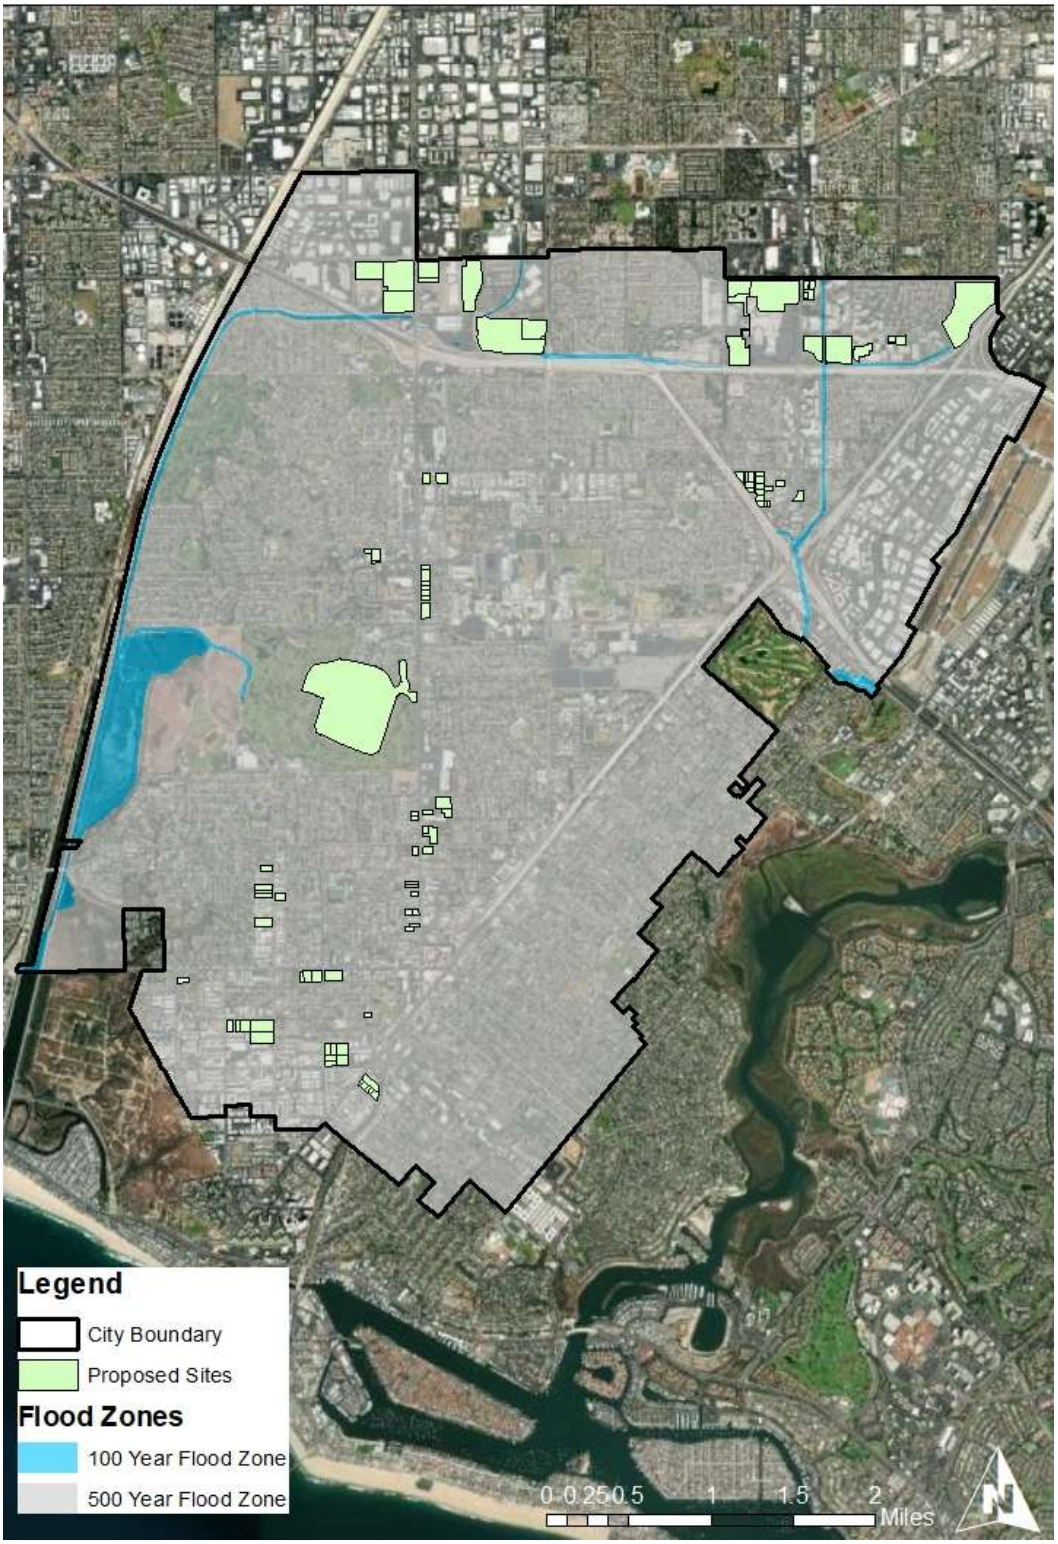
The City of Costa Mesa is located near several active earthquake faults such as the Newport-Inglewood Fault Zone and the San Joaquin Hills Fault Zone, which would prove the most damaging to the City in the event of an earthquake. Other faults such as the San Andreas, Whittier, Elsinore, Palos Verdes, and Puente Hills Faults are located further away and would potentially cause less direct damage to the City's infrastructure, depending on the magnitude of the quake. The Safety Element notes indirect impact to the City resulting from a severe quake of one of these faults, particularly the San Andreas Fault, includes the need to provide aid, an infusion of households seeking housing, and mass care and sheltering services.

The General Plan Safety Element defines ground shaking as resulting from seismic activity which may be intensified depending on the recorded magnitude and duration of the quake, proximity to the ruptured fault, and the presence of deeper soft soils below the ground surface. The Newport-Inglewood Fault runs directly through the City; the largest quake from this fault was in 1933 at a recorded magnitude of 6.3 on the Richter scale. The San Joaquin Hills Fault is located near Huntington Beach and it is estimated a rupture of this blind thrust fault could result in a magnitude 7.3 quake. The third most likely seismic hazard to the City of Costa Mesa is from the San Andreas Fault, which is expected to produce a magnitude 6.8 to 8 quake in the near future. While the fault is located approximately 48 miles from the City, a quake from the fault may result in simultaneous ruptures of nearby faults. The Safety Element notes a major earthquake occurs on this zone approximately every 145 years; 2002 marked 145 years since the last major rupture.

Given the extent of seismically active areas in California, any new residential structures will face potential hazards. The location of the City of Costa Mesa on relatively flat land improves enable it to provide a safer location for development in comparison to neighboring cities with steep slopes or along the Pacific Ocean.

Therefore, seismic activity in Costa Mesa does not create a burden or constraint to the development of housing.

4. Flood Hazards



The City of Costa Mesa and surrounding areas are, like most of Southern California, subject to unpredictable seasonal rainfall, and every few years the region is subjected to periods of intense and sustained precipitation that result in flooding. Flooding can be a destructive natural hazard and is a recurring event. A flood is any relatively high streamflow overtopping the natural or artificial banks in any reach of a stream. The City of Costa Mesa's Safety Element Identifies 100-year and 500-year flood zones in the City. Federal Emergency Management Agency (FEMA) flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. Each zone reflects the severity or type of flooding in the area.[5] The 100-year flood zone are areas with a one percent annual chance of flooding, the 500-year flood zones are areas with a 0.2 percent annual chance of flooding. The City's Safety Element cites 100-year floods as potentially having low impacts on the City with minimal flooding in the channels adjacent to Talbert Nature Preserve. A 500-year flood would pose flooding dangers to the northern and western boundaries of the City.

With increased development, there is also an increase in impervious surfaces, such as asphalt. Water that used to be absorbed into the ground becomes runoff to downstream areas. However, various flood control measures help mitigate flood damage in the City, including reservoirs in the San Joaquin Hills and Santa Ana Mountain foothills, and channel alterations for the Santa Ana River. These structures help regulate flow in the Santa Ana River, San Diego Creek, and smaller streams and hold back some of the flow during intense rainfall period that could otherwise overwhelm the storm drain system in Costa Mesa.

Figure 3-2 illustrates the flood zones within the City of Costa Mesa in relation to the proposed sites selected for future housing. There are two housing sites that are adjacent to a 100-year flood zone channel running between the two sites. The majority of the sites are located within the 500-year flood zone. The 500-year flood zone is considered an area of minimal flood hazard and does not present a constraint on the development of housing as the sites are located within an existing developed context. Additionally, all housing sites are serviced by the City's emergency services.

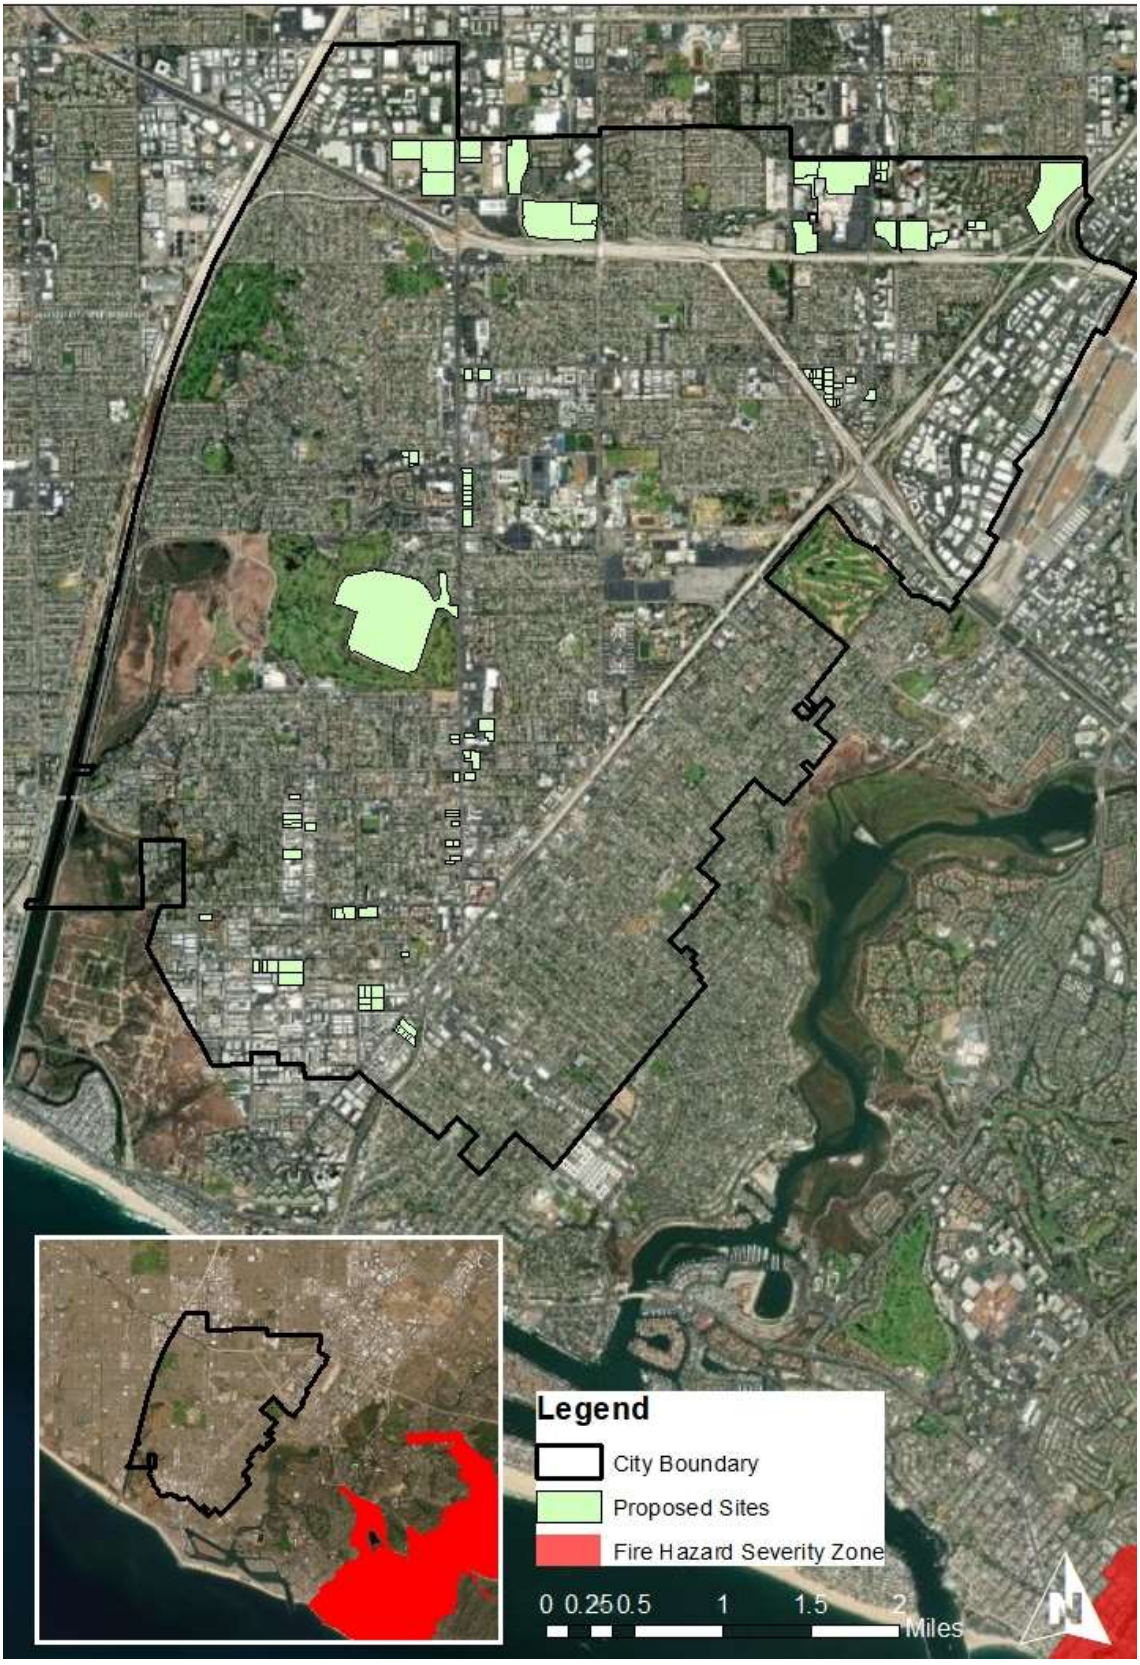
Figure 3-2: Flood Zones and Identified Sites Map

Sources: FEMA, Flood Zones SCAG, published by Southern California Association of Governments, 2019, accessed December 2021.

5. Dam Inundation

Costa Mesa and numerous other Orange County cities are protected from flooding by both the Santiago Creek Dam and the Prado Dam. The Santiago Creek Dam serves to protect from flooding of the Irvine Lake, approximately 15 miles from the City. While it historically provided irrigation for agriculture, the water is now protected within the reservoir and downstream flow only occurs from seepage and storm water. The Prado Dam is located approximately 30 miles from the City and is continuously improved and maintained by the U.S. Army Corps of Engineers. Recent improvements to the dam have added 190 years of protection. However, should failure occur to either of the dams, flooding would likely occur in the northern and western portions of the City. Such a flood would cause varying degrees of damage to structures north of the San Diego Freeway (I-405) and up to approximately one-mile east of the Santa Ana River. The threat of flooding in these areas due to dam failure is a constraint on the development of housing.

6. Sea Level Rise



Sea level rise is an important consequence of anthropogenic climate change – resulting from human activity – to coastal communities. Sea level rise may affect Costa Mesa through flooding in low-lying areas, water infiltration into sanitary sewer and storm drain systems, and earthquake-induced tsunami flooding. The City's location along the Santa Ana River places it at risk of these impacts; the City's Safety Element identifies areas to the west of the City, near Talbert Regional Park and Fairview Park, that will become inundated by unimpeded Pacific coastal flooding under a scenario of 100-year flood with a 55-inch (1.4 meters) sea level rise. A 100-year flood risk does not pose significant risk to developments in the City and would likely result in flooding within the channels adjacent to the Talbert Nature Preserve; however, a 500-year flood event would cause significant flooding in the northern and west regions of the City and therefore poses a minimal constraint on housing development. The potential hazard is minimal as the chances of a 500-year floor occurring each year is 0.2 percent.

7. Fire Hazards

The Costa Mesa Safety Element determines the fire hazard severity of an area by the amount and type of vegetation, slope gradient, and weather. Wildfires are particularly prone during late summer and early fall, and during Santa Ana wind events. The Department of Forestry and Fire Protection (Cal Fire) does not list any area within Costa Mesa as a Very High Fire Hazard Severity Zone. The most likely fire risk within the City comes from urban and grassland fires in open spaces, such as Talbert Regional Park. A direct threat from fire is not a significant risk for housing development in Costa Mesa; poor air quality from local and State fires, however, may pose significant health risks to the Costa Mesa population.

Figure 3-3 maps the fire hazard severity zones identified within the City in relation to the proposed sites for future housing. Based on the map there are no fire hazard severity zones within the City of Costa Mesa. As there are no fire hazard severity zones identified within the City, fire is not considered a major hazard or constraint to the development of housing.

Figure 3-3: Fire Hazard Severity Zones and Proposed Sites

E. Affirmatively Furthering Fair Housing (AFFH)

Beginning January 1, 2019, AB 686 established new requirements for all California jurisdictions to ensure that local laws, programs, and activities affirmatively further fair housing. All Housing Elements due on or after January 1, 2021, must contain an Assessment of Fair Housing (AFH) consistent with the core elements of the analysis required by the federal Affirmatively Further Fair Housing Final Rule of July 16, 2015.

Fair housing is a condition in which individuals of similar income levels in the same housing market have like ranges of choice available to them regardless of race, color, ancestry, national origin, age, religion, sex, disability, marital status, familial status, source of income, sexual orientation, or any other arbitrary factor. Under State law, affirmatively further fair housing means "taking meaningful actions, in addition to combatting discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. These characteristics can include, but are not limited to race, religion, sec, marital status, ancestry, national origin, color, familiar status, or disability.

The Analysis of Impediments to Fair Housing Choice (Impediments Analysis), prepared for the County of Orange, examines local housing conditions, economics, policies, and practices in order to ensure that housing choices and opportunities for all residents are available in an environment free from discrimination. The (Impediments Analysis) assembles fair housing information, identifies any existing impediments that limit housing choice, and proposes actions to mitigate those impediments. The Regional (Impediments Analysis) examines fair housing issues in the County's unincorporated areas and cooperating cities from 2020 to 2024, it includes additional fair housing issues and data for the City of Costa Mesa.

1. Needs Assessment

The (Impediments Analysis) contains a Countywide analysis of demographic, housing, and specifically fair housing issues in the City of Costa Mesa. The City's demographic and income profile, household and housing characteristics, housing cost and availability, and special needs populations were discussed in the previous Chapter 2: Community Profile.

Analysis of Impediments Outreach FY 2019-2024

As a part of the Regional Analysis for the County, a series of outreach workshops and events were hosted, including the following:

- Outreach by the Lawyers' Committee to tenants, landlords, homeowners, fair housing organizations, civil rights and advocacy organizations, legal services provers, social services providers, housing developers, and industry groups;
- Stakeholder and focus group meetings organized by the Lawyers' Committee in Mission Viejo, Westminster/Garden Grove, Santa Ana, and Fullerton;
- Community meetings across Orange County with additional outreach to members of protected classes, including the Latino and Vietnamese communities; and
- Virtual public hearings and City Council meetings.

Of the fair housing impediments listed in the Regional AI, the City of Costa Mesa was identified as experiencing the following local contributing factors as impediments to fair housing choice:

- Housing Discrimination
- Racial and Ethnic Segregation
- Unfair Lending
- Overcrowding

Local contributing factors are detailed further below in Section E.4 "Assessment of Contributing Factors to Fair Housing."

Fair Housing Issues

Within the legal framework of federal and state laws and based on the guidance provided by the HUD Fair Housing Planning Guide, impediments to fair housing choice can be defined as:

- Any actions, omissions, or decisions taken because of age, race, color, ancestry, national origin, age, religion, sex, disability, marital status, familial status, source of income, sexual orientation, or any other arbitrary factor which restrict housing choices or the availability of housing choices; or
- Any actions, omissions, or decisions which have the effect of restricting housing choices or the availability of housing choices on the basis of age, race, color, ancestry, national origin, age, religion, sex, disability, marital status, familial status, source of income, sexual orientation, or any other arbitrary factor.

As a part of the 2019-2024 AI, the County identified fair housing impediments including the following:

- Housing Discrimination
- Reasonable Accommodations
- Density Bonus Incentive
- Zoning
- Affordable Homeownership
- Racial and Ethnic Segregation
- Unfair Lending
- Discriminatory Advertising
- Cost Burden
- Accessibility

Fair Housing Laws

All jurisdictions across California are subject to a number of fair housing laws. The following section details how the City of Costa Mesa maintains compliance with the listed laws. More specific laws are detailed throughout this Chapter 3 (such as Senate Bill 330 and Assembly Bill 686), and programs in the Housing Plan specify which Legislature is addressed.

- **California Fair Employment and Housing Act (FEHA):** The FEHA provides employees with protection from discrimination, retaliation, and harassment in employment, as well as protects tenants or homeowners from discrimination from landlords, real estate agents, home sellers, builders, and mortgage lenders. The City reviews fair housing complaints and lending patterns – details on both are provided within this Affirmatively Furthering Fair Housing section. The City also implements and updates programs to promote fair and equal access to housing. Lastly, the City continues to review standards and requirements that may constrain equal access to housing and the development of affordable housing.
- **Government Code Section 65008:** This Legislature protects lower- and moderate-income households and persons experiencing homelessness from discrimination that inhibits affordable

units and emergency shelters. The following programs address the development of affordable units and emergency shelters: Programs 2B, 2J, 4A, 4B, 4C, 4E, and 4F.

- **Government Code Section 8899.50:** This Legislature establishes the requirement for jurisdictions to administer programs and activities that affirmatively further fair housing. Program 4A establishes actions the City will commit to throughout the 6th Planning Cycle to affirmatively further fair housing.
- **Government Code Section 11135:** This legislation protects residents of the State of California from discrimination on the basis of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, or sexual orientation. Through the Housing Element, the City assesses potential constraints that inhibit all residents from accessing housing and resources. The Housing Plan contains a number of programs that provide for greater access to a variety of housing types for all income levels, promotion of information and resources to special needs groups, and continued review of City permits and processing for streamlining and removal of constraints.
- **Government Code Section 65863 (No-Net-Loss Law):** This Legislature establishes guidance on No-Net-Loss requirements. Jurisdictions are required to maintain adequate sites to accommodate its RHNA at each income category throughout the entirety of the Planning Cycle. Program 3A is included to address the requirements of this Legislature.
- **Density Bonus Law:** The City has an adopted Density Bonus Ordinance. Program 2I is included in the Housing Plan to ensure the Ordinance maintains compliance with State Density Bonus Law. Chapter 3.B.2 provides details on incentives and concessions granted to qualifying projects through the Density Bonus Ordinance.
- **Housing Element Law:** All California jurisdictions are required to adequately plan for the needs of their current and future population. All policies and programs included in the Housing Plan are included to maintain compliance with all California housing laws and to comply with the California State Department of Housing and Community Development's requirements for Housing Elements.

Lending Patterns

Availability of financing affects a person's ability to purchase or improve a home. The analysis of the lending patterns and practices within a community or city help to identify persons who regularly experience disproportionate roadblocks to home ownership. Table 3-18 below identifies the lending patterns by race and ethnicity, as well as income category for the Anaheim-Santa Ana-Irvine MSA. According to the data, applicant in the highest income category were more likely to have a loan approved, compared to applicants in the lower income categories where approval rates were consistently under 55 percent. Additionally, within each income category, applicants who identified as White consistently had higher rates of approval than applicant of color. Overall, applicants who identified as Native Hawaiian/Pacific Islander, American Indian/Alaska Native, and Black/African American had the lowest rates of loan approval in all income categories.

Table 3-18: Disposition of Loan Applications by Race/Ethnicity– Anaheim-Santa Ana-Irvine MSA				
Applications by Race/Ethnicity	Percent Approved	Percent Denied	Percent Other	Total (Count)
LESS THAN 50% OF MSA/MD MEDIAN				
American Indian and Alaska Native	26.2%	52.3%	23.1%	65

Hate Crimes

Hate crimes are violent acts against people, property, or organizations because of the group to which they belong or identify with. The Federal Fair Housing Act makes it illegal to threaten, harass, intimidate, or act violently toward a person who has exercised their right to free housing choice. In Orange County, there were a total of 9 hate crimes reported in 2019. Table 3-19 below identifies the reported hate crimes in Costa Mesa between 2014 and 2019. Data for hate crimes reported in Costa Mesa was not available by bias for the years 2014-2016 and 2018. However, in 2017 and 2019 a total of 5 hate crimes were reported in the City, all of which were motivated by race, ethnicity, or ancestry.

Table 3-19: Reported Hate Crimes by Bias Motivation for City of Costa Mesa (2014-2019)

Year	Race/Ethnicity/ Ancestry	Religion	Sexual Orientation	Disability	Gender	Gender Identity	Total
2014	NA	NA	NA	NA	NA	NA	0
2015	NA	NA	NA	NA	NA	NA	0

Fair Housing Enforcement and Outreach Capacity

The City of Costa Mesa utilizes the Fair Housing Foundation. The Fair Housing Foundation was formed in 1964 to support and promote freedom of residence through education, advocacy, and litigation, to ensure that all persons have the opportunity to secure safe and decent housing that they desire and can afford. The Fair Housing Foundation is dedicated to eliminating discrimination in housing and promoting equal access to housing choices for everyone.

The City of Costa Mesa has identified the following goals regarding fair housing in collaboration with the Fair Housing Foundation:

- Provide fair housing education and information to apartment managers and homeowner associations on why denial of reasonable modifications/accommodations is unlawful.
- Conduct multi-faceted fair housing outreach to tenants, landlords, property owners, realtors, and property management companies. Methods of outreach may include workshops, informational booths, presentations to community groups, and distribution of multi-lingual fair housing literature.

There are no current fair housing lawsuits within Costa Mesa. The City analyzed data from the Costa Mesa Fair Housing Action Plan from the 2016/2017 reporting period to 2020/2021 and found the following relating to outreach and engagement, property management trainings, fair housing issues, and fair housing allegations as well as how they were resolved:

Fair Housing Action Plan 2016/2017 Summary:

- The Fair Housing Foundation (FHF) conducted 2 tenant & 2 landlord workshops.
- FHF conducted 2 certificate property managers training.
- FHF provided fair housing related serves to 204 unduplicated households: 77.5% of calls came from tenants, 6.4% from property owners & 5.4% from landlords/managers.
- FHF addressed 230 housing issues; top 3 issues were habitability (21%), notices (27%) & lease terms & rent increase (tied at 8% each).
- 18 fair housing allegations were received by FHF regarding mental & physical disability (14) familial status (3), race (2) & gender (1). 11 allegations were resolved via counseling & 7 cases opened; no evidence was found to sustain 4 allegation, 1 investigation was inconclusive, 1 allegation was sustained & 1 case is pending.
- FHF provided over 4,600 pieces of fair housing literature in English, Spanish and Vietnamese.

Fair Housing Action Plan 2017/2018 Summary:

- The Fair Housing Foundation (FHF) conducted 2 tenant & 2 landlord workshops.
- FHF conducted 2 certificate property managers training.
- FHF provided fair housing related serves to 206 unduplicated households: 82.5% of calls came from tenants, 4.9% from property owners & 5.8% from landlords/managers.
- FHF addressed 241 housing issues; top 3 issues were notices (22%) habitability (20%) & deposits (12.5%).
- 12 fair housing allegations were received by FHF regarding mental & physical disability (10) familial status (1) & race (1). 7 allegations were resolved via counseling & 5 cases opened; no evidence was found to sustain 2 allegations 1 investigation was inconclusive & 1 case is pending.
- FHF provided over 3,700 pieces of fair housing literature in English, Spanish and Vietnamese.

Fair Housing Action Plan 2018/2019 Summary:

- The Fair Housing Foundation (FHF) conducted 1 tenant & 1 landlord workshop.
- FHF conducted 1 certificate property managers training.
- FHF provided fair housing related serves to 178 unduplicated households: 86.0% of calls came from tenants, 2.8% from property owners & 3.9% from landlords/managers.
- FHF addressed 198 housing issues; top 3 issues were habitability (27%), notices (21%) & deposits (9%).
- 19 fair housing allegations were received by FHF regarding mental & physical disability (14), gender (1), race (2), national origin (1), & sexual orientation (1). 16 allegations were resolved via counseling & 3 cases opened; no evidence was found to sustain 1 allegation. Allegations were sustained in 2 cases and resolved through conciliation and education.
- FHF provided over 1,600 pieces of fair housing literature in English, Spanish and Vietnamese.

Fair Housing Action Plan 2019/2020 Summary:

- The Fair Housing Foundation (FHF) conducted 1 Fair Housing Workshop.
- FHF provided fair housing related serves to 153 unduplicated households: 91.5% of calls came from tenants, 3.2% from property owners & .6% from landlords/managers.
- FHF addressed 167 housing issues; top 3 issues were habitability (22.1%), notices (14.3%) & lease terms (8.9%).

- 14 fair housing allegations were received by FHF regarding mental & physical disability (12), national origin (1), & familial status (1). 11 allegations were resolved via counseling & 3 cases opened; no evidence was found to sustain 1 allegation. Allegations were sustained in 2 cases and resolved through conciliation and education.
- FHF provided over 2,803 pieces of fair housing literature in English, Spanish and Vietnamese.

Fair Housing Action Plan 2020/2021 Summary:

- The Fair Housing Foundation (FHF) conducted 5 Fair Housing Workshop.
- FHF provided fair housing related serves to 173 unduplicated households: 82.6% of calls came from tenants, 1.7% from property owners & 7.5% from landlords/managers.
- FHF addressed 183 housing issues; top 3 issues were habitability (15.3%), eviction (14.7%) & notices (10.9%).
- 21 fair housing allegations were received by FHF regarding mental & physical disability (10), Age (1), Gender (1), Martial Status (1), national origin (2), familial status (1), Race (4), Source of Income (1). 13 allegations were resolved via counseling & 8 cases opened; no evidence was found to sustain 4 allegations. Allegations were inconclusive in 1 case, allegations were sustained in 3 cases and resolved through conciliation.
- FHF provided over 2,812 pieces of fair housing literature in English, Spanish and Vietnamese.

As noted, the City tracks fair housing cases reported as well as how they were resolved (if resolved) annually through completion of the City of Costa Mesa Fair Housing Action Plan. In addition, as the City updates its Specific Plans, additional outreach will occur to collect feedback from the community and identify rehabilitation and enforcement needs and priorities.

2. Analysis of Federal, State, and Local Data and Local Knowledge

Summary of Local Data

As a part of the Housing Element Update for 2021-2029, the City of Costa Mesa implemented a thorough and expansive outreach program. The program intended to gather a deeper understanding of housing concerns and issues, challenges, and opportunities to housing, and gain insight and feedback from residents and the community on housing in Costa Mesa. As a part of the outreach program, the City hosted the following:

- Virtual townhall community meeting #1 – November 18, 2020
- Online community survey – November 19, 2020
- Subject matter expert meetings – February 9-11, 2021
- District specific meetings – February 18 and 18, 2021
- Targeted focus group meetings – throughout the update 202-2021
- Virtual townhall community meeting #2 – September 2, 2021

During the outreach program the City gathered input and ideas from the public. Key feedback or concerns related to fair housing, which were identified during engagement, include the following:

- Accessory Units should be affordable to lower income households
- The City needs more housing
- There should be more bike lanes to support active transportation
- Housing should be focused on increasing quality of life for residents

- More education about affordable housing to increase public awareness and public opinion
- Need supportive services along with housing
- Overcrowding often occurs and there need to be opportunity for multigenerational living
- Senior housing should be prioritized, followed by housing for persons with disabilities
- More affordable housing near transit and jobs
- Overall need for more affordable housing for residents of Costa Mesa, both for renters and owners

In addition to the fair housing and housing accessibility related concerns, a large percentage of residents were not interested in increasing the housing stock in Costa Mesa. Many residents identified a desire and interest to keep Costa Mesa lower density for single-family homes, a disinterest in ADUs and objections to growth in affordable housing stock.

Historical Impediments to Local Housing Choices and Mobility

Local impediments to housing choices and mobility have been considered as a part of the Housing Element Update for 2021-2029. For example, the City's previous land use and zoning provisions include certain regulations that are considered restrictive in regard to increasing the development of housing units in the City. The City's parking standards for multi-family development requires parking relating to "tenant covered parking," "tenant open parking" and "guest parking," and in certain bedroom configurations, the City's multi-family parking standards require up to four parking spaces per unit (Housing Program 2M is included to "review and revise the Zoning Code's requirements for residential off-street parking for multi-family projects to facilitate the development of multi-family housing, and specifically affordable housing.") Additionally, the City's adopted Specific Plans and Urban Plans include density standards that if increased would allow for greater housing choices in the City and housing located closer to job centers (Housing Program 3C and 3D have been included to amend the City's specific plan and urban plans to increase densities to meet that City's RHNA). Also, in 2016, residents of Costa Mesa voted to pass Measure Y: An Initiative to Require Voter Approval on Certain Development Projects. One of the provisions of this measure requires voter approval for changes in zoning and/or land use that would increase housing within an area by 40 or more residential units. Such a vote may discourage developers from pursuing housing development projects and particularly affordable housing projects (the Housing Element includes Program 3G to take steps to identify and address specific ways in which the City-wide vote process functions as a constraint to housing compliance, the City's housing goals, and other shared community goals).

Lastly, the City has focused in the past on transportation investments related primarily to mobility of single-occupant vehicles (SOVs) instead of multi-modal transportation which available generally to all demographic segments. However, the City now focuses on multi-modal circulation investments such as transportation projects related to traffic calming to increase pedestrian and bike safety, and enhancements to existing sidewalks and the provision of new sidewalks and bike paths and facilities to encourage walkability/bikability in the City.

Past Community Development Action Analysis - Urban Plan Development

As the Costa Mesa community has changed over time from a primarily suburban community within larger Orange County to a mixed use community that includes urban, semi-urban and suburban neighborhoods, the City began to modify its land use plans and zoning to promote mixed use, mixed income walkable residential communities. The first overlay districts, adopted by the City in April 2006, were the SoBECA Urban Plan district and three Westside Residential Urban Plans. These plans served as "overlay zones" and

established provisions for mixed-use development and residential development in the mixed-use overlay areas. The Urban Plans resulted from the collaboration of a 40-member Westside Revitalization Oversight Committee (WROC) appointed in 2003 by the City Council. The Urban Plans followed previous efforts to revitalize the Westside and create an artist village around Bristol Street by other committees.

The intent of the various Westside Urban Plans was to provide an incentive for redevelopment of marginal commercial and industrial properties in an area of the City that was closest to the beach. The 19th West and Mesa West Bluffs plans were developed to provide for a variety of land uses such as mixed use, live/work and residential lofts and to create ownership opportunities on the Westside.

The Mesa West Residential Ownership Overlay was intended to redevelop older rental residential structures with new ownership properties. The overlay allowed for development up to the High Density Residential General Plan capacity regardless of the residential zoning and to allow development up to three-stories in height.

The SoBECA overlay was intended to allow a mix of housing, eclectic retail/service, creative studios and entertainment/restaurant uses that attract local residents and visitors.

Since 2006, the majority of projects in the Westside of the City have been approved under the Urban Plans/overlay districts. Over time, some concerns have been expressed that development under the urban plans has changed the character of neighborhoods and encouraged new development that in some cases removed and replaced existing older housing stock with residential ownership opportunities that were less affordable to existing residents of the area. There is a perception that this has resulted in increased property values limiting the opportunity to consolidate smaller parcels into larger development lots. While much of the development pursuant to the urban plans in the last decade replaced industrial uses and resulted in remediation of a number of brownfield sites, concerns have, nonetheless, arisen regarding the concept of these Urban Plans. The following are concerns that have been expressed regarding implementation of the Urban Plans/overlay districts and potential actions to address these concerns:

Table 3-20: Feedback on the Implementation of the Urban Plans/Overlay Districts

Concern	Remedial Action
Increased density and proximity to single family residences	Modify the boundaries to allow an appropriate transition between the overlay zones and R1 zones
Limited open space / park access	The 2015 amendment requires a minimum of 30-percent open space and inclusion of common recreational areas to promote quality living environments
No variety in products (all 3-4 stories with multiple living levels - not conducive to all ages)	Modify standards to require a mix of two-story and three-story product types
Parking - live/works are used as residential uses but with less parking	Increase guest parking requirement and require the same parking ratio for live/work and residential loft development consistent with residential standards based on number of bedrooms
Saturation of market for live/work products	The majority of new development on the Westside are live/work units; require a mix of live/work and residential lofts, and two-story residential product types
Proximity of residential uses to existing industrial uses	CC&Rs and homebuyer notices provide advance notification to the buyers regarding potential noise

	nuisance impacts associated with living in a mixed use urban environment. Additional buffer may be needed between residential and major industrial uses
Privacy Impacts	Three-story in proximity to single story and two-story development must demonstrate minimal privacy impacts; roof decks and balconies should face project interiors
Increased Height - Live/work development are allowed to be four stories or a maximum 60 feet in height; the amendment in 2015 allowed rooftops to be counted toward open space requirement and not considered a story	Rooftops should be considered as stories to improve neighborhood compatibility. The 30-percent open space requirement should not include roof tops and focus on ground floor amenities to promote quality living environments.

The overlay plans have been amended periodically since adoption to address changes in market demands, land use patterns, and community concerns as identified above. The 6th cycle housing element proposes amendments which respond to community needs and the community's need for a range of housing types and more housing opportunities affordable at all income levels.

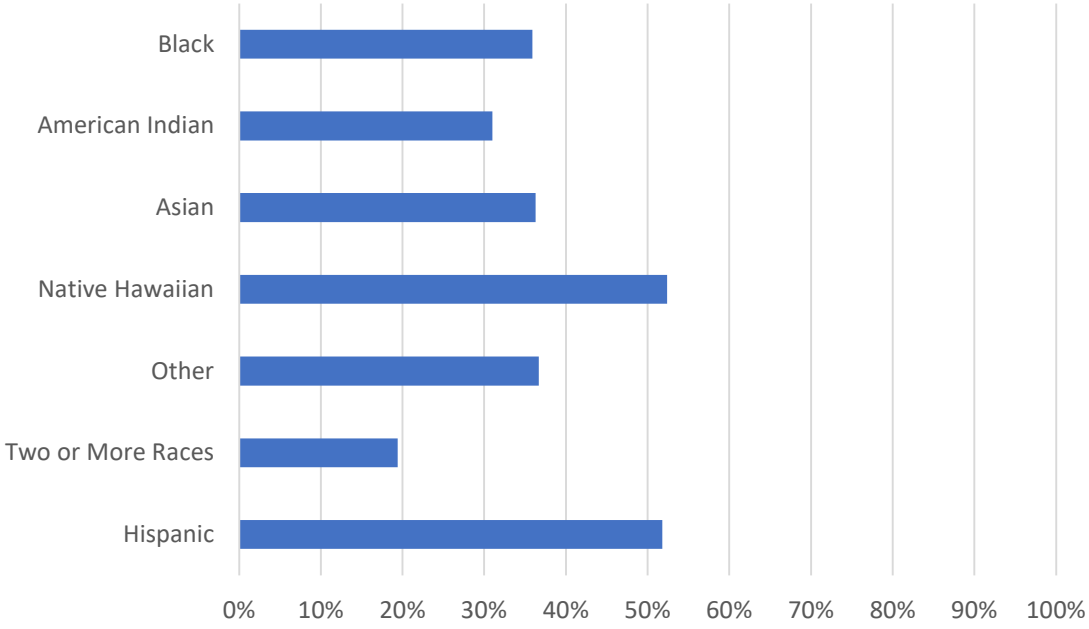
Integration and Segregation Patterns and Trends

Race and Ethnicity

The dissimilarity index is the most used measure of segregation between two groups, reflecting their relative distributions across neighborhoods (as defined by census tracts). The index represents the percentage of the minority group that would have to move to new neighborhoods to achieve perfect integration of that group. An index score can range in value from 0 percent, indicating complete integration, to 100 percent, indicating complete segregation. An index number above 60 is considered to show high similarity and a segregated community.

It is important to note that segregation is a complex topic, difficult to generalize, and is influenced by many factors. Individual choices can be a cause of segregation, with some residents choosing to live among people of their own race or ethnic group. For instance, recent immigrants often depend on nearby relatives, friends, and ethnic institutions to help them adjust to a new country.[6] Alternatively, when white residents leave neighborhoods that become more diverse, those neighborhoods can become segregated. Other factors, including housing market dynamics, availability of lending to different ethnic groups, availability of affordable housing, and discrimination can also cause residential segregation.

Figure 3-4 shows the dissimilarity between each of the identified race and ethnic groups and Costa Mesa's White population. The White population within Costa Mesa makes up the majority of the City's population at approximately 71 percent according to 2019 American Community Survey (ACS) estimates.



The higher scores shown in the figure below, directly indicate higher levels of segregation among those race and ethnic groups. The race and ethnic groups with the high scores were Native Hawaiian (52.4 percent) and Hispanic (51.8 percent). These scores correlate directly with the percentage of people within that racial or ethnic group that would need to move into a predominantly White census tract in order to

[6] Allen, James P. and Turner, Eugene. "Changing Faces, Changing Places: Mapping Southern California". California State University, Northridge, (2002).

achieve a more integrated community. For instance, 52.4 percent of the Native Hawaiian population would need to move into predominantly White census tract areas to achieve "perfect" integration, or 51.8 percent of the Hispanic population would need to move into predominantly White census tract areas for perfect integration.

As indicated above, a score of 60 or higher indicates a highly similar and segregated area. The City does not have any racial or ethnic groups with scores higher than 60. However, scores above 30 indicate moderate levels of segregation. It is important to note the areas where moderate segregation occurs in order for Costa Mesa to understand any additional disparities in access to opportunities or housing, as well as identify lack of resources for the communities. In the City of Costa Mesa, all racial and ethnic groups, except for those who identify as two or more races, show a score of 30 or greater dissimilarity index. The City of Costa Mesa is committed to furthering fair housing access and increasing fair housing opportunities to communities of color.

Figure 3-4: Dissimilarity Index with White Population in Costa Mesa

	Hispanic	Two or More Races	Other	Native Hawaiian	Asian	American Indian	Black
Dissimilarity Index with Whites	51.8%	19.4%	36.7%	52.4%	36.3%	31.0%	35.9%

Disability

In 1988, Congress added protections against housing discrimination for persons with disabilities through the FHA, which protects against intentional discrimination and unjustified policies and practices with disproportionate effects. The FHA also includes the following unique provisions to persons with disabilities: (1) prohibits the denial of requests for reasonable accommodations for persons with disabilities if necessary, to afford an individual equal opportunity to use and enjoy a dwelling; and (2) prohibits the denial of reasonable modification requests. With regards to fair housing, persons with disabilities have special

housing needs because of the lack of accessible and affordable housing, and the higher health costs associated with their disability. In addition, many may be on fixed incomes that further limit their housing options.

Table 3-28 provides data for persons with disabilities in Costa Mesa, Orange County, and across California; Figure 3-15 also maps out populations with disabilities throughout the City. There are five census tracts that report 10 to 20 percent of the population with a disability. These tracts are located the center of the City in the south-western region. The central census tracts include the Fairview Developmental Center and a senior living development (Azulon at Mesa Verde). The census tracts in the south-western region also include a senior living development (Vivante Newport Mesa). These may contribute to the higher occurrence of persons with disabilities.

Regarding access to community resources and services, the central census tracts are located near community parks, fire and police services, grocery stores and commercial uses, and medical offices. Public transit runs directly between both central census tracts along Harbor Boulevard, as well as Fairview Road. The south-western census tracts are also located near community parks, grocery stores and commercial uses, medical offices, and they have access to public transit along Placentia Avenue, 19th Avenue, and Victoria Street.

It is the policy and practice of the City to take all reasonable steps to ensure its services, programs and activities are accessible to all members of the public including persons with disabilities. The City's leadership team and accessibility experts work to ensure all departments comply with this policy by carrying out the following functions:

- Provide technical assistance to support City departments in complying with federal, state, and local disability access laws.
- Assist departments and divisions in evaluating their facilities, programs, services, and activities to ensure provision of reasonable accommodations to people with disabilities.
- Facilitate the resolution of grievances filed against the City of Costa Mesa that allege noncompliance with disability access laws.

Additionally, the City is concerned with public right-of-way access for everyone including people with disabilities. Staff is aware of pedestrian mobility concerns for people with various disabilities. The following information describes department programs available to the public:

- Curb Ramp Program – The City administers the Sidewalk Accessibility Curb Ramp Program by identifying locations and managing the installation of curb ramps throughout the city. These ramps provide safer and easier pedestrian access to sidewalks, particularly for persons with disabilities. All newly constructed ramps comply with the current Americans with Disabilities Act standards.
- Contractual Services – The City utilizes contractual services to install curb ramps each year through the ongoing capital-funded program. Along with these ongoing City-funded installation projects, the program also assists and coordinates installation projects with a variety of other programs and construction projects.

- City Staff also utilize a priority approach to select locations for new ramps. Installation project priorities are based on the following criteria:
    - Known routes used, and requests by persons with disabilities
    - Known locations in the walking route to school plans
    - Known routes to senior and community centers and around parks
    - Requests from the community
    - Mobility Access Analysis for People with Disabilities
    - Upon request, staff conducts a study of obstructions blocking pedestrian or wheelchair travel.

Costa Mesa residents with disabilities living in the five census tracts listed above may also benefit from regional resources. The Regional Center of Orange County provide services to person with developmental disabilities, including: housing options, employment opportunities, prenatal diagnostic evaluations, as well as services for early intervention, therapy, respite care, childcare, adult day programs, transportation, medical and dental, and recreation. The following lists a number of additional agencies and organizations and the services they provide for Costa Mesa residents:

- Dayle McIntosh Center - Provides support services, advocacy, transition services, information and referral, peer support, housing assistance, health care access and more.
- Employment Development Department - The California State Disability Insurance Program (SDI) provides short term Disability Insurance (DI) and Paid Family Leave (PFL) wage replacement benefits to eligible workers who need time off work.
- Family Caregiver Resource Center - Assists families who are coping with the physical, emotional, and financial responsibilities of caregiving.
- Help Me Grow - Connects families with developmental, behavioral or learning concerns to resources in the community for children birth to 6 years of age.
- In Home Supportive Services (IHSS) - Provides supportive services to aged, blind, and disabled persons who are limited in their ability to care for themselves and cannot live safely at home without help.
- Lions Sight and Hearing Foundation of Southern California - Provides hearing aids and common eye surgeries Income qualifications apply.
- Orange County Deaf Equal Access Foundation - Provides services to deaf and hard of hearing community including employment assistance, information and referral, advocacy, peer counseling, independent living, communication assistance (info@ocdeaf.org).
- Protection and Advocacy Inc. (PAI) - Provides legal representation in response to rights/violations for persons with disabilities.
- Rehabilitation Institute of Southern California - Programs which increase the ability of disabled individuals to function at home and at school, on the job, and in the community.
- St. Jude Brain Injury Network - Assist persons with a traumatic brain injury to attain access into gainful employment, appropriate community reintegration programs, accessible housing, and research-related education.

Costa Mesa children with disabilities living in the five census tracts listed above also have access to assessments/evaluations and education plans through the Newport-Mesa Unified School District Harper Assessment Center, as well as individual and family counseling, suicide prevention services, and residential services through the South Coast Community Services Student Assistance Program (SAP). Acuity Behavior Solutions provides a variety of Applied Behavioral Analysis techniques for children and teens with autism in Orange County, this includes: play-based applied behavior analysis services, individual in-home therapy, and social skills groups for children and teens.

Income

Government Code Section 65008 provides protection against the discrimination of lower- and moderate-income households that inhibits affordable housing development. As detailed in Chapter 2.C.2, the City of Costa Mesa is made up of households earning a variety of income levels. **Table 2-12** shows over a quarter of Costa Mesa households earn less than 50 percent of the area median family income (AMFI) and just under 40 percent earn over $100,000. **Figures 3-5a** and **3-5b** provide mapping of median incomes and poverty status across the City and in surrounding communities.

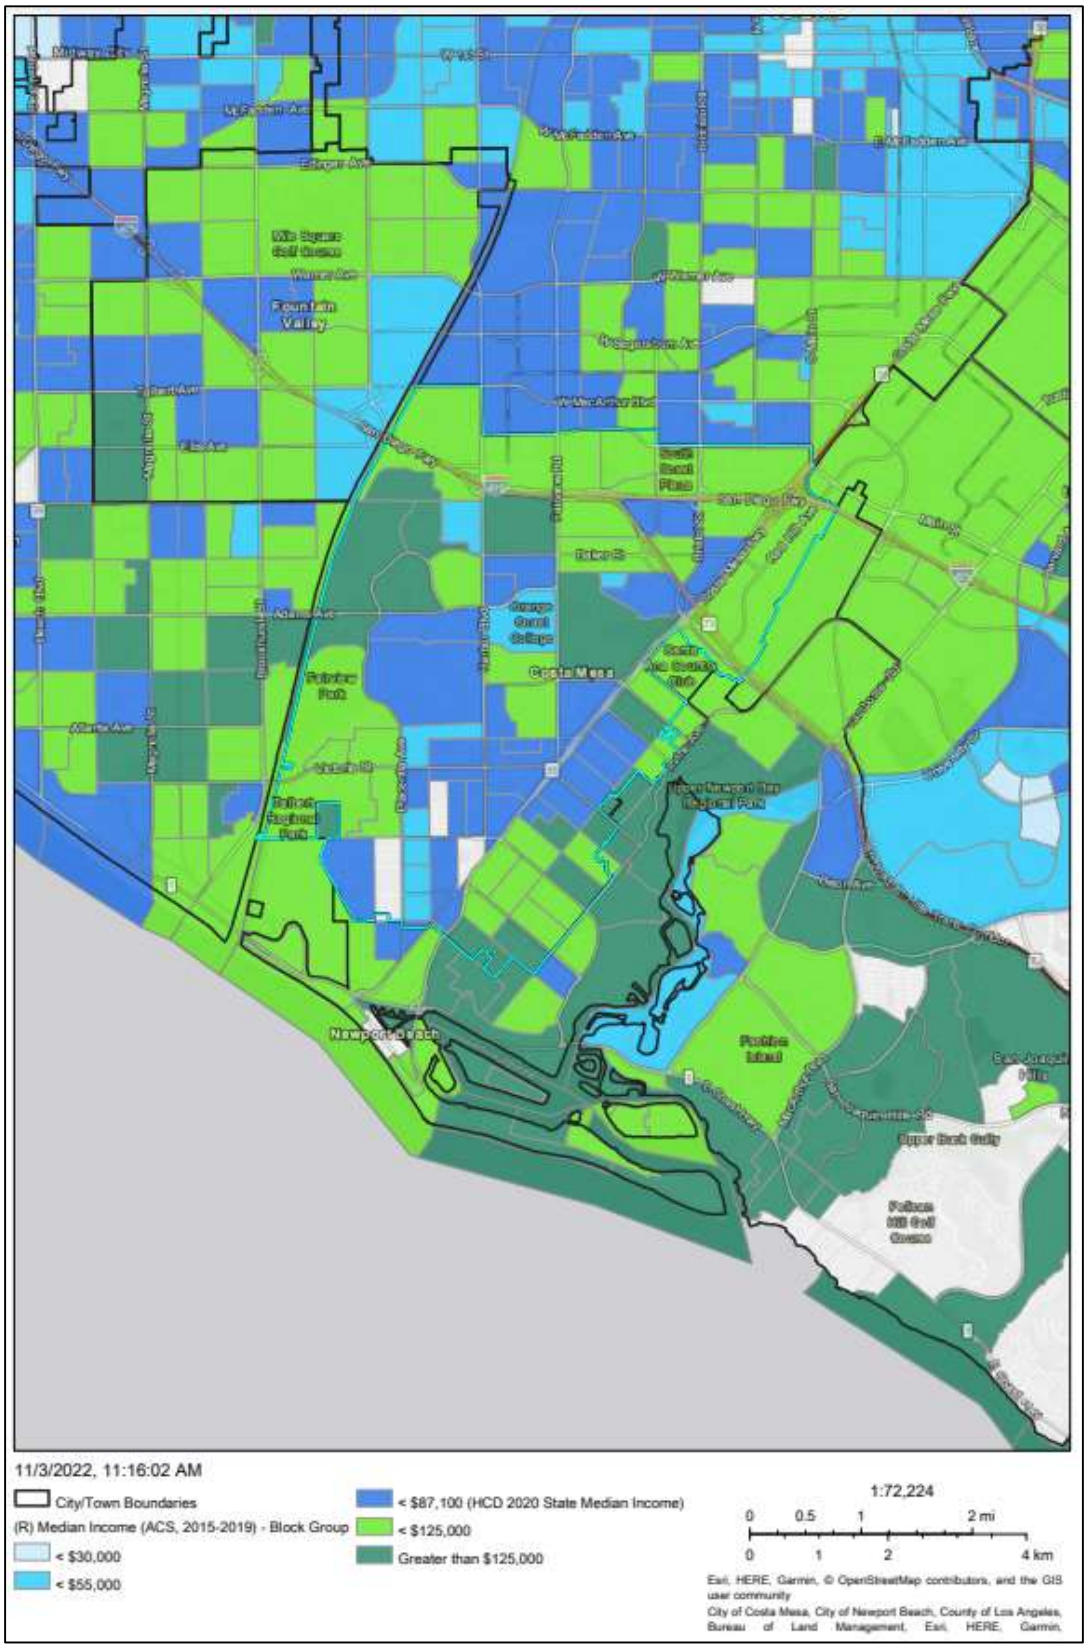

Figure 3-5a illustrates a greater tendency for lower median incomes towards the center of the City with higher median incomes along the City's western, northern, and eastern edges. When considering zoning, block groups with lower median incomes generally overlap with zones that allow for multi-family housing development at higher densities. In comparison, block groups with higher median incomes tend to be zoned for single-family residential. This shows lower income households have a greater ability to afford apartments and condominiums over single-family residences. Chapter 2.F.5 also indicates the housing market for single-family residences is more difficult to access for households not earning an above moderate income.

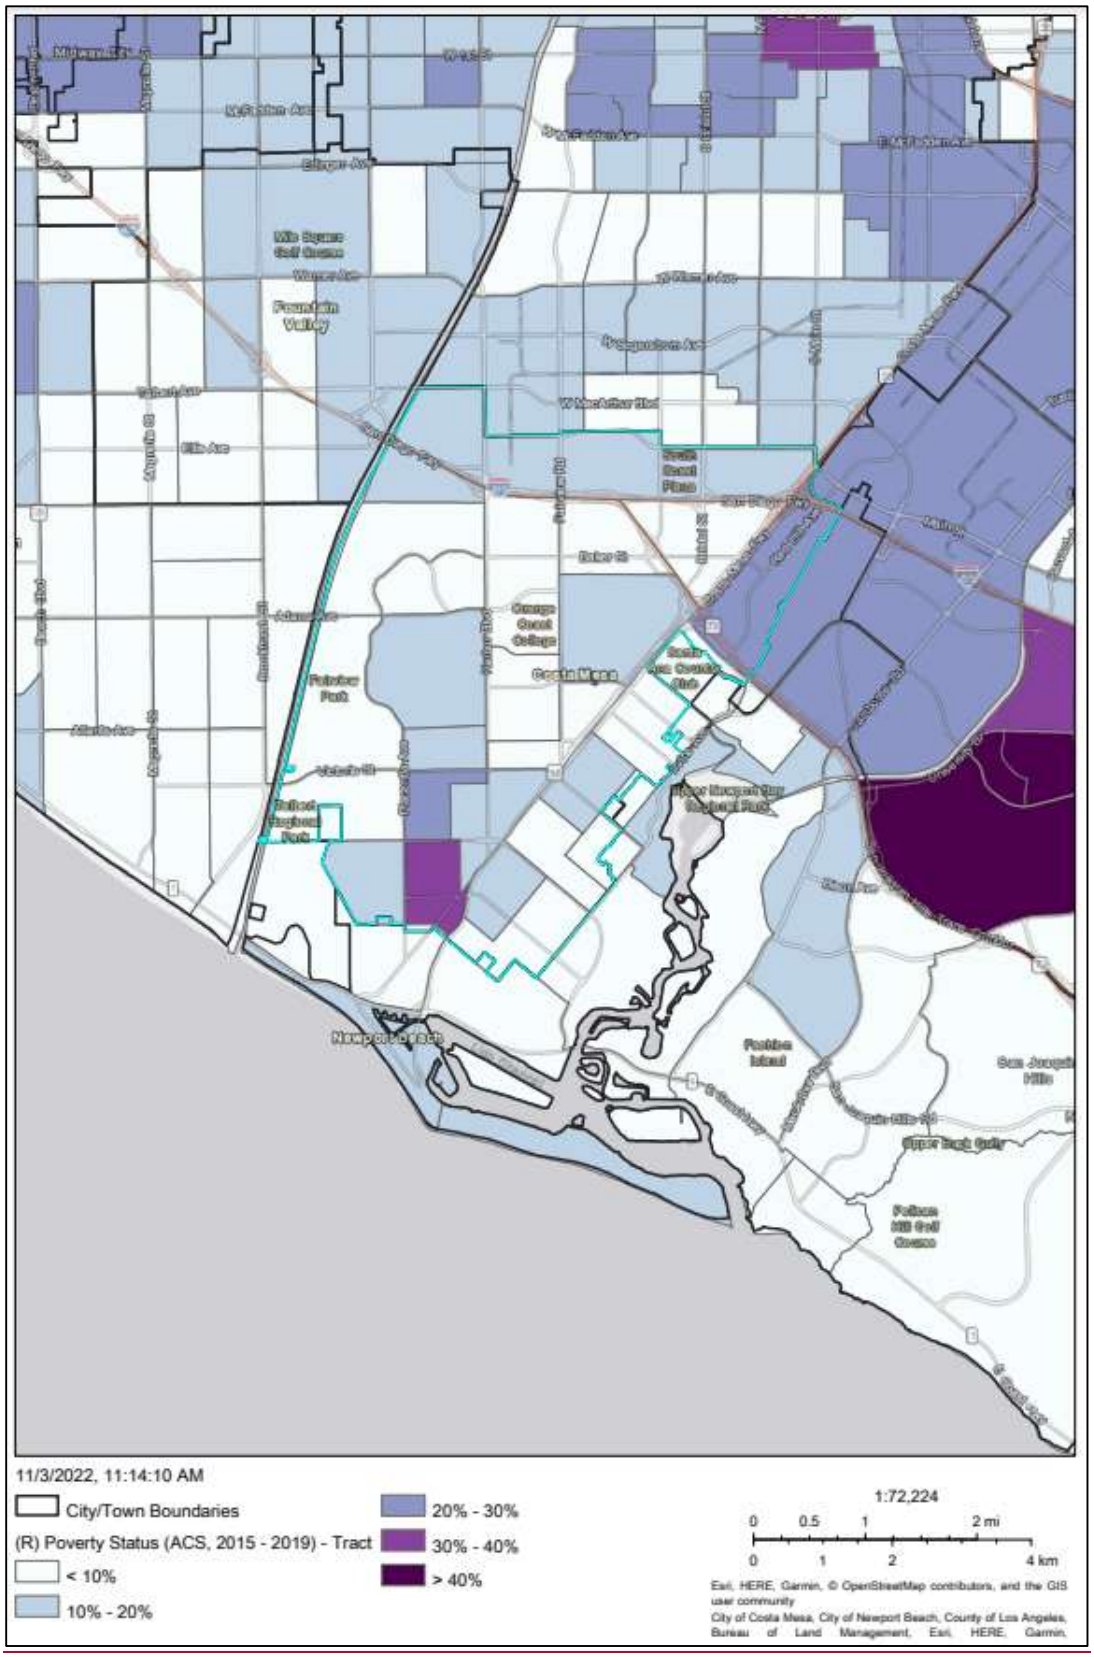
Figure 3-5b illustrates poverty status by census tract. The data is similar to that of Figure 3-5a as it shows higher concentrations of poverty towards the City's southern and central region. There is one census tract (636.05) that reports 30 to 40 percent of its population falling under the poverty line. This census tract is further detailed in the following section as an area of high segregation and poverty; however, the data is dated 2019 and does not reflect recent development and financing. While the area is identified as high segregation and poverty, it has seen much redevelopment over recent years and the median home value according to 2020 ACS 5-Year Estimates is $922,500. The median contract rent for the census tract is $1,665, and the median household income is $71,150. **Program 4I** is included in the Housing Plan to specifically address the high segregation and poverty finding for census tract 636.05 by partnering with local community-based organizations, stakeholders and groups who provide supportive resources and programs to further identify specific needs of this community and connect community members with appropriate resources.

Furthermore, the Appendix B Sites Analysis includes the identification of a number of sites throughout the entirety of the City so as to provide for future residential development at a variety of densities. This is intended to allow for a variety of housing types affordable to all income categories. Sites were selected based on the availability of land, property owner and developer interest, and access to transportation, resources, and services. A number of sites are located in areas that report both high and lower median



incomes, as shown in Figure 3-5a, so as to provide for future affordable units in areas where existing communities may benefit from and in areas of high opportunity. More details on the sites selection are provided in Appendix B.

Racially or Ethnically Concentrated Areas of Poverty (R/ECAP)

To assist communities in identifying racially/ethnically concentrated areas of poverty (R/ECAPs), HUD has developed a census tract-based definition of R/ECAPs. The definition involves a racial/ethnic concentration threshold and a poverty test. The racial/ethnic concentration threshold is straightforward: RECAPs must have a non-white population of 50 percent or more. Regarding the poverty threshold, Wilson (1980) defines neighborhoods of extreme poverty as census tracts with 40 percent or more of individuals living at or below the poverty line. Because overall poverty levels are substantially lower in many parts of the country, HUD supplements this with an alternate criterion. Thus, a neighborhood can be a R/ECAP if it has a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever threshold is lower.

Location of residence can have a substantial effect on mental and physical health, education opportunities, and economic opportunities. Urban areas that are more residentially segregated by race and income tend to have lower levels of upward economic mobility than other areas. Research has found that racial inequality is thus amplified by residential segregation. However, these areas may also provide different opportunities, such as ethnic enclaves providing proximity to centers of cultural significance, or business, social networks, and communities to help immigrants preserve cultural identify and establish themselves in new places. Overall, it is important to study and identify these areas in order to understand patterns of segregation and poverty in a City.

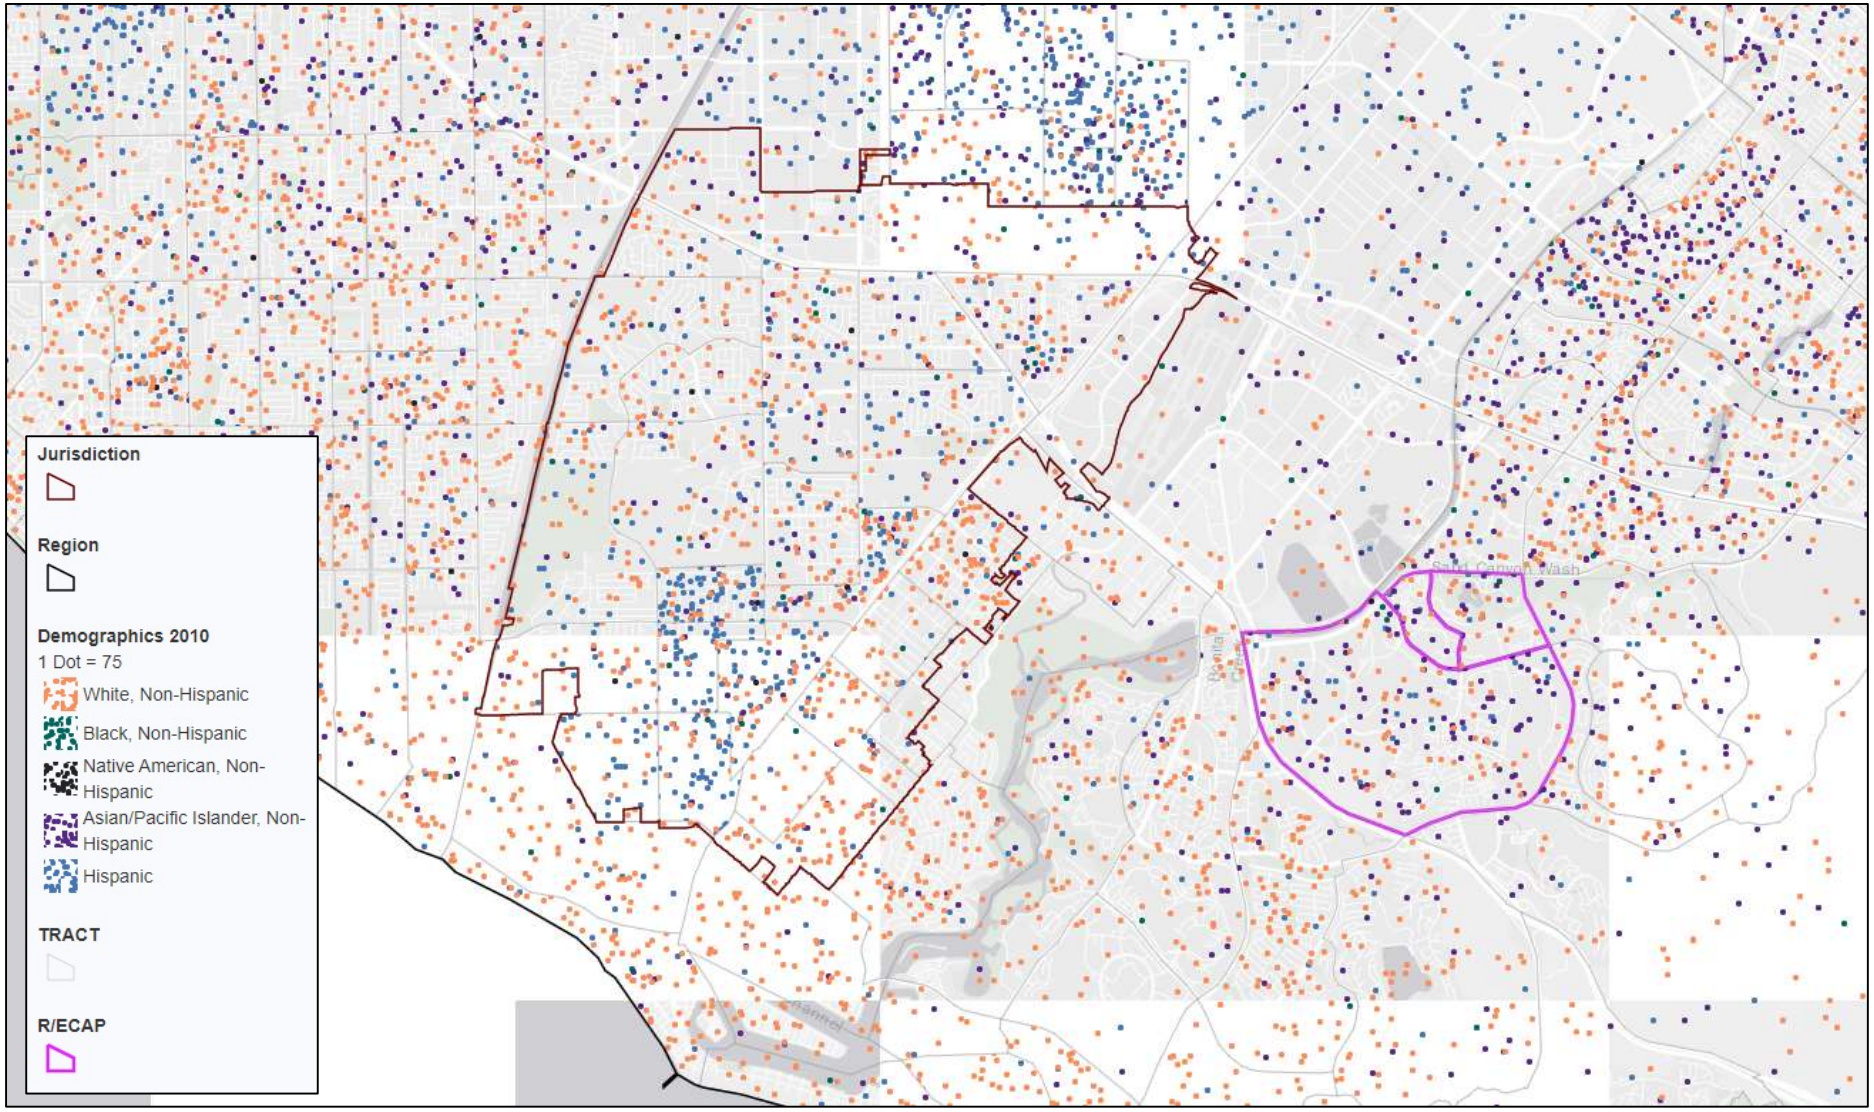

Figure 3-6 below displays the R/ECAP analysis of the Costa Mesa area. The low poverty index captures the depth and intensity of poverty in a given neighborhood. The index uses both family poverty rates and public assistance receipt, in the form of cash-welfare, such as Temporary Assistance for Needy Families (TANF). The poverty rate and public assistance for neighborhoods are determined at the census tract level, and the higher the score, the less exposure to poverty in a neighborhood. HUD provides data for the entire Orange County region, and not Costa Mesa specific, as shown in the map. Figure 3-6a shows that Costa Mesa has a pocket of concentrated Hispanic population towards the southern central region of the City. The eastern region of the City is shown to be mostly made up of concentrated White, Non-Hispanic, population. There is also a minor concentration of Hispanic and Native American, Non-Hispanic, populations in the SoBECA area of Northern Costa Mesa.

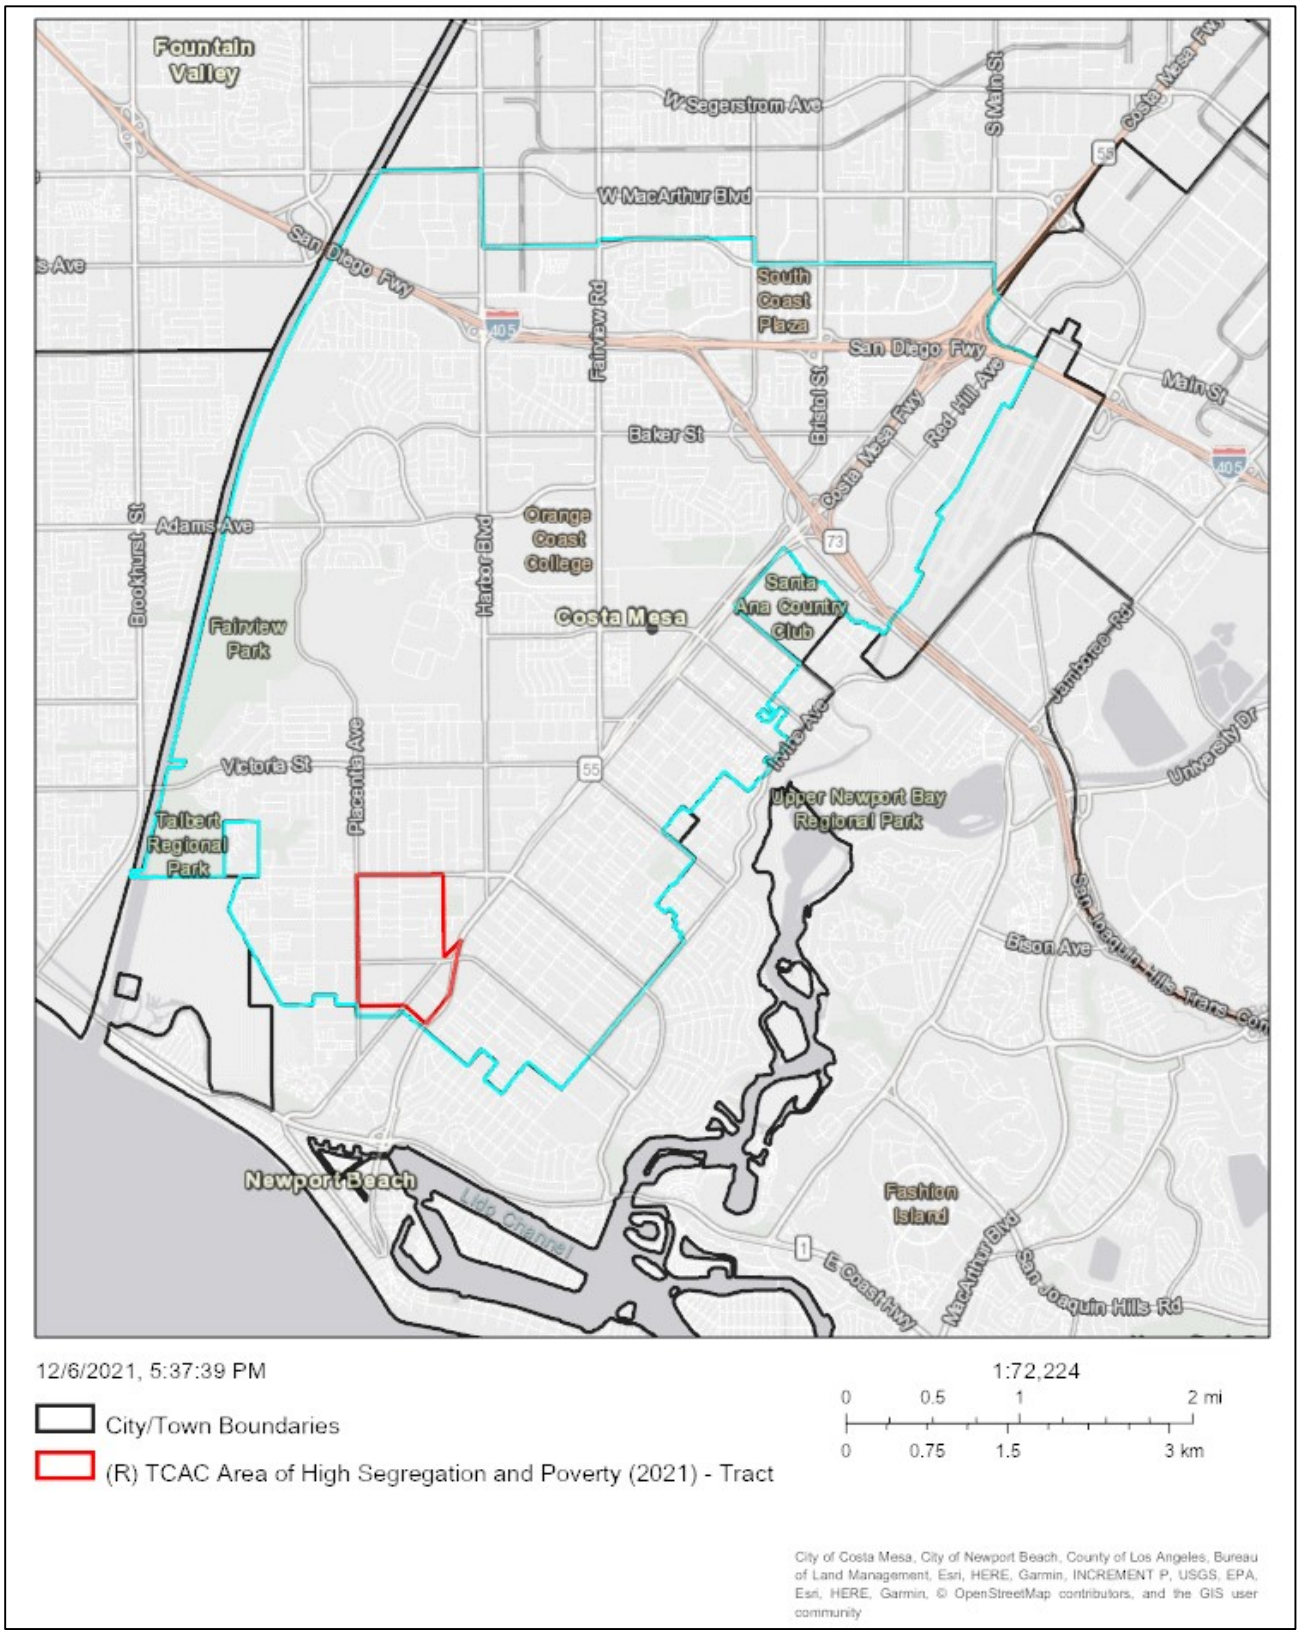
While there are no R/ECAP areas within the City, Figure 3-6a shows one in the nearby City of Irvine surrounding the University of California – Irvine campus. According to the AI, it is likely that they qualify as R/ECAPs due to the high proportions of students. In addition, the figure shows a large concentration of Hispanic population directly north of Costa Mesa in the City of Santa Ana. The City of Costa Mesa is committed to increasing housing mobility opportunities for persons outside of the City and in Orange County as a whole. Chapter 4: Housing Plan of this Housing Element outlines housing opportunity, affordable housing, and fair housing strategies to increase opportunities to all households.

Additionally, Figure 3-6b displays the data for TCAC areas of high segregation and poverty. The maps shows that there is one census tract that is designated as high segregation and poverty (census tract: 636.05). Areas that are identified as high segregation and poverty are consistent with the standards for both poverty (30% of the population below the federal poverty line) and racial segregation (overrepresentation of people of color relative to the county).



Census tract 636.05 is generally located in the southwestern portion of the City. This tract contains 3 different Costa Mesa City Council Districts - Districts 4, 5, and 6. The zoning designations within this tract is majority industrial (MG, General Industrial) and high density residential (R2-HD and R3), with commercial corridors along Newport Boulevard and 19th Street. The general Westside area also has 3 adopted urban plans, which do not change the underlying zoning of the property but allows for the development of live/work units and/or residential development. Since the adoption of the urban plans in 2006, the City has approved 541 newly constructed units, which includes the subject census tract.

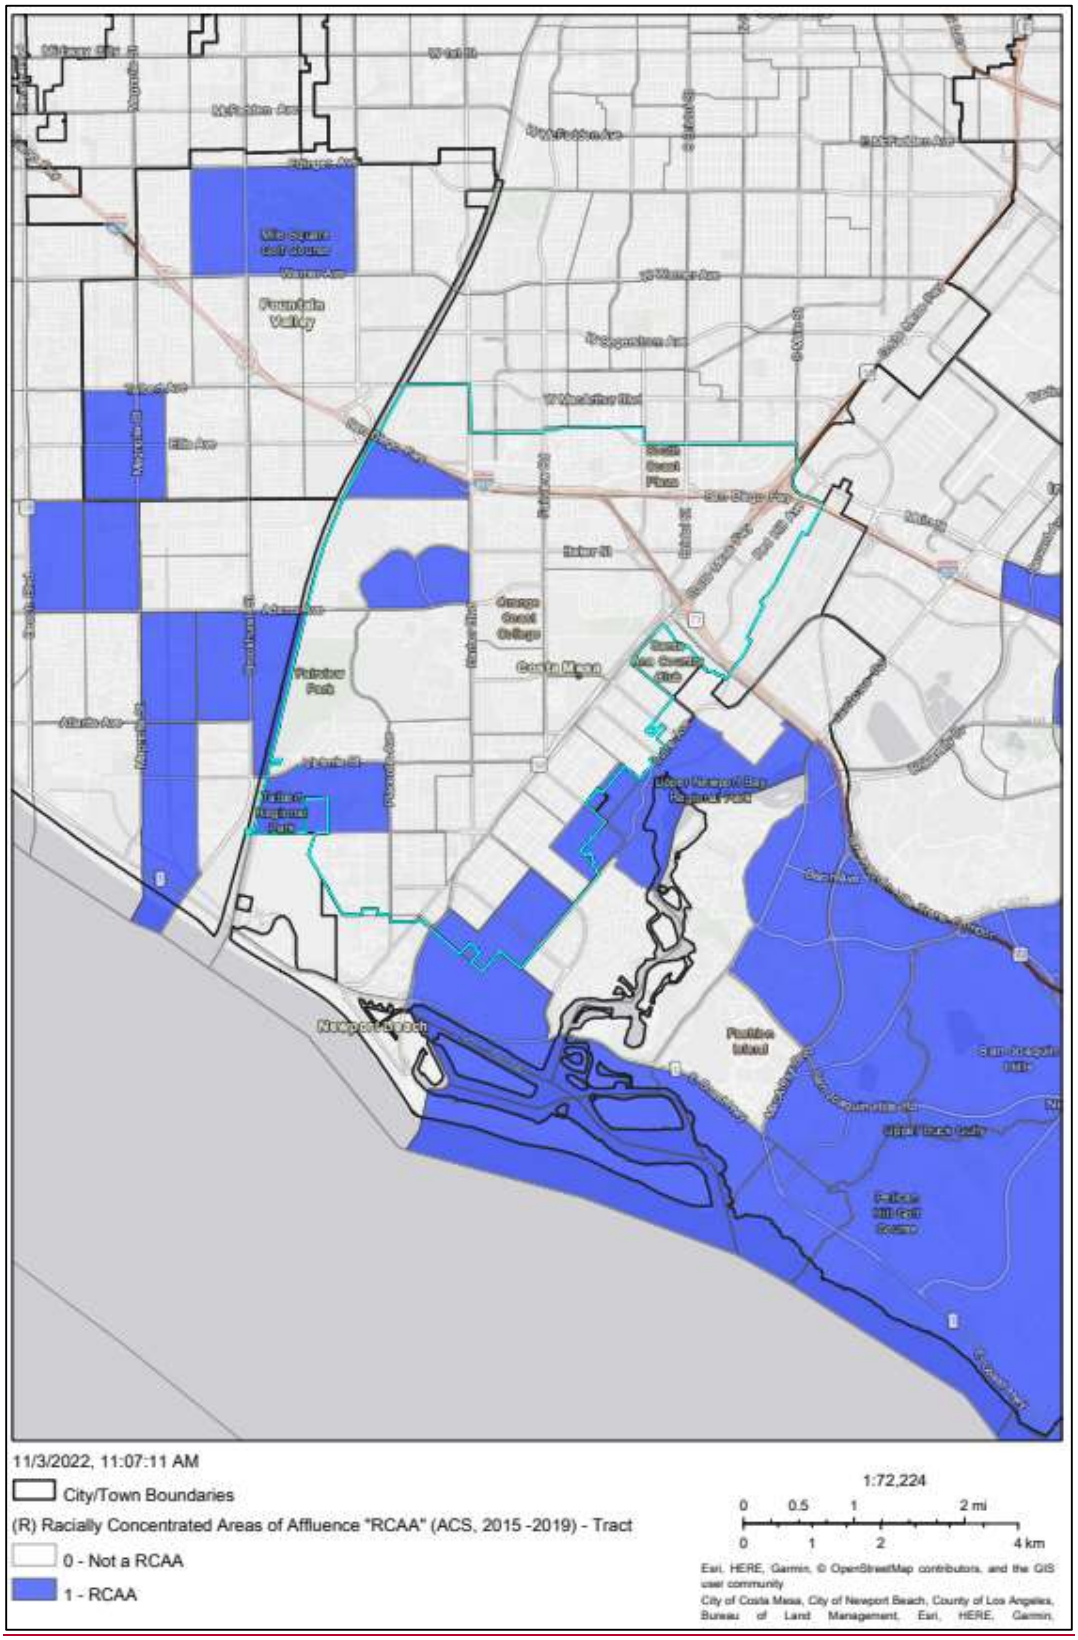
Racially or Ethnically Concentrated Areas of Affluence

Racially or Ethnically Concentrated Areas of Poverty have long been analyzed and reviewed as a contributing factor to segregation. However, patterns of segregation in the United States show that of all racial groups, the White population is the most severely insulated (separated from other racial groups).[7] Research also identifies segregation of affluence to be greater than the segregation of poverty. Racial and economic segregation can have significant effects on respective communities, including but not limited to, socioeconomic disparities, educational experiences and benefits, exposure to environmental conditions and crime, and access to public goods and services.



Data used in the analysis of Racially Concentrated Areas of Affluence (RCAA) comes from the 2015-2019 ACS and measured at the census track level. The definition for an RCAA is a census tract in which 80 percent or more of the population is White and a median income of at least $125,000. The nationwide RCAA analysis identifies the following:

- RCAA tracts have more than twice the median household income of the average tract in their metro area.
- Poverty rates in RCAAs are significantly lower and are, on average about 20 percent of a typical tract.
- RCAAs tracts are more income homogenous than R/ECAPs.
- The average RCAA is about 57 percent affluent, whereas the average R/ECAP had a poverty rate of 48 percent.
- The typical RCAA tract has a rate of affluence 3.2 times that of a typical tract, whereas R/ECAPs on average had a poverty rate 3.2 times that of a typical tract.

Overall, RCCAs may represent a public policy issue to the extent that they have been created and maintained through exclusionary and discriminatory land use and development practices. Postwar patterns of suburbanization in many metropolitan areas were characterized by White communities erecting barriers to affordable housing and engaging in racially exclusionary practices. Figure 3-7 illustrates five RCAAs mostly along the City's edges. As noted above, these areas overlap with the presence of single-family neighborhoods. Table 3-21 displays the RCAAs for Costa Mesa, and Table 3-22 shows local (Costa Mesa) and regional (Orange County) context for the median household incomes of White residents.

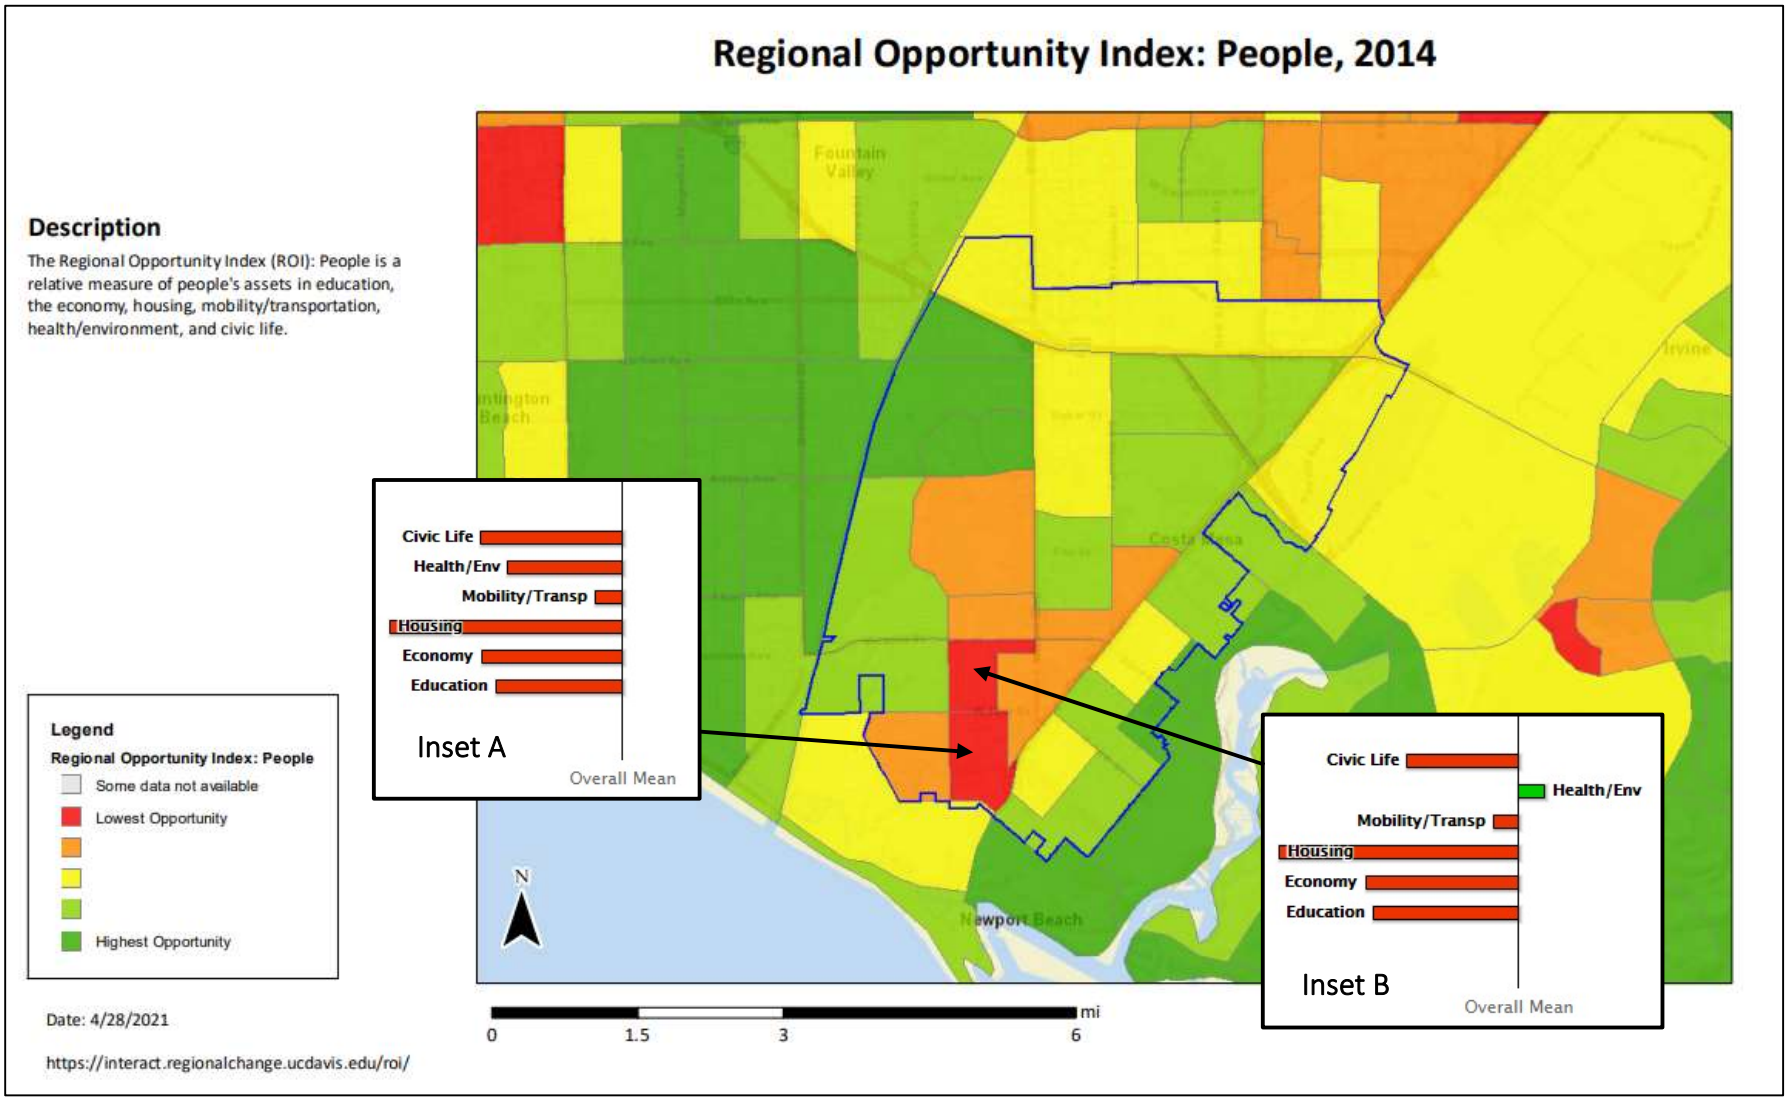
Disparities in Access to Opportunity

The UC Davis Center for Regional Change and Rabobank partnered to develop the Regional Opportunity Index (ROI) intended to help communities understand local social and economic opportunities. The goal of the ROI is to help target resources and policies toward people and places with the greatest need to foster thriving communities. The ROI incorporates both "people" and "place components, integrating economic, infrastructure, environmental, and social indicators into a comprehensive assessment of the factors driving opportunity."

The ROI: People is a relative measure of people's assets in education, the economy, housing, mobility/transportation, health/environment, and civic life as follows:

- **Education Opportunity**: Assesses people's relative success in gaining educational assets, in the form of a higher education, elementary school achievement, and regular elementary school attendance.
- **Economic Opportunity**: Measures the relative economic well-being of the people in a community, in the form of employment and income level.
- **Housing Opportunity**: Measures the relative residential stability of a community, in the form of homeownership and housing costs.
- **Mobility/Transportation Opportunity**: Contains indicators that assess a community's relative opportunities for overcoming rural isolation.
- **Health/Environment Opportunity**: Measures the relative health outcomes of the people within a community, in the form of infant and teen health and general health.
- **Civic Life Opportunity**: A relative social and political engagement of an area, in the form of households that speak English and voter turnout.



The ROI: Place is a relative measure of an area's assets in education, the economy, housing, mobility/transportation, health/environment, and civic life.

- Education Opportunity: Assesses a census tract's relative ability to provide educational opportunity, in the form of high-quality schools that meet the basic educational and social needs of the population.
- Economic Opportunity: Measures the relative economic climate of a community, in the form of access to employment and business climate.
- Housing Opportunity: Measures relative availability of housing in a community, in the form of housing sufficiency and housing affordability.
- Health/Environment Opportunity: A relative measure of how well communities meet the health needs of their constituents, in the form of access to health care and other health-related environments.
- Civic Life Opportunity: Measures the relative social and political stability of an area, in the form of neighborhood stability (living in same residence for one year) and US citizenship.

Figure 3-8 shows the ROI: People classifications throughout the City, the "ROI: People" data identifies the achievement levels that persons living within these census tracts have attained. As the figure shows, classifications vary greatly throughout Costa Mesa. The City has areas of high opportunity to the west and east of the City, but also has areas classified as the low opportunity in the southern and central regions of the City. Persons living in the areas identified as low opportunity "people" are considered to have low achievement opportunities for economic, health, and housing. The figure shows one census tract, identified as Inset B, where the general attainment for education, transportation, housing, economic opportunity, or jobs was low the residents living in this tract. Further analysis shows the census tract, identified as Inset A, has overall very low levers of education, economic, housing, transportation, and civic life attainment among residents. Low attainment levels may project generational poverty, lower levels of upward mobility, and increased challenges accessing essential resources and opportunities. Increase housing opportunities and access, specifically affordable housing, in this area can provide stability, safety, and important resources to a community. The City of Costa Mesa has identified portions of this area to accommodate future growth for low and very low-income housing.

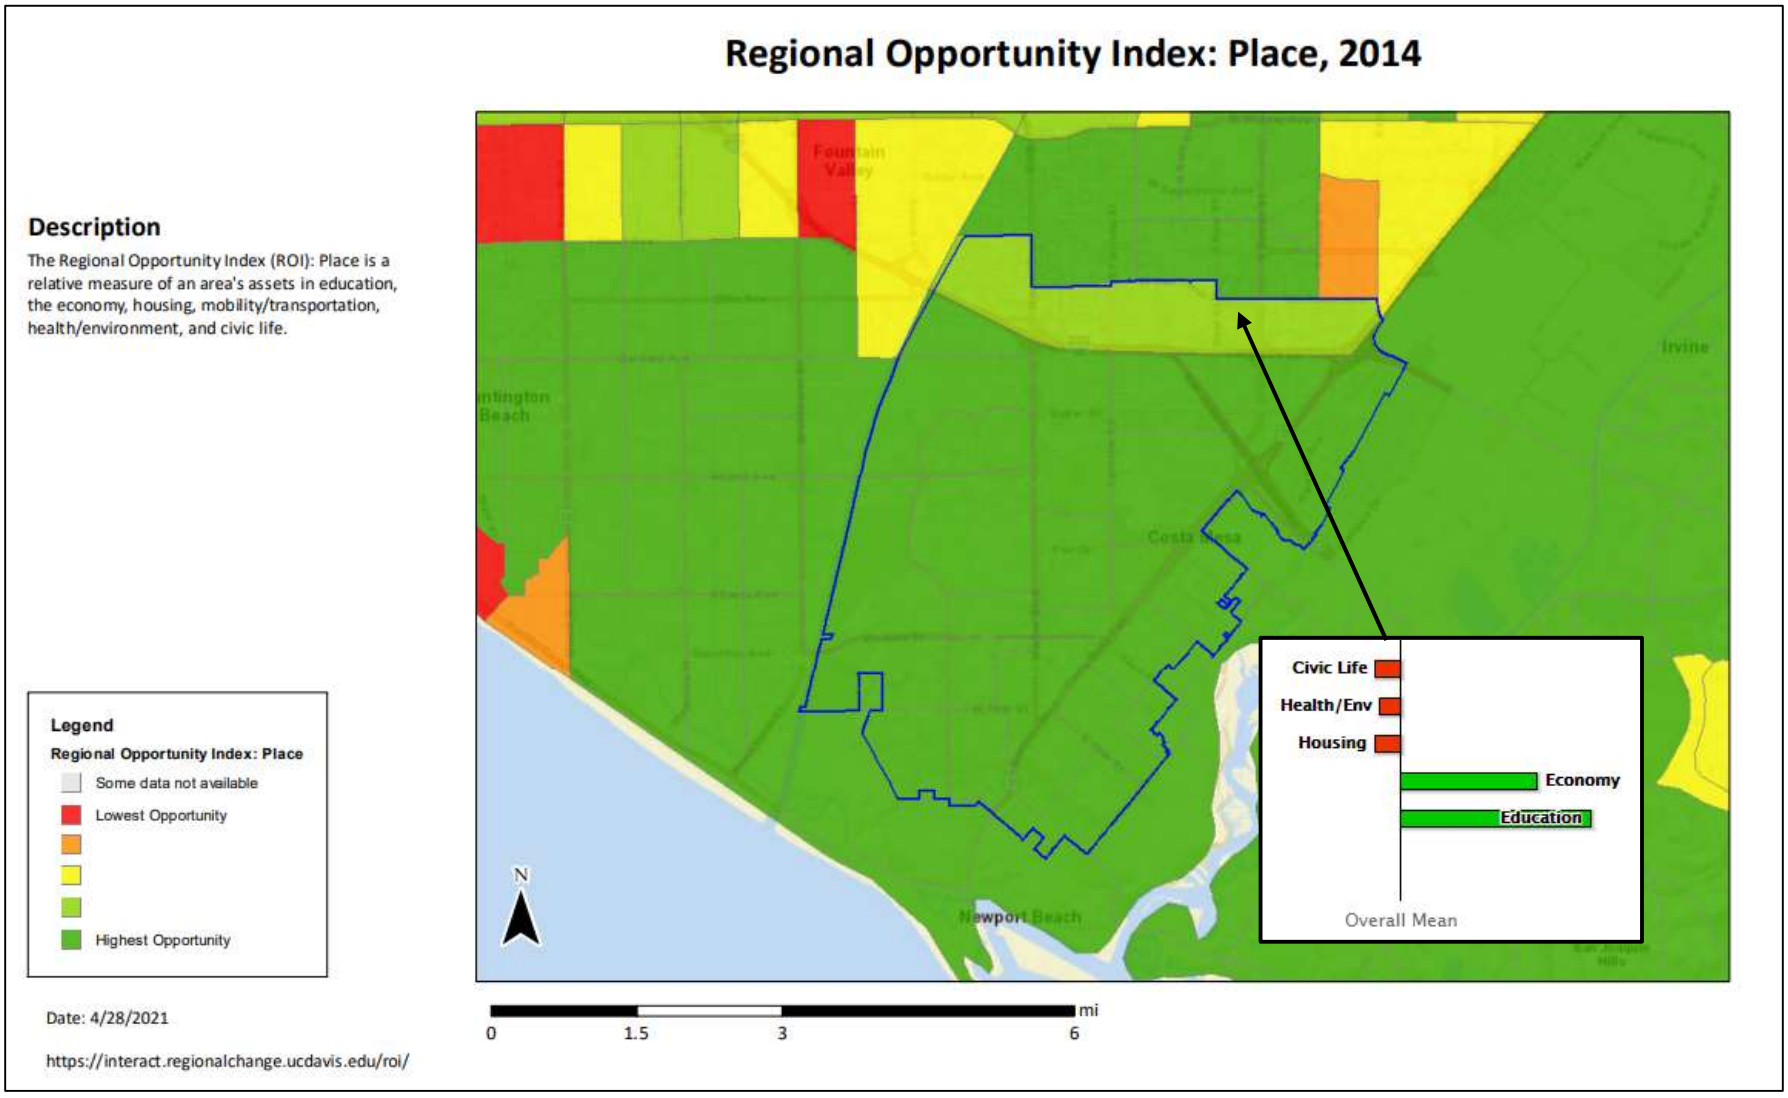


Figure 3-9 displays opportunities provided within each census tracts. The map shows that most of the City is classified as high opportunity. High opportunity areas mean that individual census tracts provide the necessary and essential resources for housing, economic or job opportunity, quality education and educational services, safe and affordable transportation, and quality civic and environmental life. Utilizing areas which provide important and essential resources, to increase housing opportunities can help to break cycles of poverty and increase overall community health. The City of Costa Mesa has identified housing opportunity sites to accommodate the RHNA in a variety of high opportunity areas.

Additionally, **Table 3-23** and **Figure 3-10** below display the data for Regional Opportunity Index in Costa Mesa overall compared to the State of California. The data shows the following key findings:

- Costa Mesa residents reportedly have lower math and English proficiency levels; however, they have higher rates of college education, high school graduation, UC/CSU eligibility.
- The economic conditions in Costa Mesa are high. There is a higher rate of high-quality employment amongst residents and higher minimum basic income than the State. There are many jobs available, and that trend continues to increase.
- Costa Mesa households are predominantly renter households. Housing adequacy is the same for the City and the State, but homes in Costa Mesa are reportedly less affordable.
- The City reports high rates of available vehicles per household, as well as commute time. Costa Mesa residents spend more time traveling to and from work than residents across the State.
- Despite lower air quality reports, Costa Mesa residents have high access to medical and health care, as well as access to supermarkets.
- Costa Mesa residents have high rates of English fluency, despite slightly lower rates of citizenship.

California Tax Credit Allocation Committee (TCAC) Opportunity Area Maps

The Department of Housing and Community Development together with the California Tax Credit Allocation Committee established the California Fair Housing Task Force to provide research, evidence-based policy recommendations, and other strategic recommendations to HCD and other related state agencies/departments to further the fair housing goals (as defined by HCD). The Task force developed the TCAC/HCD Opportunity Area Maps to understand how public and private resources are spatially distributed. The Task force defines opportunities as pathways to better lives, including health, education, and employment. Overall, opportunity maps are intended to display which areas, according to research, offer low-income children and adults the best chance at economic advancement, high educational attainment, and good physical and mental health.

According to the Task Force's methodology, the tool allocates the 20 percent of the tracts in each region with the highest relative index scores to the "Highest Resource" designation and the next 20 percent to the "High Resource" designation. Each region then ends up with 40 percent of its total tracts as "Highest" or "High" resource. These two categories are intended to help State decision-makers identify tracts within each region that the research suggests low-income families are most likely to thrive, and where they typically do not have the option to live—but might, if given the choice. As shown in **Figure 3-11a** below, much of Costa Mesa is classified moderate to high resource areas with pockets of low resource areas in the southwest region of the City. Costa Mesa has one area identified in **Figure 3-11b** classified as high segregation and poverty in the southern area of the City – census tract 636.05. This census tract includes industrial, residential, and retail/commercial uses, as well as the Costa Mesa Senior Center and new Superior Pointe and 17 West residential developments. While the area is identified as high segregation and poverty, it has seen much redevelopment over recent years and the median home value according to 2020 ACS 5-Year Estimates is $922,500. The median contract rent for the census tract is $1,665, and the median household income is $71,150.

The City of Costa Mesa is committed to exploring programs and avenues to increase housing access and opportunity to both existing residents, future residents, and households in nearby areas. **Program 2L** is included in the **Housing Plan** to facilitate access to funding, priority processing, and outreach for lower income households, including those located in census tract 636.05. **Program 4I** is also included to specifically address the high segregation and poverty finding for census tract 636.05 by partnering with local community-based organizations, stakeholders and groups who provide supportive resources and programs to further identify specific needs of this community and connect community members with appropriate resources.

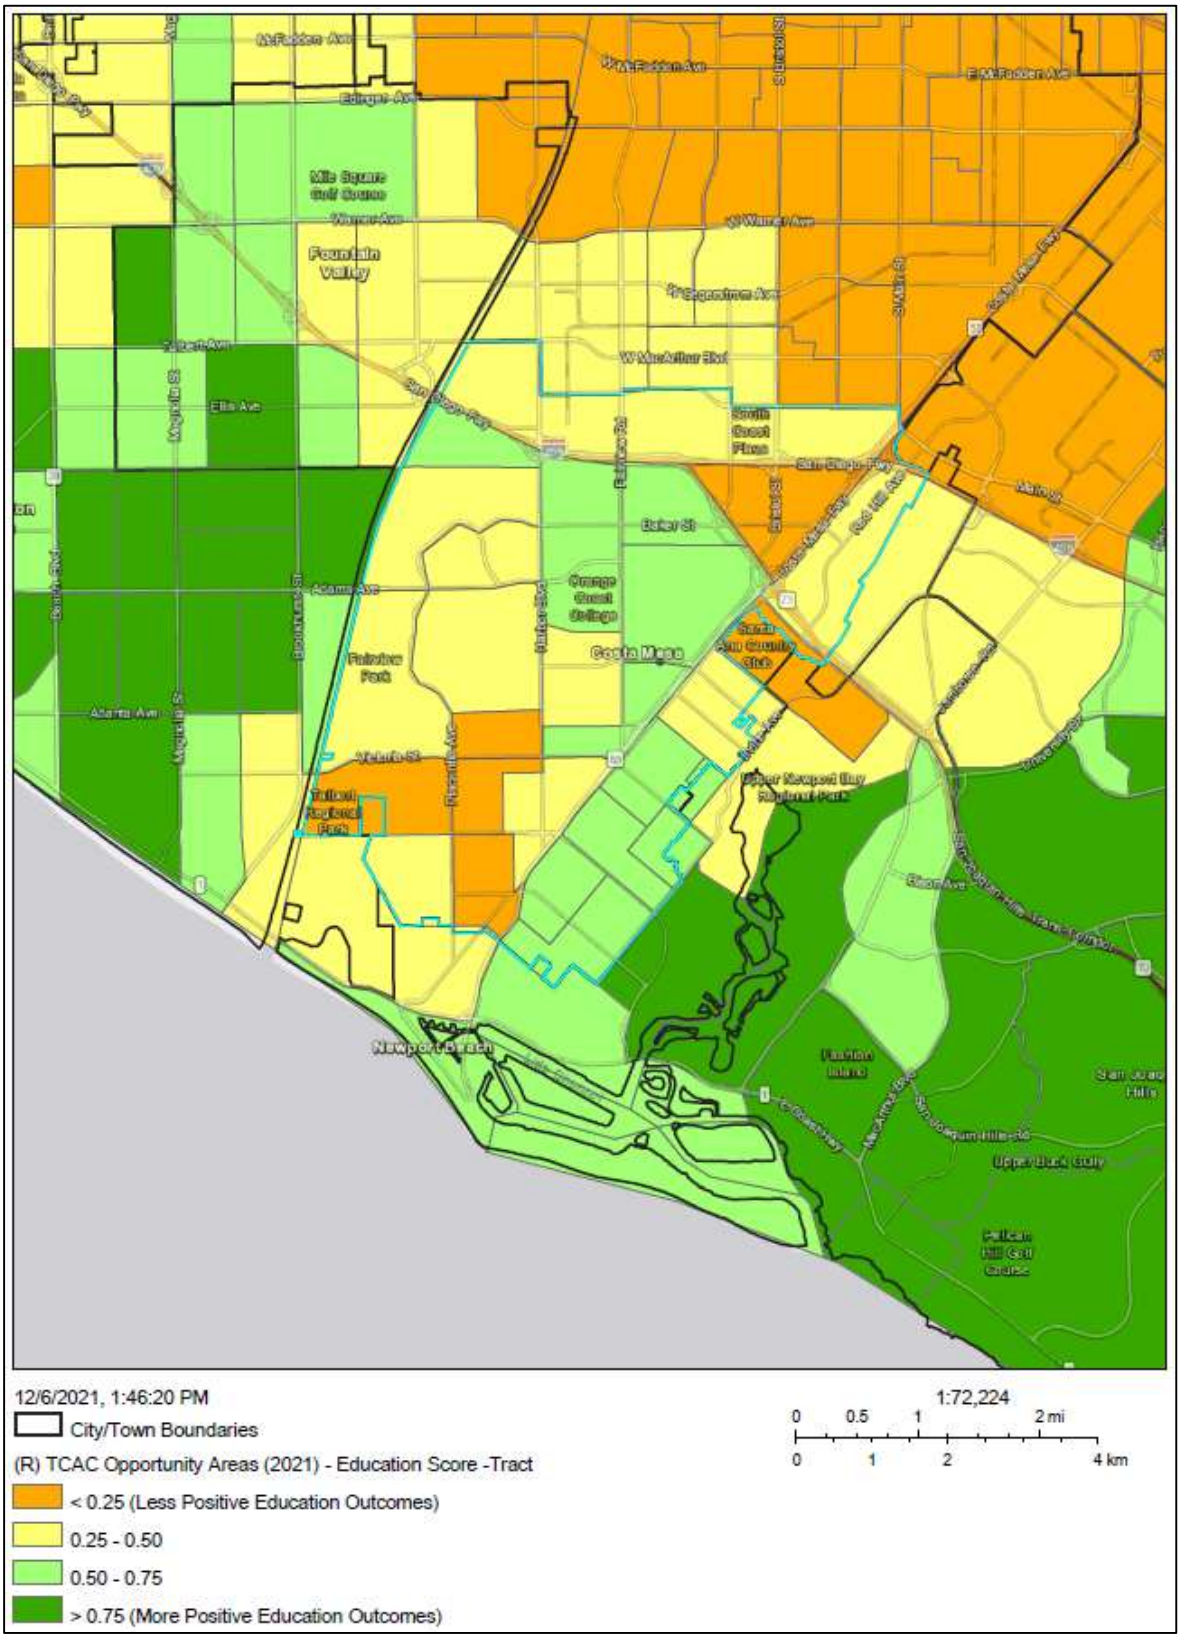
Source: California Tax Credit Allocation Committee and Department of Housing and Community Development, 2021.

Figure 3-11b: TCAC/HCD Opportunity Map – High Segregation and Poverty (2021)

Source: California Tax Credit Allocation Committee and Department of Housing and Community Development, 2021.

Opportunity Areas – Education



The TCAC/HCD Opportunity Area Maps include education data, as illustrated in **Figure 3-12**. This data represents opportunity levels based on the following four factors:

- Math proficiency – Percentage of 4th graders who meet or exceed math proficiency standards.
- Reading proficiency – Percentage of 4th graders who meet or exceed literacy standards.
- High school graduation rates – Percentage of high school cohort that graduated on time.
- Student poverty rate – Percentage of students not receiving free or reduced-price lunch.

As **Figure 3-12** shows, the City has a variety of education outcome scores. The more positive education outcomes are located over East Side Costa Mesa, east of the 55 Freeway, as well as over the neighborhoods south of the 405-freeway and in the center of the City. The area of the City west of Harbor Boulevard and north of Fairview Park are rated moderate for educational outcomes. West Side Costa Mesa in the City's south-western region has the lowest educational outcome.

Title 1 schools receive additional government funding to assist their lower-income student base who are at risk of falling behind. Within Newport-Mesa Unified School District, there are a total of 10 elementary schools, 2 middle schools, and 2 high schools. The following 3 elementary schools are Title 1 schools: Davis Elementary School, Heinz Kaiser Elementary School, and Woodland Elementary School. Davis Elementary School is located in the center of Costa Mesa just north of the OC Fairgrounds and Heinz Kaiser and Woodland Elementary Schools are both located in East Side Costa Mesa between the 55 Freeway and the Upper Newport Bay State Marine Conservation Area.

Figure 3-12: TCAC/HCD Opportunity Map – Education

Source: California Department of Housing and Community Development – AFFH Data Viewer

Opportunity Indicators

Opportunity indicators also help inform communities about disparities in access to opportunity. The Department of Housing and Urban Development (HUD) developed the opportunity indicators to help inform communities about disparities in access to opportunity, the scores are based on nationally available data sources and assess resident's access to key opportunity assets in the City. Table 3-24 provides the index scores (ranging from zero to 100) for the following opportunity indicator indices:

- **Low Poverty Index:** The low poverty index captures poverty in a given neighborhood. The poverty rate is determined at the census tract level. The higher the score, the less exposure to poverty in a neighborhood.
- **School Proficiency Index:** The school proficiency index uses school-level data on the performance of 4th grade students on state exams to describe which neighborhoods have high-performing elementary schools nearby and which are near lower performing elementary schools. The higher the score, the higher the school system quality is in a neighborhood.
- **Labor Market Engagement Index:** The labor market engagement index provides a summary description of the relative intensity of labor market engagement and human capital in a neighborhood. This is based upon the level of employment, labor force participation, and educational attainment in a census tract. The higher the score, the higher the labor force participation and human capital in a neighborhood.
- **Transit Trips Index:** This index is based on estimates of transit trips taken by a family that meets the following description: a three-person single-parent family with income at 50% of the median income for renters for the region (i.e. the Core-Based Statistical Area (CBSA)). The higher the transit trips index, the more likely residents in that neighborhood utilize public transit.
- **Low Transportation Cost Index:** This index is based on estimates of transportation costs for a family that meets the following description: a three-person single-parent family with income at 50 percent of the median income for renters for the region/CBSA. The higher the index, the lower the cost of transportation in that neighborhood.
- **Jobs Proximity Index:** The jobs proximity index quantifies the accessibility of a given residential neighborhood as a function of its distance to all job locations within a region/CBSA, with larger employment centers weighted more heavily. The higher the index value, the better the access to employment opportunities for residents in a neighborhood.
- **Environmental Health Index:** The environmental health index summarizes potential exposure to harmful toxins at a neighborhood level. The higher the index value, the less exposure to toxins harmful to human health. Therefore, the higher the value, the better the environmental quality of a neighborhood, where a neighborhood is a census block-group.

Table 3-24 below displays the opportunity indices by race and ethnicity for persons in Costa Mesa. According to the data, there is some poverty among the population of Costa Mesa, across all racial/ethnic groups. There are higher levels of poverty among the Hispanic and Native American populations. All racial/ethnic groups in Costa Mesa experience levels of environmental health below 50, meaning all residents are exposed to a higher degree of environmental pollutants. Otherwise, the data shows the City has high marks for school proficiency, labor market, transit, transportation cost, and job proximity.

Table 3-24: Opportunity Indicators, City of Costa Mesa							
(Costa Mesa, CA CDBG) Jurisdiction	Low Poverty Index	School Proficiency Index	Labor Market Index	Transit Index	Low Transportation Cost Index	Jobs Proximity Index	Environmental Health Index
Total Population							
White, Non-Hispanic	60.10	72.71	73.56	89.69	81.33	83.04	28.03
Black, Non-Hispanic	55.04	70.24	69.80	90.47	83.27	83.47	25.72

Access to Transit

Transit explores metrics that reveal the social and economic impact of transit, specifically looking at connectivity, access to jobs, and frequency of service. According to the data provided, Costa Mesa scored a 5.4 AllTransit performance score, illustrating a moderate combination of trips per week and number of jobs accessible that enable a moderate number of people to take transit to work. In comparison to neighboring cities – Huntington Beach scores a 4.4, Irvine scored a 3.6, Santa Ana scored a 6.6, and Newport Beach scored a 3.9. Access to transportation increases both the economic and environmental/health opportunities. Additionally, AllTransit provides the following data for Costa Mesa transportation:

- 98.8% of jobs are located within ½ of transit.
- 99,721 customer households have access to a business within a 30-minute transit commute.
- 2.29% of workers walk to work and 1.43% bike to work
- There are no households within a ½ miles of high frequency transit.
- On average, there are 6 transit routes within ½ of a block group on average.

Table 3-25: Opportunity Indicator – Transit					
Jurisdiction	AllTransit Performance Score	Transit Trips Per Week within 1/2 Mile	Jobs Accessible in 30-min trip	Commuters Who Use Transit	Transit Routes within 1/2 Mile
Costa Mesa	5.4	837	292,009	2.55%	6
Orange County	4.2	528	172,595	2.28%	4

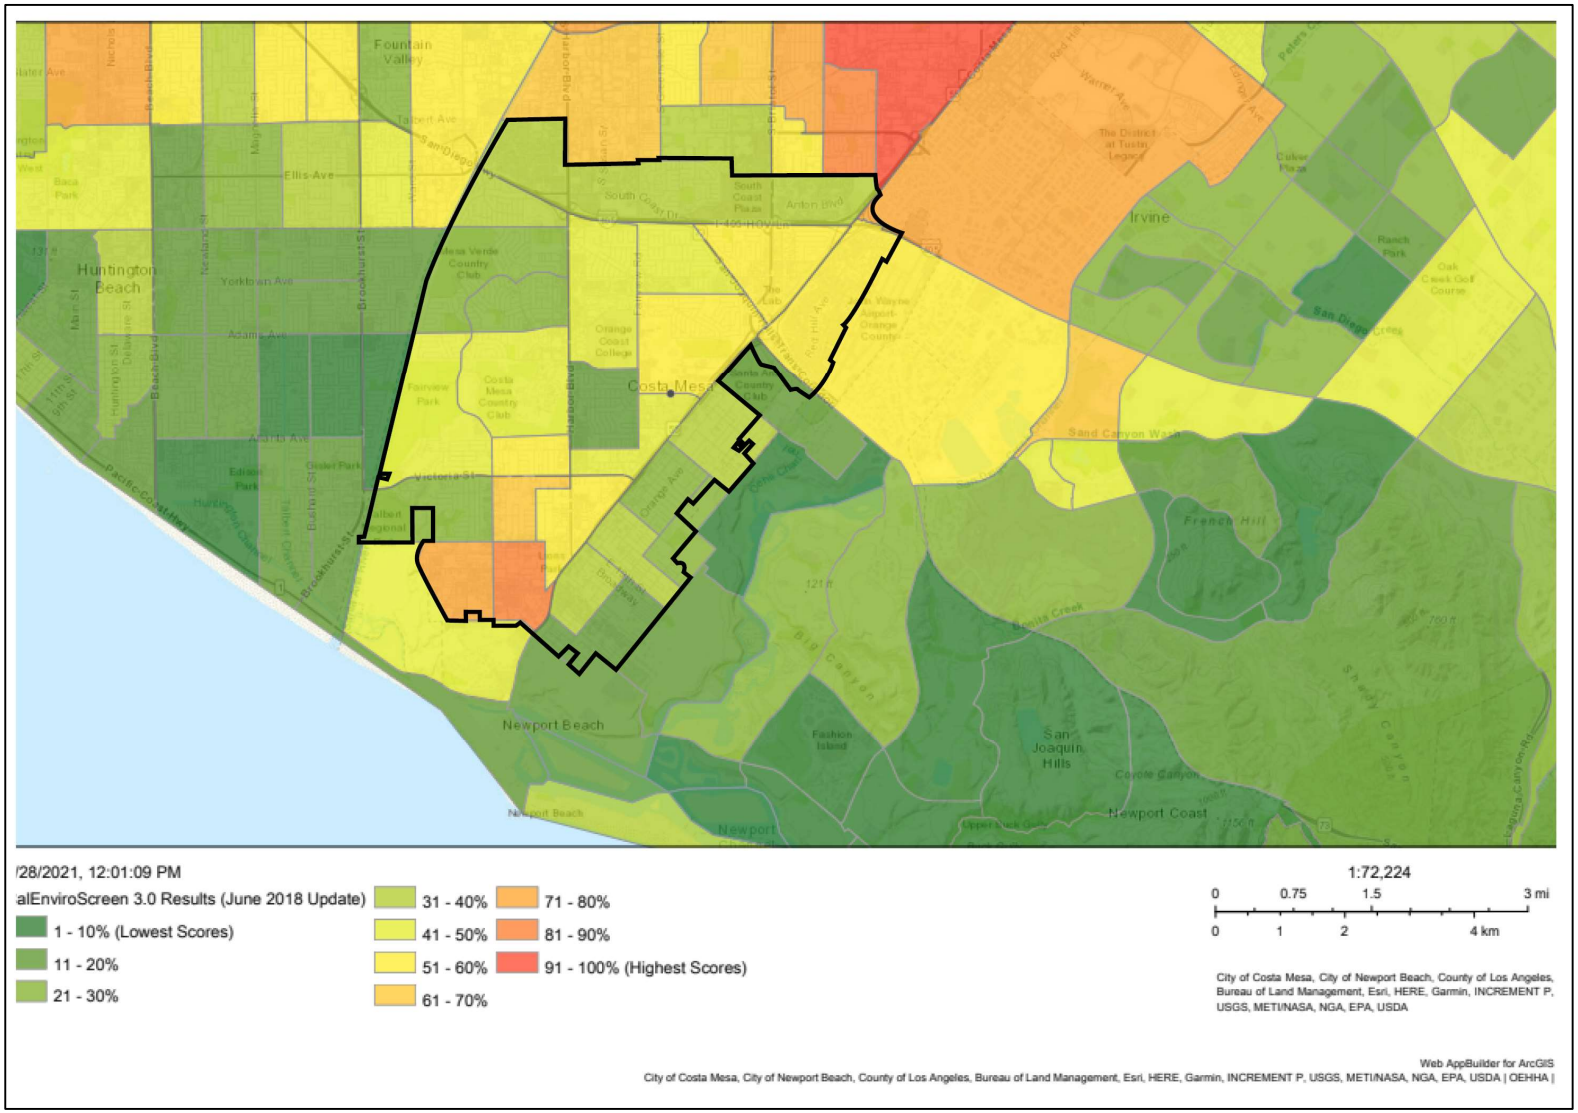
Environmental Justice



The California Office of Environmental Health Hazard Assessment (OEHHA) developed a screening methodology to help identify California communities disproportionately burdened by multiple sources of pollution called the California Communities Environmental Health Screening Tool (CalEnviro Screen). In addition to environmental factors (pollutant exposure, groundwater threats, toxic sites, and hazardous materials exposure) and sensitive receptors (seniors, children, persons with asthma, and low birth weight infants), CalEnviro Screen also takes into consideration socioeconomic factors. These factors include educational attainment, linguistic isolation, poverty, and unemployment. Research has shown a heightened vulnerability of people of color and lower socioeconomic status to environmental pollutants. Figure 3-14 below displays mapped results for the CalEnviro Screen in Costa Mesa and the Orange County region. The map shows that Costa Mesa is primarily moderate-scoring, with a few low-scoring census tracts and a couple high-scoring census tracts. High scores signify high levels of pollution burdens and low scores signify

low levels of pollution. Table 3-26 and 3-27 below identifies the CalEnviro Screen scores for the highest and lowest scoring census tracts in Costa Mesa, respectively.

Table 3-26: CalEnviro Screen 3.0 – Highest Scoring Census Tract (6059063605)			
Pollutant	**Percentile***	**Health Risk/Burden**	**Percentile***
Ozone	40	Asthma	47
PM 2.5	53	Low Birth Weight	78

3. Discussion of Disproportionate Housing Needs

The analysis of disproportionate housing needs within Costa Mesa evaluates existing housing need, need of the future housing population, and units within the community at-risk of converting to market-rate.

Existing Needs

As described in **Section 3.G.1** of this Housing Element, the Orange County Housing Authority (OCHA) administers Section 8 Housing Choice vouchers within the City of Costa Mesa. For the 2020 year, there were a total of 561 Section 8 voucher holders within the community: 110 for persons with disabilities, 394 for seniors, and 54 families with at least one dependent.

Housing Needs in Costa Mesa

A variety of factors affect housing needs for different households. Most commonly, disability, household income, and household characteristics shape the type and size of housing needed, as well as accessibility based on existing units in a City. **Table 3-28** through **3-35** display data for demographic characteristics of Costa Mesa, as compared to Orange County and the State of California. Additional detailed analysis of the Costa Mesa community is provided in **Chapter 2: Community Profile**.

Table 3-28 displays the data for persons with disabilities in the City, County, and State. Overall, about 10.6 percent of the California population has at least one disability. Orange County and the City of Costa Mesa both have lower percentages by about 2 percent less persons with disabilities. Ambulatory, Independent Living, and Cognitive Difficulties are the top three most common disabilities for all three jurisdictions, in order starting from most common. These figures may be reflective of disabilities commonly found amongst the senior population. Each of reasonable accommodation procedures and opportunity for accessible housing can provide increased housing security for the population with disabilities.

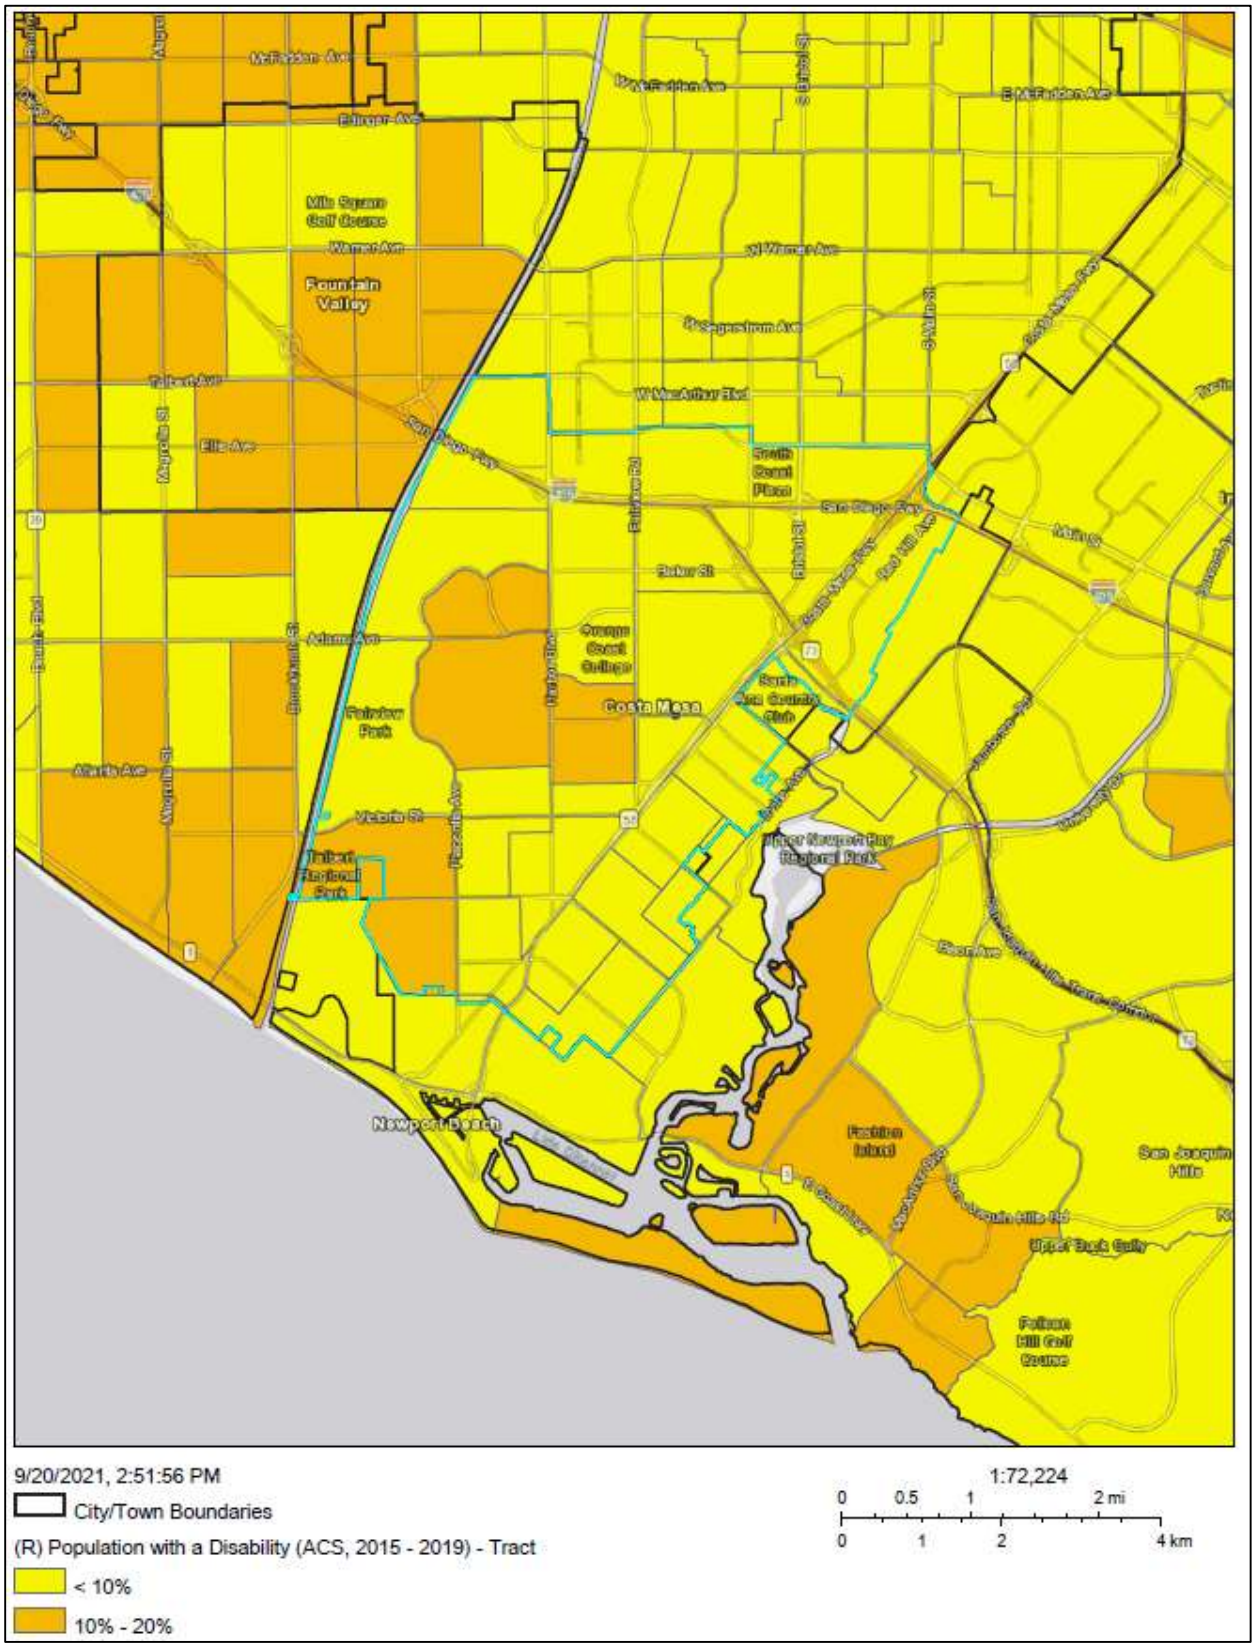

Table 3-28: Population by Disability Type by Geography, 2019

Disability Type	Costa Mesa	Orange County	California
Hearing Difficulty	2.4%	2.5%	2.9%
Vision Difficulty	1.6%	1.5%	2%
Cognitive Difficulty	3.4%	3.4%	4.3%
Ambulatory Difficulty	4.3%	4.5%	5.8%
Self-Care Difficulty	1.7%	2.2%	2.6%
Independent Living Difficulty	3.8%	4.3%	5.5%
Total with a Disability*	**8.3%**	**8.5%**	**10.6%**

* Total of noninstitutionalized population with at least one disability.
Source: American Community Survey, 5-Year Estimates, 2019.

Figure 3-15 shows the population with a disability throughout the City. As illustrated, the majority of the City has census tracts that report less than 10 percent of a disabled population. There are a few census tracts with a population of 10 to 20 percent reporting at least one disability.

Figure 3-15: Population with a Disability, Costa Mesa

Source: California Department of Housing and Community Development – AFFH Data Viewer

Table 3-29 and 3-30 displays household type and income data for the State, County, and City. Overall, Orange County has the largest percentage of family households (71.7 percent) and Costa Mesa has the smallest with about 10 percent less. Costa Mesa has the lowest percentage of female households without a spouse. Non-family households represent the largest household type in Costa Mesa at 40.5 percent, which is about 9 percent more than California and 12 percent more than Orange County. About 40 percent households in both the State and the County have at least one person above the age of 60, while there are about 30 percent of households in Costa Mesa with at least one person over the age of 60. Different household types have varying housing needs – senior households may benefit from reasonable accommodation procedures and being located near medical facilities, single-parent households may benefit from affordable housing options due to limited income, and family households may benefit from larger housing units located near community areas and schools.

Table 3-29: Population by Familial Status by Geography, 2019

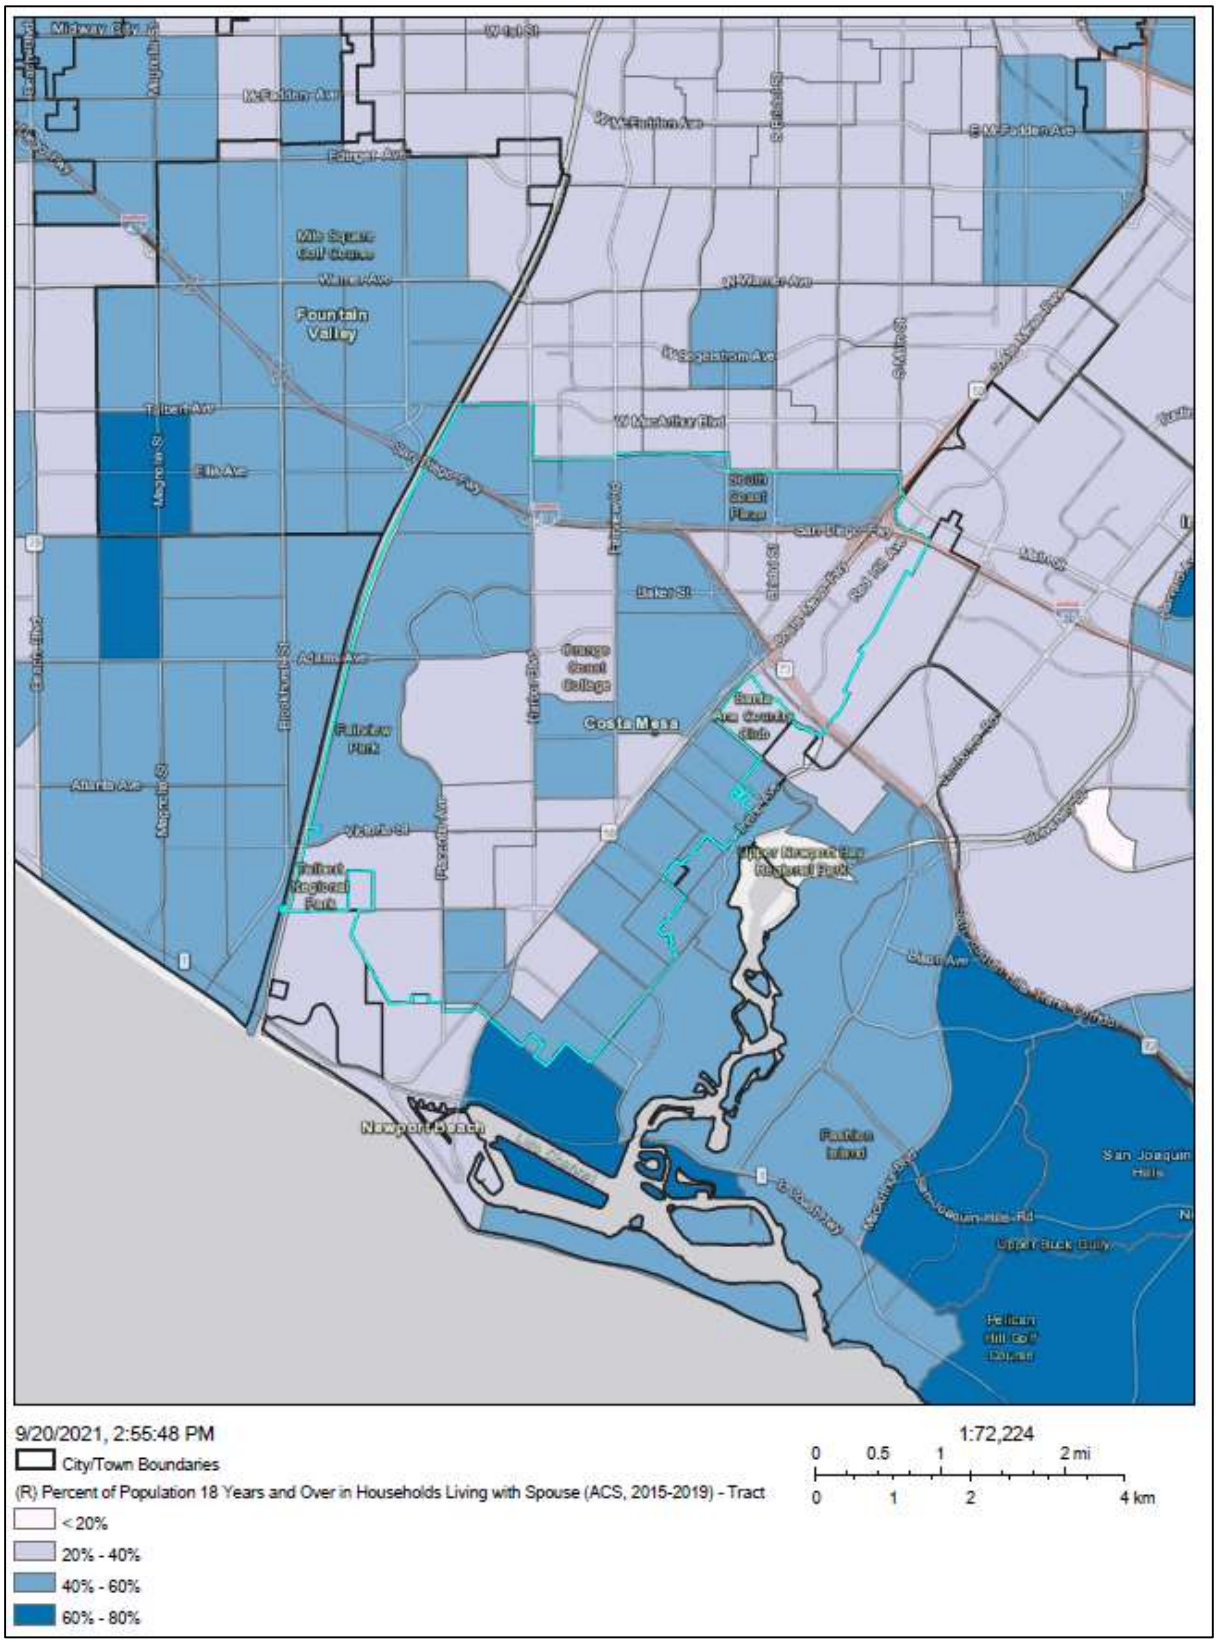
Familial Status	Costa Mesa	Orange County	California
Family Households	59.5%	71.7%	68.7%
Married-Couple Family Households	43.2%	54.9%	49.8%
With Related Children Under 18	29.3%	34.1%	34%
Female Households, No Spouse	10.1%	11.5%	13%
Non-Family Households	40.5%	28.3%	31.3%
Households with One or More People 60 Years+	29.5%	39.9%	39.1%
Total Households	**40,986**	**1,037,492**	**13,044,266**

Source: American Community Survey, 5-Year Estimates, 2019.

Table 3-30 provides a breakdown on incomes for the State, County, and City. The majority of households in each region earn between $100,000 and $200,000 annually. Orange County has the highest median income at $90,234, about $6,000 more than for Costa Mesa and $15,000 more than for California as a whole.

Table 3-30: Households by Income by Geography, 2019

Household Income	Costa Mesa	Orange County	California
Less than $10,000	4.5%	4.2%	4.8%
$10,000-$14,999	2.3%	2.7%	4.1%
$15,000-$24,999	5.6%	5.6%	7.5%
$25,000-$34,999	6%	6%	7.5%
$35,000-$49,999	9.5%	8.8%	10.5%
$50,000-$74,999	15.8%	14.6%	15.5%
$75,000-$99,999	13.9%	12.8%	12.4%
$100,000-$149,999	19.9%	18.6%	16.6%
$150,000-$199,999	10%	11.1%	8.9%
$200,000 or More	12.4%	15.5%	12.2%
Median Income	**$84,138**	**$90,234**	**$75,235**



Source: American Community Survey, 5-Year Estimates, 2019.

Figure 3-16 below shows the City has varying rates of married-couple households throughout its different census tracts. In general, the map shows the eastern and western edges of the City, which are predominantly single-family neighborhoods, have the highest rates of married-couple households (40-60 percent). Towards the center of the City, census tracts report approximately 20 to 40 percent married-couple households.

When compared to Figure 3-17, the census tracts with the highest rates of married-couple households overlap with the highest rates of children living in married-couple family households. Costa Mesa has a generally high propensity of children living in married-couple family households throughout most census tracts. In comparison to neighboring communities, however, Costa Mesa has less census tracts with children in married-couple family households.

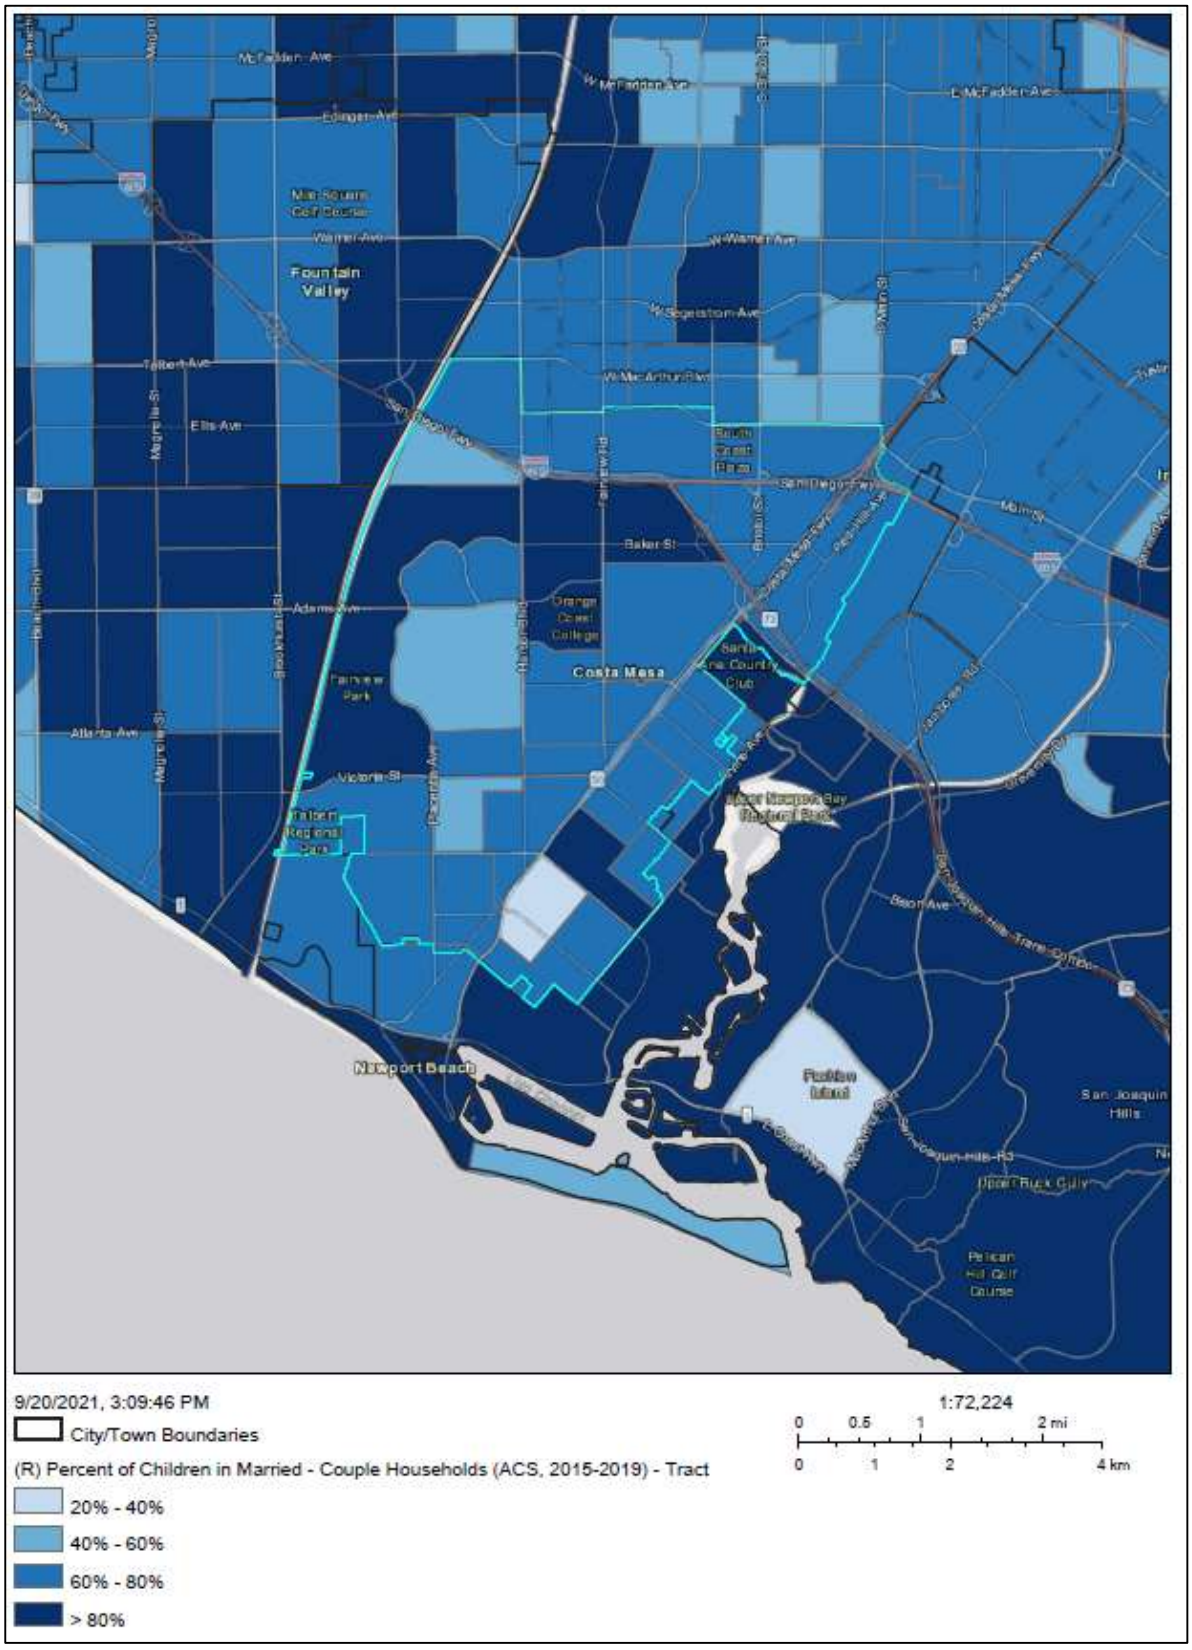


Figure 3-18 shows the City, as with its neighboring communities, has very low rates of children living in female-headed households with no spouse present. Most of the City reports approximately 20 percent of less, except for a census tract towards the southern edge of the City which reports 40 to 60 percent of children living in female-headed households. This same census tract is also one of two which reports 20 to 40 percent of its population over the age of 18 living alone, as illustrated in Figure 3-19. The rest of the City has fairly low rates of individuals living alone, with the remaining census tracts reporting less than 20 percent.

Table 3-31 displays data for households experiencing overpayment or cost burden in the State, County, and City. Housing cost burden can cause mainly displacement, which may create limited access to essential goods and community, as well as employment by potentially increasing commute times. The percentages of households that experience a cost burden greater than 30 percent is overall similar amongst the State, County, and City. Costa Mesa experiences higher rates of cost burden than the County by about two percent. The City also has the largest percentage of households with a cost burden over 50 percent at about 21.6 percent, compared to about 19 percent in both the State and County. Increased opportunity for affordable housing and housing assistance funds help to prevent cost burden on households.

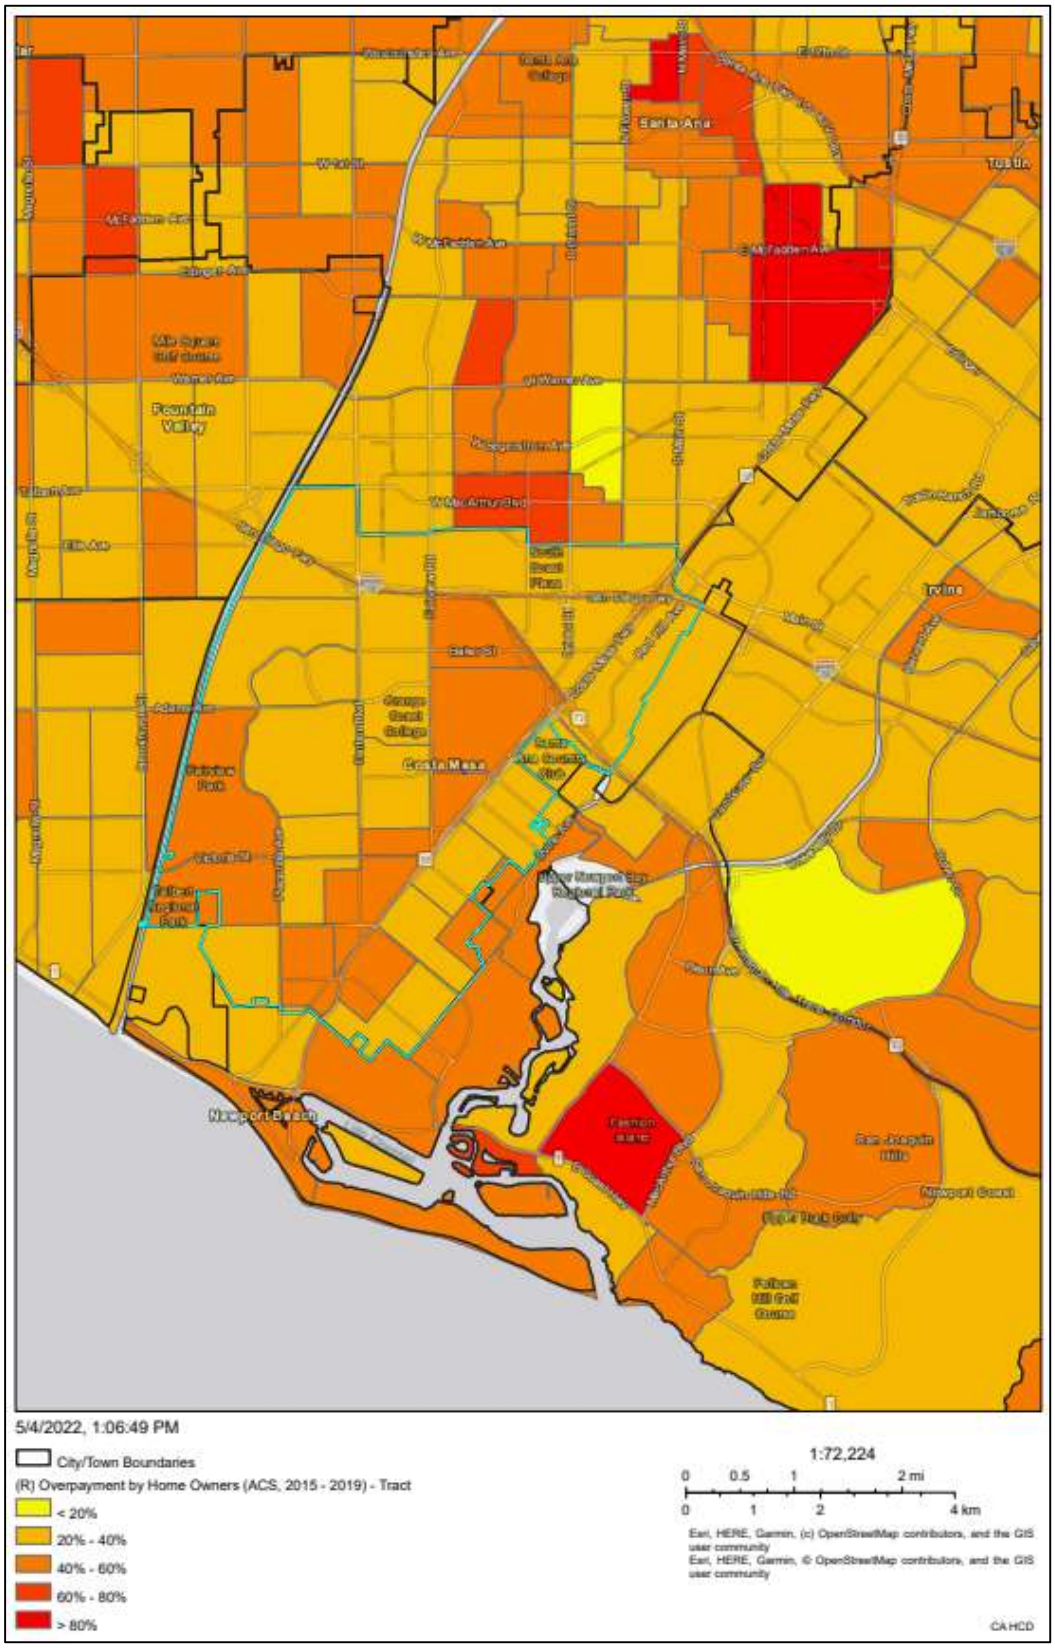

Table 3-31: Household Overpayment by Geography, 2019

Overpayment	Costa Mesa	Orange County	California
Cost Burden > 30%	42.1%	40.5%	40.1%
Cost Burden > 50%	21.6%	19.3%	19.4%
Cost Burden Not Available	1.3%	1.4%	1.4%

Source: HUD Consolidated Planning/CHAS Data, 2013-2017.

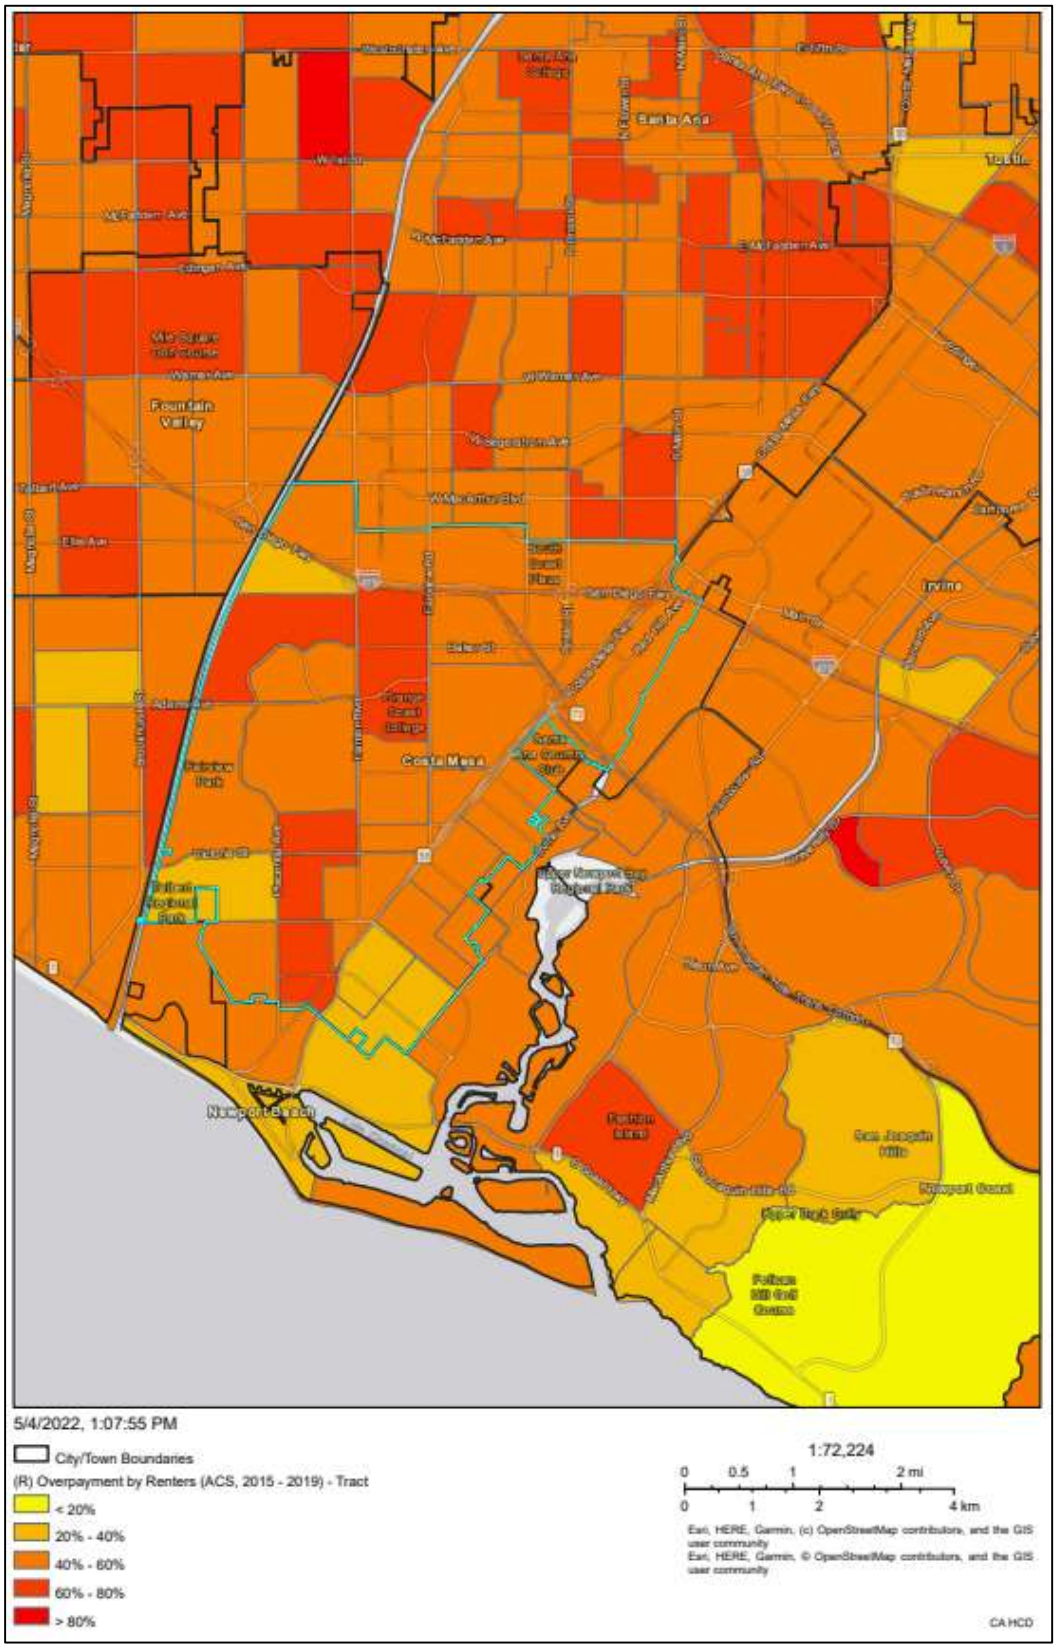

Figure 3-20 shows household overpayment for homeowners and Figure 3-21 shows household overpayment for renters. As illustrated, overpayment disproportionately affects Costa Mesa renters compared to homeowners. Overpayment for homeowners is greater in census tracts along the 55 Freeway. Overpayment for renters is higher to the south of the City in census tracts along Placentia Avenue and to the north in Mesa Verde and along Harbor Boulevard.

Figure 3-20: Overpayment by Homeowners, Costa Mesa

Source: California Department of Housing and Community Development – AFFH Data Viewer

Figure 3-21: Overpayment by Renters, Costa Mesa

Source: California Department of Housing and Community Development – AFFH Data Viewer

Table 3-32 displays data for household tenure (homeowners and renters) for the State, County, and City. Homeownership is a crucial foundation for households with low incomes to build strength, stability, and independence. The opportunity for transition into the homebuyer's market is important in a healthy housing market. Table 3-32 shows that the City of Costa Mesa has a much lower percentage of homeowners than the County and State, reporting about 38 percent, compared to 57 percent in the County and 55 percent in the State. Costa Mesa also has higher rates of renter at 62 percent, compares to 43 percent in the County and 45 percent in the State.

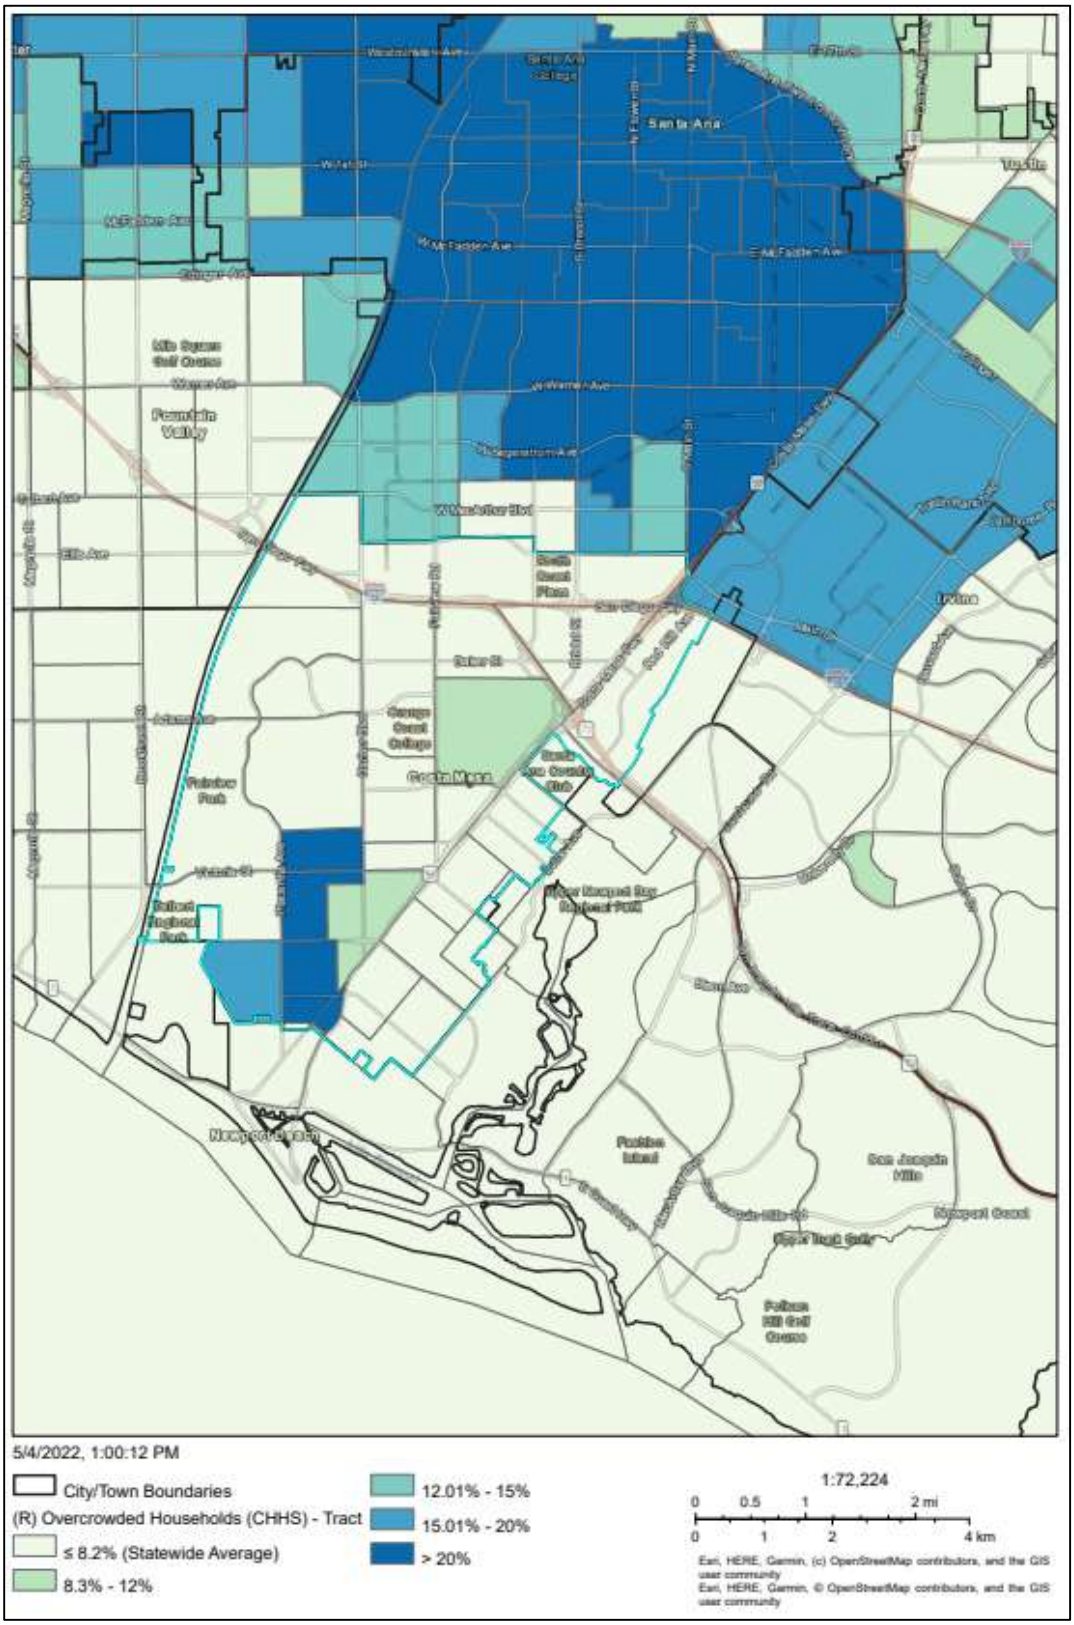

Table 3-32: Households by Tenure by Geography, 2019			
Household Tenure	Costa Mesa	Orange County	California
Owner Households	38.3%	57.4%	54.8%
Renter Households	61.7%	42.6%	45.2%
Total Occupied Housing Units	**40,986**	**1,037,492**	**13,044,266**
Source: American Community Survey, 5-Year Estimates, 2019.			

Additionally, Table 3-33 displays data for overcrowding. Overcrowding is defined as between 1.01 and 1.5 persons per bedroom in a household, and severe overcrowding is defined as more than 1.51 persons per bedroom. Overcrowding often occurs when nonfamily members combine incomes to live in one household, such as college students and roommates. Overcrowding also occurs when there are not enough size-appropriate housing options for large or multigenerational households. The City has the lowest percentages of owner-occupied households with overcrowded and severely overcrowded households compared to the County and State. Renters in Costa Mesa are disproportionately affected by overcrowding when compare to homeowners. Overall, across all three regions, owners were less affected by overcrowding and severe overcrowding.

Figure 3-22 also shows overcrowded households within the City. The figure shows three census tracts with over 20 percent of overcrowded households along Placentia Avenue west of the 55 Freeway.

Table 3-33: Households by Overcrowding by Geography, 2019			
Overcrowding and Tenure	Costa Mesa	Orange County	California
Owner Households			
Overcrowded	0.6%	1.5%	1.6%
Severely Overcrowded	0.2%	0.6%	0.6%
Renter Households			
Overcrowded	5.3%	4.2%	3.6%
Severely Overcrowded	2.7%	2.6%	2.4%
Source: American Community Survey, 5-Year Estimates, 2019.

Housing Stock in Costa Mesa

Table 3-34 and 3-35 display comparative housing stock data for the State, County, and City. Table 3-20 below shows data for occupied housing units by type. A variety of housing stock provides increased opportunity in communities for different size and household types. The majority of housing stock in Costa Mesa is multi-unit developments (50.6 percent for 2 or more units). Single-family housing units represent about 48 percent of the housing stock in Costa Mesa. Comparatively, single family units represent about 63 percent and 64 percent of the housing stock in the County and the State, respectively.

Table 3-34: Occupied Housing Units by Type by Geography, 2019			
Housing Unit Type	Costa Mesa	Orange County	California
1-Unit, Detached	37.9%	50.6%	57.7%
1-Unit, Attached	9.2%	12.3%	7.0%
2 Units	2.9%	1.6%	2.4%
3 or 4 Units	9.6%	6.9%	5.5%
5 to 9 Units	9.4%	6.7%	6.0%
10 to 19 Units	9.1%	5.4%	5.2%
20 or More Units	19.6%	13.7%	12.3%
Mobile Home	2.2%	2.7%	3.7%
Boat, RV, Van, etc.	0.2%	0.1%	0.1%
Source: American Community Survey, 5-Year Estimates, 2019.			

Table 3-35 below displays housing stock by year built for the City, County, and State. Older housing units generally require more upkeep, regular maintenance, and can cause a cost burden on both renters and homeowners. The majority of Costa Mesa's housing stock (68.2 percent) was built during a housing boom between 1950 and 1979. The trend is similar for the County and State, with majority of units built between 1980 and 2013. Overall, increased numbers of older housing can lead to displacement, cost burden, and substandard living conditions. An analysis of the housing stock in provided in **Chapter 2: Costa Mesa Community Profile**.

Table 3-35: Housing Unit by Year Built by Geography, 2019			
Year Built	Costa Mesa	Orange County	California
Built 2014 or later	2.6%	2.7%	1.7%
Built 2010 to 2013	1.0%	2.0%	1.7%
Built 2000 to 2009	5.2%	8.3%	11.2%
Built 1990 to 1999	6.3%	11.7%	10.9%
Built 1980 to 1989	12.3%	14.9%	15.0%
Built 1970 to 1979	23.6%	23.3%	17.6%
Built 1960 to 1969	26.7%	19.5%	13.4%
Built 1950 to 1959	17.9%	13.0%	13.4%
Built 1940 to 1949	3.1%	2.1%	5.9%
Built 1939 or earlier	1.3%	2.5%	9.1%
Source: American Community Survey, 5-Year Estimates, 2019.			

Future Growth Need

The City's future growth need is based on the RHNA production of 2,919 very low and 1,794 low-income units within the 2021-2029 planning period. Appendix B of this Housing Elements shows the City's ability to meet its 2021-2029 RHNA need at all income levels. This demonstrates the City's ability to accommodate the anticipated future affordable housing needs of the community.

4. Displacement Risk

The potential for economic displacement risk can result from a variety of factors, including large-scale development activity, neighborhood reinvestment, infrastructure investments, and changes in local and regional employment opportunity. Economic displacement can be an inadvertent result of public and private investment, where individuals and families may not be able to keep pace with increased property values and market rental rates.

Urban Displacement

The Urban Displacement Project developed a neighborhood change database to map neighborhood transformations and identify areas vulnerable to gentrification and displacement. This data was developed to assist local decision makers and stakeholders better plan for existing communities and provide additional resources to areas in need or at-risk of displacement and gentrification. Table 3-36 provides the criteria used to identify each displacement typology and the total number of Costa Mesa Census Tracts that currently fall within each category.

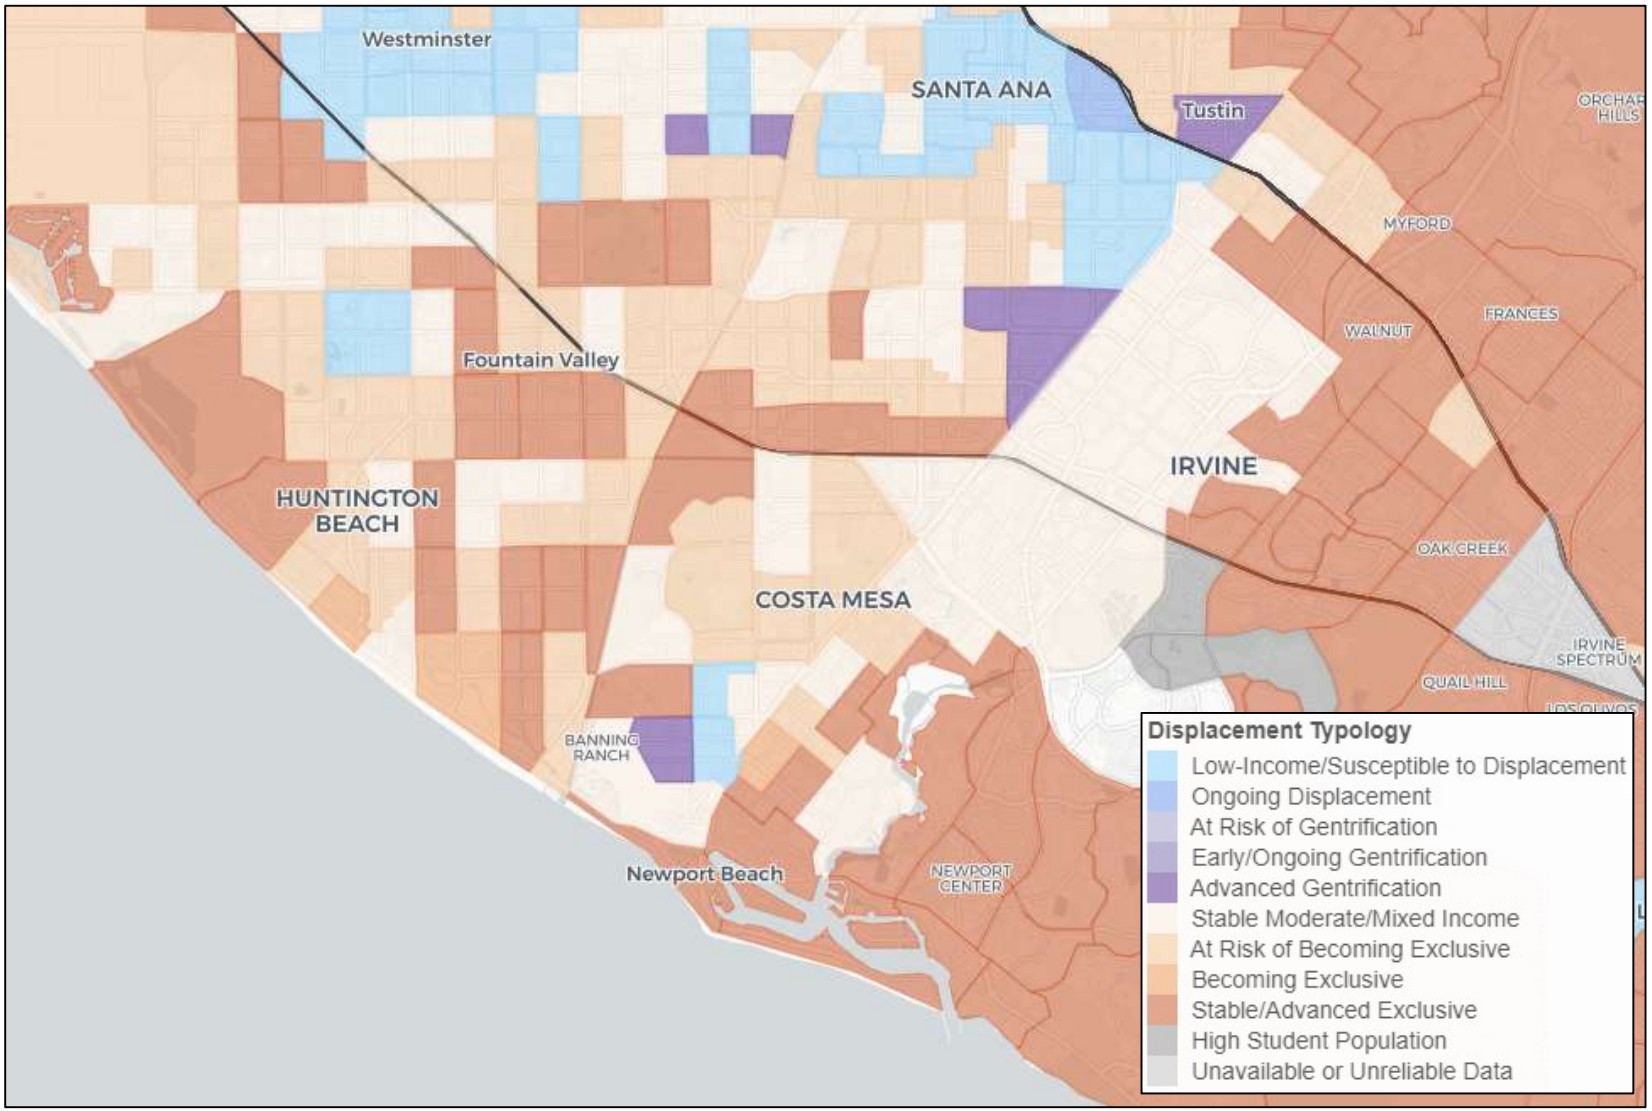

Table 3-36: Displacement Typology Criteria and Costa Mesa Census Tracts

Modified Types and Criteria	Census Tracts
Low-Income/Susceptible to Displacement • Low or mixed low-income tract in 2018.	6059063701 6059063605
Ongoing Displacement of Low-Income Households • Low or mixed low-income tract in 2018. • Absolute loss of low-income households, 2000-2018.	--
At Risk of Gentrification • Low or mixed low-income tract in 2018. • Housing affordable to low or mixed low-income households in 2018. • Didn't gentrify 1990-2000 OR 2000-2018. • Marginal change in housing costs OR Zillow home or rental value increases in the 90th percentile between 2012-2018. • Local and nearby increases in rent were greater than the regional median between 2012-2018 OR the 2018 rent gap is greater than the regional median rent gap.	--
Early/Ongoing Gentrification • Low or mixed low-income tract in 2018. • Housing affordable to moderate or mixed moderate-income households in 2018. • Increase or rapid increase in housing costs OR above regional median change in Zillow home or rental values between 2-12-2018. • Gentrified in 1990-2000 or 2000-2018.	--
Advanced Gentrification • Moderate, mixed moderate, mixed high, or high-income tract in 2018. • Housing affordable to middle, high, mixed moderate, and mixed high-income households in 2018.	6059063604

Table 3-36: Displacement Typology Criteria and Costa Mesa Census Tracts		
Modified Types and Criteria	**Census Tracts**	
• Marginal change, increase, or rapid increase in housing costs. • Gentrified in 1990-2000 or 2000-2018.		
Stable Moderate/Mixed Income • Moderate, mixed moderate, mixed high, or high-income tract in 2018.	6059062610 6059063908 6059063902 6059063803	6059063702 6059063201 6059063101
At Risk of Becoming Exclusive • Moderate, mixed moderate, mixed high, or high-income tract in 2018. • Housing affordable to middle, high, mixed moderate, and mixed high-income households in 2018. • Marginal change or increase in housing costs.	6059063903 6059063904 6059063102 6059063906 6059063905	6059063808 6059063802 6059063807 6059063202
Becoming Exclusive • Moderate, mixed moderate, mixed high, or high-income tract in 2018. • Housing affordable to middle, high, mixed moderate, and mixed high-income households in 2018. • Rapid increase in housing costs. • Absolute loss of low-income households, 2000-2018. • Declining low-income in-migration rate, 2012-2018. • Median income higher in 2018 than in 2000.	6059063301	
Stable/Advanced Exclusive • High-income tract in 2000 and 2018 • Affordable to high or mixed high-income households in 2018. • Marginal change, increase, or rapid increase in housing costs.	6059063907 6059063805 6059063806	6059063601 6059063302 6059063103
Source: Urban Displacement Project, University of California Berkeley (2021).		

Table 3-36 and Figure 3-23 both show the City is mostly made up of census tracts which are currently identified as "exclusive" or are in the process/at-risk of becoming exclusive. These areas overlap with most of the City's single-family neighborhoods. Two census tracts on the west-side of Costa Mesa and to the east of Placentia Avenue are currently identified as low-income and susceptible to displacement. The south-western-most census tract to the west of Placentia Avenue is categorized as "Advanced Gentrification", signifying a rapid increase in housing cost over the past few years.

Figure 3-23: Urban Displacement Project - Gentrification and Displacement

Source: Urban Displacement Project, University of California Berkeley (2021).

Inventory of Assisted Affordable Housing

Affordable covenants help to ensure that certain housing units remain affordable for an extended period of time. Covenants provide lasting affordable options to low and very low-income households in a community. Table 3-37 below provides a list of 1,144 housing units with affordability covenants, of which 75 housing units are at-risk of converting to market-rate between 2021 and 2031.

Jurisdictions are required by State Housing Element Law to analyze government-assisted housing that is eligible to convert from lower income to market rate housing over the next 10 years. State law identifies housing assistance as a rental subsidy, mortgage subsidy or mortgage insurance to an assisted housing development. Government assisted housing may convert to market rate housing for several reasons, including expiring subsidies, mortgage repayments, or expiration of affordability restrictions. Consistent with the requirements to analyze the impacts of the potential conversion of these units to market-rate units, this section provides an analysis of preservation of assisted housing units at-risk of conversion.

Table 3-37: Affordable Housing Units in Costa Mesa with Covenants

Name of Project	Address	Target Group	Potential Expiration	Funding	Target Income Level	Assisted Units

Cost of Preservation of Units

While there are many options to preserving units including providing financial incentives to project owners to extend lower income use restrictions, purchasing affordable housing units by a non-profit or public agency, or providing local subsidies to offset the difference between the affordable and market rate units, the strategy considered below is to provide local rental subsidy to residents. The rent subsidy would provide financial assistance to residents if their affordable units converted to market rate. To determine the subsidy needed, Fair Market Rents were compared to market rate rents.

Table 3-38: Estimated Monthly Subsidy to Preserve "At-Risk" Units						
Unit Size	Monthly Rents		Number of Units At-Risk	Difference	Monthly Subsidy	Annual Subsidy
	Fair Market Rents[1]	Market Rate[2]				
Efficiency	$1,716	$2,293	0	$577	$0	$0
1-Bedroom	$1,905	$2,707	75	$802	$60,150	$721,800
2-Bedroom	$2,324	$3,352	0	$1,028	$0	$0
3-Bedroom	$3,178	$3,712	0	$534	$0	$0
4-Bedroom	$3,674	N/A	0	$0	$0	$0
					TOTAL	$721,800

Cost of Replacement of Units

The City of Costa Mesa can also consider the cost of replacing the units with new construction. Construction cost estimates include all hard and soft costs associated with construction in addition to per unit land costs. The analysis assumes the replacement units are apartments with concrete block with steel frame buildings and parking provided on-site. Square footage estimates are based on estimated size of units to be replaced and assume housing units are developed on multi-family zoned properties. Land costs have been determined on a per unit basis.

Table 3-39: Replacement Cost by Unit Type of At-Risk Units					
Size of Unit	Cost Per Square Foot[1]	Average Square Foot/Unit[2]	Replacement Cost/Unit[3]	Number of Units	Total Replacement Cost
Efficiency	131.24	508	$66,670	0	$0
1-Bedroom	131.24	761	$99,874	75	$7,490,523
2-Bedroom	131.24	1,080	$141,739	0	$0
3-Bedroom	131.24	1,390	$182,424	0	$0
4-Bedroom	131.24	N/A	N/A	0	$0
				TOTAL	$7,490,523

3. Includes financing and land acquisition costs of $30,000 per unit.

Resources for Affordable Housing Units

A variety of programs exist to help cities acquire, replace, or subsidize at-risk affordable housing units. The following summarizes financial resources available:

- Community Development Block Grant (CDBG) – CDBG funds are awarded to cities on a formula basis for housing activities. The primary objective of the CDBG program is the development of viable communities through the provision of decent housing, a suitable living environment and economic opportunity for principally low- and moderate-income persons. Eligible activities include administration, fair housing, energy conservation and renewable energy sources, assistance for economic development, public facilities and improvements and public services.
- HOME Investment Partnership – Local jurisdictions can receive funds by formula from the Department of Housing and Urban Development (HUD) to increase the supply of decent, safe, sanitary, and affordable housing to lower income households. Eligible activities include housing acquisition, rehabilitation, and development, homebuyer assistance, and rental assistance.
- Section 8 Rental Assistance Program – The Section 8 Rental Assistance Program provides rental assistance payments to owners of private, market rate units on behalf of very low-income tenants, senior citizens, disabled and/or handicapped persons, and other individuals for securing affordable housing.
- Section 202/811 Program – Non-profit and consumer cooperatives can receive no-interest capital advances from HUD under the Section 202 program for the construction of very low-income rental housing with the availability of supportive services for seniors and persons with disabilities. These funds can be used in conjunction with Section 811, which can be used to develop group homes, independent living facilities and immediate care facilities. The capital advance funding can also provide project rental assistance for the properties developed using the funds. Eligible activities include acquisition, rehabilitation, new construction, and rental assistance.
- California Housing Finance Agency (CalHFA) Multifamily Programs – CalHFA's Multifamily Programs provide permanent financing for the acquisition, rehabilitation, and preservation of new construction of rental housing that includes affordable rents for low- and moderate-income

families and individuals. One of the programs is the Preservation Loan program which provides acquisition/rehabilitation and permanent loan financing designed to preserve or increase the affordability status of existing multifamily housing projects.

- Low-Income Housing Tax Credit (LIHTC) – This program provides tax credits to individuals and corporations that invest in low-income rental housing. Tax credits are sold to those with high tax liability and proceeds are used to create housing. Eligible activities include new construction, rehabilitation, and acquisition of properties.
- California Community Reinvestment Corporation (CCRC) – The California Community Reinvestment Corporation is a multifamily affordable housing lender whose mission is to increase the availability of affordable housing for low-income families, seniors, and residents with special needs by facilitating private capital flow from its investors for debt and equity to developers of affordable housing. Eligible activities include new construction, rehabilitation, and acquisition of properties.

Qualified Entities for Preservation of Affordable Housing Units

The following organizations may potentially assist in preserving future at-risk units:

- Jamboree Housing Corporation
- Irvine Housing Opportunities, Inc.
- Bridge Housing Corporation
- The Irvine Company
- Orange County Housing Authority
- Housing Corporation of America
- Southern California Housing Development Corporation
- Century Housing

Quantified Objectives

Housing Element law requires that cities establish the maximum number of units that can be preserved over the planning period. The City's objective it to preserve the 75 affordable housing units "at-risk" of converting to market rate through policy programs provided in Chapter 4: Housing Plan.

SB 330

Effective January 1, 2020, Senate Bill 330 (SB 330) aims to increase residential unit development, protect existing housing inventory, and expedite permit processing. Under this legislation, municipal and county agencies are restricted in ordinances and polices that can be applied to residential development. The revised definition of "Housing Development" now contains residential projects of two or more units, mixed-use projects (with two-thirds of the floor area designated for residential use), transitional, supportive, and emergency housing projects. SB330 sets a temporary 5-year prohibition of residential density reduction associated with a "housing development project", from January 1, 2020, to January 1, 2025. For example, during this temporary prohibition, a residential triplex cannot be demolished and replaced with a duplex as this would be a net loss of one unit.

The City is committed to making diligent efforts to engage underrepresented and disadvantaged communities in studying displacement.

5. Summary of Fair Housing Analysis

The analysis conducted in this section regarding fair housing issues within Costa Mesa yielded the following conclusions:

- The dissimilarity analysis shows that nearly all racial and ethnic groups experience moderate to high segregation in the City of Costa Mesa. The Native Hawaiian and the Hispanic population experience the highest levels of segregation, meaning that to create a more integrated city, more than 45 percent of each respective population would need to move into a predominantly white census tract.
- There are no racially or ethnically concentrated census tracts (RECAPs) within Costa Mesa as identified by HUD. This indicates that there are no census tracts within the City with a non-white population of 50 percent or more or any census tracts that have a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan area. However, there is one area identified as high segregation and poverty.
- The data shows that Costa Mesa has ten block groups which meet the criteria for racially concentrated areas of affluence (RCAA). RCAAs are areas which the population is predominantly white with an income over $125,000 or higher.
- The UC Davis Regional Opportunity Index shows that the majority of residents within Costa Mesa have a moderate to high level of achievement and attainment. However, there are two census tracts in the south western portion of the City which show the lowest levels of attainment and achievement for residents, these areas also overlap with the high segregation and poverty area identified by the TCAC map (Figure 3-5b).
- The UC Davis Regional Opportunity Index (ROI)shows that the majority of residents within Costa Mesa have the highest level of access to opportunity throughout the City. Additional analysis of the ROI maps show that the northern portion of the City has moderate to lower levels of access to affordable or appropriate housing.
- The City provides moderate transit trip opportunity, a score of 5.4. Additionally, about 98.8% of all City jobs are within ½ mile of transit but just under 3 percent of the working population uses public transit as a primary source of transportation.
- The City has demonstrated the ability to meet the anticipated future affordable housing needs of the community through the designation of sites to meet the very low and low income RHNA need (Appendix B: Candidate Sites and Housing Resources). These sites are dispersed throughout the community and are identified on sites with high opportunity for residential development.
- There are 75 current units with affordable covenants at risk of converting to market rate before the year 2029 in the City.
- The CalEnviro Screen mapping tool (2018) identified most of the City as “moderate” to “low to moderate” scoring, indicating moderate exposure to harmful pollutants. Additionally, the area which is identified as high segregation and poverty is the highest scoring census tract on the CalEnviro Screen map, indicating high exposure to harmful pollutants.

6. Assessment of Contributing factors to Fair Housing in Costa Mesa

Regionally Identified Contributing Factors

As identified by the AI and the above analysis the City of Costa Mesa experiences the following local contributing factors to fair housing:

- Housing Discrimination – The 2020 AI identified housing discrimination as an impediment to fair housing choice in the City. The AI reports that 609 households in Costa Mesa received fair housing services relating to general housing issues and discrimination allegations. The Fair Housing Foundation (FHF) received 65 housing discrimination inquiries with 9 based on physical or mental disability, 8 related to race, 2 related to national origin, 2 related to gender, 1 related to sexual orientation, and 5 related to familial status.
    - Through CDBG funding the City contracts with the Fair Housing Foundation to provide educational and support services to persons who experience housing discrimination in Costa Mesa. Services include: 1) responding to discrimination inquiries and complaints through screening and counseling, 2) documenting discrimination complaints by opening fair housing cases, 3) investigating discrimination complaints through extensive testing, and 4) resolving discrimination complaints through conciliation, mediation, administrative agency referrals, and litigation.
- Racial and Ethnic Segregation – The Analysis above identifies moderate segregation through the dissimilarity index analysis. Persons who identify as Hispanics, Asian, Native Hawaiian, American Indian, and Black experience over 30 percent dissimilarity with the white population in Costa Mesa. Additionally, while the R/ECAP analysis did not identify R/ECAPs in the City, there are two racially and ethnic concentrated areas of poverty near the City consisting of primarily Hispanic and Asian population.
    - During the AI report period, the City distributed literature on fair housing in English, Spanish, and Vietnamese to target neighborhoods and in conjunction with other neighborhood improvement efforts. This information was also provided at workshop events, at community centers, and at City Hall.
    - The City will continue to outreach specifically to low and very low-income residents as wells considered targeted outreach to residents with moderate and high levels of segregation,
- Unfair Lending – The Lending Analysis identifies lower rates of home loan approval for moderate, low, and very low-income residents. Additionally, applicants in Costa Mesa who identify as Black experience both lower rates of home loan approval and purchase and higher rates of home loan denial, indicating disparity in access to funding.
    - Currently, the City does not offer homebuyer assistance, but the AI reports that information on housing rehab programs are available on the City's website. The City will continue to provide important ownership information on the City's website. Costa Mesa recognizes that an educated community is an empowered commitment and will considered target education and outreach about loan purchase to residents.
- Overcrowding – the Analysis of Existing Housing Needs in Costa Mesa identified a significantly higher percentage of renters who experience overcrowding in the City than in the County and the

State. Overcrowding can be an indicator of multi-generational living, however in renter ship it is often an indicator that there are not sufficient affordable housing options causing residents to increase the number of persons per unit to lower the overall cost of housing. Overcrowding may also indicate a lack of adequate housing unit types available to residents with large families. While the City does not build housing, they will work with developers and interested parties to increase feasibility and opportunities for both affordable housing and multigenerational housing.

Locally Identified Contributing Factors

There are a number of factors and elements that contribute to and cause fair housing issues. The following lists a number of contributing factors within the City of Costa Mesa:
