Subject: Arts Commission

Please forward to all Arts Commissioners and please confirm this has been done

My name is Jim Fitzpatrick

I have been advocating that this Commission, a decision making body, unlike an advisory role like Committee, needs to understand and influence the Cannabis tax of .5% dedicated to the Arts

By my calculation there is over \$400,000 available right now

There is no inventory or reporting on how much

There is no record in the last year of any decision at the Arts Commission

Perhaps in my review of every agenda in the last year, I missed something

But how in the world of accountability can this be that the Arts Commission, a decision making body, not advisory, has no idea let alone no influence on how much funds have been generated and how much funds have been spent, if any

We have a City to save

Will you help me?

PS. I just put in a Public Records Request to get this information.
