PHASE I ENVIRONMENTAL SITE ASSESSMENT For Property at: 1540 SUPERIOR AVENUE COSTA MESA, CALIFORNIA 92627

November 16, 2018

Environmental Professional Certification: I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR 312.10 (All Appropriate Inquiry).

Curole Mission

Carole Missirlian, PE Principal

Standard Certification: I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Curake Mission

Carole Missirlian, PE California PE Civil – 45994 Exp. 12/31/2018

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed for the property located at 1540 Superior Avenue in Costa Mesa, Orange County, California. This Phase I ESA has been prepared by (QA)2 Environmental for the sole use of First Choice Bank, following ASTM 1527-13 guidelines, and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312).

General Site Description

The subject property consists of one, approximately 18,675 square feet parcel (APN 425-351-06), located at the northeast corner of Superior Avenue and Industrial Way, in a light industrial neighborhood. Adjoining properties include auto repair shop and office building to the east, City of Newport Beach Corporate Yard including fueling facility to the south, Share Our Services to the north and light industrial businesses to the west.

Site Reconnaissance

The Property is developed with one, approximately 4,300 square feet commercial building, and an approximately 860 square feet auto parking structure. At the time of the site inspection conducted on October 12, 2018, the Property was occupied by JHS Auto Collectors. The building was used for display of antique cars, offices were located on the northeastern part and a vehicle storage area was located on the eastern part. No vehicle maintenance or restoration is performed on site. No use of environmental concern was observed at the time of the site inspection.

Historical Land Use

(QA)2 Environmental reviewed standard historical information sources, including historical aerial photographs, Sanborn maps, City Directories, topographic maps, and building permits. The subject property was initially undeveloped from prior to 1896 through the 1940s (Source: topographic maps and aerial photographs). The property was occupied by a residence in the 1950s. According to reviewed historical records, including Building Department records, the Property was developed with a gasoline station in 1964; three 5,000-gallon fuel tanks and one 280-gallon waste oil tanks were installed. Use of the station continued until 1972. In 1973, an addition was constructed to the existing building, for use as a plumbing shop. The Property was used as a plumbing shop up to 1994. In 1994, an addition was constructed to the building, and a separate parking garage. The Property has been occupied by JH Siroonian - JHS Auto Collectors since 1994.

Environmental Agencies/Databases Search, Phase 2 Investigation

Based on our review of the EDR Radius Map report and records obtained from the environmental agencies, the following issues of environmental concern were identified:

V

Issue 1:

A gasoline station was constructed at the Property in 1964, with use of the station discontinued in 1972. Per Building Department records, three 5000-gallon tanks (USTs) and one 280-gallon waste oil tank were installed in 1964. A 1972 building permit was issued for demolition of the station and removal of three tanks. However, the tanks were not removed at that time. A building addition was constructed in 1973. The fuel tanks were used by Jim Lee Plumbing, per information from the SCAQMD (South Coast Air Quality Management District). Three 5,000-gallon gasoline tanks were removed in July 1986, under OCHCA (Orange County Health Care Agency) oversight. These tanks were located towards the southwestern part of the Property. Initial sampling under the removed USTs indicated limited fuel impact between the southern and central tanks, this area was excavated and the verification soil sample did not detect Total Petroleum Hydrocarbon, Benzene, Toluene, Ethylbenzene and Xylenes. Based on the review of the final soil sampling results, the OCHCA indicated that case is closed (notation dated 8/25/86). The building addition constructed in 1994 extended to the area of the removed gasoline USTs.

Based on reviewed records, proof for the removal of the 280-gallon waste oil tank was not found. A geophysical survey was conducted on November 5, 2018 by GPRS. No signs of UST, piping or any other tank related items was identified on site, confirming that this 280-gallon tank has been removed.

Based on performed survey and the review of the OCHCA records, the former use of the Property as a gasoline station is considered a Historical Recognized Environmental Concern, and no additional work is necessary.

Issue 2:

Based on the subsurface sampling conducted at the Newport Beach Corporate Yard fueling area, located southeast of Superior Avenue and Industrial, low levels of chlorinated VOCs were measured in the groundwater only. Based on the sampling locations, it appears that this low VOC concentration is indicative of a general groundwater contamination in the neighborhood. Based on the measured concentrations, and the presumed groundwater flow direction, groundwater under portion of the Subject Property might be affected with low VOC concentrations. Based on the depth of the groundwater (25-30 feet below grade) and characteristics of the measured VOCs, we cannot eliminate the potential for vapor intrusion into the building, without further sampling, and (QA)2 Environmental conducted an indoor air sampling to evaluate this issue.

Two indoor air samples were collected, and one ambient air sample. Samples were collected in individually certified-clean, 6-liter SUMMA canisters, obtained from AETL laboratory, with air flow calibrated for 8-hour. The sampling was performed on November 5, 2018. The samples were analyzed for VOCs by EPA Method TO-15. No VOCs were measured in the collected samples, indicative that vapor intrusion is not affecting the indoor air of the building.

Conclusion & Recommendation

(QA)2 Environmental's assessment revealed no evidence classified as a Recognized Environmental Concern (REC), a Historical REC (HREC), or a Controlled REC (CREC) as defined by ASTM, associated with the subject property at 1540 Superior Avenue in Costa Mesa, except for the following:

- Current RECs: None.
- **Historical REC**: The Property was historically used as a gasoline station from 1964-1972. The building was then used by Lee Plumbing, with the use of the fuel tanks from the service station. All fuel tanks were removed in 1986, under permit from the OCHCA. Minor impacted soil was excavated and based on the review of the final soil sampling results, the OCHCA indicated that case is closed (notation dated 8/25/86). The geophysical survey conducted as part of this Phase 2 investigation indicated that the 280gallon waste oil tank initially installed for the service station had also been removed. No further action is recommended at this time.
- **Controlled REC**: None

No further action is recommended at this time.

1.0 INTRODUCTION

1.1 STATEMENT OF PURPOSE

(QA)2 Environmental performed this Phase I Environmental Site Assessment (ESA) for the property located at 1540 Superior Avenue in Costa Mesa, Orange County, California. The overall purpose of this assessment was to establish environmental conditions at the property based on information collected at the time of the investigation.

(QA)2 Environmental performed this Phase I ESA in general accordance with the following:

- American Society of Testing and Materials (ASTM) Method E 1527-13 ("Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process").
- Environmental Protection Agency (EPA), 40 CFR part 312, Standards and Practices for All Appropriate Inquiries.

This report was prepared for the sole use of First Choice Bank. (QA)2 Environmental was issued authorization for performance of this Phase I on October 10, 2018.

1.2 DETAILED SCOPE OF SERVICES

An environmental professional as defined by the "All Appropriate Inquiries" (AAI) Rule, or someone under his/her supervision, performed this Phase I ESA. The assessment consisted of the following tasks performed within the scope of ASTM E 1527-13:

Site Reconnaissance and Current Conditions

- 1. Visual observations of site conditions and inspection of facility to evaluate the nature and type of activities that have been or are being conducted at the subject property, in terms of the potential for release or threat of release of hazardous substances or petroleum products.
- 2. Visual inspection of abutting property, as practical from public areas, to evaluate the potential for affecting the subject property.
- 3. Description of the physical setting of the site

Records Review - Historical Conditions

Review of the following sources of historical use information, as readily accessible:

- 1. Historical aerial photographs,
- 2. Topographic maps
- 3. Sanborn maps,
- 4. Building department records,
- 5. City directories.
- 6. Review of available data to establish whether an environmental lien has been recorded for the subject property.

1

- 7. Review of previous environmental reports provided to (QA)2 Environmental
- 8. A chain of title search is generally not conducted as part of the Phase I report, unless specifically asked by the Client.

Records Review - Environmental Agency Review

- 1. Published governmental agency databases were reviewed to identify properties within ASTM-specified minimum search distances of the Subject Property with a reported environmental concern or incident. (QA)2 Environmental subcontracts the government agency database search to Environmental Data Resources, Inc. ("EDR"). The purpose of this review is to determine potential for impact to the subject property from an off-site source.
- 2. Review of state and local environmental files pertaining to the subject site, as available at the applicable environmental agencies.
- 3. If an adjoining property is listed on a published database per the EDR Radius Map report, review of records at the appropriate environmental agency, as warranted.

Interview

- 1. Interview with the owners, operators and occupants, as practicable.
- 2. Interview with local or state environmental agency representative, as applicable to each case

Report Preparation

Interpretation of the information and data assembled as a result of the above work and formulation of conclusions regarding the potential presence and impact of "Recognized Environmental Condition" (REC), "Historical REC" (HREC) and 'Controlled REC (CREC).

1.2.1 Non-Scope Considerations

ASTM E 1527-13 includes the following list of "additional issues" that are considerations outside the scope of the ASTM Phase I assessment practice: asbestos containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, bio-agents and mold. None of these "additional issues," other than radon, asbestos, lead-based paint, wetlands and mold was included in this Phase I ESA.

1.3 SIGNIFICANT ASSUMPTIONS

(QA)2 Environmental has assumed that the information sources utilized for this investigation provide complete and accurate information. Evaluations presented in this report are based exclusively on information provided by First Choice Bank, the site representative, interviewed personnel, available public records and observations made during the site visit.

1.4 LIMITATIONS AND EXCEPTIONS

(QA)2 Environmental completed this Phase I assessment in substantial conformance with the ASTM E 1527-13 standard. In our opinion, no additions to, or deviations from, the ASTM work

scope were made in completing this Phase I ESA.

The Phase I ESA is limited in nature and should not be construed to be a characterization of environmental regulatory compliance or of conditions above or below grade. The evaluations presented in this Phase I ESA are based on information provided by First Choice Bank, the property owner, interviewed personnel, available site records, readily accessible historical documents and observations made during the site reconnaissance. No independent verification of obtained information was performed by (QA)2 Environmental.

(QA)2 Environmental performed this Phase I ESA in a competent and professional manner in accordance with sound consulting practices and procedures. No warranty is provided regarding the actual site conditions described in this report beyond matters amenable to visual confirmation within the limits of this site assessment program. We make no representation or warranty regarding the accuracy or reliability of information or documents provided by others that are contained or relied on herein.

Data Gaps:

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

No data gaps with potential to alter our conclusions were encountered during this Phase I ESA. Our opinion is limited by the conditions prevailing at the time our work is performed.

1.5 SPECIAL TERMS AND CONDITIONS

No special terms or conditions were imposed on this Phase I ESA.

1.6 USER RELIANCE

(QA)2 Environmental prepared this report for the sole use of First Choice Bank. Other than mentioned here, there are no third party rights or benefits conferred under this report. Any use of the contents of this report by any third party, other than those named here, is at the sole risk of that party.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

This assessment was performed for the property located at 1540 Superior Avenue in Costa Mesa, Orange County, California (Figure 1). The property consists of an approximately 18,675 square feet parcel, issued Orange County Assessor Parcel Number (APN) 425-351-06. A copy of the Assessor's Parcel map is provided in the Figure Section.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The subject property is located at the northeast corner of Superior Avenue and Industrial Way, in a light industrial neighborhood. Adjoining properties include auto repair shop and office building to the east, City of Newport Beach Corporate Yard including fueling facility to the south, Share Our Services to the north and light industrial businesses to the west.

2.3 CURRENT USE OF THE PROPERTY

The Property is developed with one, approximately 4,300 square feet commercial building. Paved driveway and parking areas surround the building, an auto garage building is located at the northeastern corner of the Property.

At the time of the site inspection conducted on October 12, 2018, the Property was occupied by JHS Auto Collectors. The building was used for display of antique cars, offices were located on the northeastern part and a vehicle storage area on the eastern part. No vehicle maintenance or restoration is performed on site. No use of environmental concern was observed at the time of the site inspection.

Detail of the site inspection is provided in Section 6.

2.4 CURRENT USE OF THE ADJOINING PROPERTIES

(QA)2 Environmental performed a visual examination of the surrounding area on the same day as the subject property inspection. Observations of adjoining sites were limited to accessible public areas and areas that could be readily observed from the subject property. The names and locations of the immediately adjacent sites are provided in Figure 2.

The following descriptions summarize the sites adjacent to the subject property:

North - Share Our Selves (health center) at 1550 Superior Avenue

South – Across Superior Avenue is the City of Newport Beach Corporate yard, including fueling center, at 592 Superior Avenue. To the southeast is Rosey's Auto Body at 121 Industrial

Way.

- East Dan's Automotive repair shop at 116 Industrial Way, followed by JPS Design (architectural office) at 120 Industrial Way.
- West Across Superior Avenue are Silversmith and New York Hardware Co. at 1603 Superior Avenue, and OC Tint Masters at 1617 Superior Avenue.

2.5 PHYSICAL SETTING

The subject property is located at an elevation of approximately 86 feet above mean sea level (msl), according to the Newport Beach, California USGS 7.5 minute topographic map. Surface topography in the vicinity of the site is almost flat and gently slopes to the south-southwest.

The property is located on the Newport Mesa in the southwestern portion of the Orange County Coastal Plain. The Newport Mesa is underlain by Quaternary-age sedimentary deposits that overlie Capistrano and Monterey Formations. Marine terrace deposits of Quaternary-age are surficial on the Newport Mesa and are described as poorly to moderately consolidated sand to silty sand with local gravel. The Capistrano and Monterey Formations are generally comprised of sandstone and shale, respectively.

Area specific groundwater depth information was obtained from the California State Water Resources Control Board Geotracker web-site, for nearby cases. First-encountered groundwater is expected at about 25-30 feet below grade, with a south-southeastern gradient.

3.0 USER PROVIDED INFORMATION

3.1 TITLE RECORDS

No chain-of title record was obtained as part of this Phase I ESA.

3.2 USER QUESTIONNAIRE

A. Has the user determined that the subject site's Title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by the ASTM? (See 40 CFR 312.25 and 312.26.)

Activity and Use Limitation (AUL), or environmental lien for a property is typically recorded after completion of environmental clean-up under Agency oversight. The AUL or environmental lien is a condition of site closure, if the completed remediation did not achieve clean-up at level suitable for all uses, including residential use. The Cal-EPA Department of Toxic Substances Control and the State Water Resources Control Board maintain the lists of sites having been issued Deed Restrictions/Land Use Restrictions/Covenants on their web-site. Research of the databases for sites having been issued Deed Restrictions/Land Use Restrictions/Covenants did not include the addresses issued for the subject property. Thus an environmental lien has not been recorded for the subject property.

B. Has the user specialized knowledge about previous ownership or uses of the property that may be material to identify conditions indicative of releases or threatened releases? (See 40 CFR 312.28.)

The user did not report any specialized knowledge that suggests an environmental concern or recognized environmental conditions in connection with the subject property.

- C. Has the user prior knowledge that the price of the subject site has been reduced for environmentally related reasons? (See 40 CFR 312.29.)No valuation reduction for environmental related reasons has been provided for the property.
- D. Is the user aware of commonly known or reasonably ascertainable information about the subject site including whether or not the presence of contamination is likely on the subject site and to what degree it can be detected? (See 40 CFR 312.30 and 312.31.)
 The user did not report any specialized knowledge or experience that suggests an environmental concern or recognized environmental conditions in connection with the subject property.

3.3 REASON FOR PERFORMING PHASE I

The purpose of this Phase I ESA is to determine potential environmental conditions at the site.

4.0 HISTORICAL INFORMATION

4.1 HISTORICAL USE SUMMARY

A review of historical information was performed to identify past uses of the subject property and adjacent sites that may pose an environmental concern. (QA)2 Environmental reviewed the following sources of information during the course of this investigation:

- Aerial Photographs;
- USGS Topographic Maps;
- Sanborn Maps;
- Building and Safety Department permits;
- City Directories; and
- Former Phase I Report.

Subject Property

According to reviewed historical documents, the subject property was undeveloped from prior to 1896 through the 1940s (Source: topographic maps and aerial photographs). The property was occupied by a residence in the 1950s. According to reviewed historical records, including Building Department records, the Property was developed with a gasoline station in 1964; three 5,000-gallon fuel tanks and one 280-gallon waste oil tanks were installed. Use of the station continued until 1972. In 1973, an addition was constructed to the existing building, for use as a plumbing shop. The Property was used as a plumbing shop up to 1994. In 1994, an addition was constructed to the building, and a separate parking garage. The Property has been occupied by JH Siroonian - JHS Auto Collectors since 1994.

Adjoining Areas:

Review of historical records indicated that the general area of the subject property was initially undeveloped as indicated on the 1896-1901 topographic maps. The general area was mainly undeveloped with a few sparse residences on the 1938 and 1947 aerial photographs. The adjoining areas were developed with commercial or light industrial buildings in the 1950s through the 1960s, with a trailer park to the northeast. The City of Newport Beach Corporate yard was located to the south, with a fueling station first observed on the 1987 aerial photograph. A new apartment complex had been constructed at the former trailer park area by the 2005 aerial photograph. According to reviewed historical city directories, listings for adjoining properties were typical of auto repair and auto body shops, metal refinishing (1603 Superior Ave.), Frame Makers, custom metal fabricator, wood shop, bakery, woodshop, blueprint business, restaurant, retail use and medical clinic.

4.2 AERIAL PHOTOGRAPHS

Aerial photographs are a recommended source of historical research for a Phase I ESA. The general land use can often be discerned from the type and layout of structures visible in an

aerial photograph. However, specific elements of a site operation cannot normally be determined from the photographs. With this in mind, (QA)2 Environmental reviewed historical aerial photographs obtained from EDR. Aerial photographs were available from 1938 to 2016, and are provided in Appendix 2. The following is a summary of the aerial photographs review:

YEAR	SCALE	COMMENTS
1938	1" = 500 ft	Superior Avenue was observed as an unpaved road.
		Subject Property: Undeveloped land
		Adjoining Areas: Undeveloped land or used for agriculture, with a few
		sparse residences.
1947	1" = 500 ft	Subject Property: Undeveloped
		Adjoining Areas:
		North: Apparent residence
		South: Undeveloped
		East: Undeveloped
		West: Apparent small structure (residence of small commercial building).
1953	1" = 500 ft	Current streets had been constructed.
		Subject Property: Apparent residence
		Adjoining Areas:
		North: Commercial building and apparent trailer park to the northeast
		South: Undeveloped
		East: Apparent residence or small structure
		West: Apparent residences or small structures
1963	1" = 500 ft	Subject Property: Undeveloped lot.
		Adjoining Areas:
		North: Commercial building and apparent trailer park to the northeast
		South: Small structures
		East: Commercial buildings
		West: Commercial buildings.
1972	1" = 500 ft	Subject Property: Apparent gas station
		Adjoining Areas:
		North: Commercial building and apparent trailer park to the northeast
		South: Undeveloped area
		East: Commercial buildings
		West: Commercial/industrial buildings.
1977	1" = 500 ft	Subject Property: Commercial building, property no longer used as gas
		station.
		Adjoining Areas:
		North: Commercial building and apparent trailer park to the northeast
		South: Commercial/industrial building and undeveloped area
		East: Commercial buildings
		West: Commercial/industrial buildings.
1987	1" = 500 ft	No significant changes at Subject Property and adjoining areas, except for an
		apparent fueling canopy and warehouse buildings to the south (i.e. part of

YEAR	SCALE	COMMENTS						
		current city of Newport Beach Corporate Yard)						
1990	1" = 500 ft	No significant changes at Subject Property and adjoining areas.						
1995	1" = 500 ft	Subject Property: An addition had been constructed west of the existing						
		building, and the auto parking building at the northeastern corner. The						
		Property was observed as currently developed.						
		Adjoining Areas: No significant changes						
2005	1" = 500 ft	No significant changes at Subject Property and adjoining areas.						
2009	1" = 500 ft	No significant changes at Subject Property and adjoining areas.						
2012	1" = 500 ft	No significant changes at Subject Property and adjoining areas.						
2016	1" = 500 ft	No significant changes at Subject Property and adjoining areas, except for an						
		large apartment complex to the northeast, at the location of the former trailer						
		park.						

4.3 TOPOGRAPHIC MAPS

(QA)2 Environmental reviewed copies of the available historic USGS Topographic Quadrangle Maps for information regarding past uses of the Property. The following USGS topographical maps (portions) were obtained from EDR:

- 1896, Santa Ana, California Quadrangle, Scale: 1 : 62,500
- 1901, Santa Ana, California Quadrangle, Scale: 1 : 62,500
- 1932, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 1935, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 1949, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 1951, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 1965, Newport Beach, California Quadrangle, Scale: 1:24,000
- 1972, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 1981, Newport Beach, California Quadrangle, Scale: 1 : 24,000
- 2012, Newport Beach, California Quadrangle, Scale: 1:24,000

1896-1901: Undeveloped area.

- 1932, 1935 Maps: **Subject Property**: Undeveloped area; **Nearby**: Mainly undeveloped with sparse apparent residences (small structures).
- 1949, 1951 Maps: Subject Property: Undeveloped area; Adjoining Area: A few residences (small structures).
- 1965-1981 Map: On the 1965 and all subsequent maps, the overall area was indicated as highly developed, with no detailed features illustrated.

2012 map: No detail (developed area)

A portion of the 1981 Topographic Map is provided in Figure 1.

4.4 SANBORN MAPS

The Sanborn Mapping and Geographic Information Service began producing maps of industrial areas across the U.S.A. for fire insurance purposes in the 1860's. These maps detail property use, construction of buildings and related fire risks. The Sanborn archives were searched by EDR; however, no maps were found for the area of the subject property. A copy of the EDR Sanborn Map report is included in Appendix 2.

4.5 CITY OF COSTA MESA BUILDING DEPARTMENT

(QA)2 Environmental reviewed building records for the subject property at the City of Costa Mesa Building and Safety Department.

DATE	TYPE of	DESCRIPTION	OWNER
	PERMIT		
1964	Building	New service station and canopy, install three 5000-	Signal Oil Co
		gal UST and one 280-gal waste oil tank	
1964	C of O	Service station	Signal Oil Co
1964	Building	Sign	Signal Oil Co
1967	Building	Sign	Humble Oil Co
1969	Building	Sign	Humble Oil Co
1972	Building	Demo canopy of existing station and remove 3 USTs	Jim Lee
1973		Approved use as plumbing shop	Jim Lee
1973	Building	Enclose & add to existing building for plumbing shop	Jim Lee
		(size of new building is 3197 sq. ft.), prior use was	
		gas station	
1974	Building	Block wall	Jim Lee
1980	C of O	Commercial Plumbing Shop	Jim Lee
1994	Building	Demo framing	John Siroonian
1994	Building	Add 862 square feet for vehicle storage area and	John Siroonian
		interior 2417 sq. ft.	
1995	C of O	Use: Storage	John Siroonian
2008	Building	Re-roof auto bay building	John Siroonian

Copies of reviewed records are provided in Appendix 3.

4.6 HISTORICAL CITY DIRECTORIES

Research regarding the availability of historical city directories was obtained from Environmental Data Resources, Inc (EDR) (provided in Appendix 2). Directories (as available) were reviewed between 1920 and 2014. The following listings were indicated for the subject

property.

Year	Description
1955	Residence (Knowlton Dwight)
1966	Signal Service Sstation
1970	Enco Products Service Station
1975	Jim Lee Plumbing
1980	Jim Lee Plumbing, J&J Enterprises
1986	Jim Lee Plumbing, Construction Accounting, Phase II Insurance Systems
2002	Siroonian JH
2005	KPS Mercedes Service, Siroonian JH, United Imports

Adjoining Properties: Listings for adjoining properties were typical of auto repair and auto body shops, metal refinishing (1603 Superior Ave.), Frame Makers, custom metal fabricator, wood shop, bakery, woodshop, blueprint business, restaurant, retail and medical clinic.

4.7 PREVIOUS ENVIRONMENTAL REPORTS

No former reports were provided to (QA)2 Environmental for review.

5.0 ENVIRONMENTAL RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES & POTENTIAL FOR VAPOR ENCROACHMENT EVALUATION

Various federal and state regulations require that government agencies maintain records of environmental permits, properties known to be affected by regulated compounds and properties under investigation by the government for alleged violations of hazardous material regulations. (QA)2 Environmental contracted EDR, a specialized research firm, to provide an electronic search of such data files with the ASTM-specified minimum distances. A complete copy of the EDR Radius Map report is provided in Appendix 5. EDR's report includes a summary table, showing the number of sites found in each database and the approximate distance to the subject property. It also includes a description of each of the databases searched.

5.1.1 Subject Property

Per the review EDR Radius Map report, the following listings were provided for the Property at 1540 Superior Avenue in Costa Mesa:

EDR A1: Various Businesses: EDR Historical Auto: The EDR Historical Auto database is a proprietary to EDR based on historical directory listings. This address was listed as occupied by gasoline station and auto repair shop.

EDR A2: GBC: 1540 Superior A, Costa Mesa: This business was listed on the RCRA-SQG (Small Quantity Generator of regulated waste) and ECHO (EPA Enforcement & Compliance History Information) databases. No violations were noted in EDR report or in EPA's ECHO database. This listing does not represent an environmental concern to the Property.

EDR A3: Jim Lee Plumbing: This business was listed on the Historical Underground Storage Tank (Hist. UST) and Leaking UST databases. Additional information was obtained from the Orange County Health Care Agency (OCHCA) for this case. Three 5,000-gallon USTs were removed in 1986, under permit from the OCHCA. These tanks were located towards the northwestern portion of the Property. Final sampling results of the soil under the tanks area did not indicate impact with petroleum hydrocarbon, and the OCHCA indicated that the case is closed (detail of the file review is provided in Section 5.2.1).

EDR A4: Jim Lee Plumbing: This business was listed on the FINDS Report, a computerized inventory of all facilities that are regulated or tracked by the EPA.

5.1.2 Adjoining Properties

The following adjoining properties, per ASTM definition, were listed on the EDR Radius Map report:

Newport Beach Corporate Yard: 592 Superior Ave., Newport Beach: EDR H30: The northern portion of this site, which includes the fueling facility, is located south of Industrial Way, south of the Subject Property. This site is located at cross-gradient to down-gradient location with respect to groundwater flow from the Subject Property. This site was listed on several databases, and most significantly on the Leaking Underground Storage Tank (LUST) database. According to information obtained from Geotracker, a leak was reported in 2009 after damage was reported to a UST. The UST was repaired. Subsurface investigation was conducted in 2009, and included drilling of four borings to groundwater. Groundwater was encountered at about 24 to 28 feet below grade. Soil samples were collected at 5-feet intervals and a grab groundwater sample was collected from each boring. All samples were analyzed for petroleum hydrocarbon and full-scale VOC analysis. No petroleum compounds or VOCs were measured in the soil samples. No petroleum compounds were measured in the groundwater samples. Low concentrations of Trichloroethene (TCE) and associated decomposition product were measured in some of the grab groundwater samples. The highest concentrations were TCE at 4.8 μ g/L and c-1,2 DCE at 14.5 μ g/L. Based on the analytical results, the OCHCA issued LUST case closure in 2010.

The sampling results indicated low levels of chlorinated VOCs in the groundwater only. Based on the sampling locations, it appears that this low VOC concentration is indicative of a general groundwater contamination in the neighborhood. Based on the measured concentrations, and the presumed groundwater flow direction, groundwater under portion of the Subject Property might be affected with low VOC concentrations. Based on the depth of the groundwater, characteristics of the measured VOCs, potential for vapor intrusion into the building appears low, but final confirmation cannot be made without sampling.

EMI: Permit issued by the Local Air Permitting Agency

LUST: Leaking Underground Storage Tank

Cortese: Leaking Underground Storage Tank database

Haznet: Shipment of waste under the hazardous waste manifest system

5.1.3 Other Sites

In determining if a site is a potential environmental concern to the subject property per the EDR Radius Map Report, (QA)2 Environmental applied the following criteria to classify the site(s) as low concern:

- 1. The site(s) only hold an operating permit (which does not imply a release),
- 2. The site(s) have been granted "No Further Action" by the appropriate regulatory agency, indicating that the risk from the release has been abated to the satisfaction of the oversight agency, and/or
- 3. Based upon (QA)2 Environmental's review, the distance, topographic position and most importantly position with respect to groundwater flow direction relative to the subject property reduce the level of risk associated with the site(s).

Typically, groundwater would represent the migration medium of potential interest for contaminants that may travel significant distances from an original release source. Surrounding properties with known environmental conditions may be of potential concern with regard to contaminant migration if they are located at an upgradient direction with respect to groundwater flow. Releases from sites that are located in cross-gradient or down-gradient directions are less likely to adversely affect the subject property.

The groundwater flow direction in the general area of the subject property is to the southsouthwest. Thus sites located to the north-northeast of the subject property would be located at an upgradient location with respect to groundwater flow. In general, releases from an upgradient location could potentially affect the subject property. Presence of contaminated groundwater beneath a site might present a soil vapor migration issue, depending on the types of contaminant, concentrations and depth of groundwater. Depth to first encountered groundwater is estimated at about 25-30 feet below grade. Potential to affect the Property via **groundwater**, **soil vapor or soil** were evaluated by (QA)2 Environmental. Our evaluation for vapor pathway transport conforms with ASTM 2600-15.

Site Name & Address	Distance & Direction from Property	Hydro- geologic Relation to Property	Database Listing	Potential to Impact Property	Comment
JC Carter, Carter Cryogenics Co Argo-Tech, Westside Gateway 671 W. 17 th St Costa Mesa EDR M57 - M65	1180' NNE	Up- Gradient to Cross Gradient	LUST, Haznet, NPDES, WDS CIWQS, AST, SLIC, EMI, Haznet, RCRA- LQG, DEED	Low	This Site was investigated and remediated under the SLIC program of the RWQCB. Significant solvent (PCE, TCE and their decomposition products) were found in soil and groundwater. Remediation included SVE, excavation and In- Situ Chemical Oxidation for the groundwater. Case closure with Deed Restriction was issued in 2017, according to information obtained from Geotracker. Based on performed treatment of groundwater, low likelihood for current significant impact to the Property.

Orange County Industrial Site: Clean-up under the oversight of the Orange County Health Care Agency

<u>Potential for Vapor Encroachment</u>: Based on our evaluation of the EDR Radius Map report, using ASTM 2600-15 methodology, there was a low likelihood for potential vapor encroachment onto the subject property.

<u>Other Sites</u>: Our review of other sites, which appeared on local, state or federally published lists of sites that use or have had releases of hazardous materials, did not identify sites likely to present a concern to the subject property. This evaluation was based on our review of the regulatory database listings, and supplemental information obtained from the State Water Resources Control Board Geotracker web-site, and the California EPA Department of Toxic Substances Control Envirostor web-site. This evaluation is based on the types of listed databases, distance from the property, and location with respect to interpreted groundwater flow direction.

<u>Unmapped Sites</u>: Unmapped sites were included in the EDR report. However, it does not appear that any of the unmapped sites are located in the general vicinity of the subject property.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The subject property is located within the jurisdiction of the environmental agencies listed below. (QA)2 Environmental contacted these agencies or reviewed their web-sites for regulatory file information pertaining to the subject property:

- Orange County Health Care Agency
- California Regional Water Quality Control Board, Santa Ana Region;
- California EPA Department of Toxic Substances Control;
- South Coast Air Quality Management District; and
- California Department of Conservation, Division of Oil, Gas & Geothermal Resources.

5.2.1 Orange County Health Care Agency

The Orange County Health Care Agency (OCHCA) is the agency regulating the use of hazardous materials, management of regulated waste and management of underground storage tank in the area of the property. (QA)2 Environmental requested records for the subject property at 1540 Superior Ave. in Costa Mesa. Found records are summarized below, and copy provided in Appendix 3.

Three 5,000-gallon USTs were removed on July 24, 1986, under OCHCA oversight. The tanks were located towards the southwestern part of the Property. Notes from the OCHCA inspector indicated 'maybe some overspill contamination in pockets, wait for lab results'. Per direction from the OCHCA inspector, six soil samples were collected: one under each removed UST, one sample between the southern and central tanks, and soil samples on the south and northern walls of the excavation. Per direction from the OCHCA inspection, three collected soil samples were analyzed at a Certified laboratory. Petroleum impact was measured only in one sample taken between the southern and central tanks, with a Total Petroleum Hydrocarbon (TPH) concentration of 2,930 mg/Kg, and some benzene, toluene, ethylbenzene and xylenes (BTEX) concentrations. No petroleum impact was measured in the other soil samples. Per letter from Mr. Jim Lee, property owner at that time, the area of impacted soil will be excavated. On August 21, a verification soil sample was collected from the excavated area (S1) and a soil sample was collected from the excavated materials (composite of excavated material - S2). Both samples were analyzed for TPH and BTEX, and no contaminant was measured. The analytical results indicate that the initially found affected area was excavated. The notation from OCHCA indicates that 'Lab results received, site is clean, Closed'.

The OCHCA information did not provide any record whether the 280-gallon waste oil UST was removed.

There were no records about hazardous materials use disclosure or regulated waste management.

5.2.2 California Regional Water Quality Control Board

The subject property is within the boundaries and jurisdiction of the Regional Water Quality Control Board – Santa Ana Region (RWQCB). The RWQCB was contacted requesting records for the subject property at 1540 Superior Avenue in Costa Mesa. In an e-mail dated October 18, 2018, the RWQCB indicated that no record was found. Correspondence is provided in Appendix 3.

5.2.4 California EPA Department of Toxic Substances Control

The California EPA - Department of Toxic Substances Control (DTSC) website (Envirostor database) was researched to determine whether the subject property at 1540 Superior Avenue in Costa Mesa, had any hazardous waste permits or had been investigated by the DTSC. No records were found.

(QA)2 Environmental searched the Hazardous Waste Tracking System (HWTS) on-line database maintained by the DTSC, for information regarding documented hazardous wastes generated at the subject property. Shipment of waste was indicated under the business names of Jim Lee, GBC and Century Automotive. No detail about waste disposal was available. This information is correlates with the historical use of the building for automotive repair.

5.2.5 South Coast Air Quality Management District

The South Coast Air Quality Management District (SCAQMD) regulates the air quality in the area of the subject property. A search for active and inactive permits was performed through the SCAQMD web-site for the subject property at 1540 Superior Avenue in Costa Mesa.

The following permits had been issued for the Subject Property:

Equipmen	Equipment List								
Facility II	D 3	33062							
Company Name JIM LEE INC									
Address	Address 1540 SUPERIOR AVE								
	(COST	ΓΑ MESA, C	CA 92627					
Appl_Nbr	Permit_	<u>Nbr</u>	Issued_Date	Permit_Status	Eq_Type	Equip_Description	Appl_Date	Appl_Status	
<u>Z00458</u>	909168		5/1/1983	INACTIVE	Basic	SERV STAT STORAGE & DISPENSING		PERMIT TO OPERATE GRANTED	

					GASOLINE	
<u>Z00458</u>	909168	5/1/1983	INACTIVE	Control	AMINE (OR DEA) REGENERATION	PERMIT TO OPERATE GRANTED

Issuance of this permit in 1983 indicates that Jim Lee Plumbing operated fuel dispensing. Per the OCHCA information, these tanks were removed in 1986.

5.2.6 California Department of Conservation, Division of Oil, Gas

Numerous areas of Southern California produce oil and gas from commercially viable fields. Over the past century, large numbers of commercial development and wildcat exploration wells have been drilled throughout the area. Improperly drilled or abandoned wells present potential hazards from gas seeps and other concerns may exist due to hazardous material handling during well construction.

The California Department of Conservation, Division of Oil, Gas & Geothermal Resource, Oil & Gas Maps, internet web-site was researched (<u>www.consrv.ca.gov</u>) to determine if petroleum exploration activities had occurred in the vicinity of the property. According to the Well Mapping function accessed from DOGGR web-site, the subject property is located within the Newport Oil Field. No oil well or dry hole was indicated at the subject property. The closest oil wells are closed wells located about 400 and 500 feet northeast and north, respectively and 750 feet west-southwest. Potential impact to the Property from these closed wells is unlikely.

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

(QA)2 Environmental performed a visual inspection of the subject property on October 12, 2018. Photographs are presented in Appendix 1, and a site map is shown in Figure 2. (QA)2 Environmental inspected the readily accessible areas of the subject property. No quantitative field activities were conducted during the site inspection.

6.2 GENERAL SITE SETTING

The property is developed with a an approximately 5,500 square feet commercial building, and an approximately 860 square feet parking garage at the northeastern corner of the Property. Paved driveway and parking areas surround the commercial building. Minimal landscaped area was observed along Superior Avenue and Industrial Way.

6.3 **OBSERVATIONS**

The following are descriptions of the general observations made during the site reconnaissance at the subject property.

6.3.1 General Observation of Buildings and Site Operations

At the time of the site inspection conducted on October 12, 2018, the Property was occupied by JHS Auto Collectors. The building was used for display of antique cars, offices were located on the northeastern part and a vehicle storage area on the eastern part. No vehicle maintenance or restoration is performed on site.

The interior building materials consisted predominantly of painted dry wall, vinyl floor tiles, carpet and epoxy coated concrete.

No stains and no drains were observed within the main building auto storage areas.

The structure at the northeastern corner is used for parking. No significant stains and no floor drain was observed on the concrete floor. No significant stains were observed on the paved areas.

6.3.2 Use of Hazardous Substances and Petroleum Products

No hazardous substances that constitute evidence of a recognized environmental condition were observed at the subject property at the time of the site reconnaissance.

6.3.3 Waste Management and Disposal

No generation of regulated wastes was observed at the property at the time of the site inspection.

6.3.4 Hazardous Substance Containers

Underground Storage Tanks

No visual evidence (i.e. pipes, vents, pumps, or access ways) indicating the presence of USTs on-site was apparent at the property, at the time of the site inspection.

Aboveground Storage Tanks

No Above-grade Storage Tank was observed at the subject property, at the time of the site inspection.

Clarifiers and Sumps

No clarifier or sump was observed at the subject property at the time of the site inspection.

6.3.5 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCBs) are industrial chemicals widely used for their heat transfer properties. These substances were used in electrical transformers, hydraulic fluids and electrical equipment such as fluorescent light ballasts. PCBs are stable compounds that persist in the environment after a spill or improper disposal. Since 1978, the use of PCBs has been prohibited in most products. Fluorescent light ballasts manufactured since that time must state that they contain no PCBs.

No equipment suspect of containing PCBs was observed at the subject property.

6.3.6 Asbestos

Asbestos is a naturally occurring fibrous mineral that was extensively used in the past for its insulation qualities. Asbestos fibers can be found in thermal insulation, fireproofing material, vinyl floor tiles, mastic, wallboard, ceiling tiles and numerous other materials. After asbestos was determined to be carcinogenic, its use was severely restricted in the late 1970's. Building materials are classified as Asbestos Containing Material (ACM) if they contain greater than 1% asbestos. Such material is considered a hazardous material and must be properly disposed when removed.

Based on the age of the building (1962/1973/1994), asbestos-containing building materials might have been used. Observed suspect ACMs included dry wall and joint compound, vinyl tile and mastic, and carpet mastic. The roof was not inspected on the day of the site reconnaissance, and asbestos material might be a component of the roofing building material. The suspect ACM was observed in good condition.

There are no regulatory requirements to remove ACM or evaluate whether building materials contains asbestos, unless the materials are damaged and have the potential to release fibers, or the materials have the potential to be disturbed during renovation or demolition activities. Performance of an asbestos survey is recommended prior to demolition or major renovation of any structure. If ACMs are confirmed, they should be managed according to applicable regulations.

6.3.7 Lead-Based Paint

Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the mid-1970s. In 1978, the Consumer Products Safety Commission banned paint and other surface coating materials, which are lead-containing.

Based on the date of building construction (1922, 1928/1930/1936), lead-based paint might have been used in the past. Sampling for lead-based paint was not a part of the scope of services for this report. The paint was observed in good condition. If the building is slated for demolition or renovation, current Orange County guidelines should be followed.

6.3.8 Potential Mold Issue

A visual inspection was performed at the time of the site reconnaissance for significant, visible water damaged areas that might be indicative of potential mold infestation. No significant, visible water stained areas were noticed at the time of the site inspection.

6.3.9 Utilities

The following municipalities or companies provide the utilities for the property:

- Electricity: Southern California Edison;
- Natural Gas: The Gas Company;
- Municipal Waste: Private Company CR&R;
- Water: Mesa Water District; and
- Sewer: Orange County Sanitation District. According to City records, sewer was available in this area at time of initial development.

6.3.10 Wells

No groundwater monitoring or production wells were identified on the subject property during this investigation.

6.3.11 Potential Vapor Intrusion

Based on the subsurface sampling conducted at the Newport Beach Corporate Yard fueling area,

-30-

located southeast of Superior Avenue and Industrial, low levels of chlorinated VOCs were measured in the groundwater only. Based on the sampling locations, it appears that this low VOC concentration is indicative of a general groundwater contamination in the neighborhood. Based on the measured concentrations, and the presumed groundwater flow direction, groundwater under portion of the Subject Property might be affected with low VOC concentrations. Based on the depth of the groundwater, characteristics of the measured VOCs, potential for vapor intrusion into the building appears low, but final confirmation cannot be made without sampling.

6.3.12 Radon

Radon is an odorless, radioactive gas that occurs naturally in soil, rock and building materials and results from the natural radioactive decay of radium and uranium. In outdoor air, concentrations of radon are generally diluted to concentrations that do not pose a significant threat to human health. In enclosed spaces such as homes or offices, and basements, radon may accumulate to concentrations that may pose a human health risk. The concentration of radon indoor air is influenced by factors related to the building construction, ventilation system and concentration of radon in the underlying soil and rock.

The EPA has designated three zones of classification indicating the predicted average indoor screening level of radon per county. Orange County is classified in Zone 3, which indicates a predicted level less than 2 picoCuries per liter of air (pCi/L). The EPA "Action Level" is 4 pCi/L.

Forty-four sites were tested within the zip code of the property for Radon, and Radon concentration exceeding 4 pCi/L was measured at two sites. Based on the performed testing within the Zip code of the property, and the commercial use of the property, Radon is not considered an issue of environmental concern.

6.3.13 Wetlands

The subject property is not located in an area designated as wetlands per the National Wetland Inventory, according to the Environmental Data Resources, Inc. (EDR) report. Therefore, at this time, regulations pertaining to wetlands do not appear to impact the subject property.

6.3.14 Other Conditions of Concern

In accordance with the ASTM standard, (QA)2 Environmental made the following observations:

- No evidence of significant staining was observed at the subject property at the time of the site reconnaissance.
- No evidence of pits, ponds, and/or lagoons was observed at the subject property at the time of the site reconnaissance.
- No evidence of strong, pungent or noxious odors was noted on the subject property at the

time of the site reconnaissance.

• No evidence of stressed vegetation was observed at the subject property at the time of the site reconnaissance.

6.4 INTERVIEW WITH OWNER, SITE MANAGER OR OCCUPANTS

For this Phase I ESA, (QA)2 Environmental interviewed Mr. Brian Griffin of Compass Real Estate at the time of the site inspection. Mr. Griffin indicated that the owner acquired the property in 1994, with no bank loan. No prior environmental report had been conducted for the Property.

6.5 INTERVIEW WITH ENVIRONMENTAL AGENCY OFFICIALS

Based on the use of the property and the findings of the environmental agency search, no other interview was conducted.

7.0 PHASE 2 INVESTIGATION

7.1 GEOPHYSICAL SURVEY

Review of historical records, indicated that one 280-gallon waste oil tank was installed in 1955, when the former gas station was constructed. We did not find proof that this tank was removed, per the available records. Ground Penetrating Radar Systems (GPRS), under supervision of (QA)2 Environmental, conducted a geophysical survey on the subject property. The purpose of the geophysical survey was to locate and identify, insofar as possible, this UST.

The equipment used in this investigation consisted of

- Ground Penetrating Radar (GPR), Manufacturer: GSSI, Model: SIR-3000 processing unit with 400 MHz antenna
- RD7000/8000 pipe locator (Manufacturer: Radiodetection)
- Schonstedt GA-52cx Magnetic Locator (Magnetometer).

The areas north, south and east of the building were scanned. The western portion of the building consisted of additions, after the station use. No signs of UST, piping or any other tank related items was identified on site, confirming that this 280-gallon tank has been removed.

The complete GPRS report is provided in Appendix 4.

7.2 INDOOR AIR SAMPLING

Based on the subsurface sampling conducted at the Newport Beach Corporate Yard fueling area, located southeast of Superior Avenue and Industrial Way, low levels of chlorinated VOCs (Volatile Organic Compounds) were measured in the groundwater only. Based on the sampling locations, it appears that this low VOC concentration is indicative of a general groundwater contamination in the neighborhood. Based on the measured concentrations, and the presumed groundwater flow direction, groundwater under portion of the Subject Property might be affected with low VOC concentrations. Based on the depth of the groundwater and characteristics of the measured VOCs, (QA)2 Environmental recommended that an indoor air sampling be performed to assess whether this issue is affecting the use of the building through potential for vapor intrusion.

All cars had been removed from the building, at the time of the indoor air sampling.

Two indoor air samples were collected, and one ambient air sample. Samples were collected in individually certified-clean, 6-liter SUMMA canisters, obtained from AETL laboratory. The samples were collected over an approximately 8-hour period on November 5, 2018. The sampling was performed at the following locations:

Sample Air 1: Placed towards the southwestern corner of the building.

Sample Air 2: Placed in the office on the northern part of the building.

Sample Air 3: Ambient air sample, placed south of the building.

All Summa canisters were placed on shelves, desk or step ladders, at representative breathing zone height.

Additional details regarding the Summa canisters and the sample collection details are provided in the table below:

	SUMMARY OF SAMPLE COLLECTION										
Sample	Location	Canister	Initial	Start	Final	Stop					
No.		No.	Pressure	Date/Time	Pressure	Date/Time					
Air 1	Inside	1880	-30	11/5/2018	-5	11/30/2018					
	Building			7:30 AM		12:15 PM					
	SWC										
Air 2	Office north	2199	-30	11/5/2015	-20	11/5/2018					
	side of			7:31 AM		12:15 PM					
	building										
Air 3	South of	2192	-29	11/5/2015	-3	11/5/2018					
	building –			7:33 AM		12:13 PM					
	Ambient Air										

Air samples collected in each Summa canister were transported to AETL in Burbank, California for analysis of Volatile Organic Compounds (VOCs) via EPA Method TO-15. The Summa canisters were handled under proper chain-of-custody procedures. The official laboratory analytical report and associated chain-of-custody are provided as Appendix 4.

No VOCs were measured in any of the collected samples, including no chlorinated VOCs and no fuel related VOCs.

Summary:

Indoor air sampling was performed to assess whether chlorinated VOCs measured in groundwater at nearby areas is affecting the use of the building through vapor intrusion pathway. Two indoor air samples were collected and no VOCs were measured in the collected samples, indicative that vapor intrusion is not affecting the indoor air of the building.

8.0 CONCLUSIONS AND RECOMMENDATIONS

(QA)2 Environmental performed this Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 for the subject property located at 1540 Superior Avenue in Costa Mesa, Orange County, California. Any exceptions to, or deletions from, this standard are described in **Section 8.0** of this report.

- A <u>Recognized Environmental Condition (REC)</u> is defined by ASTM as the "presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property."
- A <u>Historical Recognized Environmental Condition</u>" (HREC) is defined by ASTM as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."
- A <u>Controlled Recognized Environmental Condition (CREC)</u> "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

(QA)2 Environmental's assessment revealed no evidence classified as a REC, HREC or CREC associated with the subject property, except for the following:

Current RECs: None.

Historical REC: The Property was historically used as a gasoline station from 1964-1972. The building was then used by Lee Plumbing, with the use of the fuel tanks from the service station. All fuel tanks were removed in 1986, under permit from the OCHCA. Minor impacted soil was excavated and based on the review of the final soil sampling results, the OCHCA indicated that case is closed (notation dated 8/25/86). The geophysical survey conducted as part of this Phase 2 investigation indicated that the 280-gallon waste oil tank initially installed for the service station had also been removed. No further action is recommended at this time.

Controlled REC: None

Non-ASTM Issues:

Based on the construction dates the building, there is a potential for Asbestos Containing Material (ACM) to be present. Definitive conclusion as to the presence or absence of ACM cannot be made without obtaining and analyzing samples of representative or suspect building materials for the presence of asbestos. The completion of an asbestos survey was not included as a component of this Phase 1. Such survey is recommended prior to demolition or major renovation of any structure.

9.0 **DEVIATIONS**

(QA)2 Environmental has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13. There were no exceptions to, or deletions, from this method during performance of the Phase I ESA.

10.0 ADDITIONAL SERVICES

No additional services, other than this standard Phase I ESA, were part of (QA)2 Environmental's scope of work.

12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

CAROLE MISSIRLIAN, P.E., Principal

Ms. Missirlian has 30 years of professional experience in environmental management and environmental engineering. Her expertise in the environmental field includes performance and project management of Phase I Environmental Site Assessments, and investigations and remedial action at hazardous waste sites for both soil and groundwater. Ms. Missirlian has also prepared applications for and obtained NPDES discharge permits, RCRA Part B storage and treatment permits, RCRA post-closure permits and closure of Part B permitted facilities. Her work requires knowledge of environmental regulations such as RCRA, CERCLA, and California specific regulations such as the ones governing the underground storage tanks.

Education

MS Environmental Engineering, University of Southern California, Los Angeles, 1986 BS Chemical Engineering, California State University Northridge, Northridge, California, 1984

Professional Registration and Certification

California Professional Engineer (Civil), No. 45994

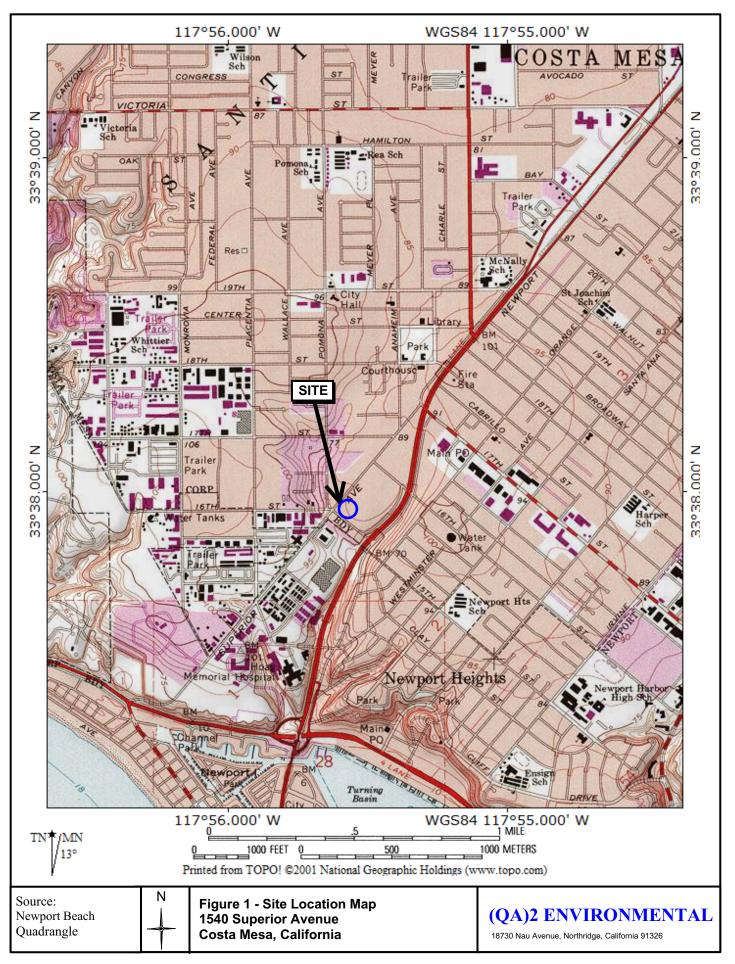

Project Experience Summary

Due Diligence

Independent consultant, specializing in environmental due diligence for real property. Performed hundreds Phase I Environmental Site Assessments and Transaction Screen reports following ASTM standards for industrial/commercial properties, vacant land and apartment complexes. Investigated properties included light manufacturing buildings, automotive shops, car dealerships, office buildings, apartment buildings, and retail centers. Has completed Phase I ESAs on industrial facilities encompassing multiple buildings with total building areas between 300,000 and 1,000,000 square feet.

Managed and performed numerous Phase II Site Investigations to assess current property conditions. Type of properties investigated includes historical gasoline stations, bulk gasoline distributors, oil fields, and properties currently used as auto dealerships/service, machine shops, dry cleaners, etc... Has performed soil sampling followed with chemical analysis at a California Certified Laboratory, soil gas surveys, and groundwater investigations.

As part of due diligence requirements, reviewed available reports and evaluated potential effects on properties directly downgradient from gasoline stations, large industrial facilities with active cleanup, hazardous waste sites, landfills, Superfund sites, auto dismantlers, etc... Has reviewed RCRA Permits, including post closure permits and Corrective Action documents to assess risk with properties. On behalf of Client, has negotiated a Perspective Purchaser Agreement (PPA) with the Environmental Protection Agency, for portion of a property that has been named a Responsible Party in the San Fernando Valley Superfund Site. Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by QA2 Environmental. Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

WORKERS' COMPENSATION DECLARATION:

I hereby affirm under penalty of perjury one of the following declarations:

□ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation Insurance carrier and policy number are:

STATE 1 Carrier: J-r (This section need not be completed if the permit is valued at one hundred dollars (\$100) or less.) <u>713</u>4< Policy Number:

□ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with these provisions.

Radford	1.18.08
Applicant's Gignature	Date

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

LICENSED CONTRACTORS DECLARATION:

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

CONSTRUCTION LENDING AGENCY:

□ I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued. (Sec. 3097, Civil Code).

Lender's Name:	
Lender's Address:

OWNER-BUILDER DECLARATIONS:

Signature

I hereby affirm that under penalty of perjury that I am EXEMPT FROM THE CONTRACTORS LICENSE LAW for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

□ I, as owner of the property, or my employees with wages as their sole compensation, WILL DO THE WORK, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for purpose of sale.).

I, as owner of the property, am EXCLUSIVELY CONTRACTING WITH LICENSED CONTRACTORS to construct the project (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such project with a contractor(s) license pursuant to the Contractors License Laws.).

I am exempt under sec.

Business and Professions Code for this reason:

Verification of Ownership by (type of document, i.e. - property tax bill or deed):

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION:

□ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. (Chap. 3.2, Grp 2, Art 2, Sec. 341, Title 8, California Administrative Code).

As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

Applicant's Signature

Division of Industrial Safety Permit Number: _

HAZARDOUS MATERIALS AND EMISSIONS CERTIFICATION:

1. Will the applicant or present or future building occupant need to file and certify a Business Plan for emergency response to release or threatened release of a hazardous material?
Yes No

(Section 25505 of the California Health and Safety Code requires, with some exceptions, that a Business Plan be filed with the Costa Mesa Fire Department by every business which has at any one time during a reported year a quantity of hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

2. Does or will the applicant or present or future building occupant need to file a registration form for acutely hazardous materials? Yes No

(Section 25533 of the California Health and Safety Code, with some exceptions, requires registration with the Costa Mesa Fire Department by each business which at any one time has on hand a quantity of acutely hazardous materials equal to or greater than a weight of 500 pounds, or a volume of 55 gallons, or 200 cubic feet of compressed gas at standard temperature and pressure).

3. Does or will the applicant or present or future building occupant need to prepare an RMPP (Risk Management and Prevention Program for acutely hazardous materials)?

(Section 25534 of the California Health and Safety Code provides that the Costa Mesa Fire Department may require the preparation, certification and filing with the Fire Department of an RMPP by businesses which are required to register acutely hazardous materials with the Fire Department.

4. If an RMPP is presently required, has Section 25534 of the California Health and Safety Code been fully complied with?

5. Does or will the applicant or present or future building occupant require for the work which is the subject of this application a permit for such construction or modification from the South Coast Air Quality Management District or from any other air pollution control district or agency? Yes No

(Section 65850.2 of the California Government Code requires that the requested information be furnished on applications for non-residential building permits).

6. Will any part of the facility to be constructed under this permit be within 1000 feet from the outer boundaries of a school?

(If "yes", the facility must meet the requirement of Sections 25534 and 42303 of the California Health and Safety Code).

7. If a permit from the South Coast Air Quality Management District or other air pollution control district or agency is required for the work which is the subject of this application, have all of the disclosures prescribed by California Health and Safety Code Section 42303 been made? Yes No

(If "yes", attach certificate of compliance from the appropriate air pollution control officer).

CERTIFICATE OF COMPLIANCE: I certify that under penalty of perjury the information given above is correct. I agree to comply with all state laws and city ordinances regarding Hazardous Materials and Emissions.

GAFGLAS[®] BUR

"GAFGLAS® BUR helps to reduce installation costs while tackling the most demanding roof applications"

an an charachtar i a chraite i f Slag or Gravel in Asphalt FlexPly=6 Plies with Interply Asphalt Roofing Asphalt GAFGLAS® STRATAVENT® Eliminator'" Perforated EnergyGuard[™] Polyiso Insulation Deck Drill-Tec" Fastener

Typical 4-Ply Premium System With STRATAVENT® Eliminator, FlexPly®6, Flood Coat And Gravel

Metric-Sized Rolls For Lower Installed Cost...

all GAFGLAS plies are produced in metric-width rolls, allowing faster application and resulting in lower installed cost.

GAFGLAS roofing plies...incorporate the latest in fiberglass ply technologies for high tensile strength, dimensional stability, optimum porosity for air escape while mopping, excellent wind uplift resistance, UL Class A fire ratings, and an FM uplift rating up to Class 1-720 when solidly mopped to a primed, insulated structural concrete deck:

GAFGLAS[®] FlexPly[®]6 premium-performing

GAFGLAS Ply 4

GAFGLAS base sheets...offer solutions for every application:

- GAFGLAS[®] #75 Base Sheet for economical applications
- GAFGLAS[®] #80 Ultima[®] 'Base Sheet features a heavyweight construction that is ideal for all premium roofing and flashing systems
- GAFGLAS[®] STRATAVENT[®] Eliminator[™] Base Sheets suitable for new and reroof applications when a venting base sheet is needed. UL Class A requirements (STRATAVENT Eliminator" Nailable base sheet and STRATAVENT Eliminator[~] Perforated)

GAFGLAS Mineral Surfaced Cap Sheet... Surfacing options:

- GAFGLAS® Mineral Surfaced Cap Sheet ...
- · Provides a UL Class A rating for use as a surface ply in hot-applied roof systems and as a top ply in base flashing construction without the need for additional surface coatings.
- GAFGLAS[®] EnergyCap[™] Mineral Surfaced Cap Sheet... Now a mineral surface cap sheet with a pre-applied, highly reflective coating of EnergyCote[™] elastomeric coating for the highly reflective membranes required of California's Title 24

REQUEST FOR ENVIRONMENTAL HEALTH RECORDS

The undersigned hereby requests a copy of the records prepared and maintained by the Health Care Agency in the ordinary course of business, at or near the time of the act, condition, or event which they depict.

The records requested are maintained under the Public Records Act Government Code § 6250 – 6276.48. Some information held in the documents may be exempt from release pursuant to the Public Records Act.

The undersigned understands that the Health Care Agency will charge \$0.15 per page copied. In the case of a request for a large number of copies, the Health Care Agency may provide the requestor an estimate of copy costs prior to making said copies. If any request is to be canceled, this office must be notified at the above number within ten (10) days of receipt of request, otherwise cost incurred will be charged to the undersigned.

In order to assist you, please describe the reason for your request:

Phase 1 ESA

Please list addresses here (no more than 10 addresses per request):

1540 SUperior Avenue, Costa Mesa 92627

Check here if you would like a review only or to review before copies are made

REQUEST FOR ENVIRONMENTAL HEALTH RECORDS INSTRUCTION SHEET

1. Complete the "Request for Environmental Health Records" form

- ✓ Please **Print** all information on request forms.
- Describe the reason the records are being requested so that our staff may be able to narrow your search.
- ✓ If you require site-specific information, give the exact address of the site.
- ✓ If you are asking for information on multiple sites (for example, all sites on a street) you must give an address for each location (for example, 1001, 1003, 1009, etc.).
- ✓ Note that we cannot enter a "range" of addresses as search criteria.

2. Complete the appropriate "Information Checklist" form

- Check only the desired records associated with the site you have submitted.
- Remember that you will be charged for each page of copied records, so be sure to specify which records you want.
- Please note that lists of information can be very lengthy and therefore costly. You can ask about the length of the list before completing the request form to ensure a list is what you desire.

3. Return the completed forms to the Custodian of Records Representative at 1241 E. Dyer Road, Ste. 120, Santa Ana, CA 92705.

- ✓ Blank Records Request forms can be downloaded from the Records page on the Environmental Health website at <u>http://ochealthinfo.com/eh/home/records</u>.
- ✓ Please note that you can ask for an appointment to review multiple records.
- 4. Most requests take approximately ten (10) days to process. However, if your request requires more processing time, we will notify you of the extension and the estimated date.
- 5. Upon completion of the search, we will notify you by phone or by mail. You may return to the Environmental Health office to pick up the requested records, or arrange to have them mailed to your address.
- 6. RECORDS THAT HAVE NOT BEEN PICKED UP WITHIN 60 DAYS OF NOTIFICATION WILL BE DESTROYED.

Mr. James A. Lee Jim Lee Plumbing 1540 Superior Ave. Costa Mesa, CA 92627

SUBJECT: UNAUTHORIZED RELEASE FROM UNDERGROUND STORAGE TANKS located at 1540 Superior Ave., Costa Mesa, California

Dear Mr. Lee:

This Agency has been notified that an unauthorized release of gasoline has occurred at the subject location. Section 25295 of Chapter 6.7, California Health and Safety Code, and Section 2652 of Title 23, California Administrative Code require that a full, written report of the release be submitted to the local Agency. All of the following information, if available, is to be included in the report:

- (1) The type, quantity, and concentration of hazardous substances released.
- (2) The results of all investigations completed at that time to determine the extent of soil or groundwater or surface water contamination due to the release.
- (3) Method of cleanup implemented to date, proposed cleanup actions, and approximate cost of actions taken to date.
- (4) Method and location of disposal of the released hazardous substance and any contaminated soils or groundwater or surface water (indicate whether a hazardous waste manifest(s) is utilized).
- (5) Proposed method of repair or replacement of the primary and secondary containers.
- (6) Facility operator's name and telephone number.

Jim Lee Plumbing, C. M.

This report must be submitted to this Agency within five working days after the release has been discovered.

If you have any questions regarding this matter, please contact me at (714) 834-6648.

Very truly yours,

luca A. marson

Job No. 5799-M1-A6 August 1, 1986

Jim Lee Plumbing Company 1540 Superior Avenue Costa Mesa, California 92627

Subject: Laboratory Test Results of Subsurface Soil Contamination Investigation 1540 Superior Avenue, Costa Mesa, California.

Dear Mr. Lee:

Presented herewith is a report of our investigation to determine the subsurface soil contamination levels at the tank hole overexcavation bottom at the subject site.

The subject fuel storage tanks were removed on July 24, 1986 in the presence of Sylvia Marson, Hazardous Waste Specialist of the Orange County Waste Management Section. Soil samples were taken at locations selected by the same specialist. The samples were placed in glass mason jars and stored in an ice chest. Upon completion of the field investigation work, the samples were transported to a cortified chemical laboratory for contamination analysis.

A total of 6 soil samples were obtained, but laboratory tests were conducted on only 3 of these samples as selected by Ms. Marson.

The type and results of these tests are presented in the attached laboratory test report submitted by the authorized chemical laboratory.

Our findings and conclusions are based on generally accepted engineering practices and principles. No further warranties are implied nor made.

This opportunity to be of service is appreciated. If you have any further questions regarding this matter, please contact this office.

Respectfully submitted,

AAKO GEOTECHNICAL ENGINEERING CONSULTANTS, INC.

ATTN: Ms. Sylvia Morson

RE: REMOVAL OF GAS TANKS AND CONTAMINATED SOIL 1540 SUPERIOR AVE., COSTA MESA, CA 92627

Dear Ms. Morson:

In responce to our telephone conversation and verbal report from AAKO lab, I am going to remove the portion of soil that seemed to have the high contamination. I will have the soil spread on the ground and turned every other day and then call you for another test sample.

If everything meets with your approval, hopefully I can back fill the large hole in the ground.

Sincerely,

uccust ames A. Lee

APPENDIX 4 AETL REPORT GPRS REPORT

Subsurface Investigation for Storage Tanks/Anomalies

Prepared For: QA2

Prepared By: Mike Newell Area Manager-Southern California 11/6/2018

November 6, 2018

QA2 Attn: Carole 8186351618 Site: 1540 Superior Ave Costa Mesa, CA

We appreciate the opportunity to provide this report for our work completed on 11/6/18 at the above address in Costa Mesa, CA.

PURPOSE

The purpose of this project was to search for any underground storage tanks (USTs) or UST-related piping in the area.

EQUIPMENT

- 400 MHz GPR Antenna. The antenna is mounted in a stroller frame which rolls over the surface. The surface needs to be
 reasonably smooth and unobstructed in order to obtain readable scans. Obstructions such as curbs, landscaping, and vegetation will
 limit the feasibility of GPR. The data is displayed on a screen and marked in the field in real time. GPR works by sending pulses of
 energy into a material and recording the strength and the time required for the return of the reflected signal. Reflections are
 produced when the energy pulses enter into a material with different electrical properties from the material it left. The strength of
 the reflection is determined by the contrast in signal speed between the two materials. The total depth achieved can be as much as
 8' or more with this antenna but can vary widely depending on the conductivity of the materials. Depths provided should always be
 treated as estimates as their accuracy can be affected by multiple factors. For more information, please visit: Link
- **Electromagnetic Pipe Locator.** The EM locator can detect the electromagnetic fields from live power or radio frequency signals. It can also be used in conjunction with a transmitter to connect directly to accessible, metallic pipes, risers, or tracer wires. A current is sent through the pipe or tracer wire at a specific frequency and the resulting EM field can then be detected by the receiver. The receiver is moved over the surface without coming in contact with the ground so it is not affected by terrain. Depths provided should always be treated as estimates as their accuracy can be affected by multiple factors. Depths achieved can be as much as 20' depending on the type of signal being traced or methods used. For more information, please visit: Link
- **Magnetometer.** The magnetometer detects the magnetic field of a ferromagnetic object. It responds to the difference in the magnetic field between two sensors. It is interpreted in the field by listening to changes in frequency as emitted by a speaker on the device. For more information, please visit: Link

PROCESS

The EM pipe locator was used to connect to accessible, traceable pipes that may be tank-related such as vent pipes or product lines. A current is induced onto the pipe which creates an electromagnetic field that can be traced using the receiver. We can then attempt to trace these pipes to their origin or end point and paint or flag their locations.

Initial GPR scans were collected in order to evaluate the data and calibrate the equipment. Based on these findings, a scanning strategy is formed, typically consisting of scanning the entire area in a grid with 3'-5' scan spacing in order to locate any potential USTs that may remain at the site. The GPR data is interpreted in real time and anomalies in the data are located and marked on the surface along with their depths using spray paint, pin flags, etc. Depths are dependent on the dielectric of the materials being scanned so depth accuracy can vary throughout a site. Relevant scan examples were saved and will be provided in this report.

LIMITATIONS

Please keep in mind that there are limitations to any subsurface investigation. The equipment may not achieve maximum effectiveness due to soil conditions, above ground obstructions, reinforced concrete, and a variety of other factors. No subsurface investigation or equipment can provide a complete image of what lies below. Our results should always be used in conjunction with as many methods as possible including consulting existing plans and drawings, exploratory excavation or potholing, visual inspection of above ground features, and utilization of services such as One Call/811.

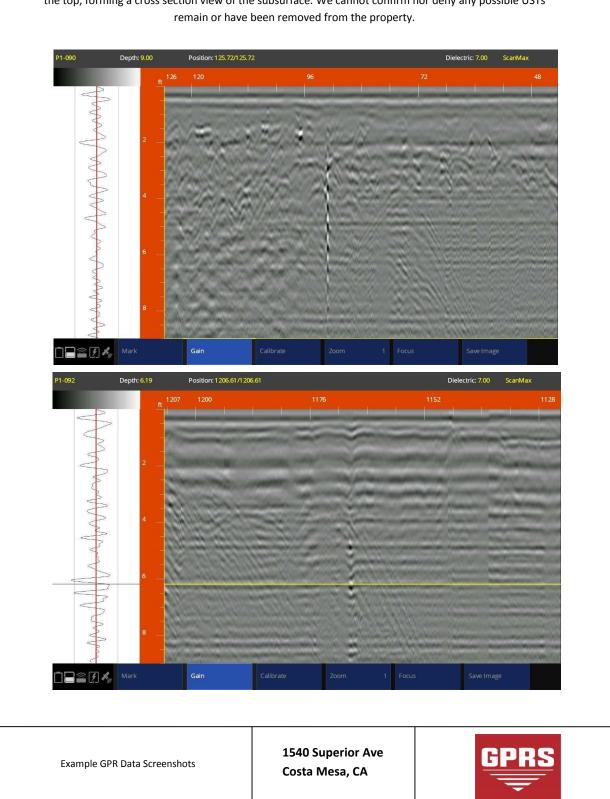

At this site, we observed some GPR depth limitations to approximately 4' from the surface. Our scans are limited 4' near any above ground obstructions such as fences.

FINDINGS

We found that the soil allowed for maximum GPR depth penetration from 4' in most areas. GPR cannot confirm nor deny if any USTs remain on the property. There was no evidence of a possible UST onsite or any evidence of excavation.

The following pages will provide photos and further explanation of our findings.

Untitled Map Write a description for your map. Untitled description for your map.	1542 Superior Ave	Legend Is42 Superior Ave
Site Map	1540 Superior Ave Costa Mesa, CA	GPRS

GPR data screenshots collected onsite. The depth scale is on the left and the distance of the scan is across the top, forming a cross section view of the subsurface. We cannot confirm nor deny any possible USTs remain or have been removed from the property. Site photos. Scanned the locations before cars were parked. No Evidence of possible UST onsite.

CLOSING

GPRS, Inc. has been in business since 2001, specializing in underground storage tank location, concrete scanning, utility locating, and shallow void detection for projects throughout the United States. I encourage you to visit our website (<u>www.gprsinc.com</u>) and contact any of the numerous references listed.

We were able to locate several unknown anomalies, pipes, and / or disturbances in the area using either the GPR or electromagnetic induction.

GPRS appreciates the opportunity to offer our services, and we look forward to continuing to work with you on future projects. Please feel free to contact us for additional information or with any questions you may have regarding this report.

Signed,

Mike Newell Area Manager—Southern California

Data Qualifiers and Descriptors

Data Qualifier:

#:	Recovery is not within acceptable control limits.
*:	In the QC section, sample results have been taken directly from the ICP reading. No preparation factor has been applied.
B:	Analyte was present in the Method Blank.
D:	Result is from a diluted analysis.
E:	Result is beyond calibration limits and is estimated.
H:	Analysis was performed over the allowed holding time due to circumstances which were beyond laboratory control.
J:	Analyte was detected . However, the analyte concentration is an estimated value, which is between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL).
M:	Matrix spike recovery is outside control limits due to matrix interference. Laboratory Control Sample recovery was acceptable.
MCL:	Maximum Contaminant Level
NS:	No Standard Available
S6:	Surrogate recovery is outside control limits due to matrix interference.
S8:	The analysis of the sample required a dilution such that the surrogate concentration was diluted below the method acceptance criteria.
X:	Results represent LCS and LCSD data.

Definition:

%Limi: %REC:	Percent acceptable limits. Percent recovery.
/ video:	
Con.L:	Acceptable Control Limits
Conce:	Added concentration to the sample.
LCS:	Laboratory Control Sample
MDL:	Method Detection Limit is a statistically derived number which is specific for each instrument, each method, and each compound. It indicates a distinctively detectable quantity with 99% probability.

2834 & 2908 North Naomi Street, Burbank, CA 91504 • DOHS NO: 1541, LACSD NO: 10181 Tel: (888) 288-AETL • (818) 845-8200 • Fax: (818) 845-8840 • www.aetlab.com

Data Qualifiers and Descriptors

- MS: Matrix Spike MS DU: Matrix Spike Duplicate
- ND: Analyte was not detected in the sample at or above MDL.
- PQL: Practical Quantitation Limit or ML (Minimum Level as per RWQCB) is the minimum concentration that can be quantified with more than 99% confidence. Taking into account all aspects of the entire analytical instrumentation and practice.
- Recov: Recovered concentration in the sample.
- RPD: Relative Percent Difference

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/17/2018 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
NEWPORT HEALTH CENTE EPA ID:: CAD057468944	500 SUPERIOR AVE	SW 1/8 - 1/4 (0.205 mi.)	L52	103

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/30/2018 has revealed that there are 19 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.25 miles of the target property.

Local Land Records

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 09/04/2018 has revealed that there are 2 DEED sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NEWPORT BEACH FCS Federal Facility ID:: CA9799F5533 INST ID:: 61134		SE 1/2 - 1 (0.824 mi.)	Z110	443

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date:	06/29/1992
Comments:	The Preliminary Assessment report was screened by R-4 staff. There
	are problems in the area of methane gas escaping when- ever
	excavation is done. The RWQCB is investigating the Hughes site for
	PCE and TCE contamination in groundwater. Staff recommends low priority PEA.

Waste code: Waste name: D001 IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

STATE **Open - Remediation** 10/01/2007 T0605930446 SANTA ANA RWQCB (REGION 8) Not reported 33.628656487 -117.9285335 Cleanup Program Site CAB Not reported 2080059 **Regional Board** Other Groundwater (uses other than drinking water) * Solvents From the 1950s until Raytheon discontinued operations in 2000, the 14-acre site was used for the development, manufacture, and assembly of electronic components. These operations included the use of solvents that contained volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and trichloroethylene (TCE). Comprehensive environmental investigations and interim cleanup actions have been conducted at the site. VOCs have been detected in soil, soil gas, and groundwater. The source of VOCs was from the historic storage and use of solvents in an area of the site located east of a former building that was located at 530 Superior Avenue (Figure 1). This building has been demolished and has been replaced with an open-air parking garage. The VOCs have not impacted drinking water supplies because the City of Newport Beach does not use the groundwater underlying the site as a source of drinking water. The Citys drinking water is obtained from groundwater production wells located several miles inland from the site and from imported water supplies. Site-specific risk assessments conducted for Raytheon conclude that the

concentrations of VOCs detected in the soil vapor do not pose a

EDR ID Number Database(s) EPA ID Number

HUGHES AIRCRAFT COMPANY (Continued)

significant potential risk to human health or the environment. Raytheon and the Water Board have agreed to perform additional remedial actions to ensure continued protection of human health and the environment. An off-site soil vapor investigation was conducted in the residential area east of Newport Blvd. in 2003. A comprehensive soil vapor investigation was conducted in 2004 by installing soil vapor monitoring probes on-site and at various locations in residential/commercial area south of Dana Road and west of Newport Blvd. Samples from shallow soil vapor probes were collected and analyzed from May 2004 through January 2009. VOCs were found in soil vapor (the air and gases found underground between soil particles)at on-site and off-site locations. After each soil vapor sampling event, Raytheon had risk assessments performed to determine the potential risks to human health associated with VOCs in the soil. The initial results of the soil gas assessments indicated that some VOC concentrations in the soil gas exceeded the California Human Health Screening Levels (CHHSLs). The CHHSLs are concentrations of hazardous materials in groundwater, soil, or soil gas that the California Environmental Protection Agency considers to be below thresholds of concern for risks to human health. The presence of a chemical at concentrations in excess of a CHHSL does not indicate that adverse impacts to human health are occurring or will occur, but suggests further evaluation of potential health concerns is warranted. Raytheon conducted a further evaluation that utilized site specific conditions instead of the generic default assumptions used in the CHSSLs. When these site specific conditions were factored into the evaluation of potential health risks, the estimated cancer risk from the potential exposure from vapor intrusion in the onsite and nearby off-site buildings ranged from between the 10-6 (one-in-a-million) and 10-5 (ten-in-a-million) to below the 10-6 residential cancer risk management level. To ensure continued protection of human health, Raytheon installed and operated a soil vapor extraction (SVE) cleanup system and has conducted additional soil vapor monitoring. The SVE system worked by extracting (using vacuum) impacted vapor from the subsurface, transporting the vapor via underground piping to an on-site treatment system, and then removing the VOCs from the vapor. The SVE system included extraction wells along the southern site boundary to prevent the potential migration of vapors away from the site. Additionally, extraction wells were located on-site in areas where elevated concentrations of VOCs were detected in soil vapor. The SVE system operated from October 2005 to September 2007. A site-specific risk assessment was performed after the SVE system was shut-down. The risk assessment concluded that the concentration of VOCs in the soil vapor in the off-site residential areas did not exceed the residential risk management levels and the soil vapor in the on-site areas did not exceed the commercial risk management levels. Additional post-remediation soil vapor sampling is scheduled to occur in 2009 to confirm the continued protection of human health and the environment. Soil vapor intrusion and indoor air monitoring studies were conducted in the existing on-site buildings as part of the redevelopment of the site into medical offices. The intended medical use of the facility required the application of the more stringent residential/sensitive use risk management levels. The Newport Healthcare Center has implemented indoor air monitoring and installed a sub-slab vapor recovery/venting system on building 510 to minimize the potential for soil vapor intrusion into the planned medical office buildings and to maintain

HUGHES AIRCRAFT COMPANY (Continued)

U003433369

potential risk associated with vapor intrusion below the 10-6 residential/sensitive use risk level. A comprehensive groundwater assessment was conducted on- and off-site. Groundwater beneath and around the site is highly brackish and saline, and contains naturally occurring petroleum and methane. This groundwater is not suitable for consumption, and is not used for drinking water. Raytheon has installed 91 groundwater monitoring wells to monitor groundwater conditions in the site vicinity. Groundwater beneath the site flows in a southsoutheasterly direction, roughly following Newport Boulevard toward Newport Bay. Elevated concentrations of PCE and TCE from the site have been detected in groundwater beneath the site, and extending several hundred feet downgradient (south-southeast) of the site. Environmental assessments have revealed that PCE and TCE detected in this area are naturally degrading into breakdown compounds. Elevated concentrations of vinyl chloride, a breakdown compound of PCE and TCE, have been detected approximately 1000 feet downgradient from the site. Very low concentrations of 1,2-dichloroethleye, another breakdown product of PCE and TCE, have been detected in the downgradient groundwater monitoring well on the south side of Pacific Coast Hwy. These low concentrations are below regulatory guidelines for human health and aquatic life, which indicates that a significant impact to Newport Bay is unlikely. In addition. low concentrations of benzene in the aroundwater monitoring well indicate the underlying groundwater has been impacted by releases from nearby underground fuel tanks not associated with the former Raytheon site. On the east side of Newport Blvd, the results of the groundwater monitoring indicate that there are other potential sources of VOCs to the groundwater not associated with the former Raytheon site. Final Remedial Actions for Groundwater Enhanced in-situ (in-place) bioremediation has been selected as the groundwater cleanup method for the site. In-situ bioremediation has successfully been performed at the site during pilot testing and as part of limited interim groundwater cleanup activities. The interim groundwater cleanup was performed to initiate VOC destruction while the long-term final cleanup measures are being developed. In-situ bioremediation involves the injection of a mixture of dilute food-grade vegetable oil and lactate serves as a nutrient source for naturally occurring bacteria that destroy the chlorinated VOCs. The breakdown process generates a series of intermediate daughter breakdown products, including vinyl chloride, and ultimately, harmless end products. The goal of in-situ bioremediation is to feed the microbes to accelerate the rate of natural VOC degradation that is already occurring in groundwater at the site. To further enhance the VOC cleanup process, non-pathogenic, naturally-occurring bacteria are also added with the vegetable oil. These naturally-occurring bacteria have been used at several other sites in California for groundwater cleanup purposes. The bacterial population wanes once the vegetable oil is completely used up as a food sources. The groundwater cleanup will include injection of water mixed with food-grade vegetable oil, sodium lactate and natural, non-pathogenic bacteria (this mixture is often referred to as amended water) into on-site groundwater and into off-site groundwater along Hospital Road, east of Newport Boulevard. This activity will also require construction of injection wells and use of temporary tanks for storage and mixing of the amended water, along with hoses, pumps, meters, and equipment to deliver the amended water to the groundwater. Historical Generators:

Theteriour Contentitore.				
Date form received by agency: 10/23/2000				
Site name:	RAYTHEON SYSTEMS CO			
Classification:	Not a generator, verified			
. Waste code:	D001			
. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS			
	CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE			
	FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE			
	MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT			
	WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.			

. Waste code: . Waste name:	D002 A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Depth-discrete groundwater sampling indicated the likelihood that a region of dense non-aqueous phase liquid (DNAPL) was present at the base of the shallow water-bearing zone beneath a portion of the west side of the site. This conclusion was based on the large vertical concentration gradient and the maximum concentration of trichloroethylene (TCE) of 71,000 microgram per liter (a%g/l) at CPT10. The lateral extent of the expected DNAPL	-

ARGO-TECH CORPORATION (Continued)

U001576814

was estimated based on the VOC concentrations greater than 10,000 a%g/l in groundwater samples from the lower portion of the shallow water-bearing zone that lies above the fine-grained Monterey Formation. Groundwater in the western portion of the site was remediated using in-situ chemical oxidation. Concentrations of chemicals of concern in soil vapor were present across the site and are being mitigated during development using engineered controls, including geotextiles, passive venting systems and other land use constraints.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

MESA CENTER AUTOMOTIVE, INC (Continued)

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name:	Liquids with pH < 2 with metals	
. Waste code: . Waste name:	D001 IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPO LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTEN CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF TH MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVEN WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.	IS
. Waste code: . Waste name:	D002 A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHI THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.	N
. Waste code: . Waste name:	D003 A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC G WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE C DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RISK AND TECHNOLOGY REVIEW

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification:	Large Quantity Generator
Description:	Handler: generates 1,000 kg or more of hazardous waste during any
	calendar month; or generates more than 1 kg of acutely hazardous waste
	during any calendar month; or generates more than 100 kg of any
	residue or contaminated soil, waste or other debris resulting from the
	cleanup of a spill, into or on any land or water, of acutely hazardous
	waste during any calendar month; or generates 1 kg or less of acutely
	hazardous waste during any calendar month, and accumulates more than 1
	kg of acutely hazardous waste at any time; or generates 100 kg or less
	of any residue or contaminated soil, waste or other debris resulting
	from the cleanup of a spill, into or on any land or water, of acutely
	hazardous waste during any calendar month, and accumulates more than
	100 kg of that material at any time

Biennial Reports:	
Last Biennial Reporting Year: 20	17
Annual Waste Handled:	
Waste code: Waste name:	D001 IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	31777.6
Waste code: Waste name:	D003 A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Info	rmation System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMA	
	California with information on hazardous waste shipments for brs, transporters, and treatment, storage, and disposal
facilities	

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 29 Source: EPA Telephone: N/A Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 29 Source: EPA Telephone: N/A Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 29 Source: EPA Telephone: N/A Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016 Date Data Arrived at EDR: 01/05/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 92 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 29 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 10/29/2018 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 29 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/19/2018 Next Scheduled EDR Contact: 01/07/2019 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/19/2018 Next Scheduled EDR Contact: 01/07/2019 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/19/2018 Next Scheduled EDR Contact: 01/07/2019 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018Source: Environmental Protection AgencyDate Data Arrived at EDR: 03/28/2018Telephone: (415) 495-8895Date Made Active in Reports: 06/22/2018Last EDR Contact: 09/19/2018Number of Days to Update: 86Next Scheduled EDR Contact: 01/07/2019Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/14/2018	Source: Department of the Navy
Date Data Arrived at EDR: 05/18/2018	Telephone: 843-820-7326
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 07/16/2018

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/30/2018 Date Data Arrived at EDR: 07/31/2018 Date Made Active in Reports: 09/07/2018 Number of Days to Update: 38 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 07/31/2018 Next Scheduled EDR Contact: 11/12/2018 Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 06/25/2018 Date Data Arrived at EDR: 06/27/2018 Date Made Active in Reports: 08/06/2018 Number of Days to Update: 40 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 09/25/2018 Next Scheduled EDR Contact: 01/07/2019 Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/18/2018 Date Data Arrived at EDR: 06/20/2018 Date Made Active in Reports: 09/14/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 09/18/2018 Next Scheduled EDR Contact: 12/31/2018 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/29/2018 Date Data Arrived at EDR: 08/30/2018 Date Made Active in Reports: 10/01/2018 Number of Days to Update: 32 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 08/29/2018 Next Scheduled EDR Contact: 12/17/2018 Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 10/05/2018 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 10/04/2018 Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/04/2018 Date Data Arrived at EDR: 09/05/2018 Date Made Active in Reports: 10/02/2018 Number of Days to Update: 27 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 09/05/2018 Next Scheduled EDR Contact: 12/17/2018 Data Release Frequency: Semi-Annually

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 08/03/2018 Next Scheduled EDR Contact: 11/19/2018 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UM	TRA: Uranium Mill Tailings Sites	for federal government use in national defense programs. When the mills

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
 Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

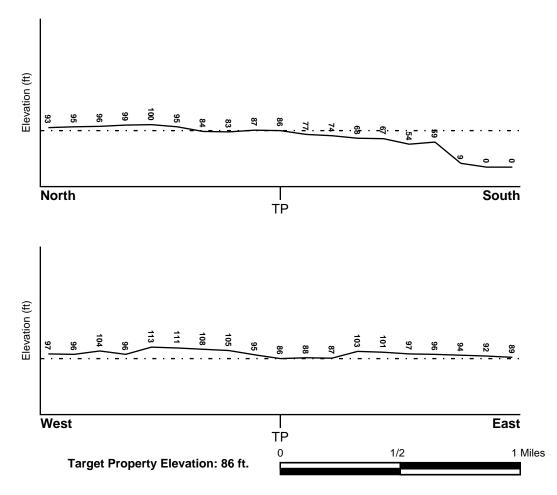

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

COSTA MESA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

••	le-opecific frydrogeological Da	
	Search Radius:	1.25 miles
	Location Relative to TP:	1/8 - 1/4 Mile SW
	Site Name:	HUGHES AIRCRAFT CO
	Site EPA ID Number:	CAD057468944
	Groundwater Flow Direction:	GENERALLY SE IN THE ALLUVIAL ZONE AT AN APPROXIMATE RATE OF 250 TO
		1,000 FEET PER YEAR AND GENERALLY SE IN THE MONTEREY FORMATION AT AN
		APPROXIMATE RATE OF 2 TO 25 FEET PER YEAR.
	Measured Depth to Water:	33 to 45 feet in the alluvial zone and 48 to 57 feet in the Monterey
	·	formation.
	Hydraulic Connection:	The shallow alluvial zone is considered a perched aquifer that
	-	overlies the silty clay Monterey formation.
	Sole Source Aquifer:	No information about a sole source aquifer is available
	Data Quality:	Information based on site-specific subsurface investigations is
	-	documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	MYFORD
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
Boundary			Classification		Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
