1.0 EXECUTIVE SUMMARY

Barr & Clark completed a Phase I Environmental Site Assessment (Phase I ESA) for the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property).

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was listed in the databases searched by EDR.

- The Subject Property address is listed on the following databases:

  - The Subject Property, listed as 1X City of Costa Mesa, at 695 West 19th Street is listed on the HWTS and HAZNET databases.

    The subject property was identified on the HAZNET databases under EPA ID Number CAD067786749 and CAC000296097. The HAZNET listings relate to the on-site generation of 14.9625 tons of asbestos containing waste in 1990. No current violations were found under this address. Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern. Barr & Clark does not consider this listing a REC.

    Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern to the Subject Property.

  - The property at 659 West 19th Street, located adjacent to the east of the Subject Property, was listed in the databases searched by EDR.

    - The property, listed as ML Enterprise LLC, dba Mouse Graphics and Orange Coast Reprographics Inc., dba Acosta Mesa Blueprint Co., was identified on the RCRA NonGen / NLR database.

    - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 678 West 19th Street, located adjacent to the north of the Subject Property across West 19th Street, was listed in the databases searched by EDR.

  - The property, listed as Sandra Bolanos and the Towers on 19th Street, was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 700 West 19th Street, located approximately 478 feet to the east/northeast of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as Don J Johnson, was identified on the EDR Hist Auto database. The property is identified as a gasoline service station as Don J Johnson from 1969 through 1975 and a general automotive repair shop as Martin's Auto Care in 1979. No other listings regarding the historical automotive use of the property were provided. The property is currently occupied by medical office suites.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21). Based on the reported information, the listed facilities have a low potential to impact soil or groundwater beneath the Subject Property.

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing Corporation for a full Phase I Environmental Site Assessment of the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing Corporation's Scope of Work were previously described in this report where applicable. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. No further action or investigation is recommended at the Subject Property in relation to recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs).

This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.

2.0 INTRODUCTION

2.1 Subject Property

This Phase I Environmental Site Assessment (Phase I ESA) was conducted by Barr & Clark, Inc. in general accordance with criteria listed in the ASTM Standard E1527-21 (the Standard) and in conformance with the Scope of Work required by Jamboree Housing Corporation to evaluate the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property, see attached Figure 1) for the possible presence of contaminants as defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, 42 USC Section 9601). The assessment was also conducted to evaluate the possible presence of petroleum products at the Subject Property which are not regulated by CERCLA. Finally, the assessment was conducted in general accordance with the *All Appropriate Inquiries* (AAI) criteria as defined by 42 USC Section 9601. Barr & Clark was retained by Jamboree Housing Corporation (client) to conduct this assessment. This report is formatted to provide general consistency with the guidelines provided by the Standard.

2.2 Scope of Services

This assessment was conducted to evaluate environmental concerns caused by past or present on-site and off-site activities. The scope of work for this assessment consisted of the following tasks as relevant and possible:

- An on-site reconnaissance and inspection by a Barr & Clark environmental professional to evaluate current conditions at the Subject Property and vicinity;
- A review of environmental databases, including listings of known or suspected contaminated sites, known landfill locations, known leaking underground storage tank (LUST) locations, and operations regulated under federal or state hazardous waste regulations;
- A review of historical aerial photographs and topographic maps;
- A review of previous documented environmental site assessments and evaluations performed at the subject site as such are relevant and provided to Barr & Clark;
- A review of title documentation for evidence of environmental liens on the Subject Property;
- An interview with the Subject Property owner's representative;
- A description of the regional geologic and hydrogeologic setting for the Subject Property; and
- Preparation of a written report.

Issues that were evaluated with respect to the Subject Property consisted of the following as relevant and possible:

- Storage, use and disposal of chemicals, hazardous materials, or hazardous waste at the Subject Property;
- Previous on-site activities;
- Possible contamination resulting from off-site sources and nearby properties; and
- Historical or current circumstances that suggest that the Subject Property could be a source of contamination.

2.3 Significant Assumptions

This assessment was conducted in general accordance with ASTM Standard E1527-21 and in conformance with the Scope of Work required by Jamboree Housing Corporation. Accordingly, it is understood that the assessment is not exhaustive. General conformance to the Standard is intended to reduce but not eliminate uncertainties regarding potential *Recognized Environmental Conditions* (RECs) at the Subject Property. It is recognized within the Standard that there are reasonable limits of time and cost to conduct a Phase I ESA that must always be considered.

The Standard also recognizes that the level of inquiry will vary from one site to another depending on, but not limited to factors such as: size, age, history, chemical usage, past remedial efforts and/or off-site concerns.

In evaluating the Subject Property, Barr & Clark has relied in good faith on information provided by individuals as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation, deception or fraudulent acts of the persons interviewed or contacted.

This assessment represents Barr & Clark's professional interpretation and judgment of the existing site conditions based on the facts currently available within the limits of the mutually agreed scope of work, budget and schedule, which are not intended to be exhaustive in scope. It is Barr & Clark's specific intent that the conclusions and recommendations presented herein be used as guidance and not necessarily as a firm course of action unless explicitly stated as such. We make no warranties, express or implied, as to the functionality of the Subject Property for a particular purpose. The information provided in this report is not to be construed as legal advice.

2.4 Limitations and Exceptions

This assessment was prepared based on the information collected by Barr & Clark during this evaluation. Barr & Clark cannot guarantee the accuracy or completeness of governmental or site records. This report documents the condition of the sites on the date visited.

The services conducted by Barr & Clark have been rendered in a manner generally consistent with the level of skill and care ordinarily exercised by members of the environmental consulting profession currently practicing under similar conditions. As noted above, this assessment was conducted in general accordance with the ASTM Standard and the Barr & Clark proposal. Accordingly, no evaluation was completed with respect to the following potential issues as part of this project: an assessment of the regional potential for radon contamination of structures on the Subject Property or a measurement of the radon concentration in structures on the Subject Property; an assessment of the possible asbestos content of building materials; a geophysical survey for buried vaults, tanks or sumps; an assessment of wetlands on the Subject Property; an assessment of molds or fungi or other air quality issues that may be present; an assessment of California Prop 65 issues; geotechnical/Seismic/Methane/EMF issues; an assessment of endangered flora or fauna; paleontological, cultural or historical resources; soils or groundwater testing; Environmental, Safety and Industrial Hygiene regulatory compliance of the operations conducted at the facility; an evaluation of possible lead concentration in drinking water at the Subject Property; and an evaluation of possible lead concentration in on-site paints.

Barr & Clark is not engaged in environmental reporting for the purpose of advertising, sales promotion, or endorsement of any client's interest, including raising investment capital, recommending investment decisions, or other publicity purposes. Our client acknowledges that this report has been prepared for the exclusive use of the client and agrees that Barr & Clark reports and correspondence will not be used nor relied upon in any prospectus or offerings circular. This report is based on data and information collected during the evaluation of the Subject Property conducted by Barr & Clark personnel and is based solely on the Subject Property conditions encountered on the date and time of the site visit, supplemented by relevant historical information and data as provided and described in this report. No assurance is made regarding changes in conditions that could occur subsequent to the time of the assessment.

2.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.5), this data gap is not expected to alter the findings of this assessment.

- Barr & Clark requested information relative to deed restrictions and environmental liens and a title search. This information was not provided at the time of the assessment.

- Barr & Clark was not able to document the historical use of the Subject Property prior to 1938. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1938; historical topographic maps were not available prior to 1896, and Sanborn fire insurance maps were not available for the Subject Property. This data failure is not considered critical and does not change the conclusions of this report, as the 1938 historical aerial photograph revealed the Subject Property to be undeveloped land.

2.6 User Reliance

This report is prepared for the sole use and benefit of Barr & Clark's client (Jamboree Housing Corporation) and it is reasonable for the client to rely upon the extent, character, and conclusions of this report.

3.0 SITE DESCRIPTION

3.1 Property Location and Description

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. (Figures 1 through 2).

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

3.2 Physical Setting

The United States Geological Survey (USGS), *Newport Beach, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the Subject Property is located at approximately 96 feet above mean sea level (MSL). The contour lines in the area of the Subject Property indicate the area slopes gently towards the east.

According to California's Groundwater: Bulletin 118, published by the State of California Department of Water Resources, the Subject Property is located in the Coastal Plain of Orange County Groundwater Basin. The Coastal Plain of Orange County Groundwater Basin (Orange County Basin) underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks exposed on the north in the Puente and Chino Hills, on the east in the Santa Ana Mountains, and on the south in the San Joaquin Hills. The basin is bounded by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County - Los Angeles County line on the northwest. The basin underlies the lower Santa Ana River watershed.

The landscaped areas of the Subject Property parcel were the only areas of exposed soil/landscape that were observed on the Subject Property properties during the site reconnaissance. No other significant areas of exposed soils were observed on the Subject Property.

Review of soils information for the Subject area provided by EDR indicated the following: According to the soils information provided by EDR, the soils beneath the Subject Property are identified as Myford sandy loam. The typical soil profile is sandy loam from 0 to 11 inches, sandy clay from 11 to 18 inches, sandy clay loam from 18 to 70 inches and sandy loam from 70 to 79 inches. These soils are in the Class D Hydrologic Group with very slow infiltration rates. These soils are described as clayey, have a high water table, or are shallow to impervious layer. These soils are moderately well drained. Depth to water table is 0 inches.

The nearest surface water in the vicinity of the Subject Property is the Santa Ana River, located approximately 1.47 mile to the west of the Subject Property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the Subject Property during this assessment.

According to environmental documentation posted on the State Water Resources Control Board, GeoTracker website (http://geotracker.swrcb.ca.gov), the depth and direction of groundwater in the vicinity of the Subject Property is inferred to be present at approximately 28 to 35 feet below ground surface (bgs) and the flow is northwest.

3.3 Current and Historic Use of Site

According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

3.4 Historical Uses of Site

3.4.1 Historical Aerial Photographs

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical aerial photographs from EDR of Shelton, Connecticut. A total of 15 aerial photographs were reviewed for the following years: 1938, 1947, 1953, 1963, 1972, 1977, 1987, 1990, 1995, 2002, 2005, 2009, 2012, 2016 and 2020. The following observations were made from our review of the historical aerial photographs:

- 1938, 1947, 1953. The Subject Property appears to be undeveloped land. The adjacent properties to the north across West 19th Street, south, east and west appear to be undeveloped land.
- 1963. The Subject Property appears to be a parking lot for the commercial building to the west and a vacant lot. The adjacent property to the north across West 19th Street appears to be undeveloped land. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with a commercial building.
- 1972, 1977, 1987, 1990. The Subject Property appears to be a parking lot for the commercial building to the west and a vacant lot. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with existing single-family dwellings. The adjacent property to the west appears to be developed with a commercial building.
- 1995. The Subject Property appears to be developed with the existing drive and parking areas for the existing commercial building to the west of the Subject Property. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with a commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with the existing commercial building.

- 2002, 2005, 2009, 2012, 2016 and 2020. The Subject Property appears to be developed with the existing drive and parking areas for the existing commercial building to the west of the Subject Property. The adjacent property to the north across West 19th Street appears to be developed with the existing senior residential property. The adjacent property to the east appears to be developed with the existing commercial building. The adjacent properties to the south across Plumer Street appears to be developed with the existing single-family dwellings. The adjacent property to the west appears to be developed with the existing commercial building.

3.4.2 Sanborn Fire Insurance Map Review

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical Sanborn Fire Insurance maps from EDR of Shelton, Connecticut. According to EDR, Sanborn Map coverage was not available for the Subject Property and adjacent properties.

3.5 Oil and Gas History

Barr & Clark researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System (http://maps.conservation.ca.gov/dog) for information regarding oil and gas development. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject Property.

3.6 Adjacent Sites

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The following adjacent properties were observed:

- North: West 19th Street followed by a senior residential property (678 West 19th Street).
- East: A commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street).
- South: Single-family dwellings.
- West: a commercial building (Costa Mesa Senior Center at 695 West 19th Street).

4.0 USER PROVIDED INFORMATION

4.1 Interviews

4.1.1 Interview with Owner

Mr. Enyelber Franco, Manager and Designated Representative of the Owner / Property Manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.2 Interview with Report User

Mr. Eric Cushman, Designated Representative of the User, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.3 Interview with Key Site Manager

Mr. Enyelber Franco, Maintenance Technician and Designated Representative of the Owner / Property Manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

4.1.4 Interviews with Past Owners, Operators or Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

4.1.5 Interview with Others

As the Subject Property is not an abandoned property as defined by ASTM E1527-21, interview with others were not performed.

4.2 Title Records

A chain-of-title report was not requested by the client for this project.

4.3 Environmental Liens/Activity and Use Limitations

An environmental liens/activity and use limitations report was not requested by the client for this project.

4.4 Specialized Knowledge

No specialized knowledge of the Subject Property was communicated from the client to Barr & Clark.

4.5 Commonly Known Information

No commonly known information that could relate to a Recognized Environmental Condition (REC) associated with the Subject Property was communicated from the client to Barr & Clark.

4.6 Valuation Reduction for Environmental Issues

No information was received from the client indicating that the selling price of the Subject Property was *significantly* reduced due to the chemical impacts existing on the Subject Property.

4.7 Owner/Property Manager/Occupant Information

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping.

4.8 Reason for Conducting this Phase I ESA

According to the client, this Phase I ESA is being conducted for due diligence purposes.

4.9 Other

No additional information was provided to Barr & Clark for review.

4.10 Historical Uses of Site

Other than as indicated in Section 5.3 below, no other specific adverse historical uses of the Subject Property resulting in potential environmental concerns was communicated to Barr & Clark by the client.

5.0 RECORDS REVIEW

5.1 Federal and State Database Records

Barr & Clark retained Environmental Data Resources (EDR) of Shelton, Connecticut to provide a search of available environmental database records. The records search was conducted to meet the requirements of ASTM Standard Practice for Environmental Site Assessments, E1527-21. Search distances (radii) were selected generally pursuant to the ASTM E1527-21 standard. A copy of the EDR Report, included as Appendix C, normally contains the results of a review of the following databases and often others:

- Federal Records: US Environmental Protection Agency's Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS); National Priority List (NPL); RCRA Treatment, Storage, and Disposal Sites; toxic release reporting, Resource Conservation and Recovery Act (RCRA) violators; toxic substance manufacturers and importers; generators, or transporters, commercial storers and/or brokers and disposers of polychlorinated biphenyls (PCBs); hazardous material spill incidents reported to the department of Transportation; and Federal Superfund Liens.

- California Records: State hazardous waste sites; wastewater treatment facilities; solid waste facilities/landfill sites; and registered and leaking underground storage tank (UST) incident reports.

5.1.1 Subject Property

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was listed in the databases searched by EDR.

- The Subject Property address is listed on the following databases:

  - The Subject Property, listed as 1X City of Costa Mesa, at 695 West 19th Street is listed on the HWTS and HAZNET databases.

    The subject property was identified on the HAZNET databases under EPA ID Number CAD067786749 and CAC000296097. The HAZNET listings relate to the on-site generation of 14.9625 tons of asbestos containing waste in 1990. No current violations were found under this address. Based on the current regulatory status and absence of reported releases, the database listings for the Subject Property are not expected to represent a significant environmental concern. Barr & Clark does not consider this listing a REC.

5.1.2 Off-Site Facilities with Known Locations

The EDR report refers to numerous properties listed on databases indicating environmental impairment in the vicinity of the Subject Property.

- The property at 695 West 19th Street, located adjacent to the east of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as ML Enterprise LLC, dba Mouse Graphics and Orange Coast Reprographics Inc., dba Acosta Mesa Blueprint Co., was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 678 West 19th Street, located adjacent to the north of the Subject Property across West 19th Street, was listed in the databases searched by EDR.

  - The property, listed as Sandra Bolanos and the Towers on 19th Street, was identified on the RCRA NonGen / NLR database.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

- The property at 700 West 19th Street, located approximately 478 feet to the east/northeast of the Subject Property, was listed in the databases searched by EDR.

  - The property, listed as Don J Johnson, was identified on the EDR Hist Auto database. The property is identified as a gasoline service station as Don J Johnson from 1969 through 1975 and a general automotive repair shop as Martin's Auto Care in 1979. No other listings regarding the historical automotive use of the property were provided. The property is currently occupied by medical office suites.

  - No current violations were found under this address. Based on the current regulatory status, the database listings for the site are not expected to represent a significant environmental concern to the Subject Property. Barr & Clark does not consider this listing a REC.

5.2 Orphan Summary

Three properties were identified in the EDR report as "orphan sites". These are properties listed in environmental databases, but which EDR has been unable to locate with adequate precision to determine whether they are pertinent to the investigation at the Subject Property.

Barr & Clark was able to determine to a reasonable degree of certainty that the listed orphan sites were not within the specified database search distances, or if a site was in the distance specified, it was not an identified concern.

5.3 State, City and County Files

Public agencies were contacted to review file information, if available, regarding the possible presence of environmental impacts, remedial activities, hazardous materials storage or hazardous material usage at the subject property. The information obtained from the governmental agencies is summarized below.

5.3.1 California Regional Water Quality Control Board

The Regional Water Quality Control Board (RWQCB) maintains records for groundwater contamination and remedial activities at selected impacted sites. Barr & Clark researched the RWQCB GeoTracker website (www.geotracker.waterboards.ca.gov) was researched on June 26, 2023. No records regarding a release on the Subject Property were on-file on the RWQCB GeoTracker website.

5.3.2 California Department of Toxic Substances Control

The California Department of Toxic Substances Control (DTSC) files include records of hazardous materials storage and/or impacts at various sites. Barr & Clark researched the DTSC EnviroStor website on June 26, 2023. No records regarding a release on the Subject Property were on-file at the DTSC.

5.3.3 Fire Department

A written request for file review was submitted to the Orange County Fire Authority on June 26, 2023 for records pertaining to underground storage tanks, hazardous materials and fire prevention information. As of the date of this report, no response has been received regarding the Subject Property from the Orange County Fire Authority.

5.3.4 Building Department

Barr & Clark visited the City of Costa Mesa Building Department on June 26, 2023 for information regarding historical tenants and property use of the Subject Property. No potential environmental concerns were identified in the review of the building records for the Subject Property.

5.3.5 Planning Department

Barr & Clark visited the City of Costa Mesa Planning Department on June 26, 2023 for information regarding historical tenants and property use of the Subject Property. According to the Planning Division, the Subject Property is zoned C1 for Local Business.

5.3.6 Bay Area Air Quality Management District (BAAQMD)

Barr & Clark researched the Air Quality Management District (AQMD) online database on June 26, 2023 for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment, which may include dry cleaning machines and USTs. The subject property is not listed on the AQMD databases. No PTOs, NOVs or NTCs were issued for the Subject Property.

5.4 Historical Environmental Reports

Although requested, no previous reports or other pertinent documentation was provided to Barr & Clark for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

6.1 Summary of Site Reconnaissance

Barr & Clark assessor Michael Atallah visited the Subject Property on June 26, 2023. The weather at the time of the site visit was clear and approximately 80 degrees Fahrenheit.

The Subject Property consists of the eastern portion of the regular-shaped parcel of land (shared with the Costa Mesa Senior Center) located in Costa Mesa, California. The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 424-211-01.

The Subject Property is improved with an asphalt-paved parking lot and associated landscaping. According to historical sources reviewed, the Subject Property has been a parking lot since at least 1995. Prior to the development of the current Subject Property improvements, the Subject Property was vacant land from as early as 1938 until prior to 1963 when the Subject Property appeared to be developed with a parking lot and vacant land until at least 1995 when the Subject Property appeared to be developed with the current Subject Property improvements. The Subject Property consist of approximately 1.37 acres (eastern portion of the 2.67 acre parcel) according to records reviewed by Barr & Clark.

The Subject Property is located in a neighborhood of Costa Mesa which is located in a mixed residential and commercial area. The immediately surrounding properties consist of West 19th Street followed by a senior residential property (678 West 19th Street) to the north; a commercial building (Mouse Graphics and Costa Mesa Blueprint at 659 West 19th Street) to the east, Plumer Street followed by single-family dwellings to the south; and a commercial building (Costa Mesa Senior Center at 695 West 19th Street) to the west.

Southern California Edison (SCE) provides electricity, the City of Costa Mesa provides sewer services, the Mesa Water District provides water services and Southern California Gas Company (natural gas) provides natural gas service to the Subject Property. Trash and recycling services are provided by a licensed trash hauler, which is detailed in Section 6.2.5 below.

6.2 Evaluation of Specific Concerns

6.2.1 Hazardous Substances and Petroleum Products

No hazardous materials or petroleum products were observed at the subject property. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the subject property.

6.2.2 Storage Tanks

No underground storage tanks (USTs) or aboveground storage tanks (ASTs) for hazardous materials storage were reported for the Subject Property. No visible evidence of such was observed during the site reconnaissance.

6.2.3 Polychlorinated Biphenyls

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "Non-PCB;" 2) 50 ppm-500 ppm – "PCB-Contaminated;" and, 3) Greater than 500 ppm – "PCB-Containing." The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Transformers were not observed at the subject property.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, balers, etc.) was observed on the Subject Property during Barr & Clark's reconnaissance.

6.2.4 Waste Disposal

The Subject Property is currently a parking lot and is not involved in the generation of wastes. No further action or investigation is recommended regarding wastes at the Subject.

6.2.5 Sewage Discharge and Disposal

Sanitary discharges on the Subject Property are directed into the municipal sanitary sewer system. The City of Costa Mesa services the Subject Property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the Subject Property.

6.2.6 Stained Soils

No evidence of stained soils or distressed vegetation was observed during the Barr & Clark site reconnaissance.

6.2.7 Surface Runoff

Storm water is removed from the Subject Property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the Subject Property and in the public right of way. Subject Property storm water from roofs, landscaped areas, and paved areas is directed to the public right of way, and to on-site storm water drains. The Subject Property is connected to a municipal owned and maintained sewer system.

6.2.8 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the Subject Property were observed.

6.2.9 Pools of Liquid

No evidence of pools of liquid was observed during the Barr & Clark site reconnaissance.

6.2.10 Pits, Ponds or Lagoons

No evidence of pits, ponds or lagoons was observed during the Barr & Clark site reconnaissance.

6.2.11 Strong, Pungent or Noxious Odors

No evidence of strong, pungent or noxious odors was evident during the Barr & Clark site reconnaissance.

6.2.12 Stressed Vegetation

No evidence of stressed vegetation was observed at the Subject Property during the Barr & Clark site reconnaissance.

6.2.13 Clarifiers, Sumps, Oil Water Separators or Septic Tanks

No clarifiers, sumps or oil water separators were observed or reported for the Subject Property addresses.

6.2.14 Groundwater Wells

No groundwater wells were observed or reported for the Subject Property.

6.2.15 Oil Wells / Pipelines

No oil wells or pipelines were observed or reported for the Subject Property.

6.2.16 High Voltage Power Lines

No high voltage power lines were observed in the nearby vicinity of the Subject Property.

6.2.17 Imported Fill

No information related to the use of imported fill material was identified in records for the Subject Property addresses.

6.2.18 Wetlands

Review of wetlands information provided by EDR indicated that no wetland areas are indicated at the Subject or adjacent properties.

Barr & Clark performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C0268J, dated December 3, 2009, the subject property appears to be located in Zone X, Areas of minimal flood hazard.

6.2.19 Asbestos

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations require sampling potential ACBM prior to demolition or extensive renovation, regardless of the dates of construction; therefore, if such activities are planned, it may be required to conduct a survey of the entire facility, or that portion slated for renovation or demolition, before initiating such destructive activities. That survey should include an assessment of all subject building materials, including those in areas which are normally inaccessible. Any material found to be ACBM should be handled in accordance with applicable regulations.

The Subject Property is a parking lot and no suspect ACBM were observed during the site assessment. No further action or investigation is recommended regarding ACBM at the Subject.

6.2.20 Lead Based Paints

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

The Subject Property is currently a parking lot and no suspect lead-based paint was observed during the site assessment. No further action or investigation is recommended regarding LBP at the Subject.

6.2.21 Radon

The Subject Property is located in Radon Zone 3, which has a predicted average indoor screening level less than 2.0 pCi/L. The USEPA action level for radon is 4 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.2.22 Drinking Water Quality

According to available information, a public water system operated by the Mesa Water District serves the Subject Property vicinity. According to a representative of the Mesa Water District, shallow groundwater beneath the Subject Property is not utilized for domestic purposes. The sources of public water for the Mesa Water District are from local groundwater sources. Groundwater, or well water, is pumped from Orange County's natural underground reservoir, or groundwater basin, via Mesa Water's seven wells.

According to the 2022 Water Quality Report, water supplied to the Subject Property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.2.23 Water Intrusion and Mold Growth

As part of this assessment, Barr & Clark performed a limited visual inspection for the conspicuous presence of mold in the Subject Property building. Barr & Clark inspected the accessible interior areas of the Subject Property building, including walls and ceilings, in-unit and common mechanical/electrical closets, areas under sinks, and flat roofs (for evidence of water ponding) and around windows and exterior doors for the presence of conspicuous mold or observed water intrusion or accumulation. Barr & Clark did not note conspicuous visual or olfactory indications of the presence of mold, nor did Barr & Clark observe obvious indications of significant water damage at the time of the inspection (in the areas inspected). No sampling was conducted as part of this assessment.

This activity was not designed to discover all areas which may be affected by mold growth on the Subject Property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the Subject Property. This evaluation did not include a review of pipe chases, HVAC systems (if present), areas behind enclosed walls, attics, crawl spaces, ceilings or other areas that were difficult to access.

7.0 VAPOR ENCROACHMENT SCREEN

Barr & Clark has completed a Tier 1 Vapor Encroachment Screen of the Subject Property in accordance with ASTM Standard E 2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

7.1 Purpose

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-10 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject Property.

7.2 Methodology

Barr & Clark utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-10. EDR's VEC App performs an initial search of all ASTM E 2600-10 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-10 for COC-contaminated sites.

7.3 Results

Subject: Based on review of environmental records searched by EDR for this Tier 1 VES, Barr & Clark concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists.

Area of Concern (AOC): Based on review of environmental records searched by EDR for this Tier 1 VES, The AOC search did not identify any contaminated sites.

Several sites identified in the records search were determined to be outside of the AOC or were not identified as contaminated sites; therefore, a Vapor Encroachment Condition (VEC) regarding these sites could be ruled out.

8.0 FINDINGS AND RECOMMENDATIONS

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing Corporation for a full Phase I Environmental Site Assessment of the Parking Lot located at 695 West 19th Street, Costa Mesa, CA 92627 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing Corporation's Scope of Work were previously described in this report where applicable. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. No further action or investigation is recommended at the Subject Property in relation to recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs).

This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.

9.0 SIGNATURE PAGE

By signing below, Barr & Clark declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. Barr & Clark has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Barr & Clark has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RAYTHEON COMPANY EPA ID:: CAD057468944	***500 SUPERIOR AVE***	***S 1/2 - 1 (0.864 mi.)***	***Z100***	***914***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

PACIFIC SPRINKLER SU EPA ID:: CAR000335232	770 W 19TH STREET	WNW 1/8 - 1/4 (0.226 mi.)	H32	215

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 5 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there are 20 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 8 CPS-SLIC sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine hazardous waste inspection. Met with Rose Aguilar. Inspected hazardous waste broken products and returns in storage bins and drums. Drums and bins were provided with a lid, stored in a secure manner and appear to be in good condition. A Hazardous Waste label was noted on all drums and bins with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all universal wastes (fluorescent lamps, batteries, paint, electronics, etc.) are managed appropriately. Continue to maintain disposal records for these hazardous wastes. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-17-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Costa Mesa Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-16-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine Hazardous Materials Business Plan (HMBP) inspection. Honor Valentin, manager, provided permission to inspect. Observed the following materials on site at reportable quantities: - CO2 (48 gallons) Hazardous Materials disclosed in CERS match what is reported on site. Per California Health & Safety Code Ch. 6.95, businesses that store and handle hazardous materials at or over reportable quantities (55 gal of a liquid, 500 lbs of a solid, 200 cubic ft of a compressed gas) must prepare and implement an HMBP.

Eval Notes: On site to conduct a routine hazardous waste inspection. Alfredo Zamora, station manager , provided permission to inspect. The facility has one 55 gallon drum for waste fuel contaminated solids and one 55 gallon drum for waste fuel contaminated water stored in the municipal dumpster area. The hazardous waste drums are properly labeled, dated, and stored closed. A perimeter walk was conducted. Municipal dumpster area does not appear to contain any hazardous waste. Manifests from Belshire Environmental were available and reviewed. Hazardous waste was last removed from the site on 1/10/2019. Emergency response information is posted, and employees are reported to be trained. No hazardous waste violations were observed on this date. A copy of the inspection report to be emailed to rm37@rmshell.com

Eval Type: Other, not routine, done by local agency
Eval Notes: EMAIL: Please send an amendment to the permit. As soon as I approve amendment you can start work. I will need to witness the 87 and 91 secondary test. Jennifer Negro OC Health Care Agency, Environmental Health Hazardous Waste Specialist III Emergency Response Phone: 714-981-9100 Fax: 714-754-1768 www.occupainfo.com From: Leeanna Ruddell [mailto:lruddell@fastechus.com] Sent: Monday, March 17, 2014 12:21 PM To: Negro, Jennifer Subject: FW: 63139 - 799 W. 19th Street, Costa Mesa - 9100077 Inspector I left you a voice mail a short time ago regarding this site. As stated in my voice mail, we have an approved permit SR 123245 and want to add flex hoses to the scope of work. Would we need to file a new permit or just alter the open permit? I also would like to find out what testing requirements are for this permit? Thank you, Leeanna L. Ruddell Permitting Manager

Eval Notes: On site for routine UST inspection, monitoring system certification, and spill bucket testing. Met this date with Alfredo Zamora, Station Manager. The facility has three (3) double-walled tanks (87, 91, and diesel) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. The Veeder Root panel display reads "all functions normal." Fill sumps, turbine sumps, and UDCs have VR 208 sensors. Tank annulars have VR 420 sensors. Product piping is double-walled and pressurized and has Veeder Root PLLD (8484) on the 87 and 91 tanks and VMI LD-2000 on the diesel tank. Sensors were observed at the lowest point. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Positive shutdown and fail-safe programming were verified. Overfill prevention is provided by flapper valves in the fill tube of each tank. Spill buckets were tested hydrostatically and passed. Testing was conducted by [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has three double-walled tanks (87, 91, D) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic (87, 91) and mechanical (D) line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Steven Loera of Fastech. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment testing was last conducted on 6/21/19. Overfill Prevention Inspection was last conducted on 2/3/21. Both must be tested every 36 months.

Violation Source: CERS,

Site ID: 172045
Site Name: WINALL OIL CO
Violation Date: 10-27-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 02/17/2021. OBSERVATION: Overfill Prevention Equipment Inspection Form dated 10/22/20 indicate the following components failed: Diesel, 87#1, 87#2, 91, and 89 tank shut-off valves (flapper) - All activate at greater than 95% capacity. CORRECTIVE ACTION: Correct all overfill prevention equipment so as to shut-off flow to the tank when the tank is filled to no more than 95% capacity. Provide test results to this agency within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-30-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine monitoring certification inspection. Met with Jose Rodriguez, service technician with California Maintenance & Environmental. The following certifications were verified: ICC, VR, VMI. Also met with Jonathan Rivera, manager at the site. The facility has five double-walled USTs: 12K Diesel, 12K 87 #1, 12K 87 #2, 12K 91, and 12K 89. Overfill prevention is provided by a flapper valve in the drop tube of each tank. The UST system is monitored using a Gilbarco EMC panel. The tanks are monitored as follows: Dry Annulars: VR-420 STP Sumps/Fill Sumps/TLM Sumps: VR-208 Mechanical line leak detectors: FE PETRO STP-MLD All sensors were tested hydrostatically and passed. Fail safe and sensor-out were demonstrated operational. Spill buckets were tested hydrostatically for 1 hour and passed. The following documents were reviewed: -Permit -Monitoring Plan, Response Plan -DO Monthly Reports, DO Training -Last Monitoring Cert Date: [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, spill bucket testing, and overfill. The facility has five (5) 12,000 gallon Joor double-walled tanks monitored by a Veeder Root TLS-350 system. The monitor is operation for audible and visual alarms. Panel display reads "All functions normal." Turbine sumps, fill sumps, and UDC's have 208 senors. Tank annulars have 420 sensors. Product piping is double-walled and pressurized and all have Petro STP-MLD line leak detectors. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Flapper valves are used for overfill prevention. A ball float was noted during the inspection below each of the flappers and were removed. The CERS information will need to be updated within 30 days. The line leak detector and spill buckets were not witnesses by this Agency. Testing was conducted by Jose Rodriguez of California Maintenance & Environmental. Tester [Truncated]

Eval Notes: On site for annual underground storage tank inspection - to inspect tank sumps, dispenser containment (UDC) sumps, sensor placement, and review required documentation during the monitoring system certification, leak detector and spill bucket testing. Testing is being performed prior to the annual test due date of January 2018 due to completion of construction (SR0130288) to replace UDCs and remove Healy tank. New Bravo fiberglass single-wall UDCs were replaced for all 9 dispensers, the Healy tank was removed and Veeder Root Carbon Canister installed, installation of vent transition box, replacement of FE Petro 1.5 HP turbines for all 5 USTs with FE Petro 2.0 HP turbines, and replacing the VMI LD2000 MLLDs with FE Petro STP MLLDs. Agreed this date would begin the new annual testing cycle. Met with Miguel Gomez and Dave Tungate, both with contractor Petro Builders. Testing of monitoring equipment was performed by Patrick McMurphy with California Maintenance & [Truncated]

Violations:

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 05/14/2021. OBSERVATION: Your site map must be submitted with the following elements: loading area and emergency shut-offs (electrical, gas, and water). Additionally, move all of your site maps from the Emergency Response & Training Plans section to the Site Map section. CORRECTIVE ACTION: Please make these changes to your site map and upload it to the California Environmental Reporting System (CERS) within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes:	Returned to compliance on 05/21/2021. OBSERVATION: The secondary containment (interstitial space) of the 8,000 gallon split tank containing gasoline & diesel is not being inspected monthly per the SPCC plan. CORRECTIVE ACTION: Please identify a method to check the interstitial space of the 8,000 gallon fuel tank and document it in your monthly inspection log. Perform the monthly inspection and provide a copy of the monthly inspection log to this agency for review within 30 days.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,

Site ID:	397468
Site Name:	Mesa Water District
Violation Date:	04-22-2021
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/14/2021. OBSERVATION: Please remove N.O.S. from your inventory as it was not observed above the reporting threshold. For Bleach, remove the State Waste Code and the Annual Waste Amount - add the Storage Pressure and Storage Temperature. For Engine Oil, remove the Annual Waste Amount - leave blank - and increase the Maximum Daily Amount = 330. For Lead Acid Batteries, remove the State Waste Code - leave blank. CORRECTIVE ACTION: Please

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Kaying Lee, compliance supervisor, and Jessica Penhall, BSI consultant. Facility is a small quantity generator of used oil, coolant, and oily debris wastes. Walked the facility, perimeter, and inspected the hazardous waste storage area. Containers were closed and properly labeled. Inspected the municipal trash for hazardous waste. No hazardous waste was observed in the dumpster. The following documents were reviewed: - Manifests - Employee training records - Weekly inspection logs - Emergency response plan Maintain copies of your hazardous waste manifests on site for review for 3 years. Hazardous waste(s) must be labeled with the following information: 1. The word "Hazardous Waste" 2. Generator Name and Address 3. Accumulation Start Date 4. Physical State/Hazardous Properties 5. Chemical Contents Emailed a copy of this report to KaylingL@mesawater.org and JessicaP@mesawater.org.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine Hazardous Materials Business Plan (HMBP). Tony Huerta, store manager, provided permission to inspect. Observed the following materials on site at reportable quantities: - Used Motor Oil (220 gallons) - Used Absorbent Containing Oil (550 pounds) Hazardous Materials disclosed in CERS match what is reported on site. Per California Health & Safety Code Ch. 6.95, businesses that store and handle hazardous materials at or over reportable quantities (55 gal of a liquid, 500 lbs of a solid, 200 cubic ft of a compressed gas) must prepare and implement an HMBP. The facility is responsible for identifying all hazardous materials, including hazardous wastes, which are at or above disclosure thresholds. If there is a change in the type of amount of chemicals that are maintained on site, please submit revised documents (electronically though CERS) within 30 days of

KRAGEN #725 (Continued) **S103636171**

change. The HMBP must be submitted online through the California Environmental Reporting [Truncated]

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Tony Huerta, store manager , provided permission to inspect. The facility has one 220 gallon container for used oil, and a 55 gallon drum for used oil filters. The facility is a used oil and used filter collection site. A perimeter walk was conducted. Municipal dumpster does not appear to contain any hazardous waste. Manifests from Safety Kleen were available and reviewed. Emergency response information is posted and employees are reported to be trained. No hazardous waste violations were observed on this date. Inspection report mailed to facility and emailed to environmental contact regulatory@verisk3e.com

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110070930693

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 05/18/2020. OBSERVATION: Please change the phone number(s) listed on your emergency response plan for the following: Local Unified Program Agency (CUPA) = 714-433-6406. CORRECTIVE ACTION: Please make these changes to your emergency response plan and upload it to the California Environmental Reporting System (CERS) within 30 days.

Violation Date: 03-23-2021
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 03/23/2021. The 87 spill bucket failed during testing. Spill bucket was repaired during the inspection, re-tested, and passed. No further action required.

Eval Notes: On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Inspection was conducted with Kevin Kragen of G&M. The facility has 4 double-walled tanks (diesel, E85, 87, and 91) with pressurized piping. The UST system is monitored by an EMC system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The sensors in the tank annulars (301 for E85 and 87; 302 for 91; 303 for diesel) and piping sumps (323 for E85; 208 for diesel, 87 and 91)) were tested and passed when submerged in fluid. Line leak detectors were tested and operational. UDC sensors (323 for E85 pumps 3, 4, 5, 6, 11, and 12; 208 for pumps 1, 2, 7, 8, 9, 10) were tested and passed passed. Spill bucket testing produced passing results Testing was conducted by Enrique Aguirre of Tank Tek. Technician certifications (ICC/ VR) were verified. Please submit the test reports to this agency within [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has four double-walled tanks (87, 89, 91, D) monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with electronic line leak detectors. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by Robert Slunaker with Tank-Tek. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment(SB989) testing was last conducted on 5/4/20. Overfill Prevention Inspection was last conducted on flappers on 3/23/21, and ball floats on 4,14,21. Overfill and SB989 must be tested every 3 years.

Eval Notes: Received an email: explained that only one violation was given for failed Secondary components. Good morning Jennifer, Thank you for your voicemail. I called you regarding 3 of our sites, listed below. It looks like we were given a violation on top of a violation within a months time frame. We submitted for applications before the re-inspection date, therefore, I do not know why we are receiving another violation. We are trying to comply as quickly as possible and these re-inspection violations makes us look as if we are not. #43 1740 Newport Blvd., Costa Mesa #28 19492 Goldenwest St., Huntington Beach #70 19472 Beach Blvd., Huntington Beach

Eval Notes: This Agency received a monitoring system certification dated 3/19/2013 for a Gilbarco EMC monitoring system. The following equipment was certified to have been inspected/serviced in accordance with manufacturer's guidelines and was operational per manufacturer's specifications: in tank gauging probes; annular space sensors; piping sump sensors; fill sump sensors; mechanical line leak detectors; tank overfill probes; dispenser containment sensors: and, shear valves. Positive shut-down due to leaks and sensor failure/disconnection was confirmed. A comment was, removed apx 12 oz. of liquid from diesel fill sump. Also included were the following: -plot plan of facility showing location of tanks, piping and monitoring equipment; -spill bucket testing report form dated 3/19/2013 with all results of testing PASS; -print out of set up and alarm history.

Eval Notes: Mark Sutphin at site to inspect UST facility modification SR0124998 .
I inspected the site with Kevin Kragen of G & M Oil. The facility converted the former diesel tank to E-85, the Supreme tank to diesel, the plus tank to supreme and the regular unleaded remained the same. New penetrations were installed in the E-85 tank sump and the three UDCs for E-85 dispensers. Veederoot 323 sensors were installed in the E-85 sumps and the three E -85 UDCs. The modifications were inspected and were correct per plan Check SR0124998. SB989 testing of sumps and UDCs was performed and passed on 8-14-15. Plan check can be closed

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

THE HARTLEY CO (Continued) **1000414755**

dairy waste ponds.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 07-03-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Emailed Bill for the amount of reclamation of both Oil and methanol for the reporting year 2012 and 2013.
Eval Division: Orange County Environmental Health
Eval Program: HWRecycler
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-13-2004
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On July 13, 2004, Regional Water Board staff conducted a routine inspection at the above mentioned site. No contact was made. The facility was closed for the day. Upon inspection of the facility the following observations were made. The facility comprises of a parking lot with a small hazardous waste storage area in the back. It appears that all processes are conducted inside. No major violations were noted at this time.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-27-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine non-RCRA SQG hazardous waste inspection. Michael Quinley, the Vice President, was present for the inspection. The following hazardous waste streams were observed: Used Tramos Economics Cleaner - 55 gallon drum Used oil - two 55 gallon drums Excluded Recyclable Material used oil - two 55 gallon drums, 400 gallon

THE HARTLEY CO (Continued) **1000414755**

clarifier tank Solvent ink waste - 55 gallon drum Gel ink waste - 55 gallon drum Waste Bio T-Max - 55 gallon drum Operator stated that no hazardous waste releases have occurred and that hazardous waste storage area inspections are conducted at least on a weekly basis. Walked the interior and exterior of the facility to inspect the hazardous waste storage area and trash dumpster. Hazardous wastes are stored in containers that are in good condition, closed, and properly labeled. No hazardous waste was observed in the dumpster. Hazardous Waste Emergency Response information was posted. Employees are reported [Truncated]

Eval Division: Orange County Environmental Health

Eval General Type: Other/Unknown
Eval Date: 06-22-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: received Recyclable Materials report form for 7-1-13 to 6-30-15 2677 Kg of machine oil was recycled at site ..

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct an annual routine Hazardous Waste Inspection. Met with Bill who explained the process, escorted me through the site and gave consent to enter/inspect. Hazardous waste containers are properly labeled. Machine oil is recovered from machined metal cuttings (brass) it is recycled and reused on site. Cuttings are drained in a pan (keep oil pan free of any oil unless actively recyding), after drained the cuttings are centrifuged. Both oil from drainage and centrifuge is put into a tank that is a 4 stage clarifier. Tank is labeled Excluded Recyclable material Less than 100 kg per month of oil has been recycled and re-used on site for the last two years; therefore, no recyclable materials report.Please maintain a log of the date and quantity of oil recycled on site for re-use on site. Exteriors of the cartridges are cleaned in Methanol. Spent methanol is recycled on site in a still, recovered solvent is re-sued on site. Please maintain a log of the date [Truncated]

Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr.

THE HARTLEY CO (Continued) **1000414755**

Davis stated that the water had been turn off and the leak would be fixed later in the day.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/07/2021. Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days: Used Tramos Economics Cleaner - 55 gallon drum Used oil - two 55 gallon drums Solvent ink waste - 55 gallon drum Gel ink waste - 55 gallon drum Waste Bio T-Max - 55 gallon drum CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit. Provide documentation that the violation has been corrected to the Agency by email or mail within 30 days.

Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr. Davis stated that the water had been turn off and the leak would be fixed later in the day.

Eval Notes: On site to conduct a routine recycling inspection. The site meets Exclusion HSC 25143.2(d)(1) for used machine oil. Michael Quinley, the Vice President, was present for the inspection. Machine oil is used to manufacture brass pen tips. The process causes the machine oil to accumulate waste brass scrap metal. The operator removes the machine oil from the process when saturated with brass shavings. The machine oil is placed into a 4 stage clarifier (located in the underground parking area). The tank is labeled Excluded Recyclable Material (ERM). The facility recycles less than 100 KG/month (approximately 22 gallons) of oil and therefore, no recyclable materials report was generated. The reclaimed machine oil is then put back into the manufacturing process on-site. Further, machine oil is reclaimed from the remaining brass shavings with the use of gravity filtering and is placed back into the manufacturing process on-site. Please maintain a log of the date and of oil [Truncated]

6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 09/29/2021. The business did not provide one or more of the following: initial employee training, adequate employee training, annual employee training and/or maintain records of employee training. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Provide proof of compliance (Employee training sign in sheet) to this Agency by email or mail within 30 days. Maintain records of training available for 3 years.

THE HARTLEY CO (Continued) **1000414755**

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 10/07/2021. Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days: Used Tramos Economics Cleaner - 55 gallon drum Used oil - two 55 gallon drums Solvent ink waste - 55 gallon drum Gel ink waste - 55 gallon drum Waste Bio T-Max - 55 gallon drum CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit. Provide documentation that the violation has been corrected to the Agency by email or mail within 30 days.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The company manufactures pen inks and parts. Review of the 00-01AR shows low pH and high TSS. The SWPPP could not be located during the inspection. Their consultant was contacted and said he would e-mail the plan in the same day. Staff discussed with the contact of the requirement to have a copy of the plan at the facility for use by their personnel and review by Board staff during inspections. Staff also asked that the plan be reviewed at least once a year. There was only five drums of chemical stored outside. All of them were inside contained area. A new water cooling container was just installed earlier in the day and it was leaking water to the storm swales. Mr. Davis stated that the water had been turn off and the leak would be fixed later in the day.

Eval Notes: On site to conduct a routine recycling inspection. The site meets Exclusion HSC 25143.2(d)(1) for used machine oil. Michael Quinley, the Vice President, was present for the inspection. Machine oil is used to manufacture brass pen tips. The process causes the machine oil to accumulate waste brass scrap metal. The operator removes the machine oil from the process when saturated with brass shavings. The machine oil is placed into a 4 stage clarifier (located in the underground parking area). The tank is labeled Excluded Recyclable Material (ERM). The facility recycles less than 100 KG/month (approximately 22 gallons) of oil and therefore, no recyclable materials report was generated. The reclaimed machine oil is then put back into the manufacturing process on-site. Further, machine oil is reclaimed from the remaining brass shavings with the use of gravity filtering and is placed back into the manufacturing process on-site. Please maintain a log of the date and of oil [Truncated]

Site History:	The current site building (1726 Superior Avenue) was constructed in at least 1947 and was occupied by a roller skating rink until 1982, when the building was converted to a Liquor Barn. In 1992, it was converted to Tower Records. Tower Records occupied the building, which is currently vacant, until 2006. Belond Muffler occupied a building (1740 Superior Avenue) in the northeast portion of the property from 1961 until at least 1971, when the building was occupied by Steam Master Carpet Cleaners. Some time prior to 1981 the building was occupied by Ralph s Discount Furniture. The 1740 Superior Avenue building was demolished by 1990. a Phase I Environmental Site Assessment (ESA 2; BV, 2007b); a limited subsurface investigation (BV, 2007a); a subsurface investigation (ATC, 2008); pilot testing (ATC, 2009b); and, groundwater monitoring and sampling (ATC, 2009a).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA Enviroscreen 4 Score: 80-85%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: The primary chemical contaminant at the site is TCE; however, other compounds were detected at concentrations of concern, including: cis1,2-dichloroethylene (DCE), 1,1-DCE, vinyl chloride, tetrachloroethylene (PCE), 1,2-dichloroethane (DCA), methyl tertiary butyl ether (MtBE) and benzene. Depth-discrete groundwater sampling indicated the likelihood that a region of dense non-aqueous phase liquid (DNAPL) was present at the base of the shallow water-bearing zone beneath a portion of the west side of the site. This conclusion was based on the large vertical concentration gradient and the maximum concentration of trichloroethylene (TCE) of 71,000 micrograms per liter (g/l) at CPT10. The lateral extent of the expected DNAPL was estimated based on the VOC concentrations greater than 10,000 g/l in groundwater samples from the lower portion of the shallow water-bearing zone that lies above the fine-grained Monterey Formation. Groundwater in the western portion of the site was remediated using in-situ chemical oxidation. Concentrations of chemicals of concern in soil vapor were present across the site and are being mitigated during development using engineered controls, including geotextiles, passive venting systems and other land use constraints.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

GRISWOLD INDUSTRIES (Continued) **1000390483**

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

COSTA MESA DISPOSAL (Continued) **1000594824**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	03-15-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 07/29/2019. Please submit a plan check for the failed direct-bury spill bucket to this Agency within 30 days.

Eval Notes: Contact was unable to produce a SWPPP; produced a "rough draft" SWPPP instead. Found two large batteries against the rear-central wall of site. One battery was damaged and leaking. Found a closed 5-gal bucket out in the open along south fence with small pool of oil on the lid. Found another bucket out in the open in a household 'recycling' bin; both the bucket and the bin had no lids and the bucket contained an oil filter and a small quantity of oil and other domestic waste. Found a hobby car stored covered on site with a spill of an unidentifiable material beneath it. Found animal waste scattered in the bin storage

COSTA MESA DISPOSAL (Continued) **1000594824**

area belonging to a small dog living in an RV parked on site. Storage area for the site's fleet trucks had extensive oil staining on the ground indicative of chronic leaks; 'rough draft' SWPPP alleges that "absorbents, drip pans, and spill kits [are] on hand' but evidently not in use. Site is otherwise neat and orderly. Site has three drop inlets: one within the diked vehicle maintenance area (contains an apparent sump pump); one within the diked fueling/vehicle washing area (with a metal fixture inside surrounding the outlet pipe); and one in the ribbon gutter leading to the street (plugged with dirt). SWPPP only identifies 2, stating that they drain to "sanitation". All drainage areas would allow rainwater to enter the inlets. Contact was unaware of the drainage design of the site and unable to explain.

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Contact was unable to produce a SWPPP; produced a "rough draft" SWPPP instead. Found two large batteries against the rear-central wall of site. One battery was damaged and leaking. Found a closed 5-gal bucket out in the open along south fence with small pool of oil on the lid. Found another bucket out in the open in a household 'recycling' bin; both the bucket and the bin had no lids and the bucket contained an oil filter and a small quantity of oil and other domestic waste. Found a hobby car stored covered on site with a spill of an unidentifiable material beneath it. Found animal waste scattered in the bin storage area belonging to a small dog living in an RV parked on site. Storage area for the site's fleet trucks had extensive oil staining on the ground indicative of chronic leaks; 'rough draft' SWPPP alleges that "absorbents, drip pans, and spill kits [are] on hand' but evidently not in use. Site is otherwise neat and orderly. Site has three drop inlets: one within the diked vehicle maintenance area (contains an apparent sump pump); one within the diked fueling/vehicle washing area (with a metal fixture inside surrounding the outlet pipe); and one in the ribbon gutter leading to the street (plugged with dirt). SWPPP only identifies 2, stating that they drain to "sanitation". All drainage areas would allow rainwater to enter the inlets. Contact was unaware of the drainage design of the site and unable to explain.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine UST inspection, monitoring system certification, spill bucket testing, overfill protection testing, and SB989. Met this date with Steve Rittenhouse with United Waste System. The facility has one (1) 10,000-gallons double-walled diesel tank with pressurized piping. The UST system is monitored by a VR TLS-300C system. The monitor is operational for audible and visual alarms. The Veeder Root panel display reads "all functions normal." Tank annular has a VR420, turbine a VR208, a direct bury spill bucket, the UDC has a chain float, and the product piping is double-walled and pressurized and has a VMI LD2000. Sensors were observed at the lowest point. Sensor out and fail-safe were verified and passed. All sensors tested and verified to be operational. Positive shutdown and fail-safe programming were verified. Overfill prevention is provided by a flapper valve. Spill bucket was hydrostatically tested and did NOT PASS. Testing was conducted by John [Truncated]

Eval Notes: On site for routine UST inspection, monitoring system certification, and spill bucket testing. Met with Richard Hernandez. The facility has one double-walled Diesel tank monitored by a Veeder Root TLS-350R system. The site has double-walled pressurized piping with a mechanical line leak detector. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. Testing was conducted by John Reilly with R & A Tank Technologies. Tester certifications (VR, ICC, VMI) were verified. Please submit the test reports to this Agency within 30 days. Secondary containment(SB989) testing was also being conducted today. Overfill Prevention Inspection was last conducted on 9/16/21. Overfill and SB989 must be tested every 3 years.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Year: 2011
Gepaid: CAD981391386
TSD EPA ID: CAD008364432
CA Waste Code: 343 - Unspecified organic liquid mixture
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.1836

Year: 2011
Gepaid: CAD981391386
TSD EPA ID: CAD008364432
CA Waste Code: 741 - Liquids with halogenated organic compounds >= 1,000 Mg./L
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.2919

Year: 2011
Gepaid: CAD981391386
TSD EPA ID: CAD008364432
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.019

PRECISION OPTICAL (Continued) **1000172323**

Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	221 - Waste oil and mixed oil
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	4.2636
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	351 - Organic solids with halogens
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.35
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	792 - Liquids with pH <= 2 with metals
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.10425
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.005
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.288
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.125
Year:	2011
Gepaid:	CAD981391386
TSD EPA ID:	CAD008364432
CA Waste Code:	212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.2475

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 02/08/1991
Comments: PA report was reviewed by Region 4 staff. The site is now a condominium development located at the end of 19th Street in the NW corner of Newport Beach, Orange County. The condos were constructed under RWQCB oversight in 1972. The area overwhich the condos were constructed was formerly Newport City Dump #1, a Class II landfill.

Completed Document Type:	Site Screening
Completed Date:	04/25/1995
Comments:	RWQCB INVESTIGATING THE HUGHES SITE FOR PCE AND TCE CONTAMINATION IN GROUNDWATER. 12/06/94 FILE INDICATES ORANGE CO HEALTH CARE AGENCY (OCHCA) ISSUED THE PERMIT TO OPERATE USTS. IN 1991 OCHCA REQUESTED AN INVESTIGATION OF A POSSIBLE UNDERGROUND FUEL STORAGE TANK THAT HAD BEEN REMOVED FROM THE SITE. OCHCA CONDUCTED A REMEDIAL INVESTIGATION

NEWPORT BEACH CORPORATE YARD (Continued) **S108241203**

THAT INCLUDED SUBSURFACE SAMPLING AT THE FORMER TANK AREA. SITE IS LOCATED ADJACENT TO HUGHES AIRCRAFT CO. HUGHES IS CURRENTLY UNDER INVESTIGATION BY RWQCB. NFA FOR DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/29/1992
Comments: The Preliminary Assessment report was screened by R-4 staff. There are problems in the area of methane gas escaping when- ever excavation is done. The RWQCB is investigating the Hughes site for PCE and TCE contamination in groundwater. Staff recommends low priority PEA.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

RAYTHEON COMPANY (Continued) **1000240988**

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Site History:	From the 1950 s until Raytheon discontinued operations in 2000, the 14-acre site was used for the development, manufacture, and assembly of electronic components. These operations included the use of solvents that contained volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and trichloroethylene (TCE). Comprehensive environmental investigations and interim cleanup actions have been

RAYTHEON COMPANY (Continued) **1000240988**

conducted at the site. VOCs have been detected in soil, soil gas, and groundwater.). The source of VOCs was from the historic storage and use of solvents in an area of the site located east of a former building that was located at 530 Superior Avenue. This building has been demolished and has been replaced with an open-air parking garage. The VOCs have not impacted drinking water supplies because the City of Newport Beach does not use the groundwater underlying the site as a source of drinking water. The City s drinking water is obtained from groundwater production wells located several miles inland from the site and from imported water supplies. Site-specific risk assessments conducted for Raytheon assert that the concentrations of VOCs detected in the soil vapor do not pose a significant potential risk to human health or the environment. SOIL An off-site soil vapor investigation was conducted in the residential area east of Newport Blvd. in 2003. A comprehensive soil vapor investigation was conducted in 2004 by installing soil vapor monitoring probes on-site and at various locations in residential/commercial area south of Dana Road and west of Newport Blvd. Samples from shallow soil vapor probes were collected and analyzed from May 2004 through January 2009. VOCs were found in soil vapor (the air and gases found underground between soil particles) at on-site and off-site locations. After each soil vapor sampling event, Raytheon had risk assessments performed to determine the potential risks to human health associated with VOCs in the soil. The initial results of the soil gas assessments indicated that some VOC concentrations in the soil gas exceeded the California Human Health Screening Levels (CHHSLs). The CHHSLs are concentrations of hazardous materials in groundwater, soil, or soil gas that the California Environmental Protection Agency considers to be below thresholds of concern for risks to human health. The presence of a chemical at concentrations in excess of a CHHSL does not indicate that adverse impacts to human health are occurring or will occur, but suggests further evaluation of potential health concerns is warranted. Raytheon conducted a further evaluation that utilized site specific conditions instead of the generic default assumptions used in the CHSSLs. When these site-specific conditions were factored into the evaluation of potential health risks, the estimated cancer risk from the potential exposure from vapor intrusion in the on-site and nearby off-site buildings ranged from between the 10-6 (one-in-a-million) and 10-5 (ten-in-a-million) to below the 10-6 residential cancer risk management level. To ensure continued protection of human health, Raytheon installed and operated a soil vapor extraction (SVE) cleanup system and has conducted additional soil vapor monitoring. The SVE system worked by extracting (using vacuum pressure) impacted vapor from the subsurface, transporting the vapor via underground piping to an on-site treatment system, and then removing the VOCs from the vapor. The SVE system included extraction wells along the southern site boundary to prevent the potential migration of vapors away from the site. Additionally, extraction wells were located on-site in areas where elevated concentrations of VOCs were detected in soil vapor. The SVE system operated from October 2005 to September 2007. A site-specific risk assessment was performed after the SVE system was shut-down. The risk assessment concluded that the concentration of VOCs in the soil vapor in the off-site residential areas did not exceed the residential risk management levels and the soil vapor in the on-site areas did not exceed the commercial risk management levels. Additional post-remediation soil vapor sampling is scheduled

RAYTHEON COMPANY (Continued) **1000240988**

to occur in 2009 to confirm the continued protection of human health and the environment. Soil vapor intrusion and indoor air monitoring studies were conducted in the existing on-site buildings as part of the redevelopment of the site into medical offices. The intended medical use of the facility required the application of the more stringent residential/sensitive use risk management levels. The Newport Healthcare Center has implemented indoor air monitoring and installed a sub-slab vapor recovery/venting system on building 510 to minimize the potential for soil vapor intrusion into the planned medical office buildings and to maintain potential risk associated with vapor intrusion below the 10-6 residential/sensitive use risk level. GROUNDWATER A comprehensive groundwater assessment was conducted on- and off-site. Groundwater beneath and around the site is highly brackish and saline, and contains naturally occurring petroleum and methane. This groundwater is not suitable for consumption, and is not used for drinking water. Raytheon has installed 91 groundwater monitoring wells to monitor groundwater conditions in the site vicinity. Groundwater beneath the site flows in a south-southeasterly direction, roughly following Newport Boulevard toward Newport Bay. Elevated concentrations of PCE and TCE from the site have been detected in groundwater beneath the site, and extending several hundred feet downgradient (south-southeast) of the site. Environmental assessments have revealed that PCE and TCE detected in this area are naturally degrading into breakdown compounds. Elevated concentrations of vinyl chloride, a breakdown compound of PCE and TCE, have been detected approximately 1000 feet downgradient from the site. Very low concentrations of 1,2-dichloroethleye, another breakdown product of PCE and TCE, have been detected in the downgradient groundwater monitoring well on the south side of Pacific Coast Hwy. These low concentrations are below regulatory guidelines for human health and aquatic life, which indicates that a significant impact to Newport Bay is unlikely. In addition, low concentrations of benzene in the groundwater monitoring well indicate the underlying groundwater has been impacted by releases from nearby underground fuel tanks not associated with the former Raytheon site. On the east side of Newport Blvd, the results of the groundwater monitoring indicate that there are other potential sources of VOCs to the groundwater not associated with the former Raytheon site. Final Remedial Actions for Groundwater Enhanced in-situ (in-place) bioremediation has been selected as the groundwater cleanup method for the site. In-situ bioremediation has successfully been performed at the site during pilot testing and as part of limited interim groundwater cleanup activities. The interim groundwater cleanup was performed to initiate VOC destruction while the long-term final cleanup measures are being developed. In-situ bioremediation involves the injection of a mixture of dilute food-grade vegetable oil and lactate into groundwater. The vegetable oil/lactate mixture serves as a nutrient source for naturally occurring bacteria that destroy the chlorinated VOCs. The breakdown process generates a series of intermediate daughter breakdown products, including vinyl chloride, and ultimately, harmless end products. The goal of in-situ bioremediation is to feed the microbes to accelerate the rate of natural VOC degradation that is already occurring in groundwater at the site. To further enhance the VOC cleanup process, non-pathogenic, naturally-occuring bacteria are also added with the vegetable oil. These naturally-occurring bacteria have been used at several other sites in California for groundwater

RAYTHEON COMPANY (Continued) **1000240988**

cleanup purposes. The bacterial population wanes once the vegetable oil is completely used up as a food sources. The groundwater cleanup includes the injection of water mixed with food-grade vegetable oil, sodium lactate and natural, non-pathogenic bacteria (this mixture is often referred to as amended water) into on-site groundwater and into off-site groundwater along Hospital Road, east of Newport Boulevard. UPCOMING/ONGOING ACTIVITIES Raytheon currently is performing regularly scheduled soil vapor and groundwater monitoring at the site. Raytheon intends to continue on-site enhanced bioremediation groundwater injections.

RWQCB Region:	SANTA ANA RWQCB (REGION 8)
Site History:	From the 1950 s until Raytheon discontinued operations in 2000, the 14-acre site was used for the development, manufacture, and assembly of electronic components. These operations included the use of solvents that contained volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE) and trichloroethylene (TCE). Comprehensive environmental investigations and interim cleanup actions have been conducted at the site. VOCs have been detected in soil, soil gas, and groundwater. The source of VOCs was from the historic storage and use of solvents in an area of the site located east of a former building that was located at 530 Superior Avenue (Figure 1). This building has been demolished and has been replaced with an open-air parking garage. The VOCs have not impacted drinking water supplies because the City of Newport Beach does not use the groundwater underlying the site as a source of drinking water. The City s drinking water is obtained from groundwater production wells located several miles inland from the site and from imported water supplies. Site-specific risk assessments conducted for Raytheon conclude that the concentrations of VOCs detected in the soil vapor do not pose a significant potential risk to human health or the environment. Raytheon and the Water Board have agreed to perform additional

HUGHES AIRCRAFT COMPANY (Continued) **U003433369**

remedial actions to ensure continued protection of human health and the environment. An off-site soil vapor investigation was conducted in the residential area east of Newport Blvd. in 2003. A comprehensive soil vapor investigation was conducted in 2004 by installing soil vapor monitoring probes on-site and at various locations in residential/commercial area south of Dana Road and west of Newport Blvd. Samples from shallow soil vapor probes were collected and analyzed from May 2004 through January 2009. VOCs were found in soil vapor (the air and gases found underground between soil particles)at on-site and off-site locations. After each soil vapor sampling event, Raytheon had risk assessments performed to determine the potential risks to human health associated with VOCs in the soil. The initial results of the soil gas assessments indicated that some VOC concentrations in the soil gas exceeded the California Human Health Screening Levels (CHHSLs). The CHHSLs are concentrations of hazardous materials in groundwater, soil, or soil gas that the California Environmental Protection Agency considers to be below thresholds of concern for risks to human health. The presence of a chemical at concentrations in excess of a CHHSL does not indicate that adverse impacts to human health are occurring or will occur, but suggests further evaluation of potential health concerns is warranted. Raytheon conducted a further evaluation that utilized site specific conditions instead of the generic default assumptions used in the CHSSLs. When these site specific conditions were factored into the evaluation of potential health risks, the estimated cancer risk from the potential exposure from vapor intrusion in the onsite and nearby off-site buildings ranged from between the 10-6 (one-in-a-million) and 10-5 (ten-in-a-million) to below the 10-6 residential cancer risk management level. To ensure continued protection of human health, Raytheon installed and operated a soil vapor extraction (SVE) cleanup system and has conducted additional soil vapor monitoring. The SVE system worked by extracting (using vacuum) impacted vapor from the subsurface, transporting the vapor via underground piping to an on-site treatment system, and then removing the VOCs from the vapor. The SVE system included extraction wells along the southern site boundary to prevent the potential migration of vapors away from the site. Additionally, extraction wells were located on-site in areas where elevated concentrations of VOCs were detected in soil vapor.The SVE system operated from October 2005 to September 2007. A site-specific risk assessment was performed after the SVE system was shut-down. The risk assessment concluded that the concentration of VOCs in the soil vapor in the off-site residential areas did not exceed the residential risk management levels and the soil vapor in the on-site areas did not exceed the commercial risk management levels. Additional post-remediation soil vapor sampling is scheduled to occur in 2009 to confirm the continued protection of human health and the environment. Soil vapor intrusion and indoor air monitoring studies were conducted in the existing on-site buildings as part of the redevelopment of the site into medical offices. The intended medical use of the facility required the application of the more stringent residential/sensitive use risk management levels. The Newport Healthcare Center has implemented indoor air monitoring and installed a sub-slab vapor recovery/venting system on building 510 to minimize the potential for soil vapor intrusion into the planned medical office buildings and to maintain potential risk associated with vapor intrusion below the 10-6 residential/sensitive use risk level. A comprehensive groundwater

HUGHES AIRCRAFT COMPANY (Continued) **U003433369**

assessment was conducted on- and off-site. Groundwater beneath and around the site is highly brackish and saline, and contains naturally occurring petroleum and methane. This groundwater is not suitable for consumption, and is not used for drinking water. Raytheon has installed 91 groundwater monitoring wells to monitor groundwater conditions in the site vicinity. Groundwater beneath the site flows in a southsoutheasterly direction, roughly following Newport Boulevard toward Newport Bay. Elevated concentrations of PCE and TCE from the site have been detected in groundwater beneath the site, and extending several hundred feet downgradient (south-southeast) of the site. Environmental assessments have revealed that PCE and TCE detected in this area are naturally degrading into breakdown compounds. Elevated concentrations of vinyl chloride, a breakdown compound of PCE and TCE, have been detected approximately 1000 feet downgradient from the site. Very low concentrations of 1,2-dichloroethleye, another breakdown product of PCE and TCE, have been detected in the downgradient groundwater monitoring well on the south side of Pacific Coast Hwy. These low concentrations are below regulatory guidelines for human health and aquatic life, which indicates that a significant impact to Newport Bay is unlikely. In addition, low concentrations of benzene in the groundwater monitoring well indicate the underlying groundwater has been impacted by releases from nearby underground fuel tanks not associated with the former Raytheon site. On the east side of Newport Blvd, the results of the groundwater monitoring indicate that there are other potential sources of VOCs to the groundwater not associated with the former Raytheon site. Final Remedial Actions for Groundwater Enhanced in-situ (in-place) bioremediation has been selected as the groundwater cleanup method for the site. In-situ bioremediation has successfully been performed at the site during pilot testing and as part of limited interim groundwater cleanup activities. The interim groundwater cleanup was performed to initiate VOC destruction while the long-term final cleanup measures are being developed. In-situ bioremediation involves the injection of a mixture of dilute food-grade vegetable oil and lactate serves as a nutrient source for naturally occurring bacteria that destroy the chlorinated VOCs. The breakdown process generates a series of intermediate daughter breakdown products, including vinyl chloride, and ultimately, harmless end products. The goal of in-situ bioremediation is to feed the microbes to accelerate the rate of natural VOC degradation that is already occurring in groundwater at the site. To further enhance the VOC cleanup process, non-pathogenic, naturally-occurring bacteria are also added with the vegetable oil. These naturally-occurring bacteria have been used at several other sites in California for groundwater cleanup purposes. The bacterial population wanes once the vegetable oil is completely used up as a food sources. The groundwater cleanup will include injection of water mixed with food-grade vegetable oil, sodium lactate and natural, non-pathogenic bacteria (this mixture is often referred to as amended water) into on-site groundwater and into off-site groundwater along Hospital Road, east of Newport Boulevard. This activity will also require construction of injection wells and use of temporary tanks for storage and mixing of the amended water, along with hoses, pumps, meters, and equipment to deliver the amended water to the groundwater.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And

HIXSON METAL FINISHING CO (Continued) **1000384999**

F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
OSHA ESTABLISHMENT
RISK AND TECHNOLOGY REVIEW
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 122803
Site Name: HIXSON METAL FINISHING INC
Violation Date: 05-19-2020
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 10/01/2020. OBSERVATION: Owner/Operator failed to determine if the waste generated from the new metal processing/deburring machine is a hazardous waste. This process was introduced in October 2019. CORRECTIVE ACTION: Submit documentation to the CUPA within 60 days indicating you have determined that the waste in question is hazardous or not and how this determination was made. i.e. Generator knowledge, lab analysis, etc. If determined to be hazardous waste then you must manage it as such. Specify how it is being managed in response documentation.

Violation Source:	CERS,
Site ID:	122803
Site Name:	HIXSON METAL FINISHING INC
Violation Date:	01-21-2015
Citation:	22 CCR 12 66262.34(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(a)
Violation Description:	Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes:	Returned to compliance on 05/19/2015. Several containers of hazardous waste were observed in the Hazardous Waste Storage Area that had been stored onsite longer than the ninety day storage time period. Facilities who generate more than 1000 kg of hazardous waste per month may store waste on site up to 90 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste transporter to dispose of this waste under manifest and submit a copy of the manifest to the CUPA.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g.,

HIXSON METAL FINISHING CO (Continued) **1000384999**

coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 12/31/2015. Note that this facility was cited for this violation at the last routine inspection conducted 5/5/14.
Violation Division: Orange County Environmental Health
Violation Program: PBR
Violation Source: CERS,

Site ID: 122803
Site Name: HIXSON METAL FINISHING INC
Violation Date: 11-30-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/03/2021. Each container used to hold hazardous waste must be maintained in good condition. Waste q-tips and rags with MEK solution located in the Masking Department (Paint Area/Building 4) was observed being disposed of in waste baskets at each station. CORRECTIVE ACTION: Transfer the contents of waste baskets at each station to a compatible container in good condition and label the container with the required hazardous waste information. Additionally, provide training to the workers in the Masking Department on proper disposal of the hazardous waste. Submit documentation to the CUPA that the workers have been properly trained and hazardous waste containers available for use in the area.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 122803
Site Name: HIXSON METAL FINISHING INC
Violation Date: 01-27-2017
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/24/2017. Hazardous waste container in building 6 was observed to be open when not in use. Please ensure that all hazardous waste containers are closed when not in use within 60 days and notify this agency when complete.

HIXSON METAL FINISHING CO (Continued) **1000384999**

Site Name:	HIXSON METAL FINISHING INC
Violation Date:	11-13-2019
Citation:	19 CCR 4.5 2750.1 - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2750.1
Violation Description:	Failure to prepare a worst-case release scenario analysis as provided in Section 2750.3.
Violation Notes:	Returned to compliance on 11/29/2021. OBSERVATION: The owner/operator failed to prepare a worst-case release scenario analysis that complies with all requirements in Section 2750.3, specifically height of releas and temperature of substance/or highest temperature within the last 3 years. CORRECTIVE ACTION: Revise and resubmit a copy of the worst-case release scenario analysis to the CUPA and ensure that it complies with all requirements in Section 2750.3.

Violation Date:	01-21-2015
Citation:	22 CCR 15 66265.35 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.35
Violation Description:	Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes:	Returned to compliance on 05/19/2015. Aisle space was not adequate allowing access to containers of hazardous waste in the following areas: Hazardous Waste Storage Area and the Waste Treatment Area (totes near the filter cake roll-off bin) CORRECTIVE ACTION: Immediately provide adequate aisle space to allow movement to these containers in the event of an emergency and routine inspection.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 05/19/2015. Appropriate training topics for appropriate staff and a training log meeting the requirements listed above were not observed this date. For example, in the Masking Area, staff occasionally used MEK and acetone solvents to clean and prepare metal pieces. It was not clear to staff if cotton swabs used to apply

HIXSON METAL FINISHING CO (Continued) **1000384999**

	those solvents were required to be managed as hazardous waste and appropriate containers were not readily available. Training should be provided to give staff clear instructions regarding the proper segregation of hazardous waste and municipal trash.

Eval Notes: Onsite to conduct a routine hazardous waste inspection. This facility was inspected with James Hendron, Supervising Hazardous Waste Specialist. Bruce Greene provided access to the facility and provided consent to inspect and take photos as necessary. Employees that manage hazardous waste are given jobsite training. The followin are to be reviewed on a later date: - Hazardous waste manifests and/or bills of lading - Employee training records - SB 14 records On site for review were the following: -written operating instructions for treatment units. -written inspection schedule and log of inspections of tanks and containers. AN ONSITE RE-INSPECTION OF THIS FACILITY IS TO OCCUR WITHIN SIXTY (60) DAYS TO ENSURE COMPLIANCE.

Eval Notes: An on-site, follow-up inspection was conducted this date (5/19/15). The items noted below are in reference to an onsite inspection of your facility conducted on 1/21/15 and 5/5/14. Access to the facility and permission to take photographs was provided by Bruce Greene. OUTSTANDING VIOLATIONS 5/19/15 X015/I103 - The facility's hazardous waste treatment system tanks must be assessed and certified every five years. As of this date, the operator has contracted with AECOM to complete the assessment and at this point an initial site inspection has been conducted. CORRECTED VIOLATIONS 5/19/15 I306 - The operator has assessed the availability of cyanide alternatives used at this facility. The operator has determined that although alternatives exist, the transition to those alternatives is not viable considering the size of tanks needed and the limited space available at this facility. (See Waste Treatment Closure Plan Section 9.0 Cyanide Reduction - Staff at [Truncated]

Eval Notes: On site to conduct an audit of this CALARP program level 2 facility. Consent to enter, inspect and take photographs was given by Bruce Green, EHS. Also on-site was Jennifer Negro and Bob Held of OCHCA. Toured the facility and reviewed the program level 2 RMP and associated documents. The facility plating lines have been re-designed and the cyanide process and the cyanide/cadmium process are now separated into two isolated secondary containment systems, which in case of a complete failure would no longer have the possibility of mixing and reacting with low pH materials. Discussed the need to update the worst case and alternate case scenarios to show that there is no longer an off-site consequence and that the facility can be downgraded to a Program Level 1 facility. The 5-year RMP update is due in 2017. Please submit the following: 1. Updated CalARP registration and data points 2. Updated hazard assessment modeling showing no offsite [Truncated]

Eval Notes: On site for routine Hazardous Materials Business Plan (HMBP) inspection with Dean Freed of OC CUPA. Consent to enter, inspect and take any necessary photos was given by Bruce Greene, Environmental Health & Safety Manager. Per California Health & Safety Code Ch. 6.95, businesses that store and handle hazardous materials at or over reportable quantities (55 gal of a liquid, 500 lbs of a solid, 200 cubic ft of a compressed gas) must prepare and implement an HMBP. The facility is responsible for identifying all hazardous materials, including hazardous wastes, which are at or above disclosure thresholds. If there is a change in the type of amount of chemicals that are maintained on site, please submit revised documents (electronically though CERS) within 30 days of change. The HMBP must be submitted online through the California Environmental Reporting System (CERS) by March 1st of every year. Observed the facility and inspected hazardous materials storage. Eval Notes: Please be advised that this Agency has reviewed Tiered Permitting Financial Assurance Self Certification for this facility. The Estimated Closure Cost is not listed in Section II of the Certification Of Financial Assurance form (enclosed). The form must be completed and submitted to this Agency by 3/24/14. In addition, the salvage value of the assets has not been changed from the value reported in 2010. The salvage value of your assets must be reviewed on an annual basis to be sure that depreciation and changes made to your inventory of equipment are reflected in the salvage value estimate. If you believe that your salvage value has remained the same since 2010, be sure to maintain documentation reflecting your estimated salvage value.

Eval Notes: On site for a routine CalARP inspection. Met with EH&S manager Bruce Greene of Hixson Metal Finishing. Also present was Denamarie Baker of OCHCA. Consent to enter, inspect and take photographs was provided. Facility is regulated under Program level 1 requirements for Cadmium Oxide, Sodium Cyanide, and Potassium Cyanide. The facility has 3 regulated processes: Precious metal plating, general plating, and storage. The Program level 1 CalARP Risk Management Plan (RMP) was reviewed. The following were observed: -- The RMP Certification signature page was not present. See violation above. Per the RMP, the original RMP date was in 2007. The RMP 5-year certification date was due in 2017. -- The current RMP is set up as a Program Level 2 RMP. Please remove any unnecessary documentation to avoid any discrepancies or confusion. A program Level 1 RMP must have: an Executive Summary as detailed in 2745.3, one worst case scenario for each regulated process as detailed in [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste inspection with Dean Freed of OC CUPA. Consent to enter, inspect and take any necessary photos was given by Bruce Greene, Environmental Health & Safety Manager. The facility generates sufficient quantities of RCRA hazardous waste to be regulated as a large quantity generator (LQG). It is also regulated for treatment under the permit by rule (PBR) tier. Business ownership information was verified. Number of employees is approximately 115. Walked throughout the facility. Observed hazardous waste storage areas and the municipal trash dumpsters. The trash dumpsters does not appear to contain any hazardous waste. Hazardous waste (q-tips and rags with MEK) was observed in regular wastebaskets in the Masking Department. See Violation. Hazardous waste (waste paint) in the paint stripper area was observed with an open funnel. See Violation. The following documents were available for review: - Hazardous waste Emergency [Truncated]

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-30-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: warm and sunny. SWPPP dated 1/12/2012; not certified but signed immediately. Site is power washed once 6-9 months; reduced from 2 times/year. Asphalt paving has been replaced with concrete paving partly to improve housekeeping. No samples taken this season. Area between buildings 1 and 2 is neat and orderly except for back alley of building 2. Between buildings 2 and 3 is wastewater treatment area; has legacy staining on concrete in front of roll-up door to anodized line. Roof of building 2: green stains in front of exhausts still present, oil leak in chiller area is fixed. Between buildings 3 and 4: evidence of old spills found in front and back of secondary containment pallets; two pallets found with holes in bottoms; pallets contain varying levels of liquid - one found nearly full in spite of reported daily inspections; broken downspout threatens to drain into a pallet; reported similar problem from roof gutter. Found open trash bin; closed immediately. Pipes, parts, empty poly tank, and drums of potentially-contaminated soil found in outside alley of building 4; instructed Contact to sample runoff here due to industrial activity.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-10-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility is part of group monitoring. Sample is a composite from several discharge points serving different drainage areas. Told

HIXSON METAL FINISHING CO (Continued) **1000384999**

Contact that this was ineffective because it doesn't provide sufficient resolution to determine if BMPs are effective in each of the drainage areas. Area beneath and surrounding the roof-mounted chiller motors is stained with oil; observed bottles of make-up oil nearby indicative of a chronic problem. Although motors are protected by a fixed roof, drainage allows runoff to flow over the oil stains resulting in staining leading from the area. Observed a greenish stain on the roof from an exhaust vent. Stores chemicals in 55-gallon drums on containment pallets; has plans to install a fixed roof over this storage area. Planned roof is not reflected in SWPPP. Has a wastewater treatment area where the floor drain is part of a capture-use system for storm water. Has two open 55-gallon metal drums stored outside with small quantities of water inside; drums are heavily rusted, polluting the water inside. Stores various rusting metal parts outside shop area. Some implemented and planned BMPs are not reflected in the SWPPP; SWPPP needs to be better refined to reflect all BMPs.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-16-2000
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: SWPPP needed to be better developed to the site.- General Housekeeping is needed. - Facility had high readings from the 98-99 report.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-30-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation

HIXSON METAL FINISHING CO (Continued) **1000384999**

Eval Notes: Weather: warm and sunny. SWPPP dated 1/12/2012; not certified but signed immediately. Site is power washed once 6-9 months; reduced from 2 times/year. Asphalt paving has been replaced with concrete paving partly to improve housekeeping. No samples taken this season. Area between buildings 1 and 2 is neat and orderly except for back alley of building 2. Between buildings 2 and 3 is wastewater treatment area; has legacy staining on concrete in front of roll-up door to anodized line. Roof of building 2: green stains in front of exhausts still present, oil leak in chiller area is fixed. Between buildings 3 and 4: evidence of old spills found in front and back of secondary containment pallets; two pallets found with holes in bottoms; pallets contain varying levels of liquid - one found nearly full in spite of reported daily inspections; broken downspout threatens to drain into a pallet; reported similar problem from roof gutter. Found open trash bin; closed immediately. Pipes, parts, empty poly tank, and drums of potentially-contaminated soil found in outside alley of building 4; instructed Contact to sample runoff here due to industrial activity.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-10-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility is part of group monitoring. Sample is a composite from several discharge points serving different drainage areas. Told Contact that this was ineffective because it doesn't provide sufficient resolution to determine if BMPs are effective in each of the drainage areas. Area beneath and surrounding the roof-mounted chiller motors is stained with oil; observed bottles of make-up oil nearby indicative of a chronic problem. Although motors are protected by a fixed roof, drainage allows runoff to flow over the oil stains resulting in staining leading from the area. Observed a greenish stain on the roof from an exhaust vent. Stores chemicals in 55-gallon drums on containment pallets; has plans to install a fixed roof over this storage area. Planned roof is not reflected in SWPPP. Has a wastewater treatment area where the floor drain is part of a capture-use system for storm water. Has two open 55-gallon metal drums stored outside with small quantities of water inside; drums are heavily rusted, polluting the water inside. Stores various rusting metal parts outside shop area. Some implemented and planned BMPs are not reflected in the SWPPP; SWPPP needs to be better refined to reflect all BMPs.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still

AMETEK AEROSPACE INC (Continued) **1000417275**

Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that

AMETEK AEROSPACE INC (Continued) **1000417275**

these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/06/2023

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Elevation:	96 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015903 NEWPORT BEACH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

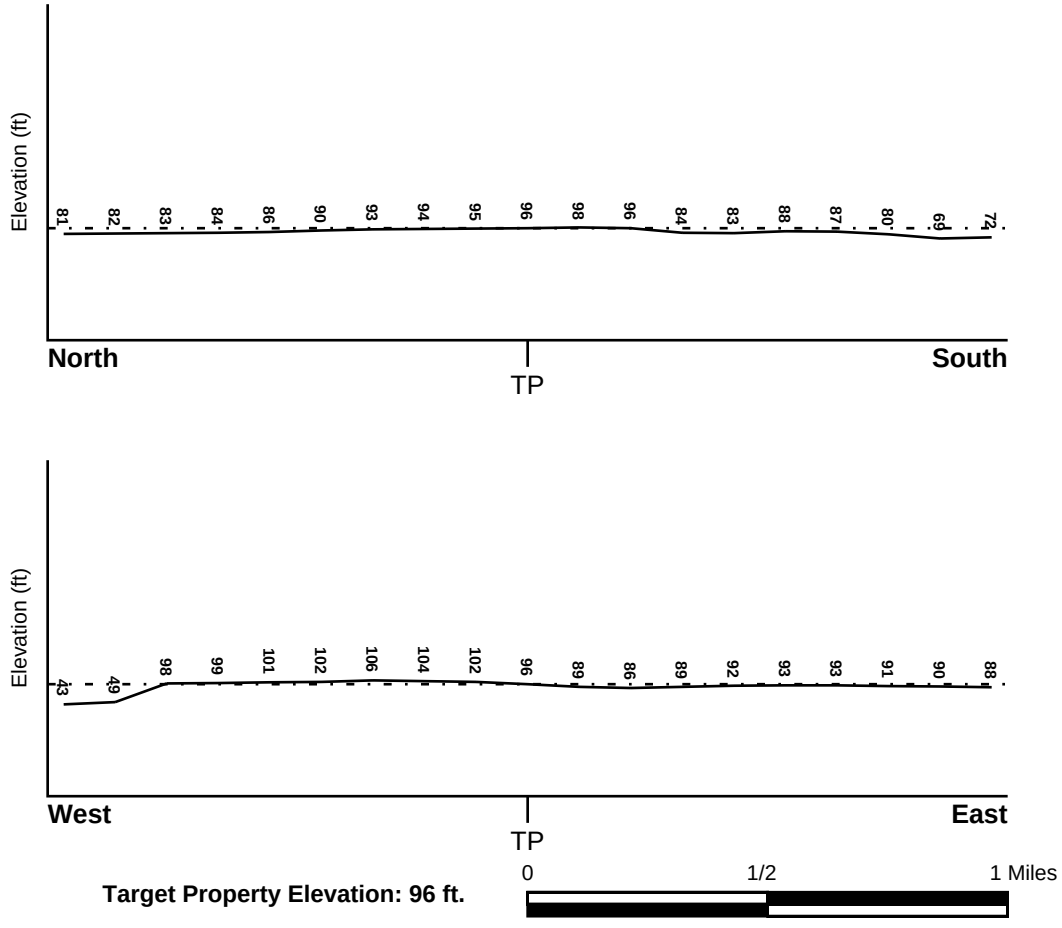
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	HUGHES AIRCRAFT CO
Site EPA ID Number:	CAD057468944
Groundwater Flow Direction:	GENERALLY SE IN THE ALLUVIAL ZONE AT AN APPROXIMATE RATE OF 250 TO 1,000 FEET PER YEAR AND GENERALLY SE IN THE MONTEREY FORMATION AT AN APPROXIMATE RATE OF 2 TO 25 FEET PER YEAR.
Measured Depth to Water:	33 to 45 feet in the alluvial zone and 48 to 57 feet in the Monterey formation.
Hydraulic Connection:	The shallow alluvial zone is considered a perched aquifer that overlies the silty clay Monterey formation.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	11 inches	18 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	18 inches	27 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	27 inches	70 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
5	70 inches	79 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Barr & Clark were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Certified Sanborn® Map Report

06/23/23

Site Name:

Parking Lot
695 West 19th Street
Costa Mesa, CA 92627
EDR Inquiry # 7373536.3

Client Name:

Barr & Clark
12684 Hoover Street
Garden Grove, CA 92841
Contact: Michael Atallah

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Barr & Clark were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7B25-424B-B4E7

Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 7B25-424B-B4E7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Barr & Clark (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Eval Notes:	Onsite to conduct a routine hazardous waste inspection. Met with Rose Aguilar. Inspected hazardous waste broken products and returns in storage bins and drums. Drums and bins were provided with a lid, stored in a secure manner and appear to be in good condition. A Hazardous Waste label was noted on all drums and bins with the required identification. Municipal dumpster area does not appear to contain any hazardous waste. Hazardous Waste Emergency Response plan was available for review. Manifests and bills of lading for all hazardous waste streams were reviewed today. Ensure all hazardous waste manifests/disposal documents are maintained on site for at least three years from the date of transport and are available for review during normal business hours. Please continue to ensure all universal wastes (fluorescent lamps, batteries, paint, electronics, etc.) are managed appropriately. Continue to maintain disposal records for these hazardous wastes. Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-03-2021
Violations Found:	Yes
Eval Type:	Routine done by local agency

THIRIFTY OIL CO SS #139 (ARCO), 799 W 19TH ST, COSTA MESA, CA 92627 (Continued)

Eval Notes:	On site to conduct a routine monitoring certification inspection. Met with Steven Loera, service technician with Fastech. The following certifications were verified: ICC, VR, VMI. Also met with Alfredo Zamora, store manager at the site. The facility has three double-walled USTs: 12K Diesel, 12K 91, and 15K 87. Overfill prevention is provided by a flapper valve in the drop tube of each tank. The UST system is monitored by a Veeder-Root TLS-350R panel. The tanks are monitored as follows: Dry Annulars: VR-420 STP Sumps/Fill Sumps: VR-208 Line leak detectors: VR PLLDs (87, 91), VMI LD 2000 (Diesel) UDCs 1-12: VR-208 Line leak detectors were tested and passed. All sensors were tested hydrostatically and passed. Spill containers were tested hydrostatically for 1 hour and passed. The following documents were reviewed: -Permit -Monitoring Plan, Response Plan -DO Monthly Reports, DO Training -Last Monitoring Cert Date: 2/11/20 -Last SB989 Date: [Truncated]

Eval Notes:	On site for a routine UST inspection, monitoring system certification, and spill bucket testing. Inspection was conducted with Areli Gonzalez, manager. The facility has 3 double-walled tanks (diesel, 87, and 91) with pressurized piping. The UST system is monitored by a VR TLS-350 system. The monitor is operational for audible and visual alarms. Flapper valves are used for overfill protection. Alarm history was reviewed. The annular sensor (VR 420) for the 91 tank failed upon testing. This sensor was replaced during the inspection and passed after replacement. The rest of the sensors in the tank annulars (VR 420) and piping sumps (VR 208) were tested and passed. Line leak detectors were tested and operational. UDC sensors (VR 208) were tested and passed. Spill bucket testing was completed after inspector departure. Testing was conducted by Steven Gallardo of Fastech. Technician certifications (ICC/VR) were verified. Please submit the test reports to this agency within [Truncated]

Eval Notes:	UST submission declined in CERS. The following notes were included in the review: "The most recent monitor system certification results show that the 91 and diesel tanks have VMI LD2000s for the leak detectors and the 87 tanks has a RJ FX1V. The current UST submissions shows the 87 and Diesel with the LD2000s and the 91 with the RJ FX1V. Please verify the correct setup resubmit. If the current submission is correct, leave a note confirming this in the submission. For UDC sensors, change the field for UDC monitoring stops flow of product at dispenser (field 490-62) to no. Specify yes for UST monitoring plan training (field 490-69b) Submit new certificate of financial assurance. This document must be renewed every year. The current submission is dated 3/22/16. Please resubmit within 30 days."

WINALL OIL CO #11, 790 W 19TH ST, COSTA MESA, CA 92627-3574 (Continued)

Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 02/17/2021. OBSERVATION: Overfill Prevention Equipment Inspection Form dated 10/22/20 indicate the following components failed: Diesel, 87#1, 87#2, 91, and 89 tank shut-off valves (flapper) - All activate at greater than 95% capacity. CORRECTIVE ACTION: Correct all overfill prevention equipment so as to shut-off flow to the tank when the tank is filled to no more than 95% capacity. Provide test results to this agency within 30 days.

Eval Notes:	On site to conduct a routine monitoring certification inspection. Met with Jose Rodriguez, service technician with California Maintenance & Environmental. The following certifications were verified: ICC, VR, VMI. Also met with Jonathan Rivera, manager at the site. The facility has five double-walled USTs: 12K Diesel, 12K 87 #1, 12K 87 #2, 12K 91, and 12K 89. Overfill prevention is provided by a flapper valve in the drop tube of each tank. The UST system is monitored using a Gilbarco EMC panel. The tanks are monitored as follows: Dry Annulars: VR-420 STP Sumps/Fill Sumps/TLM Sumps: VR-208 Mechanical line leak detectors: FE PETRO STP-MLD All sensors were tested hydrostatically and passed. Fail safe and sensor-out were demonstrated operational. Spill buckets were tested hydrostatically for 1 hour and passed. Mechanical line leak detector testing was not witnessed by this agency. Per technician, all line leak detectors passed the line leak detector [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	On site for annual underground storage tank inspection - to inspect tank sumps, dispenser containment (UDC) sumps, sensor placement, and review required documentation during the monitoring system certification, leak detector and spill bucket testing. Testing is being performed prior to the annual test due date of January 2018 due to completion of construction (SR0130288) to replace UDCs and remove Healy tank. New Bravo fiberglass single-wall UDCs were replaced for all 9 dispensers, the Healy tank was removed and Veeder Root Carbon Canister installed, installation of vent transition box, replacement of FE Petro 1.5 HP turbines for all 5 USTs with FE Petro 2.0 HP turbines, and replacing the VMI LD2000 MLLDs with FE Petro STP MLLDs. Agreed this date would begin the new annual testing cycle. Met with Miguel Gomez and Dave Tungate, both with contractor Petro Builders. Testing of monitoring equipment was performed by Patrick McMurphy with California Maintenance & [Truncated]
Eval Division:	Orange County Environmental Health
Eval Program:	UST
Eval Source:	CERS,
Eval General Type:	Other/Unknown
Eval Date:	10-27-2020
Violations Found:	Yes
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Received Monitoring System Certification Form and Spill Container Testing Report Form dated 10/22/20. Results indicate all components passed. Received Overfill Prevention Equipment Inspection Form dated 10/22/20. Results indicate the following components failed: -Diesel, 87 #1, 87 #2, 91, and 89 tanks shut-off valves (flapper) - All activate at greater than 95% capacity Violation I101 has been cited below. Emailed a copy of this report to agimenez@winalloil.com.
